The Master of Public Health (MPH) is a multi-disciplinary professional degree program for graduate level practical training. It provides grounding in foundational public health knowledge and core competencies, as well as depth of training in concentration areas of specialized public health practice. The MPH in Occupational Safety and Health focuses on evaluating and providing interventions to reduce risk of injury and illness using ergonomics, human factors, and wellness for future, current and past workers.

The MPH in Occupational Safety and Health prepares students to:

- Evaluate occupational health risk in work settings.
- Implement theoretical models relevant to Occupational Health risk evaluation in the lab or field.
- Appraise experimental designs to appropriately address specific research questions in the field of Occupational Health.
- Synthesize knowledge of analytical techniques with theoretical models in Occupational Health to solve field problems.
- Develop and defend research plans appropriate for industrial or academic audience.

The program has several major academic components:

- The introductory Integrated MPH Core classes, along with students of all MPH concentrations, for exposure to foundational principles and methods in public health practice
- Required and elective concentration coursework in occupational health theory and methods
- The potential for additional public health related elective course work.

Though the MPH is a non-thesis degree program, it includes culminating experiences:

- A practicum that provides an applied practical experience with a field-based preceptor, for students to demonstrate overall public health and concentration focused problem-solving skills
- A capstone integrative learning experience for students to bring together and apply foundational and concentration competencies, including production of a high-quality written professional product.

Effective public health professionals must work across multiple disciplines and systems to address population health problems. All MPH students are expected to participate in an interprofessional team practical activity during their degree programs. See the IPE Learning Opportunities at the Texas A&M Health Office of Interprofessional Education and Research (https://health.tamu.edu/iper/).

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

For more details on the degree program, visit the Department of Environmental and Occupational Health (https://public-health.tamu.edu/departments/eh/).
approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Graduate and Professional School.

Grades for courses completed at other institutions are not included in computing the GPA.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A zero credit 684 or 685 course is only allowed for non-thesis option master’s students. A zero credit 681 course can be used for either thesis or non-thesis option master’s students. Other courses, including 691 research hours, are not eligible for zero credit.
4. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
5. Undergraduate courses are not allowed to transfer to the MPH degree program.
6. Continuing education courses may not be used for graduate credit.
7. Extension courses are not acceptable for credit.
8. For non-distance degree programs, no more than 50 percent of the credit hours required for the program may be completed through distance education courses.
9. To receive a graduate degree from Texas A&M University, students must earn one-third or more of the credits through the institution’s own direct instruction. This limitation also applies to joint degree programs.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee, department Chair, school Academic Affairs Office, and approved by the Graduate and Professional School.

Additional Requirements

**Scholastic Requirements**

To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPA. If a student fails to attain a cumulative 3.000 GPA, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPA to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPA to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health’s Academic Affairs Office will recommend that the Graduate and Professional School block the student from further enrollment. If a student is blocked from further enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

**Foreign Languages**

No specific language requirement exists for the Master of Public Health degree program.

**Internship or Practicum**

Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHED 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (http://catalog.tamu.edu/graduate/academic-expectations-general-degree-requirements/#degreerequirementstext) section.
