SENG 655/CHEN 655 Process Safety Engineering
Credits 3. 3 Lecture Hours. Applications of engineering principles to process hazards analysis including source and dispersion modeling, emergency relief systems, fire and explosion prevention and mitigation, hazard identification, risk assessment, process safety management, etc. Prerequisite: Graduate classification; approval of instructor. Cross Listing: CHEN 655/SENG 655.

SENG 660 Quantitative Risk Analysis
Credits 3. 3 Lecture Hours. Fundamental concepts, techniques, and applications of quantitative risk analysis and risk-informed decision making for all engineering fields; practical uses of probabilistic methods are demonstrated in exercises and case studies from diverse engineering areas. Prerequisites: Graduate classification. Cross Listing: CHEN 660 and ISEN 660.

SENG 670 Safety Management Systems
Credits 3. 3 Lecture Hours. Fundamentals concepts and principles of safety management; demonstration of practical application of management techniques to ensure safe operation of industrial processes; current safety management system standards and regulations. Prerequisite: Graduate classification or approval of instructor.

SENG 674 System Safety Engineering
Credits 3. 3 Lecture Hours. Current system safety engineering analysis techniques; failure mode and effect and fault tree analysis; engineering economic analysis is reviewed to develop skills for the safety engineer in presenting alternate solutions to management.

SENG 677 Fire Protection Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours. Theory of combustion, characteristics of flammables, fire resistance, fire spread, fire protection principles, public and private fire service organization and equipment; automatic extinguishing systems; fire protection analysis and design projects.

SENG 680 Fundamentals of Safety
Credits 3. 3 Lecture Hours. General concepts and techniques of safety engineering upon which more detailed and advanced applications may be based; applications of safety engineering principles to industrial and commercial systems; the concept of designing optimally safe systems. Prerequisite: Graduate classification or approval of instructor.

SENG 681 Seminar
Credit 1. 1 Other Hour. Formal presentations in industrial hygiene and safety engineering by students and professional industrial representatives.

SENG 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours. Training under the supervision of practicing engineers in settings appropriate to the student’s professional objectives. Prerequisites: Approval of chair of student’s advisory committee and department head.

SENG 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours. Investigation of topics not within the scope of thesis or dissertation research and not covered by other formal courses.

SENG 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of safety engineering and industrial hygiene. May be repeated for credit. Prerequisite: Approval of instructor.

SENG 691 Research
Credits 1 to 23. 1 to 23 Other Hours. Research in industrial hygiene, safety engineering or related topics for thesis or dissertation.
