- Successfully complete required sea service and minimum training cruise requirements
- Pass a comprehensive professional examination (either the Third Mate Unlimited- Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).
- Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.

Department of Maritime Business Administration

Our Mission
To develop inspirational leaders through innovative teaching, impactful research, and meaningful service to our community and the maritime industry while increasing global recognition.

Minors
- Maritime Business Administration Minor (p. 836)

Maritime Business Administration - BS

The Maritime Business Administration undergraduate curriculum, offered on the Galveston Campus, provides a solid background in the key areas of accounting, finance, marketing, law, economics and mathematics that are critical for today's business professional. These courses lay the foundation for more advanced courses in international trade, inland waterways management, brokerage and chartering, organizational behavior, transportation economics, port and terminal management and other areas related to the maritime industry.

International trade is expanding as a result of the general increase in world-wide economic and political stability and this trend is expected to increase, as major economies such as China and Russia participate more fully in world-wide economic growth. The great majority of this expanded trade will be carried by ship. As a result, activity in American ports is
expected to more than double in the next 20 years, and some ports in the Gulf of Mexico are expected to see a tripling of port activity. Additionally, the next 40 years will see greatly expanded oil and gas production in the deep waters of the western Gulf of Mexico. Taken together, these forces are now and will continue to positively affect demand for trained maritime professionals ashore. Maritime Business Administration graduates are ideally poised to meet the increasing demand for well educated maritime professionals.

Additionally, qualified undergraduate students have the opportunity to earn a Bachelor of Science and a Master of Maritime Business Administration and Logistics (p. 834) in five years time through the Department of Maritime Business Administration’s 3+2 program.

Upper-Level Entry Requirements and Application Procedures

Students accepted to the Department of Maritime Business Administration enter the Bachelor of Science in Maritime Business Administration program at the lower-level. Enrollment of students in junior and senior level courses is limited to those who have been admitted to upper-level. Entry requirements and application procedures for the upper-level are as follows.

1. To be admitted to upper-level, a student must have been accepted to the Department of Maritime Business Administration and have:
   a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 229</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECON 202</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 203</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 140</td>
<td>Mathematics for Business and Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Business Calculus</td>
<td>3</td>
</tr>
</tbody>
</table>

b. Students must successfully complete these three remaining lower-level courses during their first upper-level semester, unless satisfactorily completed prior to entering upper-level:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>MARA 250</td>
<td>Management Information Systems</td>
<td>2</td>
</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

c. Students may preregister for upper-level courses in the semester their status is changed to upper-level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level classes.

d. Lower-level students are not required to apply for a change of status to upper-level. An automated process is performed several times each semester comparing a student’s academic record to the upper-level entry requirements. Qualifying lower-level students are automatically moved to upper-level and informed of their change-in status through TAMU email.

2. Transfer Students: Transfer students admitted to the Department of Maritime Business Administration will be classified as lower-level students until they complete all requirements listed in Item 1. Transfer students may immediately request upper-level status when admitted to the university only if they meet all upper-level requirements.

3. Change of curriculum students: Students approved to change their curriculum to Maritime Business Administration will be classified as lower-level until they complete all requirements listed previously in Item 1. Change of curriculum students who qualify for admission to upper-level may request this at time of acceptance.

4. Preference for available seats in junior and senior level courses taught through the Department of Maritime Business Administration will be granted to students who have been admitted to the upper-level program. Ineligible students who preregister for upper-level classes are subject to having their registration in these courses cancelled.

Indicates required courses in the Maritime Administration major. These courses will be used to compute the major GPR. At the time of graduation, a MARA major must have a GPR of at least 2.25 in their major. A MARA major must achieve a grade of ‘C’ or better in ACCT 229, ACCT 230, ECON 202, ECON 203 and SCMT 303 as a graduation requirement. These courses may be repeated as necessary to meet this requirement, and the requirement applies to courses taken at TAMUG or offered for transfer from other institutions.

Students must register for MARA 205 their first semester at Texas A&M University Galveston Campus.

Students may satisfy the 9-credit hours of Life and Physical Science requirement through any combination of one, three or four credit hour courses.

Students must satisfactorily complete ACCT 229, ECON 202, ECON 203, MATH 140 and MATH 142 prior to admission to upper-level BS-MARA.

Students must complete ACCT 230, MARA 250 and MGMT 211 during their first upper-level semester, unless satisfactorily completed prior to upper-level admission.

MATH 148, MATH 152, MATH 168 and MATH 172 will be accepted in lieu of MATH 140.

MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

8 Designated writing intensive course.

9 Students should select 18 hours from the following courses: ACCT 315, ACCT 316, ECON 311, ECON 323, ECON 452, MARA 342, MARA 401, MARA 402, MARA 416, MARA 424, MARA 435, MARA 450, MARA 470, MARA 475, MARA 484, MARA 485, MARA 489, MARA 491, MARA 493 and SCMT 336.

10 Satisfies the 3 credit hour Cultural Discourse (p. 46) (CD) requirement.

11 Satisfies the 3 credit hour International and Cultural Diversity (p. 47) (ICD) requirement.

**TOTAL PROGRAM HOURS 120**

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum (p. 25) for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences.

The total hours may be increased if the student is required to take remedial math, remedial English or foreign language courses.

To earn the economics minor, the student’s elective hours must include ECON 311, ECON 323 and ECON 452. For additional requirements of the economics minor, please see the website: [http://www.tamug.edu/academics/Minors.html](http://www.tamug.edu/academics/Minors.html).

**Maritime Business Administration - 5-Year Bachelor of Science/Master of Maritime Business Administration and Logistics**

This program allows Maritime Business Administration (MBAU) majors to enter the graduate program for a Master of Maritime Business Administration and Logistics at the beginning of their senior year, enabling students to receive their Bachelor of Science in Maritime Business Administration (MBAU) undergraduate degree and a Master of Maritime Business Administration and Logistics (MBAA) graduate degree in five years.

Students admitted to the 5-year combined degree program will have completed 92 of the 120 hours of course work required to receive a bachelor’s degree. These courses must include the specific prerequisites for a Bachelor of Science degree in Maritime Business Administration, as well as the required Texas A&M University core curriculum courses. Maritime Business Administration majors who have at least a 3.00 GPA and who have taken all of their prerequisite courses and otherwise completed 92 hours by the fall of their fourth year will be eligible to apply for the 5-year combined program during their junior year. Applicants to the 5-year combined program will submit the same materials (including GMAT scores) as other MBA applicants. Those whose records are judged competitive, using the same admission criteria as for other MBA students, will be admitted.
Students who choose not to finish the MBAA degree after being admitted to the 5-year combined program may exit the program at any time. Completed MBAA courses will be applied to their bachelor's degree in Maritime Business Administration, as appropriate. Failure to complete the MBAA program will in no way impede their ability to attain a bachelor's degree in Maritime Business Administration when the requirements for that degree are completed. Those who pursue the combined program will receive both degrees upon completion of the entire 5-year combined program. Students will not graduate with a bachelor's degree in year four, but rather will earn both their Bachelor of Science in Maritime Business Administration and Master of Maritime Business Administration and Logistics at the end of year five.

Admitted students will be allowed to enroll in Maritime Business Administration and Logistics graduate courses with an undergraduate classification (U4) during the fall of their fourth year and will be reclassified as degree seeking master's students (G7) upon completing 107 credit hours. This will normally occur at the beginning of the spring semester of year four. Students will take 9 fewer undergraduate credit hours. Graduate courses taken in the fifth year program will be counted double, as credit towards their MBAA degree, and as substitutes and free electives required for the MBAU bachelor's degree.

Students will be required to complete 36 graduate hours. The graduate hours will include 7 core courses (21 credits) in economics, management, operations and logistics with 15 credit hours of electives. The electives will be chosen according to the interest of the student in consultation with an academic adviser. Students will also take 21 hours of undergraduate level electives that must include MARA 416 in order to satisfy the TAMU intensive writing requirement.

The combined program requires a minimum record of 156 semester credit hours. All undergraduate courses are offered on the Galveston Campus. Graduate level courses may be offered as traditional format courses on the Galveston campus or via asynchronous distance education delivery.

**TOTAL PROGRAM HOURS 156**

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum (p. 25) for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences.

To earn the economics minor, the student’s elective hours must include ECON 311, ECON 323 and ECON 452. For additional requirements of the economics minor, please see the website: http://www.tamug.edu/academics/Minors.html.

---

### Maritime Business Administration - Minor

The minor in Maritime Business Administration, offered on the Galveston campus, is designed to provide the student with fundamental knowledge in the business of water transportation. Students are required to complete 18 credit hours consisting of 9 hours of required coursework in general business and the maritime industry, and 9 credit hours from an approved list of maritime course electives.

8. Satisfies the intensive writing requirement.
9. Credit by examination given for MARA 466.
10. Satisfies the 3 credit hour Cultural Discourse (p. 46) (CD) requirement.
11. Satisfies the 3 credit hour International and Cultural Diversity (p. 47) (ICD) requirement.
12. Courses to be used to meet both Undergraduate and Graduate requirements.
Department of Maritime Transportation

This program combines studies in the humanities and sciences with instruction and training in maritime disciplines to provide the U.S. Maritime Service Cadet with a broad-based education. The student who successfully completes the license program will be qualified to sit for the U.S. Coast Guard license examination as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels and issuance of Standards of Training, Certification and Watchkeeping (STCW) credentials. Cadets are also provided with solid fundamentals in business topics related to the maritime industry, ashore and afloat. Cadets who enroll in and apply to graduate in Marine Transportation must successfully complete the license examination for Third Mate in order to graduate from Texas A&M University.

Courses earning USCG or STCW qualifications, sea-time remission or STCW competency certification require a minimum grade of C (70%). In addition, all STCW proficiencies must be satisfactorily completed with a grade of 70% or better (See applicable course outlines available through the department).

### Total Semester Credit Hours: 12

#### Requirements

- **Fall:** 33 credit hours
- **Spring:** 36 credit hours
- **Summer:** 4 credit hours
- **Fourth Year:** 31 credit hours

### Notes:

1. Indicates required courses in the Marine Transportation major. These courses will be used to compute the major GPR, which must be at least 2.25.
2. Indicates license courses leading to a USCG/STCW license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or accrual. Students will be required to repeat the course until they earn a grade of C (70%) or better. MART 307 GMDSS requires a score of 75% or better.
3. Indicates a course that satisfies the writing intensive course requirements of the university.
4. Approved Electives in Field include but are not limited to ACCT 229; MART 205, MART 213, MART 308, MART 311, MART 485, MART 489, MARA 304, MARA 342, MARA 363, MARA 401, MARA 402, MARA 424, MARA 440, MARA 450.
5. MART 498 must be taken within one year of graduation to receive USCG approval.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at [http://core.tamu.edu/](http://core.tamu.edu/) for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

MART students are required to earn a grade of C or better in all MART courses, including electives in field.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses, or any of the six hour cruise options. The six hour cruise options (NAUT 200, NAUT 300 and NAUT 400 or MARR 200, MARR 300 and MARR 400) do not add any required hours to the degree plan.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified License Option cadet. Refer to the University catalog section for the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:

- Successfully complete required sea service and minimum training cruise requirements.
- Pass a comprehensive professional examination (either the Third Mate Unlimited- Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).
- Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).
Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.
Texas A&M University at Qatar

Texas A&M University at Qatar Joint Advisory Board

The Joint Advisory Board (JAB) of Texas A&M University at Qatar was established May 25, 2003, between Texas A&M University and Qatar Foundation for Education, Science and Community Development to provide advice regarding the management and operation of Texas A&M at Qatar the Dean and CEO and to Qatar Foundation. The JAB is primarily responsible for ongoing review and evaluation of the success of Texas A&M at Qatar.

Joint Advisory Board Members

His Excellency, Mohammed bin Saleh Al-Sada. Ph.D. — Chairman
Former Minister of Energy and Industry, State of Qatar

Carol A. Fierke, Ph.D. — Vice Chair
Provost and Executive Vice President, Texas A&M University

M. Katherine Banks, Ph.D.
Vice Chancellor for Engineering, The Texas A&M University System
Dean, College of Engineering at Texas A&M University
Director, Texas Engineering Experiment Station

W.L. (Bill) Bullock, Jr.
President, Asia Pacific & Middle East, ConocoPhillips

Olivier Dubrule, Ph.D.
Professor, Department of Earth Sciences and Engineering, Imperial College London

Pam Matthews, Ph.D.
Dean of the College of Liberal Arts, Texas A&M University

Robert Gordon Moore, Ph.D.
Professor, Chemical and Petroleum Engineering Department, University of Calgary, Canada

Alistair Routledge
President and General Manager, ExxonMobil Qatar

Marc Vermeersch, Ph.D.
Executive Director, Qatar Environment and Energy Research Institute (QEERI)

Ex-officio Members

Buthaina A. Al-Nuaimi
President of Pre-University Education, Qatar Foundation

César O. Malavé, Ph.D., P.E.
Dean, Texas A&M University at Qatar

Ioannis G. Economou, Ph.D. — Secretariat
Associate Dean
Professor of Chemical Engineering, Texas A&M University at Qatar

Texas A&M University at Qatar Administrative Officers

The leadership of Texas A&M University at Qatar is responsible for the vision of the campus. This vision is simple: to be the premier provider of engineering education in the region, a significant contributor to knowledge internationally and an essential resource to the State of Qatar.

César O. Malavé
Dean

Ioannis G. Economou
Associate Dean for Academic Affairs

Hassan S. Bazzi
Associate Dean for Research and Executive Director of Development, Engagement, and Outreach

Hazem Nounou
Assistant Dean for Academic and Student Services

Rosalie Nickles
Assistant Dean for Finance and Administrative Services

Texas A&M University at Qatar Program Chairs

Patrick Linke
Chemical Engineering Program Chair

Erchin Serpedin
Electrical Engineering Program Chair

Joseph Ura
Interim Liberal Arts Program Chair

Ibrahim Galal Hassan
Interim Mechanical Engineering Program Chair

Patrick Linke
Interim Petroleum Engineering Program Chair

Hassan S. Bazzi
Interim Science Program Chair

General Statement

Texas A&M’s branch campus in Qatar, part of the 2,500-acre multi-institutional campus known as Education City formally opened on September 7, 2003, offering undergraduate degree programs in chemical, electrical, mechanical, and petroleum engineering. Texas A&M’s engineering program is widely considered among the best in America, and the curricula offered at the Qatar campus are materially the same as those offered at the main campus located in College Station, Texas. Texas A&M University at Qatar is fully funded by the Qatar Foundation for Education, Science, and Community Development and provides a unique opportunity for the University to expand its international presence and provide educational and research opportunities for faculty and students.

Mission Statement

The mission of the Qatar campus is to develop exemplary engineers and leaders through internationally respected undergraduate and graduate degree programs. Texas A&M at Qatar generates new knowledge by conducting research and disseminating results. In all of its efforts, Texas
A&M at Qatar serves the needs of the State of Qatar and the region through broad expertise.

**Qatar Foundation and Education City**

Founded in 1995 by His Highness Sheikh Hamad bin Khalifa Al-Thani, who was then the emir and now is the father emir, the Qatar Foundation for Education, Science and Community Development's guiding principle is that a nation's most valuable natural resource is its people. The foundation's symbol is the Sidra tree, whose deep, solid roots reflect the foundation's regard for Qatari culture and whose fruits carry the seeds of hope for a better tomorrow.

Her Highness Sheikha Moza bint Nasser serves as chairperson of the Qatar Foundation and guides the nonprofit organization's programs and philosophies. Among those philosophies is a commitment to making Qatar a world-renowned center for higher learning.

To that end, the Qatar Foundation's most visionary undertaking, Education City, was founded in 1997. The 2,500-acre complex outside of Doha, Qatar, boasts state-of-the-art facilities and a forward-thinking agenda that has enticed some of the world's top universities to open branch campuses. In 2003, Texas A&M at Qatar joined Virginia Commonwealth University School for the Arts and Weill Cornell Medical College in offering undergraduate degree programs at Education City. In 2004, Carnegie Mellon University came aboard, followed by Georgetown University in 2005, Northwestern University in 2008, University College of London in 2010, and HEC Paris in 2011, and negotiations with other institutions of higher learning continue. It is also the home of Hamad bin Khalifa University. In addition, the Qatar Science and Technology Park, an extensive, state-of-the-art research complex, is providing opportunities for research partnerships between business, government and academic institutions.

The missions of Education City are clearly defined: to prepare world-class graduates capable of assuming professional leadership positions in Qatar, throughout the Gulf region, and around the world, and to make Qatar a world leader in higher education and cutting-edge research. Texas A&M at Qatar is proud to take part in achieving the goals of the Qatar Foundation, which so closely resemble its own commitments to education and community service.

**Faculty**

Abdalla, Ahmed A, Associate Professor  
Texas A&M University at Qatar  
PHD, North Carolina State University, 2001

Abdel-Wahab, Ahmed I, Professor  
Texas A&M University at Qatar  
PHD, Texas A&M University, 2003

Abu-Rub, Haithem A, Professor  
Texas A&M University at Qatar  
PHD, Gdansk University of Technology, Poland, 1995

Al-Hashimi, Mohammed, Research Associate Professor  
Texas A&M University at Qatar  
PHD, Queen Mary Westfield College, University of London, 2007

Al-Mohannadi, Dhabia, Assistant Professor  
Texas A&M University at Qatar  
PHD, Texas A&M University, 2019

Al-Mohannadi, Nasser, Professor of the Practice  
Texas A&M University at Qatar  
PHD, Colorado School of Mines, 2004

Al-Rawashdeh, Ma'moun, Assistant Professor  
Texas A&M University at Qatar  
PHD, Technical University of Eindhoven, Netherlands, 2013

Alnuweiri, Hussein, Professor  
Texas A&M University at Qatar  
PHD, University of Southern California, 1989

Alonso, Ricardo, Associate Professor  
Texas A&M University at Qatar  
PHD, The University of Texas at Austin, 2008

Alyafei, Nayef M, Assistant Professor  
Texas A&M University at Qatar  
PHD, Imperial College London, United Kingdom, 2015

Amani, Mahmood, Associate Professor  
Texas A&M University at Qatar  
PHD, Texas A&M University, 1997

Alyafei, Nayef M, Assistant Professor  
Texas A&M University at Qatar  
PHD, Imperial College London, United Kingdom, 2015

Balog Jr, Robert S, Associate Professor  
Texas A&M University at Qatar  
PHD, University of Illinois, 2006

Bashir, Hassan, Associate Professor  
Texas A&M University at Qatar  
PHD, Texas A&M University, 2008

Bazz, Hassan S, Professor  
Texas A&M University at Qatar  
PHD, McGill University, 2003

Belic, Milivoj R, Professor  
Texas A&M University at Qatar  
PHD, The City University of New York, 1980

Bengali, Ashfaq A, Professor  
Texas A&M University at Qatar  
PHD, University of Minnesota, 1992

Bouhali, Othmane, Research Professor  
Texas A&M University at Qatar  
PHD, Universite Libre de Bruxelles, Faculte des Sciences, 1999

Bounds, Brittany, Instructional Assistant Professor  
Texas A&M University at Qatar  
MA, California State University Northridge, 2009

Boutros, Joseph J, Professor  
Texas A&M University at Qatar  
PHD, Telecom Paris Tech (ENST), 1996

Brothers, Edward N, Professor  
Texas A&M University at Qatar  
PHD, Pennsylvania State University, 1997
Brothers, Nicole M, Clinical Assistant Professor
Texas A&M University at Qatar
MLS, University of Pittsburgh, 2011

Cath, Adam E, Clinical Associate Professor
Texas A&M University at Qatar
MLS, Victoria University of Wellington, 1997

Cheng, Zheng Dong, Professor
Texas A&M University at Qatar
PHD, Princeton University, 1999

Economou, Ioannis, Professor
Texas A&M University at Qatar
PHD, Johns Hopkins University, 1993

El Borgi, Sami, Professor
Texas A&M University at Qatar
PHD, Cornell University, 1993

Elbashir, Nimir O, Professor
Texas A&M University at Qatar
PHD, Auburn University, 2004

Elbashir, Nimir O, Professor
Texas A&M University at Qatar
PHD, Auburn University, 2004

Elgindi, Ali, Instructional Assistant Professor
Texas A&M University at Qatar
PHD, University of Chicago, 2011

Elsheikh, Aymen E, Instructional Assistant Professor
Texas A&M University at Qatar
PHD, Indiana University-Bloomington, 2012

Eslami, Zohreh R, Professor
Texas A&M University at Qatar
PHD, University of Illinois at Urbana-Champaign, 1992

Fadlelmula, Mohamed, Instructional Assistant Professor
Texas A&M University at Qatar
PHD, Middle East Technical University, 2012

Ghrayeb, Ali, Professor
Texas A&M University at Qatar
PHD, University of Arizona, 2000

Gray, Phillip W, Assistant Professor
Texas A&M University at Qatar
PHD, Texas A&M University, 2006

Guerillot, Dominique R, Professor
Texas A&M University at Qatar
PHD, Universite De Provence, 1982

Guo, Bing, Associate Professor
Texas A&M University at Qatar
PHD, Tsinghua University, China, 1998

Hassan, Ibrahim, Professor
Texas A&M University at Qatar
PHD, Manitoba University, 1995

Hillman, Sara K, Assistant Professor
Texas A&M University at Qatar
PHD, Michigan State University, East Lansing, MI, 2011

Hingtgen, Luke, Visiting Lecturer
Texas A&M University at Qatar
CERT, DePaul University, 2017

Hodges, Amy M, Instructional Assistant Professor
Texas A&M University at Qatar
PHD, University of Arkansas, 2012

Huang, Tingwen, Professor
Texas A&M University at Qatar
PHD, Texas A&M University, 2002

Ji, Jim X, Professor
Texas A&M University at Qatar
PHD, University of Illinois, 2003

Kakosimos, Konstantinos E, Associate Professor
Texas A&M University at Qatar
PHD, Aristotle University, 2009

Karkoub, Mansour, Professor
Texas A&M University at Qatar
PHD, University of Minnesota, 1994

Krolikowski, Wieslaw Z, Professor
Texas A&M University at Qatar
PHD, Institute of Physics, Polish Academy of Sciences, 1988

Linke, Patrick, Professor
Texas A&M University at Qatar
PHD, University of Manchester Institute of Science and Technology, 2001

Madrahimov, Sherzod T, Assistant Professor
Texas A&M University at Qatar
PHD, University of Illinois, 2012

Malave, Cesear, Professor
Texas A&M University at Qatar
PHD, University of South Florida, 1987

Mansoor, Bilal, Associate Professor
Texas A&M University at Qatar
PHD, University of Michigan, 2010

Masad, Eyad A, Professor
Texas A&M University at Qatar
PHD, Washington State University, 1998

Mir, Nordine, Professor
Texas A&M University at Qatar
PHD, University of Rouen, France, 1998

Nha, Hyon Cheol, Professor
Texas A&M University at Qatar
PHD, Seoul National University, 2002

Nounou, Hazem N, Professor
Texas A&M University at Qatar

Majors

Chemical Engineering Program
• Bachelor of Science in Chemical Engineering (p. 862)

Electrical and Computer Engineering Program
• Bachelor of Science in Electrical Engineering (p. 863)

Mechanical Engineering Program
• Bachelor of Science in Mechanical Engineering (p. 866)

Petroleum Engineering Program
• Bachelor of Science in Petroleum Engineering (p. 867)

Minors
• Analysis, Design and Management of Energy Conversion Systems Minor (p. 468)
• Chemical Engineering Minor (p. 393)
• Chemistry Minor (p. 713)
• Control of Mechanical Systems Minor (p. 468)
• Design and Simulation of Mechanical Systems Minor (p. 468)
• Electrical Engineering Minor (p. 431)
• Geology Minor (p. 519)
• Mathematics Minor (p. 737)
• Petroleum Engineering Minor (p. 479)
• Physics Minor (p. 746)
• Political Science Minor (p. 844)
Certificates

The College of Engineering has designed several certificate programs to offer ambitious students the opportunity to go beyond the traditional curriculum and gain specific knowledge in a concentration area. Students are required to consult with their academic advisor prior to submitting an application for a certificate. Enrolling and being accepted into a certificate program does not guarantee registration into required courses or that courses will be offered at Texas A&M University at Qatar. For specific information on each certificate available, visit the College of Engineering website.

Masters

Chemical Engineering Program
• Master of Science in Chemical Engineering (http://catalog.tamu.edu/graduate/qatar/engineering/chemical-engineering-ms/)
• Master of Engineering in Chemical Engineering (http://catalog.tamu.edu/graduate/qatar/engineering/chemical-engineering-meng/)

Doctoral

Chemical Engineering Program
• Doctor of Philosophy in Chemical Engineering

Political Science - Minor

The Political Science minor at Texas A&M University at Qatar gives students an opportunity to enhance their study of any field with an understanding of political, legal and regulatory processes in the United States and/or internationally. Since nearly all human activities are influenced by politics, understanding the dynamics between organizational structures and human behavior can give students greater insight into the factors shaping their major field of study. Through the Political Science minor, Texas A&M University at Qatar is committed to equipping students with the analytical skills to understand and influence group choices in whatever setting they find themselves. The minor offers flexibility by allowing students to work closely with liberal arts faculty to design coursework tailored to individual student objectives.

Programs of Study at Texas A&M University at Qatar

Texas A&M University's College of Engineering strives to provide its students with a high-quality education that will prepare them for a wide range of careers at the forefront of the engineering field. The curriculum is designed to accomplish this by closely integrating cutting-edge basic and applied research with innovative classroom instruction. Texas A&M University's engineering programs are routinely ranked among the best in the U.S., and graduates are highly sought-after to provide leadership and innovative solutions to global challenges.

Our faculty members maintain active research programs in a wide range of areas. In addition, our undergraduate students participate in numerous co-op and internship programs, which give them the opportunity to apply their knowledge to real-world challenges in a variety of settings.

At Texas A&M University at Qatar, engineering students take courses in the fundamental disciplines—mathematics, sciences, and liberal arts—that will prepare them for the rigorous technical training that follows. This training is dedicated to specialized studies in one of the four engineering fields offered at Texas A&M University at Qatar. After completing intensive, demanding course work and practical experience, students are ready to step into their professional fields and make immediate, meaningful contributions.

College Prerequisite Policy

The following prerequisite policy applies to any student in a College of Engineering undergraduate degree program and to any student who seeks admission to an undergraduate degree program in the College of Engineering. This policy is in addition to prerequisite policies imposed by the University (Texas A&M University Student Rules). For complete details concerning this policy, students should contact their Undergraduate Advising Office.
Students must earn a grade of C or better in all courses identified in each College of Engineering undergraduate degree program and any prerequisites for these courses. If a student earns a grade of D or F in any of these courses, the student is required to repeat the course before enrolling in a more advanced course that has the D/F course as a prerequisite. A student may attempt a course no more than three times, including courses graded Q or W but excluding those graded NG, unless approval has been received from their department. A student must complete all prerequisites for a course with a grade of C or better by the start of the semester in which the student plans to enroll in the course.

A student is responsible for checking the prerequisites for each course to ensure the prerequisite requirements have been satisfied. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. A student who is told to drop a course and is still enrolled by the deadline set each semester may be administratively dropped by their department. If a student is administratively dropped from a course, the student is responsible for all financial obligations associated with the drop. An administrative drop may adversely impact (including, but not limited to): health insurance benefits, financial aid, athletic eligibility, INS status, veterans’ benefits, and eligibility to participate in extracurricular activities.

Other Requirements

All required coursework must be taken for a grade to satisfy requirements for a degree in the College of Engineering. Courses cannot be taken on a satisfactory/unsatisfactory basis to satisfy this requirement.

ENGR[X]

ENGR[X] is a college-wide, zero-credit-hour required program that is composed of approved engineering-centric activities that meet the criteria of high-impact learning experiences. Undergraduate students can use their participation in one of these activities to partially satisfy their ENGR[X] requirement. Full satisfaction of the ENGR[X] requirement includes participating in an engineering-centric activity and submitting a meaningful, self-reflection that discusses the impact and overall experience on the student’s education.

Each engineering department identifies the activities it will accept in satisfying a student’s ENGR[X] requirement. Students should consult with their academic advisor for approved activities.

Course Credit

Credit by Examination

Undergraduate students at Texas A&M University at Qatar may earn course credits by demonstrating superior achievement on tests offered through several examination programs. Credit by examination is available to freshmen who plan to enter the university and to students who are currently enrolled. Credit earned by examination does not contribute to a student’s grade point ratio. The university awards credits for scores on certain tests published by the Advanced Placement Program (AP), the College Level Examination Program Computer-Based Testing (CLEP CBT), the SAT Subject Tests, DANTES Subject Standardized Tests (DSST) and the International Baccalaureate (IB) Program. Texas A&M University at Qatar also offers qualified students opportunities to earn credits by taking departmental examinations prepared by the faculty. Information concerning credit by examination may be obtained from the Academic Services Office (https://www.qatar.tamu.edu/students/academic-services/).

Please note the regulations (p. 72) concerning credit by examinations.

Departmental Examinations for Entering Freshmen and Currently Enrolled Students

Qualified entering freshmen may take departmental tests after being officially admitted into Texas A&M University at Qatar. Currently enrolled students can also take the exams throughout the year. Offerings vary from campus to campus and not all tests are available, contact the Academic Services Office (https://www.qatar.tamu.edu/students/academic-services/) for registration information. The tests are prepared by participating Texas A&M University at Qatar departments.

Extension and Correspondence Courses

Students may apply a maximum of 30 semester hours of approved extension class work and correspondence study toward a degree. Students may apply up to 12 hours of correspondence credit earned through an accredited institution toward the requirements for an undergraduate degree, even though Texas A&M does not offer courses by correspondence.

Correspondence courses taken through the Defense Activity for Nontraditional Education Support (DANTES) may be accepted and included in the 12 hours allowed.

In order for a student in residence at Texas A&M to receive credit for correspondence work toward a bachelor’s degree, he or she should:

- obtain advance written permission from the dean of his or her college;
- present appropriate evidence of having completed the course.

Data and Research Services at Texas A&M University is authorized to act as an agent to receive correspondence courses.

Registration and Academic Status

Registration for the fall and spring semesters is accomplished at several times. During the fall and spring semesters (in November and April), a preregistration period is held for currently enrolled and reenrolled students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New Student Conferences serve as an opportunity for new undergraduate students to register. Further information concerning registration may be obtained from the academic calendar published in this catalog or from the Office of Records. The schedule of classes is available online.

More information may be found here (p. 78).

Grading System

Because students attend a college or university to extend their education, grades are usually given as an indication of the proficiency of their endeavors. The student’s semester grade in a course shall be based upon performance and/or participation in class, exercises and tests, laboratory work and final examination as applicable to the course. The proportionate weight assigned to each of the factors shall be determined by the department administering the course.

More information may be found here (p. 80).
Withdrawal from Texas A&M University at Qatar

An official withdrawal from the university will result when a student drops all in progress and courses not yet started in a particular term. A student who withdraws from the university before the completion of a semester or summer term is required to comply with the official withdrawal procedure. This process is initiated by submitting a request through the Student Withdrawal channel on the My Record tab in the Howdy portal. Students may not withdraw after the Q-drop deadline. The student’s dean will retain the authority to support a student withdrawal after the deadline.

If a student is enrolled in one or more inter/intra-session (‘minimesters’) or summer terms and chooses to withdraw, all current and future in progress courses for the entire semester will be dropped. The student will be ineligible to register for courses for the remainder of that semester.

STUDENTS RECEIVING FINANCIAL AID or SPONSORSHIPS should talk to their sponsor before withdrawing. Withdrawing from the university does not cancel all tuition and fees. Failure to comply may result in your owing a substantial sum rather than having a zero balance or refund. In addition, withdrawing may affect your immigration status. Please check this carefully before submitting the withdrawal form (https://www.qatar.tamu.edu/students/office-of-records/student-forms/).

For university policy regarding withdrawal, see the Texas A&M University Student Rules (http://student-rules.tamu.edu/).

Transcripts

Students applying for admission to Texas A&M are required to submit transcripts of previous academic work and in some cases, results of standardized tests. The submission of altered documents or the failure to furnish complete and accurate information on admission forms will be grounds for disciplinary action.

Students and former students may request an official transcript by completing the transcript request form (https://www.qatar.tamu.edu/students/office-of-records/student-forms/) online or in person at the Office of Records located on the first floor of the Engineering Building in Education City, Doha. Individuals who previously attended Texas A&M University at Qatar may obtain an official transcript of their completed coursework, provided they have no financial obligations to Texas A&M, Texas A&M University at Qatar, or the Qatar Foundation. A fee, which according to state law must be paid in advance, will be charged for each copy. During grading and degree posting, official transcripts may be produced for enrolled students only if all courses for that semester or term are shown as in progress (IP) or have all final grades posted.

Graduation Application, Diploma and Commencement

Formal application for degrees at Texas A&M University at Qatar is a two-step process. An online application must be submitted via the Howdy portal, as well as a supplemental application to the Office of Records, by the deadline stated in the Texas A&M University at Qatar academic calendar. Under unusual circumstances, an application for a degree may be accepted after the stated deadline.

All students must have settled all financial obligations to the university and Qatar Foundation prior to receiving a diploma.

Graduate and undergraduate students completing their degree in July or December will have the opportunity to participate in the commencement ceremony in May, following the completion of their degree. Students must participate in the commencement ceremony of their home campus.

Language of Instruction

The language of instruction at Texas A&M University at Qatar is English. All teaching, exercise and practical material are provided in English.

Candidacy Requirements

The Texas A&M College of Engineering is considered one of the world's premier programs, with globally recognized faculty renowned for their teaching and research excellence. Admission into the program is open to freshman and transfer candidates, and is highly competitive. Therefore, Texas A&M at Qatar is seeking candidates who have a proven record of academic achievement and who merit admission into the program. Only the best-qualified candidates will be admitted, so it is important that the application reflect what you have accomplished in your college preparatory schooling.

Entry into the Texas A&M at Qatar program depends upon completion of the entire application, submission of the required supporting documents and college entrance test and placement test results, and an interview conducted by members of the Texas A&M at Qatar Admissions Board, if applicable. All of these requirements determine admittance. Texas A&M at Qatar seeks candidates who are committed to meeting the academic rigors of the program, who are global in their personal perspective, and who will thrive in a diverse and culturally rich environment.

Freshman Admission

Definition of a Freshman

A freshman is defined as a degree-seeking applicant who has not attended a university prior to entrance into the program, or an applicant who is still in high school or in a secondary school program who may have taken university courses and received college credits as an element of the secondary school curriculum or requirements. If an applicant has enrolled in a foundation program at a college or university he or she is still considered to be a freshman.

Items Necessary to Complete an Application File

An application is reviewed to make a decision about admission only after the required documents and test scores and meeting all of the admission requirements. The information provided in this section of the catalog will help guide the candidate through the admission process. Candidates must submit all of the following information by the admission deadline to be considered for admission:

1. Completed online application.
2. Passport copy (resident permit if required). 
4. Official college/university and/or Academic Bridge Program transcripts.
5. Official test scores.
7. Resume/curriculum vitae (CV).
8. Reference forms.
9. Application fee.

Specific Admission Requirements

1. Completed application
An application for Texas A&M at Qatar can be found at www.qatar.tamu.edu/admissions/apply (https://www.qatar.tamu.edu/admissions/apply/).

2. Passport
Submit a legible copy of the candidate’s passport and resident permit if required.

If the candidate is a non-Qatari and resides in Qatar, the candidate must submit a copy of his or her resident permit.

3. Official high school transcript or an official completion document from a secondary school program
Freshman applicants who have not graduated from high school or who have not completed a secondary school program at the time of application must submit a current official transcript listing all high school/secondary course work taken, credit earned, grades and, if calculated by the school, respective class rank. All will be used as an indication of the candidate’s academic preparation.

   • Freshman applicants who apply and are admitted prior to having graduated from high school or having completed their final year of secondary school must submit an official transcript that indicates the graduation or completion date prior to the first day of class in order to remain eligible to enroll.
   • Freshman and transfer applicants who have graduated at the time of application are to submit an official high school or secondary school program transcript that includes course work, credits earned, grades and class rank, and date of graduation.
   • Readmission applicants are not required to submit a high school transcript as a part of the application file.
   • To be considered official, a transcript must bear an original signature of a school official or an original school seal.
   • Transcripts in a language other than English must be accompanied by an official English translation. Applicants who have attended more than one high school should submit official transcripts from each school attended.
   • Emailed copies are not official and will not be accepted.

4. Official college and/or Academic Bridge Program (ABP) transcripts
An official transcript is required from every post-secondary institution attended even if the applicant did not earn credit or receive a course grade, or if the course is not transferable. This includes attendance

1 An applicant who has enrolled in a post-secondary institution since high school graduation, with or without credit received, must apply as a transfer applicant; excepting approved foundation programs.
at the ABP and any colleges or universities. Course work from one college posted on the transcript of another college will not satisfy this requirement. Failure to acknowledge attendance and provide transcripts from all schools attended may be considered a fraudulent admissions application.

- Official transcripts on paper are to be sent by the sending institution in a sealed envelope. The transcript will not be considered official if the student has had access to the actual transcript.
- Transcripts in a language other than English must be accompanied by an official English translation.
- Emailed copies are not official and will not be accepted.
- Evaluation of college and university transcripts for transfer credit will be based on the transfer admission procedures outlined in this catalog.

5. Official test scores
   Either the SAT or ACT examination is required for admission consideration.
   - Priority consideration will be given to candidates who achieve a competitive test score in all sections of either examination. It is expected that all sections of these examinations will be given full attention.
   - SAT and ACT scores must be from a test date within five years of the planned date of enrollment.

ENGLISH LANGUAGE TEST SCORES
If your native language is not English, you are required to submit proof of English proficiency.

TOEFL scores of 550 or higher on the paper-based test, an Internet-based TOEFL score of 80 or higher, and an IELTS overall band score of 6.0 or higher are considered competitive. In lieu of TOEFL or IELTS, university officials may consider as a substitute an SAT-evidence based reading and writing (EBRW) score of 560 (prior to March 2016, an SAT critical reading score of 500) or higher or an ACT English score of 21 or higher. Candidates whose native language is English do not have to submit TOEFL/IELTS scores.

- TOEFL and IELTS test scores must be from a test date within two years of the planned date of enrollment.
- All test scores must be sent directly from the testing agency.

The institutional code for Texas A&M are:

- TOEFL - 4290
- SAT - 4290
- ACT - 5270

6. Essay
   An essay is a required element of the application form. The essay is designed to give the candidate the opportunity to present his or her uniqueness, special skills, challenges faced, and other considerations that will provide insight into the candidate.

7. Resume/CV
   In resume form, the candidate should document academic and non-academic accomplishments, achievements and recognitions. These areas include extracurricular activities, leadership roles, community service, awards, talents, sports and employment.

8. Reference forms
   Two personal reference forms must be completed and submitted by officials from the candidate's graduating high school. The forms (http://cdn.qatar.tamu.edu/assets/forms/admissions/reference-form.pdf) can be found online at the Texas A&M at Qatar website.

9. Application fee
   The application fee is QAR 330, or $90 USD, payable to Texas A&M at Qatar.

   The application fee is non-refundable. Applicants have the option to pay online.

   All items necessary to complete the application become the property of Texas A&M at Qatar and should be sent to:
   - Office of Admissions
   - Texas A&M University at Qatar Education City
   - P.O. Box 23874
   - Doha, Qatar

Notification of Application Status
Check the applicant information website at www.qatar.tamu.edu/admissions/apply to verify your application has been received and to determine if any credentials are missing. Please allow two weeks to process credentials.

The Office of Admissions will make every effort to inform applicants of incomplete files through the applicant website. If incomplete applications are received within one month of the closing date, there may not be sufficient time for the Office of Admissions to notify applicants. All items necessary to complete an application must be received by the Office of Admissions by the closing date to ensure consideration for admissions.

Preferred Preparatory Coursework
The following list shows recommended minimum courses. Most candidates who are offered admission will have taken full advantage of the most challenging courses offered at their high school or secondary program.

- Four years of mathematics to include algebra, geometry, algebra II, and an advanced mathematics course, with calculus being the preferred subject.
- Four years of science which must come from biology, chemistry, and physics.
- English language preparatory courses indicating a high proficiency of understanding course content and concepts taught in the English language.

How to Be Admitted
Entry into the Texas A&M at Qatar program depends upon completion of the entire application, submission of the required supporting documents and college entrance test and placement test results, and an interview conducted by members of the Admissions Board, if applicable. All of these requirements determine admittance. Admission into the program is highly competitive. Applicants who are high achieving in all areas are most competitive for admission.

Applicants may be admitted one of three ways. Due to the limited size of the entering class, the number of students accepted from each category is limited.

1. Academic admits
Applicants qualify for academic admission if they:

- Successfully complete the required high school course work and achieve excellent grades.
- Achieve minimum college entrance tests as follows:
  - SAT math score of 670 or ACT math score of 29.
  - IELTS score of 7 or TOEFL score of 100.
- Students who do not submit TOEFL or IELTS scores must submit a minimum SAT Evidence-based reading and writing (EBRW) score of 660 (prior to March 2016 an SAT critical reading score of 600) and achieve a combined SAT math and EBRW score of 1360, or the ACT English and composite score equivalents.

Students will be admitted according to availability of spots.

2. **Review admits**

If an applicant does not qualify for academic admission, the complete application file will be considered through an extensive holistic review. Factors considered include:

- Academic achievements — class rank, school curriculum and required course work, and college admission test scores.
- Personal achievements — involvement in extracurricular activities, community service, leadership, employment and summer activities, as well as any talents, awards and honors.
- Information shared in essays and resumes.

Students will be admitted according to availability of spots.

3. **Provisional admission into the Aggie Gateway Program**

The program is designed to offer high-achieving Gateway students from Qatar and the Gulf Corporation Council (GCC) (as well as other countries if space is available) who do not quite meet the minimum test scores the chance to enroll in courses at Texas A&M at Qatar for 12 months. Once students meet the criteria of the Aggie Gateway Program, they can become full-time engineering students.

Students will be admitted according to availability of spots.

**Placement Tests**

Texas A&M at Qatar will administer placement tests to admitted students. Each accepted student may be required to participate in English and/or Mathematics placement exams. Details regarding the exams will be provided once a student has committed to the university.

**Application Calendar and Notification**

Freshman application to Texas A&M usually occurs from September 1 through March 1. Priority consideration will be given to those candidates who submit a completed application early. Failure to meet the application deadline will disqualify the applicant from admission.

Candidates will be notified of acceptance once admission decisions are made, which is usually in April and May. New student orientation will occur the week prior to the start of classes, with dates to be announced, and attendance is mandatory for those admitted. Classes normally start in August.

Candidates admitted to Texas A&M at Qatar will be notified by telephone or email, followed by a written admission confirmation letter mailed to the student’s home address or collected at the Office of Admissions. Candidates denied admission will be notified by email and/or postal correspondence to the permanent address specified on the application for admission.

**When to Apply**

Students currently enrolled in high school or secondary school program who wish to be considered for admission to Texas A&M University at Qatar should apply while in their senior or final year of their high school or secondary school program. Candidates are strongly encouraged to take the necessary college entrance examinations before the beginning of their final year in high school or secondary school.

**Additional English Proficiency Requirements for Admitted Undergraduate Students Whose Native Language Is Not English**

The criteria for admission into Texas A&M at Qatar differ slightly for those students whose native language is not English. These applicants must demonstrate the ability to speak, write and understand the English language. Undergraduate students may meet this requirement in one of the following ways:

1. Have an official TOEFL score of 600 on the paper-based test or 100 on the Internet-based test.
2. Have an official IELTS score of 7.0 on the overall band.
3. Have an official SAT Evidence-based reading and writing (EBRW) score of 560 (prior to March 2016 an SAT critical reading score of 500) or ACT English score of 21.
4. Transfer from an accredited U.S. institution of higher education with at least 30 semester credit hours, including the equivalent to Texas A&M ENGL 103 or ENGL 104 with a grade of C or better.
5. Achieve English language proficiency verification by taking an English language proficiency or placement examination prior to enrolling for the first semester at Texas A&M at Qatar. (If foundation English is required, the student will be enrolled in a pre-university English course, which will extend the time required to complete a degree.)

**Transfer Admission**

Transfer admission will be considered if the applicant has a successful record of proven academic rigor from a university whose accreditation is recognized by Texas A&M. Applicants wishing to transfer to Texas A&M at Qatar should have completed 24 transferable hours at the time of application and must have at least a 2.5 grade point ratio (GPA). Transfer admission decisions are very competitive; thus, admission standards are not known until the review for admission occurs. Preference is given to the applicant with the highest GPA and credit hours. Applicants who drop or withdraw from courses frequently and who do not achieve satisfactory grades routinely will be at a disadvantage in the review for admission.

The entire application, including the essay, is considered in reviewing the transfer applicant for admission. Applicants with less than a 2.5 GPA will be denied admission. Only the most qualified transfer candidates will be admitted. For more transfer admission information, please visit the website at exploretamuq.com (http://exploretamuq.com/).

**Definition of a Complete Transfer Application**

To be considered a candidate for transfer admission to Texas A&M University at Qatar, the prospective student must formally apply by submitting all of the required documents and meeting all of the admissions requirements. Candidates must submit all of the following information by the deadline to be considered for admission:
1. Completed online application at www.qatar.tamu.edu/admissions/apply. (https://www.qatar.tamu.edu/admissions/apply/)
2. Passport copy (resident permit if required).
4. Official college/university and/or Academic Bridge Program transcripts.
5. Official test scores.
7. Resume/curriculum vitae (CV).
8. Application fee.

For additional information, see Specific Admissions Requirements (p. 849) listed above. SAT/ACT scores are recommended but not required.

Additional Information for Transfer Applicants
1. At least a 2.0 GPA on course work in progress during the semester (excluding summer terms) immediately prior to enrollment at Texas A&M is a condition of admission.
2. Grades for all transferable courses are used in the computation of the GPA. This includes:
   • Failing grades, repeated courses, Withdraw Failing (WF), Incomplete, etc.
   • Grades reported as Incomplete are computed as Fs.
   • Plus and minus grade designations are not used; C+ is computed as a C, B- as a B, etc.
3. Credit-by-examination courses that are transcripted from other colleges or universities may be transferred if sequential course work with credit is also indicated. If there is evidence that the credit-by-examination courses are part of the student’s program of study at that institution, credit will be awarded for those courses that meet the transfer guidelines.
4. Course work taken as credit-by-examination must be listed as a specific course on an official college transcript to be considered in the admissions process and for transfer of credit.

Transfer Course Credit Policy
Transfer credit on coursework completed at the time of application to Texas A&M University at Qatar is determined when an official transcript from the originating institution is presented as part of the application for admission or readmission process. An official transcript is required from every post-secondary institution attended (including dual credit earned in high school) even if the applicant did not earn credit or receive a course grade, or if the course is not transferable.

The transfer of course credit will be determined by the Office of Records on a course-by-course basis. Credit submitted for transfer must be on an official transcript received by the Office of Records from the Registrar of the institution where the credit was earned. Course content will be determined from the catalog description or the syllabus. The transferability of credit decision will be based on the criteria as specified by Texas A&M University (see Transfer Course Credit Policies (http://catalog.tamu.edu/undergraduate/general-information/admission/#transferadmissiontext) for more information). All criteria are to be considered together, for example, criterion 10 may be qualified by criterion 7.

Credit from Non-Accredited Schools
Students who transfer to Texas A&M from an institution of higher education that is not accredited by one of the regional accrediting associations may validate the work taken at the institution by one of the following methods:
1. Successful completion of a comprehensive departmental examination or nationally standardized examination that is approved by the department.
2. Successful completion of a higher level course in the same subject area when approved by the head of the department and the dean of the college.

Credit will be given to students transferring from non-accredited public colleges in Texas for work completed with grades of C or better if they earn a grade point of 2.0 (C average) on the first 30 hours of residence work at Texas A&M.

Credit from Foreign Institutions
Transfer work from institutions following other than the U.S. educational system with instruction in English will be evaluated on an individual basis. A-level examinations with a grade of C or better will transfer. Baccalaureate II examinations will not transfer; however, these students may take placement and proficiency examinations to receive credit by examination. Credit will be given for work satisfactorily completed in an international institution offering programs recognized by Texas A&M. Official credentials submitted directly from the Office of Records and a listing of courses completed and grades awarded must accompany any request for transfer credit. Transfer work will be awarded by course title unless previous arrangements have been made using the Texas A&M at Qatar equivalency form or the course has been evaluated and approved as transferable to Texas A&M at Qatar. Courses must be equivalent in character and content to courses offered at Texas A&M. Credit will not be awarded from international institutions that are not academically accredited by the Ministry of Education or other appropriate authority in the home country.

No English composition courses will be transferred from institutions located in non-English-speaking countries. American history and American political science (government) courses will not transfer from foreign institutions outside the United States.

Courses taken at language training centers or institutes are generally not awarded transfer credit. A transcript from such an institution must be issued through the Office of the Registrar at a Texas A&M–recognized university, institute or language training center. Credentials of all language training centers and institutes are carefully checked.

Admission Criteria for Other Application Types
Readmission Criteria
Admission decisions for readmission are based on the following:
• GPA on Texas A&M University at Qatar coursework;
• GPA on coursework since leaving Texas A&M University at Qatar;
• Desired major; and
• Information presented in the application and essay/statement of purpose if provided.

If you were previously admitted but did not enroll and attend class through the official census date, you do not qualify as a readmit, and you must apply as either a freshman or transfer student.
If you were previously enrolled at Texas A&M University at Qatar but did not attend class through the official census date of the previous long semester, then you must apply for readmission.

Transcripts from institutions attended since the last enrollment at Texas A&M University at Qatar are required. Please contact the Office of Admissions for readmission deadlines.

**Post-baccalaureate Undergraduate Criteria**

Admission is limited and is intended for applicants with a degree who wish to apply for further study at the undergraduate level to pursue a second bachelor's degree.

Additional requirements to complete a post-baccalaureate application:

- an official transcript indicating the receipt of a recognized baccalaureate degree
- a statement explaining why enrollment at Texas A&M University at Qatar is necessary
- official transcripts from all colleges attended (official high school transcript not required)

Admission decisions for post-baccalaureate undergraduates consider:

- GPA on transferable college coursework
- completion of prerequisite coursework
- information presented in the application

Priority is given to qualified applicants for their initial degree; therefore, post-baccalaureate undergraduate admission may be limited or may not be available.

**Transient-Session Only Criteria**

Admission is considered for applicants who wish to attend one specific session only and who present appropriate credentials for the level of specified coursework and apply within the processing period for the specific session.

Additional requirements to complete a transient-session only application include:

- A statement explaining why enrollment at Texas A&M University at Qatar is desired.
- An official college transcript showing the latest collegiate coursework attempted.

**Change of Curriculum to Another Campus**

Texas A&M offers certain undergraduate degrees at two branch campuses in addition to the main campus. While enrolled as a student in residence at any one of the Texas A&M locations, students may apply for a change of curriculum to another campus for a future semester. Students must comply with the established change of curriculum procedures and requirements of their desired major, department, and college, and space must be available. Final approval is granted by the academic dean or departmental advisor for that major.

**Suspected Fraudulent Admissions Applications**

Applicants for admission to Texas A&M University at Qatar should be aware that the information submitted will be relied upon by university officials to determine their status for admission and residency. By signing and submitting an admission application, the applicant certifies that the information in, and submitted with, the application is complete and correct and may be verified by university officials.

All students applying to Texas A&M University are expected to follow the Aggie Code of Honor which states “An Aggie does not lie, cheat or steal nor tolerate those who do.” Applicants found to have misrepresented themselves or submitted false information on the application will receive appropriate disciplinary action which may include rejection of the application, withdrawal of any offer of acceptance, cancellation of enrollment or any other appropriate disciplinary action deemed necessary. In all instances of disciplinary action, the application fee is non-refundable.

Pursuant to the 2020-2021 undergraduate catalog and Texas A&M student rule 24.4.1 (http://student-rules.tamu.edu/rule24/), acts of dishonesty include but are not limited to:

- Withholding material information from the University, misrepresenting the truth during a University investigation or student conduct conference, and/or making false statements to any University official.
- Furnishing false information to and/or withholding information from any University official, faculty member, or office.
- Forgery, alteration, or misuse of any University document, record, or instrument of identification.

For prospective undergraduate students (admitted but not enrolled), the initial determination of whether an individual has submitted a fraudulent application will be made by the Assistant Director of Admissions, with a right of appeal to the Director of Admissions for undergraduate students. For prospective graduate students, initial appeals will be made to the Executive Director of Graduate Studies.

For enrolled students, the initial determination of whether a student submitted a fraudulent application will be made by the Director of Records, with final right of appeal to the Associate Dean of Academic Affairs or Assistant Dean of Academic and Student Affairs.

Any University official who suspects that a prospective or enrolled student has submitted a fraudulent admission application must notify the Director of Admissions or Director of Records.

Application Fees (p. 854)

Diploma Fees (p. 854)

Refund Policy (p. 854)

Financial Assistance/Scholarships (p. 855)
Tuition and Fees
As a state institution, Texas A&M has held firmly to the premise that the Qatar campus should remain affordable, and therefore should follow the same tuition and fee structure as that of the main campus. All tuition and fee amounts provided herein represent the most accurate figures available at the time of this publication and are subject to change without notice.

Full details on tuition rates are available at www.qatar.tamu.edu/students/tuition-financial-aid-and-scholarships (http://www.qatar.tamu.edu/students/tuition-financial-aid-and-scholarships/).

Educational expenses for the nine academic months will vary according to personal needs. University rules regarding tuition and fees and all related payments in place at the time of publishing are reflected here. All are subject to change.

Payment of Tuition and Fees
Students must meet all financial obligations to the university by their due dates. Officials at Texas A&M at Qatar calculate the appropriate tuition and fees of each student enrolled, and the Qatar Foundation issues to each student his or her respective tuition statement. Students are then responsible for making payment to the Qatar Foundation’s cashier office. Students will receive their invoices via their Texas A&M at Qatar email addresses. Failure to pay amounts owed may result in cancellation of the student’s registration and being barred from future enrollment and receiving official transcripts. Qatar Foundation policy requires that tuition and fees be paid as early as possible in the semester. Arrangements for paying tuition in installments should be made with the Academic Services Office and the Qatar Foundation Finance Office.

Financial Obligation for Graduating Students
According to Texas A&M University Student Rules and Chapter § 54.007 (c) of the Texas Education Code, all financial obligations owed to the university and/or to the Qatar Foundation must be paid by the end of the semester. Failure to settle all financial obligations will result in withholding a student’s diploma at graduation. Additionally, a block will be placed on the student’s account, which will prohibit registration in subsequent semesters and the receipt of official transcripts.

Citations
- Section 14.15 of the Texas A&M University Student Rules states “The student must have settled all financial obligations to the University.”
- Chapter § 54.007 (c) of the Texas Education Code states “A student who fails to make payment prior to the end of the semester may be denied credit for the work done that semester.”

Cancelling of Registration
Once students have registered for classes and subsequently wish to withdraw from the university prior to the first day of classes, they must do the following to prevent being charged tuition/fees for the term:

1. Contact the Office of Records prior to the first day of classes and complete a withdrawal form indicating the intent to officially withdraw from the university.
2. Contact the Academic Services Office.
3. Contact the sponsoring agency if the student is sponsored.

Failure to request cancellation of an unwanted registration may result in grades of F or I in all courses for the semester. The student will be held responsible for paying all fees for the semester, regardless of whether he or she attended classes.

Cancellation for Nonpayment of Tuition or Fees
If notified by the Qatar Foundation of nonpayment, the university reserves the right to cancel registration for any semester in which a student is enrolled.

Fees for Special Items or Services

Application Fees
The application-for-admission fee for undergraduate and graduate applicant is: QAR 330, or $90 USD, and is non-refundable.

Diploma Fee
A non-refundable fee per degree sought is assessed the semester a student applies for graduation. This fee is payable each time a student applies for graduation. A late diploma fee is charged at the rate of QAR 185, or $50 USD, in addition to the diploma fee above, to those who apply for graduation after the set deadline.

Refund Policy

Withdrawal from Texas A&M at Qatar
Once registered for classes, a student is considered officially enrolled unless otherwise restricted from enrolling. Stopping payment to the Qatar Foundation or allowing the check or bank draft to be returned unpaid by the bank for any reason does not constitute official withdrawal. The withdrawal process is specified in the section “Cancelling of Registration.” A withdrawal form found online at www.qatar.tamu.edu/students/office-of-records/student-forms (http://www.qatar.tamu.edu/students/office-of-records/student-forms/) explains exactly what the student needs to do. Failure to follow procedures for withdrawing from the university may result in financial penalties and delays with future enrollment, and course work may be recorded as incomplete and failed. Once a student registers, he or she is responsible for the total cost of the tuition and fees assessed if the withdrawal process is not followed properly, and refunds will occur only within the specified refund time periods as listed in the section “Tuition and Fee Adjustments.” Recipients of Qatar Foundation financial assistance should talk to a financial aid representative at the Qatar Foundation before withdrawing. Sponsored students should talk to a representative from their respective sponsoring agency prior to withdrawing.

Financial Assistance/Scholarships

The financial assistance program is designed for all students who have demonstrated financial need for assistance to meet college expenses and who are making satisfactory academic progress, as defined by the policies of the Qatar Foundation Financial Services Office. Financial aid is awarded by Texas A&M at Qatar, and applicants are expected to make a maximum effort to assist with college expenses. The financial assistance resources of Qatar Foundation and university scholarships should be viewed only as supplementary to the financial resources of the applicant and family.

Only those students who have been accepted for enrollment into the university may apply for Qatar Foundation financial aid and/or for university scholarships. Information about Qatar Foundation financial aid can be found at http://www.qatar.tamu.edu/students/tuition-financial-aid-and-scholarships (https://www.qatar.tamu.edu/students/tuition-financial-aid-and-scholarships/).

| Career Services (p. 856)                           | The primary purpose of academic advising at Texas A&M at Qatar is to assist students in the development of meaningful educational plans that are compatible with their personal abilities and goals. The ultimate responsibility for making decisions about personal goals and educational plans rests with the individual student. The academic advisor assists by helping to identify and assess alternatives and the consequences of decisions. Academic advising is a continuous process of clarification and evaluation.

The objectives for academic advising for the university and its component units include facilitating the following for each student:

• Clarifying personal and career goals.
• Developing suitable educational plans.
• Selecting appropriate courses and other educational experiences.
• Interpreting institutional requirements.
• Increasing student awareness of available educational resources.
• Evaluating student progress toward established goals.
• Enhancing decision-making skills.
• Reinforcing responsible student self-direction.
• Using referrals to other institutional and community support services, where appropriate.

The advising system of Texas A&M Qatar Campus includes professional staff advisors, faculty liaisons and administrators working together to ensure the total educational development of students by meeting intellectual, academic, personal and career needs. All students are required to meet with an academic advisor each semester in order to register for classes in the subsequent semester, or they will be blocked from registration.

More information can be found at https://www.qatar.tamu.edu/students/academic-services/academic-advising (https://www.qatar.tamu.edu/students/academic-services/academic-advising/)

The Center for Teaching & Learning

The Center for Teaching & Learning (CTL) welcomes all students seeking to enhance their academic skills and to engage in deep learning. The CTL staff, which includes peer tutors and professional writing consultants, offers one-to-one tutoring and small-group collaborations that cover topics/subjects including writing, mathematics, physics, chemistry, core introductory and sophomore-level engineering courses, presentation skills, and digital composing. The CTL team also provides support for students who want to improve their overall study skills.

More information can be found at https://tamqctl.com/learning/.
Aggie Life 101 for New and Transferring Undergraduates (Orientation)

Each year, Aggie Life 101 is held for undergraduate students entering Texas A&M at Qatar. New students are required to attend Aggie Life 101 in order to accept their offer of admission and register for classes. Families are encouraged to attend Aggie Life 101 with their students and participate in sessions designed especially for them to learn more about what their student will be experiencing as a new Aggie.

Aggie Life 101 provides students with the tools they will need to get started on their careers at Texas A&M at Qatar and offers a chance to learn about the many opportunities available to members of the Aggie community. During this program, new students will meet with academic advisors, register for their first semester courses, and learn the traditions and values of being a Texas A&M Aggie student. Since their first year is important to their continued success at Texas A&M at Qatar, the program will acquaint new students with student life activities and services available at the university. In addition, Aggie Life 101 offers social programs that provide students an opportunity to interact with other students. Each year, current students volunteer as orientation leaders to help new students and their families connect with Texas A&M at Qatar. For questions concerning Aggie Life 101, please contact the Department of Student Affairs at dsa@qatar.tamu.edu or (+974) 4423-0047.

The Association of Former Students

- Aggie Ring.
- Alumni Services, Giving and Events.
- Traveling Aggies.

Campus Safety and Security

- In an emergency situation dial +974.4454.0999 from within Education City or 999 from outside Education City.
- Report incidents immediately to Texas A&M University at Qatar security (333 from a Texas A&M Engineering Building phone or +974.4423.0333 from a mobile or outside phone).

Information on campus safety and security is available here (https://www.qatar.tamu.edu/other/safety-and-security/); and the Annual Security Report is located here (https://urc.tamu.edu/clery-act/clery-annual-reports/).

Career Services

The Career Services Office offers advising and assistance to students seeking internships and full-time employment, while supporting the recruiting initiatives of local and international companies. Career Services assists students as they prepare for their job searches by coordinating informational sessions and workshops on topics such as resume writing, interviewing skills and career readiness. The office also hosts two annual recruiting events, the Career Networking Event at Texas A&M at Qatar and the spring career fair in collaboration with all Education City universities. A variety of guest speakers from industry are hosted each year. Students learn about opportunities in specific companies and on general issues related to the workplace. The Career Services Office provides students with other opportunities for industry engagement ranging from corporate competitions to participation in local and regional conferences.

More information can be found at https://www.qatar.tamu.edu/students/career-services (https://www.qatar.tamu.edu/students/career-services/)

Critical Incident Response Team

The purpose of the Critical Incident Response Team (CIRT) is to respond to incidents involving Texas A&M at Qatar students and to serve as the university contact when students are involved in incidents away from the campus.

Texas A&M at Qatar is committed to providing an educational climate that is conducive to the personal and professional development of each individual. Even with a small university community, Texas A&M at Qatar and the Department of Student Affairs realize that crises, or critical incidents, will occur and that these crises can have a significant effect on the entire university, Education City and local communities. Such critical incidents require an effective and timely response. The Department of Student Affairs has developed CIRT consisting of Texas A&M at Qatar staff to best respond to these critical student incidents. CIRT can be reached at (+974) 4423-0333.

The goals of CIRT are as follows:

- To coordinate the university’s response to critical incidents involving students while paying special attention to the safety and security needs of members of the university community.
- To offer counseling, guidance and appropriate support to members of the university community, their families and university caregivers.
- To use critical incidents, when appropriate, as teachable moments that may enhance the quality of life for all those touched by critical incidents.

Disability Services

The mission of Disability Services is to ensure accessibility for all students to University programs. The Department of Student Affairs Counseling and Wellness Program administers Disability Services at Texas A&M University at Qatar. Disability Services, with the assistance of Disability Services at Texas A&M University, offers accommodations counseling, evaluation referral, disability-related information, and adaptive technology counseling and equipment for academically related purposes. Although Disability Services does not offer disability evaluation and/or testing, tutoring, personal expenses, attendants or scholarships, we will provide referral information.

More information can be found at https://www.qatar.tamu.edu/students/student-affairs/disability-services (https://www.qatar.tamu.edu/students/student-affairs/disability-services/)

The Engineering Enrichment Program

The Engineering Enrichment Program (EEP) is designed to drive innovation and entrepreneurship and empower students with an exceptional engineering experience. The program offers a series of short training courses throughout the year, providing more hands-on experience in different engineering fields such as; electronics, fabrication, machining, and programming. It inspires students and enriches their knowledge with new valuable skills to become experts and make a difference. Students will have the chance to complement their engineering degree with additional certifications and participate in international competitions. This program encourages all students to build competencies and share big ideas, as they work towards becoming unique engineering leaders.
Global Educational Opportunities

Higher education is not immune to the trend of globalization. To adapt to this phenomenon and prepare graduates for an increasingly interdependent global community, Texas A&M University at Qatar is committed to providing global learning opportunities for all students. Whether it be study abroad programs, service-learning trips, research abroad, language training, international conferences or workshops, or global leadership programs, students at Texas A&M University at Qatar can choose from a variety of experiences that can increase their cultural competence, expand their global worldview, and augment their marketability in a rapidly globalizing world. Some opportunities on offer are as follows:

Study Abroad
Texas A&M University at Qatar students are able to study in a variety of different locations and countries. The flagship program is an exchange with the Texas A&M main campus in College Station, Texas. This program is offered every semester and the summer session. The program operates as a cohort model, and students are selected through a competitive application process. Texas A&M University at Qatar assists in arranging flights, housing, transportation and university check-ins.

Texas A&M University at Qatar students are also eligible to participate in programs on offer through the Study Abroad Programs Office operated by the main campus. Students can choose from many different disciplines, programs and countries. These programs can differ in length from summer sessions, semester-long programs or intersessions.

Faculty-Led Programs
Every year, Texas A&M faculty lead a group of students on a global academic experience. Traveling with a faculty mentor, a group of students will travel to an international location, be exposed to engineering topics in a global context, and experience a different culture. Often, students will be joined by fellow Texas A&M students from the main campus and students from the host institution. Faculty-led programs provide students a rich experience that can impact their academic and professional careers by providing them with unique networking opportunities and an enriching cultural experience that can assist with increasing cultural competence.

Research Exchange for Undergraduates
Texas A&M University is a division I research institution. Boasting some of the world’s renowned faculty, Texas A&M University is known for producing groundbreaking research. Students at Texas A&M University at Qatar are eligible to participate in the Research Exchange for Undergraduates, a program designed to partner Texas A&M at Qatar students with a faculty member on the main campus in College Station. This experience can allow students to understand engineering research in a global context and contribute to the growing field of knowledge. This program will provide students an opportunity to network with faculty members on the main campus, experience a new culture, and have the potential to publish their research.

Information Technology
The mission of the Information Technology (IT) department is to provide a robust, secure and innovative environment that supports Texas A&M University at Qatar’s goals in teaching and lifelong learning, research, and engagement. IT strives to embody and uphold Texas A&M’s tradition of organizational excellence. The department is comprised of five groups that provide over 75 services to faculty, staff and students.

Educational Technology
The Educational Technology group serves faculty and students by promoting and assisting in the use of technology for instruction. Providing systems such as eCampus and Echo360 Lecture Capture, the group also manages classroom technologies and academic software including audiovisual systems.

Enterprise Applications
The Enterprise Applications (EA) group performs business process analysis and develops, administers, and maintains automation to achieve greater efficiencies. EA oversees all electronic communication with the Texas-based administrative systems for student information, financial accounting and payroll, including troubleshooting the processes, applications, and data feeds employed and ensuring secure operation. EA also provides support for many of the university’s web resources, including Marhaba, the intranet portal.

Network and Security
The Network and Security group provides and manages the network, telecommunications and security infrastructure of the branch campus. The group ensures compliance with all laws, policies, procedures, guidelines and industry best practices for operating and securing the Texas A&M at Qatar network. The group strives to increase community awareness regarding cyber-security, prevent cyber-attacks, and remediate the effects of viruses, worms, spyware and other malware.

Service Desk
The Service Desk provides a single point of contact for all IT-related queries, service requests and communications. The team provides user orientation and training. The Service Desk proactively communicates information regarding IT services, updates and policies.

Systems Engineering
The Systems Engineering group is responsible for providing computing infrastructure and services. This team maintains and supports mission-critical systems including physical and virtual infrastructure, directory and authentication services, file and database services, e-mail services, data backups and disaster recovery, data center monitoring, desktop and server security, and print services.

Leadership Activities
The Department of Student Affairs offers a wide variety of leadership development programs that provide an excellent opportunity for students to develop personal leadership in a global and intercultural context. The Student Leadership Exchange Program takes place every spring break and allows a group of student leaders from the Doha campus to visit the College Station campus during their spring break and then a group of student leaders from College Station to visit Doha during their spring break. An emphasis is placed on these students using their Aggie connection to communicate across cultural differences and build leadership. The Department of Student Affairs offers service opportunities each year for students to give back to others. The most
well known of these is the Aggie Service Learning Experience, which is an international service trip that allows Aggies to use collective strengths and talents in order to meet an expressed community need while learning about another culture and expanding personal horizons. Additional programs include LeaderShape, which is a six-day residential experience focused on introducing student leadership concepts to all students and challenges them to be a force for change within their student organizations and communities.

The Texas A&M Qatar Campus Library

The Texas A&M Qatar Campus Library supports the teaching, research and outreach missions of the university in an environment that fosters learning and inquiry. A core professional collection of over 7,000 titles is complemented by a basic collection in the arts and humanities of around 3,000 volumes. Students may also request books and journal articles from the five libraries on the main campus, where there is a print collection of around 5 million volumes.

Extensive online resources are available to students both within the library and on desktop or mobile devices via remote access. This includes more than 100,000 electronic journals and newspaper titles, over 1,000 databases, and more than 1.3 million electronic books.

Students can locate books and thousands of journals by author, title, subject and keyword using the basic online catalog, LibCat, at libcat.tamu.edu. Alternately, they can use the time-saving multi-search tool Quick Search, which allows searching of multiple databases at one time.

An experienced librarian is also available Texas hours via online chat, which is a great way to get help when starting a research project. GetItForMe is a document delivery service that supplies print books or electronic copies of journal articles and book chapters free of charge to all students. Print books borrowed from the main campus generally arrive in five to 10 working days. Electronic copy is usually emailed within two working days. Material not available from the main campus libraries can often be obtained either from other libraries in Qatar or around the world. Professional librarians are also available on campus to teach individuals and groups how to use library tools and resources.

More information can be found at library.qatar.tamu.edu (https://qatar.library.tamu.edu/).

Department of Student Affairs

The mission of the Department of Student Affairs at Texas A&M at Qatar is to create a vibrant campus culture that:

• Embodies the Texas A&M Core Values.
• Resonates with Aggie Spirit.
• Upholds Qatar’s unique, rich culture.
• Promotes the holistic and intercultural development of students.
• Prepares students for excellence in the engineering discipline in a diverse global society.

If students experience problems or difficulties or just need advice about where to go for assistance, they are encouraged to contact the Department of Student Affairs at dsa@qatar.tamu.edu or (+974) 4423-0047.

More information can be found at https://www.qatar.tamu.edu/students/student-affairs/

Student Activities

The Department of Student Affairs empowers students to organize into recognized clubs and organizations and plan their own campus activities. Program coordinators within the department advise student organizations and assist them in managing their own events.

Involvement in one or more of the university’s 30-plus organizations can add an important dimension to one’s college experience. It is a way to balance one’s life, meet new people, and develop interpersonal and leadership skills. In addition, prospective employers often look at what students have accomplished and experienced outside of their coursework. The recognized student organizations include the Institute of Electrical and Electronic Engineers, the American Society of Mechanical Engineers, the Society of Petroleum Engineers, the American Institute of Chemical Engineers, the Society of Women Engineers, the Qatari Student Association, and many others. The recognized student organizations include a variety of events such as business meetings, conferences, social events, sponsored guest speakers, workshops and field trips. For all these reasons, Student Affairs supports the belief that students can learn from experiences as well as from textbooks.

University sports teams are part of the activities offered and include basketball, soccer and cricket for men and basketball and soccer for women. Tryouts will be held for these teams each fall semester.

Student Government Association

The representative governing body for all students at Texas A&M at Qatar is the Student Government Association (SGA). This body is directly responsible for representing the interests of students to the administration and to the entire university community. SGA works with the administration on issues of concern to the general student population.

SGA consists of three representatives elected from each class, committee chairs, a vice president and the student body president. These officers are elected annually in April. SGA can be reached by email at SGA@qatar.tamu.edu.

More information can be found at https://tamuqatar.campuslabs.com/engage/organization/student-government-association/)

Student Wellness and Counseling

The Student Wellness and Counseling Programs promote the process of developing a healthy lifestyle. By participating in awareness activities, educational programs and counseling, Aggies can enhance their personal wellness with improved physical health, emotional stability, supportive relationships, spiritual growth and academic/career satisfaction. Services for students in the Wellness Program include academic skills counseling and testing, career counseling and testing, personal counseling, stress management and biofeedback, outreach programming, crisis and consultation, and disability services.

More information can be found at https://www.qatar.tamu.edu/students/student-affairs/health-and-wellness/

Ombudsperson

Based in the Office of Student Affairs, the Undergraduate Ombuds assists students with resolving conflicts on an informal and confidential basis. The Ombuds is equally open and accessible to all parties in disputes.
that may arise when there are differing expectations or conflicting policies regarding academic issues. Such occurrences may happen to undergraduates in their roles as students, employees, interns, or in many of the other roles that affect their education. Students should visit the Department of Student Affairs in the Texas A&M Engineering Building for more information regarding Ombuds services.

On-Campus Housing

Student housing in Education City is available to students enrolled with Texas A&M University at Qatar (TAMUQ) on a first-come, first-served basis.

Living on campus can be an excellent way to make new friends from around the world in what will prove to be one of the most diverse living environments possible. In addition to making new friends, you will find a supportive community environment with staff members who are available to assist you and will offer programs and events for residents.

To learn more about living on campus, visit the following website: http://www.hbku.edu.qa/en/life-hbku/hbku-student-housing (http://www.hbku.edu.qa/en/life-hbku/hbku-student-housing/)

If you wish to live in Education City student housing, please complete the following:

- Submit an online request for housing: https://orgsync.com/23486/forms/show/47844 (https://orgsync.com/23486/forms/show/47844/)
- Once the Department of Student Affairs (DSA) has received your information in, we will notify the Qatar Foundation that you are a TAMUQ student who is eligible for housing and are interested in applying for a space in the residence halls.

With the information you submit above, they will create an account for you and send an email invitation to complete the full housing application.

You will be asked to submit the following to complete the online Housing application:

- Housing Application Form filled in its entirety.
- Provide a scanned passport photo and scanned copy of your passport.
- Provide a scanned receipt showing that you have paid your refundable Damage Deposit (2000 QR).
- Confirmation of the date of your arrival in Doha, Qatar.

*Please note: If eligible for family housing, additional documents required will need to be submitted with your application (i.e. visa status, marriage certificate, dependent’s birth certificate, residency permit, etc.)*

Any remaining balance of your housing fees (depending on the housing option selected) will be due when you check in. The Housing Agreement for the 2019-2020 academic year will be made available with the Housing Application. Please read this document carefully.

Assignments within student housing are currently open on a rolling basis where applications are processed in the order they were completed and submitted, and room assignment will be done based on eligibility, preference, and availability. There is no deadline to apply, but once all rooms are filled students will be placed on a waiting list and are not guaranteed housing.

There are separate residence halls for male and female students. In addition, students have access to a communal lounge with computers, printers, cable television, DVDs, and video in each residential area. Laundry facilities with washers and dryers are available. Wireless Internet is available throughout the residence halls.

Qatar Foundation Housing and Residence Life staff work closely with student residents to maintain a safe, comfortable and healthy living-learning environment. Staff members are available to help students with life transitions associated with living in a community residential environment.

For more information about student housing or to check the status of your application after receiving their notice, please email housing@qf.org.qa.

For questions about the application process, please email TAMUQ DSA at dsa@qatar.tamu.edu.

Facilities

Texas A&M University at Qatar Facilities

The Texas A&M University at Qatar engineering building is one of the most advanced facilities for engineering education in the world. Designed by the famous father-son Mexican architect team Legoretta + Legoretta, the 55,000 square meter (592,000 square feet) facility combines modernist elements with traditional Islamic architectural motifs. The building is fully wireless and features high-tech classrooms, teaching laboratories and computer laboratories. The research rotunda provides additional research laboratories that give future Aggie engineers firsthand experience.

Texas A&M Qatar campus’s home in Education City also includes a library with a core professional collection of 10,000 titles and a number of journals and DVDs relating to the liberal arts, humanities, and basic sciences. Students also have access to books and journals from the libraries on the main campus, from collections that exceed 5 million volumes. Extensive online resources are available to students in the library and remotely, including more than 2 million electronic books and thousands of subscription electronic journals and databases.

Policies

University Statement for Individuals with Disabilities (p. 859)
University Statement on Harassment and Discrimination (p. 860)
Aggie Honor Code (p. 860)
University Student Rules (p. 861)

University Statement for Individuals with Disabilities

Texas A&M University (TAMU) is committed to maintaining an accessible campus community and providing reasonable accommodations to qualified students, faculty, staff and visitors, including making its web sites accessible and usable. TAMU does not discriminate on the basis of an individual’s disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended.

Students are protected from discrimination regarding access to and participation in TAMU’s programs and activities.#TAMU provides academic adjustments and auxiliary aides to accommodate needs of
students with disabilities, as defined under the law, who are otherwise qualified to meet the institution’s academic requirements.

Students with disabilities who would like to request accommodations may contact the following:

- TAMU, Texas A&M Health's (TAMH) College of Nursing, Irma Lerma Rangel College of Pharmacy College Station, College of Medicine, and School of Public Health should contact Disability Resources (979) 845-1637 or disability@tamu.edu.
- TAMH College of Dentistry should contact the Office of Academic Affairs (214) 828-8978 or bramsey@tamu.edu to request accommodations.
- TAMU School of Law should contact the Office of Student Affairs at (817) 212-4020 to request accommodations.
- TAMH Irma Lerma Rangel College of Pharmacy in Kingsville should contact the Disability Resource Center at TAMU at Kingsville at (361) 593-3024 to request accommodations.
- TAMU at Galveston (TAMUG) should contact Counseling and Career Services at (409) 740-4736 or studentservices@tamu.edu.
- TAMU at Qatar (TAMUQ) should contact the campus psychologist, Dr. Steve Wilson +974-4423-0047 or stephen.wilson@qatar.tamu.edu.

Students with a disability who believe they have experienced discrimination may contact Kevin McGinnis, Chief Risk, Ethics, and Compliance Officer, at the J. K. Williams Building, Suite 302, College Station, TX 77843. He may be contacted at civilrights@tamu.edu or at (979) 458-0308.

To report incidents, request accommodations, or inquire about discrimination based on disability, you may contact Peggy Zapalac, ADA Coordinator, at (979) 845-8115 or ADA.Coordinator@tamu.edu. The office address is 750 Agronomy Road, Suite 2101, College Station, TX 77843. Her telephone number is: (979) 458-8167 and email address is civilrights@tamu.edu. Such reports will be immediately forwarded to the Chief Risk, Ethics, and Compliance Officer for investigation and resolution. The Title IX website can be found at http://urc.tamu.edu/title-ix/.

Aggie Honor Code

Integrity is a fundamental core value of Texas A&M University at Qatar. Academic integrity requires a commitment by all faculty, students, and administrators to:

- Remain constantly focused on the quality of the academic programs;
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University at Qatar degrees;
- Demand high academic standards from all members of the Aggie community.

All Texas A&M University at Qatar students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

‘An Aggie does not lie, cheat, or steal or tolerate those who do.’

Upon accepting admission to Texas A&M University at Qatar, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System, which may be found at https://aggiehonor.tamu.edu/. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not excuse any member of the Texas A&M University from the requirements or the process of the Honor System.
Academic integrity violations are taken seriously, and are adjudicated by the Academic Services Office (ASO). ASO is responsible for educating the campus community regarding the Aggie Honor Code, responding to academic violation reports, and facilitating remediation efforts for students found to be in violation of the Aggie Honor Code. The website, https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system (https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system/), defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate student in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations – 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations – Ethics in Research and Scholarship – 15.99.03, and Texas A&M University rules and standard administrative procedures – Responsible Conduct in Research and Scholarship – 15.99.03.M1, 15.99.03.M1.01-06).

University Student Rules

Each student enrolled at Texas A&M University Qatar Campus is responsible for being fully acquainted with and complying with the Texas A&M University Student Rules. Specific rules, information and procedures may be found in publications pertaining to each particular service or department. Students are encouraged to reference the website at http://student-rules.tamu.edu (http://student-rules.tamu.edu/) for current published rules and regulations.

For information concerning federal and state policies, please reference the appendices (p. 1299) in this catalog.

Chemical Engineering Program

Chemical engineering is a broad field of engineering and thus requires a diverse preparation in science and engineering. Distinguishing chemical engineering from other engineering disciplines is its use of chemical and biochemical reactions to produce products and materials for society. Traditionally, chemical engineers have provided leadership in the petrochemical, refining, chemical, polymer and food processing industries. Because of strengths in the foundation sciences of mathematics, chemistry, physics and biology, as well as in engineering, this leadership role has now extended to the biochemical, biomedical, high-tech materials, semiconductor and microelectronics, nanotechnology, and environmental quality and safety industries, and a host of other areas. Chemical engineers have consistently commanded starting salaries among the highest of all college graduates because of the combined breadth and depth of their education.

Program Mission

The Chemical Engineering Program (CHEN) at Texas A&M at Qatar will:

• Provide the best environment possible for students, staff and faculty to aspire to excellence and to develop to the maximum of their potential.

• Our graduates will have the competencies to become leaders in the process industries, business, government and education.

• We will use state-of-the-art facilities, equipment and tools in our teaching and research. We will work as a part of the international community to help develop creative solutions to problems of national and international importance.

Program Educational Objectives

The objectives of the Chemical Engineering Program at Texas A&M at Qatar are:

1. Graduates will apply the foundation, depth and breadth of knowledge for successful chemical engineering careers in industry or government.

2. Graduates will apply effective communication, leadership and teaming skills.

3. Graduates will have a sense of responsibility, be ethical in the conduct of their profession, and have an appreciation for the impact of their profession on society.

The chemical engineering curriculum provides a balanced education in virtually all aspects of chemical engineering principles and practice, and includes education in economics, humanities and communication. Chemical engineering courses emphasize fundamentals and methods that are applicable to the analysis, development, design and operation of a wide variety of chemical engineering systems and processes, thereby providing the necessary background for entry into the wide array of activities described above. At the same time, specific example applications provide the student with insight into the ability of chemical engineers to work in such a variety of areas. The sequence of courses converges in the senior year into a comprehensive capstone design course that includes elements of economics, safety and environmental issues. The course provides an experience much like that of an industry design project. It is this philosophy of fundamentals, applications and design that has enabled the chemical engineering graduates to adapt readily to a dynamic and rapidly changing world and to solve problems they have not previously experienced.

To supplement course work, well-equipped laboratories provide the students with experiences in operating and analyzing a variety of unit operations and process control equipment and in using modern computational tools and software used in chemical engineering.

The CHEN electives are to be taken from a prescribed list. Other courses may also be acceptable, with special approval.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

The undergraduate program in Chemical Engineering at Texas A&M University at Qatar is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Majors

• Bachelor of Science in Chemical Engineering (p. 862)

Minors

• Chemical Engineering Minor (p. 393)
Chemical Engineering - BS

Chemical engineers are concerned with the application of knowledge gained from basic sciences and practical experience to the development, design, operation and management of plants and processes for economical and safe conversion of chemical raw materials to useful products. Because chemical engineering is the most broadly based of all engineering disciplines, the chemical engineer is in great demand in diverse technical and supervisory areas in a wide variety of industries and has consistently commanded one of the highest starting salaries of all college graduates.

In addition to dominating the extensive chemical, petroleum and petrochemical industries, for which Qatar and the rest of the Middle East are one of the world’s leading regions, chemical engineers are leaders in such areas as food and pharmaceutical processing, biochemical and biomedical engineering, pollution control and abatement, polymers and plastics, ceramics and other advanced materials, corrosion, automation and instrumentation, aerospace materials, computer technology and data processing, safety, environmental control, and many others.

Visit the Chemical Engineering Program’s website at www.qatar.tamu.edu/programs/chemical-engineering (https://www.qatar.tamu.edu/programs/chemical-engineering/).

Program Requirements

The freshman year is identical for degrees in electrical engineering, mechanical engineering, petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Computer Engineering Program is twofold: In support of the university mission, the mission of the Electrical and Program Mission better future for mankind. an exciting and productive career with endless opportunities in shaping a computer technologies and sciences for the benefit of humanity. By through research, development and the application of electrical and computer engineering has advanced national and global prosperity underwater, space exploration and national security. Electrical and computers and sophisticated sensors and control systems used in procedure systems, sophisticated domestic appliances, cell phones, communication, global positioning system, medical diagnostic and wireless technologies for broadband communications; controlling complex systems; and developing hardware and software systems that are at the core of most devices we interact with on a daily basis. The rapid industrialization and computerization of Qatar’s economy create a need for highly skilled electrical and computer engineers capable to plan, design, implement and manage this transformation. Studying electrical and computer engineering prepares students for assuming key roles with high ethical responsibility in developing and managing the information, communication, and electrical energy infrastructures of Qatar and the world economy.

Program Educational Objectives
The objectives of the Electrical and Computer Engineering Program at Texas A&M University at Qatar describe what graduates of the program are expected to attain within a few years after graduation. These Program Educational Objectives are:

1. Be competitive as electrical engineers in a diverse range of careers while maintaining high ethical standards.
2. Assume leadership in their professional disciplines, organizations and communities around the world.
3. Seek advanced knowledge through continuous learning such as pursuing graduate degrees/courses in their discipline or other fields.
4. Continue developing effective teamwork and communication skills.

The extent to which the program is meeting these objectives is periodically assessed through instruments such as alumni surveys and employer/recruiter surveys. The goal is to continually improve the program’s ability to meet these educational objectives. The electrical engineering curriculum and individual course contents are periodically evaluated and adjusted in order to further support the ability to achieve the program objectives. The program welcomes comments and suggestions from any interested individuals regarding the above program objectives and/or how the program can better meet these objectives.

Before commencing coursework in the major, students must be admitted to the major or have the approval of the department.

The undergraduate program in Electrical and Computer Engineering at Texas A&M University at Qatar is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org/.

Electrical Engineering - BS

Electrical engineering is a challenging but exciting and rewarding field of study. It is a rich and rapidly advancing field that plays a significant role in shaping all facets of modern society. This includes generating, transmitting and storing electrical energy; developing and utilizing wired and wireless technologies for broadband communications; controlling complex systems; and developing hardware and software systems that are at the core of most devices we interact with on a daily basis. The rapid industrialization and computerization of Qatar’s economy create a need for highly skilled electrical and computer engineers capable to plan, design, implement and manage this transformation. Studying electrical and computer engineering prepares students for assuming key roles with high ethical responsibility in developing and managing the information, communication, and electrical energy infrastructures of Qatar and the world economy.

Total Program Hours 128

Electrical and Computer Engineering Program

Almost any technology that distinguishes the 20th and 21st centuries from previous centuries has the imprint of electrical and computer engineering - electric power, radio, television, radar, satellite communication, global positioning system, medical diagnostic and procedure systems, sophisticated domestic appliances, cell phones, computers and sophisticated sensors and control systems used in underwater, space exploration and national security. Electrical and computer engineering has advanced national and global prosperity through research, development and the application of electrical and computer technologies and sciences for the benefit of humanity. By choosing electrical and computer engineering our graduates embark on an exciting and productive career with endless opportunities in shaping a better future for mankind.

Program Mission

In support of the university mission, the mission of the Electrical and Computer Engineering Program is twofold:

• To provide quality education, well grounded in the fundamental principles of engineering, that prepares students for positions in industry, government and academia.
• To serve the industries and the governmental agencies in the State of Qatar through continuing education, outreach activities, consulting and research.

A grade of C or better is required in all CHEN courses.

5 All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the advising office.

6 See an academic advisor for a list of approved courses.

Texas A&M University
The program curriculum is designed to prepare graduates for work in the highly diverse electrical engineering profession. A solid foundation in physics, chemistry, and mathematics is used to support courses in the fundamentals of electrical engineering.

The program facilitates the integrated use of computers throughout the curriculum, while laboratory work allows students hands-on experience and to apply basic concepts to a wide range of engineering problems. After their exposure to the most recent analytical techniques and technological developments, students will implement engineering concepts using state-of-the-art computers and laboratory equipment. After foundation studies in analog and digital circuits, signals and systems, electronics, electromagnetic fields, and computer architecture during the sophomore and junior years, students have access to two main elective tracks in the senior year, namely, electric power systems and communications.

The electric power systems track is designed to train students in the theory and techniques related to electromechanical energy conversion systems, electric power, renewable energy, and power electronic systems. The communication track is designed to prepare students to address challenges in the area of digital and wireless communication systems. Both tracks present similar requirements and provide a broad and rigorous educational experience. The program offers additional elective from computer engineering, control, and biomedical engineering areas.

For more information, please visit the Electrical Engineering Program’s website at www.qatar.tamu.edu/programs/ecen (https://www.qatar.tamu.edu/programs/ecen/).

The mission of the Mechanical Engineering Program is to serve the management and administrative positions as well. Many mechanical engineers are promoted to mechanics, manufacturing, plant engineering, research and development, specification and evaluation, thermal systems analysis, fluid and solid mechanical engineers includes design, construction, controls, materials characterization, specification and analysis of materials used in design and control systems, and works with the generation, conversion, transmission and utilization of mechanical and thermal power. Assignments often include analysis and synthesis of mechanical, thermal and fluid systems. Mechanical engineers are also responsible for characterization, specification and analysis of materials used in design and manufacturing. Manufacturing systems, robotics, electromechanical devices and control systems are also the purview of the mechanical engineer. Graduates in mechanical engineering are among the most successful careers in industry, government and academia. Many students enhance their education by participating in professional internships, which offer opportunities for employment in engineering positions, while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities and learning experiences outside the classroom. Students may also participate in research projects through individually directed studies courses with a professor. The Mechanical Engineering Program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

The undergraduate program in Mechanical Engineering at Texas A&M University at Qatar is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org.

• Design and Simulation of Mechanical Systems Minor (p. 468)

Mechanical Engineering - BS

Mechanical engineering (MEEN) at Texas A&M at Qatar challenges students and helps them to develop their full creative potential. Texas A&M at Qatar’s program consists of three main areas: thermal-fluid sciences, systems and controls, and mechanics and materials. The courses taken in these areas enable students to develop the technical tools and skills required for enhancing design development. The education is broad and supports students being able to choose a variety of employment or further study opportunities.

Texas A&M at Qatar received ABET accreditation in the fall of 2008. According to ABET, an engineering education accreditation organization, mechanical engineers apply principles of engineering, basic science and mathematics to model, analyze, design and realize physical systems, components or processes and work professionally in both thermal and mechanical systems. Mechanical engineering is a diversified profession because all industries, including oil and gas industries, chemical industries, and built environment, need mechanical engineers for designing, maintaining, testing and managing operations. In addition to industry, mechanical engineers may work for governmental and consulting organizations, and mechanical engineers may continue their studies and earn graduate degrees in MEEN or other disciplines.

For more information, visit the Mechanical Engineering Program’s website at https://www.qatar.tamu.edu/programs/mechanical-engineering/.

Petroleum Engineering Program

Petroleum engineering is primarily concerned with the safe and economic extraction of oil, gas and other natural resources from the earth. This is accomplished through drilling, completions, and operation of wells while considering safety of personal and the natural environment. The field of petroleum engineering also covers the management of subsurface reservoirs in which the resources are found.

Program Mission

The mission of the Petroleum Engineering Program at Texas A&M at Qatar is to create, preserve, integrate, transfer and apply petroleum engineering knowledge, and to produce capable future engineers and enhance the capabilities of current practitioners. The curriculum includes study of:

- Characterization and evaluation of subsurface geological formations and their resources.
- Application of reservoir engineering principles and practices for optimizing resource development and management.
- Procedures for drilling and completing wells and design and analysis of well systems.
- Design and analysis of systems for producing, injecting and handling fluids.
- Use of project economics, safety, and resource valuation methods for design and decision making under conditions of risk and uncertainty.

There is a heavy emphasis on mathematics, computer applications, communication skills, and interdisciplinary problem-solving. The department encourages its students to work as interns during the summer months. A minimum of six weeks of approved experience is required for graduation.

Program Educational Objectives

The Program Education Objectives of the Petroleum Engineering Program are to produce graduates who will, within a few years of graduation:

1. Effective engineers that continue to develop personally and professionally into prospective leaders; and,
2. Successful in demonstrating their obligations to the profession and the society.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

The undergraduate program in Petroleum Engineering at Texas A&M at Qatar is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org.

Majors

- Bachelor of Science in Petroleum Engineering (p. 867)

Minors

- Petroleum Engineering Minor (p. 479)

Petroleum Engineering - BS

Petroleum engineering is primarily concerned with the safe and economic extraction of oil, gas and other natural resources from the earth. This is accomplished through drilling, completions, and operation of wells while considering safety of personal and the natural environment. The field of petroleum engineering also covers the management of subsurface reservoirs in which the resources are found.

Petroleum engineering graduates have a variety of careers in the upstream and midstream oil and gas industry open to them. They include working as geoscientists, petrophysicists, drilling engineers, reservoir engineers, or production engineers. Their activities include quantifying...
oil and gas reserves, well design, well performance evaluation, reservoir modeling, production optimization, and treatment planning.

Texas A&M at Qatar’s petroleum engineering students are prepared for the workplace through participation in research on topics such as drilling and production challenges, multiphase flow in porous media, and petrophysics. Student participation in research further develops the human capital of Qatar. Fourth-year students also complete a senior design project in which they develop a detailed reservoir model, make a recommendation for optimized reservoir development, and present their findings to industry experts.

Petroleum engineering faculty members contribute to the local industry and community. They develop research projects that directly improve hydrocarbon recovery, production, and treatment from local Qatari reservoirs. In addition, they provide continuing education courses and expertise to local industry.

Program Requirements

The freshman year is identical for degrees in electrical engineering, mechanical engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

1 A grade of C or better is required.
2 CHEN requires 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 or CHEM 107/CHEM 117 plus CHEM 120.
3 Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
4 Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 3 hours from international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity or cultural discourse courses.
The core curriculum focuses on the development of six skills that have been shown to be effective in preparing students for the job market and in democratic society.

- Critical Thinking Skills – to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
- Communication Skills – to include effective development, interpretation and expression of ideas through written, oral and visual communication.
- Empirical and Quantitative Skills – to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
- Teamwork – to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal.
- Personal Responsibility – to include the ability to connect choices, actions and consequences to ethical decision-making.
- Social Responsibility – to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities.

Overview

The Texas A&M Core Curriculum, in compliance with the Texas Core Curriculum, provides students with a foundation of knowledge of human cultures and the physical and natural world, develops principles of personal and social responsibility for living in a diverse world, and advances intellectual and practical skills that are essential for all learning. In support of the Core Curriculum, the supporting academic programs enhance the individual degree programs and university graduation requirements.

The core curriculum focuses on the development of six skills that have been shown to be effective in preparing students for the job market and in a diverse world and democratic society.

A grade of C or better is required in all courses.

Supporting Academic Programs

Geosciences

College of Geosciences

Students at Texas A&M at Qatar will have the opportunity to take courses in two areas within the College of Geosciences. Geology, the major focus, deals with the processes and forces acting at the surface and within the earth; with the materials of the earth, its forms and structures; and with the history of its development and the evolution of life on its surface and in its waters. Geophysics may also be offered. This deals primarily with the physics of the solid earth, from the measurement and understanding of its internal structure and physical properties, to plate motions and their effect on continents and ocean basins, to detection of its natural resources through remote sensing.

Liberal Arts

College of Liberal Arts

Examples of history show us that a liberal arts education is the foundation of a strong and progressive society. The Liberal Arts Program offers students an opportunity to explore the intellectual achievements of humankind through a disciplined and responsible study of issues that have been of enduring importance to people. Thus, courses in liberal arts help students develop sensitivity to the questions and values that confront them in their daily lives. At the same time, skills are built that can be put to use in solving complex problems. One of the program’s principal objectives is to achieve the hallmark of an educated person: a fundamental knowledge of the forces that have shaped and continue to direct our cultural identities.

Science

College of Science

Chemistry

An understanding of chemistry is critical to an understanding of life and its associated activities. Chemistry and chemical principles profoundly influence the way we live, communicate and interact with one another, so it is little wonder that a strong background in chemistry provides a solid foundation for a variety of careers of major importance in the 21st century. Chemistry is uniquely positioned at the crossroads between the biological and physical sciences. By exploiting their understanding of both realms, chemists and other professionals with strong backgrounds in chemistry have made, and continue to make, major contributions to improve the human condition. Major technological and biological discoveries almost always depend on a fundamental understanding of chemistry, and the pursuit of these discoveries, as a way to improve the world in which we live, drives those who seek to be a part of the process.

The Chemistry Program at Texas A&M at Qatar offers course work and research in various areas of chemistry, organized into a program leading to a minor degree in chemistry.

Mathematics

A comprehensive understanding of mathematics is a key foundation to engineering. The Texas A&M at Qatar mathematics curriculum is structured to teach mathematical concepts that enhance students’ analytical abilities and to use quantitative mathematical tools and apply them to problems in engineering. Students will learn coordinate systems, vectors, analytical geometry, functions, differentiation and integration techniques, computer algebra systems (Maple and Matlab),

multiple integration techniques, gradients, line and surface integrals, Stokes' theorems, differential equations, matrices, determinants, and topics in applied mathematics, such as Fourier series and wavelets with application to data compression and signal processing.

**Physics**

Physics is the science that investigates and tries to understand the basic laws of nature. In this pursuit, it deals with the entire range of natural phenomena, from the smallest domain of subnuclear particles to the largest domain of distant objects in the universe.

This breadth of interests is reflected in the type of work pursued by physicists. Some physicists are interested in research on problems that are at the frontiers of knowledge. Some apply this newly acquired knowledge to make practical advances. Still others use knowledge of physics as a basis for careers in teaching or administration.
COURSE DESCRIPTIONS

All undergraduate courses offered in the University are described on each subject page. The course numbering scheme is as follows: 100–199, primarily open to freshmen; 200–299, primarily open to sophomores; 300–399, primarily open to juniors; and 400–499, primarily open to seniors.

Figures in parenthesis before the course description indicate the Texas Common Course Number(s). Those figures identified with an asterisk should reference the Texas Common Course Numbering System (p. 1306) in this catalog for additional information.

The unit of credit is the semester hour, which involves one hour of theory or from two to four hours of practice per week for one semester of 15 weeks. Figures following the credit hours indicate the clock hours per week devoted to theory and practice, respectively. Theory includes recitations and lectures; practice includes work done in the laboratory, shop, drawing room, field or other. When courses are cross-listed, credit cannot be received for both courses. Any course may be withdrawn from the session offerings in case the number of registrations is too small to justify offering the course.

Field trips may be required for which departmental fees may be assessed to cover costs.

**AALO - Arabic & Asian Language (AALO)**

AALO 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in an Asian Language, selected for each student individually; written or oral reports.
Prerequisite: Approval of Arabic and Asian Language Office Director.

AALO 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of an Asian language. May be repeated for credit.
Prerequisite: Approval of Arabic and Asian Language Office Director.

AALO 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects selected for each student individually; written or oral reports.
Prerequisite: Approval of Arabic and Asian Language Office Director.

AALO 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of an Asian language. May be repeated for credit.
Prerequisite: Approval of Arabic and Asian Language Office Director.

**ACCT - Accounting (ACCT)**

ACCT 209 Survey of Accounting Principles
Credits 3. 3 Lecture Hours.
Accounting survey for non-business majors; non-technical accounting procedures, preparation and interpretation of financial statements and internal control. May not be used to satisfy degree requirements for majors in business. Business majors who choose to take this course must do so on a satisfactory/unsatisfactory basis.

ACCT 210 Survey of Managerial and Cost Accounting Principles
Credits 3. 3 Lecture Hours.
A survey of managerial and cost accounting for non-business majors; accounting responsibility of the manager, job and process cost systems, budgeting, cost-volume-profit analysis for decision-making. May not be used to satisfy degree requirements for majors in business. Business majors who choose to take this course must do so on a satisfactory/unsatisfactory basis.
Prerequisite: ACCT 209.

ACCT 229 Introductory Accounting
Credits 3. 3 Lecture Hours.
(ACCT 2301, 2401) Introductory Accounting. Analysis, recording and reporting of business transactions; partnership and corporation accounting; analysis and use of financial statements.
Prerequisite: Sophomore classification; also taught at Galveston campus.

ACCT 230 Introductory Accounting
Credits 3. 3 Lecture Hours.
(ACCT 2302, 2402) Introductory Accounting. Continuation of ACCT 229. Use of budgets; introduction to cost accounting; cost control techniques and methods of measuring performance.
Prerequisites: ACCT 229 and sophomore classification; also taught at Galveston campus.

ACCT 231 Survey of Accounting Principles
Credits 3. 3 Lecture Hours.
A survey of managerial and cost accounting principles related to financial reporting; emphasizing income measurement and accounting for assets. BBA accounting majors must earn a minimum grade of C for graduation.
Prerequisite: Grade of C or higher in ACCT 229; grade of D or higher in ACCT 230; admission to upper division in Mays Business School.

ACCT 315 Intermediate Accounting for Non-Accounting Majors I
Credits 3. 3 Lecture Hours.
Revenue recognition, principles of asset valuation, and disclosure requirements for corporations; interpretation of financial statements, rather than their preparation. May not be used as a directed or free elective for accounting majors and does not count towards the accounting requirement for the CPA exam.
Prerequisite: ACCT 230 and admission to upper division in Mays Business School.

ACCT 316 Intermediate Accounting for Non-Accounting Majors II
Credits 3. 3 Lecture Hours.
Includes the measurement and disclosure requirements for liabilities and stockholders’ equity, SEC registration statements, and cash flow reporting; focus on the analysis and interpretation of financial statements rather than their preparation. Does not qualify as a directed or free elective for accounting majors and does not count towards the accounting requirement for the CPA exam.
Prerequisite: ACCT 315 or ACCT 327.

ACCT 321 Professional Development Seminar
Credits 2. 2 Lecture Hours.
Exposure to professional issues of professional accounting practice using a workshop format.
Prerequisite: Admission to Professional Program.

ACCT 322 Professional Development Seminar – BBA
Credit 1. 1 Lecture Hour.
Exposure to professional issues in the practice of accounting, including potential careers and employers.
Prerequisite: Accounting major or approval of instructor.

ACCT 327 Financial Reporting I
Credits 3. 3 Lecture Hours.
Study of theoretical basis for financial accounting concepts and principles related to financial reporting; emphasizing income measurement and accounting for assets. BBA accounting majors must earn a minimum grade of C for graduation.
Prerequisite: Grade of C or higher in ACCT 229; grade of D or higher in ACCT 230; admission to upper division in Mays Business School.
ACCT 328 Financial Reporting II
Credits 3. 3 Lecture Hours.
Continued study of accounting concepts and principles related to
reporting long-debt and owners’ equity; including reporting issues of
leases, retirement benefits, income taxes and international accounting
standards.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 329 Cost Management and Analysis
Credits 3. 3 Lecture Hours.
Theory, concepts and methods relating to use of information and design
of systems to aid managers in planning, controlling, decision making,
evaluating performance and reporting financial results.
Prerequisite: ACCT 315 or ACCT 327 with a grade of C or better.

ACCT 403 Energy Accounting
Credits 3. 3 Lecture Hours.
Overview of the oil and gas industry and specialized financial accounting
procedures associated with the industry; emphasis on accounting for
exploration, development, production, depletion and amortization, joint
operations, asset impairment and retirement obligation; includes reserve
accounting/disclosure related to the above topics.
Prerequisite: ACCT 327 with C or better.

ACCT 405 Income Tax
Credits 3. 3 Lecture Hours.
Introduction to federal income tax legislation pertaining primarily to
corporations and individuals.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 407 Auditing
Credits 3. 3 Lecture Hours.
Introduction to auditing theory and procedures pertaining to financial
statements, in the context of both external auditing, by certified public
accountants, and internal auditing; preparation of working papers.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 408 Internal Auditing
Credits 3. 3 Lecture Hours.
Reading and evaluation of current theory and procedures used by internal
auditors; selected case studies; statistical methods of forming auditing
judgment.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 410 Fraud Examination
Credits 3. 3 Lecture Hours.
Principles and methodologies of detecting and deterring fraud using
accounting, auditing, and investigative skills; includes skimming, larceny,
is appropriations, fraudulent statements, interviewing witnesses and
support for litigation.
Prerequisites: ACCT 327 with a grade of C or better; junior or senior
classification.

ACCT 421 Critical Communication Skills for Accountants
Credits 2. 2 Lecture Hours.
Development of oral and written communication skills necessary for
successful careers in public and corporate accounting.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 426 Taxation of Low-Income Filers
Credits 3. 3 Lecture Hours.
Overview of the Federal income tax and its impact on low-income filers;
includes socio-economic forces impacting low-income families and
individuals; topics explored through community service and academic
learning.
Prerequisites: Admission to upper division in Mays Business School and
approval of instructor.

ACCT 427 Accounting and Financial Information Systems
Credits 3. 3 Lecture Hours.
Overall data flow systems emphasizing financial data and computerized
systems, for accounting majors; flow and logic concepts, developing
meaningful control concepts and data reporting techniques.
Prerequisite: ACCT 229 with a grade of C or better.

ACCT 430/IBUS 430 Global Immersion in Accounting
Credits 3. 3 Lecture Hours.
Combination of classroom work in the spring and a field trip to the
selected country in summer; introduction to international opportunities
within the public accounting firms; meet with former students to gain a
local and corporate view of business in the selected country.
Prerequisites: ACCT 327 and approval of instructor.
Cross Listing: IBUS 430/ACCT 430.

ACCT 445/IBUS 445 International Accounting
Credits 3. 3 Lecture Hours.
Introduction and examination of accounting issues unique to
multinational enterprises and international business activity; only
ACCT 445/IBUS 445 sections count for the accounting coursework
requirements for the CPA exam.
Prerequisites: ACCT 315 or ACCT 327; FINC 341.

ACCT 447/FINC 447 Financial Statement Analysis
Credits 3. 3 Lecture Hours.
Development of an analytical approach to financial statements,
integrating relevant finance and accounting concepts and principles;
current topics in financial analysis.
Prerequisites: ACCT 315 or ACCT 327; FINC 341 with a grade of C or
better.
Cross Listing: FINC 447/ACCT 447.

ACCT 450 Accounting Ethics
Credits 3. 3 Lecture Hours.
Integration of ethical reasoning, objectivity, independence and other
core values into the development of a professional accountant; critical
analysis of the ethical lapses which have occurred in business and the
accounting profession; exploring ways to integrate ethical behavior into
professional life.
Prerequisites: ACCT 427; junior or senior classification.

ACCT 484 Accounting Internship
Credits 0 to 3. 0 to 3 Other Hours.
A directed internship in an organization to provide on-the-job training
under the supervision of accounting professionals in organizational
settings appropriate to the student’s professional objectives. May be
taken for credit up to three hours. Must be taken on a satisfactory/
unsatisfactory basis.
Prerequisites: Accounting major or approval of department head.

ACCT 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed study of selected problems in the area of accounting not
covered in other courses.
Prerequisites: Accounting major and approval of department head.
ACCT 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of accounting. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

ACCT 491 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of an accounting faculty member in Mays Business School or a faculty member in the Office of Undergraduate Research. May be repeated one time for credit.
Prerequisites: Junior or senior classification and approval of instructor.

AERO - Aerospace Engineering (AERO)

AERO 201 Introduction to Flight
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Standard atmosphere, basic aerodynamic theory, airfoil and wing descriptions, wing structures, introduction to orbital mechanics, elementary aerospace vehicle performance, aircraft stability and control and experiential introduction to aerospace engineering.
Prerequisites: Grade of C or better in ENGR 102 and PHYS 206; grade of C or better in ENGR 216/PHYS 216 or PHYS 216/ENGR 216; grade of C or better in MATH 251 or MATH 253 or concurrent enrollment; Aerospace Engineering majors only.

AERO 202 Introduction to Flight Mechanics
Credit 1. 1 Lecture Hour.
Introductory material in aerospace engineering; development of standard atmosphere; aerodynamic theory; airfoil and wing descriptions; aircraft performance.
Prerequisites: Admitted to major degree sequence in aerospace engineering; MEEN 221 or equivalent; MATH 251 or MATH 253 or concurrent enrollment.

AERO 210 Introduction to Aerospace Mechanics
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Planar kinematics; fundamentals of Newtonian mechanics; system of particles and rigid bodies; the effect of friction forces on motion and static equilibrium; rectilinear and curvilinear motion of particles; translational momentum; moments of inertia; angular momentum; planar motion of rigid bodies; impact dynamics; situations involving variable mass; introduction to orbital mechanics.
Prerequisites: Grade of C or better AERO 201; grade of C or better in MATH 308 or registration therein.

AERO 211 Aerospace Engineering Mechanics
Credits 3. 3 Lecture Hours.
Fundamentals of Newtonian mechanics; static equilibrium of particles, system of particles and rigid bodies; free body diagrams; rectilinear and curvilinear motion of particles; linear momentum; angular momentum; friction; plane motion of rigid bodies; beams and trusses.
Prerequisites: Grade of C or better in ENGR 102 and PHYS 206; grade of C or better in ENGR 216/PHYS 216 or PHYS 216/ENGR 216; grade of C or better in MATH 251 or concurrent enrollment; Aerospace Engineering majors only.

AERO 212 Introduction to Aerothermodynamics
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Study of thermodynamic properties and processes, heat and work, first and second laws of thermodynamics, power and refrigeration ideal cycles, psychrometrics.
Prerequisites: Grade of C or better in CHEM 107 and CHEM 117; grade of C or better in MATH 308, or concurrent enrollment; AERO majors.

AERO 214 Introduction to Aerospace Mechanics of Materials
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental concepts for deformable bodies (conservation of linear and angular momentum, kinematics and thermostaticity); notions of stress and strain and illustrative examples for engineering applications; introduction to experimental methods and reporting, instrumentation and uncertainty analysis; measurement of elastic and thermal material properties.
Prerequisites: Grade of C or better in AERO 211; grade of C or better in MATH 308, or concurrent enrollment.

AERO 222 Introduction to Aerospace Computation
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Review of basic skills required for developing computer programs and introduction to more advanced concepts in scientific computing to solve aerospace engineering problems; numerical and analytical methods of solving engineering problems involving interpolation and extrapolation; function approximation; numerical differentiation; integration; solutions to linear and non-linear equations and systems of equations; eigenvalues and eigenvectors, numerical integration of differential equations with aerospace engineering applications.
Prerequisites: Admitted to major degree sequence in aerospace engineering; grade of C or better in ENGR 102; grade of C or better in MATH 308 or concurrent enrollment.

AERO 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of aerospace engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

AERO 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in aerospace engineering. May be taken three times.
Prerequisites: Freshman or sophomore classification and approval of instructor.

AERO 299 Mid-Curriculum Professional Development
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point.

AERO 301 Theoretical Aerodynamics
Credits 3. 3 Lecture Hours.
Fundamentals of incompressible flow, conservation principles, continuity, momentum, rotationality, circulation, lift, drag, potential flow, thin airfoil theory, panel methods, airfoil design, high lift devices, finite wing theory, vortex lattice methods, and wing design.
Prerequisites: Grade of C or better in AERO 201, AERO 212, and MATH 308; grade of C or better in AERO 222 or concurrent enrollment.
AERO 303 High Speed Aerodynamics  
Credits 3. 3 Lecture Hours.  
Fundamentals of compressible flow, acoustic waves, shock and expansion waves, shock-expansion theory, supersonic airfoil design, small perturbation theory, conical flow theory, supersonic wing panel methods, supersonic wing design, similarity theory, cone flow, unsteady waves, and theory of characteristics.  
Prerequisite: Grade of C or better in AERO 301.

AERO 304 Aerospace Structural Analysis I  
Credits 3. 3 Lecture Hours.  
Structural design considerations; mechanics of structures; introduction to elasticity; constitution of materials; analysis of typical aerospace structures in bending, extension, torsion and shear.  
Prerequisites: Grade of C or better in AERO 214 and MATH 308; grade of C or better in AERO 222 or concurrent enrollment.

AERO 306 Aerospace Structural Analysis II  
Credits 3. 3 Lecture Hours.  
Work and energy principles; analysis of indeterminate structures by classical virtual work and finite elements; introduction to elastic stability of columns; application of energy methods to determine stresses, strains and displacements in typical aerospace structures; design considerations in aerospace structures.  
Prerequisite: Grade of C or better in AERO 304.

AERO 307 Aerospace Engineering Laboratory  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Intermediate and advanced topics in instrumentation, signal conditioning, data acquisition analysis for aerospace-related measurements; emphasis on technical reporting and data presentation; measurements of materials strain, deformation, pressure, velocity and aerodynamic forces; experimental investigations of static and dynamic response of structures; use of nonintrusive optical techniques; uncertainty analysis; linear regression, Fourier transform and power spectra; tests for statistical significance.  
Prerequisites: Grade of C or better in ENGL 103 or ENGL 104; grade of C or better in AERO 222, AERO 301, AERO 304, AERO 310, ECEN 215, or concurrent enrollment.

AERO 310 Aerospace Dynamics  
Credits 3. 3 Lecture Hours.  
Spatial kinematics; general motion of particles; Euler angles; Newton-Euler methods for translation and rotation of rigid bodies; work-energy and impulse momentum principles applied to aerospace systems; Linear theory of free and forced vibrations and dynamic response of single and multi-degree of freedom systems; frequency response of first and second order systems with instrumentation applications.  
Prerequisites: Grade of C or better in AERO 211 and MATH 308; grade of C or better in AERO 222 or concurrent enrollment.

AERO 321 Dynamics of Aerospace Vehicles  
Credits 3. 3 Lecture Hours.  
Derivation of the nonlinear flight dynamics equations; linearization; aircraft static stability and control; longitudinal and lateral dynamic stability; development of state-space models; stability derivatives; longitudinal and lateral modes and transfer functions; flying qualities; elements of configuration design; response to control inputs.  
Prerequisites: Grade of C or better in AERO 301 and AERO 310.

AERO 351 Aerothermodynamics and Propulsion  
Credits 3. 3 Lecture Hours.  
Aerothermodynamics of gases; laws of thermodynamics; equilibrium conditions; mixtures of gases; combustion and thermochemistry; compressible internal flows with friction, heat transfer and shock; turbojet cycle analysis and performance; chemical rockets.  
Prerequisite: Grade of C or better in AERO 303 or concurrent enrollment.

AERO 401 Aerospace Vehicle Design I  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Aerodynamic design, specification, arrangement, performance analysis, weight and balance, stability.  
Prerequisites: Grade of C or better in AERO 303, AERO 306, AERO 321, and AERO 351; grade of C or better in AERO 307 or concurrent enrollment.

AERO 402 Aerospace Vehicle Design II  
Credits 2. 6 Lab Hours.  
Continuation of AERO 401. System optimization by examination and analysis of necessary trade-offs.  
Prerequisite: Grade of C or better in AERO 401.

AERO 404 Mechanics of Advanced Aerospace Structures  
Credits 3. 3 Lecture Hours.  
Advanced analysis techniques for aerospace structures; material anisotropy, plasticity, fatigue and fracture; laminated materials; solution of plane elasticity, plate and multi-component structural configurations; buckling of beams and plates; application of finite element analysis.  
Prerequisites: Grade of C or better in AERO 304 and junior or senior classification.

AERO 405 Aerospace Structural Design  
Credits 3. 3 Lecture Hours.  
Overall structural integrity of complete aerospace systems; structures subjected to critical loads; design considerations in aerospace structures.  
Prerequisite: Grade of C or better in AERO 306.

AERO 411 Applications of Fracture Mechanics to Aerospace Structures  
Credits 3. 3 Lecture Hours.  
Foundations of linear elastic fracture mechanics of aerospace structure; calculation of stress intensity factors and energy release rates; crack growth under fatigue loading; ASTM standards for fracture testing; the role of fracture mechanics in the analysis and design of aerospace structures.  
Prerequisite: AERO 304 or equivalent with a grade of C or better.

AERO 413 Aerospace Materials Science  
Credits 3. 3 Lecture Hours.  
Relationship between aerospace engineering material properties and microstructure; mechanical and thermal properties; environmental degradation; mechanical failure.  
Prerequisite: Grade of C or better in AERO 304.

AERO 417 Aerospace Propulsion  
Credits 3. 3 Lecture Hours.  
Air breathing propulsion; design and analysis of inlets, compressors, combustors, turbines and nozzles; application to aeronautical and ground transportation.  
Prerequisite: Grade of C or better in AERO 351.

AERO 419 Chemical Rocket Propulsion  
Credits 3. 3 Lecture Hours.  
Nozzles and heat transfer in rockets, liquid and solid propellant systems; combustion and combustion stability; flight performance including trajectories, multistaging and exchange rate curves; rocket testing.  
Prerequisite: Grade of C or better in AERO 351.
AERO 420 Aeroelasticity
Credits 3. 3 Lecture Hours.
Classical analysis of fundamental aeroelastic phenomena with application to aerospace vehicles; flutter, divergence, control effectiveness.
Prerequisites: Grade of C or better in AERO 303, AERO 306, AERO 310.

AERO 424 Spacecraft Attitude Dynamics and Control
Credits 3. 3 Lecture Hours.
Introduces fundamental concepts of satellite attitude dynamics and control; includes derivations of environmental disturbances due to gravity gradient, aerodynamic, and solar radiation pressure; includes treatments of attitude control subsystems, such as thrusters, reaction wheels, CMGs, and magnetic torquers, and their designs.
Prerequisite: Grade of C or better in AERO 321.

AERO 426 Space System Design
Credits 3. 3 Lecture Hours.
Introduces prevailing practices and processes used in modern space system design; applies knowledge in component engineering disciplines to a design challenge of interest to NASA or DoD; utilizes instruction in systematic methods of design and on dynamics of teamwork; when possible concludes with detailed design using an engineering design facility.
Prerequisites: Grade of C or better in AERO 306, AERO 321, AERO 351.

AERO 428 Electromagnetic Sensing for Space-Borne Imaging
Credits 3. 3 Lecture Hours.
Study IR and Visible range imaging systems to obtain high resolution imaging of objects from space; this area has numerous applications and areas of advanced development; following instruction in needed background on optics, telescopes, and interferometry, perform preliminary design of imaging system with a different imaging design offered each year.
Prerequisites: Grade of C or better in AERO 306, AERO 321, AERO 351.

AERO 430 Numerical Simulation
Credits 3. 3 Lecture Hours.
Numerical and analytical simulation of physical problems in sciences and engineering using applied methods; developing and using numerical techniques for physical problems described by nonlinear algebraic equations, ordinary and partial differential equations.
Prerequisite: Grade of C or better in AERO 222 or MATH 417.

AERO 435 Aerothermochemistry
Credits 3. 3 Lecture Hours.
Composition of chemically reacting gases (air and propellant); thermodynamic functions based on classical and quantum mechanical theories; calculation of gas temperatures; equilibrium, frozen and non-equilibrium flows through nozzles and shock waves.
Prerequisite: Grade of C or better in AERO 303.

AERO 440 Cockpit Systems and Displays
Credits 3. 3 Lecture Hours.
Design, development, and implementation of cockpit systems and multifunction displays; cockpit system requirements and specifications; human-machine interfaces, Flight Management Systems, navigation and guidance systems; 3-D real-time displays of weather, traffic, and terrain; characteristics and missions of air vehicles; project design and cost analysis.
Prerequisite: Grade of C or better in AERO 321 or junior or senior classification in computer science.

AERO 445 Vehicle Management Systems
Credits 3. 3 Lecture Hours.
Introduction to vehicle management systems for manned and unmanned air and space vehicles; system centric concepts, requirements definition, specifications, and architectures; reliability analysis, health monitoring, and mission management; SISO digital design of integrated flight control, propulsion control and structural control; introduction to vehicle autonomy; design and analysis methods, industrial examples.
Prerequisite: Grade of C or better in AERO 422.

AERO 451 Human Spaceflight Operations
Credits 3. 3 Lecture Hours.
Essential aspects of human spaceflight operations as performed by NASA; in-depth understanding of the state-of-the-art in spacecraft operations, including spacecraft systems, ground and launch operations, mission management and on-orbit activities such as science, robotics, spacewalking and human health maintenance; applications to future space systems.
Prerequisite: Grade of C or better in AERO 310 or equivalent; senior classification.

AERO 452 Heat Transfer and Viscous Flows
Credits 3. 3 Lecture Hours.
Navier-Stokes and boundary layer equations; exact and approximate solutions; laminar boundary layers; origin of turbulence; transition; turbulent boundary layers; viscous airfoil design; one and two dimensional heat transfer; methods for steady and transient heat conduction; thermal boundary layers; convection; and radiation.
Prerequisite: Grade of C or better in AERO 303 and AERO 351.
AERO 455 Helicopter Aerodynamics  
Credits 3. 3 Lecture Hours.  
Hovering theory, hovering and vertical flight performance, factors affecting hovering and vertical flight performance, auto-rotation in vertical descent, concepts of blade motion and control, aerodynamics of forward flight, forward flight performance, operational envelope and introduction to conceptual design of helicopters.  
Prerequisites: Grade of C or better in AERO 222, AERO 301, and AERO 310.

AERO 472 Airfoil and Wing Design  
Credits 3. 3 Lecture Hours.  
Subsonic airfoil design and analysis, subsonic wing design and analysis, swept and delta wings, vortex lift, transonic flow methods, viscous transonic phenomena, transonic airfoil and wing design, optimization and advanced topics such as supersonic panel methods.  
Prerequisite: Grade of C or better in AERO 303.

AERO 481 Seminar  
Credit 1. 1 Lecture Hour.  
Readings, reports, conferences and discussion. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: Senior classification in aerospace engineering.

AERO 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Special problems in aerospace engineering assigned to individual students or groups.  
Prerequisite: Junior or senior classification or approval of instructor.

AERO 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified field of aerospace engineering. May be repeated for credit.  
Prerequisite: Approval of instructor.

AERO 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in aerospace engineering. May be repeated 3 times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

AERS - Aerospace Studies (AERS)  

AERS 101 Foundations of the USAF  
Credit 1. 1 Lecture Hour.  
Introduction to the U.S. Air Force and the Air Force Reserve Officer Training Corps (AFROTC); includes Officership, professionalism, military customs and courtesies, and officer opportunities and benefits; AFROTC cadets must register for Leadership Laboratory (AERS 106) as it complements this course with followership experience.

AERS 102 Foundations of the USAF  
Credit 1. 1 Lecture Hour.  
Continuation of AERS 101; AFROTC cadets must register for Leadership Laboratory (AERS 106) as it complements this course with followership experience.

AERS 105 AFROTC Leadership Lab  
Credit 1. 2 Lab Hours.  
Designed to give insight into the Air Force and give leadership opportunities to cadets through a variety of experiences; expected to perform a multitude of tasks in both the subordinate and superior roles. Must be taken on a satisfactory/unsatisfactory basis.

AERS 106 AFROTC Leadership Lab  
Credit 1. 2 Lab Hours.  
Designed to give insight into the Air Force and give leadership opportunities to cadets through a variety of experiences; expected to perform a multitude of tasks in both the subordinate and superior roles. Must be taken on a satisfactory/unsatisfactory basis.

AERS 201 Evolution of Air and Space Power  
Credit 1. 1 Lecture Hour.  
Examines general aspects of air and space power through a historical perspective; covers the time period from the first use of balloons to the Persian Gulf War; AFROTC cadets must register for Leadership Laboratory (AERS 105) as it complements this course with followership/leadership experience.  
Prerequisites: Grade of C or better in AERS 102; concurrent enrollment in AERS 105.

AERS 202 Evolution of Air and Space Power  
Credit 1. 1 Lecture Hour.  
Continuation of AERS 201; AFROTC cadets must register for Leadership Laboratory (AERS 106) as it complements this course with followership/leadership experience.  
Prerequisites: Grade of C or better in AERS 201; concurrent enrollment in AERS 106.

AERS 303 Air Force Leadership Studies  
Credits 3. 3 Lecture Hours.  
Leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, and leadership ethics; case studies of leadership and management situations as a means of demonstrating and exercising practical application of concepts; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 105).  
Prerequisites: Grade of C or better in AERS 201; concurrent enrollment in AERS 106.

AERS 304 Air Force Leadership Studies  
Credits 3. 3 Lecture Hours.  
Continuation of AERS 303; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 106).  
Prerequisites: Grade of C or better in AERS 303; concurrent enrollment in AERS 106.

AERS 403 National Security Affairs—Preparation for Active Duty  
Credits 3. 3 Lecture Hours.  
Examines the Constitution and the national security process; focuses on civilian control of the military; the roles of the Services; and the functions of the Air Force commands; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 105).  
Prerequisites: Grade of C or better in AERS 304; concurrent enrollment in AERS 105; non-Air Force contract students must have approval of instructor and department head.

AERS 404 National Security Affairs—Preparation for Active Duty  
Credits 3. 3 Lecture Hours.  
National Security Affairs—Preparation for Active Duty. Continuation of AERS 403; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 106).  
Prerequisites: Grade of C or better in AERS 403; concurrent enrollment in AERS 106; non-Air Force contract students must have approval of instructor and department head.
AFST 201 Introduction to Africana Studies
Credits 3.3 Lecture Hours.
Introduction to the field of Africana Studies; interdisciplinary approach drawing from history, philosophy, sociology, political studies, literature and performance studies; explores the African foundational relationship to and connections with its diaspora populations; covers Africa, the United States, the Caribbean, Europe and South America.

AFST 204/ENGL 204 Introduction to African-American Literature
Credits 3.3 Lecture Hours.
Introduction to the writings of African Americans from the 18th century to the present, emphasizing the major themes and traditions; ENGL-204 also taught at Galveston campus.
Cross Listing: ENGL 204/AFST 204.

AFST 205/ENGL 205 Introduction to Africana Literature
Credits 3.3 Lecture Hours.
Works, literary movements and genres of authors of African descent in the Americas, Europe and Africa.
Cross Listing: ENGL 205/AFST 205.

AFST 206/PSYC 206 Black Psychology
Credits 3.3 Lecture Hours.
Critical examination of psychological experience, theories, and methods from perspectives grounded in the ‘Black experience.’
Cross Listing: PSYC 206/AFST 206.

AFST 209/PSYC 209 Psychology of Culture and Diversity
Credits 3.3 Lecture Hours.
Introduction to various issues surrounding an increasingly interconnected and globalized world by critically examining the dynamic relationship between psychological processes and diverse (e.g., motivation, memory, self, prejudice) socio-cultural contexts.
Prerequisite: PSYC 107.
Cross Listing: PSYC 209/AFST 209.

AFST 252/PHIL 252 Introduction to Hip-Hop Philosophy
Credits 3.3 Lecture Hours.
Introduction to philosophy by way of the major themes and subjects of Hip-Hop; critical advocacy of various philosophical ideals.
Cross Listing: PHIL 252/AFST 252.

AFST 285 Directed Studies
Credits 0 to 4.0 to 4 Other Hours.
Directed studies in the field of Africana Studies. May be taken two times for credit.
Prerequisite: AFST 201; Freshman or sophomore classification; approval of instructor and director.

AFST 291 Research
Credits 0 to 3.0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Africana Studies. May be taken three times for credit.
Prerequisites: AFST 201; freshman or sophomore classification; and approval of instructor.

AFST 300/HIST 300 Blacks in the United States, 1607-1877
Credits 3.3 Lecture Hours.
Blacks in the United States from the colonial period to 1877; the slave trade, slavery, free blacks and the impact of the Civil War and Reconstruction on blacks.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 300/AFST 300.

AFST 301/HIST 301 Blacks in the United States Since 1877
Credits 3.3 Lecture Hours.
Blacks in the United States from the end of Reconstruction to the present; ideologies of black leaders, disfranchisement, lynching and the quest for equality in the 1950s and 1960s.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 301/AFST 301.

AFST 302 Gateway Course
Credits 3.3 Lecture Hours.
Gateway to a series of courses offered for the minor in Africana Studies; explores topics such as Afrocentrism, postcolonial studies, black cultural studies, black feminist theory for a close study of issues among African and African diaspora populations in Africa, the United States, Caribbean, Europe and South America.

AFST 303 Psychology of Women of Color
Credits 3.3 Lecture Hours.
Interdisciplinary theories to study the unique yet intersectional experiences of women from different racial groups, ethnicities, nationalities and cultural backgrounds; scholarly research from the diversity science field; contemporary topics that have developed in a global context; examination of complex issues, which affect women of color across the lifespan.
Prerequisite: Grade of C or better in AFST 201 or PSYC 107 or WGST 200, or approval of instructor.
Cross Listing: PSYC 303 and WGST 303.

AFST 317/SOCI 317 Racial and Ethnic Relations
Credits 3.3 Lecture Hours.
Status of racial and ethnic groups such as Native Americans, African Americans, Latino Americans, Asian Americans, European Americans, and other groups in the political, economic, legal and social systems of the United States.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: SOCI 317/AFST 317.

AFST 323/SOCI 323 Sociology of African Americans
Credits 3.3 Lecture Hours.
Major elements of the Afro-American subculture in relation to white American society and its major social institutions.
Prerequisites: SOCI 206.
Cross Listing: SOCI 323/AFST 323.

AFST 324 Africana Social Sciences
Credits 3.3 Lecture Hours.
Exploration of a significant topic pertaining to Africa and/or its diaspora in the social sciences.
Prerequisite: Junior or senior classification.
AFST 325 Africana Humanities
Credits 3. 3 Lecture Hours.
Exploration of a significant topic pertaining to Africa and/or its Diaspora in the humanities and arts.
Prerequisite: Junior or senior classification.

AFST 326 Africana Popular Culture
Credits 3. 3 Lecture Hours.
Dynamics of popular culture and classic theories of society; popular and public cultural forms in context of globalization and the Africana Diaspora.
Prerequisite: Junior or senior classification or approval of instructor.

AFST 327/PERF 327 Popular Musics in the African Diaspora
Credits 3. 3 Lecture Hours.
Examination of a range of popular musics from the twentieth century that have emerged in conjunction with the historical global spread of peoples and cultures from the African continent; technical knowledge about music is not required; focus on social and cultural contexts for popular music.
Prerequisite: Junior or senior classification or approval of instructor.

AFST 329/ENGL 329 African-American Literature Pre-1930
Credits 3. 3 Lecture Hours.
Major works of the African-American literary tradition from the 18th century to 1930 studied within cultural and historical context.
Prerequisites: 3 credits of literature at 200-level or above.

AFST 338/COMM 338 Critical Race Discourse
Credits 3. 3 Lecture Hours.
Critical analysis of communication and dialogue on race; causes and symptoms of structural racism; social/racial hierarchies as they influence and are influenced by communication and dialogue.
Prerequisites: Junior or senior classification or approval of instructor.

AFST 339/ENGL 339 African-American Literature Post-1930
Credits 3. 3 Lecture Hours.
Major works of the African-American literary tradition from the 1930s to the present studied in their cultural and historical context.
Prerequisites: 3 credits of literature at 200-level or above.

AFST 344/HIST 344 History of Africa to 1800
Credits 3. 3 Lecture Hours.
Origins of humankind in Africa; development and spread of pastoralism, agriculture and iron-working; formation of states and empires; impact of Christianity and Islam; rise of international trade in gold, ivory and slaves; African diaspora.
Prerequisite: Junior or senior classification.

AFST 345/HIST 345 Modern Africa
Credits 3. 3 Lecture Hours.
Survey of Africa since 1800; pre-colonial African states and societies; establishment and impact of European colonial rule; rise of nationalist movements; achievement of independence; problems of political stability and economic development in contemporary Africa; South Africa's apartheid regime and its opponents.
Prerequisite: Junior or senior classification.

AFST 346/HIST 346 History of South Africa
Credits 3. 3 Lecture Hours.
Selected themes in the history of South Africa from the African Iron Age to the Apartheid regime; history of race relations in the 19th and 20th centuries and the rise of modern industrial state.
Prerequisite: Junior or senior classification or approval of instructor.

AFST 352/PHIL 352 Africana Philosophy
Credits 3. 3 Lecture Hours.
Presentation of the seminal ideas of several influential Africana thinkers; recovery of the neglected traditions in which these thinkers locate themselves.
Prerequisite: Junior or senior classification or approval of instructor.

AFST 357/HIST 357 Out of Africa: The Black Diaspora and the Modern World
Credits 3. 3 Lecture Hours.
History and cultures of the peoples of the African Diaspora from the fourteenth through the nineteenth centuries; social, political, and economic impact on Africa, the Americas, Europe, and the Arab World; emphasis on race, gender, identity, and migration.
Prerequisite: Junior or senior classification or approval of instructor.

AFST 362/HIST 302 Women and War in the African Diaspora
Credits 3. 3 Lecture Hours.
Case studies of women and war in the African diaspora in a wide historical and comparative context; social, economic, and cultural influence of war on women's lives; women as victims, combatants, and refugees; historical construction of race, ethnic and gender identity during times of conflict.
Prerequisite: Junior or senior classification.

AFST 379/ENGL 379 Postcolonial Literatures
Credits 3. 3 Lecture Hours.
Exploration of key terms, themes and debates within global literature written by colonized, occupied and diasporic peoples.
Prerequisites: 3 credits of literature at 200-level or above.

AFST 391 Africana Feminisms
Credits 3. 3 Lecture Hours.
Exploration of a significant topic in feminist theory by and about women from Africa and/or its Diaspora, from various disciplinary perspectives and historical periods, and with application to societal debates and controversies.
Prerequisite: Junior or senior classification.

AFST 393/ENGL 393 Studies in Africana Literature and Culture
Credits 3. 3 Lecture Hours.
Literary movements, genres, groups of authors, topics or issues in the literature and culture of people of African descent.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification or approval of instructor.

Cross Listing: ENGL 393/AFST 393.
AFST 398/FILM 398 Africana Cinema
Credits 3. 3 Lecture Hours.
Overview of African cinema; historical survey of cinema from Africa and the African Diaspora; introducing films produced in several geographical regions and reflecting different filmmaking traditions. May be taken two times for credit.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: FILM 398/AFST 398.

AFST 401 Slavery in World History
Credits 3. 3 Lecture Hours.
Comparative history of human slavery; slavery in the Ancient World, Asia, Africa; varieties of modern slavery in the New World since 1500; abolition of slavery and continuing forms of human bondage in the contemporary world.
Prerequisite: Junior or senior classification. 

AFST 422 Race, Ethnicity, Crime and Justice
Credits 3. 3 Lecture Hours.
Racial/ethnic disparities in criminal offending and victimization, as well as different experiences with law enforcement, judicial, and correctional agencies.
Prerequisites: SOCI 220 or equivalent.
Cross Listing: SOCI 422 and LMAS 422.

AFST 425/COMM 425 Rhetoric of the Civil Rights Movement
Credits 3. 3 Lecture Hours.
Rhetorical evaluation of theoretical literature and pragmatic episodes that shaped the U.S. Civil Rights Movement; examination of significant speeches, documents, and protest activities in their historical, political, and social contexts.
Prerequisite: Junior or senior classification.
Cross Listing: COMM 425/AFST 425.

AFST 481 Seminar
Credits 3. 3 Lecture Hours.
Comparative studies of slave societies in the modern world; history and analysis of African American feminism; comparative analyses of the social, political, and economic condition of African Americans and other African peoples of the diaspora.
Prerequisite: AFST 302; junior or senior classification.

AFST 484 Internship
Credits 0 to 4. 0 to 4 Other Hours.
Directed internship in a public or private organization to provide students with applied experience; opportunity to observe first hand issues and problems covered in Africana Studies courses; designed to enhance and clarify the student's career objectives.
Prerequisite: Approval of instructor.

AFST 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Selected fields of Africana Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.
Prerequisite: AFST 201; junior or senior classification; approval of instructor.

AFST 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in Africana Studies. May be repeated for credit.

AFST 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Africana Studies. May be taken for a maximum of 18 hours credit.
Prerequisites: AFST 201; junior or senior classification; and approval of instructor.

AGCJ - Ag Comm & Journalism (AGCJ)

AGCJ 105 Introduction to Agricultural Communications
Credits 3. 3 Lecture Hours.
Introduction to mass communication, its history, role in society, and especially its unique role in agriculture; importance of mass communication and the communication methods used in modern society; foundation for an understanding of agricultural news and information. Only one of the following will satisfy the requirements for a degree: AGCJ 105 and JOUR 102.

AGCJ 281 Journalism Concepts for Agriculture
Credits 3. 3 Lecture Hours.
The role of the news media in covering government, the court systems, corporations, taxation, and insurance; a practical perspective on how journalists interact with public and private institutions from a legal, ethical and social standpoint.
Prerequisite: Grade of C or better in AGCJ 105 or concurrent enrollment.

AGCJ 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected issue in field of agricultural communications with emphasis on collection, synthesis and interpretation of information.
Prerequisite: Approval of department advisor.

AGCJ 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special topics in an identified area of agricultural development. May be repeated for credit.
Prerequisite: Approval of department advisor.

AGCJ 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural communications and journalism. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of department advisor.

AGCJ 305 Theory and Practice of Agricultural Publishing
Credits 3. 3 Lecture Hours.
Audience identification, publication content, management and design; analyze existing agricultural publications, identify audiences, advertising base and content.
Prerequisites: AGCJ 105; junior or senior classification.

AGCJ 306 Theory and Practice of Agricultural Public Relations
Credits 3. 3 Lecture Hours.
Public relations between agricultural producers and their suppliers as a critical part of agricultural communication; public relations objectives, strategies, tactics, evaluation and execution theory and practice examined.
Prerequisites: Grade of C or better in AGCJ 105; junior or senior classification.
AGCJ 307 Design for Agricultural Media
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles and practices of agricultural media design, including design and production of printed publications and graphics; computer assisted design and production of media pieces. Required for AGCJ majors and minors.
Prerequisite: Junior or senior classification.

AGCJ 308 Agricultural Photography
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Develop knowledge of photography, editing software, and composition techniques used in the agricultural communications field; develop photography and photo editing skills to a satisfactory level as demonstrated by performance on assignments and exams.
Prerequisite: Junior or senior classification.

AGCJ 312 Editing for Agricultural Audiences
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles and practices of editing for agricultural and technical audiences including improving and tightening copy; writing headlines, titles, and subheads; photo editing and captions, graphics and layout; print, broadcast, interactive and other media.
Prerequisites: AGCJ 105; junior or senior classification.

AGCJ 313 Agricultural Media Writing I
Credits 3. 2 Lecture Hours. 2 Lab Hours.
News gathering, writing, editing and ethics for current and emerging mediums used in agricultural communication; includes news identification, basic news writing methods, introduction to public relations, broadcast and Internet writing, interviewing skills, proper use of direct quotes and other news style. Only one of the following will satisfy the requirements for a degree: AGCJ 313 and JOUR 203.
Prerequisite: Grade of C or better in AGCJ 105 and AGCJ 312.

AGCJ 314 Agricultural Media Writing II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Interpretive agricultural news gathering and writing for all media types; basic media law and ethics, interviewing skills with assigned practice writing about agriculture, and science and technology, including meeting and event coverage both on and off campus; print, broadcast, interactive and other media.
Prerequisites: Grade of C or better in AGCJ 312 and AGCJ 313; junior or senior classification.

AGCJ 366 Radio Broadcasting
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Survey of American broadcasting, development, and impact; influence on society, basic principles, mass communication theory, station operating programming, advertising, rating methods, regulation, and censorship; in-depth analysis of current issues and developments.
Prerequisite: Junior or senior classification.

AGCJ 404 Communicating Agricultural Information to the Public
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Use of agricultural journalism principles and techniques to communicate scientific information related to agriculture, agribusiness, natural resources and life sciences to the general public; communication processes include audience identification, writing, editing and production of agricultural science-based manuscripts for popular and refereed publications.
Prerequisite: Junior or senior classification.

AGCJ 405 Agricultural Publications Production
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study and practice of the principles and concepts of designing, writing, editing, producing and distributing the AgriLeader magazine and Web site; includes practical applications of writing feature articles, magazine and Web site design, advertising sales, layout and graphics. May be repeated one time for credit.
Prerequisites: Grade of C or better in AGCJ 312; junior or senior classification.

AGCJ 406 Agricultural Public Relations Methods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Agricultural public relations campaign analysis; public relations case studies and methods including writing public relations plans for agricultural entities, producing public relations components and evaluating public relations objectives, strategies and tactics.
Prerequisites: Junior or senior classification.

AGCJ 407 Web Authoring in Agricultural Communication
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study and practice of basic website design theories, principles and writing for the web; use of web authoring software (not a programming class) to create online publications tailored for agricultural audiences; emphasizes informative content and functional design.
Prerequisites: Grade of C or better in AGCJ 307; junior or senior classification.

AGCJ 408 Advertising Copy and Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Creative aspects of advertising strategy, copywriting, typography and design in a variety of visual media; learn to make and evaluate advertising.
Prerequisites: Grade of C or better in AGCJ 307 and AGCJ 313; junior or senior classification; approval of instructor.

AGCJ 409 Television Production for Agricultural Journalists
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental concepts required to develop a broadcast quality video production; uses the high definition facilities of KAMU-TV and TTVN; hands-on experience in video production including producing, shooting and hosting a professional program series broadcast on KAMU-TV.
Prerequisite: Junior or senior classification.

AGCJ 411 Audience and Communications Research Methods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Evaluation and implementation of research designs and methods used in audience and communications research; data collection methods and strategies, including interviews, observations, focus groups, surveys and content analyses, use of descriptive and comparative analyses to develop data-driven personas and recommendations for engaging target audiences.
Prerequisite: Junior or senior classification.

AGCJ 413 Emerging Media in Agriculture
Credits 3. 3 Lecture Hours.
Popular emerging media in agriculture to communicate, build and market a brand online; understanding the strategy behind the posts and other communications; create emerging media communications strategies for academic or business entities that may be implemented upon completion of course.
Prerequisite: Grade of C or better in AGCJ 313.
AGCJ 466 Advanced Radio Broadcasting  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Project-based instruction; a practical guide to producing, presenting, programming and managing a radio station. May be taken four times for credit.  
Prerequisites: AGCJ 366; junior or senior classification or approval of instructor.  

AGCJ 481 Senior Seminar  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Identification of communication-related issues; strategic planning to meet goals; measurable communication outcomes; writing, designing, creating and distributing communications products to clients; measuring effectiveness; working in teams.  
Prerequisites: Grade of C or better in AGCJ 313; senior classification.  

AGCJ 485 Directed Studies  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Directed individual study of selected problems in agricultural communications, communication methods and the communication profession with emphasis on collection, analysis and presentation of information.  
Prerequisites: Junior or senior classification; approval of department advisor.  

AGCJ 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Special topics in an identified area of agricultural communications and journalism. May be repeated for credit.  
Prerequisite: Junior or senior classification.  

AGCJ 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in agricultural communications and journalism. May be repeated 3 times for credit.  
Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of department advisor.  

AGCJ 494 Internship  
Credits 1 to 6. 1 to 6 Other Hours.  
Supervised internship and independent study related to the student's professional interest.  
Prerequisites: Junior or senior classification; approval of department advisor.  

AGCJ 499 Internship  
Credits 1 to 6. 1 to 6 Other Hours.  
Supervised internship and independent study related to the student’s professional interest.  
Prerequisites: Junior or senior classification; approval of department advisor.  

AGEC - Agricultural Economics (AGEC)  

AGEC 105 Introduction to Agricultural Economics  
Credits 3. 3 Lecture Hours.  
(AGRI 2317) Introduction to Agricultural Economics. Characteristics of our economic system and basic economic concepts; survey of the farm and ranch firm and its organization and management; structure and operation of the marketing system; functional and institutional aspects of agricultural finance; government farm programs.  

AGEC 117 Critical Thinking and Decision Making in Agricultural Economics  
Credit 1. 1 Other Hour.  
An introductory seminar in the Department of Agricultural Economics; emphasis on resources and opportunities available in the department; awareness and understanding of professional development; emphasis on writing as a critical communication skill.  
Prerequisites: AGEC 105, ECON 203, or grade of C or better in ECON 202; freshman classification; Agricultural Economics and Agribusiness majors only.  

AGEC 216 Fundamentals of the AgriFood Sales Industry  
Credit 1. 1 Lecture Hour.  
Fundamentals of professional business to business sales in AgriFood firms; opportunities to interact with successful salespeople in AgriFood firms; focus on career development, exploration of undergraduate internships in professional sales and identification of basic sales theories currently in use in AgriFood firms; learning to network extensively with AgriFood industry professionals and developing a mentor relationship.  

AGEC 217 Fundamentals of Agricultural Economics Analysis  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
Relates contemporary agribusiness issues to economic and financial management, illustrating their integration toward pragmatic applications in the agricultural industry; lab focuses on the integration of mathematics and economics with computer skills directed toward spreadsheets, databases, web pages, and communications software.  
Prerequisites: AGEC 105; ENGL 103 or ENGL 104; MATH 168, MATH 140, or MATH 166; MATH 142; sophomore or junior agricultural economics or agribusiness majors; or approval of department head.  

AGEC 223 Establishing Agribusiness Entrepreneurship Networks I  
Credits 1. 1 Lecture Hour.  
Introduction to successful entrepreneurs and other professionals, identifying suggested strategies and tactics in starting and sustaining viable rural and metropolitan business ventures; emphasis on importance of and how to develop relationships with a broad spectrum of mentors.  
Prerequisite: Open to all majors.  

AGEC 235 Foundations of Money Education  
Credits 3. 3 Lecture Hours.  
Preparation for a financially challenging world and introduction to concepts and methods of personal financial planning; financial planning process, time value of money, taxation, credit, housing, insurance, employee benefits, family economics and building a personal financial plan.  

AGEC 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed study of selected problems in agricultural economics.  
Prerequisites: AGEC 105; freshman or sophomore classification in agricultural economics, agribusiness, or approval of instructor and department head; 2.5 GPR in major, overall, and CBK courses, if applicable; see an academic advisor in Room 214 AGLS.  

AGEC 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of agricultural economics. May be repeated for credit.  
Prerequisites: Freshman or sophomore classification and approval of department head.
AGEC 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural economics. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of department head; see an academic advisor in Room 214 AGLS.

AGEC 314 Marketing Agricultural and Food Products
Credits 3. 3 Lecture Hours.
Operations involved in movement of agricultural commodities from farmer to consumer via several intermediaries; functions involve buying, selling, transportation, storage, financing, grading, pricing and risk bearing; agricultural supply chain or value chain is studied in detail; marketing aspects of commodities and differentiated goods.
Prerequisites: AGEC 105 or 3 hours of economics; and junior or senior classification.

AGEC 315 Food and Agricultural Sales
Credits 3. 3 Lecture Hours.
Principles of professional sales techniques used in food and agricultural firms; develop a professional sales presentation; study current agribusiness industry professional salespersons.
Prerequisite: Junior or senior classification.

AGEC 316 Building Customer Relationships in AgriFood Selling
Credits 3. 3 Lecture Hours.
Use of emotional intelligence factors in developing business-to-business customer relationships for AgriFood, real estate, finance and other industrial products and services; developing customer relationships with regard to the unique aspects of technical products and services in these industries.
Prerequisites: Junior or senior classification; approval of instructor.

AGEC 317 Economic Analysis for Agribusiness Management
Credits 3. 3 Lecture Hours.
Quantitative methods used to address managerial problems, specifically calculus-based optimization, marginal analysis, elasticities, statistical and forecasting techniques, linear programming, and risk analysis; emphasis on theoretical aspects and applied analysis of managerial problems faced by agricultural firms.
Prerequisites: AGEC 217; ECON 322 or ECON 323; SCMT 303 or STAT 301 or STAT 302 or STAT 303; and junior or senior classification; agricultural economics, agribusiness majors only; or approval of department head.

AGEC 324 Agribusiness Entrepreneurship – Budgeting
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Case study approach to demonstrate a process for evaluating the economic feasibility of a single-enterprise rural or metropolitan business venture; relevant production, marketing and financing costs, in combination with capital ownership and overhead costs; computer spreadsheets including attention to deterministic sensitivity analyses; computer capabilities are essential.
Prerequisites: AGEC 105 or ECON 202; ACCT 209 or ACCT 210 or ACCT 229 or ACCT 230 or AGEC 330 or FINC 341 or FINC 409; junior or senior classification or approval of instructor.

AGEC 325 Principles of Farm and Ranch Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Agribusiness managerial decision making and analysis in different market environments; emphasis is on profit maximization; lab focuses on using computerized methods for evaluating management alternatives for farming and ranching problem situations.
Prerequisites: AGEC 105 or ECON 202; junior or senior classification; knowledge of Excel.

AGEC 330 Financial Management in Agriculture
Credits 3. 3 Lecture Hours.
Principles of financial management of farms, ranches, and other agribusiness firms; financial statements, financial statement analysis, time value of money, investment analysis, firm growth, risk management, credit analysis and best business management practices.
Prerequisites: AGEC 105 or 3 hours of economics; ACCT 209 or ACCT 229; and junior or senior classification.

AGEC 335 Financial Readiness
Credits 3. 3 Lecture Hours.
Personal financial planning for those planning on joining the military; preparation for a financially challenging world and introduction to the concepts and methods of personal financial literacy, budgeting, cash management, debt, credit, deployment finances, insurance, retirement planning, investing, estate planning and taxation.
Prerequisites: Junior or senior classification.

AGEC 340 Agribusiness Management
Credits 3. 3 Lecture Hours.
Survey of management practices using case studies to evaluate management issues in agribusiness firms in the context of the four functions of management such as planning, organizing, leading and controlling; emphasis on best practices throughout the food marketing chain; examination of how businesses and business executives succeed; application of previously learned knowledge in making business decisions similar to those encountered in professional careers.
Prerequisites: AGEC 105 or 3 hours of economics; and junior or senior classification.

AGEC 344 Food and Agricultural Law
Credits 3. 3 Lecture Hours.
Legal principles relevant to the farm family and business; characteristics of legal decisions and rules on property rights, and fencing laws; analysis of global, national, state, and local legal issues in contracts, torts, water, pollution, and natural resources.
Prerequisite: Junior or senior classification.

AGEC 350 Environmental and Natural Resource Economics
Credits 3. 3 Lecture Hours.
Inspection of issues such as environmental degradation, population growth, recycling, water use and depletion, natural habitat protection, water and air pollution, acid deposition, fisheries management, and global warming using economically derived principles and tools.
Prerequisite: Junior or senior classification.

AGEC 402 Survey of International Agricultural Economics: Study Abroad
Credits 3. 3 Lecture Hours.
Examine, from an international setting, the shape of international agriculture; how culture, history, politics and geography in foreign countries affect the production and management of agricultural products; agricultural policy formation; countries’ natural resources and competitive strategies; may be taken 3 times for credit.
Prerequisites: AGEC 105 or 3 hours of economics; junior or senior classification or approval of department head.
AGEC 408 Economics of Foreign Intervention, Conflict and Development
Credits 3. 3 Lecture Hours.
Economic models of conflict and development; dynamic socio-political models of conflict; conflict and vulnerable groups; quantitative techniques and methods in conflict and development research; interaction between poverty, natural resources and conflict in developing countries; role of multilateral, bilateral, and strategic stakeholders in conflict resolution and promotion of economic development.
Prerequisites: AGEC 105 or ECON 202 or equivalent; ENGL 104; or approval of instructor.

AGEC 413 Agricultural Cooperatives
Credits 3. 3 Lecture Hours.
Historical development and principles of cooperative associations in our economic system; organizational and operational aspects of cooperatives; legal considerations, financing, management, and member relations; and future role of cooperatives.
Prerequisites: AGEC 105; AGEC 314; and junior or senior classification.

AGEC 414 Agribusiness and Food Market Analysis
Credits 3. 3 Lecture Hours.
Application of economic and marketing principles to contemporary food and agribusiness marketing; practical marketing management for agribusiness firms; market analysis; and marketing strategy and planning as related to the emerging trends in the global food and agribusiness sector of the economy.
Prerequisites: AGEC 317; FINC 341; MKTG 321; and junior or senior agribusiness majors only.

AGEC 415 Food and Agribusiness Strategic Market Planning
Credits 3. 3 Lecture Hours.
Development of a market plan targeting the food and agribusiness market sector; market analysis; business propositions; action plans for executing the 4 Ps (Product, Price, Place, Promotion); monitoring and measurement.
Prerequisites: AGEC 314 or MKTG 321 or MKTG 409; AGEC 315; junior or senior classification or approval of instructor.

AGEC 416 Sales Management and Advanced Techniques in Professional Technical Selling for AgriFood Firms
Credits 3. 3 Lecture Hours.
Principles and practices of sales management in food and agricultural firms; focus on business-to-business selling situations, theoretical and practical information about sales management for AgriFood firms; application of principles.
Prerequisite: AGEC 315.

AGEC 420 Food Security, Climate and Conflict
Credits 3. 3 Lecture Hours.
Economic models of food production and consumption in conflict regimes; the micro-economics of violence; the dynamic relationships of climate and agricultural production; potential impacts of climate change on food and socio-political security; food security among insurgent groups; conflict resistant food systems; and the shifting relationships between poor and rich nations in relationship to climate, food and conflict.
Prerequisites: AGEC 105 or ECON 202, junior or senior classification, or approval of instructor.

AGEC 422 Land Economics
Credits 3. 3 Lecture Hours.
Economic, institutional, and physical factors involved in the use and control of natural resources; includes elements of introductory land economics as a discipline, economic foundations of land economics, institutional influences on land use, and the effects of public policy on land use.
Prerequisites: AGEC 105 or 3 hours economics; and junior or senior classification.

AGEC 423 Establishing Agribusiness Entrepreneurship Networks II
Credit 1. 1 Lecture Hour.
Engagement opportunities with successful agri/metropolitan entrepreneurs and other professionals, focusing on strategies and tactics for starting and sustaining viable rural and metropolitan business ventures; emphasis on importance of, and how to, develop relationships with a broad spectrum of mentors.
Prerequisites: AGEC 424 or concurrent enrollment; junior or senior classification or approval of instructor. May not enroll in AGEC 223 and AGEC 423 during the same semester.

AGEC 424 Agribusiness Entrepreneurship – Economic Analysis
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Strategic planning regarding economic feasibility of a single-enterprise rural or metropolitan business venture; emphasis on processes for developing a comprehensive enterprise budget and construction and evaluation of risk management alternatives; exchanges with “real-world” entrepreneurs, financial experts and other management personnel; computer capabilities essential.
Prerequisites: AGEC 105 or ECON 202; ACCT 209 or ACCT 210 or ACCT 229 or ACCT 230 or AGEC 324 or AGEC 330 or FINC 341 or FINC 409; junior or senior classification or approval of instructor.

AGEC 425 Agribusiness Entrepreneurship – Financial Analysis
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Strategic planning regarding rural and metropolitan business ventures; emphasis on processes for developing comprehensive economics and financial prospectuses, including enterprise budgets, risk management planning, cash flow budgeting, net worth statements, income budgets, reconciliation statements and shock analysis; mentoring exchanges with “real-world” entrepreneurs, financial experts and other management personnel.
Prerequisites: AGEC 424; and junior or senior classification.

AGEC 429 Agricultural Policy
Credits 3. 3 Lecture Hours.
Analysis of the causes, nature, and effects of government participation in agriculture; and interrelationship of the American agriculture and agribusiness sector with the political and economic system, public administration, and interest group representation.
Prerequisites: AGEC 105, ECON 202 or ECON 203; ENGL 103 or ENGL 104; and junior or senior classification.

AGEC 430 Macroeconomics of Agriculture
Credits 3. 3 Lecture Hours.
Basic functioning of U.S. economy and relationship to agriculture; the differential effects of macroeconomic policy on disposable income, interest rates, unemployment, inflation and exchange rates; impact on agricultural commodity prices, farm input costs, net farm income, farmland values and key financial indicators.
Prerequisites: AGEC 105 or 3 hours of economics; AGEC 317 or concurrent enrollment; AGEC 429; AGEC 330 or FINC 341 or FINC 409; and junior or senior classification.
AGEC 431 Cases in Agribusiness Finance
Credits 3. 3 Lecture Hours.
Financial management of agribusiness firms; advanced topics in financial statement analysis, liquidity management, investment analysis, and capital structure illustrated through examination of agribusiness cases.
Prerequisites: AGEC 317; AGEC 340; FINC 341; and junior or senior agribusiness majors only.

AGEC 432 Rural Real Estate and Financial Analysis
Credits 3. 3 Lecture Hours.
Advanced topics in investment analysis; financial intermediation in agriculture; real estate markets and market analysis; and appraisal valuation.
Prerequisites: AGEC 317 (waived for nonmajors); AGEC 330 or FINC 431 or FINC 409; AGEC 422; ACCT 210 or ACCT 230; and junior or senior classification.

AGEC 433 Rural Financial Markets and Financial Planning
Credits 3. 3 Lecture Hours.
Organization, structure, conduct and regulation of lending institutions serving commercial agriculture and rural borrowers; borrower financial statement analysis, business forecasting, investment analysis and loan application process; lender credit application underwriting standards, credit scoring and loan decision making process; agricultural loan portfolio analysis.
Prerequisites: ACCT 209 or ACCT 229; ACCT 210 or ACCT 230; AGEC 330 or FINC 341 or FINC 409; junior or senior classification.

AGEC 435 Financial Planning for Professionals
Credits 3. 3 Lecture Hours.
Financial planning from a professional perspective; applying basic financial, economic and institutional concepts to advise individuals, families and small businesses in achieving their financial goals; tools and topics include financial analysis, budgeting, credit management, time value of money, investment strategies, income taxes, risk management, and retirement and estate planning.
Prerequisites: AGEC 330, FINC 409 or FINC 341; junior or senior classification.

AGEC 436 Insurance and Estate Planning
Credits 3. 3 Lecture Hours.
Insurance and estate planning for individuals, families and small businesses; applies risk management principles to evaluate various insurance products, including life, disability, long-term care, health, homeowners, auto and liability; estate planning process, tools and considerations.
Prerequisites: AGEC 330, AGEC 435, FINC 409 or FINC 341; junior or senior classification.

AGEC 437 Tax Planning
Credits 3. 3 Lecture Hours.
Applies the principles of income, gift and estate tax planning to enhance household income after taxes; understanding tax laws, reporting requirements and opportunities for planning; identify and implement useful tax planning strategies; focus on practical application for financial planning.
Prerequisites: AGEC 330, AGEC 435, FINC 409 or FINC 341; junior or senior classification.

AGEC 438 Investment Planning
Credits 3. 3 Lecture Hours.
Applying investment principles considering families’ goals, time horizons, risk tolerance and tax implications to build investment portfolios; attributes of various asset classes; asset allocation, selecting securities and portfolio management; developing successful investment programs for personal investors and financial planners.
Prerequisites: AGEC 435 and junior or senior classification.

AGEC 439 Retirement Planning
Credits 3. 3 Lecture Hours.
Retirement planning basics, qualified and nonqualified retirement plans, Social Security provisions and government healthcare plans along with the basics of employee benefits; focus on both quantitative (i.e., calculating retirement needs and plan limits) and qualitative (i.e., retirement age decisions, retirement income management) aspects of retirement.
Prerequisite: AGEC 435 and junior or senior classification.

AGEC 440 Agribusiness Strategic Analysis
Credits 3. 3 Lecture Hours.
Strategic management and economic principles for the agribusiness system; problem recognition and applied managerial/economic decision making with related considerations in marketing, production, or finance for agribusiness firms.
Prerequisites: AGEC 317; AGEC 340; FINC 341; MGMT 363; MKTG 321; and junior or senior agribusiness majors only.

AGEC 441 Financial Planning Capstone
Credits 3. 3 Lecture Hours.
Financial planning process, data gathering, approaches to financial planning, analysis of financial statements and client presentation; case analysis, ethics and professional conduct, use of financial planning software, advanced financial calculator usage, and Microsoft Excel applications.
Prerequisites: AGEC 435, AGEC 436, AGEC 437, AGEC 438 and AGEC 439; junior or senior classification.

AGEC 447 Food and Agricultural Price Analysis
Credits 3. 3 Lecture Hours.
Factors influencing the level of food and agricultural prices; price trends and seasonal variation; methods of forecasting demands and prices; and futures trading.
Prerequisites: AGEC 314; AGEC 317; and junior or senior classification.

AGEC 448 Agricultural Commodity Futures
Credits 3. 3 Lecture Hours.
Activities of commodity futures exchanges; the mechanics of trading futures contracts; the use of futures trading for hedging and forward pricing; and options, basis behavior, and hedging strategies for selected commodities.
Prerequisites: AGEC 105 or 3 hours of economics; AGEC 314; AGEC 317 or concurrent enrollment; and junior or senior classification; or approval of department head.

AGEC 452 International Trade and Agriculture
Credits 3. 3 Lecture Hours.
Changing role of U.S. agriculture in a dynamic world economy; national and international policies and institutions affecting agriculture; and exchange rates, tariffs, and non-tariff barriers.
Prerequisites: AGEC 105 or 3 hours of economics; and junior or senior classification.
AGEC 453 International Agribusiness Marketing  
Credits 3. 3 Lecture Hours.  
Basic competencies in international marketing of agri-foods; and market entry, pricing, payment, finance, and promotion.  
Prerequisites: AGEC 105 or 3 hours of economics; and junior or senior classification.

AGEC 460 Cross-Cutting Issues in Agricultural Economics  
Credits 3. 3 Lecture Hours.  
Examination of economic theory and its history; emphasis on the areas of agricultural business, finance, macroeconomics, management, marketing, microeconomics, quantitative analysis, resources, and economics policy; emphasis on the ability to properly analyze economic problems.  
Prerequisites: AGEC 317; AGEC 314 or MKTG 321 or MKTG 409; AGEC 330 or FINC 341 or FINC 409; AGEC 429; agricultural economics and agribusiness majors only; junior or senior classification or approval of instructor.

AGEC 481 Ethics in Agribusiness and Agricultural Economics  
Credit 1. 1 Lecture Hour.  
Examination of the principals of ethical business behavior; context created through assigned readings, guest speakers from various law enforcement branches and private industry; student written reports about their own experiences relative to this context; attention given to establishing personal principles for an ethical business career.  
Prerequisites: AGEC 217; junior or senior classification; and agricultural economics or agribusiness majors only.

AGEC 484 Internship  
Credits 0 to 6. 0 to 6 Other Hours.  
Supervised experience program conducted in the area of the student's interest in agricultural economics and agribusiness. May be taken two times.  
Prerequisite: See an advisor in Room 214 AGLS Building.

AGEC 485 Directed Studies  
Credits 0 to 6. 0 to 6 Other Hours.  
Special problems not covered by other courses. Content will depend upon problem studied.  
Prerequisite: See an advisor in Room 214 AGLS Building.

AGEC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of agricultural economics. May be repeated for credit.  
Prerequisite: Junior or senior classification.

AGEC 491 Research  
Credits 0 to 6. 0 to 6 Other Hours.  
Research conducted under the direction of faculty member in agricultural economics. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of department head; see an advisor in Room 214 AGLS Building.

AGLS 105 Research in Agriculture and Life Sciences  
Credit 1. 1 Lecture Hour.  
An introduction to the research process as applied to agriculture, renewable natural resources and biological sciences.  
Prerequisite: Freshman classification, major in College of Agriculture and Life Sciences and approval of instructor.

AGLS 125 Life Sciences Learning Community I  
Credits 0-1. 0-1 Lecture Hours.  
Development of personal and professional competencies in the life sciences: learning styles, leadership skills, appreciation for the arts; ethics in science, problem solving skills, experimental design, data gathering and interpretation, introduction to life sciences literature, critical analysis skills, and the connectivity between life science disciplines. May be taken two times for credit.  
Prerequisites: Freshman classification and approval of instructor.

AGLS 225 Life Sciences Learning Community II  
Credit 1. 1 Lecture Hour.  
Continuation of the development of personal and professional competencies in the life sciences: ethics in science, problem solving skills, experimental design, data gathering and interpretation, examination of life sciences literature, critical analysis skills, and the connectivity between life science disciplines. May be taken two times for credit.  
Prerequisites: Freshman classification and approval of instructor.

AGLS 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of agriculture and life science. May be repeated for credit.  
Prerequisite: Freshman or sophomore.

AGLS 292 Cooperative Education in Agriculture  
Credits 2. 4 Other Hours.  
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required.  
Prerequisite: Approval of the college coordinator of cooperative education.

AGLS 301 College of Agriculture and Life Sciences Study Abroad  
Credits 1 to 18. 1 to 18 Other Hours.  
For students in approved programs abroad. May be repeated for credit.  
Prerequisites: Admission to approved program and approval of academic dean.

AGLS 392 Cooperative Education in Agriculture  
Credits 2. 40 Other Hours.  
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required.  
Prerequisite: AGLS 292.

AGLS 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of agricultural and life sciences.
AGLS 492 Cooperative Education in Agriculture  
Credits 0 to 2. 40 Other Hours.  
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor; on a related subject area required.  
Prerequisite: AGLS 392.

AGSC - Agricultural Science (AGSC)

AGSC 285 Directed Studies  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Directed individual study of selected problems in agricultural science with emphasis on collection, analysis and presentation of information. May be repeated for credit.  
Prerequisite: Approval of instructor.

AGSC 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Special topics in an identified area of agricultural science. May be repeated for credit.  
Prerequisite: Approval of department head.

AGSC 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in agricultural science. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

AGSC 301 Introduction to Agricultural Science Teaching  
Credits 3. 3 Lecture Hours.  
Introduction to agricultural science teaching at the secondary level; an overview of preparing teachers for a changing world including knowledge of learners, subject matter and teaching within the context of agricultural science.  
Prerequisite: Junior or senior classification; AGSC 384 or concurrent enrollment.

AGSC 302 Teaching School-Based Agricultural Education & Clinical Professional Experience  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Teaching School-Based Agricultural Education & Clinical Professional Experience. Foundations of school-based agricultural education (SBAE) teaching; an overview of preparing teachers for a changing world including knowledge of learners, subject matter and teaching within the context of agricultural science; clinical field experience for teaching agricultural science in public schools of Texas.  
Prerequisites: Junior or senior classification.

AGSC 305 Management of Supervised Agricultural Experiences  
Credits 3. 3 Lecture Hours.  
Overview of supervised agricultural experiences (SAEs) and content that can be used in the secondary agricultural science program; engagement in SAE programs; management practices for SAE projects including record keeping and student reports.  
Prerequisite: Junior or senior classification.

AGSC 373 Managing Safety in the Agricultural Science Program  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Safety principles and procedures, methods of teaching and motivating students in agricultural mechanics; design for those preparing to teach agricultural science in Texas public schools.  
Prerequisite: Junior or senior classification.

AGSC 380 Workshop in Agricultural Science  
Credits 1 to 4. 1 to 4 Other Hours.  
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams.  
Prerequisite: Junior or senior classification.

AGSC 383 Teaching Agricultural Mechanics  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Methods of teaching and motivating students in agricultural mechanics; designed for students preparing to teach agricultural science in Texas public schools.  
Prerequisites: Grade of C or better in AGSC 301 and AGSC 373.

AGSC 384 Clinical Professional Experience in AGSC  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Clinical field experience for students preparing to teach agricultural science in public schools of Texas; through first-hand observation, students will study learning theories, individual differences, teaching methods, classroom management, curriculum, school climate and culture, and teacher roles and responsibilities.  
Prerequisite: Grade of C or better and concurrent enrollment in AGSC 301; junior or senior classification.

AGSC 402 Designing Instruction for Secondary Agricultural Science Programs  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Theory and practice in designing instruction for secondary agricultural science programs including effective planning and delivery methods; designed for students preparing to teach agricultural science in Texas public schools.  
Prerequisites: Grade of C or better in AGSC 384 and concurrent enrollment in AGSC 405; grade of C or better in INST 210 or concurrent enrollment.

AGSC 405 Facilitating Complete Secondary Agricultural Science Programs  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Theory and practice in facilitating secondary agricultural science programs: includes classroom instruction, supervised experience, and youth leadership development; designed for students preparing to teach agricultural science in Texas public schools.  
Prerequisites: Grade of C or better in AGSC 384 and concurrent enrollment in AGSC 402; grade of C or better in INST 210 or concurrent enrollment.

AGSC 425 Learner Centered Instruction in Agricultural Science  
Credits 3. 3 Lecture Hours.  
Preparing curriculum materials for secondary agricultural science and adult education programs.  
Prerequisites: Grade of C or better in AGSC 402 and AGSC 405 and concurrent enrollment in AGSC 436, AGSC 481, and AGSC 484.

AGSC 436 Professional Teaching Internship in AGSC  
Credits 6. 2 Lecture Hours. 12 Lab Hours.  
Planning for and teaching secondary agricultural science in selected high schools in Texas; includes 12 weeks of professional teaching experience under the guidance of a university supervisor and a cooperating teacher in the school.  
Prerequisites: Grade of C or better in AGSC 402 and AGSC 405 and concurrent enrollment in AGSC 425, AGSC 481, and AGSC 484.
AGSC 481 Seminar
Credit 1. 1 Lecture Hour.
Review of current literature and research as related to program development in light of legislation and policies affecting education in agriculture.
Prerequisite: Grade of C or better in AGSC 402 and AGSC 405.

AGSC 484 Field Experience
Credits 1 to 6. 1 to 6 Other Hours.
An on-the-job supervised experience program conducted in the area of the student's specialization.
Prerequisites: Grade of C or better in AGSC 402 and AGSC 405 and concurrent enrollment in AGSC 425, AGSC 436, and AGSC 481.

AGSC 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Directed individual study of selected problems in agricultural science with emphasis on collection, analysis and presentation of information. May be repeated for credit.
Prerequisite: Junior or senior classification; approval of instructor.

AGSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural science. May be repeated for credit.
Prerequisite: Approval of department head.

AGSC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural science. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification; approval of instructor.

AGSM 125 Introduction to Agricultural Systems Management
Credit 1. 2 Lab Hours.
Introduction to technical management of agricultural systems using management projects presented by agricultural managers from industry; problem definition, information search, idea generation and development of management solutions.
Prerequisite: Freshman or sophomore classification or approval of instructor; majors only.

AGSM 201 Agricultural Energy and Power Systems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
(AGRI 2301) Agricultural Energy and Power Systems. A study of the types of power and energy sources used in agricultural equipment and systems; management considerations for selecting, operating and maintaining internal combustion engines, electric equipment and motors, and renewables as power sources.

AGSM 284 Internship
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
No Credit. Practical experience working in a professional agricultural systems management setting. May be taken three times.
Prerequisite: Freshman or sophomore classification; approval of the instructor.

AGSM 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Selected problems in any phase of agricultural systems management; credit and specific content dependent upon background, interest, ability and needs of student enrolled; individual consultations and reports required.
Prerequisites: Freshman or sophomore classification; approval of department head.

AGSM 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural systems management. May be repeated for credit.
Prerequisite: Approval of instructor.

AGSM 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in agricultural systems management.
Prerequisites: Freshman or sophomore classification and approval of instructor.

AGSM 301 Systems Analysis in Agriculture
Credits 3. 3 Lecture Hours.
Operations research and systems theory applied to management problems in food and agricultural industries; linear programming, queuing theory, simulation and critical path method; provides the knowledge and computer skills to better manage resources for the evolving agricultural industries.
Prerequisites: Grade of C or better in MATH 140 or MATH 168 and MATH 142 or MATH 151.

AGSM 310 Agricultural Machinery Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Selection of a matched complement of power units and machines for farming operations; consider constraints such as crops, season, weather, personnel and capital; apply systems techniques such as linear programming, optimization, queuing theory and inventory models; utilize available software programs and learn to develop electronic spreadsheets and other customized software.
Prerequisites: AGSM 201; grade of C or better in AGSM 301 or concurrent enrollment; grade of C or better in PHYS 201.

AGSM 315/NFSC 315 Food Process Engineering Technology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elementary mechanics, physical and thermal properties of food and processing materials, heat transfer, mass and energy balances, psychrometrics (properties of air), insulation.
Prerequisites: Grade of C or better in PHYS 201 or PHYS 218, or approval of instructor.
Cross Listing: NFSC 315/AGSM 315.

AGSM 325 Agri-Industrial Applications of Electricity
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elements of electric current generation and transmission, applications of electric heating, lighting and power, wiring, motors, energy rates, meter reading, safety rules and regulations.
Prerequisite: AGSM 201; AGSM majors or minors only.
AGSM 335 Water and Soil Management
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Elementary principles of surface and ground water supply, flood control, water distribution systems and irrigation systems; principles of drainage, soil conservation and erosion control; elementary surveying, chaining, leveling and mapping applied to agricultural and natural resource needs; illustrated by practical examples of terracing and farm pond design.
Prerequisite: Grade of C or better in MATH 140 or MATH 168; grade of C or better in CHEM 101 and CHEM 111, or CHEM 107 and CHEM 117, or CHEM 119; or approval of instructor.

AGSM 337 Technology for Environmental and Natural Resource Engineering
Credits 3. 3 Lecture Hours.
For the nonengineering student in the environmental and management sciences; concentrates on the application of technology for solving local environmental problems while considering global issues; reduction of water, air and hazardous waste pollutants; legislative issues and modeling.
Prerequisites: Grade of C or better in MATH 140 or MATH 168 and MATH 142, or MATH 151 and MATH 152, or AGSM 301.

AGSM 360 Occupational Safety Management
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Safety considerations in the work environment, including safety mandates, safety mission, personal and business liability, fire, chemical, dust, machine noise, personal protective devices; design and implementation of safety programs.
Prerequisite: Junior or senior classification.

AGSM 403 Processing and Storage of Agricultural Products
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Factors influencing the nature of biological materials and the preservation of quality throughout the harvesting, handling and processing system; a systems approach to cereal grains includes principles of drying, quality deterioration, storage, conveying and handling; processing of fiber crops.
Prerequisites: AGSM 310 and AGSM 315/NFSC 315; or approval of instructor.

AGSM 417/NFSC 417 Food Process Engineering Technology II
Credits 3. 3 Lecture Hours.
Applications of basic engineering concepts to understand common unit operations in the food (and related) industry.
Prerequisites: AGSM 315/NFSC 315 or NFSC 315/AGSM 315; approval of instructor.
Cross Listing: NFSC 417/AGSM 417.

AGSM 435 Irrigation Principles and Management
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of irrigation and management for efficient use of water; soil-water-plant relationships; methods of application; power and labor requirements; automated systems and components.
Prerequisites: Grade of C or better in MATH 140 or MATH 168; grade of C or better in CHEM 101 and CHEM 111 or CHEM 119.

AGSM 439 Management of Agricultural Systems I
Credits 3. 3 Lecture Hours.
Application of agricultural systems management principles in solving realistic problems faced by agribusiness managers; project selection from problems posed by biological and agricultural industrial consultants; project feasibility study and outline; management and application philosophy; teamwork and communication, economics; product liability and reliability; standards and codes; goal setting and time management.
Prerequisites: Grade of C or better in AGSM 301; ENGL 210, AGSM 310, and AGSM 325; AGSM 335, AGSM 337 and AGSM 403 or concurrent enrollment; must be taken prior to AGSM 440; AGSM majors only.

AGSM 440 Management of Agricultural Systems II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Management of agricultural systems through team solution of management problems posed by agribusiness managers, farmers, extension specialists and other industry consultants; application of management principles to give experience in solving realistic problems faced by agribusiness managers; critical evaluation of results by students, staff and consultants.
Prerequisites: COMM 203; grade of C or better in AGSM 439; should be taken last spring semester prior to graduation.

AGSM 470 Agricultural Electronics and Control
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Technology of electronic systems in agricultural production and processing, sensors, actuators, and controllers, controller hardware and computer bases.
Prerequisite: AGSM 325; or approval of instructor.

AGSM 473 Project Management for Agricultural Systems Technology
Credits 3. 3 Lecture Hours.
Development of fundamental skill set in project management; basic knowledge of project management methods, tools and techniques; includes organization and life cycle, management processes, integration management, time management, cost management, quality management, communications management, risk management, procurement management, stakeholder management.
Prerequisites: Grade of C or better in AGSM 301; senior classification.

AGSM 477 Air Pollution Control and Regulatory Compliance
Credits 3. 3 Lecture Hours.
Overview of federal and state environmental regulations focusing on permitting requirements for agricultural operations; operation of air pollution abatement systems to include cyclones, bag filters, and scrubbers; dispersion modeling; National Ambient Air Quality Standards.
Prerequisites: Grade of C or better in AGSM 301, or grade of C or better in MATH 168 and MATH 142, or equivalent.

AGSM 481 Seminar
Credit 1. 1 Lecture Hour.
Professional development; ethics; career opportunities and topics of interest related to the practice of agricultural systems management.
Prerequisite: Senior classification.

AGSM 484 Internship
Credits 0 to 6. 0 to 6 Other Hours.
Practical experience working in a professional agricultural and/or food systems management setting. May be taken three times.
Prerequisites: Junior or senior classification; approval of the instructor.
ALEC 350 Global Agricultural Issues
Credits 3. 3 Lecture Hours.
Review of global agricultural issues (products, environment, people, and culture) affecting international agricultural development; concepts and principles underlying the processes of teaching, research, and service opportunities in international agricultural development and education situations.
Prerequisites: Junior or senior classification or approval of instructor.

ALEC 380 Workshop in Agricultural Leadership, Education, and Communications
Credits 1 to 4. 1 to 4 Lecture Hours.
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams. May be taken three times for credit.
Prerequisite: Junior or senior classification.

ALEC 399 High-Impact Experience
Credits 0. 0 Lecture Hours.
Participation in an approved high-impact learning practice; documentation and self-assessment of learning experience.
Prerequisites: Junior or senior classification; or approval of instructor.

ALEC 412 Technology-Enhanced Instructional Design Strategies for Agriculture
Credits 3. 3 Lecture Hours.
Techniques and applications of technology to enhance instruction of agricultural topics; instructional design principles, instructional strategies, technological tools; the design, development and delivery of technology-enhanced instruction for agriculture and the life sciences. Not intended for majors in education.
Prerequisite: Junior or senior classification.

ALEC 425 Principles of Program Evaluation
Credits 3. 3 Lecture Hours.
Evaluation principles applied to educational programs in agriculture and life science; basic understanding of skills in program evaluation processes, concepts, and theories; develop expertise needed to design and conduct evaluations of youth and adults in extension, community, and school-based programs.
Prerequisite: Junior or senior classification.

ALEC 450 Global Social Justice Issues in Agriculture
Credits 3. 3 Lecture Hours.
An in-depth evaluation of global social justice issues and leadership skills necessary to effectively solve and manage issues in agricultural development; topics include awareness, knowledge and understanding of teaching, research and service opportunities for those seeking careers in global social justice and agricultural leadership.
Prerequisite: Junior or senior classification or approval of instructor.

ALEC 460 Applying International Development Theories in Agriculture
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Practical application of agricultural development theories (geographical, communal, societal, etc.) in real-world settings; high-impact learning, research skill development, international travel or participation in a service-learning project with an international organization.
Prerequisites: Junior or senior classification.

ALEC 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of selected problems in international agriculture leadership, education, and communications.
Prerequisites: Junior or senior classification; approval of department advisor.

ALEC 489 Special Topics in... Special topics in an identified area of international agriculture leadership, education, and communications. May be taken four times for credit.
Prerequisite: Junior or senior classification.

AGSM 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Selected problems in any phase of agricultural systems management; credit and specific content depend on background and interest of student; individual consultations and reports required.
Prerequisites: Junior classification; approval of department head; 2.0 GPR.

AGSM 489 Special Topics in... Special topics in an identified area of agricultural systems management. May be repeated for credit.

AGSM 491 Research
Credits 0 to 3. 0 to 3 Lecture Hours.
Research conducted under the direction of faculty member in agricultural systems management. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

ALEC - Ag Leadership, Ed & Comm (ALEC)

ALEC 201 Foundations of Agricultural Leadership, Education and Communications
Credits 2. 2 Lecture Hours.
Survey of historical perspectives and future career opportunities in the field of agricultural leadership, education and communications; addresses undergraduate degree planner and departmental high-impact learning experiences; explores field of study standards for communication and publication; investigates learning preferences and academic support systems.
Prerequisites: Freshman or sophomore classification; AGCJ, AGSC, ALED or USAL-LED majors.

ALEC 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected issue in field of agricultural leadership, education, and communications with emphasis on collection, synthesis and interpretation of information. May be taken four times for credit.
Prerequisite: Approval of department advisor.

ALEC 289 Special Topics in... Special topics in an identified area of agricultural development. May be repeated for credit.
Prerequisite: Approval of department advisor.

ALEC 291 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in agricultural communications and journalism. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of department advisor.

ALEC 300 Global Agricultural Issues
Credits 3. 3 Lecture Hours.
Review of global agricultural issues (products, environment, people, and culture) affecting international agricultural development; concepts and principles underlying the processes of teaching, research, and service opportunities in international agricultural development and education situations.
Prerequisites: Junior or senior classification or approval of instructor.
ALEC 491 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in international agricultural leadership, education, and communications. May be taken three times for credit.
Prerequisites: Junior or senior classification; approval of department advisor.

ALEC 494 Internship
Credits 1 to 6. 1 to 6 Other Hours.
Supervised internship and independent study related to the student’s professional interest. May be taken six times for credit.
Prerequisites: Junior or senior classification; approval of departmental advisor.

ALED - Ag Leadership & Dev (ALED)

ALED 125 Leadership Learning Community I
Credit 1. 1 Lecture Hour.
Offered to students living in the Freshmen Leadership Living Learning Community; fundamentals of developing personal leadership while participating in co-curricular activities; emphasis on the relational model of leadership and global perspective building.
Prerequisites: Freshman classification or approval of advisor.

ALED 202 Introduction to Leadership
Credits 3. 3 Lecture Hours.
Introduction to the academic and scholarly development of leadership theory and leadership models; investigation of leadership theory when applied to a specific context; development of a leadership definition as an inquiry investigation.

ALED 222 Practicing Diverse Leadership and Cultural Exploration
Credits 3. 3 Lecture Hours.
Social theories and historical perspectives of leadership, particularly in terms of class, gender, race, ethnicity, and nationality; multidisciplinary approach to the study of leadership with a special emphasis on culture completed through readings, class lectures, films, group projects and discussions.
Prerequisite: Membership in the Multicultural Services Culture Leadership, Understanding and Exploration for Sophomores Learning Community.

ALED 223 Practicing Diverse Leadership and Cultural Exploration
Credits 3. 3 Lecture Hours.
Social theories and historical perspectives of leadership, particularly in terms of class, gender, race, ethnicity, and nationality; a multidisciplinary approach to the study of leadership with a special emphasis on culture through experiential learning.
Prerequisites: ALED 222 and membership in the Multicultural Services Cultural Leadership, Understanding, and Exploration for Sophomores Learning Community.

ALED 225 Leadership Learning Community II
Credit 1. 1 Lecture Hour.
Offered to students living in the Freshmen Leadership Living Learning Community; fundamentals of peer mentoring while participating in co-curricular activities; emphasis on building supportive relationships on a college campus.
Prerequisites: Freshman classification or approval of instructor; on-campus residence; ALED 125.

ALED 285 Directed Studies in Agricultural Leadership and Development
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected issue in agricultural leadership and development with emphasis on collection, synthesis and interpretation of information.
Prerequisite: Approval of department advisor.

ALED 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural development. May be repeated for credit.
Prerequisite: Approval of department advisor.

ALED 291 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in agricultural development. May be repeated 2 times for credit. Please see academic advisor in department.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ALED 301 Personal Leadership Education
Credits 3. 3 Lecture Hours.
Development, application and reflection of personal leadership capabilities through self-assessments and experiential learning activities; development of leadership identity through personal leadership inventories including strengths, personality type, values, vision and emotional intelligence.
Prerequisite: ALED or USAL-LED major; junior, or senior classification; grade of C or better in ALED 202.

ALED 308 Cultural Identity Development
Credits 3. 3 Lecture Hours.
Introduction to the academic and scholarly development of leadership theory and leadership models; investigation of leadership theory when applied to a specific context; development of a leadership definition as an inquiry investigation.

ALED 313 Culture Theory, Orientation and Adaptation
Credits 3. 3 Lecture Hours.
Evaluation of culture theory, elements and manifestations of culture, assessing cultural norms of society or groups, adaptation to a new culture for effective leadership.
Prerequisite: Junior or senior classification.

ALED 324 Leadership and Identity Development
Credits 3. 3 Lecture Hours.
Identity development and leadership; dialogue about the implications of their multiple identities in the classroom organizations and in their careers; self-reflections concerning leadership development and active community-based service learning.
Prerequisites: Junior or senior classification.

ALED 339 Agricultural Extension Philosophy and the Land-Grant Mission
Credits 3. 3 Lecture Hours.
Philosophy of Cooperative Extension and roles within the land-grant system; history, organization, program areas and guiding principles; relationship with the teaching and research branches of the land-grant system.
Prerequisite: Junior or senior classification or approval of instructor.

ALED 340 Survey of Leadership Theory
Credits 3. 3 Lecture Hours.
Exploration of leadership as a scholarly discipline; critical analysis of and evolution of multiple leadership models and theories; synthesis of leadership theory through experiential learning; integration of course content with personal experiences.
Prerequisites: ALED or USAL-LED major, junior or senior classification.
ALED 341 Team Learning
Credits 3.3 Lecture Hours.
Team development theory; emphasizes research on team member behaviors, team decision making models and positive conflict in team environments.
Prerequisites: Grade of C or better in ALED 340; junior or senior classification.

ALED 344 Leadership of Volunteers
Credits 3.3 Lecture Hours.
Principles, theories, concepts, techniques and applications for leading volunteers in agriculture and life sciences; nonprofit, governmental and community organizations.
Prerequisites: Grade of C or better in ALED 340; junior or senior classification.

ALED 380 Workshop in Agricultural Leadership and Development
Credits 1 to 4.1 to 4 Lecture Hours.
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams.
Prerequisite: Junior or senior classification.

ALED 400 Public Leadership Development
Credits 3.3 Lecture Hours.
Major issues in the study of public leadership, development of leadership skills, and field investigation done in conjunction with local public leaders.
Prerequisites: Junior classification and approval of instructor.

ALED 401 Advanced Professional Leadership Development
Credits 3.3 Lecture Hours.
Investigation of the best practices of successful leaders representing various organizational contexts; merging of scholarly mastery of theory with practice.
Prerequisites: Selection for ALED Leadership Fellows Program; grade of C or better in ALED 340 or ALED 301; junior or senior classification.

ALED 422 Cultural Pluralism in Agriculture
Credits 3.3 Lecture Hours.
Selected topics on the diversity of human resources in agriculture; emphasis on working in a multicultural society and developing sensitivity toward different cultures; explores the interrelationships between the contributions of diverse individuals and the state, nation and global success of agriculture.
Prerequisite: Junior or senior classification.

ALED 424 Applied Ethics in Leadership
Credits 3.3 Lecture Hours.
Exploration of ethical and moral theories and the application to multiple leadership contexts and situations.
Prerequisites: Junior or senior classification.

ALED 426 Leading and Training Adult Learners
Credits 3.3 Lecture Hours.
Planning educational training programs, including leadership programs, to implement with an adult audience; includes needs assessment, instructional design, lesson plan development, evaluation and other items related to leading adults.
Prerequisites: Grade of C or better in ALED 340, junior or senior classification.

ALED 440 Leading Change
Credits 3.3 Lecture Hours.
Analysis of change models and theories and the leadership application on individual, organizational and societal changes.
Prerequisite: Junior or senior classification; grade of C or better in ALED 202.

ALED 441 Agricultural Extension Organization and Methods
Credits 3.3 Lecture Hours.
Cooperative extension in agriculture and home economics; development, objectives, organization, program building and methods of teaching.
Prerequisite: Junior or senior classification.

ALED 481 Seminar
Credits 3.3 Lecture Hours.
Individual and team approaches to the review of leadership concepts and their application; observation and discussion of current leadership trends and issues.
Prerequisites: ALED or USAL-LED major; senior classification; grade of C or better in ALED 202, ALED 301, ALED 340, ALED 440, and ALED 424.

ALED 485 Directed Studies in Agricultural Leadership Development
Credits 1 to 4.0 to 4 Lecture Hours. 1 to 4 Other Hours.
Directed individual study of selected problems in agricultural leadership and development with emphasis on collection, analysis and presentation of information.
Prerequisites: Junior or senior classification and approval of instructor.

ALED 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Special topics in an identified area of agricultural development. May be repeated for credit.
Prerequisite: Junior or senior classification.

ALED 491 Research
Credits 1 to 4.1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in agricultural development. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded. Please see academic advisor in department.
Prerequisites: Junior or senior classification; approval of instructor.

ALED 494 Internship
Credits 1 to 6.1 to 6 Other Hours.
Supervised internship and independent study related to student’s professional interest.
Prerequisites: Grade of C or better in ALED 301; junior or senior classification; 2.0 GPR; approval of instructor.

ANSC - Animal Science (ANSC)

ANSC 101 Introductory Seminar for Animal Science
Credit 1.1 Lecture Hour.
Orientation to programs and opportunities in the Department of Animal Science, to create an awareness of campus resources for financial aid and tutoring, to develop goals for college career and to initiate planning for internship and job opportunities.
ANSC 107 General Animal Science
Credits 3. 3 Lecture Hours.
(AGRI 1319, 1419*) General Animal Science. General understanding of all aspects of the livestock industry; basic agriculture nomenclature of breeds, species and types of livestock; reproduction, nutrition, genetics, food safety, growth and development of beef cattle, sheep, horses, swine, dairy cattle and poultry; brief description of the companion animal industry.

ANSC 108 General Animal Science Laboratory
Credit 1. 2 Lab Hours.
(AGRI 1119, AGRI 1419*) General Animal Science Laboratory. General overview of the beef cattle, dairy cattle, horse, sheep, swine and poultry industries; information on major breeds, anatomy, phenotypic and genotypic selection criteria and production practices for each species; major disciplines of the animal industry including breeding and genetics, nutrition, reproductive physiology and products; utilization of live animals, models and feedstuffs/equipment to enhance experiential learning approach.

Prerequisite: Concurrent enrollment in ANSC 107.

ANSC 110 Animal Production Systems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Transformative experiences related to beef cattle, dairy cattle, equine, sheep, swine, goats, companion animals, meats, food products and food safety; exposure to available animal science careers and potential areas of future/additional study.

Prerequisites: Grade of C or better in ANSC 107 and ANSC 108.

ANSC 113 Farm Animal Biosystems
Credits 2. 2 Lecture Hours.
Information regarding the processes by which networks of cells are controlled and coordinated within the farm animal.

Prerequisites: Grade of C or better in ANSC 101, ANSC 107 and ANSC 108.

ANSC 117 Texas Barbecue
Credit 1. 1 Lecture Hour.
Survey, demonstration and participation in preparation techniques of Texas barbecue; comparison of regional and international barbecue methods.

Prerequisite: First year students.

ANSC 201 Introductory Equine Care and Use
Credits 2. 2 Lecture Hours.
Survey of basic equine care and use; breeds of horses and their use; care and maintenance of equines including feeding, health care, housing and equipment.

ANSC 207 Art and Heritage of Livestock
Credits 3. 3 Lecture Hours.
Using art as a venue to understand the legacy and heritage of livestock production and livestock's contribution to civilization and society; from man as hunter, agriculturalist, and finally, as industrialist; from cave paintings to Russell and Remington; history of the effects of painting, poetry, architecture and sculpture on agriculture.

ANSC 210 Companion Animal Science
Credits 3. 3 Lecture Hours.
Types, care, physiology, common diseases and common treatments of companion animals (dogs, cats, exotic pets); careers including biomedical research; solutions for problems such as behavior and overpopulation.

Prerequisite: ANSC 107.
ANSC 305 Animal Breeding
Credits 3. 2 Lecture Hours. 2 Lab Hours.
A systems approach to selection and mating of livestock; gene frequency, heritability, relationship, inbreeding, linebreeding, heterosis, crossbreeding, direct and correlated response to selection, and use of pedigree, family, progeny testing and indices for selection.
Prerequisites: Grade of C or better in ANSC 111 and ANSC 113; GENE 301; STAT 301, STAT 302, STAT 303, or ANSC 309; junior classification or approval of instructor.

ANSC 307/NFSC 307 Meats
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integrated studies of the meat animal processing sequence regarding the production of meat-type animals and the science and technology of their conversion to human food.
Prerequisites: Grade of C or better in ANSC 111 and ANSC 113; junior classification or approval of instructor.

ANSC 309 Applied Animal Record Keeping
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Keeping, analyzing and interpreting records to make fully-informed decisions on a day-to-day basis for production and management scenarios; practical application unique to animal science and meat processing.
Prerequisite: Junior or senior classification.

ANSC 310 Animal Nutrition and Feeding
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Nutritional functions of water, protein, carbohydrates, fats, minerals and vitamins and their digestion, absorption, use and excretion; energy, protein and forage feedstuff characteristics and processing; nutritional requirements, ration formulation and feeding methods for farm animals; general course for non-animal science majors.
Prerequisite: Junior or senior classification or approval of instructor; restricted to students in the college of agriculture and life sciences.

ANSC 311 Equine Behavior and Training
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Equine behavior and application of principles of psychology to training horses; systematic approaches to horse training emphasizing principles of learning; equipment and its use; stable management and preparation of horses for competition; separate laboratory sections for students with varying backgrounds.
Prerequisite: Junior or senior classification.

ANSC 312 Intermediate Horse Training and Sales
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Advanced scientific methods and techniques for execution of equine performances in hunter, dressage and stock horse events; anatomical, physiological and psychological implications; preparation of horses and riders.
Prerequisite: Junior or senior classification.

ANSC 314 Wool Evaluation and Grading
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Evaluation of U.S.D.A. grades for wool and mohair; steps involved in processing raw wool into finished fabric; genetic and environmental factors affecting quality characteristics of wool and mohair; grading, evaluation and selection of fleeces for economic value; oral and written defense of judgments.

ANSC 315 Livestock Judging
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Selection and evaluation of beef cattle, swine, sheep and horses. Ability to present accurate, clear and concise oral and written reasons stressed.
Prerequisites: ANSC 107 and ANSC 108; junior or senior classification.

ANSC 316 Equine Selection and Judging
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Detailed evaluation and comparison of horses; selection and critique of athleticism and performance in horses; industry trends addressed; oral and written defense of judgments also explained and expected; required for participation on the Horse Judging Team.
Prerequisite: Junior or senior classification or approval of instructor.

ANSC 317 Meat Selection, Evaluation and Grading
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Selection and grading of carcasses and wholesale cuts of beef, pork and lamb; principles of evaluation included in carcass contests and progeny testing.
Prerequisites: ANSC 107 and ANSC 108.

ANSC 318 Animal Feeds and Feeding
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Scientific approaches associated with precision feeding and diet formulation to match nutrient availabilities of feedstuffs with requirements of various classes of livestock species; emphasis on cost-effective feeding strategies to optimize animal productivity, and end-product quality and safety, while mitigating environmental impacts and enhancing animal health and welfare.
Prerequisite: Grade of C or better in ANSC 111, ANSC 113 and ANSC 303/NFSC 303; junior classification or approval of instructor.

ANSC 320 Animal Nutrition and Feeding
Credits 3. 3 Lecture Hours.
Nutritional functions of water, protein, carbohydrates, fats, minerals and vitamins and their digestion, absorption, use and excretion; energy, protein and forage feedstuff characteristics and processing; nutritional requirements, ration formulation and feeding methods for farm animals; general course for non-animal science majors.
Prerequisite: Junior or senior classification or approval of instructor; restricted to students in the college of agriculture and life sciences.

ANSC 325 Advanced Livestock and Product Evaluation
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Advanced evaluation of cattle, swine, sheep and equine; products produced or associated with each species; advanced oral or written defense of judgments associated with changing trends in these industries. May be repeated three times for credit.
Prerequisite: Junior or senior classification.

ANSC 326/NFSC 326 Food Bacteriology
Credits 3. 3 Lecture Hours.
Microbiology of human foods and accessory substances; raw and processed foods; physical, chemical and biological phases of spoilage; standard industry techniques of inspection and control.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: NFSC 326/ANSC 326.

ANSC 327/NFSC 327 Food Bacteriology Lab
Credit 1. 3 Lab Hours.
Laboratory to accompany ANSC 326/NFSC 326 or NFSC 326/ANSC 326.
Cross Listing: NFSC 327/ANSC 327.

ANSC 333 Reproduction in Farm Animals
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Physiological principles of reproductive processes in cattle, sheep, swine, and horses including sperm and ova production, estrus, fertilization, gestation and parturition.
Prerequisites: Grade of C or better in ANSC 111 and ANSC 113; junior classification or approval of instructor.

ANSC 337 Meat Merchandising
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Steps of meat processing and merchandising of retail and foodservice; merchandising practices such as selection, identification, fabrication, pricing, packaging and distribution.
Prerequisites: ANSC 307/NFSC 307; junior or senior classification.
ANSC 351 Current issues in Animal Agriculture
Credits 3. 3 Lecture Hours.
Preparation to project a professional image and the use of communication skills to describe animal agriculture; converse about the strengths and weaknesses of animal agriculture.
Prerequisite: Junior or senior classification.

ANSC 399 Animal Science Experience
Credits 0. 0 Lecture Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from animal science body of knowledge; documentation and self-assessment of learning experience at mid and final curriculum points.
Prerequisite: Junior or senior classification.

ANSC 402 Exploring Animal Industries
Credits 2. 2 Lecture Hours.
Instruction for students nearing the end of their undergraduate studies; theoretical understanding of organizations and human resources available to students; awareness and understanding of the job application process, resume and cover letter writing; networking, professional and business attire; ethics related to job searches and retention.
Prerequisite: Junior or senior classification.

ANSC 404 Behavior and Management of Domestic Animals
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Application of behavior of cattle, horses, sheep, goats and swine to their management; basic principles, physiology of behavior, perception, training, predators, use of dogs in livestock production, stress and animal welfare.
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318 and ANSC 333; junior or senior classification or approval of instructor.

ANSC 406 Beef Cattle Production and Management
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Principles involved for profitable and sustainable, integrated beef cattle production as considered from the perspective of the U.S. cow-calf sector and from an overall systems-based approach.
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318 and ANSC 333; junior or senior classification or approval of instructor.

ANSC 408 Management of Stocker and Feedlot Cattle
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Basic principles involved in feeding, management, marketing and disease control of stocker and feeder cattle from weaning through slaughter for economical production of beef.
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318, and ANSC 333; STAT 301, STAT 302, STAT 303, or ANSC 309; junior or senior classification.

ANSC 411 Equine Nutrition and Health
Credits 3. 3 Lecture Hours.
Designed to provide knowledge of nutrition and health in the horse; gastrointestinal anatomy, nutrient utilization, feeding management and nutritional requirements; metabolic diseases, infectious diseases, internal and external parasites, and herd health management.
Prerequisite: Junior or senior classification.

ANSC 412 Swine Production and Management
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Basic principles and their practical application in efficient, economical pork production; all areas of production—breeding and selection, nutrition, housing and equipment, marketing, herd health and economic management.
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318, and ANSC 333; junior or senior classification or approval of instructor.

ANSC 414 Sheep and Goat Production and Management
Credits 4. 3 Lecture Hours. 2 Lab Hours.
In-depth hands-on experiences related to sheep and goat production and management providing an advanced understanding of small ruminant production.
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318, and ANSC 333; junior or senior classification or approval of instructor.

ANSC 415 Brazil: Comparative Ruminant Production
Credits 3. 3 Lecture Hours.
Contrast two scenarios of ruminant production in Brazil; the effects of globalization on the two different production systems.
Prerequisites: ANSC 303/NFSC 303 or ANSC 320 or approval of instructor.

ANSC 418 Equine Exercise Physiology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Changes within the systems of the horse resulting from the physical stresses of exercise, adaptations of systems in response to a training regimen; methodology for measuring improvement in physical condition; foundation for development of training programs for horses in moderate, intense or prolonged performance activities.
Prerequisites: Junior or senior classification and approval of instructor.

ANSC 419 Equine Reproduction
Credits 3. 3 Lecture Hours.
Reproductive anatomy of the stallion and mare; industry and scientific practices; comprehensive analysis of the body of scientific research; development of critical thinking ability to assess and discuss previous research in comparison of needed research.
Prerequisites: ANSC 201 and junior or senior classification or approval of instructor.

ANSC 420 Equine Production and Management
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Application of biological and biotechnological principles and concepts in areas including genetics, breeding, nutrition, reproduction, immunology, parasitology, anatomy and exercise physiology to efficient production of horses for market; management of equine enterprises.
Prerequisites: ANSC 201 and ANSC 333; junior or senior classification.

ANSC 423 Issues in the Equine Industry
Credits 3. 3 Lecture Hours.
Integration of cumulative knowledge acquired in the equine science curriculum to demonstrate critical thinking and communication skills to address critical issues in the equine industry.
Prerequisites: Junior or senior classification; approval of instructor.
ANSC 429 Dairy Production Management  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Major principles for profitable and sustainable dairy production for a commercial dairy operation; provides hands-on experiences in dairy cattle management; develops critical thinking skills to make dairy cattle management decisions.  
Prerequisites: Grade of C or better in ANSC 318 and ANSC 333; junior or senior classification.

ANSC 434 Animal Reproduction Management  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Available and emerging technologies including control of ovulation, artificial insemination, embryo manipulation and transfer, in vitro fertilization and animal cloning for managing reproduction of farm animals; hands-on sessions using available technologies including artificial insemination of cattle.  
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318 and ANSC 333; junior or senior classification or approval of instructor.

ANSC 436 Texas Panhandle Beef Production Tour  
Credits 2. 2 Lecture Hours.  
Facets of beef production from cow/calf operations to retail product; experiential knowledge of technologies and practices to enhance efficiency to enlighten students regarding the array of career opportunities in the beef production industry.  
Prerequisites: Junior or senior classification or approval of instructor.

ANSC 437 Marketing and Grading of Livestock and Meats  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Study of USDA livestock and carcass grades; understanding current market trends for beef, pork, lamb and goat; review of branded and certified programs; principles applied in contracting, breakeven determination, hedging, and grid or formula pricing.  
Prerequisites: Junior or senior classification.

ANSC 439 Feedlot Risk Management  
Credits 2. 2 Lecture Hours.  
Advanced study of livestock marketing techniques; cash sales, video sales, futures and options markets, forward contracting; problem solving in real-time livestock marketing situations; risk of ownership of hypothetical livestock operations.  
Prerequisites: junior or senior classification or approval of instructor.

ANSC 447 Advanced Meat Science and Technology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Advanced basic and applied studies of meat science and/or technology utilizing the underlying physiological and structural components for conversion to human food; understanding the influence of pre- and post-harvest factors on meat quality, composition, color, packaging, sensory and preparation factors; applying scientific and business principles to manufacturing and process flow of commercial meat food products and demonstrating knowledge of these principles through development of meat products.  
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318 and ANSC 333; GENE 301; STAT 301, 302, 303, or ANSC 309; junior or senior classification or approval of instructor.

ANSC 457/NFSC 457 Hazard Analysis and Critical Control Point System  
Credits 3. 3 Lecture Hours.  
Hazard Analysis and Critical Control Point (HACCP) principles specifically related to meat and poultry; microbiological and process overviews; good manufacturing practices and standard operating procedures development.  
Prerequisite: NFSC 326/ANSC 326 or approval of instructor.  
Cross Listing: NFSC 457/ANSC 457.

ANSC 467 Processed Meat Food Operations  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Application of scientific and business principles to manufacturing and process flow of commercial meat food products.  
Prerequisites: ANSC 307/NFSC 307 or NFSC 307/ANSC 307 or approval of department head.

ANSC 470/NFSC 470 Quality Assurance for the Food Industry  
Credits 3. 3 Lecture Hours.  
Principles of food system process control including statistical process control (SPC) and the tools required to assure uniform communication and understanding of quality assurance systems.  
Prerequisite: Junior or senior classification.  
Cross Listing: NFSC 470/ANSC 470.

ANSC 481 Seminar  
Credit 1. 1 Lecture Hour.  
Review of literature and research problems related to the livestock and food industries; preparation of a technical report including an oral presentation supported by a written technical paper.  
Prerequisite: Senior classification.

ANSC 484 Livestock Practicum  
Credit 1. 2 Other Hours.  
Provides an opportunity to learn skills required in livestock production; planned for students who have had limited farm and ranch experience in one or more species.  
Prerequisite: Junior or senior classification in animal science or approval of instructor.

ANSC 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study of selected problem in field of animal science.  
Prerequisites: Junior or senior classification; written approval of professor supervising the activity; 2.0 GPR in major and overall.

ANSC 487/NFSC 487 Sensory Evaluation of Foods  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Application of sensory science principles and practices to food systems including an understanding of discriminative, descriptive and consumer sensory techniques.  
Prerequisites: CHEM 222 or CHEM 228; junior or senior classification.  
Cross Listing: NFSC 487/ANSC 487.

ANSC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 8 Lab Hours.  
Selected topics in an identified area of animal science. May be repeated for credit.  
Prerequisite: Junior or senior classification.
ANSC 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in animal science. May be repeated 3 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisite: Junior or senior classification and approval of instructor; 2.0 GPR in major and overall.

ANSC 494 Animal Science Internship
Credits 0 to 5. 0 to 5 Other Hours.
Independent study and supervised field experience related to the student's professional interest.
Prerequisites: Junior or senior classification or approval of instructor; 2.0 GPR in major and overall.

ANSC 495 International Agriculture and Animal Production
Credits 3. 3 Lecture Hours.
Study of international agriculture and animal production in the world market; impact on foreign economies and culture; considerations of import and export marketing on products to and from the U.S. to provide students the exposure to international economies and cultures; study abroad.
Prerequisites: Grade of C or better in ANSC 107 or approval of instructor.

ANSC 498 Animal Science Capstone
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Senior capstone project for students preparing to enter a career related to animal science or a professional school; individual projects based on a self-selected topic in animal science; includes a paper containing both translational and technical descriptions plus statements regarding the expected financial and social impacts of selected topic.
Prerequisites: Grade of C or better in ANSC 399 and one from the following: ANSC 404, ANSC 406, ANSC 408, ANSC 412, ANSC 414, ANSC 420, ANSC 434, ANSC 447 or DASC 418; junior or senior classification or approval of instructor.

ANTH - Anthropology (ANTH)

ANTH 201 Introduction to Anthropology
Credits 3. 3 Lecture Hours.
(ANTH 2346, HUMA 2323) Introduction to Anthropology. An introduction to the discipline of anthropology through the examination of its four subfields: archaeology, physical anthropology, sociocultural anthropology and linguistics; also taught at Qatar campus.

ANTH 202 Introduction to Archaeology
Credits 3. 3 Lecture Hours.
(ANTH 2302) Introduction to Archaeology. An introduction to the study of the human past through the retrieval, analysis, and interpretation of material remains; also taught at Galveston campus.

ANTH 204 The Prehistoric World
Credits 3. 3 Lecture Hours.
Exploration of the development of human societies and world prehistory from the beginnings of humanity more than two million years ago to emergence of complex civilizations.

ANTH 205 Peoples and Cultures of the World
Credits 3. 3 Lecture Hours.
Survey of human cultures around the world using case studies of customs and cultural organization; case studies exemplifying contrasting types of cultures and societies.

ANTH 210 Social and Cultural Anthropology
Credits 3. 3 Lecture Hours.
(ANTH 2351) Social and Cultural Anthropology. Evolution of cultures; differences, similarities and effects of material and non-material culture on economic, social and political organization; also taught at Galveston campus.

ANTH 222 Cross Cultural Competency
Credits 3. 3 Lecture Hours.
Development of skills vital for effective engagement in an increasingly diverse and interconnected world; personal awareness of biases, attitudes, values, beliefs and ways of knowing; exploration of the impact of culture on our ability to think critically and communicate effectively. Must be taken on a satisfactory/unsatisfactory basis.

ANTH 225 Introduction to Biological Anthropology
Credits 3. 3 Lecture Hours.
(ANTH 2301, 2401*) Introduction to Biological Anthropology. Study of human biology including an examination of evolutionary processes acting on human populations; human genetics; non-human primate anatomy, classification and ecology of primates; the primate paleontological record, and human variation and adaptation.
Prerequisites: Concurrent registration in ANTH 226 recommended; also taught at Galveston campus.

ANTH 226 Introduction to Biological Anthropology Laboratory
Credit 1. 3 Lab Hours.
(ANTH 2101, 2401*) Introduction to Biological Anthropology Laboratory. Exploration of basic evolutionary principles through population genetics; hands-on exposure to the fossils of primate and human evolution along with opportunity to measure, compare, contrast and observe trends that have occurred throughout the Cenozoic era.
Prerequisites: Concurrent registration in ANTH 225 is recommended; also taught at Galveston campus.

ANTH 229 Introduction to Folklore
Credits 3. 3 Lecture Hours.
Study of folklore through selected examples of traditional cultures, their beliefs, customs and art forms such as: tales, folksongs, proverbs, riddles and material culture.

ANTH 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
For individual research in anthropology on subjects not included in established courses. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ANTH 289 Special Topics In...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of anthropology. May be repeated for credit.

ANTH 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Anthropology. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ANTH 300 Cultural Change and Development
Credits 3. 3 Lecture Hours.
Anthropological strategies for the study of cultural change and the implication of these strategies for the development of Western and non-Western societies.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 301</td>
<td>Indians of North America</td>
<td>3.0</td>
<td>Native North American cultures from the Arctic to Mesoamerica; their origins, cultures prior to extensive acculturation and their contemporary situations.</td>
</tr>
<tr>
<td>ANTH 302</td>
<td>Archaeology of North America</td>
<td>3.0</td>
<td>Overview of archaeology and prehistory of North America from the arrival of humankind through the development of agriculture to Euro-American contact.</td>
</tr>
<tr>
<td>ANTH 304</td>
<td>Archaeology Roadshow</td>
<td>3.0</td>
<td>Interdisciplinary field-trip in the archaeology and paleoecology of a specific region; high-impact learning experiences in a field setting. May be repeated two times for credit.</td>
</tr>
<tr>
<td>ANTH 305</td>
<td>Fundamentals of Anthropological Writing</td>
<td>1.0</td>
<td>Basic types of writing expected of anthropology students; emphasis on the subject matter of an upper-division anthropology course in which the student is currently enrolled.</td>
</tr>
<tr>
<td>ANTH 308</td>
<td>Archaeology of Mesoamerica</td>
<td>3.0</td>
<td>Development of Indian civilizations in Mexico and Guatemala, including prehistory of the Olmec, Maya, Aztec and other regional cultures to the time of the Spanish conquest.</td>
</tr>
<tr>
<td>ANTH 312</td>
<td>Fossil Evidence of Human Evolution</td>
<td>3.0</td>
<td>Detailed review of fossil antecedents of humans including theoretical implications for an understanding of human evolution.</td>
</tr>
<tr>
<td>ANTH 313</td>
<td>Historical Archaeology</td>
<td>3.0</td>
<td>Use and methods of historical archaeology in locating, documenting, restoring and preserving our historical resources; also taught at Galveston campus.</td>
</tr>
<tr>
<td>ANTH 316</td>
<td>Nautical Archaeology</td>
<td>3.0</td>
<td>Nautical Archaeology Underwater shipwrecks, sunken harbors, and other submerged evidence of human activities; relationship to cultural geography in general; problems of diving technology, surveying and preservation; relevance to modern problems.</td>
</tr>
<tr>
<td>ANTH 317/RELS 317</td>
<td>Introduction to Biblical Archaeology</td>
<td>3.0</td>
<td>Application of archaeology in biblical research; basic overview of the material cultures that are the setting for the biblical narratives. Cross Listing: RELS 317/ANTH 317.</td>
</tr>
<tr>
<td>ANTH 318</td>
<td>Nautical Archaeology of the Americas</td>
<td>3.0</td>
<td>Seafaring in the Americas from the 16th to the 20th centuries based on shipwreck archaeology; ship construction, exploration, commerce, naval warfare and related activity; influence of seafaring on the cultures, economics and history of the Western Hemisphere; also taught at Galveston campus.</td>
</tr>
<tr>
<td>ANTH 323</td>
<td>Nautical Archaeology of the Mediterranean</td>
<td>3.0</td>
<td>The archaeology of ancient seafaring in the Mediterranean from the Stone Age through the Roman Empire.</td>
</tr>
<tr>
<td>ANTH 324/MUSC 324</td>
<td>Music in World Cultures</td>
<td>3.0</td>
<td>Examination of music from an ethnomusicological perspective focusing on musical performance and the complex interrelationship of music to culture, society and daily life; examination of music from a variety of cultures through a series of case studies.</td>
</tr>
<tr>
<td>ANTH 330</td>
<td>Field Research in Anthropology</td>
<td>1.0</td>
<td>Training for students in formulating and solving anthropological problems through field research; problem oriented field research under supervision.</td>
</tr>
<tr>
<td>ANTH 335</td>
<td>Cultures of Central Asia</td>
<td>3.0</td>
<td>Study of anthropological research in Central Asia: ecological adaptations; colonialism and post-colonialism; ethnic politics and ethnic conflict; religion and identity; gender and family; globalization and modernization.</td>
</tr>
<tr>
<td>ANTH 340/RELS 340</td>
<td>Folklore and the Supernatural</td>
<td>3.0</td>
<td>Traditional expressions of the supernatural such as superstition, belief tale and divination classified as folklore genres and their relationships to the cultures in which they develop; theories drawn from anthropology, folklore and related social sciences.</td>
</tr>
<tr>
<td>ANTH 350</td>
<td>European Archaeology</td>
<td>3.0</td>
<td>Overview of archaeology and prehistory of Europe from the evolution of the hominids to the development of agriculture and the rise of civilization; also taught at Galveston campus.</td>
</tr>
<tr>
<td>ANTH 351</td>
<td>Classical Archaeology</td>
<td>3.0</td>
<td>Origins and spread of Western civilization through the material remains of Minoan, Mycenaen, Etruscan, and early Greek and Roman cultures.</td>
</tr>
</tbody>
</table>
ANTH 353/CLAS 353 Archaeology of Ancient Greece
Credits 3. 3 Lecture Hours.
Archaeology of ancient Greece from the Stone Age until the ascent of Rome in the Hellenistic Period; remains of ancient Greek art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions).
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 353/ANTH 353.

ANTH 354/CLAS 354 Archaeology of Ancient Italy
Credits 3. 3 Lecture Hours.
Archaeology of ancient Italy from the Stone Age until the collapse of the Roman Empire in the fourth century; remains of ancient Etruscan and Roman art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions).
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 354/ANTH 354.

ANTH 360 Ancient Civilizations of the World
Credits 3. 3 Lecture Hours.
Explores recent discoveries and efforts by archaeologists to understand the rise and fall of states and civilizations that emerged in the Near East, Africa, India, Europe, China, Mesoamerica, and Peru between 3500 BCE and 1500 CE.
Prerequisite: Junior or senior classification.

ANTH 370 Cultural Diversity and Ethics
Credits 3. 3 Lecture Hours.
Examination of the cultural construction of ethical values and how cultural diversity, including beliefs, values and ways of doing business, impacts human technological innovation; focuses on developing a holistic, social-science mindset and application of critical thinking skills.

ANTH 401 Ice Age Humans in North America
Credits 3. 3 Lecture Hours.
Archaeological, environmental and geological evidence related to the timing of human entry into the Americas and megafaunal extinctions at the end of the Pleistocene.
Prerequisite: ANTH 202 or equivalent.

ANTH 402 Archaeological Artifact Conservation
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Analysis of the treatments for artifacts of clay, stone, glass, wood, shell, bone, fiber and metal from archaeological excavations or ethnographic, and historic collections presented in an integrated series of lectures and hands-on laboratory experience.
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 403/RELS 403 Anthrology of Religion
Credits 3. 3 Lecture Hours.
Cross-cultural, theoretical analysis of religion as a cultural phenomenon; exploring the relationships between religion, culture, society and the individual; also taught at Galveston campus.
Cross Listing: RELS 403/ANTH 403.

ANTH 404/WGST 404 Women and Culture
Credits 3. 3 Lecture Hours.
Examines women's lives in evolutionary and cross-cultural perspective; women's roles in subsistence, politics, religion and economics in traditional cultures; women's roles in international development; the cultural and social construction of women's biology cross-culturally including circumcision, menstruation, pregnancy, childbirth and motherhood.
Prerequisite: Junior or senior classification; approval of instructor.
Cross Listing: WGST 404/ANTH 404.
ANTH 419 Indians of Texas
Credits 3. 3 Lecture Hours.
Study of diverse native/immigrant Texas Indian lifeways/cultures from late pre-European to contemporary times; exploration of historical underpinnings, traditional cultures, especially land-use patterns; assessment of tribal relationships with colonial powers, U.S., and Texas governments as evidenced in ethnographic, ethnohistoric, and historical materials; application toward anthropological, archaeological, and human ecology research.
Prerequisites: Junior or senior classification; ANTH 201, ANTH 202, ANTH 205, ANTH 210, ANTH 301, HIST 258, or HIST 308, or approval of instructor.

ANTH 421 Advanced Museum Studies
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Exploration of advanced topics in museum programs; preservation, research, education, outreach; development and implementation; emphasis on historical contexts, disciplinary intersections, ethical obligations and professional responsibilities; service to community, state and national interest and advancement of sciences.
Prerequisite: Grade of C or better in MUST 221/ARCH 221 or MAST 220; junior or senior classification.

ANTH 423 Bioarchaeology
Credits 3. 3 Lecture Hours.
Role of human skeletal studies in reconstructing the biological and cultural past of humans; evidence gleaned from human skeletal remains recovered from archaeological sites such as data regarding diet, health, genetics and migration.
Prerequisites: ANTH 225; junior or senior classification; also taught at Galveston campus.

ANTH 424 Human Evolutionary Ecology: Culture and Cooperation
Credits 3. 3 Lecture Hours.
Examination of evolutionary perspective to explore culture, cooperation and sociality and subsistence behaviors across a wide variety of human cultures; part of the Human Evolutionary Ecology series along with ANTH 424.
Prerequisite: Junior or senior classification.

ANTH 425 Human Osteology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Concepts and methods used by anthropologists to identify, describe and analyze human skeletal remains from forensic and archaeological contexts.
Prerequisites: ANTH 225 and ANTH 226, or VIBS 305; junior or senior classification.

ANTH 426 Anthropology of Food and Nutrition
Credits 3. 3 Lecture Hours.
Anthropological study of human foodways and their nutritional consequences; how environmental, biological and cultural factors interact to produce patterns of food intake, and the effects of such patterns on health, growth and fertility; examples drawn primarily from non-Western societies.
Prerequisite: ANTH 201 or ANTH 210 or ANTH 225 or NUTR 202 or approval of instructor.

ANTH 427 Human Biological Variation
Credits 3. 3 Lecture Hours.
Biological basis of variation in the physical features of modern humans; details of anatomical and physiological differences of living populations to understand their adaptive and historical significance; history of human variation studies rooted in the historical notion of ‘race.’
Prerequisites: ANTH 225 and ANTH 226, or BIOL 214 or BIOL 225; junior or senior classification.

ANTH 430 Applied Anthropology
Credits 3. 3 Lecture Hours.
Theory, ethics and practical applications of anthropological methods and concepts as they relate to planned programs of sociocultural change.
Prerequisites: ANTH 210; junior or senior classification.

ANTH 434 Human Evolutionary Ecology: Reproduction and Parenting
Credits 3. 3 Lecture Hours.
Evolutionary ecology perspective on family-formation patterns, sexuality, reproduction and parenting of humans throughout the life course and across different cultures; part of a Human Evolutionary Ecology series along with ANTH 424.
Prerequisites: Junior or senior classification.

ANTH 435 Medical Anthropology
Credits 3. 3 Lecture Hours.
Overview of medical anthropology, a subfield in anthropology which examines the biological and cultural basis of health and disease in order to understand the influence of culture on the illness experience and treatment.
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 436/RELS 436 Ancient Egypt
Credits 3. 3 Lecture Hours.
Archaeology and history of ancient Egypt from earliest times to the end of the New Kingdom period.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 436/ANTH 436.

ANTH 437 Ethnobotany
Credits 3. 3 Lecture Hours.
Interdisciplinary study of the complex and dynamic relationships that exist between people and plants.
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 440 Studies in Globalization
Credits 3. 3 Lecture Hours.
Selected issues on the anthropology of globalization such as the impact of global circulations of media, money and people on local cultures, identities and politics, migration and political economy. May be taken three times for credit.
Prerequisites: Junior or senior classification or approval of instructor.

ANTH 444/CLAS 444 Classical Archaeology
Credits 3. 3 Lecture Hours.
History of the discipline through the individuals, organizations, excavations, theoretical models and ethical issues that have shaped it.
Prerequisites: Junior or senior classification.
Cross Listing: CLAS 444/ANTH 444.
ANTH 445 Studies in African Diaspora
Credits 3. 3 Lecture Hours.
Examination of topics related to global African diaspora including African
descent populations outside of Africa wherever found (the Americas,
the Caribbean, Europe, Asia, etc.); construction of blackness in Latin
America; diversity of past and present African descent populations in
the Old World; social and political mobilization; religion; popular culture;
cultural politics; politics of identity. May be taken three times for credit.
Prerequisite: Junior or senior classification.

ANTH 446 Ceramic Artifact Analysis
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Methods, methods, and approaches used in the analysis of
archaeological pottery with a focus on the techniques and theories used
to bridge the gap between the recovery of ceramic artifacts and their
interpretation within various anthropological contexts.
Prerequisite: ANTH 202 and approval of instructor; junior or senior
classification.

ANTH 447 Lithic Artifact Analysis
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Laboratory-based course reviewing methods archaeologists use to
analyze stone tools and debitage, including identification of tool-stone
sources, reconstruction of technology, explanation of assemblage
variability, and microscopic use-wear analysis.
Prerequisite: ANTH 202 and approval of instructor; junior or senior
classification.

ANTH 448 Quantitative Methods in Anthropology
Credits 3. 3 Lecture Hours.
Quantitative analytical methods employed by anthropologists; includes
statistical analyses, statistical software and sampling theory commonly
used in anthropological research.
Prerequisites: Junior or senior classification; STAT 302 or STAT 303.

ANTH 458 Quantitative Ethnographic Methods
Credits 3. 3 Lecture Hours.
Quantitative data collection and analytical methods employed by
anthropologists; includes standardized observation, structured
interviews, demography and network analysis; hands-on assignments
involving data collection among local community.
Prerequisite: Junior or senior classification.

ANTH 461 Environmental Archaeology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Exploration of the paleoecological context in which past humans
interacted with the natural environment encompassing plants,
animals and landscape; advanced method, theory and applications in
couenvironmenal reconstruction.
Prerequisites: ANTH 202 or approval of instructor; junior or senior
classification.

ANTH 484 Anthropology Internship
Credits 0 to 3. 0 to 3 Other Hours.
Provides students with the opportunity to gain practical experience in a
variety of settings, including local, state or federal agencies; museums;
non-profit organizations; non-governmental organizations; private firms.
May be taken four times for credit.
Prerequisite: Junior or senior classification.

ANTH 485 Directed Studies
Credits 0 to 9. 0 to 9 Other Hours.
For individual research in anthropology on subjects not included in
established courses. May be repeated for credit.
Prerequisite: Junior or senior classification or approval of instructor; also
taught at Galveston campus.

ANTH 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of anthropology. May be repeated for
credit.

ANTH 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in
Anthropology. May be taken two times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

ARAB - Arabic (ARAB)

ARAB 101 Beginning Arabic I
Credits 4. 4 Lecture Hours.
(ARAB 1411) Beginning Arabic I. Introduction to Modern Standard Arabic
in its written and spoken forms; emphasis on conversation, rudimentary
vocabulary, simple grammar, and reading.

ARAB 102 Beginning Arabic II
Credits 4. 4 Lecture Hours.
(ARAB 1412) Beginning Arabic II. Introduction of more complex
grammatical constructions; vocabulary building; emphasis on putting
acquired vocabulary and grammar to conversational use.
Prerequisite: ARAB 101 or equivalent.

ARAB 104 Intensive Beginning Arabic
Credits 8. 8 Lecture Hours.
(ARAB 1411 and 1412) Intensive Beginning Arabic. Accelerated
elementary language study, with oral, listening, reading and writing
practice. Equivalent to ARAB 101 and ARAB 102.

ARAB 201 Intermediate Arabic I
Credits 3. 3 Lecture Hours.
(ARAB 2311) Intermediate Arabic I. Practice of listening, speaking and
writing skills; vocabulary building; discussion of topics related to daily life
and general aspects of Arab culture.
Prerequisite: ARAB 102 or ARAB 104, or equivalent.

ARAB 202 Intermediate Arabic II
Credits 3. 3 Lecture Hours.
(ARAB 2312) Intermediate Arabic II. Emphasis on comprehending printed
material, perfecting pronunciation, and attending to more complex
grammar; discussion of topics holding general and professional interest;
knowledge of Arab culture and history.
Prerequisite: ARAB 201 or equivalent.

ARAB 204 Intensive Intermediate Arabic
Credits 6. 6 Lecture Hours.
(ARAB 2311 and 2312) Intensive Intermediate Arabic. Accelerated
intermediate language study, with oral, listening, reading and writing
practice. Equivalent to ARAB 201 and ARAB 202.
Prerequisite: ARAB 102 or ARAB 104.

ARAB 221 Introduction to Arabic Language and Society
Credits 3. 3 Lecture Hours.
Examination of critical linguistic issues in the Arab world from a
sociolinguistic perspective, including language and religion; language and
power; language and nationalism; and language and education.
Prerequisite: Approval of instructor.
ARAB 222 Field Studies I: Language, Culture, and Society  
Credits 3. 3 Lecture Hours.  
Arabic language and culture taught in an Arabic-speaking country; living with a host family; supervised travel of cultural interest; participation in activities of host institution.  
Prerequisite: ARAB 102 or ARAB 104, or equivalent.  

ARAB 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Individual supervision of readings or assigned projects in an Asian Language, selected for each student individually; written or oral reports.  
Prerequisite: Approval of Arabic and Asian Language Office Director.  

ARAB 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of Arabic studies. May be repeated for credit.  
Prerequisite: Approval of instructor.  

ARAB 301 Reading and Composition  
Credits 3. 3 Lecture Hours.  
Advanced Arabic grammar and readings of average difficulty and of different genres, including literary and journalistic texts and other culturally-enriched materials in order to develop awareness of cultural products, perspectives, and practices found in the Arab world.  
Prerequisites: ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.  

ARAB 302 Reading and Composition II  
Credits 3. 3 Lecture Hours.  
Readings of average difficulty and of different genres, including literary and journalistic texts and other culturally-enriched materials; development of writing skills with emphasis on grammatical constructions; expansion of vocabulary and oral expression.  
Prerequisites: ARAB 301; junior or senior classification or approval of instructor.  

ARAB 321 Business Arabic  
Credits 3. 3 Lecture Hours.  
Business and financial terminologies useful in the Arab World; cultural etiquette for effective communication in Arabic business settings; oral and written business reports from a variety of authentic sources; language skills and communication strategies for traveling, shopping and conducting financial transactions in the Arab World.  
Prerequisites: ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.  

ARAB 322 Field Studies II: Language, Culture, and Society  
Credits 3. 3 Lecture Hours.  
Arabic language and culture taught in an Arabic-speaking country; living with a host family; supervised travel of cultural interest; participation in activities of host institution.  
Prerequisites: ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.  

ARAB 323 Media Arabic  
Credits 3. 3 Lecture Hours.  
Analysis of current events in the Arab World; use of print and electronic materials in Arabic from variety of media sources; discussion of different points of view in media representation/coverage; issues pertaining to business, politics, culture and entertainment in the Arab World.  
Prerequisites: ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.  

ARAB 475 Media and the Middle East  
Credits 3. 3 Lecture Hours.  
Examination of how media (e.g., literature, news, film, television) contribute to our understanding of historical events in the Middle East; analysis of cultural, social, political and historical circumstances of media representation of events; exploration of various media genres’ techniques and narrative structure. May be taken two times for credit with a focus on different medium.  
Prerequisite: Junior or senior classification or approval of instructor.  

ARAB 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Individual supervision of readings or assigned projects selected for each student individually; written or oral reports.  
Prerequisite: Approval of instructor and Director of AALO.  

ARCH - Architecture (ARCH)  

ARCH 205 Architecture Design I  
Credits 4. 1 Lecture Hour. 9 Lab Hours.  
Issues and methods in designing environments for human habitation and well-being; projects addressing site, functional planning, spatial ordering, form generation through a recognition of the synthesis of space, structure, use and context; reinforcement of appropriate graphic and model building techniques.  
Prerequisites: ENDS 105, ENDS 108, ENDS 115.  

ARCH 206 Architecture Design II  
Credits 5. 2 Lecture Hours. 9 Lab Hours.  
Fundamental issues of innovative design processes and creation explored through the creative use of past, present and future materials, tools, and technologies; with an emphasis upon the research of materials, methods, scale, craft and technique as instruments of design, fabrication, and production.  
Prerequisites: ARCH 205; ENDS 105, ENDS 108, ENDS 115.  

ARCH 212 Social and Behavioral Factors in Design  
Credits 3. 3 Lecture Hours.  
Social and behavioral factors in the built and natural environment; environmental perception and spatial cognition; social-environmental processes such as privacy and crowding; setting-oriented discussion on residences, education, and the workplace; the psychology of nature and natural resource management; social design and social science contribution to architectural design.
ARCH 213 Sustainable Architecture  
Credits 3. 3 Lecture Hours.  
A comprehensive introduction to sustainability concepts, techniques and applications at all levels of the built environment, history of contemporary development of sustainable architecture from 1960 to the present; design strategies, environmental technologies and social factors for reducing building energy needs and carbon footprints; global applications of sustainable approaches.

ARCH 216 Computational Methods in Architecture  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Software and processes for computation design in architecture; image editing and creation, vector drawing, 3D modeling, parametric modeling, rendering techniques and simulation.

ARCH 221/MUST 221 Foundations of Museum Studies  
Credits 3. 3 Lecture Hours.  
Introduction to museums, cultural heritage and collections care; best practices for non-profit institutions, public engagement and the collection, preservation and exhibition of material culture; emphasis on archaeological, ethnographic, and historical collections, or other collections of cultural significance.  
Cross Listing: MUST 221/ARCH 221.

ARCH 246 Foundations of Historic Preservation  
Credits 3. 3 Lecture Hours.  
Exploration and evaluation of the cross-disciplinary work of historic preservation; emphasis on the significance of historic places to societal well-being and conservation alternatives for historic and cultural environments; review of preservation projects and treatments; guest presentations and case studies from practicing professionals and researchers in a variety of fields.

ARCH 249 Survey of World Architecture History I  
Credits 3. 3 Lecture Hours.  

ARCH 250 Survey of World Architecture History II  
Credits 3. 3 Lecture Hours.  
(ARCH 1302) Survey of World Architecture History II. A survey of world architecture and the human-designed and built environment from the 13th to the 19th century.

ARCH 260 Comparative Theory in the Built and Virtual Environments  
Credits 3. 3 Lecture Hours.  
Introduction of cultural theory and the environment; theories, special concepts and ideas relevant to the built and virtual environments with primary focus on the last fifty years; theory, theory building, and application to buildings and urban design; formation of ideas and critical ways of assessing the environment.

ARCH 281 Seminar in Contemporary Architecture  
Credit 1. 1 Lecture Hour.  
Presentations by and discussions with professionals representing specialty areas related to environmental design through the Department of Architecture Lecture Series. May be taken four times for credit. Must be taken on a satisfactory/unsatisfactory basis.

ARCH 291 Research in Architecture Innovation  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in the College of Architecture. May be repeated 2 times for credit.  
Prerequisite: Approval of instructor and department head.

ARCH 305 Architectural Design III  
Credits 5. 2 Lecture Hours. 9 Lab Hours.  
Integration of architectural theories and philosophy with environmental design systems; study of theoretical approaches to graphic and analytical thinking, problem identification and design dissemination through various media, case studies and problem resolution; conditions and forces associated with a variety of building types and the generation of design solutions.  
Prerequisites: Admission to upper level in environmental design; ARCH 249 and ARCH 250.

ARCH 317 Digital Fabrication for Architecture  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
Digital fabrication for architecture including software, numerically controlled tools, translation applications and management strategies for digital fabrication workflows; production of building components from three dimensional datasets of virtual architecture proposals.  
Prerequisites: Junior or senior classification or approval of instructor; ARCH 216 or approval of instructor.

ARCH 327 Conceptual Structural Analysis  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
A non-mathematical investigation of structural systems and components with respect to behavior; selection of the most appropriate structural system for various building typologies.  
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 328 Architectural Envelopes  
Credits 3. 3 Lecture Hours.  
Study of roof, wall, glazing and screen systems of significant works in contemporary architecture and the strategies behind their making; focus on innovative materials, surface effects, and performance aspects.  
Prerequisite: Junior or senior classification in environmental design.

ARCH 330 The Making of Architecture  
Credits 3. 3 Lecture Hours.  
Study of significant works of contemporary architecture and materials and strategies used in their making; focus on innovative materials, systems, and partnerships necessary to realize the design.  
Prerequisites: Junior or senior classification in environmental design or approval of instructor or ARCH classification.

ARCH 331 Architectural Structures  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Physical principles that govern statics and strength of materials through the design of architectural structures from a holistic view, in the context of architectural ideas and examples; introduction to construction, behavior of materials, and design considerations for simple and complex structural assemblies; computer applications.  
Prerequisites: Junior or senior classification in environmental design; MATH 142 or equivalent; PHYS 201.

ARCH 335 Architectural Systems  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Theory and applications of building energy use, envelope design, shading analysis, heating and cooling systems, lighting design; building water supply, plumbing and drainage systems; electrical, acoustical, fire and lightning protection; life safety; transportation systems and construction materials; calculations, equipment selection, and component sizing as they relate to building design.  
Prerequisites: Junior or senior classification in environmental design; PHYS 201.
ARCH 345 History of Building Technology
Credits 3. 3 Lecture Hours.
Chronological development of civilization and building technology from prehistoric cultures to present; classic and modern materials, structural devices past and present, machine-produced products, prefabrication, construction methodology and servicing.

ARCH 346 Architecture, Heritage and Culture
Credits 3. 3 Lecture Hours.
Global exploration of how architecture and the built environment express culture and identity; theoretical and practical approaches to cultural heritage and conservation.
Prerequisite: Junior or senior classification.

ARCH 347 Documentation of Historic Buildings and Sites
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Techniques for recording historic buildings and sites; measuring and drawing to Historic American Building Survey Standards; field experience in photography, laser scanning, photogrammetry, hand measuring, field notes and record drawing preparation.
Prerequisites: Junior or senior classification or approval of instructor.

ARCH 350 History and Theory of Modern and Contemporary Architecture
Credits 3. 3 Lecture Hours.
Development of modern and contemporary architecture in the 20th and 21st centuries; materials, structure, social and economic changes as well as architectural theory.
Prerequisites: Junior or senior classification.

ARCH 353 History of Product Design
Credits 3. 3 Lecture Hours.
History of product design in Europe and America including the relationship between designer and object, the relationship of design, industry and media over time and design criticism; focus on material/technical and typological approaches, comparative method and content analysis in context of original environment and social history.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 360 Topics in Design Build Community Service
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Contemporary topics in architectural design-build practices including high impact interdisciplinary learning experiences developed through a project-based learning model with a focus on the planning, design, preconstruction, construction and project delivery; team-based approach with those outside of the architecture discipline to design, plan and complete project documents, estimates and undertake the construction activities necessary to make a fully functioning community service project.
Prerequisites: Junior or senior classification or approval of instructor.

ARCH 381 Design Seminar
Credit 1. 1 Lecture Hour.
Presentations by and discussions with professionals representing specialty areas related to architectural fabrication and product design. May be taken three times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 405 Architectural Design IV
Credits 5. 2 Lecture Hours. 9 Lab Hours.
A comprehensive design studio focused on the integration of design theory with functionally sustainable environmental and structural systems; consideration of a project from site analysis and programming through design detailing.
Prerequisites: Admission to upper level in environmental design; ARCH 305, ARCH 331, ARCH 335; CARC 301 or ARCH 494; concurrent enrollment in ARCH 431 and ARCH 435.

ARCH 406 Architecture Design V
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Topical approaches to design, emphasizing theory and practice of architecture or related disciplines, such as urban design, interior design, health care design, etc.
Prerequisites: Junior or senior classification; admission to upper level in environmental design; ARCH 305, ARCH 331 and ARCH 335; CARC 301 or ARCH 494; students may with approval of the department enroll in the course during the summer term prior to taking ARCH 405, ARCH 431 and ARCH 435 if they are within 20 credit hours of graduation prior to the beginning of the following fall semester.

ARCH 413 Elements of Urban Design
Credits 3. 3 Lecture Hours.
Investigation of design elements shaping the urban environment; emphasis placed on contemporary precedents in architecture, landscape and urbanism to evaluate design complexity on multiple levels: social, political, environmental, economic, cultural and geographic.
Prerequisite: Admission to upper level division in BED or BS-URPN.

ARCH 421 Energy and Sustainable Architecture
Credits 3. 3 Lecture Hours.
Understanding the various design decisions impacting sustainability and energy efficiency; includes participation in an ‘academic’ LEED-NC rating project; interdisciplinary team approach with a design studio architect to perform the LEED-NC rating on the architect’s building; application of reference material, standards, and USGBC material.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 430 History of Ancient Architecture
Credits 3. 3 Lecture Hours.
Architecture of antiquity, examining stylistic, structural and theoretical advancements in building, beginning with Mesopotamian and continuing with Egyptian, Greek and Roman civilizations.
Prerequisite: ARCH 249 or ARTS 149; junior or senior classification or approval of degree coordinator or instructor.

ARCH 431 Integrated Structures
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Selection and economics of structural systems in the context of integrating structural systems into a building through good design; analysis and design of wood, steel, concrete, and composite systems and members in relation to building design.
Prerequisites: Admission to upper level in environmental design; ARCH 305, ARCH 331, ARCH 335; concurrent enrollment in ARCH 405 and ARCH 435.

ARCH 433 Architectural Lighting
Credits 3. 3 Lecture Hours.
Theory and practice of lighting design as an art and science; aperture design for sunlight control; selecting and locating luminaries to enhance interior and exterior surfaces and spaces.
Prerequisite: ARCH 335 or junior or senior classification in EDAS.

ARCH 434 The Role of Sculpture and Painting in Ancient Architecture
Credits 3. 3 Lecture Hours.
Interrelationships of architecture, painting and sculpture in the ancient world including Egypt, Mesopotamia, Crete, Greece and Rome.
Prerequisite: ARCH 249 or ARTS 149; junior or senior classification or approval of degree coordinator or instructor.
ARCH 435 Integrated Systems
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Understanding how to integrate sustainable environmental systems into a building through good design; lectures support studio; systems faculty participate in studio critiques throughout the project.
Prerequisites: Admission to upper level in environmental design; ARCH 305, ARCH 331, ARCH 335; concurrent enrollment in ARCH 405 and ARCH 431.

ARCH 437 Great Medieval Cathedrals
Credits 3. 3 Lecture Hours.
Interrelationships of architecture, sculpture and stained glass, technology and construction, function and form, society and patronage in the great period of medieval building.
Prerequisite: ARCH 250 or ARTS 150; junior or senior classification or approval of degree coordinator or instructor.

ARCH 438 History and Design of Sacred Architecture
Credits 3. 3 Lecture Hours.
Exploration of history and design of sacred architecture; review of historic and contemporary houses of worship; global historic trends in sacred architecture in light of the current development in liturgy and design; significance of sacred places to society and culture.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 441 Baroque and Rococo Architecture
Credits 3. 3 Lecture Hours.
The investigation of the history of architecture, the arts and society, and major creative individuals from the late sixteenth to the early eighteenth centuries.
Prerequisite: ARCH 250 or ARTS 150; junior or senior classification or approval of degree coordinator or instructor.

ARCH 443 Aegean Art and Architecture
Credits 3. 3 Lecture Hours.
Art and architecture of the prehistoric Aegean, ca. 6000-1100-B.C.E.; focus on the built environment, material culture and visual arts of early civilization in the Aegean basin; evidence for regional and vernacular architectural traditions; expressions of power, ideology and social identity through monumental architectural and elite arts of Minoan Crete and Mycenaean Greece.
Prerequisites: Junior or senior classification; approval of instructor or degree coordinator.

ARCH 444 American Architecture
Credits 3. 3 Lecture Hours.
Investigation of indigenous, vernacular and historical American architecture from 1500 to 1920; evolution of construction technologies, changing building forms and finish treatments; identification of historic architectural styles and their influence on 21st century American architecture.
Prerequisites: ARCH 250 or ARCH 350; junior or senior classification, or approval of instructor.

ARCH 451 Strategies in Architectural Management
Credits 3. 3 Lecture Hours.
Emerging strategies in the architecture and construction industry, with an emphasis on understanding the changing structure of the industry and the management of both firms and projects.
Prerequisite: Senior classification or approval of degree coordinator.

ARCH 452 Careers in Architecture
Credits 3. 3 Lecture Hours.
Career opportunities in the profession of architecture; investigations into the composition of architectural practice today and the wide range of specialties represented in architectural firms; interviews with select representative individuals.
Prerequisite: Admission to upper level in environmental design, construction science or landscape architecture.

ARCH 457 Ethics and Professional Practice
Credits 3. 3 Lecture Hours.
Issues and relationships within the business, legal and political environment; introduction to the concepts of architectural specifications and the AIA standard conditions of the construction contract; forms of construction, bidding and contract documents. For undergraduate students pursuing a professional degree and a career in architecture.
Prerequisite: Senior classification in environmental design.

ARCH 458 Cultural and Ethical Considerations for Global Practice
Credits 3. 3 Lecture Hours.
Issues and relationships within the cultural, business, legal and political environments of global practice; differences in the construction contract, bidding and various forms of construction.
Prerequisite: Junior or senior classification.

ARCH 463 Elements of Interior Architecture
Credits 3. 3 Lecture Hours.
Analysis and design of architectural interiors; historical and professional perspectives incorporating programming, space planning and organization; specification and selection of furnishings and materials to satisfy user needs in residential, commercial and institutional settings.
Prerequisites: Admission to upper level in environmental design; concurrent enrollment in ARCH 405, ARCH 431 and ARCH 435 not allowed.

ARCH 465 Introduction to the Built Environment
Credits 1 to 6. 1 to 6 Other Hours.
Fieldwork related to practice of historic preservation and cultural heritage management; methods of documentation, analysis, planning and treatment; emphasis on identification and evaluation of multidisciplinary approaches to historic preservation and heritage conservation in global contexts; topics vary each semester. May be taken for credit up to six hours.
Prerequisites: ARCH 246, ARCH 346, or ARCH 347; junior or senior classification or approval of instructor.

ARCH 481 Seminar
Credit 1. 1 Lecture Hour.
Presentations by and discussions with professionals representing specialty areas related to environmental design; career and academic objectives. May be repeated for up to 4 credit hours. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 484 Summer Internship
Credits 6. 12 Other Hours.
Practical experience in an office of design allied professionals; 10-week internship with a minimum of 400 hours continuous employment; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. May not be repeated for credit.
Prerequisites: Junior or senior classification or approval of instructor; approval of the environmental design internship coordinator.
ARCH 485 Directed Studies  
Credits 1 to 5. 1 to 5 Other Hours.  
Special projects in architecture. May be repeated for credit.  
**Prerequisites:** Admission to upper level in environmental design; approval of instructor and department head.

ARCH 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Special topics in an identified area of architecture. May be repeated for credit.  
**Prerequisite:** Junior or senior classification; approval of instructor and degree coordinator.

ARCH 491 Advanced Architecture Innovation Research  
Credits 0 to 6. 0 to 6 Other Hours.  
Research conducted under the direction of faculty member in the College of Architecture. May be repeated 2 times for credit.  
**Prerequisite:** Admission to upper level in environmental design; approval of instructor and department head.

ARCH 494 Internship  
Credits 9. 18 Other Hours.  
Practical experience in an office of design allied professionals; fifteen week internship with a minimum of 600 hours of continuous employment; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. To be taken only as a requirement for the study away semester. May not be repeated for credit.  
**Prerequisites:** Junior or senior classification; admission to upper level in environmental design; CARC 481; approval of the environmental design internship coordinator.

AREN - Architectural Engr (AREN)  

AREN 175/COSC 175 Construction Graphics Communication  
Credits 3. 3 Lecture Hours.  
Visualization, interpretation and communication of graphical geometry in construction design and engineering; graphical analysis of problems; sketching applications, computer aided design and fundamentals of information modeling software; introduction to common quantitative tools in construction.  
**Prerequisite:** AREN and COSL majors only.  
**Cross Listing:** COSC 175/AREN 175.

AREN 200 Architectural Engineering Foundations  
Credits 2. 2 Lecture Hours.  
Introduction to the broad field and professional practice of architectural engineering, architectural engineering systems, and the role of the architectural engineer; emphasis on professional engineering design services, design and construction processes and documents, building envelope and materials, structural systems, mechanical systems, lighting systems, building systems integration, building codes and standards, fire safety, professional attributes of architectural engineers, and issues of human performance requirements and sustainability at relates to building system design.  
**Prerequisite:** Sophomore classification or approval of instructor.

AREN 300 Architectural Engineering Systems  
Credits 3. 3 Lecture Hours.  
Analysis and application of the engineering design process to solve problems associated with the design and operation of building systems, specifically related to HVAC, electrical power and lighting, and structural integrity; communication of solutions to technical problems of building systems, through writing, presentations, and team interactions, typical of architectural engineers in the building industry; emphasis on the engineering design process in architectural engineering, structural systems for buildings, mechanical systems for heating, ventilation, and air-conditioning, electrical lighting for buildings, building fire safety, building acoustics, building codes and standards, interface issues among different building systems, and sustainability aspects of building systems.  
**Prerequisites:** Grade of C or better in AREN 200; junior classification or approval of instructor.

AREN 320 Lighting Engineering for Buildings  
Credits 3. 3 Lecture Hours.  
Reinforces the fundamentals of illuminating engineering for building interiors; focuses on the design and analysis of electrical lighting systems, including the integration between the lighting design process and the technical foundations of building lighting; emphasis on the fundamentals of lighting engineering and basic engineering methods for building lighting systems, lighting design criteria, lighting calculations, and power budgets.  
**Prerequisites:** Junior or senior classification; major in engineering or approval of instructor.

AREN 330 Mechanical Systems for Buildings  
Credits 3. 3 Lecture Hours.  
Introduction to qualitative and quantitative engineering concepts of mechanical systems for buildings for architectural engineers, including HVAC systems, control of indoor air pollutants and fire suppression systems; emphasis on thermal behavior of buildings and building envelopes, human comfort requirements and psychometrics, thermal load calculations, HVAC systems/equipment, design of space air-conditioning and its relationship to architectural design, mechanical systems for indoor air quality and for fire suppression.  
**Prerequisite:** Grade of C or better in MEEN 315 or MMET 370.

AREN 399 High Impact Experience for Architectural Engineers  
Credits 0. 0 Other Hours.  
Participation in an approved high-impact learning experience; reflection on professional outcomes from the National Society of Professional Engineers’ Engineering Body of Knowledge; documentation and self-assessment of learning experience at mid-curriculum point.  
**Prerequisite:** Junior or senior classification.

AREN 401 Architectural Engineering Design I  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Instruction and practice in the design process applied to an architectural engineering design project; application of establishing customer need, determining requirements in terms of function and performance, developing alternative design concepts, performing trade-off studies among performance, cost and schedule, embodiment and detail design and the iteration of the above steps; major architectural engineering design project.  
**Prerequisites:** Grade of C or better in AREN 300, AREN 330, and CVEN 345.
AREN 402 Architectural Engineering Design II  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Application and extension of fundamentals of engineering design, product detail, and design development process, including case studies; emphasis on project management, marketing considerations, manufacturing detailed design specifications, failure modes, applications of codes and standards, selection of design margins, product (component) development guidelines, intellectual property, product liability and ethical responsibility; major architectural engineering design project.  
Prerequisite: Grade of C or better in AREN 401.

AREN 440 Architectural Engineering Heating, Ventilating and Air Conditioning Design  
Credits 3. 3 Lecture Hours.  
Project-based design course; select and develop the mechanical system for a building, from the programming phase to the design development and working documents; emphasis on the application HVAC principles in the design and analysis of a mechanical system in a real building, including review of building thermal load calculations & energy analysis, HVAC design goals and schematic design, system selection and system design, HVAC design development, HVAC design documents, and energy, environmental, and human comfort considerations in HVAC design.  
Prerequisites: Grade of C or better in AREN 300 and AREN 330.

AREN 485 Directed Studies  
Credits 0 to 6. 0 to 6 Other Hours.  
Directed individual study within architectural engineering.  
Prerequisites: Junior or senior classification and approval of architectural engineering director or delegate.

ARTS - Art (ARTS)

ARTS 103 Design I  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
(ARTS 1311) Design I. Two-dimensional design; fundamentals of line, color, form, texture, shape, space and composition.  
Prerequisite: Art minors only.

ARTS 104 Introduction to Graphic Design  
Credit 1. 2 Lab Hours.  
Introduction to the concepts and techniques utilized in graphic design; basic digital camera operations, typography, use of color, design principles; integration of type, graphic elements and images.  
Prerequisite: Lower division in Visualization or minor in Art.

ARTS 111 Drawing I  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
(ARTS 1316) Drawing I. Introduction to composition and form, media, techniques and subjects; exploring perceptual and descriptive drawing; mark making as a developmental process in art and design practice.  
Prerequisite: Art minors only.

ARTS 115 Drawing for Visualization  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Investigation of and practice with media, methods and techniques in communication of design; observational drawing; proportion, form, line and value.  
Prerequisite: Lower division in Visualization.

ARTS 149 Art History Survey I  
Credits 3. 3 Lecture Hours.  
(ARTS 1303) Art History Survey I. Survey of architecture, painting, sculpture and the minor arts from prehistoric times to 14th century.

ARTS 150 Art History Survey II  
Credits 3. 3 Lecture Hours.  
(ARTS 1304) Art History Survey II. Survey of architecture, painting, sculpture and the minor arts from the 14th century to the end of the 19th century; also taught at Galveston campus.

ARTS 210 Introduction to Digital Photography  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
(ARTS 2356) Introduction to Digital Photography. Introduction to photography; digital camera controls; creation, manipulation and critique of the digital image; composition and aesthetics; exposure control; digital workflow.  
Prerequisite: Non-visualization majors only.

ARTS 212 Life Drawing  
Credits 3. 1 Lecture Hour. 6 Lab Hours.  
(ARTS 2323) Life Drawing. Study of the form, volume, structure and movement of the human figure; emphasis on proportion and anatomy.  
Prerequisite: Grade of C or better in ARTS 111 or ARTS 115.

ARTS 234 Body Art of Tattoos  
Credits 3. 3 Lecture Hours.  
History of body art from the Stone Age to present day; aesthetics, sign, symbol, social and cultural significance.

ARTS 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of art history or visualization. May be repeated for credit.

ARTS 303 Graphic Design I  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Principles and elements of graphic design; composition problem solving, conceptual thinking and application to visual communication.  
Prerequisites: Grade of C or better in ARTS 104 and VIST 284; grade of C or better in VIST 105 or ARTS 103.

ARTS 304 Graphic Design II  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Continuation of ARTS 303; concepts in advanced graphics as a tool for design solutions for publication and promotion; emphasis on creative thinking over technology.  
Prerequisites: ARTS 303; junior or senior classification.

ARTS 305 Painting I  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Traditional and contemporary painting approaches and media; emphasis on form, composition, observational representation.  
Prerequisite: Grade of C or better in ARTS 111 or ARTS 115.

ARTS 308 Sculpture  
Credits 3. 1 Lecture Hour. 5 Lab Hours.  
Principles and processes of form making; space and materials; context and content of three-dimensional form.  
Prerequisite: Grade of C or better in ARTS 111 or ARTS 115.

ARTS 311 Traditional Photography  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Photographic image as a medium of visual expression; basic theory and practice of still photography; historic development and aesthetic concern for photographic imagery.  
Prerequisites: Grade of C or better in ARTS 103 or VIST 205.
ARTS 312 Advanced Photography
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Advanced photographic image-making; development, control and presentation of the expressive photographic image; traditional and/or new media.
Prerequisite: Grade of C or better in ARTS 210, VIST 310, or ARTS 311.

ARTS 315 Figure Drawing For Narrative and Concept Development
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Exploration of contemporary drawing practices and theory; investigation into the relationship with digital media including animation, photography and other digital technologies; development of personal approaches to media, techniques and thematic content; creation of a creative workflow and visual vocabulary.
Prerequisite: Grade of C or better in ARTS 212.

ARTS 325 Digital Painting
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Theory and practice of digital painting media; exploration of traditional and new forms of art making and creativity; emphasis on color theory.
Prerequisites: Grade of C or better in ARTS 111, ARTS 115, or ARTS 305. Field trip required.

ARTS 328 Advanced Painting
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Experiments in spatial design; intermediate aspects of creative process; issues in contemporary art; modeling and construction techniques as they may facilitate the generation of new forms and compositions; formal visual analysis and critique.
Prerequisites: ARTS 305; upper division in Visualization or approval of instructor.

ARTS 329 Texas Art History
Credits 3. 3 Lecture Hours.
The development of visual arts in Texas; an examination of art movements, artists and major works exhibiting a broad range of artistic techniques.
Prerequisite: Grade of C or better in ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 350.

ARTS 330 The Arts of America
Credits 3. 3 Lecture Hours.
Survey of painting, sculpture, crafts and architecture of prehistoric America to the present; emphasis on art as a record of cultural, economic and social evolution.
Prerequisite: Grade of C or better in ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 333 Visual And Material Culture of the Mediterranean
Credits 3. 3 Lecture Hours.
Visual arts and material culture of the Mediterranean world during the Renaissance and early modern period; economic, social, cultural and political influence; field trip required.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 335 The Art and Architecture of Rome
Credits 3. 3 Lecture Hours.
Rome as a microcosm of western civilization; a survey of western architectural and art history from antiquity through the Baroque; a focus on the Eternal City’s buildings, paintings, mosaics and sculptures exploring criteria, methods, goals and results of major architectural and artistic movements and the people involved.
Prerequisite: Grade of C or better in ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 339 Themes in Contemporary Art
Credits 3. 3 Lecture Hours.
Thematic survey of art since 1960; exploration of changing roles in art production, performance, presentation and criticism; art and artist in the global context; contemporary theory and criticism.
Prerequisite: Admission to upper division.

ARTS 340 History of the Photographic Image
Credits 3. 3 Lecture Hours.
History of photography; social, cultural, political, scientific and artistic contexts; important photographic themes and photographers.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 341 History of Animation
Credits 3. 3 Lecture Hours.
History of the animated image in the nineteenth-century through the twenty-first century; developments, theories and ideologies in computer animation.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 342 History of Graphic Design
Credits 3. 3 Lecture Hours.
History of graphic design; understanding visual language, semiotic theory, technological developments associated with graphic design production, social, cultural, political and artistic influence on visual communication.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 343 History of Illustration
Credits 3. 3 Lecture Hours.
History of illustration; early scrolls, codices and manuscript illumination; print culture; commercial processes of the 19th and 20th centuries.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 345 History of Gaming
Credits 3. 3 Lecture Hours.
Modern game creation and play; theory, history, and development.
Prerequisites: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 349 The History of Modern Art
Credits 3. 3 Lecture Hours.
Chronological development of late 19th through 20th century art; emphasis on key artists, paintings, sculpture, photography and architecture.
Prerequisite: Junior or senior classification or approval of instructor and undergraduate program coordinator.

ARTS 350 The Arts and Civilization
Credits 3. 3 Lecture Hours.
Investigation of the image of work of selected periods in terms of criticism, aesthetic rationale, specific masters and social significance by going beyond historical chronology.
Prerequisites: Grade of C or better in ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.
ARTS 353 Color Theory
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Aspects of color and color theory including optical phenomena, color theory and perception; application and principles with respect to art and design; two-dimensional and three-dimensional projects examining color theories.
Prerequisites: Upper division in Visualization or minor in Art.

ARTS 403 Graphic Design III
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Advanced graphic design concepts and practices; development of unified graphic campaigns to promote a product, an organization, a publication, a service, or business; advanced problem-solving techniques based on the design process through research, analysis, and presentation; systematic approach to visual development.
Prerequisites: ARTS 303 and ARTS 304; junior or senior classification or approval of instructor and undergraduate program coordinator; knowledge of industry-standard software (Adobe Photoshop, InDesign and Illustrator) is expected.

ARTS 445 Byzantine Art and Architecture
Credits 3. 3 Lecture Hours.
A critical and historical investigation of Mediterranean art and architecture from the third century to the middle of the fifteenth century; emphasis on the artistic achievements from the late antique Mediterranean and the Byzantine Empire; investigation of architectural decoration, public monuments, cultural diversity and controversies over images.
Prerequisite: Grade of C or better in ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special problems in the fine and applied visual and plastic arts. May be repeated for up to 12 credit hours.
Prerequisite: Approval of instructor and undergraduate program coordinator.

ARTS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified field of the fine or applied visual and plastic arts. May be repeated for up to 9 credit hours.
Prerequisite: Approval of instructor and undergraduate program coordinator.

ASCC - Academic Success Center (ASCC)

ASCC 001 Basic Math Skills
Credits 0. 3 Other Hours.
Developmental instruction in mathematics; includes the integers and rational numbers and applications, exponents, polynomials, solution of equations, graphing, elementary geometry and reasoning skills; also taught at Galveston and Qatar campuses. May not be used for credit toward a degree.

ASCC 002 Basic Writing Skills
Credits 0. 3 Other Hours.
Individualized instruction in English composition based on an analysis of the student's proofreading, revision and editing skills; a programmed sequence of study and practice designed for improvement of writing performance through mastery of basic skills at word, sentence, paragraph and multiparagraph levels; also taught at Qatar campus. May not be used for credit toward a degree.

ASCC 003 Basic Reading Skills
Credits 0. 3 Other Hours.
Individualized instruction in reading based on analysis of the student's reading comprehension skills; study and practice of reading strategies designed to increase reading comprehension skills; also taught at Qatar campus. May not be used for credit toward a degree.

ASCC 004 Reading/Writing Connection
Credits 0. 3 Other Hours.
Individualized instruction designed to refine and practice the basic reading and writing skills by integrating the related concepts of the two areas; also taught at Galveston and Qatar campuses. May not be used for credit toward a degree.

ASCC 005 Fundamental Academic Skills
Credits 0. 0 Lecture Hours.
Designed to address the fundamental reading, writing, and/or mathematical skills for students needing instruction in Adult Basic Education (ABE). May not be used for credit towards a degree.
Prerequisites: Concurrent enrollment in ASCC 001 or ASCC 004; also taught at Galveston and Qatar campuses.

ASCC 101 Application of Learning Theories to College Studies
Credits 0 to 3. 0 to 3 Lecture Hours.
The study of critical theories of learning with application to academic performance; designated as the university's learning framework course, this course is designed to help students understand learning theory and develop strategies for successful completion of college level studies; also taught at Qatar campus.

ASCC 102 Career Awareness
Credits 0 to 3. 0 to 3 Lecture Hours.
Encourages planning career and life goals early in academic career for timely decision-making related to academics, acquiring marketable skills, pursuing relevant experiential education, and participating in student/professional organizations; acquaints students with realities of early career; emphasizes utilization of resources on a timely basis for competitiveness in job market; also taught at Qatar campus.

ASCC 285 Directed Studies
Credits 0 to 3. 0 to 3 Lecture Hours.
Selected topics in Asian Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.
Prerequisite: Approval of director of Asian Studies.

ASCC 289 Special Topics in...
Credits 0 to 3. 0 to 3 Lecture Hours.
Selected topics in academic development and improvement.
Prerequisite: Approval of coordinator; also taught at Qatar campus.

ASIA - Asian Studies (ASIA)

ASIA 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Selected fields of Asian Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.
Prerequisite: Approval of director of Asian Studies.

ASIA 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in Asian studies. May be repeated for credit.

ASIA 349/HIST 349 The Vietnam War/The American War
Credits 3. 3 Lecture Hours.
Vietnam's relations with the West; French colonialism; origins and development of Vietnamese nationalism; Cold War and American involvement; wartime societies in North and South Vietnam; expansion of the war to Cambodia and Laos; anti-war movements in the United States; reasons for the American defeat; consequences and lessons of the war.
Prerequisites: Junior or senior classification.
Cross Listing: HIST 349/ASIA 349.
ASIA 350/HIST 350 World War II in Asia and the Pacific
Credits 3. 3 Lecture Hours.
Origins and development of Japanese imperialism; Japan’s expansion into East and Southeast Asia and the Pacific; wartime societies; collaboration and resistance; effects of the war in the United States on Japanese-Americans; outcomes of the war; remembrance of the war.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 350/ASIA 350.

ASIA 352/ HIST 352 Modern East Asia
Credits 3. 3 Lecture Hours.
Impact of the West on traditional China and Japan; the response through modernization; rise of nationalism and formation of modern nation states.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 352/ASIA 352.

ASIA 356/HIST 356 Twentieth Century Japan
Credits 3. 3 Lecture Hours.
Industrialization and modernization of Japan; its rise from an isolated nation to a major world power and economic giant.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 356/ASIA 356.

ASIA 401 Slavery in World History
Credits 3. 3 Lecture Hours.
Comparative history of human slavery; slavery in the Ancient World, Asia, Africa; varieties of modern slavery in the New World since 1500; abolition of slavery and continuing forms of human bondage in the contemporary world.
Prerequisite: Junior or senior classification.
Cross Listing: SOCI 463 and WGST 463.

ASIA 463 Gender in Asia
Credits 3. 3 Lecture Hours.
Gender dynamics in Asia; changes in gender roles; women's movements; women and the economy; women and politics; men's and women's private lives.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 401 and HIST 401.

ASIA 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Selected fields of Asian Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.
Prerequisite: Approval of director of Asian Studies.

ASIA 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in Asian Studies. May be repeated for credit.

ASIA 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of a faculty member in Asian Studies. May be repeated 3 times for credit.
Prerequisites: 6 credits of ASIA; junior or senior classification; approval of instructor.

ASTR - Astronomy (ASTR)

ASTR 101 Basic Astronomy
Credits 3. 3 Lecture Hours.
(ASTR 1303) Basic Astronomy. A qualitative approach to basic stellar astronomy; earth-moon-sun relationships then studies of distances to stars, stellar temperatures, and other physical properties; birth, life on the main sequence of the H-R diagram, and ultimate fates of stars; not open to students who have taken ASTR 111 or ASTR 314.

ASTR 102 Observational Astronomy
Credit 1. 3 Lab Hours.
(ASTR 1103 or PHYS 1103) Observational Astronomy. Observational and laboratory course which may be taken in conjunction with ASTR 101 or ASTR 314. Use of techniques and instruments of classical and modern astronomy.
Prerequisite: ASTR 101 or ASTR 314, or registration therein.

ASTR 103 Introduction to Stars and Exoplanets
Credits 3. 3 Lecture Hours.
A qualitative study of stellar birth, stellar structure and evolution, stellar nucleosynthesis, the Hertzsprung-Russell Diagram, white dwarfs, neutron stars, supernovae, black holes, proto-planetary systems, origin of the solar system and the search for exoplanets; utilizes active learning methods that incorporate observations from the current generation of ground and space-based telescopes. Open to all majors.

ASTR 104 Introduction to Galaxies and Cosmology
Credits 3. 3 Lecture Hours.
A qualitative study of properties of galaxies, galaxy evolution through cosmic time, galactic archaeology, active galactic nuclei, super-massive black holes, large-scale structure, the expansion history of the universe, cosmological parameters and Big Bang nucleosynthesis; utilizes active learning methods that incorporate observations from the current generation of ground and space-based telescopes. Open to all majors.

ASTR 109/PHYS 109 Big Bang and Black Holes
Credits 3. 3 Lecture Hours.
Designed to give an intuitive understanding of the Big Bang and Black Holes, without mathematics, and de-mystify them for the non-scientist.

ASTR 111 Overview of Modern Astronomy
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(ASTR 1303 and ASTR 1103, ASTR 1403, PHYS 1303 and PHYS 1103, PHYS 1403) Overview of Modern Astronomy. Roots of modern astronomy; the scientific method; fundamental physical laws; the formation of planets, stars, and galaxies; introduction to cosmology; includes an integrated laboratory that reinforces the lecture topics, including hands-on experience with telescopes and imaging of celestial objects; not open to students who have taken ASTR 101 or ASTR 314.

ASTR 119/PHYS 119 Big Bang and Black Holes: Laboratory Methods
Credit 1. 2 Lab Hours.
Hands-on understanding of the concepts surrounding the Big Bang and Black Holes; emphasis on the evidence-based decision making process, methods and presentation; for non-scientists. Companion course for ASTR 109/PHYS 109/ASTR 109.
Prerequisite: ASTR/PHYS 109/ASTR 109 or registration therein.
Cross Listing: PHYS 119/ASTR 119.
ASTR 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum; intended for use as lower-level credit.  
Prerequisite: Approval of department head.

ASTR 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of astronomy. May be repeated for credit.  
Prerequisite: Approval of instructor.

ASTR 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in astronomy. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

ASTR 314 Survey of Astronomy  
Credits 3. 3 Lecture Hours.  
Primarily for majors in science and engineering. Kepler's laws, law of gravitation, solar system, stars, stellar evolution, nucleosynthesis, cosmology, clusters, nebulae, pulsars, quasars, black holes.  
Prerequisite: PHYS 207 or PHYS 208.

ASTR 320 Astrophysical Research Methods  
Credits 3. 3 Lecture Hours.  
Background and tools used in modern astrophysical research, including reduction of photometric and spectroscopic data, signal-to-noise and error calculations and order-of-magnitude estimates.  
Prerequisite: Grade of C or better in ASTR 314 or approval of instructor.

ASTR 401 Stars and Extrasolar Planets  
Credits 3. 3 Lecture Hours.  
How stars are born, how internal structure changes, nuclear fuel burned and ultimate fate; extrasolar planet detection, formation, properties and habitability.  
Prerequisite: ASTR 314.

ASTR 403 Extragalactic Astronomy and Cosmology  
Credits 3. 3 Lecture Hours.  
Physical makeup of individual galaxies and large scale structure in the universe; origin and eventual fate of the universe; interpretation of observational data as it relates to baryonic matter, Dark Matter and cosmological models with Dark Energy.  
Prerequisite: ASTR 314.

ASTR 420 Advanced Astrophysical Research Methods  
Credits 3. 3 Lecture Hours.  
Advanced research techniques used by modern-day astronomers to obtain, process and analyze data from grounds and space-based telescopes.  
Prerequisites: Grade of C or better in ASTR 320 or approval of instructor.

ASTR 485 Directed Studies  
Credits 1 to 12. 1 to 12 Other Hours.  
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum.  
Prerequisite: Approval of department head.

ASTR 489 Special Topics in...  
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified topic of astronomy. May be repeated for credit.  
Prerequisite: Approval of instructor.

ASTR 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in astronomy. May be repeated for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

ATMO - Atmospheric Sciences (ATMO)

ATMO 201 Weather and Climate  
Credits 3. 3 Lecture Hours.  
Structure, energy, and motions of the atmosphere; climate; fronts and cyclones; atmospheric stability; clouds and precipitation; severe storms.

ATMO 202 Weather and Climate Laboratory  
Credit 1. 2 Lab Hours.  
Practical laboratory experiments and exercises, conducted in the meteorology and computer laboratories, concerning the fundamental physical processes underlying atmospheric phenomena, and the collection, display and interpretation of meteorological information. For non-majors only.

ATMO 203 Weather Forecasting Laboratory  
Credit 1. 2 Lab Hours.  
Short-range weather forecasting practice; numerical guidance; weather map analysis and discussions.  
Prerequisite: ATMO 201 or concurrent enrollment.

ATMO 251 Weather Observation and Analysis  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Standard and experimental weather observing techniques; subjective and objective analysis; application of conceptual models; simple kinematic and dynamic constraints.  
Prerequisite: ATMO 203 or concurrent enrollment.

ATMO 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Offered to enable majors in meteorology to undertake and complete with credit in their particular fields of specialization limited investigations not covered by any other courses in established curriculum.  
Prerequisite: Freshman or sophomore classification.

ATMO 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of meteorology. May be repeated for credit.  
Prerequisite: Approval of instructor.

ATMO 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in atmospheric sciences. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

ATMO 320 Astrophysical Research Methods  
Credits 3. 3 Lecture Hours.  
Standard and experimental weather observing techniques; subjective and objective analysis; application of conceptual models; simple kinematic and dynamic constraints.  
Prerequisite: ATMO 203 or concurrent enrollment.

ATMO 321 Computer Applications in the Atmospheric Sciences  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Introduction to technical computing methods in the atmospheric sciences; use of specialized software and data analysis systems for meteorological applications.
ATMO 324 Physical and Regional Climatology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Climate causes; global and surface energy balance; hydrologic cycle; general circulation; climate change; climate data analysis.  
**Prerequisites:** ATMO 201 and ATMO 203; MATH 308 or registration therein or approval of instructor; ATMO 321 or equivalent; junior or senior classification.

ATMO 326 Environmental Atmospheric Science  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Basic concepts of meteorology as needed in environmental sciences; patterns of meteorological and climatic elements and their relevance in terrestrial ecology and urban sciences; solar and wind energy physics; practical experience in use of instruments to measure micro-climates as they relate to meteorological conditions and analysis of data.  
**Prerequisites:** ATMO 201 or GEOG 203, or approval of instructor.

ATMO 335 Atmospheric Thermodynamics  
Credits 3. 3 Lecture Hours.  
Application of thermodynamics to Earth's atmosphere; phase changes of water; stability concepts; introduction to physical chemistry.  
**Prerequisites:** CHEM 120; MATH 251; PHYS 206.

ATMO 336 Atmospheric Dynamics  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Kinematic concepts and relationships; equations of motion; geostrophic and accelerated motions; the vorticity equation and Rossby waves.  
**Prerequisites:** ATMO 321, ATMO 335, and MATH 308, or concurrent enrollment; junior or senior classification.

ATMO 352 Severe Weather and Mesoscale Forecasting  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Parcel theory for dry and moist convection; sounding diagrams and their application to atmospheric convection; organization of midlatitude convection and severe weather; thunderstorm forecasting.  
**Prerequisite:** MATH 152 or MATH 172.

ATMO 356 Introduction to Atmospheric Chemistry and Air Pollution  
Credits 3. 3 Lecture Hours.  
Descriptive introduction of the composition and chemistry of natural and pollutant compounds in the atmosphere; transport, cycling and reactivity of atmospheric material; atmospheric measurements, data processing, air quality and human health issues; air pollution trends and climate change.  
**Prerequisites:** CHEM 119 and CHEM 120 or approval of instructor.

ATMO 370 Student Experiences Abroad in Meteorology  
Credits 1 to 4. 1 to 4 Other Hours.  
Observation, study and analysis of meteorological phenomena and processes in the regional settings in which they occur; study-abroad experiences.  
**Prerequisite:** ATMO 201 or concurrent enrollment.

ATMO 435 Synoptic-Dynamic Meteorology  
Credits 3. 3 Lecture Hours.  
Dynamics and diagnosis of synoptic-scale systems; perturbation theory and baroclinic instability; wave energetics, frontogeneses.  
**Prerequisites:** ATMO 336 or equivalent; MATH 308.

ATMO 441 Satellite Meteorology and Remote Sensing  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Introduction to satellite orbit dynamics, atmospheric radiative transfer, atmospheric remote sensing methods, and analysis and application of remotelysensed meteorological data.  
**Prerequisites:** ATMO 324, MATH 308; junior or senior classification.

ATMO 443 Radar Meteorology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Principles of radar theory, hardware, operations and analysis using real-time radar and computer-based case studies; conventional, Doppler and polarimetric weather radar; precipitation estimation, hydrometeor identification and air motion analysis; observations and analyses of thunderstorms, mesocyclones, tornadoes and gust fronts.  
**Prerequisites:** ATMO 352; PHYS 207 or PHYS 219.

ATMO 446 Physical Meteorology  
Credits 3. 3 Lecture Hours.  
Physics and meteorology of clouds and precipitation; atmospheric electricity; radiative transfer.  
**Prerequisite:** ATMO 335.

ATMO 455 Numerical Weather Prediction  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Basic principles of computer models of the atmosphere; parameterizations; use and critical evaluation of models and model output.  
**Prerequisites:** MATH 308; ATMO 336 or registration therein.

ATMO 456 Practical Weather Forecasting  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
Advanced weather forecasting techniques with application to a variety of forecasting problems, both public and private sector.  
**Prerequisites:** ATMO 435 or registration therein; junior or senior classification.

ATMO 459 Tropical Meteorology  
Credits 3. 3 Lecture Hours.  
Tropical climatology; structure, evolution, and motion of tropical cyclones; tropical cyclone hazards; large-scale tropical phenomena.  
**Prerequisites:** ATMO 336; ATMO 352 or concurrent enrollment.

ATMO 461 Broadcast Meteorology  
Credit 1. 2 Lab Hours.  
Instruction in the practice of broadcast meteorology; practice in and preparation of weather forecast products and demonstration videotapes. May be taken two times for credit with faculty advisor approval.  
**Prerequisites:** ATMO 335 or registration therein; MATH 308 or registration therein; junior or senior classification.

ATMO 463 Air Quality  
Credits 3. 3 Lecture Hours.  
Atmospheric pollution sources, transport, sinks, and effects; monitoring of air pollutant emissions and of ambient concentrations; use of models to simulate air pollution; regulation of emissions and ambient concentrations; greenhouse gas emissions regulations.  
**Prerequisite:** CHEM 119 or CHEM 107 or approval of instructor; junior or senior classification.

ATMO 464 Laboratory Methods in Atmospheric Sciences  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Instruction in chemical techniques used to monitor the atmosphere and other earth systems; sampling strategies; survey of current literature focusing on development of new techniques.  
**Prerequisites:** CHEM 119 and one semester of calculus (MATH 171 or equivalent).
ATMO 484 Internship
Credits 0 to 3. 0 to 3 Other Hours.
Supervised internship at National Weather Service or in broadcast meteorology or elsewhere with faculty advisor approval; must complete a report and have a letter from supervisor for credit. May be taken three times for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: ATMO 251; approval of faculty advisor.

ATMO 485 Directed Studies
Credits 1 to 23. 1 to 23 Other Hours.
Offered to enable majors in meteorology to undertake and complete with credit in their particular fields of specialization limited investigations not covered by any other courses in established curriculum.
Prerequisite: Junior or senior classification.

ATMO 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of meteorology. May be repeated for credit.

ATMO 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in atmospheric sciences. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

ATTR - Athletic Training (ATTR)

ATTR 201 Field Experience in Athletic Training I
Credit 1. 4 Lab Hours.
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in professional behaviors, injury prevention and risk management.
Prerequisite: Kinesiology majors.

ATTR 202 Field Experience in Athletic Training II
Credit 1. 4 Lab Hours.
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in recognition and evaluation of common injuries and illnesses and their management.
Prerequisite: Grade of B or better in ATTR 201.

ATTR 301 Field Experience in Athletic Training I
Credit 1. 4 Lab Hours.
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in the treatment and rehabilitation of athletic injuries.
Prerequisite: Grade of B or better in ATTR 202.

ATTR 302 Field Experience in Athletic Training II
Credit 1. 4 Lab Hours.
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in athletic training administration; exploration of policy and position statements; professional development.
Prerequisite: Grade of B or better in ATTR 301.

BAEN - Biological & Ag Engr (BAEN)

BAEN 201 Analysis of Biological and Agricultural Engineering Problems
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Overview of Biological and Agricultural Engineering discipline through case studies and engineering design problems; introduction to engineering design utilizing computer programming, 3-D computer-aided modeling and 2-D engineering drawings; introduction to manufacturing processes.
Prerequisites: Grade of C or better in ENGR 102; grade of C or better in MATH 151; grade of C or better in CHEM 107 and CHEM 117, or CHEM 102 and CHEM 112, or CHEM 120.

BAEN 281 Professional Development Seminar
Credit 1. 1 Lecture Hour.
Familiarization with engineering design process used in professional environments where BAEN and AGSM graduates are employed; discussion of professional development topics; improvement of technical communication skills. May be taken 4 times for credit.

BAEN 284 Internship
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
No Credit. Practical experience working in a professional biological and agricultural engineering setting. May be taken three times.
Prerequisite: Freshman or sophomore classification; approval of the instructor.

BAEN 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Selected problems in any phase of agricultural engineering; credit and specific content dependent upon background, interest, ability and needs of student enrolled; individual consultations and reports required.
Prerequisites: Freshman or sophomore classification; approval of department head.

BAEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

BAEN 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in biological and agricultural engineering.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BAEN 301 Biological and Agricultural Engineering Fundamentals I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamental engineering concepts related to agricultural systems including the environment (soil, water, and air), plant and animal production systems and processing, and associated machines and facilities; application of techniques for data collection and analysis to problems in biological and agricultural engineering; design of experiments and communication of experimental results.
Prerequisite: Grade of C or better in MEEN 221 or concurrent enrollment.
BAEN 302 Biological and Agricultural Engineering Fundamentals II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of microbiology and biochemistry as they apply to biological and agricultural engineering systems to produce useful products and/or benign wastes; topics include microbiology, chemistry of biomolecules, microbial metabolism, bioenergetics, kinetics, mass transfer, bioreactor design, bioprocesses, and downstream processing. 
Prerequisites: Grade of C or better in BIOL 113 or BIOL 111; Grade of C or better in CHEM 222 or CHEM 227 or concurrent enrollment.

BAEN 320 Engineering Thermodynamics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
First and second laws of thermodynamics; properties of pure substances; analysis of closed and open systems; applications to steady-flow and non-flow processes; power and refrigeration cycles; psychrometrics. 
Prerequisites: Grade of C or better in BIOL 113 or BIOL 111; Grade of C or better in CHEM 222 or CHEM 227 or concurrent enrollment.

BAEN 340 Fluid Mechanics
Credits 3. 3 Lecture Hours.
Fundamentals of fluid properties; basic conservation principles of momentum, energy and continuity; flow through closed conduits; open channel flow; principles of turbomachines and compressible flow. 
Prerequisites: Grade of C or better in MEEN 221 or CVEN 221; grade of C or better in MATH 251 or MATH 253 or concurrent enrollment.

BAEN 354 Engineering Properties of Biological Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Relationships between composition, structure and properties of biological materials; definition and measurement of mechanical, physical, thermal and other material properties; variability of properties; application of properties to engineering analysis and design of biological and agricultural processes and systems. 
Prerequisite: Grade of C or better in MEEN 221; grade of C or better in BAEN 320 or concurrent enrollment.

BAEN 365 Unit Operations for Biological and Agricultural Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theoretical and practical understanding of basic unit operations required to design processes and equipment in the agricultural, biological, environmental, and food industries, with unique constraints presented by biological and agricultural systems considered in design of all units. 
Prerequisites: Grade of C or better in BAEN 340; grade of C or better in CVEN 305 or concurrent enrollment; junior or senior classification.

BAEN 366 Transport Processes in Biological Systems
Credits 3. 3 Lecture Hours.
Basic principles governing transport of energy and mass; application of these principles to analysis and design of processes involving biological, environmental and agricultural systems. 
Prerequisites: Grade of C or better in BAEN 320, BAEN 340, and BAEN 365 or concurrent enrollment; grade of C or better in MATH 308; junior or senior classification.

BAEN 370 Measurement and Control of Biological Systems and Agricultural Processes
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Theory and application of sensors and techniques in the design of systems for automatic control in biological systems and agricultural production and processing; sensor operation; signal processing; control techniques; automation and robotics. 
Prerequisite: Grade of C or better in ECEN 215.
BAEN 431/CHEN 431 Fundamentals in Bioseparations
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design principles and application of chemical engineering unit operations to the production of therapeutic and bioactive molecules.
Prerequisite: Grade of C or better in BAEN 302, BMEN 282, CHEN 282, or CHEN 482.
Cross Listing: CHEN 431/BAEN 431.

BAEN 460 Principles of Environmental Hydrology
Credits 3. 3 Lecture Hours.
Hydrologic cycle; precipitation, evaporation, evapotranspiration, infiltration, percolation, runoff, streamflow; groundwater and surface water flow; transport of contaminants in surface water; measurement and analysis of hydrologic data for engineering design.
Prerequisites: Grade of C or better in BAEN 340.

BAEN 464 Irrigation and Drainage Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Engineering principles and design of both surface and pressurized irrigation systems; introduction to the design of surface and subsurface drainage systems including crop water requirements, soil moisture, irrigation scheduling, surface irrigation, sprinkler irrigation, trickle irrigation, pumps, pipelines, irrigation canals, irrigation wells, and surface and subsurface drainage.
Prerequisite: Grade of C or better in BAEN 340.

BAEN 465 Design of Biological Waste Treatment Systems
Credits 3. 3 Lecture Hours.
Management and treatment of high organic content wastes, with emphasis on agricultural and food processing wastes; engineering design of biological waste treatment processes; regulatory aspects affecting management of agricultural wastes.
Prerequisites: Grade of C or better in BIOL 113 or BIOL 111 and CHEM 222 or CHEM 227, or BAEN 302.

BAEN 468 Soil and Water Conservation Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Engineering principles of soil and water conservation; open channel flow principles, hydraulic grade stabilization, erosion control, storm water management, design of structures for floodwater routing, culvert design, design of waterways and agricultural reservoirs, stream bank protection, water quality assessment, groundwater flow, surface water modeling.
Prerequisites: Grade of C or better in BAEN 340.

BAEN 469 Water Quality Engineering
Credits 3. 3 Lecture Hours.
Nonpoint source pollution processes including transport mechanisms and contaminant fate; design of best management practices for abating nonpoint source pollution.
Prerequisites: Grade of C or better in BAEN 340 or equivalent.

BAEN 471/CHEN 471 Bioreactor Engineering
Credits 3. 3 Lecture Hours.
Fundamentals of microbial and enzyme kinetics; basic biochemical reaction theory and reactor systems; heterogeneous reactions and transport considerations in enzyme and cell reactors, and immobilized systems; bioreactor design considerations in bioprocessing.
Prerequisite: Grade of C or better in CHEN 282, CHEN 482, or BAEN 302; junior or senior classification or approval of instructor.
Cross Listing: CHEN 471/BAEN 471.

BAEN 477 Air Pollution Engineering
Credits 3. 3 Lecture Hours.
Design of air pollution abatement equipment and systems to include cyclones, bag filters and scrubbers; air pollution regulations; permitting; dispersion modeling; National Ambient Air Quality Standards.
Prerequisite: Grade of C or better in BAEN 340, CVEN 311/EVEN 311, or MEEN 344.
Cross Listing: MEEN 477 and SENG 477.

BAEN 479 Biological and Agricultural Engineering Design I
Credits 3. 3 Lecture Hours.
Capstone design project selection from problems posed by biological and agricultural engineers in industrial practice; completion of project feasibility study and outline; design philosophy, teamwork and communication; economics; product liability and reliability; use of standards and codes; goal setting, professional development, and time management; project to be completed in BAEN 480.
Prerequisites: Grade of C or better in BAEN 340 and BAEN 365; grade of C or better in BAEN 366 or BAEN 370; Grade of C or better in BAEN 354 and BAEN 375 or concurrent enrollment.

BAEN 480 Biological and Agricultural Engineering Design II
Credits 3. 6 Lab Hours.
Continuation of engineering design experience through team solution of design problem developed in BAEN 479; preparation of design solution under supervision of biological and agricultural engineering staff and clients; critical evaluation of results by students; staff and industrial consultants.
Prerequisites: Grade of C or better in BAEN 479.

BAEN 481 Seminar
Credit 1. 1 Other Hour.
Review of current literature dealing with agricultural engineering problems presented by staff members and students.
Prerequisite: Senior classification.

BAEN 484 Internship
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
No Credit. Practical experience working in a professional biological and agricultural engineering setting. May be taken three times.
Prerequisite: Junior or senior classification; approval of the instructor.

BAEN 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Selected problems in any phase of agricultural engineering. Credit and specific content dependent upon background, interest, ability and needs of student enrolled. Individual consultations and reports required.
Prerequisites: Junior or senior classification and approval of department head.

BAEN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural engineering. May be repeated for credit.
Prerequisite: Approval of department head.

BAEN 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in biological and agricultural engineering. May be repeated 2 times for credit.
Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.
BEFB-Bilingual Ed Field Based (BEFB)

**BEFB 425 Student Teaching in Hispanic Bilingual Education**  
Credits 3. 3 Lecture Hours.  
Observation and participation in Hispanic bilingual education classroom activity; supervised student teaching in accredited school. Must be taken on a satisfactory/unsatisfactory basis.  
**Prerequisites:** 2.5 GPA in teaching fields and professional development; approval of department head; senior classification. Must be taken concurrently with BEFB 426.

**BEFB 426 Effective Instruction of Hispanic Students of Diverse Abilities**  
Credits 3. 3 Lecture Hours.  
Field-based application of effective instructional strategies for teaching Hispanic bilingual students of diverse abilities. Must be taken on a satisfactory/unsatisfactory basis.  
**Prerequisites:** 2.5 GPA in teaching fields and professional development; approval of department head. Must be taken concurrently with BEFB 425.

**BEFB 470 Bilingual Assessment and Monitoring**  
Credits 3. 3 Lecture Hours.  
Assessment of language ability for second language learners; assessment instruments in bilingual/ESL programs; scoring and evaluation of second language assessment instruments.  
**Prerequisites:** Junior or senior classification; BEFB 472 and BEFB 474. Must be taken concurrently with BEFB 476.

**BEFB 472 Bilingual and Dual Language Methodologies**  
Credits 3. 3 Lecture Hours.  
Use of theory and effective teaching practice in promoting student's development of strong social and academic skills; relationship of culture to language.  
**Prerequisites:** Junior or senior classification. Must be taken concurrently with BEFB 474.

**BEFB 474 Biliteracy for Bilingual and Dual Language Classrooms**  
Credits 3. 3 Lecture Hours.  
Social and linguistic characteristics of second language learners influencing literacy skills; reading and literature instruction for second language learners; reading and writing process across the curriculum for second language learners.  
**Prerequisites:** Junior or senior classification. Must be taken concurrently with BEFB 474.

**BEFB 476 Content Area Instruction for Bilingual Programs**  
Credits 3. 3 Lecture Hours.  
Use of theory and various approaches for integrating English as a second language; learning strategies relating to how plans, procedures and units engage language teachers, students and learning environments.  
**Prerequisites:** Junior or senior classification. Must be taken concurrently with BEFB 474.

**BEFB 482 Seminar in Teachers as Effective Communicators**  
Credit 1. 1 Lecture Hour.  
Effective communication techniques for working with learners, colleagues, administrators and stakeholders; professional and social linguistic protocols for bilingual education teachers.  
**Prerequisites:** Junior or senior classification; concurrent enrollment in BEFB 472 and BEFB 474.

BESC - Bioenvironmental Sci (BESC)

**BESC 201 Introduction to Bioenvironmental Sciences**  
Credits 3. 3 Lecture Hours.  
A broad survey of environmental science with an emphasis on scientific literacy, current events, global and international issues and historic context.

**BESC 204 Molds and Mushrooms: The Impact of Fungi on Society and the Environment**  
Credits 3. 3 Lecture Hours.  
Introduction to the fungi and the impact these organisms have on society and the environment; includes life cycles of fungi, classification schemes, pathogens of plants, animals and humans, fungi in food production; toxic fungi and the law; and others.

**BESC 285 Directed Studies**  
Credits 1 to 4. 1 to 4 Other Hours.  
Individually supervised research or advanced studies for lower-division undergraduate students to independently investigate special problems not available in existing courses.  
**Prerequisite:** Approval of instructor in consultation with departmental advisor.

**BESC 291 Research**  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in bioenvironmental sciences. May be repeated 3 times for credit.  
**Prerequisites:** Freshman or sophomore classification and approval of instructor.

**BESC 311 International Perspectives on Environmental Issues**  
Credits 3. 3 Lecture Hours.  
The role of the United Nations and other institutions that promote international cooperation toward sustainable development goals; influence of cultural views on critical thinking about environmental issues, including population, water and agriculture, biodiversity and energy.  
**Prerequisite:** Junior or senior classification or approval of instructor; must attend two mandatory pre-departure meetings.

**BESC 314 Pathogens, the Environment and Society**  
Credits 3. 3 Lecture Hours.  
The impact of microorganisms (bacteria, fungi and viruses) on the development of modern culture and society; the role pathogens played in the history of mankind and the influence of the changing environment on emerging diseases.  
**Prerequisite:** Junior or senior classification.

**BESC 320 Water and the Bioenvironmental Sciences**  
Credits 3. 3 Lecture Hours.  
Critical understanding of salient issues relating to fresh water as a limited and important bioenvironmental resource.  
**Prerequisite:** Junior or senior classification.

**BESC 357 Biotechnology for Biofuels and Bioproducts**  
Credits 3. 3 Lecture Hours.  
Biotechnology issues in developing bioenergy as a renewable energy source; emphasis on the three generations of bioenergy and enabling technologies; special topics include recent advances in bioenergy research, government policy, and industrial development.  
**Prerequisite:** BESC 201 and junior or senior classification.
BESC 367 U.S. Environmental Regulations
Credits 3. 3 Lecture Hours.
Investigation of the legal infrastructure of the U.S. associated with regulating environmental impacts; examination of major U.S. environmental statutes associated with air and water quality, toxic substances, waste and hazardous substance release, energy and natural resources; review the relationship between U.S. policy and international environmental regulations.
Prerequisites: BESC 201 or GEOS 105.

BESC 401 Bioenvironmental Microbiology
Credits 3. 3 Lecture Hours.
The interactions of microorganisms in diverse environments; applied aspects of microbial interactions in the environment, their effects on the environment, and potential use to solve environmental problems.
Prerequisites: CHEM 222 or CHEM 227; or approval of instructor.

BESC 402 Microbial Processes in Bioremediation
Credits 3. 3 Lecture Hours.
Metabolic pathways of microbes involved in the biodegradation of hazardous materials; ecological requirements for biotreatability of contaminated sites; emphasis on factors affecting microbial growth; strategies for in situ bioaugmentation.
Prerequisite: CHEM 222 or CHEM 227.

BESC 403 Sampling and Environmental Monitoring
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to environmental sampling and methodology; strategies and analyses of sampling data; overview of current applications of sampling and monitoring in the environmental sciences; emphasis on practical aspects of sampling from air, soil and water; detection and quantification of microbial and chemical unknowns in environmental media.
Prerequisite: Junior or senior classification or approval of instructor.

BESC 411 Environmental Health and Safety Compliance
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Investigation of various Environmental Health and Safety (EHS) practices necessary for compliance with state and federal regulations; reinforcement of real-world understanding; tour several regulated facilities on campus and learn about the particular TAMU-EHS compliance management strategies for each (utilities, underground storage tanks, wastewater treatment and hazardous waste facility).
Prerequisite: BESC 367 or similar regulation intensive course and approval of instructor.

BESC 481 Seminar
Credit 1. 1 Lecture Hour.
Capstone course for topics in bioenvironmental sciences; critical analysis of environmental issues through written themes and presentations. May be taken three times for credit.
Prerequisites: BESC 201 and senior classification in BESC major.

BESC 484 Field Experience
Credits 1 to 4. 1 to 4 Other Hours.
An on-the-job supervised experience program conducted in the area of the student's specialization.
Prerequisite: Junior or senior classification or approval of department head.

BESC 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special problems for advanced undergraduates to permit study of subject matter not available in existing courses.
Prerequisite: BESC 201 or approval of instructor.

BESC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
Selected topics in an identified area of bioenvironmental sciences. May be repeated for credit.
Prerequisite: BESC 201 or approval of instructor.

BESC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in bioenvironmental sciences. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

BICH - Biochemistry (BICH)

BICH 101/GENE 101 Perspectives in Biochemistry and Genetics
Credit 1. 1 Lecture Hour.
Introduction to biochemistry and genetics and their relationship to the biological, biophysical and chemical sciences.
Prerequisite: Biochemistry and genetics major or approval of instructor.
Cross Listing: GENE 101/BICH 101.

BICH 281 Seminar in Biochemical Research
Credit 1. 1 Lecture Hour.
Round table discussions with visiting seminar speakers; review current literature; topics including cutting edge research in biochemistry.
Prerequisites: BICH 107 and freshman or sophomore classification in biochemistry or approval of instructor.

BICH 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Introduction to laboratory research.
Prerequisite: Freshman or sophomore classification in biochemistry or approval of instructor.

BICH 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of biochemistry. May be repeated for credit.
Prerequisite: Freshman or sophomore classification in biochemistry or approval of instructor.

BICH 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in Biochemistry. May be taken three times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor; biochemistry majors only.

BICH 303 Elements of Biological Chemistry
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Survey of the biochemical sciences designed for the non-biochemistry major; overview of the chemistry and metabolism of biologically important molecules, the biochemical basis of life processes, cellular metabolism and regulation. Students requiring biochemistry in greater depth should register for BICH 410 and BICH 411.
Prerequisite: CHEM 222 or CHEM 227; not open to biochemistry majors.

BICH 403 Cellular Biophysics
Credits 3. 3 Lecture Hours.
Current topics in cellular biophysics and systems biology; quantitative and predictive perspectives of cellular life; basic tools of biophysics such as fluorescence imaging and data analysis.
Prerequisites: BIOL 112 and MATH 152; BICH 440 or concurrent enrollment.
BICH 404 Biochemical Calculations
Credits 2. 2 Lecture Hours.
Quantitative and computational approaches to biochemical problems.
Prerequisites: Grade of C or better in BICH 440 or concurrent enrollment; junior or senior classification.

BICH 406 Molecular Mechanisms of Cell Interactions
Credits 3. 3 Lecture Hours.
Current topics in biomolecules, natural product antibiotics and application in infectious diseases, modern and historical approaches to antibiotic discovery, biomedical glycombology, glycosylation in diseases and pathobiology.
Prerequisites: BICH 441.

BICH 407 Horizons in Biological Chemistry II
Credit 1. 1 Lecture Hour.
Application of formal classroom instruction; applied view of biochemical concepts; use of biochemical principles to ascertain, evaluate, and make judgments on research information. May be taken five times.
Prerequisite: BICH 411 or BICH 441.

BICH 409 Principles of Biochemistry
Credits 3. 3 Lecture Hours.
A rigorous survey of topics in biochemistry; topics include structure and function of molecules within living cells, major metabolic pathways and their regulation and role in disease; provides preparation for advanced study in the health sciences.
Prerequisite: CHEM 228.

BICH 410 Comprehensive Biochemistry I
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Structure, function and chemistry of proteins and carbohydrates; kinetics, mechanisms and regulation of enzymes; metabolism of carbohydrates.
Not open to biochemistry or genetics majors.
Prerequisite: CHEM 228 or approval of instructor.

BICH 411 Comprehensive Biochemistry II
Credits 3. 3 Lecture Hours. 1 Lab Hour.
A continuation of BICH 410. Structure, function, chemistry and metabolism of lipids and nucleic acids; cellular metabolism viewed from the standpoint of energetics and control mechanisms; interrelationships of metabolic pathways. Not open to biochemistry or genetics majors.
Prerequisite: BICH 410.

BICH 412 Biochemistry Laboratory I
Credit 1. 3 Lab Hours.
Selected methods used to identify, isolate, purify and characterize biomolecules. Not open to biochemistry or genetics majors.
Prerequisite: BICH 410 or registration therein.

BICH 414 Biochemical Techniques I
Credits 2. 6 Lab Hours.
Techniques currently used in biochemistry such as spectrophotometry, column chromatography (gel filtration, ion exchange) electrophoresis and immunoelectrophoresis, performed in purification of proteins, enzymes and nucleic acids. For majors in biochemistry, genetics, molecular and cell biology and microbiology.
Prerequisite: BICH 440 or BICH 410.

BICH 419/GENE 419 Computational Techniques for Evolutionary Analysis
Credits 3. 3 Lecture Hours.
Computational techniques for studying evolution; algorithms for construction and analysis of evolutionary relationships.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: GENE 419/BICH 419.

BICH 431/GENE 431 Molecular Genetics
Credits 3. 3 Lecture Hours.
Molecular basis for inheritance; gene structure and function, chromosomal organization, replication and repair of DNA, transcription and translation, the genetic code, regulation of gene expression, genetic differentiation and genetic manipulations.
Prerequisites: BICH 410 or BICH 440; GENE 301 or GENE 302 or GENE 320/BIMS 320.
Cross Listing: GENE 431/BICH 431.

BICH 432/GENE 432 Laboratory in Molecular Genetics
Credits 2. 6 Lab Hours.
Laboratory for molecular genetics providing technical experience with tools of molecular biology.
Prerequisite: GENE 301, GENE 302, or GENE 320/BIMS 320; BICH 431/GENE 431 or GENE 431/BICH 431.
Cross Listing: GENE 432/BICH 432.

BICH 440 Biochemistry I
Credits 3. 3 Lecture Hours.
Rigorous treatment of the structure, function and chemistry of proteins and carbohydrates; kinetics, mechanisms and regulation of enzymes; metabolism of carbohydrates. Course designed for biochemistry and genetics majors and honors students only.
Prerequisite: Grade of C or better in CHEM 228 and concurrent enrollment in BICH 404, or approval of instructor.

BICH 441 Biochemistry II
Credits 3. 3 Lecture Hours.
Continuation of BICH 440; structure, function, chemistry and metabolism of lipids and nucleic acids, cellular metabolism viewed from the standpoint of energetics and control mechanisms; interrelationships of metabolic pathways. Course designed for biochemistry and genetics majors and honors students only.
Prerequisite: Grade of C or better in BICH 440.

BICH 450/BIOL 450 Genomics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
The study of genomic data includes consideration of the logic behind the most important genomic approaches, as well as their capabilities and limitations in investigating biological processes; the science of accessing and manipulating genomic data; and practical applications, including development of an hypotheses-driven datamining experiment.
Prerequisites: BIOL 213, GENE 301 or GENE 302, BICH 431/GENE 431 or GENE 431/BICH 431; or BIOL 351; junior or senior classification or approval of instructor.
Cross Listing: BIOL 450/BICH 450.

BICH 456 RNA World
Credits 3. 3 Lecture Hours.
Emphasizes novel roles and mechanisms of newly discovered RNA species including non-coding RNA’s; RNA silencing, circular RNA’s, RNA guided epigenetic regulation, clustered regulatory interspaced short palindromic repeats (CRISPR)-Cas immunity, genome editing, telomerase biogenesis, riboswitches, exosome, editosome and RNA remodeling.
Prerequisites: GENE 301 or GENE 302, BICH 410, BICH 440, BIOL 351, or BIOL 413.

BICH 460 Genome Annotation with Ontologies
Credit 1. 2 Lab Hours.
Use of ontologies as structured controlled vocabularies for the organization of biological data; annotation based on critical reading of the scientific literature. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
Prerequisite: Special roles of animals.
Animal, human and environmental health of common species as well as special roles of animals.

BIMS 125 Animals in Society
Credit 1. 2 Lab Hours.
Introduction to integration of humans and animals in society, focusing on animal, human and environmental health of common species as well as special roles of animals.
Prerequisite: Freshman classification.

BIMS 201 Introduction to Phenotypic Expression in the Context of Human Medicine
Credit 2. 2 Lecture Hours.
Study of human genetics with respect to gene expression as it pertains to the cell cycle, development, cancer, aging and epigenetics; discussions and debates surrounding medical examples and case studies.
Prerequisite: BIOL 112, CHEM 227; or approval of instructor.

BIMS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of biomedical science. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BIMS 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in biomedical sciences. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BIMS 301 Biomedical Sciences Study Abroad
Credits 2 to 12. 2 to 12 Lecture Hours.
For students in approved programs abroad. May be repeated for credit. Maximum 3 hours free elective credit in the BIMS degree plan. Must be taken on a satisfactory/unsatisfactory basis.

BIMS 320/GENE 320 Biomedical Genetics
Credit 3. 3 Lecture Hours.
Fundamental genetic principles as applied to biomedical science; Mendelian inheritance, linkage and genetic mapping, mutagenesis and pedigree analysis; molecular basis of gene function and inherited disease; gene therapy and genetic counseling. Only one of the following will satisfy the requirements for a degree: GENE 301, GENE 302, GENE 315 or GENE 320/BIMS 320.
Prerequisites: Junior or senior classification; BIMS major with a minimum overall 2.5 TAMU GPA.
Cross Listing: GENE 320/BIMS 320.

BIMS 392 Cooperative Education in Biomedical Science
Credits 2 to 20. 20 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be assigned. May be repeated for credit.
Prerequisites: Approval of the college coordinator of cooperative education; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 405/GENE 405 Mammalian Genetics
Credit 3. 3 Lecture Hours.
Comparative mammalian genetic systems with emphasis on laboratory animals; organization and expression of mammalian genes; development and use of genetically defined animals in biomedical and genetic research.
Prerequisites: GENE 301, BIMS 320/GENE 320 or GENE 320/BIMS 320; junior or senior classification.
Cross Listing: GENE 405/BIMS 405.
BIMS 421/GENE 421 Advanced Human Genetics
Credits 3. 3 Lecture Hours.
A rigorous, analytical approach to genetic analysis of humans including diagnosis and management of genetic disease in humans; transmission of genes in human populations; human cytogenetics; the structure of human genes; human gene mapping; molecular analysis of genetic disease; genetics screening and counseling.
Prerequisites: GENE 302; BICH 410 or BICH 440.
Cross Listing: GENE 421/BIMS 421.

BIMS 481 Seminar in Biomedical Science
Credit 1. 1 Other Hour.
Recent advances in biomedical sciences.
Prerequisites: Junior or senior classification in life sciences majors; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 484 Biomedical Science Field Experience
Credits 2. 2 Other Hours.
On-the-job training in the Biomedical Science industry; development of objectives and goals; evaluation by supervisor required.
Prerequisite: Approval of department head; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of problems in the biomedical sciences with emphasis in the allied health professions, hospital administration, and the health-related industry approved by the instructor.
Prerequisites: Junior or senior classification; approval of instructor; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of biomedical science. May be repeated for credit.
Prerequisite: Junior or senior classification; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 491 Research
Credits 0 to 12. 0 to 12 Other Hours.
Research conducted under the direction of faculty member in biomedical sciences. May be repeated 2 times for credit.
Prerequisites: 2.5 overall TAMU GPA; grade of C or S or better in a directed studies or research course in the college of veterinary medicine and biomedical sciences or approval of instructor; junior or senior classification and approval of instructor.

BIOL - Biology (BIOL)

BIOL 100 Horizons in Biology
Credits 0-1. 0-1 Lecture Hours.
Introduction to the study of biology at Texas A&M University; gain knowledge of departmental and campus resources to assist and enhance the pursuit of a degree in biology, microbiology, molecular and cellular biology or zoology.
Prerequisites: First-year and first-time-in-college freshman majoring in BIOL, MBIO, BMCB and ZOOL.

BIOL 101 Botany
Credits 4. 3 Lecture Hours. 3 Lab Hours.
(BIOL 1311 and 111, BIOL 1411) Botany. Structure, physiology and development of plants with an emphasis on seed plants. (Not open to students who have taken BIOL 111 and BIOL 112 or BIOL 113); includes laboratory that reinforces and provides supplemental information related to the lecture topics.

BIOL 111 Introductory Biology I
Credits 4. 3 Lecture Hours. 3 Lab Hours.
(BIOL 1306 and 1106, 1406) Introductory Biology I. First half of an introductory two-semester survey of contemporary biology that covers the chemical basis of life, structure and biology of the cell, molecular biology and genetics; includes laboratory that reinforces and provides supplemental information related to the lecture topics; also taught at Galveston campus.

BIOL 112 Introductory Biology II
Credits 4. 3 Lecture Hours. 3 Lab Hours.
(BIOL 1307 and 1107, 1407) Introductory Biology II. The second half of an introductory two-semester survey of contemporary biology that covers evolution, history of life, diversity and form and function of organisms; includes laboratory that reinforces and provides supplemental information related to the lecture topics.
Prerequisite: BIOL 111; also taught at Galveston campus.

BIOL 113 Essentials in Biology
Credits 3. 3 Lecture Hours.
(BIOL 1308, BIOL 1408) Essentials in Biology. One-semester biology for non-majors; overview of essential biological concepts and their application to real world and contemporary issues; topics include evolution, biodiversity, cellular, molecular and forensic biology, genetics and heredity to scientific literacy, human impact on the environment, genetically modified organisms and emerging diseases.

BIOL 206 Introductory Microbiology
Credits 4. 3 Lecture Hours. 4 Lab Hours.
(BIOL 2320 and 2120, BIOL 2321 and 2121, BIOL 2420, BIOL 2421) Introductory Microbiology. Basic microbiology of prokaryotes and eukaryotes; main topics include morphology, physiology, genetics, taxonomy, ecology, medically important species and immunology; mandatory laboratory designed to give hands-on experience and to reinforce basic principles.
Prerequisites: BIOL 101, BIOL 107, BIOL 110, or BIOL 113; CHEM 119. May not be used for credit by biology, molecular and cell biology, microbiology, predentistry or premedicine majors.

BIOL 213 Molecular Cell Biology
Credits 3. 3 Lecture Hours.
Explores the molecular basis of cell structure, function and evolution; gene regulation, cell division cycle, cancer, immunity, differentiation, multicellularity and photosynthesis; may not take concurrently with, or after the completion of, BIOL 413.
Prerequisites: BIOL 112; CHEM 120.

BIOL 214 Genes, Ecology and Evolution
Credits 3. 3 Lecture Hours.
A genetically-based introduction to the study of ecology and evolution; emphasis on the interactions of organisms with each other and with their environment.
Prerequisite: BIOL 112.
BIOL 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Problems in various phases of plant, animal and microbial science.
Prerequisites: Freshman or sophomore classification; approval of ranking professor in field chosen and Undergraduate Advising Office.

BIOL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of biology. May be repeated for credit.
Prerequisite: Approval of instructor.

BIOL 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of faculty member.

BIOL 302 Careers in Biology
Credit 1. 1 Lecture Hour.
Development of job search skills; utilization of career resources; self-assessment of career interests and career objectives; strategies for professional correspondence and networking; business etiquette and interviewing techniques; insight into life science career opportunities.
Prerequisites: Junior or senior classification; department of biology majors only; or approval of instructor.

BIOL 318 Chordate Anatomy
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Classification, phylogeny, comparative anatomy, and biology of chordates; diversity, protochordates, vertebrate skeletons, shark and cat anatomy studied in laboratory.
Prerequisite: BIOL 214 or approval of instructor.

BIOL 319 Integrated Human Anatomy and Physiology I
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Integrated approach to cellular, neural, skeletal, muscular anatomy and physiology; includes some histology, histopathology, radiology and clinical correlations.
Prerequisite: BIOL 111 and BIOL 112, or BIOL 107.

BIOL 320 Integrated Human Anatomy and Physiology II
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Continuation of BIOL 319. Integrated approach to endocrine, cardiovascular, respiratory, digestive, urinary, reproductive and developmental anatomy and physiology; includes some histology, histopathology, radiology and clinical correlations.
Prerequisite: BIOL 319 or approval of instructor.

BIOL 335 Invertebrate Zoology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Morphology, taxonomy, natural history and phylogeny of invertebrate animals, with emphasis on biodiversity; class includes both lecture and lab. Labs include study of preserved material and demonstration of living animals in aquarium and terraria.
Prerequisite: BIOL 214 or approval of instructor.

BIOL 344 Embryology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to general and comparative embryology; molecular and cellular mechanisms of development; genetics and early development of selected invertebrates (C. elegans, Drosophila and sea urchin) and emphasis on vertebrates (frog, fish, chick and mouse).
Prerequisite: BIOL 213 or GENE 302.

BIOL 350 Computational Genomics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Hands-on approach to obtaining, organizing and analyzing genome-related data; emphasis on asking and answering biologically relevant questions by designing and performing experiments using computers; understanding biology from a computational perspective.
Prerequisite: Junior or senior classification in life sciences, engineering, mathematics, chemistry.

BIOL 351 Fundamentals of Microbiology
Credits 4. 3 Lecture Hours. 4 Lab Hours.
Introduction to modern microbiology with emphasis on prokaryotes; includes microbial cell structure, function, and physiology; genetics, evolution, and taxonomy; bacteriophage and viruses; pathogenesis and immunity; and ecology and biotechnology; includes laboratory experience with microbial growth and identification.
Prerequisites: BIOL 112; CHEM 227, and CHEM 237 or CHEM 231; or approval of instructor; also taught at Galveston campus.

BIOL 352 Diagnostic Bacteriology
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Practical experience in handling, isolation and identification of pathogenic microorganisms using biochemical tests and rapid identification techniques.
Prerequisite: BIOL 351 or approval of instructor.

BIOL 357 Ecology
Credits 3. 3 Lecture Hours.
Analysis of ecosystems at organismal, population, interspecific and community levels. BIOL 358 is the laboratory for this lecture course.
Prerequisite: BIOL 214 or approval of instructor.

BIOL 358 Ecology Laboratory
Credit 1. 3 Lab Hours.
Quantitative analyses of freshwater and terrestrial ecosystems; includes data sampling and presentation of results in written and oral formats; required fieldtrips; analysis of competition and predator-prey interactions using ecological models.
Prerequisite: BIOL 357 or concurrent enrollment; junior or senior classification.

BIOL 388 Principles of Animal Physiology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to how animals function, including basics of neurophysiology, endocrinology, muscular, cardiovascular, respiratory, endocrine, and metabolic physiology; broadly comparative in scope and encompassing adaptation of physiological systems to diverse environments; the laboratory stresses techniques used for monitoring and investigating physiological mechanisms and responses to environmental changes.
Prerequisites: BIOL 214 or CHEM 228 or approval of instructor.

BIOL 401 Critical Writing in Biology
Credit 1. 1 Lecture Hour.
Reading scientific papers and writing short synopses of papers with a focus on learning how to think and write like a scientist; fills the current Writing Intensive 'W' course requirement for biology.
Prerequisites: BIOL 213 and BIOL 214; junior or senior classification.

BIOL 402 Communicating Biological Research to the Public
Credit 1. 1 Lecture Hour.
Interpret scientific papers; analyze how research findings are communicated to lay audiences; write synopses of research findings for the general public.
Prerequisites: BIOL 213 and BIOL 214; junior or senior classification.
BIOL 405 Comparative Endocrinology  
Credits 3. 3 Lecture Hours.  
Basic principles of endocrinology including structure and functions of hormones in vertebrates; hormonal control of growth, metabolism, osmoregulation, and reproduction; endocrine techniques and mechanism of hormone action.  
Prerequisites: BIOL 214 and CHEM 227.  

BIOL 406/GENE 406 Bacterial Genetics  
Credits 3. 3 Lecture Hours.  
A problem oriented course surveying the manipulation and mechanisms of genetic systems in bacteria; recombination, structure and regulation of bacterial genes, plasmids and phages.  
Prerequisites: BIOL 351; GENE 302.  
Cross Listing: GENE 406/BIOI 406.  

BIOL 413 Cell Biology  
Credits 3. 3 Lecture Hours.  
Structure, function, and biogenesis of cells and their components; interpretation of dynamic processes of cells, including protein trafficking, motility, signaling and proliferation.  
Prerequisites: BIOL 213 or GENE 302; BICH 410 or BICH 440.  

BIOL 414 Developmental Biology  
Credits 3. 3 Lecture Hours.  
Concepts of development in systems ranging from bacteriophage to the mammalian embryo; use of recombinant DNA technology and embryo engineering to unravel the relationships between growth and differentiation, morphogenesis and commitment, aging and cancer.  
Prerequisite: BIOL 413 or concurrent enrollment or approval of instructor.  

BIOL 423 Cell Biology Laboratory  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Modern methods of study of cell structure and cell function.  
Prerequisites: BICH 410 and BIOL 413, or concurrent enrollment or approval of instructor.  

BIOL 430 Biological Imaging  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Still and video photography and photomicrography, computer-based digital image analysis and processing of biological images; theory and principles of light and electron microscopy including transmission and scanning electron microscopy; optical contrast methods for light microscopy including phase contrast, DIC, polarizing light and confocal laser scanning microscopy.  
Prerequisite: Junior classification or approval of instructor.  

BIOL 434/NRSC 434 Regulatory and Behavioral Neuroscience  
Credits 3. 3 Lecture Hours.  
Cell biology and biophysics of neurons; functional organization of the vertebrate nervous system; physiological basis of behavior.  
Prerequisites: BIOL 213; BIOL 319, BIOL 320, BIOL 388, BIOL 413, NRSC 235/PSYC 235, or PSYC 235/NRSC 235, or approval of instructor.  
Cross Listing: NRSC 434/BIOI 434.  

BIOL 435 Laboratory for Regulatory and Behavioral Neuroscience  
Credit 1. 3 Lab Hours.  
Study of modern methods and tools used to investigate nervous system structure and function.  
Prerequisite: BIOL 213; BIOL 319, BIOL 320, BIOL 388, BIOL 413, BIOL 434/NRSC 434, NRSC 434/BIOI 434, NRSC 235/PSYC 235, or PSYC 235/NRSC 235, or approval of instructor.  

BIOL 437 Molecular and Human Medical Mycology  
Credits 3. 3 Lecture Hours.  
Principles of fungal pathogenesis, diagnosis and antifungal therapies, and relevant genetic and molecular tools for studying human pathogens and drug delivery.  
Prerequisites: BIOL 351; junior or senior classification; or approval of instructor.  

BIOL 438 Bacterial Physiology  
Credits 3. 3 Lecture Hours.  
Structure and function of prokaryotic cells, with emphasis on evolutionary adaptations to different environmental, developmental, and pathogenic selections pressures; formation of teams and preparation of presentations on specific topics in microbiology.  
Prerequisites: BIOL 351; BIOL 406/GENE 406 or concurrent enrollment; BICH 410, BICH 431/GENE 431 and GENE 302 strongly recommended.  

BIOL 440 Marine Biology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Introduction to biology of common organisms inhabiting bays, beaches and near-shore oceanic waters with special reference to Gulf of Mexico biota; emphasis on classification, distribution, history, ecology, physiology, mutualism, predation, major community types and economic aspects of marine organisms.  
Prerequisite: BIOL 214 or approval of instructor.  

BIOL 444 Neural Development  
Credits 3. 3 Lecture Hours.  
Cellular and molecular mechanisms of nervous system development including neural induction and the basis of complex behaviors; use of a wide range of model organisms with a specific emphasis on vertebrate nervous system development.  
Prerequisites: BIOL 213, BIOL 319, BIOL 320, BIOL 413, BIOL 388, NRSC 235/PSYC 235 or PSYC 235/NRSC 235.  

BIOL 445 Biology of Viruses  
Credits 3. 3 Lecture Hours.  
Structure, composition and life cycles of viruses; methods used to study viruses; their interaction with host cells; mechanisms of pathogenicity and cellular transformation; responses of the host to viral infection, and vaccine applications; in-depth study of the life cycles of the major classes of viruses and discussion of emerging viruses.  
Prerequisite: BIOL 213 or BIOL 351 or approval of instructor.  

BIOL 450/BICH 450 Genomics  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
The study of genomic data includes consideration of the logic behind the most important genomic approaches, as well as their capabilities and limitations in investigating biological processes; the science of accessing and manipulating genomic data; and practical applications, including development of an hypotheses-driven datamining experiment.  
Prerequisites: BIOL 213, GENE 301 or GENE 302, BICH 431/GENE 431 or GENE 431/BICH 431, or BIOL 351; junior or senior classification or approval of instructor.  
Cross Listing: BICH 450/BIOI 450.  

BIOL 451 Bioinformatics  
Credits 3. 3 Lecture Hours.  
Introduction to the entire field of bioinformatics; theoretical background of computational algorithms, with an emphasis on application of computational tools related to modern molecular biological research.  
Prerequisite: BIOL 213, GENE 301, or GENE 302, or BIMS 320/GENE 320 or GENE 320/BIMS 320 and junior or senior classification, or approval of instructor.
BIOL 454 Immunology
Credits 3. 3 Lecture Hours.
Introduction to basic immunological concepts and principles of serology.
Prerequisite: BIOL 351 or equivalent or approval of instructor.

BIOL 455 Laboratory in Immunology
Credits 2. 6 Lab Hours.
Practical application of serological principles which include precipitation, agglutination and blood banking principles; techniques in tissue culture and hybridoma technology also included.
Prerequisite: BIOL 454 or registration therein.

BIOL 456 Medical Microbiology
Credits 3. 3 Lecture Hours.
Microbiology, epidemiology and pathology of human pathogens with an emphasis on bacterial agents.
Prerequisite: BIOL 351 or approval of instructor.

BIOL 461 Antimicrobial Agents
Credit 1. 1 Lecture Hour.
Understanding of antimicrobial agents, limitations of use, biosynthesis and regulation, and challenges in development as new therapeutics.
Prerequisites: BICH 410 or BICH 440 and BIOL 351 or VTPB 405.

BIOL 462/WFSC 462 Amazon River Tropical Biology
Credits 3. 3 Lecture Hours.
History, ecology, evolutionary-biology, geography and culture of the Amazon River and Rio Negro; exploration of the world's most bio-diverse river during a 10-day expedition from Manaus, Brazil; survey biota, record observations about the ecosystem, select research topics, development of presentations.
Prerequisites: BIOL 107, BIOL 112, BIOL 113, BIOL 357 or RENR 205; or approval of instructor.
Cross Listing: WFSC 462/BIOL 462.

BIOL 466 Principles of Evolution
Credits 3. 3 Lecture Hours.
Evolutionary patterns, mechanisms and processes at the organismal, chromosomal and molecular levels; modes of adaptation and the behavior of genes in populations.
Prerequisite: GENE 302 or approval of instructor.

BIOL 467 Integrative Animal Behavior
Credits 3. 3 Lecture Hours.
Examines how behavior contributes to survival and reproduction, and how evolutionary history and ecological circumstance interact to shape the expression of behavior; focus on integrative nature of behavior; how the interaction of evolutionary processes, mechanistic constraints, and ecological demands determine behavioral strategies.
Prerequisite: BIOL 214, BIOL 357, BIOL 388, BIOL 405, BIOL 434/ NRSC 434, or BIOL 466, or approval of instructor.

BIOL 480 Departmental Colloquium
Credit. 1. 1 Lecture Hour.
Attend presentations given by renowned scientists from various fields of biology; learn about new developments in science; stay abreast of current and trending research topics.
Prerequisites: Senior classification; majors in BIOL, MICRO, BMCB and ZOOL.

BIOL 481 Seminar in Biology
Credit 1. 1 Lecture Hour.
Recent advances. Restricted to senior undergraduate majors in biology, microbiology, botany or zoology.

BIOL 484 Internship
Credits 0 to 4. 0-1 Other Hours.
Directed internship in a private firm or public agency to provide research experience appropriate to the student's degree program and career objectives. May be taken two times.
Prerequisite: Approval of internship agency and advising office.

BIOL 485 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Problems in various phases of plant, animal and bacteriological science.
Prerequisites: Junior classification; approval of ranking professor in field chosen and Undergraduate Advising Office.

BIOL 487/VTPB 487 Biomedical Parasitology
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Helminth and protozoan parasites of medical and veterinary importance; life cycles, morphology, taxonomic classification, economic and public health aspects and current topics in parasitic diseases.
Prerequisites: BIOL 107 or BIOL 114; junior classification or approval of instructor.
Cross Listing: VTPB 487/BIOL 487.

BIOL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 10 Lab Hours.
Selected topics in an identified area of biology. May be repeated once for credit.

BIOL 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member. May be taken two times. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisite: Approval of departmental faculty member.

BIOL 492 Biomedical Therapeutics Development
Credit 1. 1 Lecture Hour.
Basic aspects of the biotechnology business; includes key aspects of biotechnology patents, the main steps in preclinical drug development and company structure and funding.
Prerequisites: BIOL 213 or equivalent; CHEM 227 and CHEM 228.

BIOL 495 Biology Capstone: Research Communication in the Life Sciences
Credits 2. 2 Lecture Hours.
Culmination of capstone research experience; formalization of research results in written and oral forms; introduction to primary genres or scientific writing; apply principles of rhetoric and composition to diverse methods of professional communication.
Prerequisite: BIOL 452, BICH 464, BIOL 400, BIOL 493 or BIOL 491 or approval of instructor.

BIOL 496 Ethics in Biological Research
Credit 1. 1 Lecture Hour.
Fraud in science, how to recognize it, and how to avoid committing fraud; includes the basis of ethics and plagiarism, negotiation techniques and conflict management, the regulations and ethics covering animal and human experiments, record-keeping, data management and peer review.
Prerequisites: BIOL 491, NRSC, 491, BICH 491, GENE 491, BIMS 491, CHEM 491, or concurrent enrollment, or approval of instructor.
BMEN - Biomedical Engineering (BMEN)

BMEN 101 Introduction to Biomedical Engineering
Credit 1. 1 Lecture Hour.
Overview of biomedical engineering and the biomedical engineering industry, including specialties, degree requirements and scholastic programs in the Department of Biomedical Engineering.
Prerequisite: Biomedical Engineering major or minor.

BMEN 207 Computing for Biomedical Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the principles of computer programming for biomedical applications including program design and development, programming techniques and documentation; introduction to and programming in the LabVIEW and MATLAB environments.
Prerequisites: Admitted to major degree sequence; MATH 152, and ENGR 102 or ENGR 112.

BMEN 211 Biomedical Applications of Signals and Systems
Credits 3. 3 Lecture Hours.
Quantitative analysis of biomedical and physiological signals; Fourier and Laplace transforms; filtering of biomedical signals; electrical circuits an analog representations of physiological systems as model systems; A/D conversion and sampling.
Prerequisites: Admitted to major degree sequence; PHYS 207 or PHYS 208; MATH 308 or concurrent enrollment.

BMEN 253 Medical Device Design I
Credit 1. 3 Lab Hours.
FDA design controls for medical device development in a regulated environment; small-scale team biomedical engineering design project.
Prerequisite: Grade of C or better in BMEN 207.

BMEN 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Allows students to undertake special projects in biomedical engineering at an earlier point in their studies than required for BMEN 485.
Prerequisite: Approval of Director of Undergraduate Programs.

BMEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of biomedical engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

BMEN 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in biomedical engineering. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BMEN 305 Bioinstrumentation
Credit 1. 3 Lab Hours.
Introduction to biomedical instrumentation design; hands on acquisition of biomedical signals; design, building and testing of bioinstrumentation circuits including analog signal amplifiers and analog filter circuits.
Prerequisite: Grade of C or better in BMEN 211; grade of C or better in BMEN 321 or concurrent enrollment.

BMEN 321 Biomedical Electronics
Credits 3. 3 Lecture Hours.
Introduction to biomedical signals; basic circuit analysis for biomedical signals; design of bioamplifier circuits; characteristics of linear and nonlinear circuit elements; design of basic electronic circuits, principles and practice of bioelectronic measurements.
Prerequisites: Grade of C or better in BMEN 211; junior or senior classification; Biomedical Engineering major or minor.

BMEN 322 Biosignal Analysis
Credits 3. 3 Lecture Hours.
Design and application of analog and digital signal analysis in biomedical engineering; characteristics of biomedical signals; design considerations for analog-to-digital and digital-to-analog circuitry; biosignal transformation methods; analog and digital filter design for biomedical signals.
Prerequisite: BMEN 321.

BMEN 341 Biofluid Mechanics
Credits 3. 3 Lecture Hours.
Introduction into the mechanics of fluids in biomechanics, including blood, synovial fluid and physiological solutions, with an emphasis on the importance of mechanobiology and the formation of biological problems within the context of 1) kinematics, 2) the concept of stress, 3) linear momentum balance, 4) constitutive relations, and 5) boundary conditions.
Prerequisites: MATH 308; Biomedical Engineering major or minor; junior or senior classification.

BMEN 343 Introduction to Biomaterials
Credits 3. 3 Lecture Hours.
Properties of natural and man-made materials commonly encountered in biomedicine and biomedical engineering; an integrated approach in the presentation of material structures, characteristics and properties; the basics of material structures, including crystalline and chemical structure, and microstructure; and bulk properties and characteristics of the materials developed from the microscopic origins.
Prerequisites: MATH 308 and CHEM 227; Biomedical Engineering major or minor; junior or senior classification.

BMEN 344 Biological Responses to Medical Devices
Credits 3. 3 Lecture Hours.
Selection and characterization of materials in implantable and tissue contacting medical devices; biodegradation, biocompatibility, hemocompatibility and cell-material interactions of biomaterials.
Prerequisite: Grade of C or better in BMEN 343; grade of C or better in BMEN 345 or concurrent enrollment; VTPP 435 or concurrent enrollment; biomedical engineering major or minor.

BMEN 345 Biomaterials Lab
Credit 1. 3 Lab Hours.
Experimental methods used to prepare and characterize polymeric biomaterials used in biomedical engineering; related fundamental aspects of forming a hypothesis, experimental design, empirical observation, data collection, interpretation and presentation of data.
Prerequisite: Grade of C or better in BMEN 343.

BMEN 350 Statistics for Biomedical Engineering
Credits 3. 3 Lecture Hours.
Evaluation of the efficacy of clinical research; quantitative methods used in clinical trials in biomedical engineering; ethical and regulatory issues that must be considered during the design and implementation of any clinical trial, or pre-clinical study.
Prerequisites: Junior classification; admitted to the major degree sequence (upper level).
BMEN 353 Medical Device Design II
Credit 1. 3 Lab Hours.
Identification of needs for biomedical engineering design solutions, development of design proposals, analysis of design project requirements and constraints.
Prerequisite: Grade of C or better in BMEN 253 or equivalent; junior or senior classification.

BMEN 361 Biosolid Mechanics
Credits 3. 3 Lecture Hours.
Introduction to the mechanics of deformable media in biomedical engineering, including medical devices, biomaterials, and soft and hard biological tissues: emphasis on biomechanics and mechanobiology and formulation of problems within the context of basic continuum biomechanics; problems include analytical solutions for stress-strain analysis of extension, distension, bending, buckling, and torsion of biosolids.
Prerequisites: MATH 308; Biomedical Engineering major or minor; junior or senior classification.

BMEN 399 Engineering Professional Development
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point.
Prerequisites: Admission to biomedical engineering; junior or senior classification or approval of instructor.

BMEN 400/VTPP 401 History of Human and Veterinary Medicine in Europe
Credits 4. 4 Lecture Hours.
Addresses the major developments in human and veterinary medicine in Europe from the Middle Ages to the present; explores key events and figures in medical history and analyzes issues of current biomedical concern in a historical context; for example, animal rights, ethics of humane experimentation, euthanasia.
Prerequisites: Admitted to major degree sequence in biomedical engineering; VTPP 434.
Cross Listing: VTPP 401/BMEN 400.

BMEN 401 Principles and Analysis of Biological Control Systems
Credits 3. 3 Lecture Hours.
Techniques for generating quantitative mathematical models of physiological control systems and devices; the behavior of physiological control systems using both time and frequency domain methods.
Prerequisite: BMEN 321.

BMEN 402 Biomedical Optics Laboratory
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Biomedical optics technology; basic engineering principles used in developing therapeutic and diagnostic devices; hands-on labs including optical monitoring, diagnostic and therapeutic experiments.
Prerequisite: PHYS 207 or PHYS 208 or approval of instructor; Biomedical Engineering major or minor.

BMEN 404 FDA Good Laboratory and Clinical Practices
Credits 3. 3 Lecture Hours.
Implementation of Good Laboratory Practices (GLP) for the submission of preclinical studies and use of Good Clinical Practices (GCP) in clinical trials in accordance with Food and Drug Administration (FDA) regulations; includes similarities and differences in GLP and GCP critical for the introduction of new drugs and medical devices.
Prerequisites: BMEN 253; junior or senior classification.

BMEN 406 Medical Device Path to Market
Credits 3. 3 Lecture Hours.
Path to market for a medical device with specific attention to the regulatory affairs to enable the development of an appropriate regulatory strategy due to the highly regulated global environment.
Prerequisites: BMEN 253; junior or senior classification, or approval of instructor.

BMEN 420 Medical Imaging
Credits 3. 3 Lecture Hours.
The principles of the major imaging modalities including x-ray radiography, x-ray computed tomography (CT), ultrasonography and magnetic resonance imaging; including a brief discussion on other emerging imaging technologies such as nuclear imaging (PET and SPECT).
Prerequisites: Grade of C or better in BMEN 211; junior or senior classification.

BMEN 422 Bioelectromagnetism
Credits 3. 3 Lecture Hours.
Electric, magnetic and electromagnetic phenomena associated with biological tissues; source modeling based on physiological current including line and volume conductor models as well as electromagnetic-based stimulation, sensing and imaging.
Prerequisites: Admission into the degree sequence of the major and BMEN 321 or approval of instructor.

BMEN 425 Biophotonics
Credits 3. 3 Lecture Hours.
Theory and application of optical instrumentation, including light sources, lasers, detectors, and optical fibers; instrumentation and engineering in biomedical applications of optics in therapeutics, diagnostics, and biosensing.
Prerequisites: Admitted into the major degree sequence in biomedical engineering; junior or senior classification.

BMEN 427 Magnetic Resonance Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Design, construction and application of instrumentation for MR imaging; fundamentals of the architecture of an MR spectrometer and the gradient subsystem used for image localization; emphasis on the radiofrequency sensors and systems used for signal generation and reception.
Prerequisites: Grade of C or better in ECEN 322 or BMEN 420; junior or senior classification.

BMEN 428/CSCE 461 Embedded Systems for Medical Applications
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of embedded system architecture and programming; fundamentals and theoretical foundations of wireless communication systems; hands-on experiences of how an embedded system could be used to solve problems in biomedical engineering; projects on wireless sensors and imaging for medical devices.
Prerequisite: BMEN 211, CSCE 350/ECEN 350, or CSCE 315, or approval of instructor.
Cross Listing: CSCE 461/BMEN 428.

BMEN 431 Biomolecular Engineering
Credits 3. 3 Lecture Hours.
Foundations for understanding and experimental approaches for measuring and manipulating biomolecules; proteins, nucleic acids and carbohydrates; thermodynamics and kinetics of biomolecular reactions.
Prerequisites: Junior or senior classification; Biomedical Engineering majors only; or approval of instructor.
BMEN 432 Molecular and Cellular Biomechanics
Credits 3. 3 Lecture Hours.
Introduces biomolecules and their assemblies that play structural and
dynamical roles in subcellular to cellular level mechanics; emphasis
on quantitative/theoretical descriptions; discussions of the relevant
experiment approaches to probe these nano to micro-scale phenomena;
includes topics in self-assembly of cytoskeleton and biomembranes,
molecular motors, cell motility, and mechanotransduction.
Prerequisite: BMEN 361.

BMEN 433 Biomedical and Cellular Engineering Laboratory
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Laboratory biosafety and biohazard awareness; cell culture protocols and
standards for biocompatibility testing; setting protocols for cellular and
biomolecular projects; bioimaging, bioassays and biomolecule activity
testing.
Prerequisites: VTPP 435; BMEN 431 or concurrent enrollment; majors
in biomedical engineering; junior or senior classification; or approval of
instructor.

BMEN 448 Healthcare Technology in the Developing World
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Principles of operation for major types of medical equipment; physiology
underlying the measurement; major functional (system) pieces for each
instrument; typical problems/applications of each instrument.
Prerequisites: MATH 152, PHYS 208, and approval of instructor.

BMEN 450 Case Studies
Credit 1. 1 Lecture Hour.
Examines process through which clinically defined problems are
addressed from the perspective of biomedical engineering through the
use of case studies; includes issues of technology transfer and clinical
evaluation.
Prerequisites: Admitted to major degree sequence; junior or senior
classification.

BMEN 452 Mass and Energy Transfer in Biosystems
Credits 3. 3 Lecture Hours.
Transport phenomena associated with physiological systems and their
interaction with medical devices; exchange processes in artificial life
support systems and diagnostic equipment.
Prerequisites: BMEN 341; MATH 308; Biomedical Engineering major or
minor.

BMEN 453 Analysis and Design Project I
Credits 2. 6 Lab Hours.
Group or team biomedical engineering analysis and design project
involving statement, alternative approaches for solution, specific system
analysis and design.
Prerequisites: Grade of C or better in BMEN 321 and BMEN 353.

BMEN 454 Analysis and Design Project II
Credits 2. 0 Lecture Hours. 6 Lab Hours.
Continuation of BMEN 453.
Prerequisite: Grade of C or better in BMEN 453.

BMEN 457 Orthopedic Biomechanics
Credits 3. 3 Lecture Hours.
Development of competencies in biomechanical principles using practical
elements and clinical case studies; application of biomechanical
knowledge to the evaluation of musculoskeletal tissues and structures,
and treatment options for musculoskeletal dysfunction.
Prerequisite: BMEN 361 or equivalent course approved by instructor.

BMEN 458 Motion Biomechanics
Credits 3. 3 Lecture Hours.
Skeletal anatomy and mechanics; muscle anatomy and mechanics;
theory and application of electromyography; motion and force measuring
equipment and techniques; inverse dynamics modeling of the human
body; current topics in musculoskeletal biomechanics research.
Prerequisites: BMEN 207 or approval of instructor; junior or senior
classification.

BMEN 461 Cardiac Mechanics
Credits 3. 3 Lecture Hours.
Application of continuum mechanics and computational solid mechanics
to the study of the mammalian heart; utilization of continuum mechanics
and finite element analysis in solving non-linear boundary value problems
in biomechanics.
Prerequisites: BMEN 341 and BMEN 361.

BMEN 463 Soft Tissue Mechanics and Finite Element Methods
Credits 3. 3 Lecture Hours.
Application of continuum mechanics and finite element methods to
the study of the mechanical behavior of soft tissues and associative
applications in biomedicine.
Prerequisites: BMEN 341 and BMEN 361.

BMEN 465 Biomechanics Experiential Learning Lab
Credit 1. 3 Lab Hours.
Applications in biomechanics (solid and fluid); includes experimental
methods used to investigate biomechanical factors in the assessment
of therapeutic interventions; mechanical testing load frames; motion
capture systems, high speed imaging and flow systems; hypothesis
forming, experimental design, empirical observation, data collection and
interpretation, and presentation of results.
Prerequisite: Grade of C or better in BMEN 361.

BMEN 468 Advanced Biomechanics
Credits 3. 3 Lecture Hours.
Application of fluid and solid mechanics to problems in biomedical
engineering ranging from molecular-level to organ-level, including the
mechanics of the cell cytoskeleton, whole cells, blood, arteries and the
heart.
Prerequisites: BMEN major; BMEN 341 and BMEN 361; or approval of
instructor.

BMEN 469 Entrepreneurial Pathways in Medical Devices
Credits 3. 3 Lecture Hours.
Overview of fundamental elements and development steps for an
effective strategy pathway including regulatory pathway for
commercialization of medical product/medical device innovations;
application of the basic regulations and associated requirements and
enforcements for product market approval; exploration of product quality
test method design requirements; understanding of the applicable
regulations and standards pertaining to the design, testing, approval and
marketing of medical devices.
Prerequisite: Admitted to major degree sequence (upper-level) in
biomedical engineering.

BMEN 471 Numerical Methods in Biomedical Engineering
Credits 3. 3 Lecture Hours.
Application of numerical analysis to analyze molecular, cellular and
physiological systems, using general techniques including programming
in MATLAB to analyze steady and dynamic systems.
Prerequisites: BMEN 207 and VTPP 434.
BMEN 480 Biomedical Engineering of Tissues
Credits 3. 3 Lecture Hours.
Introduction to aspects of tissue engineering with an emphasis placed on tissue level topics including tissue organization and biological processes, with insights from recent literature (state-of-the-art).
Prerequisite: BMEN 343.

BMEN 482 Polymeric Biomaterials
Credits 3. 3 Lecture Hours.
Preparation, properties, and biomedical applications of polymers including polymerization; structure-property relationships; molecular weight and measurement; morphology; thermal transitions; network formation; mechanical behavior; polymeric surface modification; polymer biocompatibility and bioadhesion; polymers in medicine, dentistry, and surgery; polymers for drug delivery; polymeric hydrogels; and biodegradable polymers.
Prerequisite: BMEN 343.

BMEN 483 Polymeric Biomaterial Synthesis
Credits 3. 3 Lecture Hours.
Overview of polymer synthetic routes and key structure-property relationships with emphasis on the design of polymeric systems to achieve specific properties; tissue engineering and drug delivery applications will be used as model systems to explore the process of biomaterial design from synthesis to device evaluation.
Prerequisite: BMEN 343 or approval of instructor.

BMEN 484 Internship
Credits 0 to 3. 0 to 3 Other Hours.
Industry experience from both an experiential perspective as well as networking; reflect upon the experience gained during an internship with an outside entity; learn what it takes to be successful in industry.
Prerequisites: BMEN 343 or approval of instructor.

BMEN 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Allows students to undertake special projects in biomedical engineering.
Prerequisite: Approval of instructor or Director of Undergraduate Programs.

BMEN 486 Biomedical Nanotechnology
Credits 3. 3 Lecture Hours.
Nanotechnology applications in biomedicine; concepts of scale; unique properties at the nanoscale; biological interaction, transport, and biocompatibility of nanomaterials; current research and development of nanotechnology for medical applications, including sensors, diagnostic tools, drug delivery systems, therapeutic devices, and interactions of cells and biomolecules with nanostructured surfaces.
Prerequisite: BMEN 343, senior classification or approval of instructor.

BMEN 487 Drug Delivery
Credits 3. 3 Lecture Hours.
Mechanisms for controlled release of pharmaceutically active agents and the development of useful drug delivery systems; controlled release mechanisms including diffusive, convective, and erosive driving forces by using case studies related to oral, topical and parenteral release in a frontier interdisciplinary scientific research format.
Prerequisites: BMEN 343; senior classification in biomedical engineering or approval of instructor.

BMEN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
New or unique areas of biomedical engineering which are of interest to biomedical engineering and other undergraduate students.

BMEN 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in biomedical engineering. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of instructor.

BOTN - Botany (BOTN)

BOTN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of botany. May be repeated for credit.
Prerequisite: Approval of instructor.

BOTN 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BOTN 485 Directed Studies
Credits 3. 3 Lecture Hours.
Problems in various phases of plant, animal and bacteriological science.
Prerequisites: Junior classification; approval of ranking professor in field chosen and Undergraduate Advising Office.

BOTN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member.
Prerequisites: Junior or senior classification and approval of instructor.

BUSN - Mays Business School (BUSN)

BUSN 101 Freshman Business Initiative
Credits 3. 3 Lecture Hours.
Freshman orientation to business and to Mays Business School; introduction to majors within the business school and associated career opportunities; introduction and development of personal and professional competencies, with emphasis on self-leadership, business communication, ethical decision making, and teamwork.
Prerequisite: Freshman admitted to Mays Business School.

BUSN 125 Business Learning Community I
Credits 3. 3 Lecture Hours.
Focuses on the base competencies that relate to effectively managing people, tasks and organizations, and change and innovation; develops skills in personal and professional competencies, analytical and critical thinking skills, written and oral communication skills, interpersonal skills and problem-solving skills; research emphasis.
Prerequisite: Selection for Mays Business School Honors Program.

BUSN 225 Business Competency
Credits 3. 3 Lecture Hours.
Application of core business competencies of leadership, communication, decision making, ethics and teamwork.
Prerequisites: BUSN 101 or BUSN 125; selection for Mays Business School Honors Program.
BUSB 232 Resource Development  
Credits 3. 3 Lecture Hours.  
Examination of resource development and the fundraising process in nonprofit organizations and social enterprises; introduction to the funding methods and interconnectedness of government, individuals, foundations and corporations as nonprofits seek to address societal challenges; overview of donor motivations, sources of support, staff/board roles in fundraising, earned income strategies and ethical practices.  
Prerequisites: Mays Business School majors only.

BUSB 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed study of selected problem in business not covered in other courses. May be taken two times for credit.  
Prerequisites: Freshman or sophomore classification admitted to Mays Business School and approval of instructor.

BUSB 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of business and public service. May be repeated for credit.  
Prerequisite: Freshman or sophomore in business.

BUSB 299 Professional and High Impact Experiences  
Credits 0. 0 Other Hours.  
Participation in professional and/or high impact experiences. May be repeated for credit. Must be taken on a satisfactory/unsatisfactory basis.

BUSB 302 Nonprofit Perspectives  
Credit 1. 1 Lecture Hour.  
Examination of the size, scope and distinctiveness of the nonprofit sector; development of a comprehensive view of the nonprofit sector by engaging with a diversity of perspectives from private, government or nonprofit organizations.  
Prerequisite: Mays Business School major; junior or senior classification or approval of instructor.

BUSB 392 Cooperative Education in Business  
Credits 2. 40 Other Hours.  
Educational work assignment in the field in which the student is interested. Supervision will be by employer with technical report required at semester's end. May be taken three times for credit.

BUSB 401 Mays Business Fellows I  
Credits 3. 3 Lecture Hours.  
A seminar for the development of leadership and management skills.  
Prerequisite: Selection for Mays Business Fellows Program.

BUSB 403 Transformational Leader Portfolio  
Credits 3. 3 Lecture Hours.  
Self-assessment of development as a Mays Transformational Leader (MTL); compilation and evaluation of evidence of Mays Transformational Leadership mindsets, competencies and business acumen; preparation of portfolio; creation of professional development plan.  
Prerequisite: Junior or senior classification or approval of instructor.

BUSB 432 Strategic Philanthropy  
Credits 3. 3 Lecture Hours.  
Examination of historical trends in philanthropy; participation in grant making process through the lens of a private foundation; engagement with local and national philanthropic leaders; development of personal philanthropic ethic through a grant making simulation that includes due diligence, writing grants and reaching collective decisions.  
Prerequisites: Junior or senior classification or approval of instructor.

BUSB 481 Seminar  
Credit 1. 1 Lecture Hour.  
Exploration of current business topics or competencies. May be taken four times for credit.  
Prerequisites: Junior or senior classification or approval of instructor.

BUSB 484 Internship  
Credits 1 to 3. 1 to 3 Other Hours.  
Professional internship or practical experience in a field in which the student is interested, under the direction of the business honors director or a business school faculty member. May be taken two times for credit.  
Prerequisite: Business honors major or approval of instructor.

BUSB 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Directed study on selected problems in the area of business administration not covered in other courses. May be repeated for credit.  
Prerequisites: Admission to upper division in Mays Business School; approval of instructor.

BUSB 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of business and public service. May be repeated for credit.  
Prerequisite: Junior or senior in business.

BUSB 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in Mays Business School. May be repeated 1 times for credit.  
Prerequisites: Junior or senior classification admitted to Mays Business School and approval of instructor.

**CARC - College of Architecture (CARC)**

CARC 101 Cultural and Social Issues in the Natural, Built and Virtual Environment  
Credits 3. 3 Lecture Hours.  
Introduction to cultural and social issues in planning, design, construction, creativity and the visual arts; exploration of how individual and collective values and beliefs are expressed in the practice of architecture, landscape architecture, urban planning, construction science and the arts; how these fields internalize and reify these values while creating the natural, built and virtual environments; emphasis on civil discourse to help recognize positionality and work collaboratively in a multicultural society.

CARC 181 First Year Seminar  
Credit 1. 1 Lecture Hour.  
Seminar on various contemporary topics; introduction to high quality college instruction and research; focus on writing, speaking, exploration, discussion and research. May be taken two times for credit.  
Prerequisite: First time in college and College of Architecture undergraduate studies.

CARC 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of a faculty member. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.
CARC 300 College of Architecture Study Abroad
Credits 1 to 18. 1 to 18 Other Hours.
For students in approved study abroad programs participating in reciprocal educational exchange programs. May be repeated for credit.
Prerequisite: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 301 Field Studies in Design Innovation
Credits 1 to 18. 1 to 18 Other Hours.
Design innovation in international and domestic environments away from the Texas A&M University campus; emphasis on the cultural, social, economic, geographical, climatic and technological factors influencing design solutions for human needs. May be taken up to two times in the same semester.
Prerequisite: Junior or senior classification; CARC 481; approval of assistant dean for international programs and initiatives.

CARC 311 Field Studies in Design Communication
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Design communication in international and domestic environments away from the Texas A&M University campus; emphasis on the tools, methods and techniques for design communication. May be taken up to two times in the same semester.
Prerequisite: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 321 Field Studies in Design Technology
Credits 3. 3 Other Hours.
Design technology in international and domestic environments away from the Texas A&M University campus; emphasis on structural, material and environmental systems and methods of construction utilized to realize design solutions. May be taken up to two times in the same semester.
Prerequisite: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 331 Field Studies in Design Philosophy
Credits 3. 3 Other Hours.
Design philosophy in international and domestic environments away from the Texas A&M University campus; emphasis on the historical, philosophical, cultural, social and economic factors that influence design solutions. May be taken up to two times in the same semester.
Prerequisites: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 481 Seminar
Credit 1. 1 Lecture Hour.
Preparatory seminar for select College of Architecture study away and internships; topics include introduction to the language, culture and history of study abroad location. Must be taken the spring semester before the student's study away semester. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual research in architecture, construction science or landscape architecture in an international or domestic environment away from the Texas A&M University campus. May be taken up to two times in the same semester.
Prerequisite: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of architecture. May be repeated for credit.
Prerequisites: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of a faculty member. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CEHD - Coll of Ed & Human Dev (CEHD)

CEHD 100 Introduction to Teacher Professional Responsibility
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
Information, access and skills required for new education candidates to successfully complete the teacher education program; engagement of prospective teachers seeking initial certification in the knowledge and critical analysis of the educator certification requirements in the State of Texas; includes educator preparation, state certification requirements, completion of mandated training for compliance with the Texas Education Agency; case studies and exercises with professional responsibility and ethical considerations in real-life situations interspersed throughout curriculum. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Admission to a teacher certification program.

CEHD 101 Learning Community Foundations of Leadership
Credit 1. 1 Lecture Hour.
Exploration of leadership identity, and reflection on lessons learned during the first year of college. Must be taken on a satisfactory/unsatisfactory basis.

CEHD 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of education and human development. May be repeated for credit.
Prerequisite: Approval of instructor.

CEHD 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in the College of Education and Human Development. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

CEHD 300 Education and Human Development Study Abroad
Credits 1 to 18. 1 to 18 Lecture Hours.
For students in approved programs to study abroad. May be repeated for credit.
Prerequisites: Approval of department head; junior or senior classification.

CEHD 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in the College of Education and Human Development. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
CHEM - Chemistry (CHEM)

CHEM 100 Horizons in Chemistry
Credit 1. 1 Lecture Hour.
An introduction to chemistry and its relationship to and influence on society; emphasis on chemical demonstrations and the practical application of chemical phenomena. For chemistry majors.
Prerequisite: Major in chemistry or approval of instructor.

CHEM 106 Molecular Science for Citizens
Credits 3. 3 Lecture Hours.
(Chem 1305, 1405*) Molecular Science for Citizens. Molecules that control daily life explored via a conceptual approach to molecular science; properties, synthesis, transformations and utility of important molecules; fuels, fibers, metals, pharmaceuticals, foods, biomolecules and structural materials; pollution, consumerism, energy production, disease, biotechnology and risk-benefit analysis considered; also taught at Galveston campus.

CHEM 107 General Chemistry for Engineering Students
Credits 3. 3 Lecture Hours.
(Chem 1309, 1409*) General Chemistry for Engineering Students. Introduction to important concepts and principles of chemistry; emphasis on areas considered most relevant in an engineering context; practical applications of chemical principles in engineering and technology. Students completing CHEM 107 and changing majors to curricula requiring CHEM 101 and CHEM 102 may substitute CHEM 107 for CHEM 101. Only one of the following will satisfy the requirements for a degree: CHEM 107 and CHEM 101.
Prerequisite: Concurrent enrollment in CHEM 117; also taught at Galveston and Qatar campuses.

CHEM 116 Molecular Science for Citizens Laboratory
Credit 1. 3 Lab Hours.
(Chem 1105, 1405*) Molecular Science for Citizens Laboratory. The importance of molecular science to daily life illustrated by using experiments, demonstration and videos; designed to accompany CHEM 106.
Prerequisite: CHEM 106 or registration therein; also taught at Galveston campus.

CHEM 117 General Chemistry for Engineering Students Laboratory
Credit 1. 3 Lab Hours.
(Chem 1109, 1409*) General Chemistry for Engineering Students Laboratory. Introduction to important concepts and principles of chemistry in the laboratory; emphasis on areas considered most relevant in an engineering context; practical applications of chemical principles in engineering and technology. Students completing CHEM 117 and changing majors to curricula requiring CHEM 111 and CHEM 112 may substitute CHEM 117 for CHEM 111. Only one of the following will satisfy the requirements for a degree: CHEM 117 and CHEM 111.
Prerequisites: CHEM 107 or registration therein; also taught at Galveston and Qatar campuses.

CHEM 119 Fundamentals of Chemistry I
Credits 4. 3 Lecture Hours. 3 Lab Hours.
(Chem 1311 and 1111, 1411) Fundamentals of Chemistry I. Introduction to modern theories of atomic structure and chemical bonding; chemical reactions; stoichiometry; states of matter; solutions; equilibrium; acids and bases; coordination chemistry; methods and techniques of chemical experimentation; qualitative and semiquantitative procedures applied to investigative situations; also taught at Galveston campus.

CHEM 120 Fundamentals of Chemistry II
Credits 4. 3 Lecture Hours. 3 Lab Hours.
(Chem 1312 and 1112, 1412) Fundamentals of Chemistry II. Theory and applications of oxidation-reductions systems; thermodynamics and kinetics; complex equilibria and solubility product; nuclear chemistry; descriptive inorganic and organic chemistry; introduction to analytical and synthetic methods and to quantitative techniques to both inorganic and organic compounds with emphasis on an investigative approach.
Prerequisites: CHEM 119, or CHEM 107 and CHEM 117; also taught at Galveston and Qatar campuses.

CHEM 220 Physics and Chemistry of Inorganic Materials
Credits 3. 3 Lecture Hours.
Structure, properties and function of materials developed from an atomistic and molecular perspective emphasizing quantum chemical descriptions; elements of solid-state chemistry and physics including bonding, crystal structure and symmetry, origin of electronic band structure, synthesis and characterization tools in materials chemistry and role of finite size effects.
Prerequisite: CHEM 102 and CHEM 120; concurrent enrollment in PHYS 208.

CHEM 222 Elements of Organic and Biological Chemistry
Credits 3. 3 Lecture Hours.
Organic chemistry and its applications to biological and agricultural chemistry, including chemistry of functional groups, acid-base and redox chemistry, stereochemistry and chemistry of important biological compounds. Not to be used as the basis for further study in organic chemistry or biochemistry.
Prerequisite: CHEM 101, CHEM 119, or CHEM 107.

CHEM 227 Organic Chemistry I
Credits 3. 3 Lecture Hours.
(Chem 2323, 2423*) Organic Chemistry I. Introduction to chemistry of compounds of carbon; general principles and their application to various industrial and biological processes.
Prerequisite: CHEM 102 or CHEM 120; concurrent enrollment in CHEM 237 is suggested; also taught at Galveston and Qatar campuses.

CHEM 228 Organic Chemistry II
Credits 3. 3 Lecture Hours.
(Chem 2325, 2425*) Organic Chemistry II. Continuation of CHEM 227.
Prerequisite: CHEM 227; concurrent registration in CHEM 238 is suggested; also taught at Galveston and Qatar campuses.

CHEM 231 Techniques of Organic Chemistry
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Techniques of organic chemistry; preparation, properties of typical organic compounds; separation, purification, analysis, and characterization of organic compounds.
Prerequisites: CHEM 112 or CHEM 120, CHEM 227 or concurrent enrollment.

CHEM 234 Organic Synthesis and Analysis
Credits 3. 1 Lecture Hour. 6 Lab Hours.
The synthesis of significant types of organic compounds and study of their properties; laboratory separations of mixtures of organic substances, identification of compounds by functional group tests and preparation of derivatives; instrumental methods of separation, identification and analysis.
Prerequisites: CHEM 228 or concurrent enrollment; CHEM 231 or CHEM 237.
CHEM 237 Organic Chemistry Laboratory
Credit 1. 3 Lab Hours.
(CHEM 2123, 2423*) Organic Chemistry Laboratory. Operations and techniques of elementary organic chemistry laboratory; preparation, reactions and properties of representative organic compounds.
Prerequisites: CHEM 102 and CHEM 112, or CHEM 120; CHEM 227 or concurrent enrollment; also taught at Galveston and Qatar campuses.

CHEM 238 Organic Chemistry Laboratory
Credit 1. 3 Lab Hours.
(CHEM 2125, 2425*) Organic Chemistry Laboratory. Continuation of CHEM 237.
Prerequisites: CHEM 228 or registration therein; CHEM 237 or CHEM 231; also taught at Galveston and Qatar campuses.

CHEM 242 Elementary Organic Chemistry Laboratory
Credit 1. 3 Lab Hours.
Operations and techniques of elementary organic chemistry laboratory with emphasis on experiments for students of agriculture.
Prerequisite: CHEM 222 or registration therein.

CHEM 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Introduction to research, library and laboratory work designed for the freshman or sophomore students.
Prerequisite: Approval of department head.

CHEM 289 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours.
Selected topics in an identified area of chemistry. May be repeated for credit.
Prerequisite: Approval of instructor.

CHEM 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a faculty member in chemistry. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

CHEM 301 Elements of Physical Chemistry
Credits 3. 3 Lecture Hours.
Thermodynamics, Quantum theory, spectroscopy, reaction kinetics, electrochemistry and macromolecules; may not be used by chemistry majors.
Prerequisites: CHEM 102 or CHEM 120; MATH 151 and MATH 152, MATH 140 and MATH 142, MATH 168 and MATH 142, or MATH 147 and MATH 148, or equivalent; PHYS 201 or PHYS 218, or PHYS 206 and PHYS 226; Galveston campus.

CHEM 311 Physical Chemistry Laboratory
Credit 1. 3 Lab Hours.
Quantitative experiments designed to illustrate some principles of thermodynamics, quantum theory, kinetics and spectroscopy; may not be used by chemistry majors.
Prerequisites: CHEM 310, CHEM 322, or CHEM 327, or concurrent enrollment; Galveston campus.

CHEM 315 Fundamentals of Quantitative Analysis
Credits 3. 3 Lecture Hours.
Quantitative and statistical methods of analysis; solution chemistry; chemical equilibrium of analytically useful reactions; advanced analytical methods including electrochemistry, separations and kinetic methods.
Prerequisite: CHEM 102 or CHEM 120.

CHEM 316 Quantitative Analysis
Credits 2. 2 Lecture Hours.
Introductory quantitative chemical analysis; error propagation and statistics; chemical equilibrium for titrations of weak acids, polyprotic acids, and EDTA; basic chemical instrumentation including spectrophotometry, electrochemistry, and chromatography.
Prerequisite: CHEM 102 or CHEM 120; also taught at Galveston and Qatar campuses.

CHEM 318 Quantitative Analysis Laboratory
Credit 1. 3 Lab Hours.
Laboratory work consists of selected experiments in quantitative analysis designed to typify operations of general analytical lab, including chemical analyses by volumetric and gravimetric methods; introduction to chemical measurements by spectroscopic and separations techniques and associated instrumentation.
Prerequisites: CHEM 112 or CHEM 120; CHEM 315 or CHEM 316, or concurrent enrollment; also taught at Galveston and Qatar campuses.

CHEM 322 Physical Chemistry for Engineers
Credits 3. 3 Lecture Hours.
Quantum theory, spectroscopy, statistical mechanics, kinetic theory, reaction kinetics, electrochemistry and macromolecules.
Prerequisites: CHEM 102 or CHEM 120; CHEN 205 and CHEN 354; MATH 152 or equivalent; also taught at Galveston and Qatar campuses.

CHEM 325 Physical Chemistry Laboratory I
Credit 1. 3 Lab Hours.
Quantitative experiments involving physical chemistry principles in areas such as thermodynamics, electrochemistry, molecular structure and equilibria using modern instrumentation.
Prerequisite: CHEM 327 or registration therein.

CHEM 326 Physical Chemistry Laboratory II
Credit 1. 3 Lab Hours.
Quantitative experiments involving physical chemistry principles in such areas as kinetics, properties of gases, phase equilibria and macromolecules using modern instrumentation.
Prerequisite: CHEM 328 or registration therein.

CHEM 327 Physical Chemistry I
Credits 3. 3 Lecture Hours.
Introduction to quantum mechanics, exactly solvable model problems; many electron systems and approximate methods; chemical bonding and the electronic structure of molecules; rotational, vibrational, and electronic spectroscopy; molecular symmetry.
Prerequisite: MATH 152 or MATH 172; MATH 221, MATH 251 or MATH 253 encouraged; PHYS 208 or equivalent; PHYS 218 or equivalent. Replaces CHEM 324 in previous catalogs.

CHEM 328 Physical Chemistry II
Credits 3. 3 Lecture Hours.
A rigorous treatment of first, second, and third laws of thermodynamics; applications to gases (both ideal and real), liquids, solutions and phase equilibria; statistical thermodynamics; kinetic theory of gases; introduction to chemical kinetics.
Prerequisite: CHEM 327. Replaces CHEM 323 in previous catalogs.

CHEM 362 Descriptive Inorganic Chemistry
Credits 3. 3 Lecture Hours.
Introduction to inorganic chemistry with a focus in descriptive inorganic chemistry, bonding theories in inorganic molecules and in the solid state, redox chemistry, descriptive main group and transition metal chemistry; ligand field theory, molecular magnetism and electronic spectra in transition metal complexes.
Prerequisites: CHEM 102 or CHEM 120.
CHEM 383 Chemistry of Environmental Pollution  
Credits 3. 3 Lecture Hours.  
Chemical pollutants in the air, in water and on land; their generation, chemical reactivity, action on environment and disappearance through chemical mechanisms; chemistry of existing pollution abatement.  
Prerequisites: CHEM 102 or CHEM 104; junior or senior classification; also taught at Galveston campus.

CHEM 415 Analytical Chemistry  
Credits 3. 3 Lecture Hours.  
Theory and practical aspects of modern instrumental methods of quantitative analysis; instrumental approaches to selectivity and sensitivity; examples of major, minor and trace component analysis.  
Prerequisite: CHEM 315.

CHEM 433 Advanced Inorganic Chemistry Laboratory  
Credits 2. 6 Lab Hours.  
Preparation, characterization and properties of bioinorganic, organometallic and macromolecular inorganic compounds; special techniques (glove box manipulations and double-manifold Schlenk lines) for handling air-sensitive materials.  
Prerequisite: CHEM 362 or registration therein.

CHEM 434 Analytical Instrumentation Laboratory  
Credits 2. 6 Lab Hours.  
Practical application of modern instrumental methods of quantitative analysis: atomic and molecular techniques to conduct chemical characterizations and analyses.  
Prerequisites: CHEM 318; CHEM 415 or concurrent enrollment.

CHEM 446 Organic Chemistry III  
Credits 3. 3 Lecture Hours.  
Principles and applications of organic chemistry for students majoring in chemistry, chemical engineering, materials science, biological, and physical science: emphasis on chemical reactivity, mechanistic chemistry, and synthesis.  
Prerequisites: CHEM 228 or approval of instructor.

CHEM 456 Chemical Biology  
Credits 3. 3 Lecture Hours.  
Application of chemical principles to biological phenomena; capstone course for advanced students, integrating organic or inorganic chemistry with biology.  
Prerequisites: CHEM 228 or equivalent; junior or senior classification.

CHEM 462 Inorganic Chemistry  
Credits 3. 3 Lecture Hours.  
Periodic relationship of elements, their compounds, principles of their bonding and applications.  
Prerequisites: CHEM 328 and CHEM 362.

CHEM 464 Nuclear Chemistry  
Credits 3. 3 Lecture Hours.  
Properties of the nucleus; radioactivity; decay kinetics; nuclear masses; theory of radioactive decay; nuclear reactions; radiochemistry; nuclear energy; hands-on demonstrations; applications to non-nuclear problems.  
Prerequisites: CHEM 322 or CHEM 327; CHEM 315 or CHEM 316 recommended; also taught at Galveston campus.

CHEM 466 Polymer Chemistry  
Credits 3. 3 Lecture Hours.  
Mechanisms of polymerization reactions of monomers and molecular weight distributions of products; principles, limitations and advantages of most important methods of molecular weight determination; relationship of physical properties to structure and composition; correlations of applications with chemical constitution.  
Prerequisites: CHEM 228 and CHEM 315 or equivalents; also taught at Galveston and Qatar campuses.

CHEM 468 Materials Chemistry of Inorganic Materials  
Credits 3. 3 Lecture Hours.  
Structure, bonding and reactivity of inorganic solids developed from a perspective emphasizing models of chemical bonding, symmetry and electronic structure; methods for characterizing extended periodic solids; descriptions of band structure and contrasts to molecular orbital theory; synthetic routes, quantum confinement and finite size effects of relevance to nanoscale materials.  
Prerequisites: Grade of C or better in CHEM 102 or CHEM 120; PHYS 208 or equivalent; junior or senior classification.

CHEM 470 Industrial Chemistry  
Credits 3. 3 Lecture Hours.  
Applications of organic and inorganic chemical reactions in the manufacture of commercial products; chemistry of petroleum refining and petrochemical processing; industrial polymerization processes; commodity and fine chemical production; influence of kinetics and thermodynamics on economics of industrial chemical production; pollution abatement technology.  
Prerequisites: CHEM 228; junior or senior classification.

CHEM 481 Seminar  
Credits 2. 2 Lecture Hours.  
Preparation of oral and written reports on selected topics from recent technical publications.  

CHEM 483 Green Chemistry  
Credits 3. 3 Lecture Hours.  
Environmentally benign chemistry; the design of chemical products and processes that reduce or eliminate the use and generation of hazardous substances; twelve principles of Green Chemistry; atom economy; use of renewable resources; catalysis for Green Chemistry; alternative solvents and reaction media; energy and the environment.  
Prerequisites: CHEM 228; CHEM 362 recommended; junior or senior classification; also taught at Galveston campus.

CHEM 485 Directed Studies  
Credits 1 to 16. 1 to 16 Other Hours.  
Introduction to research, library and laboratory work.  
Prerequisites: Senior classification and approval of chemistry advisor; also taught at Galveston campus.

CHEM 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of chemistry; also taught at Galveston campus. May be repeated for credit.

CHEM 491 Research  
Credits 0 to 10. 0 to 10 Other Hours.  
Active research of basic nature under the supervision of Department of Chemistry faculty member. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Chemistry major; junior classification or approval of chemistry advisor.
CHEN - Chemical Engineering (CHEN)

CHEN 204 Elementary Chemical Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Solution of elementary problems by application of mass balances, energy balances and equilibrium relationships.
Prerequisites: Grade of C or better in CHEM 120, ENGR 102, and MATH 152; grade of C or better in PHYS 206, and PHYS 216/ENGR 216 or ENGR 216/PHYS 216; admission to chemical engineering major or approval of department.

CHEN 205 Chemical Engineering Thermodynamics I
Credits 3. 3 Lecture Hours.
First and second laws of thermodynamics; volumetric properties of pure fluids; heat effects; applications to flow processes, power cycles, refrigeration.
Prerequisites: CHEN 204.

CHEN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of special projects or studies in chemical engineering processes or operations, for lower division students. Credit not applicable to degree requirements in chemical engineering.
Prerequisites: Freshman or sophomore classification; approval of department head.

CHEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of chemical engineering for lower division students. May be repeated for credit. Credit not applicable to degree requirements in chemical engineering.
Prerequisite: Approval of instructor.

CHEN 301 Engineering Workplace Writing
Credits 3. 3 Lecture Hours.
Processes for preparing documents commonly developed by engineers in the workplace; database research; electronic collaboration; ethics, planning, drafting, revising, and editing reports, proposals, correspondence, instructions, procedures, and presentations for the engineering workplace; meets ABET communication requirements.
Prerequisites: ENGL 104 or equivalent; junior or senior classification in chemical engineering or approval by CHEN.

CHEN 304 Chemical Engineering Fluid Operations
Credits 3. 3 Lecture Hours.
Fundamentals of fluid mechanics with applications to design and analysis of process equipment.
Prerequisites: CHEN 204 with a grade of C or better; CHEN 205 or concurrent enrollment; MATH 308 with a grade of C or better.

CHEN 320 Numerical Analysis for Chemical Engineers
Credits 3. 3 Lecture Hours.
Applications of numerical analysis techniques to mathematical models of processes common to chemical and associated industries; computational methods and software for analysis of chemical engineering processes.
Prerequisites: CHEN 205 with a grade of C or better; MATH 308 with a grade of C or better; or approval of department.

CHEN 322 Chemical Engineering Materials
Credits 3. 3 Lecture Hours.
Overview of materials science with particular emphasis on classes of materials relevant to chemical engineers.
Prerequisite: Grade of C or better in CHEN 204, MATH 251 or concurrent enrollment, and CHEN 205 or concurrent enrollment; or approval of department.

CHEN 323 Chemical Engineering Heat Transfer Operations
Credits 3. 3 Lecture Hours.
Heat transfer operations.
Prerequisite: Grade of C or better in CHEN 205 and CHEN 304.

CHEN 324 Chemical Engineering Mass Transfer Operations
Credits 3. 3 Lecture Hours.
Mass transfer operations with applications to design and analysis of process equipment.
Prerequisites: Grade of C or better in CHEN 354; grade of C or better in CHEN 323 or concurrent enrollment; or approval of department.

CHEN 354 Chemical Engineering Thermodynamics II
Credits 3. 3 Lecture Hours.
Applications of thermodynamics to pure and mixed fluids; phase equilibria and chemical reaction equilibria.
Prerequisites: CHEN 205 and MATH 308 with a grade of C or better; or approval of department.

CHEN 364 Kinetics and Reactor Design
Credits 3. 3 Lecture Hours.
Kinetics of reactions and application of fundamental principles to design and operation of commercial reactors.
Prerequisites: Grade of C or better in CHEN 320; grade of C or better in CHEN 323 and CHEN 324, or concurrent enrollment, or approval of department.

CHEN 399 Mid-Curriculum Professional Development
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point.
Prerequisites: CHEN 204 and ENGL 210; junior or senior classification or approval of instructor.

CHEN 409 Mathematical Models of Chemical Processes
Credits 3. 3 Lecture Hours.
Development of the mathematical models of chemical and physical processes common to the petroleum processing, chemical and associated industries.
Prerequisite: CHEN 324.

CHEN 422/BAEN 422 Unit Operations in Food Processing
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design of food process engineering systems; basic concepts of rheology and physical properties of foods; fundamentals of heat and mass transfer and process control.
Prerequisites: Grade of C or better in CHEN 205 and CHEN 304, or CVEN 305.
Cross Listing: BAEN 422/CHEN 422.

CHEN 425 Process Integration, Simulation and Economics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integration, simulation, and economic methods involved in the design of chemical processes and equipment.
Prerequisites: Grade of C or better in CHEN 320, CHEN 323, CHEN 354, and CHEN 324 or concurrent enrollment.

CHEN 426 Chemical Engineering Plant Design
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Integration of material from other chemical engineering courses with applications to the design of plants and processes representative of the chemical and related process industries.
Prerequisites: Grade of C or better in CHEN 425 and CHEN 364.
CHEN 430/SENG 430 Risk Analysis in Safety Engineering
Credits 3. 3 Lecture Hours.
Concepts of risk and risk assessment, which uses all available information to provide a foundation for risk-informed and cost-effective engineering practices; examples and exercises are drawn from a variety of engineering areas.
Prerequisite: Junior or senior classification.
Cross Listing: SENG 430/CHEN 430.

CHEN 431/BAEN 431 Fundamentals in Bioseparations
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design principles and application of chemical engineering unit operations to the production of therapeutic and bioactive molecules.
Prerequisite: Grade of C or better in BAEN 302, BMEN 282, CHEN 282, or CHEN 482.
Cross Listing: BAEN 431/CHEN 431.

CHEN 432 Chemical Engineering Laboratory I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Laboratory work based on CHEN 304 and CHEN 323.
Prerequisites: Grade of C or better in CHEN 323 and ENGL 210.

CHEN 433 Chemical Engineering Laboratory II
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Laboratory work based on CHEN 324, CHEN 364, CHEN 432, and CHEN 461.
Prerequisites: Grade of C or better in CHEN 324, CHEN 364, CHEN 432, and CHEN 461.

CHEN 440 Introduction to Transport Phenomena
Credits 3. 3 Lecture Hours.
Unifying principles and analytical description of phenomena of momentum transport (viscous flow), energy transport (heat conduction and convection) and mass transport (diffusion) in continuous media; similarities and differences in these phenomena.
Prerequisite: Senior classification or approval of instructor.

CHEN 450 Microfabrication and Microfluidics Technology
Credits 3. 3 Lecture Hours.
Micro Electro Mechanical Systems (MEMS) technology; study the fundamentals of fluidics, heat and mass transfer, surface chemistry, and electrochemical interactions.
Prerequisite: Junior or senior classification.

CHEN 451 Introduction to Polymer Engineering
Credits 3. 3 Lecture Hours.
Fundamentals of polymer reaction kinetics, morphology, chemical and rheological properties with applications to polymer synthesis, production and processing operations.
Prerequisite: Senior classification in chemical engineering or approval of instructor.

CHEN 455/SENG 455 Process Safety Engineering
Credits 3. 3 Lecture Hours.
Applications of engineering principles to process safety and hazards analysis, mitigation, and prevention, with special emphasis on the chemical process industries; includes source modeling for leakage rates, dispersion, analysis, relief valve sizing, fire and explosion damage analysis, hazards identification, risk analysis, accident investigations.
Prerequisite: Senior classification in any engineering major.
Cross Listing: SENG 455/CHEN 455.

CHEN 456 Advanced Chemical Process Optimization I
Credits 3. 3 Lecture Hours.
State-of-the-art optimization based techniques for process synthesis, process design and process operability; emphasis on mathematical modeling via mixed integer and continuous optimization formulations and application to heat integration problems; use modeling/optimization software systems.
Prerequisites: Senior classification or approval of instructor.

CHEN 457 Environmental Engineering
Credits 3. 3 Lecture Hours.
Overview of environmental engineering for chemical engineers; analyzing and solving environmental problems associated with engineered systems; emphasis on water/wastewater quality and treatment, air pollution control, and soil and hazardous waste management; includes guest lectures and field trips.
Prerequisites: CHEN 304 and CHEN 354 or approval of instructor; junior or senior classification; Qatar campus.

CHEN 458 Fundamentals of Environmental Remediation Processes
Credits 3. 3 Lecture Hours.
Fundamental approach to various remediation technologies; topics in environmental thermodynamics and mass transfer; adsorption, desorption, ion exchange, air stripping extractions, chemical oxidation, biodegradation.
Prerequisites: CHEN 354 and CHEN 324.

CHEN 459 Gas and Petroleum Processing
Credits 3. 3 Lecture Hours.
Design and operation of petroleum and gas processing facilities including hydrate suppression, dehydration, sweetening, sulfur recovery, LPG and liquid recovery, refining operations; analysis of the design and operations involving a large degree of process simulation.
Prerequisites: Grade of C or better in CHEN 323.

CHEN 460/SENG 460 Quantitative Risk Analysis in Safety Engineering
Credits 3. 3 Lecture Hours.
Fundamental concepts, techniques, and applications of risk analysis and risk-informed decision making for engineering students; practical uses of probabilistic methods are demonstrated in exercises and case studies from diverse engineering areas.
Prerequisite: Senior or graduate classification.
Cross Listing: SENG 460/CHEN 460.

CHEN 461 Process Dynamics and Control
Credits 3. 3 Lecture Hours.
Analysis of process dynamics and methods for the design of automatic control systems for chemical process plants.
Prerequisite: Grade of C or better in CHEN 320 and CHEN 364 or concurrent enrollment.

CHEN 463 Systems Biology
Credits 3. 3 Lecture Hours.
Experimental and computational techniques in systems biology; includes high throughput experiments, data analysis, modeling and simulation; discussed in the context to specific applications such as signal transduction.
Prerequisite: CHEN 482 or approval of instructor.

CHEN 469 Chemical Engineering Car Design
Credit 1. 1 Lecture Hour.
Application of chemical, physical and engineering principles in design process, idea generation and development of design concepts, economic, safety and performance analysis. May be taken four times for credit.
Prerequisites: CHEN 204, CHEN 205; junior or senior classification or approval of instructor.
CHEN 471/BAEN 471 Bioreactor Engineering
Credits 3. 3 Lecture Hours.
Fundamentals of microbial and enzyme kinetics; basic biochemical reaction theory and reactor systems; heterogeneous reactions and transport considerations in enzyme and cell reactors, and immobilized systems; bioreactor design considerations in bioprocessing.
Prerequisite: Grade of C or better in CHEN 282, CHEN 482, or BAEN 302; junior or senior classification or approval of instructor.
Cross Listing: BAEN 471/CHEN 471.

CHEN 475 Microelectronics Process Engineering
Credits 3. 3 Lecture Hours.
State-of-the-art process engineering principles on microelectronics, especially for the fabrication of very large scale integrated circuits (VLSICs); fundamental unit processes, such as thin film deposition, thermal growth, lithography, etching and doping, material structures and properties, and basic device operation principles.
Prerequisites: CHEN 354 and CHEN 364 or approval of instructor; CHEM 322.

CHEN 476 Applied Catalysis
Credits 3. 3 Lecture Hours.
Principles of catalysis and applications to industrial reactions; catalyst preparation, methods for catalyst characterization, deactivation mechanisms and regeneration techniques, catalyst testing (laboratory and industrial reactors), fundamentals of kinetics of heterogeneous reactions; applications to selected industrial processes.
Prerequisites: Grade of C or better in CHEN 354; Grade of C or better in CHEN 364 or concurrent enrollment; junior or senior classification; Qatar campus.

CHEN 481 Seminar
Credit 1. 2 Lab Hours.
Preparation of oral and written reports on selected topics from recent technical publications.
Prerequisites: Senior classification in chemical engineering; grade of C or better in CHEN 432 or concurrent enrollment and ENGL 210.

CHEN 482 Bioprocess Engineering
Credits 3. 3 Lecture Hours.
Application of engineering principles to design of biocatalysts and bioprocesses.
Prerequisite: Grade of C or better in CHEN 205; junior or senior classification.

CHEN 485 Directed Studies
Credits 1 to 5. 1 to 5 Other Hours.
Work covers one or more problems in chemical engineering processes or operations.
Prerequisite: Approval of department head.

CHEN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of chemical engineering. May be repeated for credit.
Prerequisite: Senior classification in chemical engineering or approval of instructor.

CHEN 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in chemical engineering. May be repeated 2 times for credit.
Prerequisites: Junior or Senior classification and approval of instructor.

CHIN 101 Beginning Chinese I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(CHIN 1411) Beginning Chinese I. Introduction to Chinese language, culture and history; development of communicative skills in daily conversation; ability to read and write about 150 commonly used Chinese characters.

CHIN 102 Beginning Chinese II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(CHIN 2311) Intermediate Chinese I. Development of comprehhension and production of spoken Chinese, with emphasis on connected discourse; acquisition of advanced language points; ability to read and write 250 or more characters.

CHIN 201 Intermediate Chinese I
Credits 3. 3 Lecture Hours.
(CHIN 2311) Intermediate Chinese I. Development of comprehhension and production of spoken Chinese, with emphasis on connected discourse; acquisition of advanced language points; ability to read and write 250 or more characters.

CHIN 202 Intermediate Chinese II
Credits 3. 3 Lecture Hours.
(CHIN 2312) Intermediate Chinese II. Continued development of effective communication skills in different aspects of daily Chinese conversation; ability to read and write simple, short paragraphs in Chinese.

CHIN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in Chinese, selected for each student individually; written or oral reports.
Prerequisite: Approval of instructor and Director of AALO.

CHIN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Chinese studies. May be repeated for credit.
Prerequisite: Approval of instructor.

CHIN 301 Reading and Composition
Credits 3. 3 Lecture Hours.
Development of advanced proficiency in reading and writing through contact with various written and spoken styles of modern Chinese as reflected in newspaper reports, radio and TV broadcasts.
Prerequisites: CHIN 202; junior or senior classification or approval of instructor.

CHIN 302 Reading and Composition II
Credits 3. 3 Lecture Hours.
Advanced proficiency in reading comprehension through contact with various written materials; development of cultural proficiency; development of writing skills with emphasis on new characters, new vocabulary and new sentence structures.
Prerequisites: CHIN 301; junior or senior classification or approval of instructor.

CHIN 405 Modern Chinese Fiction
Credits 3. 3 Lecture Hours.
Analysis of major Chinese literary and other prose works of the twentieth and twenty-first centuries; taught in English. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
CHIN 465/FILM 465 Chinese Film  
Credits 3. 3 Lecture Hours.  
Consideration and analysis of major works and directors of Chinese film; interpretation of culture through film; relationship of film to history, literature and other arts; taught in English. May be taken two times for credit.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: FILM 465/CHIN 465.

CHIN 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Individual supervision of readings or assigned projects selected for each student individually; written or oral reports.  
Prerequisite: Approval of instructor and Director of AALO.

CHIN 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Other Hours.  
Selected topics in an identified area of Chinese studies. May be repeated for credit.  
Prerequisite: Approval of instructor.

CLAS - Classics (CLAS)

CLAS 101 Beginning Classical Greek I  
Credits 4. 4 Lecture Hours.  
Introduction to the language and culture of Greece; basic grammar and vocabulary; readings and slide lectures designed to place language study in its cultural and artistic context.

CLAS 102 Beginning Classical Greek II  
Credits 4. 4 Lecture Hours.  
Continuation of CLAS 101; basic grammar and vocabulary; readings and slide lectures designed to place language study in its cultural and artistic context.  
Prerequisite: CLAS 101.

CLAS 121 Beginning Latin I  
Credits 4. 4 Lecture Hours.  
(LATI 1411) Beginning Latin I. Introduction to grammar and vocabulary with a contrastive approach; reading of graded material.

CLAS 122 Beginning Latin II  
Credits 4. 4 Lecture Hours.  
(LATI 1412) Beginning Latin II. Completion of elementary grammatical structures; introduction to Latin historians.  
Prerequisite: CLAS 121.

CLAS 211 Intermediate Greek  
Credits 3. 3 Lecture Hours.  
Completion of study of grammar and syntax; introduction to reading ancient Greek authors in the original language.  
Prerequisite: CLAS 102.

CLAS 220 History of Christianity: Origins to the Reformation  
Credits 3. 3 Lecture Hours.  
History of Christian doctrine, ecclesiastical organization, and religious practice, origins through Reformation, with emphasis on religion and society; life and teachings of Jesus; apostolic church; patriotic period; Christianization of Roman Empire and northern Europe; monasticism; medieval church; Gregorian reform; heresy; papal monarchy; schism and conciliarism; reformations of the sixteenth century.  
Cross Listing: HIST 220 and RELS 220.

CLAS 221 Intermediate Latin I  
Credits 3. 3 Lecture Hours.  
(LATI 2311) Intermediate Latin I. Practice in reading Latin prose writings, especially historical writings and letters.  
Prerequisite: CLAS 122.

CLAS 222 Intermediate Latin II  
Credits 3. 3 Lecture Hours.  
(LATI 2312) Intermediate Latin II. Practice in reading Latin poetry writings, especially Virgil, Horace and Ovid.  
Prerequisite: CLAS 221.

CLAS 236/HIST 236 War and Violence in the Ancient World  
Credits 3. 3 Lecture Hours.  
Equipment, organization, tactics and strategy on land and sea in the wars of the Ancient World, including the Near East, Greece and Rome; use of force and violence in the furtherance of political objectives and social control; winners, losers and survivors.  
Cross Listing: HIST 236/CLAS 236.

CLAS 250 Greek and Roman Civilization  
Credits 3. 3 Lecture Hours.  
Introduction to the civilizations of classical antiquity from Bronze Age Greece to the dissolution of the Roman Empire; examination of major social, intellectual, and political developments in ancient Greece and Rome.

CLAS 251/RELS 251 Classical Mythology  
Credits 3. 3 Lecture Hours.  
Introduction to the most important myths of the Greeks and Romans; ancient and modern methods of interpreting myths; the role of myths in ancient literature; readings in English.  
Cross Listing: RELS 251/CLAS 251.

CLAS 261 Great Books of the Classical Tradition  
Credits 3. 3 Lecture Hours.  
Survey of important and enduring works of literature, history and philosophy from Classical Antiquity (8th century BC to 2nd century AD), with emphasis on questions of morality and mentality.

CLAS 262 Great Books of Christian Antiquity and the Latin Middle Ages  
Credits 3. 3 Lecture Hours.  
Survey of important and enduring works of literature, history, and philosophy from Christian Late Antiquity and the Latin Middle Ages (4th to 13th centuries AD) with emphasis on questions of morality, religion, and mentality.

CLAS 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Individual supervision of readings or assigned projects in Classical Languages, selected for each student individually.  
Prerequisite: Approval of instructor and department head.
CLAS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Classical Languages. May be repeated for credit.
Prerequisite: Approval of instructor.

CLAS 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in classical studies. May be taken three times for credit.
Prerequisites: Freshman or sophomore classification and approval of department head.

CLAS 311 Advanced Greek: New Testament
Credits 3. 3 Lecture Hours.
Readings of the New Testament and works contemporary with it in the original language; introduction to the linguistic, historical, literary and cultural background of the New Testament. May be repeated for credit with different readings.
Prerequisite: CLAS 211.

CLAS 312 Advanced Classical Greek Poetry
Credits 3. 3 Lecture Hours.
Readings of selections from ancient Greek authors of poetry (lyric, epic, or drama) in the original language; discussion of the intellectual, historical, and literary background of the works, and of the lives and thought of the writers. May be repeated for credit with different readings.
Prerequisite: CLAS 211.

CLAS 313 Advanced Classical Greek Prose
Credits 3. 3 Lecture Hours.
Readings of selections from ancient Greek authors of prose (history, oratory, letters, philosophy) in the original language; discussion of the intellectual, historical, and literary background of the works, and of the lives and thought of the writers. May be repeated for credit with different readings.
Prerequisite: CLAS 211.

CLAS 320 Survey of Latin Literature
Credits 3. 3 Lecture Hours.
Latin literature from the republican through the imperial period; systematic overview of the development of literary genres and themes, to provide context for the intensive study of individual authors in other courses.
Prerequisite: CLAS 222 or equivalent.

CLAS 321 Advanced Latin Prose
Credits 3. 3 Lecture Hours.
Readings of selections from ancient Roman authors of prose (history, oratory, letters, philosophy) in the original language; discussion of the intellectual, historical and literary background of the works, and of the lives and thought of the writers. May be repeated for credit with different readings.
Prerequisite: CLAS 222 or equivalent.

CLAS 322 Advanced Latin Poetry
Credits 3. 3 Lecture Hours.
Readings of selections from ancient Roman authors of poetry (lyric, satire, epic, or drama) in the original language; discussion of the intellectual, historical, and literary background of the works, and of the lives and thought of the writers. May be repeated for credit with different readings.
Prerequisite: CLAS 222 or equivalent.

CLAS 330 Women in Ancient Greece and Rome
Credits 3. 3 Lecture Hours.
Survey of women in classical Greece and Rome; emphases on female occupations and family relationships, legal and political status, traditional values, notorious women, how women were viewed and how they viewed themselves.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 330 and WGST 330.

CLAS 352 Greek and Roman Drama
Credits 3. 3 Lecture Hours.
Dramatic literature of Ancient Greece and Rome; works of the major classical playwrights; the origins of comedy and tragedy; visual and musical aspects of production; political and intellectual ideas as reflected in the plays; readings in English.

CLAS 353/ANTH 353 Archaeology of Ancient Greece
Credits 3. 3 Lecture Hours.
Archaeology of ancient Greece from the Stone Age until the ascent of Rome in the Hellenistic Period; remains of ancient Greek art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions).
Prerequisite: Junior or senior classification.
Cross Listing: ANTH 353/CLAS 353.

CLAS 354/ANTH 354 Archaeology of Ancient Italy
Credits 3. 3 Lecture Hours.
Archaeology of ancient Italy from the Stone Age until the collapse of the Roman Empire in the fourth century; remains of ancient Etruscan and Roman art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions).
Prerequisite: Junior or senior classification.
Cross Listing: ANTH 354/CLAS 354.

CLAS 371 In Search of Homer and the Trojan War
Credits 3. 3 Lecture Hours.
The nature, background, authorship and historicity of the Iliad and the Odyssey; Aegean culture in the Stone, Bronze and early Iron ages; the value of Greek epics as historical documents; oral poetry; the Trojan War in Greek literature; readings in English; also taught at Galveston campus.

CLAS 372 Greek and Roman Epic
Credits 3. 3 Lecture Hours.
Study of the ancient epic in its historical and cultural context; oral poetry; Homer, archaeology, and history; creation of Greek mythology; Alexandrian written epic; early Latin epic; Virgil's Aeneid as national epic; Virgil and the Homeric tradition; Silver Age Latin epics; readings in English.
Prerequisite: Sophomore classification or approval of instructor.

CLAS 410 Seminar in Classical Studies
Credits 3. 3 Lecture Hours.
Exploration of a significant topic, work, or period in Greek or Roman literature, culture, or history; emphasis on development of research skills in Classical Studies. May be taken three times for credit.
Prerequisite: Junior or senior classification, or approval of instructor.
CLAS 415/FILM 415 The Ancient World in Film
Credits 3. 3 Lecture Hours.
Study of modern films as they relate to ancient literary texts that inspired them or with which they share common themes; relationship between Greek epic, tragedy, and comedy and their cinematic adaptations; treatment of Rome as an idea or ideal in the work of both ancient Romans and modern filmmakers.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: FILM 415/CLAS 415.

CLAS 417/ANTH 417 Naval Warfare and Warships in Ancient Greece and Rome
Credits 3. 3 Lecture Hours.
Extensive survey of Greek and Roman warships, naval warfare, naval strategy and tactics drawing upon archaeological evidence, literary documentation and iconographic material, from the Bronze Age (Ancient Egypt and the mythical Trojan War) to the Imperial Roman Navy.
Prerequisite: Junior or senior classification.
Cross Listing: ANTH 417/CLAS 417.

CLAS 418 Intellectual History from the Ancient Near East to the Early Middle Ages
Credits 3. 3 Lecture Hours.
Political, social, cultural and religious histories of significant figures, groups, schools of thought and movements in western Afro-Eurasia from the Assyrian Empire to the later Roman Empire; developments in political theory, literature, sociology, arts, architecture, music, philosophy, law, sciences and education.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 418 and RELS 418.

CLAS 426/HIST 426 The Ancient Greeks
Credits 3. 3 Lecture Hours.
Greek History and civilization from the Archaic Age to Alexander the Great (8th-late 4th century B.C.).
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HIST 426/CLAS 426.

CLAS 427/HIST 427 The Roman Republic
Credits 3. 3 Lecture Hours.
Major events and issues in Roman history from the beginnings of the Republic to its incipient disintegration.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HIST 427/CLAS 427.

CLAS 428/HIST 428 The Roman Empire: Principate
Credits 3. 3 Lecture Hours.
Major events and issues in Roman history from the late Republic to the consolidation of the state of Late Antiquity.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HIST 428/CLAS 428.

CLAS 429/HIST 429 The Roman Empire: Transformations
Credits 3. 3 Lecture Hours.
Major events and issues in Roman history from the rise of Christianity as an imperial religion to the end of Late Antiquity.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HIST 429/CLAS 429.

CLAS 444/ANTH 444 Classical Archaeology
Credits 3. 3 Lecture Hours.
History of the discipline through the individuals, organizations, excavations, theoretical models and ethical issues that have shaped it.
Prerequisites: Junior or senior classification.
Cross Listing: ANTH 444/CLAS 444.
COMM 230/JOUR 230 Communication Technology Skills
Credits 3. 3 Lecture Hours.
Introduction to interactive media and media literacy skills in the digital domain; survey of technology histories, standards, and markets for industries such as multichannel TV, digital radio, video games, streaming media, publishing, teleconferencing, and social networking.
Prerequisite: Enrollment in communication or telecommunication media studies majors, USLA-BA-JNS concentration, or JOUR minor.

COMM 240 Rhetorical Criticism
Credits 3. 3 Lecture Hours.
Principles and practice of the analysis of speeches and other forms of public discourse; compares systems of rhetorical criticism, such as neo-classical analysis, mythic analysis, rhetorical genres and close textual analysis.

COMM 243 Argumentation and Debate
Credits 3. 3 Lecture Hours.
(SPCH 233S) Argumentation and Debate. Principles of argumentation and skills of debate, including reasoning, evidence, refutation, and briefing.

COMM 245 Difficult Dialogues on Power, Privilege, and Difference
Credits 3. 3 Lecture Hours.
Introduction to the practice of difficult dialogues; skills development in the use of the dialogical tools of active listening, perspective-taking, deliberation, collaborative decision-making, teamwork and collective problem-solving in the context of bias, prejudice, discrimination, power, equity and privilege.

COMM 250/JOUR 250 New Media and the Independent Voice
Credits 3. 3 Lecture Hours.
Examination of new media as independent voices for cultural and political movements; principles governing the design, presentation, and evaluation of blogs as a persuasive medium in society.
Cross Listing: JOUR 250/COMM 250.

COMM 257/RELS 257 Communication, Religion and the Arts
Credits 3. 3 Lecture Hours.
Introduction to artistic, religious communication; survey of communication art and media art practices across religious contexts; consideration of communication aesthetics that mediate religious experience.
Cross Listing: RELS 257/COMM 257.

COMM 260 Introduction to Communication and Sports
Credits 3. 3 Lecture Hours.
Introduction to the process of communicating sports to the public via television, blogging, online sites and print articles; evaluation of sportscasts; writing about sporting events; examination of the types of communication used within sporting teams.

COMM 275 Introduction to Social Media
Credits 3. 3 Lecture Hours.
Theoretical and practical approaches to social media; overview of social media, social media concepts and theories; social media applications and contexts.

COMM 280 Careers in Communication
Credit 1. 1 Lecture Hour.
Introduction to careers in communication; emphasis on strengths and personality in selecting a profession, application letters, information interviews, mock interviews; must be taken on satisfactory/unsatisfactory basis.
Prerequisites: Sophomore classification or approval of instructor; COMM and TCMS majors.

COMM 285 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Individual supervision of readings or assigned projects in communication. May be taken two times for credit.
Prerequisites: Approval of instructor and department head.

COMM 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of communication. May be repeated for credit.
Prerequisite: Approval of instructor.

COMM 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in the department of communication. May be repeated 3 times for credit.
Prerequisites: GPA 2.5 or higher; freshman or sophomore classification and approval of instructor and department head.

COMM 301 Rhetoric in Western Thought
Credits 3. 3 Lecture Hours.
Historical and critical evaluation of rhetorical theory from the classical era to the contemporary period—from Aristotle to Kenneth Burke. Major theories of communication and persuasion developed in Europe and America.
Prerequisite: Junior or senior classification.

COMM 302/POLS 302 The Mass Media and Politics
Credits 3. 3 Lecture Hours.
Examination of mass media impact on politics and political behavior, and governmental impact on the mass media.
Prerequisite: POLS 206 or approval of department head; junior or senior classification.
Cross Listing: POLS 302/COMM 302.

COMM 303 Communication Data Applications
Credits 3. 3 Lecture Hours.
Overview of communication using big data; data management, extraction and visualization; message construction, message critique; uses and applications in the field of communication and media for evidence-based arguments, persuasion, education and digital storytelling.
Prerequisite: Junior or senior classification.

COMM 305 Theories of Communication
Credits 3. 3 Lecture Hours.
Theoretical approaches to human communication, including selected theories of language behavior, interpersonal and small group interaction, and persuasion.
Prerequisite: Junior or senior classification, or approval of instructor.

COMM 307/JOUR 301 Communication Law and Policy
Credits 3. 3 Lecture Hours.
Law and policy that create the context and consequences for communication via mass media, social media, organizational, group and interpersonal communication, free speech, free press, libel, privacy, copyright, cybersecurity, constitutional principles, international law and human rights, fairness, equity and diversity in communication.
Prerequisite: Junior or senior classification, or approval of instructor; COMM-307 also taught at Galveston campus.
Cross Listing: JOUR 301/COMM 307.
COMM 308 Research Methods in Communication
Credits 3.3 Lecture Hours.
Survey of methods used in communication research including quantitative, interpretive and rhetorical methods; formulating research questions, determining the appropriate method, planning and designing the research, data collection, and data analysis and interpretation. 
Prerequisite: MATH 140, MATH 168, MATH 166, or STAT 201; MATH 131, MATH 142, MATH 151, or PHIL 240, or MATH 151 or MATH 152.

COMM 309 Research Method Projects
Credits 3.3 Lecture Hours.
Research methods in communication including experimental, survey, interpretive and critical methods; emphasis on research design, data collection, analysis, interpretation and presentation; project based.
Prerequisites: Grade of C or better in COMM 308; STAT 303; junior or senior classification.

COMM 310 Communication Intervention
Credits 3.3 Lecture Hours.
Communication interventions for personal, organizational, and institutional change; survey of major communication intervention theories in contexts such as voting, purchasing, joining, or adopting; individual-level, interpersonal level, and community-level models of change; application of social science-based models to guide communication intervention strategies effectively.
Prerequisites: Grade of C or better in COMM 305; junior or senior classification.

COMM 311 Interpersonal Communication
Credits 3.3 Lecture Hours.
Speech interaction in person-to-person settings; concepts of perception, attraction, self-disclosure, listening, and conflict management through communication; speech interaction patterns and stages in the development of interpersonal communication.
Prerequisite: Junior or senior classification.

COMM 312 Organizational Communication
Credits 3.3 Lecture Hours.
Speech communication behavior and networks within organizations; recent research on speech communication systems, communication climate, and communication barriers in organizational settings.
Prerequisite: Junior or senior classification.

COMM 313 Media Psychology
Credits 3.3 Lecture Hours.
Examine the role of media and its impact on human behavior, emotions and thoughts; topics include mass media, social media and how they influence individual and societal functioning across a range of important psychological topics; e.g., self-image, sexual behavior, mental health, violence.
Prerequisites: PSYC 107.
Cross Listing: PSYC 316/COMM 316.

COMM 314/PSYC 314 Media Psychology
Credits 3.3 Lecture Hours.
Examine the role of media and its impact on human behavior, emotions and thoughts; topics include mass media, social media and how they influence individual and societal functioning across a range of important psychological topics; e.g., self-image, sexual behavior, mental health, violence.
Prerequisites: Grade of C or better in COMM 307/JOUR 301 or JOUR 301/COMM 307; junior or senior classification or approval of instructor.
Cross Listing: JOUR 317/COMM 317.

COMM 315 Interpersonal Communication
Credits 3.3 Lecture Hours.
Speech interaction in person-to-person settings; concepts of perception, attraction, self-disclosure, listening, and conflict management through communication; speech interaction patterns and stages in the development of interpersonal communication.
Prerequisite: Junior or senior classification.

COMM 316/PSYC 316 Media Psychology
Credits 3.3 Lecture Hours.
Examine the role of media and its impact on human behavior, emotions and thoughts; topics include mass media, social media and how they influence individual and societal functioning across a range of important psychological topics; e.g., self-image, sexual behavior, mental health, violence.
Prerequisites: PSYC 107.
Cross Listing: PSYC 316/COMM 316.

COMM 317/JOUR 317 Social Media Law
Credits 3.3 Lecture Hours.
Laws and regulations applied to social media, including communication law applied to enduring issues in the social media context; legal problems unique to social media; free speech, commercial speech and employment law as they affect individual users of social media as well as groups and organizations promoting points of view or products via social media, and employers.
Prerequisites: Grade of C or better in COMM 307/JOUR 301 or JOUR 301/COMM 307; junior or senior classification or approval of instructor.
Cross Listing: JOUR 317/COMM 317.

COMM 320 Organizational Communication
Credits 3.3 Lecture Hours.
Speech communication behavior and networks within organizations; recent research on speech communication systems, communication climate, and communication barriers in organizational settings.
Prerequisite: Junior or senior classification.

COMM 321 Strategic Communication Case Studies
Credits 3.3 Lecture Hours.
Strategic communication practice; application of skills including communication research, media writing and advanced media writing, visual media and public speaking; service-learning as not-for-fee consultant to a community organization.
Prerequisites: Grade of C or better in COMM 323 and COMM 322; junior or senior classification or approval of instructor.

COMM 322 Communication Tactics
Credits 3.3 Lecture Hours.
Examination of strategic use of communication tactics; analysis of new and digital media in organizational and public communication; skill development in strategic use of communication tactics including writing for new media, researching, planning, integrating and evaluating effectiveness of traditional and new media tactics in strategic public communication.
Prerequisite: Grade of C or better in COMM 323, junior or senior classification.

COMM 323 Strategic Communication
Credits 3.3 Lecture Hours.
Application of strategic communication tools to create and influence policy, to improve profit and non-profit strategic communication planning.
Prerequisite: Junior or senior classification.

COMM 324 Communication Leadership and Conflict Management
Credits 3.3 Lecture Hours.
Communication perspective of leadership, of conflict, of management of conflict in interpersonal, group and societal contexts; models of leadership as communication phenomenon; use of symbols by leaders to foster collaboration, systemic constructionist approach.
Prerequisite: Junior or senior classification.

COMM 325 Persuasion
Credits 3.3 Lecture Hours.
Theory of effective persuasive communication in interpersonal, small group, and public settings; audience analysis, ethics of persuasion, motivational factors, psychological and rhetorical principles, source credibility, and theories of attitude change.
Prerequisite: Junior or senior classification.

COMM 326 Event and Communication Planning
Credits 3.3 Lecture Hours.
Role of integrated communication in event planning; approaches for implementation in specific contexts such as conferences, professional meetings, celebratory events and programs for community outreach; professional, interpersonal and organizational coordination of information, people and budget; theory-informed action (praxis) approach.
Prerequisites: Junior or senior classification, or approval of instructor.

COMM 327 American Oratory
Credits 3.3 Lecture Hours.
Survey of significant American oratory; critical analysis of important speeches in their historical, political, social, and philosophical contexts.
Prerequisite: Junior or senior classification.

COMM 330 Technology and Human Communication
Credits 3.3 Lecture Hours.
Nontechnical survey of how modern technologies influence human communication including an introduction to communication technologies; the influence of technology on interpersonal communication, group decision-making and public communication; an analysis of argumentation and persuasion in technological issues.
Prerequisite: Grade of C or better in COMM 230/JOUR 230.
COMM 335 Intercultural Communication
Credits 3.3 Lecture Hours.
Communication variables in intercultural contexts including culture and
meaning, nonverbal styles across cultures, patterns of symbolic transfer,
culture shock and communication, values in intercultural dialogue.
Prerequisite: Junior or senior classification; also taught at Qatar campus.

COMM 338/AFST 338 Critical Race Discourse
Credits 3.3 Lecture Hours.
Critical analysis of communication and dialogue on race; causes and
symptoms of structural racism; social/racial hierarchies as they influence
and are influenced by communication and dialogue.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: AFST 338/COMM 338.

COMM 340 Communication and Popular Culture
Credits 3.3 Lecture Hours.
Survey of theories and concepts of popular culture; dynamic relationships
between pop culture and television, film, sports, politics and leisure.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 342 The Rhetoric of Gender and Health
Credits 3.3 Lecture Hours.
Study of field of rhetoric of health and medicine with specific attention
to the study of gender, including issues in reproduction, expertise and
illness; range of methods and methodological approaches within the
field.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 342 and WGST 342.

COMM 343 Communication and Cultural Discourse
Credits 3.3 Lecture Hours.
Examination of key concepts and theories relevant to communicating in
an increasingly diverse world; consideration of the mutual constitution
of culture and communication; investigation of multiple axes of identity;
critical/cultural approach; public advocacy project.
Prerequisites: Junior or senior classification or approval of instructor.

COMM 345/FILM 345 Media Industries
Credits 3.3 Lecture Hours.
Survey of the business organization, economic structures and processes,
and regulations of the media industry.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FILM 345/COMM 345.

COMM 346 Media, Culture and Identity
Credits 3.3 Lecture Hours.
Media representations relating to power, privilege and difference;
communication theories and concepts centered on how media and
technology-use shape, and are shaped by, identity; critical analysis of
media as sites for negotiation and construction of identities such as
gender, race, ethnicity, sexuality, social class, physical/mental ability,
nationality and religion; reflection on and analysis of bias, prejudice,
discrimination, power, equity and privilege.
Prerequisites: Junior or Senior classification or approval of instructor.

COMM 350 Theories of Mediated Communication
Credits 3.3 Lecture Hours.
Survey of different theories of mediated communication processes and
effects; functions of theories in social scientific research on media and
mediated processes.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 354 Money, Power and Communication
Credits 3.3 Lecture Hours.
Interrelationships between money and power and communication;
the influence of media and communication on power and money;
communication law and policy; the political economy of local, national,
and global communication networks.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 360 Cultural History of the Media
Credits 3.3 Lecture Hours.
Origins and development of the mass media; their influence on social,
political, and cultural change; history of mass communication from
historical, sociological, and cultural perspectives.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 365/JOUR 365 International Communication
Credits 3.3 Lecture Hours.
Mass media, international, and cross-cultural audiences; theoretical,
pragmatic, political and ethical issues; including cultural differences,
comparative media systems, development communication, patterns of
world news flow, political propaganda, impact of international advertising
and other issues.
Prerequisite: Junior or senior classification; COMM-365 also taught at
Galveston and Qatar campuses.
Cross Listing: JOUR 365/COMM 365.

COMM 370 Health Communication
Credits 3.3 Lecture Hours.
Survey of theory and research in health communication, including
interaction between patients and providers, communication in health care
organizations, health care campaigns, and cultural meanings of health
and illness.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 375 Media Audiences
Credits 3.3 Lecture Hours.
Media audiences; research and theory; processes and effects of mass
communication; audience members’ uses and interpretations of media;
topics including political media, news, and entertainment, health and
information campaigns, children and other special audiences.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 403 Media, Children and Adolescents
Credits 3.3 Lecture Hours.
Critical analysis of popular culture and mass media issues related to
children and adolescents; deconstruction of media created by, for and
about children and youth.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 407/WGST 407 Gender, Race and Media
Credits 3.3 Lecture Hours.
The contributions of women and ethnic groups to the evolution of the
media; the portrayal of women and ethnic groups in the mass media;
issues resulting from the recognition of women and ethnic groups as
media audiences.
Prerequisites: Junior or senior classification and approval of instructor.

COMM 410 Radio, Records, and Popular Music
Credits 3.3 Lecture Hours.
History of radio and record industries; communication technology
and media industries related to American popular music; interaction
of communication technologies, media industries, social and cultural
processes in evolution of popular music.
Prerequisite: Junior or senior classification or approval of instructor.
COMM 411/WGST 411 Representations of Motherhood
Credits 3. 3 Lecture Hours.
Examination of understandings of motherhood from a humanities perspective and over a variety of cultures and time periods, as reflected in written, media and/or oral texts.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: WGST 411.

COMM 415 New Media and Civil Society
Credits 3. 3 Lecture Hours.
Critical analysis of new media technologies, civic participation, and social capital in democratic, non-democratic, and nascent civil societies around the world.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 420/WGST 420 Gender and Communication
Credits 3. 3 Lecture Hours.
Survey of the role of gender in communication processes; focus on communication differences between men and women in contexts such as the family, school and work organizations; discussion of media influence in gender stereotypes.
Cross Listing: WGST 420.

COMM 425/AFST 425 Rhetoric of the Civil Rights Movement
Credits 3. 3 Lecture Hours.
Rhetorical evaluation of theoretical literature and pragmatic episodes that shaped the U.S. Civil Rights Movement; examination of significant speeches, documents, and protest activities in their historical, political, and social contexts.
Cross Listing: AFST 425.

COMM 428/WGST 428 Women’s Rhetoric
Credits 3. 3 Lecture Hours.
Examination of the historical imbrication of masculinity and rhetoric in relation to women’s participation in political life, reception of women’s rhetoric in the public sphere, and remembrance and representation of women as rhetorical agents throughout history; consideration of women’s rhetoric in various cultural arenas.
Prerequisite: Junior or senior classification.
Cross Listing: WGST 428.

COMM 431 Rhetoric of Social Movements
Credits 3. 3 Lecture Hours.
Survey of events and rhetorical documents of major U.S. social movements, including abolitionist, labor, socialist, women’s rights, civil rights, pro-life, gay and lesbian, and student movements.
Prerequisites: COMM 301; junior or senior classification.

COMM 434 Topics in Rhetorical Theory
Credits 3. 3 Lecture Hours.
Application of rhetorical theories and concepts to rhetorical problems and methods; emphasis on the relationship between theory and practice. May be taken two times for credit.
Prerequisite: Junior or senior classification.

COMM 435/FILM 445 Rhetoric of Television and Film
Credits 3. 3 Lecture Hours.
Critical analysis of television and film; close readings of such mediated texts; special attention to writing television and film criticism.
Prerequisite: Junior or senior classification.
Cross Listing: FILM 445.

COMM 437 Visual Communication
Credits 3. 3 Lecture Hours.
Critical analysis of visual communication including photographs, advertising, memorials, tattoos, comics, public protest.
Prerequisite: Junior or senior classification.

COMM 438 Propaganda
Credits 3. 3 Lecture Hours.
Examination of common propaganda strategies in contemporary mass mediated environments.
Prerequisite: Junior or senior classification.

COMM 440 Political Communication
Credits 3. 3 Lecture Hours.
Rhetorical analysis of messages, media and speakers in political campaigns, institutions and movements.

COMM 443 Communication and Conflict
Credits 3. 3 Lecture Hours.
Communication principles for addressing conflict situations through such practices as negotiation, mediation and arbitration; the study of strategies, influence and language in conflict management approaches.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 446 Communication, Organizations and Society
Credits 3. 3 Lecture Hours.
Communicative processes through which organizations influence and are influenced by the societies from which they draw their members.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 447 Communication, Group Processes and Collaboration
Credits 3. 3 Lecture Hours.
Communication processes in teamwork including collaboration in dyads, teams, and group processes that contribute to or detract from team effectiveness.
Prerequisites: COMM 210; junior or senior classification.

COMM 450 Media Campaigns
Credits 3. 3 Lecture Hours.
Principles of designing media campaigns as applied to commercial advertising, political advertising and health campaigns; processes that drive the planning and execution of these campaigns.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 452 Cultural Studies of Communication Technology
Credits 3. 3 Lecture Hours.
Exploration of theories concerning technology; emphasis on technological culture; examination of the emergence of and societal reactions to technologies during modern era; consideration of utopian/dystopian discourse of technology in popular media narratives; contemplation of technology as constitutive of power and knowledge.
Prerequisite: Junior or senior classification.

COMM 453 Communication and Video Games
Credits 3. 3 Lecture Hours.
Business and industry aspects of video games; cultural and social aspects of gaming.
Prerequisite: Junior or senior classification.

COMM 458/JOUR 458 Global Media
Credits 3. 3 Lecture Hours.
Study of globalization through media ownership; content, flow, cultural values, political power and technological impact; implications of globalization for local economies and audiences.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: JOUR 458.
COMM 460 Communication and Contemporary Issues  
Credits 3. 3 Lecture Hours.  
Rhetorical and other critical approaches to study how communication practices influence the construction of social issues. May be taken two times.

COMM 470 Communication in Health Care Contexts  
Credits 3. 3 Lecture Hours.  
Principles of health communication applied in situations ranging from physician-patient communication to public health campaign theory, design, implementation and evaluation. May be taken two times.

COMM 471 Media, Health and Medicine  
Credits 3. 3 Lecture Hours.  
Analysis and evaluation of representations of health in media; examination of gender, class and race as they intersect with health issues.  
Prerequisite: Junior or senior classification.

COMM 476 Advanced Social Media  
Credits 3. 3 Lecture Hours.  
Analysis of social media platforms and social media accounts used by organizations and individuals in professional contexts; production of individual posts for various purposes and goals; production of photos, videos and graphics for social sharing.  
Prerequisites: Grade of B or better in COMM 275; junior or senior classification.

COMM 480/RELS 480 Religious Communication  
Credits 3. 3 Lecture Hours.  
The role of religious communication as manifested in speeches, sermons, debates, campaigns, and social movements throughout history. May be taken two times for credit.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: RELS 480/COMM 480.

COMM 482 Health Humanities Senior Seminar  
Credits 3. 3 Lecture Hours.  
Capstone course; application of skills and knowledge acquired during health humanities concentration coursework; exposure to specialized methods of inquiry; development and execution of an individualized final project.  
Prerequisites: ENGL 107, COMM 107, or HHUM 107; junior or senior classification.  
Cross Listing: ENGL 482 and HHUM 482.

COMM 483 Health Communication Practicum  
Credits 0-1. 0-1 Other Hours.  
Directed individual health communication practicum.  
Prerequisites: Junior or senior classification and approval of instructor.

COMM 484 Internship in Communication  
Credits 0 to 23. 0 to 23 Other Hours.  
Directed internship in a public or private organization to provide students with on-the-job training and applied research experience; application of communication theory and practice in career settings; designed to enhance and clarify students’ career objectives. May be repeated for credit. Must be taken S/U.  
Prerequisites: Cumulative GPR of 2.5 or higher for credits taken in residence; approval of department head.

COMM 485 Directed Studies  
Credits 0 to 3. 0 to 3 Other Hours.  
Directed individual study of identified topics in communication; may include specific research, readings or other approved project in any area of communication; written report is required. May be repeated for credit.  
Prerequisites: Cumulative GPR of 2.5 or higher; approval of instructor and department head.

COMM 487 Communication, Diversity and Social Justice Capstone Experience  
Credits 0-1. 0-1 Other Hours.  
Directed individual communication, diversity, social justice capstone experience.  
Prerequisites: Junior or senior classification and approval of capstone director.

COMM 488 Global Media Practicum  
Credits 0-1. 0-1 Other Hours.  
Directed global media experience.  
Prerequisites: Junior or senior classification and approval of instructor.

COMM 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of communication. May be repeated for credit.

COMM 491 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research conducted under the direction of faculty member in the department of communication. May be taken four times for credit.  
Prerequisites: GPA 2.5 or higher; junior or senior classification and approval of instructor and department head.

COMM 497 Independent Honors Studies  
Credits 0 to 3. 0 to 3 Other Hours.  
Directed independent studies for upper division Honors students, regardless of academic major, in select aspects of communication. May be repeated for credit.  
Prerequisites: Junior or senior classification either as Honors student or with GPR of 3.25; letter of approval from head of student’s department.

COSC 153 Introduction to the Construction Industry  
Credits 3. 3 Lecture Hours.  
Characteristics of the construction industry; types of construction companies; contracts; people involved in a project, their responsibilities and interrelationships; evolution of a project; interpreting working drawings; construction bonds; contract documents.

COSC 175/AREN 175 Construction Graphics Communication  
Credits 3. 3 Lecture Hours.  
Visualization, interpretation and communication of graphical geometry in construction design and engineering; graphical analysis of problems; sketching applications, computer aided design and fundamentals of information modeling software; introduction to common quantitative tools in construction.  
Prerequisite: AREN and COSL majors only.  
Cross Listing: AREN 175/COSC 175.
COSC 184 Construction Safety I  
Credit 1. 1 Lecture Hour.  
Administration and application of the OSHA Act in the construction industry; includes standards, the general duty clause, competent person, and hazard identification; fulfills the requirements for the ten-hour OSHA certifications.  
Prerequisite: Construction science major.

COSC 202 Introduction to Housing  
Credits 3. 3 Lecture Hours.  
Overview of the social, economic, environmental and cultural impacts of housing on communities and nations; varied prospective to understand the different facets of housing and their impacts on the human experience; critical thinking skills to gain knowledge and to be informed of housing choices.

COSC 253 Construction Materials and Methods I  
Credits 3. 3 Lecture Hours.  
(ARCH 2312) Construction Materials and Methods I. Materials, methods and sequences of the construction process; emphasis on design, specification, purchase and use of concrete, masonry and wood.

COSC 254 Construction Materials and Methods II  
Credits 3. 3 Lecture Hours.  
Analysis of materials and methods used in the design and construction of buildings with a particular emphasis on structures using structural steel reinforced concrete and dimensional framing lumber.  
Prerequisite: COSC 253.

COSC 275 Estimating I  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Systems approach to determining required quantities of construction materials; quantification of various types of foundation systems, structural systems and building envelope systems; excerpts of contract documents from a variety of different building projects.  
Prerequisites: COSC 175/AREN 175; COSC 254.

COSC 284 Introduction to Applied Workplace Ethics, Etiquette and Communications  
Credit 1. 1 Lecture Hour.  
Professional ethics, etiquette and communication for employment preparation with a construction or construction related company; various case studies emphasizing personal accountability, integrity and codes of conduct; etiquette and communication of all forms will be presented, applied and discussed in reflective writing assignments in order to prepare to meet the professional expectations of employers upon graduation.  
Prerequisite: Construction science majors.

COSC 285 Directed Studies  
Credits 1 to 3. 1 to 3 Other Hours.  
Special project in construction science. Project must be approved by the department.  
Prerequisite: Approval of department head.

COSC 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in construction science. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification; approval of instructor.

COSC 301 Construction Surveying  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
Practical applications of surveying to the practice of construction project management; distance, grade and angular measurement; surveying equipment and its application to construction layout and control; surveying documentation and field work; introduction to other three dimensional measurement and positioning systems.  
Prerequisite: Admission to upper level in Construction Science.

COSC 303 High Performance Residential Building  
Credits 3. 3 Lecture Hours.  
Exploration into the concepts of homebuilding operations using green building methods, tools to reach consumers, organizational and operational theories and market driven green building solutions; alignment with ICC 700 National Green Building Standard; operations of publicly traded and private production homebuilders and best practices; application for the professional designation of Certified Green Professional (CGP) given by the National Association of Home Builders (NAHB) upon completion.  
Prerequisites: Upper division construction science major or approval of instructor.

COSC 310 Design and Construction Leadership Education I  
Credit 1. 1 Lecture Hour.  
Promotion of personal leadership skills utilized within the design and construction professions; primary understanding and developing management skills with specific attention to developing personal attributes and skills necessary for achieving organizational goals.  
Prerequisites: CARC majors only pursuing the minor in leadership in the design & construction professions; junior or senior classification or approval of instructor.

COSC 321 Structural Systems I  
Credits 3. 3 Lecture Hours.  
Introduction to the physical principles that govern classical statics and strengths of materials through the design of architectural structures.  
Prerequisite: Admission to upper level in Construction Science.

COSC 325 Mechanical, Electrical and Plumbing Systems in Construction I  
Credits 3. 3 Lecture Hours.  
Design, operation, materials and installation methods of mechanical, electrical and plumbing systems in construction.  
Prerequisite: Admission to upper level in construction science or minor in facility management.

COSC 326 Mechanical, Electrical and Plumbing Systems in Construction II  
Credits 3. 3 Lecture Hours.  
In depth coverage of mechanical, electrical and plumbing (MEP) system operations, materials and installation methods; development of MEP drawings, specifications and contract documents as used in MEP specialty contracting industry.  
Prerequisite: COSC 325.

COSC 333 Project Management for Facility Managers  
Credits 3. 3 Lecture Hours.  
Overview of project management for facility managers covering concepts and components of project management and their interrelationships in construction practice.  
Prerequisite: Minor in facility management; junior or senior classification or approval of instructor.
COSC 353 Construction Project Management
Credits 3. 3 Lecture Hours.
An introduction to construction project management covering concepts of project selection, estimating bidding, scheduling, subcontracting practices, cost controls, project documentation, construction bonds, insurance, payments and the elements of close out; development of professional communication skills through prepared multi-media presentations.
Prerequisite: Admission to upper level in Construction Science.

COSC 375 Estimating II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Quantification and pricing of direct field costs and general condition costs from construction documents; the preparation of complete lump sum bid package ready for project execution; complete set of contract documents required.
Prerequisites: Admission to upper level in Construction Science; COSC 275.

COSC 381 Professional Ethics in the Construction Industry
Credit 1. 1 Lecture Hour.
Principles of ethical behavior in preparation for a professional internship with a construction or construction-related company; various construction company case studies emphasizing personal accountability, integrity, moral courage, individual, association and company codes of conduct; accepted business practices, decision making, company cultures, peer pressure, public opinion.
Prerequisite: Admission to upper level in Construction Science.

COSC 410 Design and Construction Leadership Education II
Credit 1. 1 Lecture Hour.
Development of competencies in various leadership and management practices that are useful in an array of situations; emphasis on organizational leadership and management development with specific attention to intragroup relationships and techniques for achieving group goals.
Prerequisites: COSC 310, CARC majors only pursuing the minor in leadership in the design and construction professions; junior or senior classification or approval of instructor.

COSC 411 Seminar in Design and Construction Executive Leadership
Credit 1. 1 Lecture Hour.
Promotes an understanding of leadership and builds the capacity to understand and meet the challenges involved in developing and leading ethical and sustainable organizations in today's economy; examination of theory, conceptualizing, reflection and application; share experiences in everyday life and learn to predict outcomes based on theoretical models.
Prerequisite: COSC 410; CARC majors only pursuing the minor in leadership in the design and construction; junior or senior classification or approval of instructor.

COSC 421 Soil and Structural Analysis.
Credits 3. 3 Lecture Hours.
Advanced structural analysis of steel and concrete members with an introduction to soil properties and constituents; utilizations of computer analysis tools.
Prerequisite: COSC 321.

COSC 440 Interdisciplinary Capstone
Credits 3. 3 Lecture Hours.
A senior capstone for students preparing to enter the designbuild sector of the construction industry; integration of the design and construction processes into a single, cohesive project delivery system, starting with project inception, and carrying through construction, operation and maintenance of various types of construction projects.
Prerequisites: COSC 475; must be taken last full semester or summer before graduation.

COSC 441 Residential Capstone
Credits 3. 3 Lecture Hours.
A senior capstone course for students preparing to enter the residential construction industry; project management of residential projects, including market analysis, site analysis, residential design, building codes, estimating, scheduling, financing, subcontracting, marketing, business planning and current trends in design and construction.
Prerequisites: COSC 475; must be taken last full semester or summer before graduation.

COSC 442 Commercial Capstone
Credits 3. 3 Lecture Hours.
A senior capstone course for students preparing to enter the commercial construction sector; project management of commercial construction projects, including aspects of design, bidding/estimating; presentation, value engineering, contracts/negotiation, contractor relations, cost controls, management during construction, close out, and post-construction requirements.
Prerequisites: COSC 475; must be taken last full semester or summer before graduation.

COSC 443 Industrial Capstone
Credits 3. 3 Lecture Hours.
A senior capstone course for students preparing to enter the industrial construction sector; project management of industrial construction projects including project acquisition, planning and staffing, engineering, procurement, construction, start-up, close out, operations and maintenance, and turn-arounds.
Prerequisites: COSC 475; must be taken last full semester or summer before graduation.

COSC 446 Specialty Capstone
Credits 3. 3 Lecture Hours.
Senior capstone course for students preparing to enter the mechanical, electrical or other specialty construction company; project management of specialty contracts including project acquisition, schematic system design, estimating/bidding, scheduling, systems integration, value engineering, management during construction of crews and procurement, contract administration, business planning and current industry issues.
Prerequisites: COSC 475; must be taken last full semester or summer before graduation.

COSC 450 Facility Management Principles and Practices
Credits 3. 3 Lecture Hours.
Principles of facility management; the life cycle of a project; strategic planning; performance measurements; life cycle cost approach; building sustainability; maintenance management; and industry practices.
Prerequisite: Admission to upper level in construction science or minor in facility management.
COSC 459 Industrial Construction
Credits 3. 3 Lecture Hours.
Industry specific knowledge such as concepts of developing construction management strategies of industrial projects, materials and methods, structural and mechanical components; preparation to effectively resolve challenges faced in the industrial construction sector.
Prerequisites: Admission to upper level in construction science; COSC 375.

COSC 461 Building Information Modeling System
Credits 3. 3 Lecture Hours.
Exploration of a data-rich, object-oriented, and parametric digital representation of the facility, from which views and information can be extracted and analyzed for construction project acquisition, planning, and control.
Prerequisite: Admission to upper level in Construction Science.

COSC 463 Introduction to Construction Law
Credits 3. 3 Lecture Hours.
Introduction to basic contract and tort issues and their application in the construction industry; delineation of the various types of contracts and remedies available to parties involved in a construction project; additional related topics including bidding, delays, mechanics liens, site conditions, warranties and the Uniform Commercial Code as it relates to the construction industry, introduction to legal research and reasoning as used by professional contractors.
Prerequisite: Admission to upper level in Construction Science.

COSC 464 Construction Safety II
Credits 3. 3 Lecture Hours.
Administration and application of the Occupational Safety and Health Administration Act in the construction industry; includes OSHA standards, the general duty clause, competent person and hazard identification; fulfills the requirements for the thirty-hour OSHA, CPR and First Aid certifications.
Prerequisite: Admission to upper-level in construction science; COSC 184.

COSC 465 Advanced Topics in Construction Law
Credits 3. 3 Lecture Hours.
Legal issues affecting construction, including the parties to construction work, contracting, responsibilities and risk, risk management, damages, handling of claims and disputes, indemnification, bonds, insurance, bankruptcy, labor and employment, and subcontract management; litigation and alternative dispute resolution methods regularly used in the construction industry.
Prerequisite: COSC 463.

COSC 468 Risk Management in the Built Environment
Credits 3. 3 Lecture Hours.
Decision-making and risk analysis concepts in the context of the built environment and construction projects; major categories and tools of risk management regularly used in the construction industry such as contracts, insurance and bonds.
Prerequisites: Admission to upper level in construction science and COSC 463 or concurrent enrollment.

COSC 474 Facility Management Internship
Credits 3. 3 Lecture Hours.
An internship (10 weeks, 400 hours) in a facility management related position that exposes the student to facility management activities; daily logs, monthly reports, final report and completion letter required; distance education off-campus course; does not satisfy College of Architecture semester away requirement.
Prerequisites: COSC 450; approval of internship faculty coordinator.

COSC 475 Construction Project Planning
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Development of parameter cost estimates for activities that relate to the construction of a building project; work packages sequenced, planned and leveled to develop a working project execution document; development of procedures to monitor actual field progress.
Prerequisite: COSC 353, COSC 375.

COSC 477 Construction Project Controls
Credits 3. 3 Lecture Hours.
Introduction to construction related financial documents including schedule of values, labor and operations cost reports, income statements, balance sheets and construction budgets; emphasis on the development of techniques required to effectively monitor the financial aspects of a construction project.
Prerequisite: COSC 353.

COSC 481 Seminar
Credit 1. 1 Lecture Hour.
Seminar discussion of construction equipment selection, utilization maintenance and operating cost.
Prerequisite: Must be taken last full semester before graduation.

COSC 484 Internship - 10 Week
Credits 3. 3 Other Hours.
An internship (10 weeks, 400 hours) with a construction or construction-related company that exposes the student to construction-related activities; daily logs, monthly reports, final report and completion letter required; distance education course with non-resident status; does not satisfy the College of Architecture semester away requirement.
Prerequisites: COSC 184 and COSC 284; approval of internship faculty coordinator.

COSC 485 Directed Studies
Credits 1 to 5. 1 to 5 Other Hours.
Special problems in building construction.
Prerequisite: Admission to upper-level in Construction Science.

COSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of construction science. May be repeated for credit.
Prerequisite: Admission to upper-level in Construction Science.

COSC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in construction science. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Admission to upper level in Construction Science and approval of instructor.

COSC 494 Internship
Credits 7. 7 Other Hours.
An internship (15 weeks, 600 hours) with a construction or construction-related company that exposes the student to construction-related activities, daily logs, monthly reports, final report and completion letter required; distance education course with non-resident status. No other TAMU courses may be taken while enrolled in COSC 494.
Prerequisites: COSC 184 and COSC 284; approval of internship faculty coordinator.
CSCE 110 Programming I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Basic concepts in using computation to enhance problem solving abilities; understanding how people communicate with computers, and how computing affects society; computational thinking; representation of data; analysis of program behavior; methods for identifying and fixing errors in programs; understanding abilities and limitation of programs; development and execution of programs.

CSCE 111 Introduction to Computer Science Concepts and Programming
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Computation to enhance problem solving abilities; understanding how people communicate with computers, and how computing affects society; computational thinking; software design principles, including algorithm design, data representation, abstraction, modularity, structured and object oriented programming, documentation, testing, portability, and maintenance; understanding programs' abilities and limitations; development and execution programs.

CSCE 120 Program Design and Concepts
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Extend prior programming knowledge to create computer programs that solve problems; use the C++ language; apply computational thinking to enhance problem solving; analyze, design and implement computer programs; use basic and aggregate data types to develop functional and object oriented solutions; develop classes that use dynamic memory and avoid memory leaks; learn error handling strategies to develop more secure and robust programs.
Prerequisite: Grade of C or better in ENGR 102, CSCE 110, CSCE 111, or CSCE 206, or equivalent.

CSCE 121 Introduction to Program Design and Concepts
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Computation to enhance problem solving abilities; computational thinking; understanding how people communicate with computers, how computing affects society; design and implementation of algorithms; data types, program control, iteration, functions, classes, and exceptions; understanding abstraction, modularity, code reuse, debugging, maintenance, and other aspects of software development; development and execution of programs.
Prerequisite: Programming course (high school or college).

CSCE 181 Introduction to Computing
Credit 1. 1 Lecture Hour.
Introduction to the broad field of computing; presentations from industry and academia about how computer science concepts are used in research and end products; includes a major writing component.

CSCE 201/CYBR 201 Fundamentals of Cybersecurity
Credits 3. 3 Lecture Hours.
Basic terminology, concepts, technology, and trends of cybersecurity; foundations of cybersecurity to include cryptography, public key infrastructure, standards and protocols, physical security, network fundamentals; workings of systems, networks, infrastructure; legal and ethical issues in cybersecurity.
Cross Listing: CYBR 201/CSE 201.

CSCE 206 Structured Programming in C
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(COSC 1420) Structured Programming in C. Basic concepts, nomenclature and historical perspective of computers and computing; internal representation of data; software design principles and practice; structured and object-oriented programming in C; use of terminals, operation of editors and executions of student-written programs.

CSCE 221 Data Structures and Algorithms
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Specification and implementation of basic abstract data types and their associated algorithms including stacks, queues, lists, sorting and selection, searching, graphs, and hashing; performance tradeoffs of different implementations and asymptotic analysis of running time and memory usage; includes the execution of student programs written in C++.
Prerequisite: CSCE 113 or CSCE 121; CSCE 222/ECEN 222 or ECEN 222/CSCE 222, or concurrent enrollment.

CSCE 222/ECEN 222 Discrete Structures for Computing
Credits 3. 3 Lecture Hours.
Provide mathematical foundations from discrete mathematics for analyzing computer algorithms, for both correctness and performance; introduction to models of computation, including finite state machines and Turing machines.
Prerequisite: MATH 151.
Cross Listing: ECEN 222/CSCE 222.

CSCE 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in computer science. May be taken three times for credit.
Prerequisite: Approval of instructor.

CSCE 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in computer science. May be taken three times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

CSCE 310 Database Systems
Credits 3. 3 Lecture Hours.
File structures and access methods; database modeling, design and user interface; components of database management systems; information storage and retrieval, query languages, high-level language interface with database systems.
Prerequisites: CSCE 221 with a grade of C or better; junior or senior classification.

CSCE 312 Computer Organization
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introduction to computer systems from programmer's perspective including simple logic design, data representation and processor architecture, programming of processors, memory, control flow, input/output, and performance measurements; hands-on lab assignments.
Prerequisites: Grade of C or better in CSCE 221, or concurrent enrollment; or approval of instructor.
CSCE 313 Introduction to Computer Systems  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Introduction to system support for application programs, both on single node and over network including OS application interface, inter-process communication, introduction to system and network programming, and simple computer security concepts; hands-on lab assignments.  
Prerequisite: CSCE 221 with a grade of C or better; CSCE 312 or corequisite CSCE 350/ECEN 350.  

CSCE 314 Programming Languages  
Credits 3. 3 Lecture Hours.  
Exploration of the design space of programming languages via an in-depth study of two programming languages, one functional and one object-oriented; focuses on idiomatic uses of each language and on features characteristic for each language.  
Prerequisites: Grade of C or better in CSCE 221, or concurrent enrollment; or approval of instructor.  

CSCE 315 Programming Studio  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Intensive programming experience that integrates core concepts in Computer Science and familiarizes with a variety of programming/development tools and techniques; students work on 2 or 3 month-long projects each emphasizing a different specialization within Computer Science; focuses on programming techniques to ease code integration, reusability, and clarity.  
Prerequisites: CSCE 312 and CSCE 314; or CSCE 350/ECEN 350.  
Corequisite: CSCE 313.  

CSCE 320/STAT 335 Principles of Data Science  
Credits 3. 3 Lecture Hours.  
Theoretical foundations, algorithms and methods of deriving valuable insights from data; includes foundations in managing and analyzing data at scale, e.g. big data; data mining techniques and algorithms; exploratory data analysis; statistical methods and models; data visualization.  
Prerequisites: STAT 211 or ECEN 303; STAT 212 or CSCE 222/ECEN 222.  
Cross Listing: STAT 335/CSCE 320.  

CSCE 350/ECEN 350 Computer Architecture and Design  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Computer architecture and design; use of register transfer languages and simulation tools to describe and simulate computer operation; central processing unit organization, microprogramming, input/output and memory system architectures.  
Prerequisites: Grade of C or better in ECEN 248; junior or senior classification.  
Cross Listing: ECEN 350/CSCE 350.  

CSCE 399 High-Impact Experience  
Credits 0. 0 Other Hours.  
Participation in an approved high-impact learning practice; documentation and self-assessment of learning experience.  
Prerequisite: Junior or senior classification.  

CSCE 402 Law and Policy in Cybersecurity  
Credits 3. 3 Lecture Hours.  
Examination of law and policy issues related to cybersecurity for the spectrum of cybersecurity jobs; includes procurement, operations and maintenance, governance and oversight, protection and defense, analysis, intelligence collection and operation and investigation cybersecurity jobs.  
Prerequisites: Junior or senior classification.  

CSCE 410 Operating Systems  
Credits 3. 3 Lecture Hours.  
Hardware/software evolution leading to contemporary operating systems; basic operating systems concepts; methods of operating systems design and construction including algorithms for CPU scheduling, memory and general resource allocation, process coordination and management; case studies of several operating systems.  
Prerequisites: CSCE 313 and CSCE 315.  

CSCE 411 Design and Analysis of Algorithms  
Credits 3. 3 Lecture Hours.  
Study of computer algorithms for numeric and non-numeric problems; design paradigms; analysis of time and space requirements of algorithms; correctness of algorithms; NP-completeness and undecidability of problems.  
Prerequisite: Grade of C or better in CSCE 221 and CSCE 222/ECEN 222; junior or senior classification or approval of instructor.  

CSCE 412 Cloud Computing  
Credits 3. 3 Lecture Hours.  
Operating system and distributed systems fields that form the basis of cloud computing such as virtualization, key-value storage solutions, group membership, failure detection, peer to peer systems, datacenter networking, resource management and scalability; popular frameworks such as MapReduce and HDFS and cases studies on failure determination.  
Prerequisite: Grade of C or better in CSCE 315.  

CSCE 413 Software Security  
Credits 3. 3 Lecture Hours.  
Basic principles of design and implementation of defect-free software, code reviews including tool-assisted review by static and dynamic analysis, risk analysis and management and methods for software security testing.  
Prerequisites: Grade of C or better in CSCE 315 or approval of instructor.  

CSCE 416/ECEN 416 Hardware Design Verification  
Credits 3. 3 Lecture Hours.  
Hardware functional verification; case studies on verification in integrated circuit design; introduction to industry best practices; introduction to logic functional verification.  
Prerequisites: CSCE 312, CSCE 350/ECEN 350, or ECEN 350/CSCE 350, or equivalent in computer architecture; familiarity with C/C++/Verilog/VHDL programming.  
Cross Listing: ECEN 416/CSCE 416.  

CSCE 420 Artificial Intelligence  
Credits 3. 3 Lecture Hours.  
Fundamental concepts and techniques of intelligent systems; representation and interpretation of knowledge on a computer; search strategies and control; active research areas and applications such as notational systems, natural language understanding, vision systems, planning algorithms, intelligent agents and expert systems.  
Prerequisite: CSCE 411 or approval of instructor.
CSCE 421/STAT 421 Machine Learning
Credits 3.3 Lecture Hours.
Theoretical foundations of machine learning, pattern recognition and generating predictive models and classifiers from data; includes methods for supervised and unsupervised learning (decision trees, linear discriminants, neural networks, Gaussian models, non-parametric models, clustering, dimensionality reduction, deep learning), optimization procedures and statistical inference.
Prerequisites: Grade of C or better in MATH 304 and STAT 211; grade of C or better in CSCE 221 or STAT 404.
Cross Listing: STAT 421/CSCE 421.

CSCE 429 Software Development, Globalization and Culture Abroad
Credits 3.3 Lecture Hours.
Software development cycle; software outsourcing model, execution and practices; software industries on products, services and consultancy; software globalization; and offshore development culture; travel abroad required.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 430 Problem Solving Programming Strategies
Credits 3.2 Lecture Hours. 3 Lab Hours.
Methods for analyzing fundamental programming problems from a variety of domains and implementing solutions quickly and efficiently; problems based on competitive programming contests to develop skills in problem analysis, coding and testing; solving problems will involve identifying and applying a range of algorithmic solutions; includes dealing with combinatorics, dynamic programming, graphs, numerical calculations, string processing and geometry, along with other specialized algorithms.
Prerequisites: CSCE 411 or approval of instructor.

CSCE 431 Software Engineering
Credits 3.2 Lecture Hours. 2 Lab Hours.
Application of engineering approach to computer software design and development; life cycle models, software requirements and specification; conceptual model design; detailed design; validation and verification; design quality assurance; software design/development environments and project management.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 433 Formal Languages and Automata
Credits 3.3 Lecture Hours.
Basic types of abstract languages and their acceptors; the Chomsky hierarchy; solvability and recursive function theory; application of theoretical results to practical problems.
Prerequisite: CSCE 411 or approval of instructor.

CSCE 434 Compiler Design
Credits 3.3 Lecture Hours.
Programming language translation; functions and general organization of compiler design and interpreters; theoretical and implementation aspects of lexical scanners; parsing of context free languages; code generation and optimization; error recovery.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 435 Parallel Computing
Credits 3.3 Lecture Hours.
Overview of parallel computing technology and programming methods; includes multiprocessor architectures, programming tools, parallel performance, parallel algorithms, and applications of parallel computing.
Prerequisites: CSCE 315 and junior or senior classification or approval of instructor.

CSCE 436 Computer-Human Interaction
Credits 3.3 Lecture Hours.
Comprehensive study of the Computer-Human Interaction (CHI) area; includes history and importance of CHI; CHI design theories; modeling of computer users and interfaces; empirical techniques for task analysis and interface design; styles of interaction and future directions of CHI including hypermedia and computer-supported collaborative work.
Prerequisite: CSCE 315 or concurrent enrollment or approval of instructor.

CSCE 438 Distributed Systems
Credits 3.3 Lecture Hours.
Principles and techniques for engineering distributed systems with topics including communication, concurrency, programming paradigms, naming, managing shared state, caching, synchronization, reaching agreement, fault tolerance, security, middleware and distributed applications; design, implement and debug large software systems.
Prerequisite: CSCE 313; junior or senior classification, or approval of instructor.

CSCE 440 Quantum Algorithms
Credits 3.3 Lecture Hours.
Introduction to the design and analysis of quantum algorithms; basic principles of the quantum circuit model; gives a gentle introduction to basic quantum algorithms; reviews recent results in quantum information processing.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 441 Computer Graphics
Credits 3.3 Lecture Hours.
Principles of interactive computer graphics; 2-D and 3-D rendering pipelines, including geometric object and view transformations, projections, hidden surface removal, and rasterization; lighting models for local and global illumination; hierarchical models of 3-D objects; systems and libraries supporting display and user interaction.
Prerequisite: CSCE 221; junior or senior classification or approval of instructor.

CSCE 442 Scientific Programming
Credits 3.3 Lecture Hours.
Introduction to numerical algorithms fundamental to scientific and engineering applications of computers; elementary discussion of error; algorithms, efficiency; polynomial approximations, quadrature and systems of algebraic and differential equations.
Prerequisites: CSCE 221 with a grade of C or better; MATH 304 or MATH 308 or concurrent enrollment.

CSCE 443/VIST 487 Game Development
Credits 3.2 Lecture Hours. 2 Lab Hours.
Aesthetic and technical aspects of computer game development, including game mechanics, story development, content creation and game programming; includes game design, interface design, 3D modeling and animation, graphics algorithms, shader programming and artificial intelligence; group project includes the design and development of a game from start to finish.
Prerequisites: CSCE 441 or VIST 486 or approval of instructor; junior or senior classification.
Cross Listing: VIST 487/CSCE 443.
CSCE 444 Structures of Interactive Information
Credits 3. 2 Lecture Hours. 2 Lab Hours.
A systems approach to the programming, design, authoring and theory of hypermedia; object-oriented visual and interactive programming; visual design, including color, space, text and layering; the reference as a multidisciplinary structure; collecting and sampling; ontologies, maps and navigation as means of structuring information; create dynamic hypermedia that is expressive and interpretive.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 445 Computers and New Media
Credits 3. 3 Lecture Hours.
Potential and realized impact of computers in the design of new media; relationship between authors and readers of interactive material; influence of media design on the content expressed.
Prerequisite: CSCE 221 or approval of instructor.

CSCE 446/VIST 477 Virtual Reality
Credits 3. 3 Lecture Hours.
Theory and practice of virtual reality; interactive 3D virtual environments; input/output devices, 3D interaction techniques, augmented reality, role of realism in VR, navigation techniques, design guidelines and evaluation methods.
Prerequisite: Grade of C or better in VIST 271, CSCE 221, or CSCE 441.
Cross Listing: VIST 477/CSCE 446.

CSCE 447/VIST 476 Data Visualization
Credits 3. 3 Lecture Hours.
Visual representation and design of data and information; 3D visualization, infographics, data narratives, principles of visual data encoding and interaction techniques.
Prerequisite: Grade of C or better in VIST 271, or CSCE 221, or CSCE 441.
Cross Listing: VIST 476/CSCE 447.

CSCE 451 Software Reverse Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Overview of the compilation mechanism to generate executable files and raw binary codes from source codes; executable file formats for an operating system to run the binary code; disassembly algorithms and control graph analysis; static and dynamic analyses; case studies on code obfuscation, codebreaking, malware analysis.
Prerequisite: CSCE 313 or approval of instructor.

CSCE 452 Robotics and Spatial Intelligence
Credits 3. 3 Lecture Hours.
Algorithms for executing spatial tasks; path planning and obstacle avoidance in two- and three-dimensional robots—configuration space, potential field, free-space decomposition methods; stable grasping and manipulation; dealing with uncertainty; knowledge representation for planning—geometric and symbolic models of the environment; task-level programming; learning.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 456 Real-Time Computing
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to principles and applications of real-time computing; system architecture; D/A and A/D conversion; synchronous data acquisition and analysis; computers in real-time control; asynchronous monitoring and control; resource scheduling; interfacing issues; lectures and laboratory.
Prerequisites: CSCE 313 and MATH 152.

CSCE 461/BMEN 428 Embedded Systems for Medical Applications
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of embedded system architecture and programming; fundamentals and theoretical foundations of wireless communication systems; hands-on experiences of how an embedded system could be used to solve problems in biomedical engineering; projects on wireless sensors and imaging for medical devices.
Prerequisite: BMEN 211, CSCE 350/ECEN 350, or CSCE 315, or approval of instructor.
Cross Listing: BMEN 428/CSCE 461.

CSCE 462 Microcomputer Systems
Credits 3. 2 Lecture Hours. 1 Lab Hour.
Microcomputers as components of systems; VLSI processor and coprocessor architectures, addressing and instruction sets; I/O interfaces and supervisory control; VLSI architectures for signal processing; integrating special purpose processors into a system.
Prerequisite: CSCE 313.

CSCE 463 Networks and Distributed Processing
Credits 3. 3 Lecture Hours.
Basic hardware/software, architectural components for computer communications; computer networks, switching, routing, protocols and security; multiprocessing and distributed processing; interfacing operating systems and networks; case studies of existing networks and network architectures.
Prerequisite: CSCE 313 or approval of instructor.

CSCE 464 Wireless and Mobile Systems
Credits 3. 3 Lecture Hours.
Introduction to wireless and mobile systems; wireless communication fundamentals; wireless medium access control design; transmission scheduling, network and transport protocols over wireless design, simulation and evaluation; wireless capacity; telecommunication systems; vehicular, adhoc, and sensor network systems; wireless security; mobile applications.
Prerequisites: CSCE 313; junior or senior classification or approval of instructor.

CSCE 465 Computer and Network Security
Credits 3. 3 Lecture Hours.
Fundamental concepts and principles of computer security, operating system and network security, secret key and public key cryptographic algorithms, hash functions, authentication, firewalls and intrusion detection systems, IPSec and VPN, wireless and web security.
Prerequisites: CSCE 313 and CSCE 315; junior or senior classification; or approval of instructor.

CSCE 466/ECEN 469 Advanced Computer Architecture
Credits 3. 3 Lecture Hours.
Advanced computer architectures including memory designs, pipeline techniques, and parallel structures such as vector computers and multiprocessors.
Prerequisite: Grade of C or better in ECEN 350/CSCE 350 or CSCE 350/ECEN 350; junior or senior classification.
Cross Listing: ECEN 469/CSCE 469.

CSCE 470 Information Storage and Retrieval
Credits 3. 3 Lecture Hours.
Representation of, storage of and access to very large multimedia document collections; fundamental data structures and algorithms of current information storage and retrieval systems and relates various techniques to design and evaluation of complete retrieval systems.
Prerequisite: CSCE 315 or approval of instructor.
CSCE 477/CYBR 403 Cybersecurity Risk
Credits 3. 3 Lecture Hours.
Risks in cybersecurity; avoidance, acceptance, mitigation, or transference strategies; developing reliable cybersecurity risk assessments to include analysis, categorization, and evaluation; cybersecurity risk audit frameworks.
Prerequisites: Grade of C or better in CYBR 201/CSE 201 or CSCE 201/CYBR 201; junior or senior classification.
Cross Listing: CYBR 403/CSE 477.

CSCE 481 Seminar
Credit 1. 2 Lab Hours.
Investigation and report by students on topics of current interest in computer science.
Prerequisite: Junior or senior classification.

CSCE 482 Senior Capstone Design
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Project-based course to develop system integration skills for solving real-world problems in computer science; significant team software project that integrates advanced concepts across computer science specializations; projects require design, implementation, documentation and demonstration, as well as design methodology, management process and teamwork.
Prerequisites: Senior classification; CSCE 315, CSCE 411, and two additional CSCE tracked courses.

CSCE 483 Computer Systems Design
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Engineering design; working as a design-team member, conceptual design methodology, design evaluations, total project planning and management techniques, design optimization, systems manufacturing costs considerations; emphasis placed upon students' activities as design professionals.
Prerequisites: CSCE 315, CSCE 462 and ECEN 325; senior classification.

CSCE 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Permits work on special project in computer science. Project must be approved by the department.
Prerequisite: Senior classification; also taught at Galveston campus.

CSCE 489 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Special topics in computer science that are new or unique that are not covered in existing courses.

CSCE 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in computer science. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

CVEN 207 Introduction to the Civil Engineering Profession
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Introduction to the study and practice of civil engineering; specialized subdisciplines of civil engineering; professionalism and professional registration; engineering ethics; exercises in engineering technical communications.
Prerequisite: Grade of C or better in ENGL 103 or ENGL 104; admitted to major degree sequence in civil engineering.

CVEN 221 Engineering Mechanics: Statics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
General principles of mechanics; concurrent force systems; statics of particles; equivalent force/moment systems; centroids and center of gravity; equilibrium of rigid bodies; trusses, frames, and machines; internal forces in structural members; friction; second moments of areas.
Prerequisites: Grade of C or better in MATH 251 or MATH 253, or concurrent enrollment; grade of C or better in PHYS 206 and ENGR 216/PHYS 216 or PHYS 216 and ENGR 216; admitted to major degree sequence in civil engineering.

CVEN 250 Introduction to Graphics and Visualization Applications in Civil Engineering Design
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Graphical communication in the civil engineering design process; introduction to industry standard software; construction documents and contract drawings in civil engineering applications; data analysis; introduction to project visualization.

CVEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of civil engineering. May be repeated for credit.
Prerequisite: Approval of department head.

CVEN 301/EVEN 301 Environmental Engineering
Credits 3. 3 Lecture Hours.
Water quality; material balances; chemical, physical and biological processes; water quality modeling; water and wastewater treatment; air quality; solid and hazardous waste management.
Prerequisites: Grade of C or better in CHEM 107; Grade of C or better in CVEN 302 and MATH 308, or concurrent enrollment.
Cross Listing: EVEN 301/CVEN 301.

CVEN 302 Computer Applications in Engineering and Construction
Credits 3. 3 Lecture Hours.
Application of computers to solution of civil engineering problems using various numerical methods; structured computer programming; mathematical modeling and error analysis; solution of algebraic and differential equations; numerical differentiation and integration; curve-fitting; root-finding.
Prerequisites: Grade of C or better in ENGR 102 and PHYS 206; grade of C or better in MATH 308 or concurrent enrollment; admitted to major degree sequence in civil engineering.

CVEN 303 Civil Engineering Measurement
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to geodetic positions, datums, map projections; theory of civil engineering measurements and errors applied to horizontal and vertical control, curves, earthwork and mapping using state-of-the-art technology for data capture; processing and presentation of result.
Prerequisite: MATH 151; admitted to major degree sequence in civil engineering.

CVEN 304/EVEN 304 Environmental Engineering Lab
Credit 1. 3 Lab Hours.
Environmental measurements on physical, chemical, biological and biotechnological parameters of water.
Prerequisites: CVEN 301/EVEN 301 or CVEN 301/EVEN 301, or concurrent enrollment; CVEN 311/EVEN 311 or concurrent enrollment; or approval of instructor.
Cross Listing: EVEN 304/CVEN 304.

CVEN - Civil Engineering (CVEN)
CVEN 305 Mechanics of Materials
Credits 3. 3 Lecture Hours.
Applications of conservation principles and stress/deformation relationships for continuous media to structural members; axially loaded members; thin-walled pressure vessels; torsional and flexural members; shear; moment; deflection of members; combined loadings; stability of columns; nonsymmetrical bending, shear center; indeterminate members; elastic foundations.
Prerequisites: Grade of C or better in CVEN 221, MEEN 221 or MEEN 225; also taught at Qatar campus.

CVEN 306 Materials Engineering for Civil Engineers
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Scientific concepts of civil engineering materials; relationship between macroscopic material properties and response and microscopic properties; physical, mechanical, surface, fracture, and rheological properties of civil engineering materials including metals, composites, and polymers.
Prerequisites: Grade of C or better in CHEM 107 and CVEN 221; grade of C or better in PHYS 207, and ENGR 217/PHYS 217 or PHYS 217/ENGR 217; grade of C or better in CVEN 305 and MATH 308, or concurrent enrollment.

CVEN 307 Transportation Engineering
Credits 3. 3 Lecture Hours.
Fundamental principles and methods in planning, design, and operation of transportation systems; driver and vehicle performance capabilities; highway geometric and pavement design principles; traffic analysis and transportation planning.
Prerequisite: Grade of C or better in CVEN 302 or concurrent enrollment.

CVEN 311/EVEN 311 Fluid Dynamics
Credits 3. 3 Lecture Hours.
Fluid properties; statics; kinematics; basic conservation principles of continuity, energy and momentum; similitude and hydraulic models; incompressible flow in pipes; fluid dynamic drag.
Prerequisites: Grade of C or better in MATH 251 and CVEN 221; grade of C or better in CVEN 302, or concurrent enrollment; CVEN 311 also taught at Galveston campus.
Cross Listing: EVEN 311/CVEN 311.

CVEN 315 Sensor Technology for the Built Environment
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of sensor technology including laboratory safety, error analysis, statistical analysis, electrical circuits, data acquisition, signal conditioning, signal analysis, strain gages, laser technology, image acquisition and analysis, fiber optic sensors, wireless sensors; its applications in civil engineering; and hands-on demonstrations relevant to the natural and built environment.
Prerequisites: CVEN 302, junior or senior classification, or approval of instructor.

CVEN 322 Civil Engineering Systems
Credits 3. 3 Lecture Hours.
Economic analysis and evaluation of engineering projects; application of systems analysis to civil engineering design; systems synthesis and optimization techniques; assignments apply engineering economics, statistical methods and optimization techniques to civil engineering problems.
Prerequisite: Grade of C or better in STAT 211 or concurrent enrollment; grade of C or better in CVEN 302 or concurrent enrollment; admitted to major degree sequence in civil engineering.

CVEN 336 Fluid Dynamics Laboratory
Credit 1. 2 Lab Hours.
Basic fluid mechanics instrumentation; flow visualization and measurements; experimental verification and reinforcement of the principles and concepts introduced in CVEN 311/EVEN 311 and CVEN 311/CVEN 311.
Prerequisites: Grade of C or better in CVEN 311/EVEN 311 or CVEN 311/CVEN 311, or concurrent enrollment.

CVEN 339/EVEN 339 Water Resources Engineering
Credits 3. 3 Lecture Hours.
Quantitative hydrology, precipitation, hydrograph analysis, reservoir and stream routing; groundwater, Darcy equation, well equation, well design; probability concepts in design; water law; dams; reservoirs; spillways; open channel and pipe network hydraulics; pumps; urban stormwater drainage; flood damage mitigation.
Prerequisite: CVEN 311/EVEN 311.

CVEN 342 Materials of Construction
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Physical and mechanical properties of construction materials; portland cement concrete, bituminous materials, wood, ferrous and non-ferrous metals, glass, plastics and masonry units; proportioning of concrete mixtures including admixtures.
Prerequisites: CVEN 302 or registration therein; CVEN 305 and CVEN 306; ENGL 203, ENGL 210, ENGL 241 or ENGL 301.

CVEN 343 Portland Cement Concrete Materials for Civil Engineers
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Physical and chemical characteristics of Portland cement concrete systems; constituent materials; mixture proportioning; fresh concrete characteristics; hardened concrete properties; durability characteristics; and concrete construction methods.
Prerequisites: CVEN 302 or registration therein; CVEN 305 and CVEN 306; ENGL 203, ENGL 210, ENGL 241 or ENGL 301.

CVEN 345 Theory of Structures
Credits 3. 3 Lecture Hours.
Structural engineering—functions of structure, design loads, reactions and force systems; analysis of statically determinate structures including beams, trusses and arches; energy methods of determining deflections of structures; influence lines and criteria for moving loads; analysis of statically indeterminate structures including continuous beams and frames.
Prerequisites: Grade of C or better in CVEN 302 or concurrent enrollment; grade of C or better in CVEN 305; also taught at Galveston campus.

CVEN 349 Civil Engineering Project Management
Credits 3. 3 Lecture Hours.
Basic elements of management of civil engineering projects; roles of all participants in the process—owners, designers, contractors and suppliers; emphasis on contractual aspect of the process—project estimating, planning and controls.
Prerequisite: CVEN 302 and CVEN 322, or concurrent enrollment.

CVEN 363 Engineering Mechanics: Dynamics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of first principles to model dynamic particles and rigid body systems with ordinary differential equations; solutions to models using analytical and numerical approaches; interpreting solutions/performance measures; linear vibrations; modeling of civil engineering systems and evaluating dynamic response to natural hazards.
Prerequisites: CVEN 302, CVEN 305 and MATH 308.
CVEN 365 Introduction to Geotechnical Engineering  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Physical properties of soils; classification systems, soil exploration, permeability, consolidation, compaction, and shear strength; laboratory tests conducted to determine the physical and engineering soil properties needed for application in geotechnical engineering design.  
Prerequisites: CVEN 302 or registration therein; CVEN 305, ENGL 203, ENGL 210, ENGL 241 or ENGL 301.  

CVEN 399 Mid-Curriculum Professional Development Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.  
No Credit. Participation in an approved high-impact learning practice; reflection on professional outcomes from civil engineering body of knowledge; documentation of experience appropriate to eventual professional licensure; self-assessment of learning at mid-curriculum point.  
Prerequisites: Grade of C or better in CVEN 207, CVEN 250, CVEN 303, CVEN 306, CVEN 311/EVEN 311, CVEN 322, CVEN 345, and CVEN 363.  

CVEN 400 Design Problems in Civil Engineering Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Applications of civil engineering principles to the design and preparation of the plans and specifications of civil engineering projects.  
Prerequisites: CVEN 303, CVEN 322, CVEN 345 and CVEN 399; senior classification; or approval of instructor.  

CVEN 402/EVEN 402 Engineered Environmental Systems Credits 3. 3 Lecture Hours.  
Unit operations and processes in environmental engineering; physical, chemical and biological treatment of water and wastewater; treatment system analysis and design.  
Prerequisite: Grade of C or better in CVEN 301/EVEN 301 or even 301/CVEN 301.  
Cross Listing: EVEN 402/CVEN 402.  

CVEN 403 Applied Civil Engineering Surveying Credits 2. 6 Lab Hours.  
Application of land surveying principles; topographic surveying, boundary surveying, and construction staking through field exercises using state-of-the-art equipment and data capture/analysis techniques; preparation of topographic and boundary maps with related documents; presentation of results.  
Prerequisites: CVEN 303; junior or senior classification.  

CVEN 405 Construction Management of Field Operations Credits 3. 3 Lecture Hours.  
Effects of industrialization on construction methods and resultant construction management problems.  
Prerequisite: CVEN 349.  

CVEN 406/EVEN 406 Environmental Protection and Public Health Credits 3. 3 Lecture Hours.  
Communicable and noncommunicable diseases; environmental risk assessment; environmental assessments; comprehensive environmental planning; small water and wastewater systems; solid waste management; hazardous spills and waste management; vector control; environmental administration.  
Prerequisite: Grade of C or better in CVEN 301/EVEN 301 or even 301/CVEN 301; or approval of instructor.  
Cross Listing: EVEN 406.  

CVEN 413/EVEN 413 Natural Environmental Systems Credits 3. 3 Lecture Hours.  
Water quality assessment of natural environmental systems; development and calibration of models to describe fate and transport of contaminants in aquatic systems; application of models to design of water quality control facilities.  
Prerequisite: Grade of C or better in EVEN 301/CVEN 301 or CVEN 301/EVEN 301.  
Cross Listing: EVEN 413/CVEN 413.  

CVEN 417 Bituminous Materials Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Origin, production, specifications and tests of bituminous materials and paving mixtures used in construction and maintenance of roads and pavements, pavement surface properties, pavement distress and correction alternatives.  
Prerequisites: Senior classification in engineering; CVEN 342 or CVEN 343 or approval of instructor.  

CVEN 418 Highway Materials and Pavement Design Credits 3. 3 Lecture Hours.  
Theory and practice in pavement design; pavement performance; structural design of pavement layers; types of materials used in pavement layers; characterization of pavement layer materials; introduction to pavement management concepts.  
Prerequisites: CVEN 307; CVEN 342 or CVEN 343.  

CVEN 423 Geomatics for Civil Engineering Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Use of GIS, GPS, Survey and Remotely-sensed data integrated with predictive models for infrastructure management systems.  
Prerequisite: CVEN 303 or approval of instructor.  

CVEN 424 Civil Engineering Professional Practice Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Professional practice issues; current civil engineering issues that impact design, construction, and operation of the civil engineer facilities; developing engineering solutions that better serve society; business and public policy concerns; life-long learning; problem solving; professional licensure.  
Prerequisites: CVEN 322 and CVEN 399; senior classification in civil engineering.  

CVEN 435 Geotechnical Engineering Design Credits 3. 2 Lecture Hours. 3 Lab Hours.  
A design course covering prediction of settlement, analysis of the stability of slopes, prediction of bearing capacity of shallow and deep foundations and determination of earth pressures acting on retaining structures; a general course in geotechnical engineering design for undergraduates and for graduate students not primarily interested in the geotechnical field, but desiring additional study beyond the introductory undergraduate level.  
Prerequisite: CVEN 365.  

CVEN 436 Case Histories in Geotechnical Engineering Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Examination of geotechnical problems through the use of case studies associated with foundations, waste disposal, slope stability retaining structures, soil improvement and other civil engineering works.  
Prerequisite: CVEN 365.
CVEN 444 Structural Concrete Design
Credits 3. 3 Lecture Hours.
Behavior, design, and detailing of reinforced concrete structural members according to the ACI Building Code Requirements; design for ultimate limit states (flexible, shear, and axial loads) and serviceability requirements (cracking and deflection); applications include continuous beams and moment frames.
Prerequisites: Grade of C or better in CVEN 345; grade of C or better in CVEN 342 or CVEN 343, or concurrent enrollment.

CVEN 445 Matrix Methods of Structural Analysis
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Analysis of framed structures using linear algebra concepts; matrix algebra and solution of linear algebraic equations; energy principles and virtual work; stiffness; coordinate transformations; use of commercial software for structural analysis.
Prerequisites: Grade of C or better in CVEN 345 and CVEN 363.

CVEN 446 Structural Steel Design
Credits 3. 3 Lecture Hours.
Design of structural steel elements found in building structures, including tension members, compression members, beams, beam-columns and base plates; design of bolted and welded simple connections; design of bolted eccentric connections; design of bolted and welded partially and fully restrained connections.
Prerequisite: CVEN 345; also taught at Galveston campus.

CVEN 449 Visualization and Building Information Modeling in Structural Engineering Design
Credit 1. 1 Lecture Hour.
Graphical communication in the structural engineering design process; introduction to Building Information Modeling (BIM); construction documents and contract drawings in structural engineering applications, data analysis and project visualization.
Prerequisites: Grade of C or better in CVEN 250 and CVEN 345.

CVEN 450 AutoCAD in Civil Engineering
Credit 1. 3 Lab Hours.
Review and application of basic commands and operations in AutoCAD; overview of civil engineering design projects and land surveying; use of AutoCAD Civil 3D or proprietary packages for reduction of land surveying data.
Prerequisites: Grade of C or better in CVEN 250 or ENDG 105; junior or senior classification.

CVEN 451 Public Works Engineering
Credits 3. 3 Lecture Hours.
Public works engineering; service demand estimates; water, wastewater and solid waste collection systems; urban drainage; code enforcement and public decision making.
Prerequisites: CVEN 301/EVEN 301 and CVEN 339/EVEN 339.

CVEN 454 Urban Planning for Engineers
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Urban planning from an engineering point of view; determinants of land use patterns, planning data collection and analysis; location and design requirements for various land uses; interrelationship of transportation and land use; and methods of plan development.
Prerequisite: CVEN 307.

CVEN 455 Urban Stormwater Management
Credits 3. 3 Lecture Hours.
Hydrologic, hydraulic, and general civil engineering design and implementation of stormwater systems including drainage and detention storage facilities, floodplain regulation measures, and flood control structures; stormwater aspects of land development and public works engineering; flood hydrology and hydraulics; institutional aspects of urban stormwater management.
Prerequisite: CVEN 339/EVEN 339 or approval of instructor.

CVEN 456 Highway Design
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and practice in highway design; highway classification and design criteria, location studies, design of vertical and horizontal alignment, cross section, pavement, intersections and highway drainage elements.
Prerequisites: CVEN 307 and CVEN 399; senior classification; or approval of instructor.

CVEN 457 Urban Traffic Facilities
Credits 3. 3 Lecture Hours.
Driver, vehicle and roadway characteristics related to design and operation of traffic facilities; selection and design of traffic control devices and information systems for streets and highways; accident analysis and tort liability related to traffic engineering.
Prerequisite: CVEN 307.

CVEN 458/EVEN 458 Hydraulic Engineering of Water Distribution Systems
Credits 3. 3 Lecture Hours.
Pressure conduit hydraulics; design, modeling, and analysis of water conveyance and distribution systems including pipelines, pipe networks, and pumps.
Prerequisite: Grade of C or better in CVEN 339/EVEN 339 or EVEN 339/CVEN 339 or approval of instructor.
Cross Listing: EVEN 458/CVEN 458.

CVEN 462/EVEN 462 Engineering Hydrogeology
Credits 3. 3 Lecture Hours.
Groundwater in the hydrologic cycle; aquifer properties; well hydraulics, testing, and design; groundwater quality; and groundwater management and sustainability.
Prerequisites: Grade of C or better in CVEN 311/EVEN 311 or EVEN 311/CVEN 311; Grade of C or better in CVEN 301/EVEN 301, EVEN 301/CVEN 301, CVEN 339/EVEN 339, or EVEN 339/CVEN 339; junior or senior classification; or approval of instructor.
Cross Listing: EVEN 462/CVEN 462.

CVEN 463/EVEN 463 Engineering Hydrology
Credits 3. 3 Lecture Hours.
Occurrence, distribution and properties of natural waters of the earth; measurement and engineering analysis of hydrologic phenomena including precipitation, streamflow and groundwater, hydrologic design of water resources development and management projects.
Prerequisite: Grade of C or better in CVEN 339/EVEN 339 or EVEN 339/CVEN 339.
Cross Listing: EVEN 463/CVEN 463.
CVEN 464 Environmental Fluid Mechanics
Credits 3. 3 Lecture Hours.
Examination of fluid and mass transport in naturally occurring flows; includes Navier-Stokes equations; molecular and turbulent diffusion; advective, reacting transport equation; dispersion; river, lake, estuary and atmospheric mixing; dissolution boundary layers; wastewater outfalls; introduction to environmental quality numerical modeling.
Prerequisites: Grade of C or better in CVEN 311/EVEN 311, or approval of instructor.

CVEN 465 Coastal Resilience
Credits 3. 3 Lecture Hours.
Mechanics of wave motion, coastal water level fluctuations, wave transformation, coastal processes, wave forecasting, coastal structures, and coastal development and management; planning and design of coastal engineering projects.
Prerequisites: Grade of C or better in CVEN 311/EVEN 311, or approval of instructor.

CVEN 473 Engineering Project Estimating and Planning
Credits 3. 3 Lecture Hours. 3 Lab Hours.
Application of cost estimating and planning techniques for civil engineering projects; introduction to labor, materials and equipment costing; productivity analysis; indirect and general overhead costs; preparation of approximate and definitive estimates; and integration of time/cost relationships through critical path method and resource leveling.
Prerequisites: CVEN 349; senior classification.

CVEN 483 Analysis and Design of Structures
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Overall procedure of analysis and design including functions, loads, layouts of force systems; analysis, specifications, cost comparisons, and maintenance as applied to typical building structures.
Prerequisites: CVEN 365 or concurrent enrollment; CVEN 399, CVEN 444 and CVEN 446; senior classification; or approval of instructor.

CVEN 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Research and design problems of limited scope approved on an individual basis intended to promote independent study; results of study presented in writing.
Prerequisite: Approval of department head.

CVEN 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of civil engineering. May be repeated for credit.
Prerequisite: Approval of department head.

CVEN 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty members in civil engineering. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

---

CYBR - Cybersecurity (CYBR)

CYBR 201/CSCE 201 Fundamentals of Cybersecurity
Credits 3. 3 Lecture Hours.
Basic terminology, concepts, technology, and trends of cybersecurity; foundations of cybersecurity to include cryptography, public key infrastructure, standards and protocols, physical security, network fundamentals; workings of systems, networks, infrastructure; legal and ethical issues in cybersecurity.
Cross Listing: CSCE 201/CYBR 201.

CYBR 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study in cybersecurity. May be repeated for credit.

CYBR 289 Special Topics in...
Credits 0 to 4. 0 to 4 Other Hours.
Selected topics in an identified area of cybersecurity. May be repeated for credit.

CYBR 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in cybersecurity topics. May be repeated for credit.

CYBR 403/CSCE 477 Cybersecurity Risk
Credits 3. 3 Lecture Hours.
Risks in cybersecurity; avoidance, acceptance, mitigation, or transference strategies; developing reliable cybersecurity risk assessments to include analysis, categorization, and evaluation; cybersecurity risk audit frameworks.
Prerequisites: Grade of C or better in CYBR 201/CSCE 201 or CSCE 201/CYBR 201; junior or senior classification.
Cross Listing: CSCE 477/CYBR 403.

CYBR 466/ECEN 466 Unconditionally Secure Electronics
Credits 3. 3 Lecture Hours.
Data security; cryptography; key exchange; conditional security; unconditional (information-theoretic) security; quantum key distribution; the Kirchhoff-law-Johnson-noise (KLJN) key exchange, electronic noise; advanced issues of KLJN; schemes, protocols, attacks, defense, privacy amplification, credit cards, PUF, autonomous vehicles and smart grids.
Prerequisites: Grade of C or better in ECEN 214; grade of C or better in ECEN 303 or STAT 211; junior or senior classification.
Cross Listing: ECEN 466/CYBR 466.

CYBR 484 Professional Internship
Credits 0 to 6. 0 to 6 Other Hours.
Directed internship in an organization to provide students with a learning experience supervised by professionals in organizational settings appropriate to the student's professional objectives.

CYBR 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study in cybersecurity. May be repeated for credit.

CYBR 489 Special Topics in...
Credits 0 to 4. 0 to 4 Other Hours.
Selected topics in an identified area of cybersecurity. May be repeated for credit.

CYBR 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in cybersecurity topics. May be repeated for credit.
DASC - Dairy Science (DASC)

DASC 418 Dairy Science Consortium  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Advanced topics including concepts of herd dynamic modeling, advanced dairy nutrition and forage production, human resource development, OSHA safety concepts and training for dairy, advanced reproductive programs, young-stock and heifer management, precision management, facilities and heat stress reduction programs.  
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318, and ANSC 333; junior or senior classification or approval of instructor.

DASC 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Special problems in dairy production or dairy manufacturing.  
Prerequisites: Junior or senior classification; written approval of professor supervising the activity; 2.0 GPR in major and overall.

DCED - Dance Education (DCED)

DCED 168 Visual and Performing Arts--Jazz Dance III  
Credits 2. 4 Lab Hours.  
Advanced study of jazz dance; reviews historical background and cultural heritage including significant jazz artists and their influence on jazz dance and society; increased development of coordination, endurance and flexibility necessary to performing extensive jazz combinations; placement exam required on the second day of class.  
Prerequisite: KINE 167 or approval of instructor.

DCED 202 Dance Appreciation  
Credits 3. 3 Lecture Hours.  
(DANC 2303) Dance Appreciation. Survey of dance as a cultural and artistic form in numerous countries; exploration of the development and influence of dance in various cultures; analysis of various genres of artistic dance and their development; discussion of aesthetic principles of dance as an art form and how choreographers are influenced by society to create work.

DCED 203 Dance Production  
Credits 3. 3 Lecture Hours.  
Overview of philosophy, major aspects and common elements in producing dance concerts; lighting, sound, stage design, terminology, costuming, management, production designs, practical experience with on-stage performances.  
Prerequisites: Dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 222 Introduction to Dance Science  
Credits 2. 2 Lecture Hours.  
Introduction to the field of dance science including history, related professions and organizations, post graduate work and current research in the field; exploring basic anatomy and kinesiology concepts relevant to dance; injury prevention, common injuries in dance and return to dance procedures; wellness concepts directly related to dance nutrition, physiological and psychological issues for dancers.  
Prerequisites: Dance science majors or approval of instructor.

DCED 260 Ballet I  
Credits 2. 5 Lab Hours.  
(DANC 1241) Ballet I. Introduction to ballet technique for dancers; series of barre exercises progressing to center work, explanation of positions of the body and port de bras; understand proper body alignment as it relates to ballet technique; appreciation of ballet as an instrument of expression. May be taken 3 times for credit.  
Prerequisites: Dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 271 Modern Dance I  
Credits 2. 5 Lab Hours.  
Study and understanding of modern dance concepts; lateral curve, contraction, spiral, high curve, high release, rotation versus parallel, body alignment, moving in and out of the floor, fluidity of phrase work, musicality and kinesthetic awareness. May be taken 3 times for credit.  
Prerequisites: Dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 301 Dance History  
Credits 3. 3 Lecture Hours.  
Overview of current dance scene, career fields, education; development of theatrical, social, educational dance from lineage based to contemporary cultures; emphasis on dance in America, genres, roots, heritage, pioneers, crusading artists; impacts, influences, growth, development, trends and continual metamorphosis in the art world.

DCED 303 Health Practices for Dancers  
Credits 2. 2 Lecture Hours.  
Focuses on health issues common to the dancer such as overtraining, drug use and performance anxiety, anatomy in relation to proper dance technique, misalignments, imbalances and injuries common to the dancer.  
Prerequisites: Dance science majors only or approval of instructor; junior or senior classification.

DCED 304 Creative Dance for Children  
Credits 3. 3 Lecture Hours.  
Theory and practice of creative movement classes for children; the development stages and learning outcomes of creative movement; incorporation of creative movement into children's classes; dance elements and benefits of creative movement; lesson plans and student assessment.  
Prerequisite: Junior or senior classification or approval of instructor.

DCED 306 Dance Composition I  
Credits 2. 2 Lecture Hours.  
Introduces choreographic devices in solo and duet movement studies; exploration of design principles; creating multiple movement studies using various elements of choreography.  
Prerequisites: Dance science majors, dance concentration majors and dance minors; or approval of instructor; junior or senior classification.

DCED 308 Safe Practices in Teaching Dance  
Credits 3. 3 Lecture Hours.  
Effectively teach a dance technique class safely; explore scientific research and evidence through three areas including environmental, physical and psychological components of a dance class for a multitude of genres and ages; create a safe supportive dance environment; application of relevant anatomical principles; develop a safe dance class.
DCED 361 Ballet II
Credits 2. 5 Lab Hours.
Intermediate study of ballet; historical background and the knowledge and understanding of its cultural heritage; increased level of difficulty in barre, center and across the floor; concentration and continual refinement of body/spatial awareness, musicality, alignment and execution of correct classical technique. May be taken 3 times for credit.
Prerequisite: Grade of B or better in DCED 260; dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 372 Modern Dance II
Credits 2. 5 Lab Hours.
Intermediate study of modern dance; reviews, historical background and its development within society; continual study and understanding of modern dance concepts; fall/recovery, contract/release, use of breath and weight, spine work, inversion and spatial awareness. May be taken 3 times for credit.
Prerequisite: Grade of B or better in DCED 271; dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 400 Dance Composition II
Credits 2. 2 Lecture Hours.
Introduces choreographic devices related to group movement studies; explore and create movement studies as a means of first and second function art, use choreographic tools in the dance making process as it relates to group work.
Prerequisites: DCED 306 or approval of instructor.

DCED 401 Dance Pedagogy
Credits 3. 3 Lecture Hours.
Study of dance pedagogy; major aspects of a dance teacher including knowledge of injury prevention, correct technique, preparation, presentation, evaluation of dance materials, levels and technique class; focus on various teaching methods, tools, planning, communication/ instructional skills and learning experiences/styles.
Prerequisites: DCED 301 and DCED 400 or approval of instructor.

DCED 402 Dance Composition III
Credits 2. 2 Lecture Hours.
Choreograph, design and produce a senior concert; accumulation of previous course work in composition should be used to bring the elements of the choreographic process to a final product.
Prerequisites: DCED 400; dance science track majors only; admittance into the professional phase or approval of instructor; junior or senior classification.

DCED 405 Career Preparation in Dance
Credit 1. 1 Lecture Hour.
Preparation for entering desired career field within dance after graduation, including areas of dance performance, dance science, and dance pedagogy; development of materials for self-promotion for jobs or graduate school; develop original portfolio of work.
Prerequisites: Grade of C or better in DCED 303 and DCED 308; approval of instructor.

DCED 462 Ballet III
Credits 2. 5 Lab Hours.
Technical study of classical and contemporary ballet; elevated barre work, traditional components including turns, footwork, adagios, advanced center and floor phrases; study of Cecchetti, Vaganova and collaborative methods; focus on strength, concentration and correct technique on performance combinations. May be taken 3 times for credit.
Prerequisite: Grade of B or better in DCED 361; dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 473 Modern Dance III
Credits 2. 5 Lab Hours.
Physical and artistic exploration of both traditional and contemporary training methods; three dimensional spine work, inversion, floor work and dynamics. May be taken 3 times for credit.
Prerequisite: Grade of B or better in DCED 372; dance science majors, dance concentration majors and dance minors; or approval of instructor.

DDHS - Dental Hygiene (DDHS)

DDHS 3020 Theory of Dental Hygiene Practice I
Credits 2. 2 Lecture Hours.
Emphasis on advanced dental hygiene skills and services; provision of services to medically compromised patients.

DDHS 3110 Introduction To Dentistry
Credit 1. 1 Lecture Hour.
Introduction to dental hygiene as it relates to the dental specialties. Guest lecturers will describe what their specialty encompasses and the dental hygienist’s role in that field of dentistry.

DDHS 3120 Dental Anatomy
Credits 2. 2 Lecture Hours.
Form and function of the primary and permanent human dentition; laboratory and seminar emphasis on morphology and comparisons of teeth.

DDHS 3160 Preclinical Dental Hygiene
Credits 6. 4 Lecture Hours. 0.5 Lab Hours. 8 Other Hours.
This course introduces the student to the foundational knowledge and skills needed to provide basic dental hygiene services. With faculty guidance, the student learns how to assess a patient's oral health needs, plan dental hygiene services to meet those needs, and implement and evaluate newly learned preventive and therapeutic procedures.

DDHS 3220 Oral Radiology
Credits 0 to 2. 2 Lecture Hours. 1 Lab Hour. 1 Other Hour.
This course is intended to provide the student with an understanding of the generation, properties, and techniques for use of X-rays in dentistry. The principles of radiation safety and health physics, interpretative recognition techniques and clinical patient management.

DDHS 3250 Biomedical Sciences I
Credits 5. 5 Lecture Hours. 0 Lab Hours.
Structure of the human body, including its anatomy, biochemistry, histology and physiology. Emphasis is placed on the structures of the head and neck region that surrounds the oral cavity.

DDHS 3310 Health Education and Behavioral Science
Credit 1. 1 Lecture Hour.
This course is designed to introduce the student to health education and behavioral science as it relates to educating patients and changing behaviors. Students will gain knowledge in evaluating and delivering educational services to culturally diverse populations.

DDHS 3325 Microbiology
Credits 2.5. 2.5 Lecture Hours. 0 Lab Hours.
A lecture course designed to teach the basic principles of medical microbiology, immunology and the infectious disease process.

DDHS 3340 Biomedical Sciences II
Credits 4. 4 Lecture Hours. 0 Lab Hours.
Structure of the human body, including its anatomy, bio-chemistry, histology and physiology. Emphasis is placed on the structures of the head and neck region that surrounds the oral cavity.
DDHS 3410 Introduction to Pathology
Credit 1. 1 Lecture Hour.
Introduction to Pathology is primarily a didactic lecture oriented course. Although clinically oriented, it is designed to provide a base of knowledge about pathologic processes and specific disease entities. Emphasis is on concepts and vocabulary essential to understanding basic pathologic process; systemic pathology of organ systems and tissues; clinical manifestations that result from biological cellular alterations.

DDHS 3425 Health Promotion and Disease Prevention
Credits 2.5. 2.5 Lecture Hours.
This course introduces the student to the etiology and prevalence of oral diseases and oral problems. The emphasis of the course is on the role of the dental hygienist in the promotion of optimal oral health, the prevention of oral diseases, and the importance of achieving and maintaining excellent personal oral health habits. The importance of and the techniques for educating the patient in self-care skills will also be examined.

DDHS 3530 Applied Dental Materials
Credits 3. 2 Lecture Hours. 2.5 Lab Hours.
Didactic, laboratory and clinical instruction in the principles of the science of dental materials and in procedures within the scope of dental hygiene practice.

DDHS 3830 Clinical Dental Hygiene I
Credits 3. 9 Other Hours.
Comprehensive dental hygiene care through clinical application of procedures. Includes intramural dental hygiene and dental school rotations.

DDHS 4010 National Board Review
Credit 1. 1 Lecture Hour.
Reviews applications of previous course content using a seminar format in preparation for the National Board Dental Hygiene Exam.

DDHS 4015 Pharmacology
Credit 1.5. 1.5 Lecture Hour.
Actions, indications and contraindications of drugs; emphasis on drugs frequently encountered in dentistry.

DDHS 4025 Oral Pathology
Credits 2.5. 2.5 Lecture Hours.
A didactic lecture oriented course. The lecture portion of the course, although, clinically oriented is designed to provide a base of knowledge about pathologic processes and specific disease entities. Diseases unique to the oral regions as well as oral manifestations of systemic disease will be covered. The Clinical Pathologic Conference (CPC) attempts to assimilate that information and apply it to relevant clinical situations in a case-based PDL format. Cases which illustrate a variety of clinical signs and symptoms will be presented with clinical histories. Students will be given the opportunity to develop a differential diagnosis and discuss the implications of this relevant to the patient’s treatment.

DDHS 4020 Periodontics
Credits 0-1. 0-1 Lecture Hours.
Characteristics, etiology and treatment of inflammatory diseases of the supporting tissues of the teeth and their substitutes. Emphasis is placed on the relationship of periodontics to the practice of dental hygiene.

DDHS 4100 Medical Emergencies
Credits 0-1. 0-1 Lecture Hours.
Discussions on the preparations for handling emergencies; prevention, recognition and management of various emergencies. The course includes case scenario presentations and mock hands-on drills.

DDHS 4110 Medical Emergencies
Credits 0. 1 Lecture Hour.
Discussions on the preparations for handling emergencies; prevention, recognition and management of various emergencies. The course includes case scenario presentations and mock hands-on drills.

DDHS 4140 Clinical Dental Hygiene III
Credits 4. 12 Other Hours.
Comprehensive dental hygiene care through clinical application of procedures. Includes intramural dental hygiene and dental school rotations and extramural site rotations.

DDHS 4170 Gerontology
Credit 1. 1 Lecture Hour.
This course will examine the unique considerations a dental professional will encounter when providing care to a geriatric patient. Social, psychological and biological aspects of aging will be discussed. Strategies for patient care will be outlined and discussed. Appropriate community referral agencies will be explored to aid the hygienist in providing assistance to the elderly patient.

DDHS 4210 Professional Ethics
Credit 1. 1 Lecture Hour.
The didactic lecture course and case-based small group decision making exercises draw from general ethics, bioethics, dental-specific ethics and obligations of health-care professionals.

DDHS 4220 Comprehensive Care Seminar
Credits 0 to 2. 0 to 2 Lecture Hours.
Topics and activities designed to integrate dental hygiene care with total patient care; includes a case presentation.

DDHS 4240 Clinical Dental Hygiene IV
Credits 4. 12 Other Hours.
Comprehensive dental hygiene care through clinical application of procedures. Includes intramural dental hygiene and dental school rotations and extramural site rotations.

DDHS 4270 Periodontics
Credit 1. 1 Lecture Hour.
Characteristics, etiology and treatment of inflammatory diseases of the supporting tissues of the teeth and their substitutes. Emphasis is placed on the relationship of periodontics to the practice of dental hygiene.

DDHS 4310 Oral Radiography
Credits 0-1. 0-1 Other Hours.
Provides the student with clinical experience in the application of the principles, procedures and techniques of oral radiography.

DDHS 4320 Perspectives in Dental Hygiene
Credits 2. 2 Lecture Hours.
In addition to preparing the student for private practice dental hygiene positions, this course introduces other potential career options including hospital/clinic administration, sales, consulting, public health, insurance and education. The importance of the dental team concept, résumé writing and interviewing skills will be discussed. Legal, ethical and professional issues involving record keeping, licensing, informed consent, sexual harassment and the standard of care will be explored. The business aspects of dental hygiene, personal financial planning, and insurance options will also be addressed. In addition, this course will prepare students for the Texas Jurisprudence Exam required for state licensure.

DDHS 4310 Oral Radiography
Credits 0-1. 0-1 Other Hours.
Provides the student with clinical experience in the application of the principles, procedures and techniques of oral radiography.

DDHS 4320 Perspectives in Dental Hygiene
Credits 2. 2 Lecture Hours.
In addition to preparing the student for private practice dental hygiene positions, this course introduces other potential career options including hospital/clinic administration, sales, consulting, public health, insurance and education. The importance of the dental team concept, résumé writing and interviewing skills will be discussed. Legal, ethical and professional issues involving record keeping, licensing, informed consent, sexual harassment and the standard of care will be explored. The business aspects of dental hygiene, personal financial planning, and insurance options will also be addressed. In addition, this course will prepare students for the Texas Jurisprudence Exam required for state licensure.

DDHS 4350 Public and Community Health
Credits 0 to 3. 0 to 3 Other Hours.
This course examines dental public health and promotes a greater understanding of the important role of the dental hygienist within the community. The student is exposed to opportunities to promote oral health and prevent dental diseases in the community through organized community-based programs versus the traditional clinical approach.

DDHS 4410 Gerontology
Credit 1. 1 Lecture Hour.
Child development as the basis for management of behavior in the dental environment.

DDHS 4450 Gerontology
Credit 1. 1 Lecture Hour.
Child development as the basis for management of behavior in the dental environment.

DDHS 4530 Public and Community Health
Credits 0 to 3. 0 to 3 Other Hours.
This course examines dental public health and promotes a greater understanding of the important role of the dental hygienist within the community. The student is exposed to opportunities to promote oral health and prevent dental diseases in the community through organized community-based programs versus the traditional clinical approach.
DDHS 4620 Theory of Dental Hygiene Practice II  
Credits 2. 2 Lecture Hours.  
Fundamental knowledge and techniques in managing patients with special needs.

DDHS 4710 Applied Research Methods  
Credit 1. 1 Lecture Hour.  
Practical experience in applying principles of research methodology; includes preparation of a formal proposal and table clinic under mentorship of individual faculty.

DDHS 4715 Research Methods  
Credit 1.5. 1.5 Lecture Hour.  
Identification of research problems and variables; sampling; research design; statistical testing of data; critical review of dental literature; table clinic development for presentation to the public and professional groups.

DDHS 4810 Local Anesthesia and Nitrous Oxide/Oxygen Sedation  
Credit 1. 1 Lecture Hour.  
The primary method of presentation is lecture, a detailed outline is provided to each student to facilitate the lecture or textbook notes to supplement the outline. Students are given outside assignments to practice dose calculations for each local anesthetic and for a variety of patients. The lecture material is supplemental with videotapes designed to show the correct administration techniques, the neural innervations of each area of the oral cavity and the area anesthetized.

DDHS 4820 Clinical Dental Hygiene II  
Credits 2. 6 Other Hours.  
Comprehensive dental hygiene care through clinical application of procedures. Includes intramural dental hygiene and dental school rotations and extramural site rotations.

DIVE - Diving Tech and Methods (DIVE)

DIVE 250 SCUBA Diving I  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Fundamental academic knowledge and practical application of SCUBA diving practices and theory; introduction to diving tables and diving physiology.  
Prerequisite: Must complete a medical statement showing no contraindications to diving, or have a recreational SCUBA diver’s physical examination.

DIVE 251 SCUBA Diving II  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Methods to promote safe, self-reliant diving and improve the diver’s comfort, coordination and strength in the water; to build competency in dive planning and organization.  
Prerequisite: Must complete a medical statement showing no contraindications to diving, or have a recreational SCUBA diver’s physical examination; open water certification from a nationally recognized agency; Divers Alert Network (DAN) insurance or equivalent.

DIVE 257 SCUBA Diving III  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Methods to promote safe, self-reliant diving and improve the diver's comfort, coordination and strength in the water; build competency in dive planning and organization; practice accident prevention and effective accident management.  
Prerequisites: Must complete a medical statement showing no contraindication to diving or have a recreational scuba diver's physical examination; open water certification from a nationally recognized training agency; Diver's Alert Network (DAN) diving accident insurance or equivalent.

DIVE 330 Rescue Diving  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Relates skills necessary to perform basic life support, administer dive first aid, evacuate victim, assist and rescue other divers in water; illustrate proper dive planning; practice accident prevention and effective accident management.  
Prerequisites: Must complete a medical statement showing no contraindications to diving, or have a recreational SCUBA diver’s physical examination; certification as a SDI SCUBA diver or equivalent; Divers Alert Network (DAN) diving accident insurance or equivalent.

DIVE 331 Alternative Diving Technology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Illustrates the realities of operating in the scientific, public safety and military diving disciplines; practice real world training scenarios involving multiple aspects of each of the three fields.  
Prerequisites: Must complete a medical statement showing no contraindications to diving, or have a recreational SCUBA diver’s physical examination (or AAUS physical if rating with AAUS); certification as an Advanced and Rescue Diver or equivalent; Divers Alert Network (DAN) diving accident insurance or equivalent; junior or senior classification or approval of instructor.

DIVE 357 Dive Leadership – Divemaster  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Examines divemaster level dive knowledge, dive leadership theory and application, presentation and instructional skills, physical diving skills, logistics and planning, risk management and emergency response, and operational execution; develops a multi-environment capable diving leader.  
Prerequisites: Minimum of 18 years of age; current certification in NAUI First Aid for Dive Professionals or Equivalent; current certification in NAUI Oxygen Provider or equivalent; a minimum of verifiable 60 logged open water scuba dives with a minimum of 30 hours bottom time, dives shall be varied in environment, depth, and activities; verification of good physical condition as documented by a medical examination and unconditional approval in the last 12 months; water skills and ability equivalent to that of a NAUI Assistant Instructor; must be certified as a NAUI Master Scuba Diver, NAUI Scuba Rescue Diver, NAUI Advanced Open Water Diver and NAUI Nitrox diver, or their equivalent; divers with evidence of equivalent training experience must pass the NAUI Master Scuba Dive exam prior to beginning of the course; junior or senior classification or approval of instructor.
DIVE 410 AAUS Scientific Diving
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Information and training necessary to qualify as Scientific Divers under the auspices of American Academy of Underwater Sciences and the Scientific Diving Program; implementation of project design, advanced study of diving physics and physiology, diving risk management and risk mitigation.
Prerequisites: Must have a current Science Diving physical examination; Master Level Diver’s Alert Network (DAN) diving accident insurance or equivalent; open water, advanced open water certifications and Nitrox, or approval of instructor; current certification in First Aid, AED, CPR and Emergency Oxygen Administration; Scientific Diving Swim Test.

DIVE 489 Special Topics In...
Credits 0 to 4. 0 to 4 Other Hours.
Selected topics in an identified area of diving technology and methods.
Prerequisite: Junior or senior classification or approval of instructor.

ECEN - Electrical & Comp Engr (ECEN)

ECEN 210 Computer Programming and Algorithms
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to C language and common algorithms; computer systems; simple C programs; basic language constructs; file I/O; modular programming and functions; arrays and matrices; pointers and strings; simple data structures; searching, sorting, and numerical algorithms; algorithmic complexity.
Prerequisite: Sophomore classification in an engineering major; Qatar campus.

ECEN 214 Electrical Circuit Theory
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Resistive circuits including circuit laws, network reduction, nodal analysis, mesh analysis; energy storage elements; sinusoidal steady state; AC energy systems; magnetically coupled circuits; the ideal transformer; resonance; introduction to computer applications in circuit analysis.
Prerequisites: Grade of C or better in PHYS 207 or PHYS 208; grade of C or better in CHEM 107, CHEM 102, or CHEM 120; grade of C or better in MATH 308, or concurrent enrollment.

ECEN 215 Principles of Electrical Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamentals of electric circuit analysis and introduction to electronics for engineering majors other than electrical and computer engineering.
Prerequisites: Grade of C or better in MATH 251 or MATH 253; Grade of C or better in PHYS 207 or PHYS 208.

ECEN 222/CSCE 222 Discrete Structures for Computing
Credits 3. 3 Lecture Hours.
Provide mathematical foundations from discrete mathematics for analyzing computer algorithms, for both correctness and performance; introduction to models of computation, including finite state machines and Turing machines.
Prerequisite: MATH 151.
Cross Listing: CSCE 222/ECEN 222.

ECEN 248 Introduction to Digital Systems Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Combinational and sequential digital system design techniques; design of practical digital systems.
Prerequisite: Grade of C or better in MATH 152; grade of C or better in PHYS 207 or PHYS 208, or concurrent enrollment.

ECEN 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Problems of limited scope approved on an individual basis intended to promote independent study.
Prerequisite: Approval of department head.

ECEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of electrical engineering. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ECEN 303 Random Signals and Systems
Credits 3. 3 Lecture Hours.
Concepts of probability and random variables necessary for study of signals and systems involving uncertainty; applications to elementary problems in detection, signal processing and communication.
Prerequisites: Grade of C or better in MATH 251 or MATH 253; Grade of C or better in ECEN 248.

ECEN 314 Signals and Systems
Credits 3. 3 Lecture Hours.
Introduction to the continuous-time and discrete-time signals and systems; time domain characterization of linear time-invariant systems; Fourier analysis; filtering; sampling; modulation techniques for communication systems.
Prerequisites: Grade of C or better in ECEN 214 and MATH 308; junior or senior classification.

ECEN 322 Electric and Magnetic Fields
Credits 3. 3 Lecture Hours.
Vector analysis, Maxwell’s equations, wave propagation in unbounded regions, reflection and refraction of waves, transmission line theory; introduction to waveguides and antennas.
Prerequisites: Grade of C or better in ECEN 214, PHYS 207 or PHYS 208, and MATH 311; junior or senior classification.

ECEN 325 Electronics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to electronic systems; linear circuits; operational amplifiers and applications; diodes, field effect transistors, bipolar transistors; amplifiers and nonlinear circuits.
Prerequisite: Grade of C or better in MATH 311; grade of C or better in ECEN 314, or concurrent enrollment.

ECEN 326 Electronic Circuits
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Basic circuits used in electronic systems; differential and multistage amplifiers; output stages and power amplifiers; frequency response, feedback circuits, stability and oscillators, analog integrated circuits, active filters.
Prerequisites: Grade of C or better in ECEN 314 and ECEN 325; junior or senior classification.
ECEN 333 At the Interface of Engineering and Life Sciences  
Credits 3. 3 Lecture Hours.  
Broad overview of electrical and computer engineering principles applied to various areas of life sciences; medical imaging and biomedical signal processing; micro/nano devices and systems; computational biology and genomic signal processing; recent trends in interfacing engineering and life science that address emerging grand challenge problems in health, bio-energy and bio-security; taught in a team approach.  
**Prerequisites:** Grade of C or better in ECEN 248; junior or senior classification.

ECEN 338 Electromechanical Energy Conversion  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Introduction to magnetic circuits, transformers, electromechanical energy conversion devices such as dc, induction and synchronous motors; equivalent circuits, performance characteristics and power electronic control.  
**Prerequisite:** ECEN 214.

ECEN 340 Electric Energy Conversion  
Credits 3. 3 Lecture Hours.  
Fundamental topics in power and energy systems; phasors; three-phase circuits; self and mutual inductance; transformers; electromechanical systems; synchronous and induction machines; advanced concepts in electric energy conversion; DC-DC converters; inverters and rectifiers; solar and wind energy systems; DC and single-phase machines.  
**Prerequisites:** Grade of C or better in ECEN 214.

ECEN 350/CSCE 350 Computer Architecture and Design  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Computer architecture and design; use of register transfer languages and simulation tools to describe and simulate computer operation; central processing unit organization, microprogramming, input/output and memory system architectures.  
**Prerequisites:** Grade of C or better in ECEN 248; junior or senior classification.  
**Cross Listing:** CSCE 350/ECEN 350.

ECEN 370 Electronic Properties of Materials  
Credits 3. 3 Lecture Hours.  
Introduction to basic physical properties of solid materials; some solid state physics employed, but major emphasis is on engineering applications based on semiconducting, magnetic, dielectric and superconducting phenomena.  
**Prerequisite:** Grade of C or better in PHYS 222; junior or senior classification.

ECEN 399 High Impact Professional Development  
Credits 0. 0 Other Hours.  
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point.  
**Prerequisites:** Grade of C or better in ECEN 484, ECEN 491, ENGR 484, ENGR 491, or ENGR 385; grade of C or better in ECEN 403, or concurrent enrollment; junior or senior classification.

ECEN 403 Electrical Design Laboratory I  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Application of design process and project engineering as practiced in industry; team approach to the design process; development of a project proposal; documentation of the proposal, implementation and project; development of execution and validation plan; project execution will begin in ECEN 403 and continue through to ECEN 404.  
**Prerequisites:** COMM 205 or COMM 243 or ENGL 210; grade of C or better in ECEN 314, ECEN 325, ECEN 350/CSCE 350; grade of C or better in ECEN 303, ECEN 322, ECEN 370 or grade C or better in CSCE 315, ECEN 449, STAT 211 or ECEN 303; senior classification.

ECEN 404 Electrical Design Laboratory II  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Continuation of ECEN 403; application of the design process and project engineering as practiced in industry; team approach to the design process; completion of project based on proposal from ECEN 403; includes testing, evaluation and report writing.  
**Prerequisites:** Grade of C or better in ECEN 403; senior classification.

ECEN 410 Medical Imaging  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Fundamentals of physics and the engineering principles of medical imaging systems; focus on magnetic resonance imaging, x-ray computer tomography, ultrasonography, optical imaging and nuclear medicine; includes systems, sources, energy tissue interaction, image formation and clinical examples; virtual labs, on- and off-campus lab tours.  
**Prerequisites:** Grade of C or better in MATH 225 or MATH 251 or MATH 253; ECEN 444 or grade of C or better in ECEN 314; junior or senior classification.

ECEN 411 Introduction to Magnetic Resonance Imaging and Magnetic Resonance Spectroscopy  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to the basic physics of magnetic resonance, the principles of MR imaging and spectroscopy, the major contrast mechanisms in MRI and MR imaging system hardware; development of pulse sequences for different imaging methods, including flow and spectroscopic imaging; will build RF coils.  
**Prerequisites:** Grade of C or better in MATH 251 or MATH 253; grade of C or better in PHYS 207 or PHYS 208; junior or senior classification.

ECEN 412 Ultrasound Imaging  
Credits 3. 3 Lecture Hours.  
Mathematical analysis of wave propagation, scattering of ultrasound in biological tissues, electronic transducer arrays for the beam forming, models of the received signals and signal processing methods for medical ultrasound imaging of tissues; includes discussions of research related to fundamental ultrasound imaging concepts.  
**Prerequisites:** Grade of C or better in ECEN 314; junior or senior classification.

ECEN 414 Biosensors  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Hands-on lab experience in the development of miniaturized biosensors; includes microfluidic devices for biosensing.  
**Prerequisite:** Grade of C or better in ECEN 214; senior classification.
ECEN 415 Physical and Economical Operations of Sustainable Energy Systems
Credits 3. 3 Lecture Hours.
Operational issues for sustainable electric energy systems; basic relevant topics in engineering, optimization and economic concepts; modular view of individual electric energy processing components; physical and market operations in electricity industry in support of sustainable energy integration; computer simulations and demonstrations to create and evaluate examples of power systems.
Prerequisites: ECEN 420 or ECEN 460; junior or senior classification.

ECEN 416/CSCE 416 Hardware Design Verification
Credits 3. 3 Lecture Hours.
Hardware functional verification; case studies on verification in integrated circuit design; introduction to industry best practices; introduction to logic functional verification.
Prerequisites: CSCE 312, CSCE 350/ECEN 350, or ECEN 350/CSCE 350, or equivalent in computer architecture; familiarity with C/C++/Verilog/VHDL programming.
Cross Listing: CSCE 416/ECEN 416.

ECEN 419 Genomic Signal Processing
Credits 3. 3 Lecture Hours.
Fundamentals of molecular biology; application of engineering principles to systems biology; topics include unearthing intergene relationships, carrying out gene based classification of disease, modeling genetic regulatory networks, and altering their dynamic behavior.
Prerequisites: Grade of C or better in ECEN 314; junior or senior classification.

ECEN 420 Linear Control Systems
Credits 3. 3 Lecture Hours.
Application of state variable and frequency domain techniques to modeling, analysis and synthesis of single input, single output linear control systems.
Prerequisites: Grade of C or better in ECEN 314 and MATH 308; junior or senior classification.

ECEN 421 Digital Control Systems
Credits 3. 3 Lecture Hours.
Feedback systems in which a digital computer is used to implement the control law; Z-transform and time domain methods serve as a basis for control systems design. Effects of computer word length and sampling rate.
Prerequisite: ECEN 420 or equivalent.

ECEN 422 Control Engineering and Design Methodology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Modeling, specifications, rating and operating principles of sensors, actuators and other control system components; experiments on conceptual design, simulation and physical implementation of control systems.
Prerequisite: ECEN 420 or equivalent.

ECEN 423 Computer and Wireless Networks
Credits 3. 3 Lecture Hours.
Prerequisite: Grade of C or better in MATH 311; junior or senior classification.
ECEN 441 Electronic Motor Drives
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Application of semiconductor switching power converters to adjustable speed DC and AC motor drives; steady state theory and analysis of electric motion control in industrial, robotic and traction systems; laboratory experiments in power electronic motor drives and their control.
Prerequisite: Grade of C or better in ECEN 214; junior or senior classification.

ECEN 442 DSP Based Electromechanical Motion Control
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Overview of energy conversion and basic concepts on electromechanical motion devices; different control strategies including the solid-state drive topologies; for every electromechanical motion device, its DSP control implementation discussed and implemented in the lab.
Prerequisites: Grade of C or better in ECEN 314; junior or senior classification.

ECEN 444 Digital Signal Processing
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Digital signal processing; discrete-time signals and systems, linear shift-invariant systems, the discrete Fourier transform and fast Fourier transform algorithm, and design of finite impulse response and infinite impulse response digital filters.
Prerequisites: Grade of C or better in ECEN 314; junior or senior classification.

ECEN 445 Applied Electromagnetic Theory
Credits 3. 3 Lecture Hours.
Guided wave and wireless methods; applications of Maxwell's equations and electromagnetic wave phenomena to radiation, antennas and microwave circuit design; digital transmission line analysis and design.
Prerequisites: Grade of C or better in ECEN 322; junior or senior classification.

ECEN 446 Information Theory, Inference and Learning Algorithms
Credits 3. 3 Lecture Hours.
Basic concepts and techniques on data compression, error control codes, and information theoretic measures; basic concepts and techniques in statistical inference such as clustering, maximum likelihood, exact marginalization, Monte Carlo methods, importance sampling, and Markov chain Monte Carlo; introduction to neuron and neural networks; support vector machines.
Prerequisites: Grade of C or better in MATH 311; grade of C or better in ECEN 303 or STAT 211; junior or senior classification.

ECEN 447 Digital Image Processing
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Improvement of pictorial information using spatial and frequency domain techniques; two-dimensional discrete Fourier transform; image filtering, enhancement, restoration, compression; image processing project.
Prerequisites: Grade of C or better in ECEN 314; junior or senior classification.

ECEN 448 Real-Time Digital Signal Processing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Features and architectures of digital signal processing (DSP) chips; fundamental compromises amongst computational accuracy, speed and cost; real-time implementation of filtering, audio, image and video processing algorithms; rapid prototyping via MATLAB/Simulink.
Prerequisites: ECEN 444; junior or senior classification.

ECEN 449 Microprocessor Systems Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to microprocessors; 16/32 bit single board computer hardware and software designs; chip select equations for memory board design, serial and parallel I/O interfacing; ROM, static and dynamic RAM circuits for no wait-state design; assembly language programming, stack models, subroutines and I/O processing.
Prerequisites: Grade of C or better in ECEN 248; junior or senior classification.

ECEN 451 Antenna Engineering
Credits 3. 3 Lecture Hours.
Introduction to antenna theory and design; includes antenna performance parameters, analysis of radiation from sources using Maxwell's equations, theory and design of wire antennas, arrays and frequency independent antennas; computer methods for antenna design.
Prerequisite: Grade of C or better in ECEN 322; junior or senior classification.

ECEN 452 Ultra High Frequency Techniques
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to theory and practice of ultra high frequency radio wave generation, transmission and radiation; application of Maxwell's equations to transmission of electrical energy in wave guides.
Prerequisites: ECEN 322 with a grade of C or better; junior or senior classification.

ECEN 453 Microwave Solid-State Circuits and Systems
Credits 3. 3 Lecture Hours.
Microwave solid-state devices and circuits; theory and design of various types of active circuits; applications of these devices and circuits in radar, communication and surveillance systems.
Prerequisites: Grade of C or better in ECEN 322; junior or senior classification.

ECEN 454 Digital Integrated Circuit Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Analysis and design of digital devices and integrated circuits using MOS and bipolar technologies and computer aided simulation.
Prerequisites: Grade of C or better in ECEN 214 and ECEN 248; junior or senior classification.

ECEN 455 Digital Communications
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Digital transmission of information through stochastic channels; analog-to-dialog conversion, entropy and information, Huffman coding; signal detection, the matched-filter receiver, probability of error, baseband and passband modulation, signal space representation of signals, PAM, QAM, PSK, FSK; block coding, convolutional coding; synchronization; communication through fading channels; spread-spectrum signaling; simulation of digital communication systems.
Prerequisites: Grade of C or better in ECEN 314 and ECEN 303 or STAT 211; junior or senior classification.

ECEN 457 Operational Amplifiers
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Analysis of basic operational amplifier and operational transconductance amplifier (OTA) circuits; noise analysis in Op amp and OTA circuits; nonlinear OTA and Op amp circuits; instrumentation amplifiers; transducer circuits; function generators; oscillators and D/A converters and basics of switched-capacitor circuits.
Prerequisite: Grade of C or better in ECEN 325; junior or senior classification.
ECEN 458 Active Filter Analysis and Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Systematic analysis and design for active RC filters; continuous-time; switched-capacitor circuits; filter approximations; synthesis techniques; sensitivity; practical considerations for monolithic integrated filters; experimental and computer-simulation verification.
Prerequisite: Grade of C or better in ECEN 325; junior or senior classification.

ECEN 459 Power System Fault Analysis and Protection
Credits 4. 3 Lecture Hours. 2 Lab Hours.
General considerations in transmission and distribution of electrical energy as related to power systems; calculation of electric transmission line constants; general theory of symmetrical components and application to analysis of power systems during fault conditions.
Prerequisite: Grade of C or better in ECEN 215 or ECEN 314; junior or senior classification.

ECEN 460 Power System Operation and Control
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Load flow studies; power system transient stability studies; economic system loading and automatic load flow control.
Prerequisite: Grade of C or better in ECEN 215 or ECEN 314; junior or senior classification.

ECEN 461 Electronic Noise
Credits 3. 3 Lecture Hours.
Surveying the elements of electronic noise including concept, theory, measurements, analysis and design; focusing on creative pictures, examples and problems.
Prerequisites: Grade of C or better in ECEN 325; grade of C or better in ECEN 303 or STAT 211; junior or senior classification.

ECEN 462 Optical Communication Systems
Credits 3. 3 Lecture Hours.
Principles of optical communication systems; characteristics of optical fibers, lasers and photodetectors for use in communication systems; design of fiber-optic digital systems and other optical communication systems.
Prerequisites: Grade of C or better in ECEN 322 and ECEN 370; junior or senior classification.

ECEN 463 Magnetic Resonance Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Design, construction and application of instrumentation for MR imaging; fundamentals of the architecture of an MR spectrometer and the gradient subsystem used for image localization; emphasis on the radiofrequency sensors and systems used for signal generation and reception.
Prerequisites: Grade of C or better in ECEN 322 or BMEN 420; junior or senior classification.

ECEN 464 Optical Engineering
Credits 3. 3 Lecture Hours.
Ray optics; wave optics; propagation, reflection, refraction and diffraction of light; passive optical components, polarization, optical modulators, interferometers and lasers.
Prerequisites: Grade of C or better in ECEN 322 and ECEN 370; junior or senior classification.

ECEN 465 Experimental Optics
Credits 4. 2 Lecture Hours. 7 Lab Hours.
In-depth study of experimental optic techniques; opto-mechanical assemblies; passive optics; interferometers; opto-electronics; basic op-amp circuits; feedback and control of optics with electronics.
Prerequisite: Grade of C or better in ECEN 370; junior or senior classification.

ECEN 466/CYBR 466 Unconditionally Secure Electronics
Credits 3. 3 Lecture Hours.
Data security; cryptography; key exchange; conditional security; unconditional (information-theoretic) security; quantum key distribution; the Kirchhoff-law-Johnson-noise (KLJN) key exchange, electronic noise; advanced issues of KLJN; schemes, protocols, attacks, defense, privacy amplification, credit cards, PUF, autonomous vehicles and smart grids.
Prerequisites: Grade of C or better in ECEN 214; grade of C or better in ECEN 303 or STAT 211; junior or senior classification.
Cross Listing: CYBR 466/ECEN 466.

ECEN 467 Harnessing Solar Energy: Optics, Photovoltaics and Thermal Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Solar radiation characteristics and measurement; optical coatings including reflection, transmission, absorption and emissivity; concentrating optics, tracking and etendue limit; photovoltaic cells, modules and systems overview; introduction to solar thermal systems.
Prerequisites: Grade of C or better in ECEN 322 and ECEN 370; junior or senior classification.

ECEN 468 Advanced Digital System Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Design, modeling and verification of complex digital systems using hardware description language and electronic system level language.
Prerequisite: Grade of C or better in ECEN 248; junior or senior classification.

ECEN 469/CSCE 469 Advanced Computer Architecture
Credits 3. 3 Lecture Hours.
Advanced computer architectures including memory designs, pipeline techniques, and parallel structures such as vector computers and multiprocessors.
Prerequisite: Grade of C or better in ECEN 350/CSCE 350 or CSCE 350/ECEN 350; junior or senior classification.
Cross Listing: CSCE 469/ECEN 469.

ECEN 470 Laser Principles and Applications
Credits 3. 3 Lecture Hours.
Working understanding of the basic principles of laser science, the major components of laser system and their function; examples of laser applications to science, engineering, medicine and industry.
Prerequisites: Grade of C or better in ECEN 222 and ECEN 370; junior or senior classification.

ECEN 471 Power Management Circuits and Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Overview of modern semiconductor power devices, DC-DC linear regulators, switching regulators and battery chargers; emphasis on mathematical foundations, feedback theory, stability and root locus, multi-stage amplifiers, analysis and design of power electronic circuits including DC-DC and AC-DC converters and power supplies; applications on power electronics and power management circuits.
Prerequisites: Grade of C or better in ECEN 322 and ECEN 370; junior or senior classification.

ECEN 472 Microelectronic Circuit Fabrication
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fundamentals of MOS and bipolar microelectronic circuit fabrication; theory and practice of diffusion, oxidation, ion implantation, photolithography, etch; yield and reliability considerations; statistical process control; integrated process design, simulation and characterization.
Prerequisites: Grade of C or better in ECEN 325 and ECEN 370; junior or senior classification.
ECEN 473 Microelectronic Device Design
Credits 3. 3 Lecture Hours.
General processes for the fabrication of microelectronic devices and integrated circuits; a review of the electronic properties of semiconductors and carrier transport and recombination; analysis and characterization of p-n junctions, bipolar transistors, and MOS capacitors and transistors; design considerations for achieving optimum performance and practical structures are discussed.  Prerequisites: Grade of C or better in ECEN 325 and ECEN 370; junior or senior classification.

ECEN 474 VLSI Circuit Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Analysis and design of monolithic analog and digital integrated circuits using NMOS, CMOS and bipolar technologies; device modeling; CAD tools and computer-aided design; design methodologies for LSI and VLSI scale circuits; yield and economics; test and evaluation of integrated circuits.  Prerequisite: ECEN 326.

ECEN 475 Introduction to VLSI Systems Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to design and fabrication of microelectronic circuits; emphasis on very large scale integration (VLSI) digital systems; use of state-of-the art design methodologies and tools; design of small to medium scale integrated circuits for fabrication.  Prerequisites: Grade of C or better in ECEN 248 and ECEN 325; junior or senior classification.

ECEN 477 Photonics: Fiber and Integrated Optics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Photonics lab including optical power and spectral measurements of singlemode and multimode optical fibers, hands-on arc fusion splicing, lasers, amplifiers, interferometers, photodetectors, integrated optics, fiber-optic devices, optical modulators.  Prerequisite: Grade of C or better in ECEN 248 and ECEN 325; junior or senior classification.

ECEN 478 Wireless Communications
Credits 3. 3 Lecture Hours.
Overview of wireless applications, models for wireless communication channels, modulation formats for wireless communications, multiple access techniques, wireless standards.  Prerequisites: ECEN 455; junior or senior classification.

ECEN 479 Wireless Communication Laboratory
Credit 1. 3 Lab Hours.
Application of theoretical concepts learned in ECEN 478; includes weekly experiments using NI PXI and Matlab.  Prerequisites: ECEN 478 or registration therein; junior or senior classification; Qatar campus.

ECEN 480 RF and Microwave Wireless Systems
Credits 3. 3 Lecture Hours.
Introduction to various RF and microwave system parameters, architectures and applications; theory, implementation, and design of RF and microwave systems for communications, radar, sensor, surveillance, navigation, medical and optical applications.  Prerequisite: Grade of C or better in ECEN 322; junior or senior classification.

ECEN 484 Professional Internship
Credits 0-1. 0-1 Lecture Hours.
Professional internship in a private company, government agency or laboratory, university or organization to provide work and/or research experience related to the student's major and career objectives. May be taken three times for credit.  Prerequisites: Grade of C or better in ECEN 214 or ECEN 248; junior or senior classification; approval of instructor and internship agency.

ECEN 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Problems of limited scope approved on an individual basis intended to promote independent study.  Prerequisites: Senior classification; approval of department head.

ECEN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 7 Lab Hours.
Selected topics in an identified area of electrical engineering. May be repeated for credit.  Prerequisite: Approval of instructor.

ECEN 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in electrical engineering. May be repeated 3 times for credit.  Prerequisites: Junior or senior classification and approval of instructor.

ECHE-Early Chldhd Ed Fld Based (ECHE)

ECHE 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in early childhood education. May be repeated 2 times for credit.  Prerequisites: Freshman or sophomore classification and approval of instructor.

ECHE 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in early childhood education. May be repeated 2 times for credit.  Prerequisites: Junior or senior classification and approval of instructor.

ECMT - Econometrics (ECMT)

ECMT 461 Economic Data Analysis
Credits 3. 3 Lecture Hours.
Concepts of statistical description, probability theory and statistical inference as they apply to economic analysis; data management, data handling and data analysis; focus on economic statistics with emphasis on regression analysis.  Prerequisite: Grade of C or better in MATH 140, MATH 166, MATH 152, or MATH 171.

ECMT 463 Introduction to Econometrics
Credits 3. 3 Lecture Hours.
Application of mathematics and statistics to interpret economic phenomena; elementary econometric models and estimation techniques useful for estimating economic relationships and theories.  Prerequisites: Grade of C or better in ECON 323; grade of C or better in ECMT 461, STAT 211 or STAT 303.
ECMT 475 Economic Forecasting  
Credits 3. 3 Lecture Hours.  
Econometric approach to prediction and forecasting; data mining and in-sample overfitting; exploratory data analysis; model selection; recursive techniques; structural change; nonlinear models; causality; forecast evaluation and combination; practical issues in real world prediction and forecasting.  
Prerequisite: ECMT 463 with a grade of C or better; junior or senior classification.

ECON - Economics (ECON)

ECON 202 Principles of Economics  
Credits 3. 3 Lecture Hours.  
(ECON 2302) Principles of Economics. Elementary principles of economics; the economic problem and the price system; theory of demand, theory of production and the firm, theory of supply; the interaction of demand and supply; also taught at Galveston campus.

ECON 203 Principles of Economics  
Credits 3. 3 Lecture Hours.  
(ECON 2301) Principles of Economics. Measurement and determination of national income, employment and price; introduction to monetary and fiscal policy analysis; the effects of government deficits and debt, exchange rates and trade balances.  
Prerequisite: ECON 202 or approval of undergraduate advisor; also taught at Galveston campus.

ECON 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed studies in specific problem areas of economics. May be repeated for credit.  
Prerequisite: Freshman or sophomore classification; approval of instructor.

ECON 289 Special Topics in...  
Credits 3. 3 Lecture Hours.  
Selected topics in an identified area of economics. May be repeated for credit.  
Prerequisite: Approval of undergraduate advisor.

ECON 291 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research conducted under the direction of faculty member in economics. May be taken three times for credit.  
Prerequisite: Freshman or sophomore classification.

ECON 311 Money and Banking  
Credits 3. 3 Lecture Hours.  
Fundamental principles of money, credit, and banking; arbitrage conditions in domestic and international capital markets; theoretical and institutional analysis of money markets.  
Prerequisite: ECON 203 with a grade of C or better; also taught at Galveston campus.

ECON 312 Poverty, Inequality and Social Policy  
Credits 3. 3 Lecture Hours.  
Determinants of inequality in market earnings; philosophical and economic reasons for redistributing income; issues in measurement of inequality and poverty; examination of major social insurance and welfare programs and how they affect income distribution and performance of the economy.  
Prerequisite: ECON 323 with a grade of C or better.

ECON 315 Sports Economics  
Credits 3. 3 Lecture Hours.  
Application of economic concepts to the business and practice of sports; taxpayer funding of stadiums; applications of game theory to sports; impact of imperfect information; pricing strategies; testing models of discrimination in sports markets.  
Prerequisite: ECON 202 with a grade of C or better.

ECON 318/WGST 318 The Economics of Gender and Race  
Credits 3. 3 Lecture Hours.  
Theories and evidence on gender and race differences in labor market outcomes; labor supply and the role of family formation; the effect of human capital and discrimination on earnings; analysis of government policies; international comparisons.  
Prerequisites: ECON 323 with a grade of C or better; junior or senior classification.  
Cross Listing: WGST 318/ECON 318.

ECON 320 Economic Development of Europe  
Credits 3. 3 Lecture Hours.  
Development of wage system expansion of markets, Industrial Revolution, relation of industrial development to political policy.  
Prerequisites: ECON 202 and ECON 203 with a grade of C or better.

ECON 323 Microeconomic Theory  
Credits 3. 3 Lecture Hours.  
Determination of prices and their role in directing consumption, production and distribution under both competitive and non-competitive market situations.  
Prerequisites: ECON 202 with a grade of C or better; MATH 142, MATH 151, MATH 131, or MATH 171; also taught at Galveston campus.

ECON 328 Economics of Education  
Credits 3. 3 Lecture Hours.  
Application of economic analysis to education policy; theoretical basis for private and public investment in education; returns to education; the importance of school resources, school financing, school choice, and accountability.  
Prerequisites: Grade of C or better in ECON 202; Grade of C or better in ECMT 461, STAT 211, or STAT 303.

ECON 330 Economic Development  
Credits 3. 3 Lecture Hours.  
A study of the less developed world; economic problems and solutions.  
Prerequisites: Grade of C or better in ECON 202 and ECON 203.

ECON 410 Macroeconomic Theory  
Credits 3. 3 Lecture Hours.  
Theory of the determination of aggregate levels of national income, employment and prices; monetary and fiscal policy analysis, effects of government debt and deficits.  
Prerequisite: ECON 203 with a grade of C or better.

ECON 412 Public Finance  
Credits 3. 3 Lecture Hours.  
Economic role of governments; the choice of public sector output in a democracy and the effects of various taxes on resource allocation and income distribution.  
Prerequisite: ECON 323 with a grade of C or better.
ECON 414 Health Economics  
Credits 3.3 Lecture Hours.  
Economics of health care in the U.S.; role of third party payers; supply and demand for health care; structure and consequences of public and private insurance; role of competition in health care markets among hospitals, insurance plans, physicians and pharmaceutical manufacturers; role of completion and regulation in medical innovation.  
Prerequisite: ECON 323 with a grade of C or better.

ECON 418 Economics of Labor  
Credits 3.3 Lecture Hours.  
Economics of the labor market including factors affecting the economy's demand for labor and the supply of labor; labor market problems such as unemployment and poverty; the economics of trade unions and collective bargaining.  
Prerequisite: ECON 323 with a grade of C or better.

ECON 420 Law and Economics  
Credits 3.3 Lecture Hours.  
Mutual interaction of the prevailing legal system and economic phenomena; development of a series of testable hypotheses concerning the effects of laws and regulations on incentives and economic behavior; the allocation of resources and the distribution of income.  
Prerequisite: ECON 323 with a grade of C or better.

ECON 425 The Organization of Industry  
Credits 3.3 Lecture Hours.  
Relationships between structure, conduct and performance of industries in the American economy using both theoretical and empirical material; antitrust regulation, pricing, product characteristics, advertising, technical change and environmental effects; the American experience contrasted with that of other countries; growth of international industries.  
Prerequisite: ECON 323 with a grade of C or better.

ECON 426 Economics of Antitrust and Regulation  
Credits 3.3 Lecture Hours.  
Bureaucratic and judicial impact of antitrust laws and other regulatory means on the American economy; efficiency gains and losses associated with price discrimination, predation, cartelization, horizontal merger, vertical integration, resale price maintenance; Supreme Court opinions delivered in landmark antitrust cases.  
Prerequisite: ECON 323 with a grade of C or better.

ECON 433 Energy Markets and Policy  
Credits 3.3 Lecture Hours.  
Economics of energy markets and energy regulation with emphasis on implications for optimal energy policy; sectors include gasoline, oil, electricity, natural gas, renewables, nuclear; economic theory integrated with empirical applications from American and international experience; new energy markets, energy trading, and interaction with environmental policy.  
Prerequisites: ECON 323 with a grade of C or better; junior or senior classification or approval of instructor.

ECON 436 Environmental Economics  
Credits 3.3 Lecture Hours.  
Economic theory and public policy as applied to environmental problems; role of market failure in explaining the existence of pollution; alternative strategies for pollution control and environmental management; global environmental issues.  
Prerequisites: ECON 323 with a grade of C or better.

ECON 440 Experimental Economics  
Credits 3.3 Lecture Hours.  
Experimental techniques in economics and survey of literature in experimental economics; credibility of experimental data and criteria for determining reliability; application of statistical treatment to experimental data.  
Prerequisite: ECON 323 with a grade of C or better.

ECON 445 Financial Economics  
Credits 3.3 Lecture Hours.  
Economic analysis of money and financial markets; market structures, efficiency, institutional features; international markets; arbitrage; derivative securities; asset pricing in complete and incomplete markets; relation to rest of economy.  
Prerequisites: Grade of C or better in ECON 323; grade of C or better in ECMT 461, STAT 211, or STAT 303; junior or senior classification.

ECON 449 Economics of Decision-Making Strategy  
Credits 3.3 Lecture Hours.  
Introduction to principles of decision-making and analysis of strategic interaction; formal modeling of decision problems involving one or more agents, integrating preferences, risk, and uncertainty into analysis, and using principles of game theory to advise choices; applications include search, signaling, design of contracts, agendas and repeated interaction.  
Prerequisites: ECON 323 with a grade of C or better.

ECON 452 International Trade Theory and Policy  
Credits 3.3 Lecture Hours.  
Basis for trade; theory of comparative advantage; determination of product and factor prices; gains from international trade; commercial policy and its implications for income distribution; concept of effective protection; market distortions, policy generated distortions and the arguments for tariffs.  
Prerequisite: ECON 323 with a grade of C or better; also taught at Galveston campus.

ECON 459 Games and Economic Behavior  
Credits 3.3 Lecture Hours.  
Introduction to game theory for advanced undergraduates; definition and existence of an equilibrium point for strategic, repeated and extensive form games; strategic and evolutionary equilibrium refinements; equilibrium selection; applications include auctions, bargaining, oligopoly, strategic market games, team production, voting and behavioral game theory.  
Prerequisites: Grade of C or better in ECON 323; MATH 142, MATH 131, MATH 151, or MATH 171.

ECON 460 Introduction to Mathematical Economics  
Credits 3.3 Lecture Hours.  
Introduction to mathematical economics; application of mathematical tools in economic theory; fundamental results from differential and integral calculus; duality theory in consumer and producer theory; classical optimization techniques, elementary differential equations and stability analysis.  
Prerequisites: Grade of C or better in ECON 323 and ECON 410.

ECON 465 Contemporary Economic Issues  
Credits 3.3 Lecture Hours.  
Application of microeconomic and macroeconomic analyses to evaluate contemporary economic issues. May be taken for credit up to six hours.  
Prerequisites: Grade of C or better in ECON 323 and ECON 410.
ECON 470 Program Evaluation
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Economic approaches to program policy evaluation; empirical microeconomic tools; natural experiments; design experimental and quasi-experimental method.
Prerequisite: Grade of C or better in ECON 323; grade of C or better in ECMT 461, STAT 211, or STAT 303; or approval of instructor.

ECON 484 Internship
Credits 0 to 6. 0 to 6 Other Hours.
Directed internship in an organization to provide on-the-job training and applied research experience with professionals in settings appropriate to economics and student professional interest. Maximum 6 hours can count toward major. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Major in economics; 12 completed hours of economics including ECON 323 with a grade of C or better; 2.5 cumulative GPA; 3.0 GPA in economic courses; pre-approval of the director of economics internship programs.

ECON 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Research and design of specific problem areas approved on an individual basis with the intention of promoting independent study and to supplement existing course offerings. Results of study presented in writing.
Prerequisites: Major or minor in economics; approval of undergraduate advisor.

ECON 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of economics. May be repeated for credit.
Prerequisite: Approval of undergraduate advisor.

ECON 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in economics. May be taken three times for credit.
Prerequisites:Junior or senior classification; grade of C or better in ECON 323, ECON 410, and ECMT 463.

EDCI - Educ Curriculum & Dev (EDCI)

EDCI 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Research problems and readings in areas selected to supplement existing offerings; individual reports, oral and written, required.
Prerequisites: Freshman or sophomore classification; approval of instructor.

EDCI 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of educational curriculum and instruction. May be repeated for credit.
Prerequisite: Approval of department head.

EDCI 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty members in the Department of Teaching, Learning and Culture. May be taken four times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

EDCI 353 Early Childhood through Adolescent Education
Credits 3. 3 Lecture Hours.
(TECA 1311) Early Childhood through Adolescent Education. Early childhood through adolescent approaches and instructional materials appropriate for EC through middle school programs; impact of research and theory on child development from gestation to early adolescence on instructional practices.
Prerequisites: Admission to teacher education.

EDCI 354 Early Childhood and Adolescent Curriculum and Lesson Design
Credits 3. 3 Lecture Hours.
Examination of curriculum models used in educational environments designed for young children through adolescents and the organization of the curriculum; investigation of state-adopted curriculum knowledge and skills standards and materials as well as their use and expansion.
Prerequisites: EDCI 353; TEFB 371 or concurrent enrollment.

EDCI 358 Instructional Methods in Engineering and Technology Education
Credits 3. 3 Lecture Hours.
Instructional methods of teaching and instruction in engineering and technology at the secondary level.
Prerequisites: TEFB 324 or concurrent enrollment; junior or senior classification.

EDCI 364 Creativity and the Young Child
Credits 3. 3 Lecture Hours.
Creative expression in young children with a focus on artistic and musical expression, creative movement and creative dramatics; creativity as related to development of the right hemisphere of the brain.
Prerequisites: EPSY 320; concurrent enrollment in EDCI 453.

EDCI 365 Using Technology Classrooms
Credits 3. 3 Lecture Hours.
Overview of technology as it relates to the design of instruction and practices that support effective teaching and learning; how learning theories are reflected in and supported by technology; current and emerging applications in technology delivered and supported learning environments.
Prerequisite: Junior or senior classification.

EDCI 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Research problems and readings in areas selected to supplement existing offerings; individual reports, oral and written, required.
Prerequisites: Junior or senior classification; approval of instructor.

EDCI 489 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours.
Study of selected topics in an identified area of curriculum and instruction. May be repeated for credit.
Prerequisite: Approval of department head.

EDCI 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty members in the Department of Teaching, Learning and Culture. May be taken four times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
EDTC - Educational Technology (EDTC)

EDTC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of educational technology. May be repeated for credit.
Prerequisite: Approval of instructor.

EHRD - Ed Human Res Develop (EHRD)

EHRD 101 Learning Community of Leadership Development in Human Resource Development and Technology Management
Credit 1. 1 Lecture Hour.
Exploration of leadership identity, reflection on lessons learned during the first year of college. Must be taken on a satisfactory/unsatisfactory basis.

EHRD 203 Foundations of Human Resource Development
Credits 3. 3 Lecture Hours.
Overview of the discipline and field of human resource development; focus on how individuals and groups learn and interact with organizations including motivation, group dynamics, systems theory, organizational culture, learning and change.
Prerequisite: Sophomore classification.

EHRD 201 Legal and Ethical Environment of Human Resource Development
Credits 3. 3 Lecture Hours.
Development of knowledge towards legal and ethical work environment in a corporate and educational setting in human resource development.
Prerequisite: Sophomore classification.

EHRD 285 Directed Studies
Credits 0 to 12. 0 to 12 Lecture Hours.
Directed readings or research problems in industrial education.
Prerequisites: Freshman or sophomore classification; approval or directed studies application.

EHRD 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of industrial education. May be repeated for credit.
Prerequisite: Approval of instructor.

EHRD 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in educational human resource development. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

EHRD 315 Applied Human Resource Development in the Workplace
Credits 3. 3 Lecture Hours.
Training and development context and synthesis of general industry-standard human resource practices in workplace environments for human resource practitioners.
Prerequisites: EHRD 203 and EHRD 210 with a grade of C or better; junior or senior classification.

EHRD 371 Applied Learning Principles
Credits 3. 3 Lecture Hours.
The overarching purpose of the course is to influence adult educators to make more intentional choices toward developmental growth in their work with adult learners; focus on adult learning theories and work strategies; meets writing intensive course requirement.
Prerequisites: Junior or senior classification and approval of instructor.

EHRD 372 Learning and Development in HRD
Credits 3. 3 Lecture Hours.
Concepts, knowledge and skills to access, design, develop, deliver and evaluate training programs; foundation of understanding roles of learning, training and development in organizations and systematic and evidence-based approach for designing and managing quality training programs in organizations.
Prerequisites: Grade of C or better in EHRD 203 and EHRD 210; junior or senior classification; or approval of instructor.

EHRD 374 Organizational Development
Credits 3. 3 Lecture Hours.
Introduction to major theories, concepts, skills and techniques for organization development in business and industry, education and the public sector.
Prerequisites: Grade of C or better in EHRD 203 and EHRD 210; junior or senior classification; or approval of instructor.

EHRD 391 Measurement and Evaluation in Human Resource Development and Technology Management
Credits 3. 3 Lecture Hours.
Measurement and evaluation techniques in the field of Human Resource Development and Technology Management; emphasis on understanding, calculation and application of basic testing, assessment and interpretation methods.
Prerequisites: Junior or senior classification or approval of instructor; EHRD 203 with a grade of C or better; MATH 168 and MATH 142.

EHRD 405 Principles and Practices of Leadership in Human Resource Development and Technology Management
Credits 3. 3 Lecture Hours.
Theories and concepts associated with learning in individuals and organizations; overview of leadership theories and learning theories within a context of developing leadership programs.
Prerequisites: Junior or senior classification and approval of instructor.

EHRD 408 Globalization and Diversity in the Workplace
Credits 3. 3 Lecture Hours.
Assist learners in the identification and understanding of globalization and diversity issues in learning, work and community; exploration of current issues, theories, trends and policy issues.
Prerequisites: Junior or senior classification and approval of instructor.

EHRD 413 Conflict Management and Dialogue
Credits 3. 3 Lecture Hours.
Conflict management principles and practices in the workplace; engagement in meaningful conflict from a training and development perspective.
Prerequisites: Grade of C or better in EHRD 203 and EHRD 210; junior or senior classification; or approval of instructor.

EHRD 477 Project Management in Organizations
Credits 3. 3 Lecture Hours.
Application of principles of project management in organizations; focus on the development of project proposals, project planning using project management software; management of project personnel and resources.
Prerequisite: Junior or senior classification or approval of instructor.
ENGD - Engr Design Graphics (ENDG)

ENDG 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Special problems in engineering design graphics to fit needs of individual students.
Prerequisite: Approval of instructor.

ENDG 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of engineering design graphics.
Prerequisite: Approval of instructor.

ENDS - Environmental Design (ENDS)

ENDS 101 Design Process
Credits 3. 3 Lecture Hours.
(ARCH 1311) Design Process. Fundamental design processes, issues and theories relevant to design resolution and the creation of new ideas; creative thought processes from the formation of ideas through incubation to final product and future impact on the physical environment and society.

ENDS 105 Design Foundations I
Credits 4. 1 Lecture Hour. 8 Lab Hours.
Visual and functional design principles; development of skills in perception, thought and craft as they apply to the formation of two- and three-dimensional relationships; design attitudes and environmental awareness.
Prerequisite: Major in environmental design.

ENDS 106 Design Foundations II
Credits 4. 1 Lecture Hour. 6 Lab Hours.
Approaches to problem identification and problem solving emphasizing an awareness of human, physical and cultural factors influencing design; reinforcement of visual and verbal communication as applied to the design process.
Prerequisite: ENDS 105.

ENDS 108 Design and Visual Communication Foundations II
Credits 5. 1 Lecture Hour. 12 Lab Hours.
Approaches to problem identification and problem solving emphasizing human, physical and cultural factors influencing architectural design; understanding of space, materiality and tectonics in a human body scale; development of drawing methods with emphasis on analytical drawing; reinforcement of visual and verbal communication as applied to design processes.
Prerequisite: ENDS 105 and ENDS 115.

ENDS 115 Design Communication Foundations
Credits 3. 1 Lecture Hour. 4 Lab Hours.
(ARCH 1307) Design Communication Foundations. Introduction to and practice of tools, methods, techniques available for graphic communication; graphic communication and the design process; observation and other forms of free-hand drawing and drawing systems that develop representational and descriptive capabilities.
Prerequisite: Major in environmental design.

ENDS 116 Design Communication Foundations II
Credits 3. 1 Lecture Hour. 4 Lab Hours.
(ARCH 1308) Design Communication Foundations II. Introduction to design drawing using a wide variety of tools ranging from conventional drafting and drawing equipment to the latest digital graphic applications; a focused investigation of analytical drawing as it contributes to the design process; experience of a wide variety of drawing conventions intended to equip students to navigate a design process.
Prerequisites: ENDS 115 and concurrent enrollment in ENDS 106.

ENDS 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in environmental design. May be repeated for up to 12 credit hours.
Prerequisite: Approval of instructor and degree coordinator.

ENDS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of environmental design. May be repeated for up to 9 credit hours.
Prerequisite: Approval of instructor or department head.
ENGL 104 Composition and Rhetoric
Credits 3.3 Lecture Hours.
(ENGL 1302) Composition and Rhetoric. Focus on referential and persuasive researched essays through the development of analytical reading ability, critical thinking and library research skills; for freshman and sophomore students only; also taught at Galveston and Qatar campuses.

ENGL 107 Introduction to the Health Humanities
Credits 3.3 Lecture Hours.
Introduction to the methods and approaches of the health humanities; exposure to key scholarship in this field as well as major methods and approaches; application of such skills to the analysis of cultural case studies such as illness narratives or contemporary debates in scientific bioethics.
Cross Listing: COMM 107, HHUM 107, and PHIL 107.

ENGL 202 Environmental Literature
Credits 3.3 Lecture Hours.
Texts from various periods and locations and in various genres and media that focus on the relationship of human beings to the rest of the natural world; topics vary from each section.

ENGL 203 Writing about Literature
Credits 3.3 Lecture Hours.
Exploration of literature by genre and/or theme; literary analysis and interpretation; intensive writing about literature; also taught at Galveston campus.

ENGL 204/AFST 204 Introduction to African-American Literature
Credits 3.3 Lecture Hours.
Introduction to the writings of African Americans from the 18th century to the present, emphasizing the major themes and traditions; ENGL-204 also taught at Galveston campus.
Cross Listing: AFST 204/ENGL 204.

ENGL 205/AFST 205 Introduction to Africana Literature
Credits 3.3 Lecture Hours.
Works, literary movements and genres of authors of African descent in the Americas, Europe and Africa.
Cross Listing: AFST 205/ENGL 205.

ENGL 206 Twenty-first Century Literature and Culture
Credits 3.3 Lecture Hours.
Exploration of the literary and cultural forms of the twenty-first century, focusing on a variety of national and transnational origins.

ENGL 207 Human Thinking and Digital Culture
Credits 3.3 Lecture Hours.
Introduction to methodology, scope and practice of digital humanities; overview of digital research culture; evaluation of digital media as tools for thinking.

ENGL 209/LING 209 Introduction to Linguistics
Credits 3.3 Lecture Hours.
Nature of human language and of linguistics; includes an introduction to phonology, syntax, semantics and morphology and the role of spoken and written discourse in sustaining societal arrangements.
Cross Listing: LING 209/ENGL 209.

ENGL 210 Technical and Business Writing
Credits 3.3 Lecture Hours.
(ENGL 2311) Technical and Business Writing. Focus on writing for professional settings; correspondence and researched reports fundamental to the technical and business workplace—memoranda, business letters, research proposals and presentations, use of graphical and document design; emphasis on audience awareness, clarity of communication and collaborative team-work; also taught at Galveston and Qatar campuses.

ENGL 211/INTS 211 Foundations in Cultural Studies
Credits 3.3 Lecture Hours.
Introduction to history, influence and major ideas of Cultural Studies; use of culture as a means to critique social problems and understand social forces; analysis of culture in its relationship to power; participation in project investigating contemporary U.S. youth subcultures.
Cross Listing: INTS 211/ENGL 211.

ENGL 212 Shakespeare
Credits 3.3 Lecture Hours.
Exploration of selected works of Shakespeare; also taught at Galveston campus.

ENGL 219 Literature and the Other Arts
Credits 3.3 Lecture Hours.
Imaginative literature in conversation with aesthetic principles and such other arts as painting, sculpture, architecture, film and music; also taught at Qatar campus.

ENGL 220 Graphic Novel
Credits 3.3 Lecture Hours.
An exploration of origins and development of the graphic novel.

ENGL 221/MODL 221 World Literature
Credits 3.3 Lecture Hours.
(ENGL 2332) World Literature. Survey of world literature from the ancient world through the sixteenth century in relation to its historical and cultural contexts; texts selected from a diverse group of authors, traditions and genres.
Cross Listing: MODL 221/ENGL 221.

ENGL 222/MODL 222 World Literature
Credits 3.3 Lecture Hours.
(ENGL 2333) World Literature. Survey of world literature from the seventeenth century to the present in relation to its historical and cultural contexts; texts selected from a diverse group of authors, traditions and genres.
Cross Listing: MODL 222/ENGL 222.

ENGL 227 American Literature: The Beginnings to Civil War
Credits 3.3 Lecture Hours.
(ENGL 2327) American Literature: The Beginnings to Civil War. Representative writers, genres and movements of the period.
ENGL 228 American Literature: Civil War to Present
Credits 3. 3 Lecture Hours.
(ENGL 2328) American Literature: Civil War to Present. Expressions of the American experience in realism, regionalism and naturalism; varieties of modernist and contemporary writing; the rise of ethnic literature and experimental literary forms.

ENGL 231 Survey of English Literature I
Credits 3. 3 Lecture Hours.
(ENGL 2322) Survey of English Literature I. Literature of England from Anglo-Saxon times through the 18th century.

ENGL 232 Survey of English Literature II
Credits 3. 3 Lecture Hours.
(ENGL 2323) Survey of English Literature II. Literary works from the late 18th century to the 21st century by authors in Great Britain and its colonies.

ENGL 235 Elements of Creative Writing
Credits 3. 3 Lecture Hours.
(ENGL 2307) Elements of Creative Writing. Initiation into the craft of creative writing in prose and poetry; extensive reading in the genres; peer workshops.

ENGL 241 Advanced Composition
Credits 3. 3 Lecture Hours.
Focuses on the writing of advanced academic and professional prose by integrating computer technology in the analysis and production of that prose.

ENGL 251/FILM 251 Introduction to Film Analysis
Credits 3. 3 Lecture Hours.
Fundamental aspects of film analysis and criticism; ENGL-251 also taught at Galveston and Qatar campuses.

ENGL 253 Introduction to Cultural Studies and Popular Culture
Credits 3. 3 Lecture Hours.
Introduction to Cultural Studies and Popular Cultural. An introduction to the history, theories and methods of contemporary cultural studies. The course will explore key concepts in cultural theory to examine specific aspects of popular culture as well as cultural sites and practices so as to expand upon the analytical and critical thinking skills learned in ENGL 104 and 203.

ENGL 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Readings selected for specific need of major or minor in English.

ENGL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of English. May be repeated for credit.

ENGL 291 Research
Credits 0 to 3. 0 to 3 Lecture Hours.
Research conducted under the direction of faculty member in English.
Prerequisites: 3 hours of 200-level literature; freshman or sophomore classification and approval of instructor.

ENGL 292 Introduction To Literature And Medicine
Credits 3. 3 Lecture Hours.
Introduction to methodology, scope and practice of literature and medicine studies; analysis of autobiographies, novels and poetry dealing with health and illness; evaluation of sources from different disciplinary perspectives as a tool for critical thinking.

ENGL 303 Approaches to English Studies
Credits 3. 3 Lecture Hours.
A writing intensive exploration of the methodologies and major topics of English studies.
Prerequisite: ENGL 104 or registration therein; junior or senior classification or approval of instructor.

ENGL 304 Topics in Digital Research
Credits 3. 3 Lecture Hours.
Topics in the studies of digital humanities; introduction to making/interpreting digital materials, the surrogates of books, paintings, etc., that form our cultural heritage, as well as digitally-born literature, art and culture; reflection on digital cultures/digital archives; theory and practice of creating and research digital resources. May be taken three times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

ENGL 305 Texas Literature
Credits 3. 3 Lecture Hours.
Examination of Texas literature, culture and multi-media; exploration of the development of Texas identities and responses to the rich cultural diversity within the state; topics vary from each section.
Prerequisite: Junior or senior classification.

ENGL 306 Transnational Literature and Culture
Credits 3. 3 Lecture Hours.
Examination of texts written in English that de-center the nation-state as the central way to organize cultural comparison; includes colonialism, economics, empire, globalization, migration, race and refugees.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification or approval of instructor.

ENGL 308 History of Literary Criticism
Credits 3. 3 Lecture Hours.
History of literary thought from antiquity to the present, including writers such as Plato, Aristotle, 'Longinus;' Sidney, Shelley, and Dryden; analysis of genres such as tragedy, lyric, and film; critical approaches such as new criticism, structuralism, deconstruction, Marxism, feminism, new historicism, and film studies.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 309/INTS 311 Cultural Politics
Credits 3. 3 Lecture Hours.
Exploration of the concept of cultural politics across several academic disciplines in the humanities and social sciences; broad interrogation of relationships that mediate culture and power in national and international contexts; focus on how culture shapes and is shaped by society, political perspectives and actions.
Prerequisites: Junior or senior classification; or approval of the instructor.
Cross Listing: INTS 311/ENGL 309.

ENGL 310/LING 310 History of the English Language
Credits 3. 3 Lecture Hours.
Phonological, grammatical and lexical history of the English language; brief discussion of some other Indo-European languages; principles of linguistic change, as reflected in English.
Prerequisite: Junior or senior classification.
Cross Listing: LING 310/ENGL 310.

ENGL 313 Medieval English Literature
Credits 3. 3 Lecture Hours.
Old and Middle English literature exclusive of Chaucer, including such authors and works as Beowulf, The Dream of the Rood, Sir Gawain and the Green Knight, Piers Plowman, Malory, Julian of Norwich, Kempe, the mystery plays and the lyrics.
Prerequisite: 3 credits of literature at 200-level or above.
ENGL 314 The English Renaissance
Credits 3.3 Lecture Hours.
Period course in the poetry, prose and drama of England in the 16th century.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 315 Seventeenth-Century Literature
Credits 3.3 Lecture Hours.
Period course in English poetry, prose and drama of the 17th century.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 316 Eighteenth-Century Literature and Culture
Credits 3.3 Lecture Hours.
Period course in English poetry, prose and drama of the 18th century.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 317 Early British Drama
Credits 3.3 Lecture Hours.
Period course in early British, non-Shakespearean drama to 1642.
Prerequisite: 3 credits of literature at the 200-level or above.

ENGL 318 Utopian Literature in the English Tradition
Credits 3.3 Lecture Hours.
Exploration of the theories and practices of historical and contemporary utopian literature through representative writers and texts.
Prerequisites: 3 credits of literature at 200-level or above.

ENGL 320 Technical and Professional Editing
Credits 3.3 Lecture Hours.
Principles and techniques of technical editing for print and electronic media, including standards, style, copy-editing, comprehensive editing and project management.
Prerequisite: ENGL 210.

ENGL 321 Nineteenth-Century Literature (Romantic)
Credits 3.3 Lecture Hours.
Representative texts in English generated throughout the British empire in the late-18th and early-19th centuries.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 322 Nineteenth-Century Literature (Victorian)
Credits 3.3 Lecture Hours.
Period course in English poetry and prose of major Victorian authors.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 323 The American Renaissance
Credits 3.3 Lecture Hours.
Period course in the American Renaissance, covering such writers as Emerson, Hawthorne, Thoreau, Alcott, Fuller, Douglass, Melville, Poe, Stowe and Whitman.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 324/FILM 324 Science Fiction and Film
Credits 3.3 Lecture Hours.
History and trajectory of science fiction film into the 21st century by filmmakers such as Kubrick, Jenkins, Cameron, Coogler and others.
Prerequisites: 3 credits of literature at 200-level or above.
Cross Listing: FILM 324/ENGL 324.

ENGL 329/AFST 329 African-American Literature Pre-1930
Credits 3.3 Lecture Hours.
Major works of the African-American literary tradition from the 18th century to 1930 studied within cultural and historical context.
Prerequisites: 3 credits of literature at 200-level or above.
Cross Listing: AFST 329/ENGL 329.

ENGL 330 Arthurian Literature
Credits 3.3 Lecture Hours.
Legend of King Arthur in English and American literature from its Medieval origins to the present.
Prerequisite: Junior or senior classification; also taught at Galveston campus.

ENGL 331 Fantasy Literature
Credits 3.3 Lecture Hours.
An exploration of origins and development of fantasy literature, including representative writers, genres and texts.
Prerequisites: Junior or senior classification.

ENGL 333/WGST 333 Lesbian, Gay, Bisexual, Transgender and Queer Literatures
Credits 3.3 Lecture Hours.
Multi-ethnic study of American Literature, the writings of Black Americans, American Indians, Latinos/Latinas, Jewish Americans, as well as other ethnic groups.
Prerequisite: Junior or senior classification.

ENGL 334 Science Fiction Present and Past
Credits 3.3 Lecture Hours.
Origins and development of the science fiction genre.
Prerequisite: Junior or senior classification; also taught at Galveston campus.

ENGL 335 Literature of the Sea
Credits 3.3 Lecture Hours.
Significance of the sea in fictional and factual accounts, such as novels, short stories, poems and narratives of sailors and seafaring life.
Prerequisites: Three credits of literature at 200 level or above; junior or senior classification or approval of instructor; Galveston campus; also taught at College Station campus.

ENGL 336 Life and Literature of the Southwest
Credits 3.3 Lecture Hours.
Exploration of Southwestern literature, including such authors as Abbey, Anaya, Cabeza de Vaca, Cather, Krutch, McCarty, Momaday, Paz, Paredes and Porter.
Prerequisite: Junior or senior classification.

ENGL 337 Life and Literature of the American South
Credits 3.3 Lecture Hours.
Study of writing and culture of the American South based on reading and analysis of key texts by representative authors.
Prerequisite: Junior or senior classification.

ENGL 338 American Ethnic Literature
Credits 3.3 Lecture Hours.
Multi-ethnic study of American Literature, the writings of Black Americans, American Indians, Latinos/Latinas, Jewish Americans, as well as other ethnic groups.
Prerequisite: Junior or senior classification; also taught at Galveston campus.

ENGL 339/AFST 339 African-American Literature Post-1930
Credits 3.3 Lecture Hours.
Major works of the African-American literary tradition from the 1930s to the present studied in their cultural and historical context.
Prerequisites: 3 credits of literature at 200-level or above.
Cross Listing: AFST 339/ENGL 339.
ENGL 340 Modern and Contemporary Drama
Credits 3. 3 Lecture Hours.
Representative plays and performances from the late nineteenth century to the present.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 342 The Rhetoric of Gender and Health
Credits 3. 3 Lecture Hours.
Study of field of rhetoric of health and medicine with specific attention to the study of gender, including issues in reproduction, expertise and illness; range of methods and methodological approaches within the field.
Prerequisite: Junior or senior classification.

ENGL 343 Fairy Tales in the English Tradition
Credits 3. 3 Lecture Hours.
An exploration of the history, development, theory, and practice of fairy tales, including representative writers, sub-genres and texts.
Prerequisites: 3 credits of literature at 200-level or above.

ENGL 345 Writers' Studies: Prose or Poetry
Credits 3. 3 Lecture Hours.
A different topic for fiction writers or poets each term; may include historical development of genres; connection between biography and artistic production; study of writers' theories of the art of fiction or poetry.
Prerequisites: ENGL 235; junior or senior classification.

ENGL 347 Writers' Workshop: Prose
Credits 3. 3 Lecture Hours.
Production of advanced, complete stories; peer workshops; extensive reading. May be repeated 1 time for credit.
Prerequisite: ENGL 235; junior or senior classification or approval of instructor.

ENGL 348 Writers' Workshop: Poetry
Credits 3. 3 Lecture Hours.
Production of advanced, complete poems; peer workshops; extensive reading. May be repeated 1 time for credit.
Prerequisite: ENGL 235; junior or senior classification or approval of instructor.

ENGL 350 Twentieth-Century Literature to World War II
Credits 3. 3 Lecture Hours.
Novelists, poets and dramatists writing in English from the late nineteenth to mid-twentieth century.
Prerequisite: Junior or senior classification.

ENGL 351/FILM 351 Advanced Film
Credits 3. 3 Lecture Hours.
A different film topic each term; sample topics include major directors, historical periods, fiction into film, film genres. May be repeated for credit.
Prerequisites: ENGL 251/FILM 251 or FILM 251/ENGL 251 or FILM 301 or approval of instructor; junior or senior classification.
Cross Listing: FILM 351/ENGL 351.

ENGL 352 Literature, World War II to Present.
Credits 3. 3 Lecture Hours.
Novelists, poets and dramatists from the World War II era to the present.
Prerequisite: Junior or senior classification.

ENGL 353 History of Rhetoric
Credits 3. 3 Lecture Hours.
Exploration of the major approaches to the theory and practice of oral and written rhetoric and discourse up to the end of the 19th century.
Prerequisite: Junior or senior classification.

ENGL 354 Modern Rhetorical Theory
Credits 3. 3 Lecture Hours.
Study of 20th and 21st century rhetorical theories and theorists; focus on relationships among rhetoric and culture, such as rhetoric in oral and textual communities, rhetoric as a method of literary interpretation, rhetoric and linguistics, rhetoric as theorized and taught across academic communities.
Prerequisite: Junior or senior classification.

ENGL 355 The Rhetoric of Style
Credits 3. 3 Lecture Hours.
Fosters an appreciation for and better understanding of English prose style; the history of English prose; representative prose models for analysis and imitation; the impact of computer analysis.
Prerequisite: Junior or senior classification.

ENGL 356/FILM 356 Literature and Film
Credits 3. 3 Lecture Hours.
Novels and films based on them; writers and filmmakers such as Virginia Woolf, John Steinbeck, John Ford, Sally Potter, John Huston, Charlotte Bronte and Peter Bogdanavich.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: FILM 356/ENGL 356.

ENGL 357 Native American Rhetorics and Literatures
Credits 3. 3 Lecture Hours.
Examination of Native American rhetorics and literatures with a focus on the relationship between composed, performed, and material rhetorics; covering Native American rhetors and writers from pre-colonization to the present and contextualizing them within contemporary Native issues.
Prerequisite: Junior or senior classification or approval of instructor.

ENGL 358/FILM 358 Screenwriting
Credits 3. 3 Lecture Hours.
Analysis of screenplay structure coupled with writing assignments illustrating principles of form.
Prerequisite: Junior or senior classification.
Cross Listing: FILM 358/ENGL 358.

ENGL 359 Forms of Creative Writing
Credits 3. 3 Lecture Hours.
Major forms of writing in prose or poetry, depending on instructor; analysis of structure coupled with writing assignments illustrating principles of form in narrative and/or lyrical modes. May be taken three times for credit.
Prerequisites: ENGL 235; junior or senior classification.

ENGL 360 Literature for Children
Credits 3. 3 Lecture Hours.
Representative writers, genres, texts and movements.
Prerequisite: Junior or senior classification.

ENGL 361 Young Adult Literature
Credits 3. 3 Lecture Hours.
Survey of historical and contemporary literature for adolescents, including such forms as fantasy, domestic fiction, and the problem novel.
Prerequisite: Junior or senior classification.
ENGL 362/HISP 362 Latino/a Literature
Credits 3. 3 Lecture Hours.
Literature by U.S.-based Latino/a authors writing mostly in English; examination of historical and social contexts of cultural production; may include novels, poetry, short stories, plays, and films to gain understanding of aesthetic expression of diverse Latino/a authors, including but not limited to Mexican Americans, Puerto Ricans, Cuban Americans, and Dominican Americans.
Prerequisite: Junior or senior classification.
Cross Listing: HISP 362/ENGL 362.
ENGL 365/RELS 360 The Bible as Literature
Credits 3. 3 Lecture Hours.
Prerequisite: Junior or senior classification.
Cross Listing: RELS 360/ENGL 365.
ENGL 372 American Poetry
Credits 3. 3 Lecture Hours.
Exploration of the development of American poetic traditions, with an emphasis on the major poetry of 19th and 20th centuries.
Prerequisite: 3 credits of literature at 200-level or above.
ENGL 373 American Realism and Naturalism
Credits 3. 3 Lecture Hours.
Exploration of the literature produced in the United States between the Civil War and World War I, such as works by Twain, James, Freeman, Jewett, Chesnutt, Crane, Dreiser, Wharton.
Prerequisites: 3 credits of literature at 200-level or above.
ENGL 374/WGST 374 Women Writers
Credits 3. 3 Lecture Hours.
History of literature by women in English; emphasis on continuity of ideas and on literary contributions; study of a variety of genres with particular attention to the significance of gender in the racial, social, sexual and cultural contexts of women writing in English.
Prerequisite: Junior or senior classification; ENGL-374 also taught at Galveston campus.
Cross Listing: WGST 374/ENGL 374.
ENGL 375 Nineteenth-Century American Novel
Credits 3. 3 Lecture Hours.
An exploration of the development of the American novel; study of representative novels from the early national period, the American Renaissance, and realism and naturalism.
Prerequisite: 3 credits of literature at 200-level or above.
ENGL 376 The American Novel Since 1900
Credits 3. 3 Lecture Hours.
Representative novels of 20th and 21st century American writers; emphasis on varied literary movements and on thematic and formal innovations as reflections of/responses to social transformations in American society since 1900.
Prerequisite: Junior or senior classification.
ENGL 377 The British Novel to 1870.
Credits 3. 3 Lecture Hours.
Representative works illustrating the development of the novel, by writers resident in Great Britain and its colonies, from its beginnings to the late nineteenth century.
Prerequisite: 3 credits of literature at 200-level or above.
ENGL 378 The British Novel, 1870 to Present.
Credits 3. 3 Lecture Hours.
Representative works illustrating development of the novel by writers resident in Great Britain and its colonies from the late nineteenth century forward.
Prerequisite: Junior or senior classification.
ENGL 379/AFST 379 Postcolonial Literatures
Credits 3. 3 Lecture Hours.
Exploration of key terms, themes and debates within global literature written by colonized, occupied and diasporic peoples.
Prerequisites: 3 credits of literature at the 200-level or above.
Cross Listing: AFST 379/ENGL 379.
ENGL 385 Playwriting
Credits 3. 3 Lecture Hours.
The craft of writing plays and practical experience in writing plays of various lengths; structure, building of ideas into dramatic situations, use of dialogue and movement.
Prerequisite: ENGL 235; junior or senior classification or approval of instructor.
ENGL 386 Creative Nonfiction
Credits 3. 3 Lecture Hours.
Practical study and application of literary nonfiction, the general audience essay, the memoir, and related nonfiction forms; with extensive workshop time and attention given to student writing, expert and peer review as well as readings from authors in the genre.
Prerequisites: ENGL 235; junior or senior classification.
ENGL 390 Studies in British Literature
Credits 3. 3 Lecture Hours.
Exploration of a significant topic or period in British literature; features current faculty research on such topics as Victorian fantasy literature, social identity in medieval Britain and Ireland and children in film. May be repeated 1 time for credit.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.
ENGL 391 Folklore, Literature, and World Cultures
Credits 3. 3 Lecture Hours.
Theories of folklore and vernacular culture; exploration of the relationship between oral literature and the forms of vernacular culture, including film, festival and dance.
Prerequisites: Junior or senior classification.
ENGL 392/RELS 392 Studies in Literature, Religion and Culture
Credits 3. 3 Lecture Hours.
Exploration of literature treating significant religious topics in the context of cultural setting; features current faculty research on such topics as Tolkien and the making of myth, C.S. Lewis, texts and cultures of the Middle East and Victorian women writers and religion. May be repeated one time for credit.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.
Cross Listing: RELS 392/ENGL 392.
ENGL 393/AFST 393 Studies in Africana Literature and Culture
Credits 3. 3 Lecture Hours.
Practical study and application of literatures and culture of people of African descent.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.
Cross Listing: AFST 393/ENGL 393.
ENGL 394 Studies in Genre
Credits 3. 3 Lecture Hours.
Theory and practice of a single genre including analysis of its history and development; features current faculty research on such topics as women standup comics, British short stories and Irish history on stage and screen. May be repeated once for credit.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.

ENGL 395 Topics in Literature and Medicine
Credits 3. 3 Lecture Hours.
Examination of a particular period or genre within literature and medicine studies; analysis of autobiographies, novels and poetry dealing with health and illness; evaluation of sources from different disciplinary perspectives as a tool for critical thinking; topics will vary.
Prerequisite: ENGL 292.

ENGL 396 Studies in American Literature
Credits 3. 3 Lecture Hours.
Exploration of a significant topic or period in American literature; features current faculty research on such topics as Asian-American women writers, American music and literature and American Gothic.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.

ENGL 401 Contemporary Literary Theory
Credits 3. 3 Lecture Hours.
Exposure to the discourses of contemporary theory in engagement with other academic disciplines; study of major theoretical schools, debates, and critiques.
Prerequisites: 3 credits of literature at the 300-level; junior or senior classification.

ENGL 403 Language and Gender
Credits 3. 3 Lecture Hours.
Language and gender from a sociolinguistic perspective; gender in the words and structures of language; gender representation and gendered language use in the media and a variety of sociocultural contexts; language use in intimate relationships; computer-mediated discourse; language, sexuality, and sexual orientation.
Prerequisite: Junior or senior classification.
Cross Listing: LING 403 and WGST 403.

ENGL 412 Studies in Shakespeare
Credits 3. 3 Lecture Hours.
Advanced study of a significant topic in Shakespeare.
Prerequisites: 3 credits of literature at the 300-level; junior or senior classification.

ENGL 414 Milton
Credits 3. 3 Lecture Hours.
In-depth study of poetry and selected prose works of John Milton.
Prerequisite: 3 credits of literature at the 300-level; junior or senior classification.

ENGL 415 Studies in a Major Author
Credits 3. 3 Lecture Hours.
Exploration of a major author as a vehicle for emphasizing intensive analysis, scholarship and literary criticism.
Prerequisite: 3 credits of literature at 300-level; junior or senior classification; also taught at Galveston campus.

ENGL 431 Chaucer
Credits 3. 3 Lecture Hours.
Intensive analysis of Chaucer's works in Middle English, including engagement with published criticism and scholarship.
Prerequisite: 3 credits of literature at 300-level; junior or senior classification.

ENGL 435 Advanced Studies in Creative Writing
Credits 3. 3 Lecture Hours.
Advanced study of specified topics in a creative writing genre or genres. May be repeated two times for credit.
Prerequisites: 3 credits of creative writing at the 300-level; junior or senior classification.

ENGL 460 Digital Authoring Practices
Credits 3. 3 Lecture Hours.
Analysis and practice of authoring in digital environments, including individual and collaborative approaches, audience concerns, theoretical, ethical and stylistic issues; environments and topics may include web design, content management system (CMS), text encoding, project management, usability, version tracking, content authoring and accessibility.
Prerequisites: ENGL 210; junior or senior classification.

ENGL 461 Advanced Syntax and Rhetoric
Credits 3. 3 Lecture Hours.
Points of view toward language study; traditional syntax; points of view toward rhetoric; Christensen's rhetoric of the paragraph; analysis of written discourse.
Prerequisite: Senior classification or approval of instructor.

ENGL 462 Rhetoric in Cultural Context
Credits 3. 3 Lecture Hours.
Theories concerning the influence of socio-cultural context on expressive forms and how such forms are used to achieve social and communicative aims; analysis of examples of written, verbal, and visual rhetorics from various cultures illustrating the impact that expressive forms have on social life.
Prerequisites: ENGL 353, ENGL 354, or ENGL 355; junior or senior classification.

ENGL 474/WGST 474 Studies in Women Writers
Credits 3. 3 Lecture Hours.
A different topic each term examining women's writing through historical period, genre, cross-cultural study and/or feminist literary theory. May be repeated for credit.
Prerequisites: 3 credits of literature at the 300-level; junior or senior classification.
Cross Listing: WGST 474/ENGL 474.

ENGL 481 Senior Seminar
Credits 3. 3 Lecture Hours.
Capstone seminar on significant figures, movements or issues with special attention to methods and materials of scholarship.
Prerequisites: ENGL 303; senior classification.

ENGL 482 Health Humanities Senior Seminar
Credits 3. 3 Lecture Hours.
Capstone course; application of skills and knowledge acquired during health humanities concentration coursework; exposure to specialized methods of inquiry; development and execution of an individualized final project.
Prerequisites: ENGL 107, COMM 107, or HHUM 107; junior or senior classification.
Cross Listing: COMM 482 and HHUM 482.
ENGR 484 Internship
Credits 0 to 3. 0 to 3 Lecture Hours.
Directed internship in a public or private organization to provide students with on-the-job training and applied research experience appropriate to career objectives. May be taken three times for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Approval of department head; junior or senior classification; also taught at Galveston campus.

ENGL 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Readings selected for specific need of major or minor in English; also taught at Galveston campus.

ENGR 101 Energy: Resources, Utilization and Importance to Society
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introductory course about current and potential energy sources, the link between energy and wealth, and the consequences of action or inaction concerning energy and the environment.

ENGR 102 Engineering Lab I - Computation
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Introduction to the design and development of computer applications for engineers; computation to enhance problem solving abilities; basic concepts of software design through the implementation and debugging of student-written programs; introduction to engineering majors, career exploration, engineering practice within realistic constraints, e.g. economic, environmental, ethical, health and safety, and sustainability; pathways to success in engineering.
Prerequisites: Grade of C or better in MATH 151, or concurrent enrollment; admission to the college of engineering.

ENGR 102 Engineering Lab I - Computation
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Introduction to the design and development of computer applications for engineers; computation to enhance problem solving abilities; basic concepts of software design through the implementation and debugging of student-written programs; introduction to engineering majors, career exploration, engineering practice within realistic constraints, e.g. economic, environmental, ethical, health and safety, and sustainability; pathways to success in engineering.
Prerequisites: Grade of C or better in MATH 151, or concurrent enrollment; admission to the college of engineering.

ENGR 111 Foundations of Engineering I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
(ENGR 1201) Foundations of Engineering I. Introduction to the engineering profession, ethics, and disciplines; development of skills in teamwork, problem solving and design; other topics depending on the major include emphasis on computer applications and programming, visualization and CAD tools, introduction to electrical circuits, semiconductor devices, digital logic, communications and their application in systems; Newton's laws, unit conversions, statistics, computers, Excel; basic graphics skills; visualization and orthographic drawings.
Prerequisites: MATH 150 or MATH 151, or concurrent enrollment; admission to the College of Engineering; also taught at Galveston campus.

ENGR 112 Foundations of Engineering II
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Continuation of ENGR 111. Topics include, depending on the major, emphasis on computer applications and programming and solids modeling using CAD tools or other software; fundamentals of engineering science; advanced graphic skills.
Prerequisite: ENGR 111; MATH 151 or concurrent enrollment; admission to the College of Engineering; also taught at Galveston campus.

ENGR 181 Engineering Honors Seminar I
Credit 1. 1 Lecture Hour.
Co-curricular experiences related to academic success, undergraduate research and service in preparation for careers in research and technology leadership.
Prerequisites: Admitted to engineering honors; freshman or sophomore classification.

ENGR 216/PHYS 216 Experimental Physics and Engineering Lab II - Mechanics
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Description and application of laws of physical motion to the solution of science and engineering problems; using sensing, control and actuation for experimental verification of physics concepts while solving engineering problems.
Prerequisites: Grade of C or better in MATH 151 or MATH 171 or equivalent; grade of C or better in ENGR 102; grade of C or better and concurrent enrollment in PHYS 206; also taught at Galveston campus.
Cross Listing: PHYS 216/ENGR 216.

ENGR 217/PHYS 217 Experimental Physics and Engineering Lab III - Electricity and Magnetism
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Electromagnetism and electromechanical systems; use of sensing, control and actuation to demonstrate key physical relationships through the transducer relationships linking pressure, temperature and other physical stimuli to changes in electric and magnetic fields.
Prerequisites: Grade of C or better in MATH 152 or MATH 172, or equivalent; grade of C or better in PHYS 206 or equivalent; grade of C or better in PHYS 216/ENGR 216 or ENGR 216/PHYS 216; grade of C or better and concurrent enrollment in PHYS 207; also taught at Galveston campus.
Cross Listing: PHYS 217/ENGR 217.

ENGR 251 Creating a Self-Aware Leader
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamentals of engineering leadership and business; organizational dynamics; self-awareness.
Prerequisites: Grade of C or better in ENGR 102, and ENGR 216/PHYS 216 or PHYS 216/ENGR 216; acceptance into the Zachry Leadership Program.
ENGR 260 Engineering Creativity
Credits 2. 2 Lecture Hours.
Designed to provide opportunities to gain knowledge and skills in the areas of creativity, innovation and design thinking through interdisciplinary team design projects and development of rough prototypes.
Prerequisites: ENGR 111 and ENGR 112, or concurrent enrollment.

ENGR 262 Engineering Entrepreneurship Hour
Credit 1. 1 Lecture Hour.
Engagement with successful technology entrepreneurs from technical sectors across engineering and the nation; challenges faced by and characteristics of successful entrepreneurs and their strategies in launching and sustaining businesses on technology innovation; network with highly successful entrepreneurs and develop relations valuable to professional careers; development of speaking and presentation skills; networking with industry professionals in support of entrepreneurship.
Prerequisites: Freshman or sophomore classification in College of Engineering.

ENGR 270 Engineering Projects in Community Service
Credit 1. 1 Lecture Hour.
Project course using team approach to engage students in open-ended community service projects involving non-profit agencies; includes project management, understanding the complete design process, awareness of the customer in engineering design, and the ability to communicate effectively. May be taken six times for credit.
Prerequisites: ENGR 102 or approval of instructor; freshman or sophomore classification in an engineering major.

ENGR 281 Engineering Honors Mentoring and Team Building Seminar Credits 0-1. 0-1 Other Hours.
Selected topics related to peer mentoring and team building while participating in co-curricular activities; emphasis on building supportive relationships on campus; provides practical experience in being a member of a project involving campus or community-based engagement; for those serving as a Coach (i.e., student leader providing light mentoring to the residents) in the Engineering Honors Living Learning Community (Engineering Honors Community of Scholars or ECOS).
Prerequisites: Appointment to be a Coach in ECOS; approval of instructor.

ENGR 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Special problems in any area of engineering.
Prerequisites: Freshman or sophomore classification; approval of department head.

ENGR 289 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

ENGR 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in the college of engineering. May be repeated three times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ENGR 301 College of Engineering Study Abroad
Credits 0 to 18. 0 to 18 Other Hours.
For students in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to approved program; approval of study abroad coordinator.

ENGR 302
Credits 0.

ENGR 311 Enterprise Basics for Technical Entrepreneurs
Credits 3. 3 Lecture Hours.
Aspects of entrepreneurship for a technical enterprise; elements of a business including idea generation, startup financing, staffing, product design and production, marketing and selling a product; focus on the front end of the venture; product design and development, financing, identifying and attracting key personnel, and starting up company.
Prerequisites: Admission to the college of engineering.

ENGR 312 Sales, Operations and Manufacturing for Technology Companies
Credits 3. 3 Lecture Hours.
Challenges faced in a start-up entity with respect to product manufacturing, operations and supply chain management, product pricing strategies, and sales and marketing; focus on small start-up to young mid-size enterprises.
Prerequisites: Junior or senior classification in the college of engineering.

ENGR 333 Project Management for Engineers
Credits 3. 3 Lecture Hours.
Basic project management for engineering; project development and economic justification; estimating; scheduling; network methods; critical path analysis; earned value management; project organizational structures; project risk assessment; resource allocation; ethics; characteristics of project managers.
Prerequisite: Junior or senior classification in the College of Engineering or biological and agricultural engineering or approval of instructor.

ENGR 350 Leading for Impact in Engineering, Business and Society
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental leadership and business topics relevant to engineering and technical careers; business model development; business strategy; leadership theory; empathy.
Prerequisites: Grade of C or better in ENGR 251; acceptance into the Zachry Leadership Program; junior or senior classification or approval by instructor.

ENGR 351 The Role of Engineering and Business in Society
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Exploration of engineering and business contributions to society; political, cultural, societal and economic forces’ impact on engineering; using creativity and imagination to solve engineering and societal challenges.
Prerequisites: Acceptance into the Zachry Leadership Program; ENGR 350; junior or senior classification or approval by instructor.

ENGR 380 Seminar Series in Engineering Project Management
Credit 1. 1 Lecture Hour.
Presentations by practicing engineers and professionals addressing engineering project management process and practice; discussion forum to better understand the opportunities and challenges of engineering project management and the analytical tools and skills required to be successful. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: ENGR 333 or approval of instructor; junior or senior classification in the College of Engineering or biological and agricultural engineering (BAEN).
ENGR 381 Engineering Honors Leadership and Project Management Seminar
Credits 0-1. 0-1 Other Hours.
Selected topics related to leadership and project management theory and practice in the context of co-curricular activities, involving multidisciplinary teams; provides practical experience in leading projects involving community-based engagement and residence-based programming; for those serving as Fellows, student leaders in the Engineering Honors Living Learning Community (Engineering Honors Community of Scholars or ECOS).
Prerequisite: Appointment to be a Fellow in ECOS; approval of instructor.

ENGR 385 Problems for Co-Op Students
Credits 1 to 3. 1 to 3 Other Hours.
Special problems in engineering for cooperative education students. Problems related to student’s work assignment culminating in a research paper. Three hours may be used as technical elective, and one additional hour may be used as free elective. A total of 4 hours may be used toward graduation.
Prerequisite: Approval of department head.

ENGR 399 Engineering Honors
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning practice within the Engineering Honors (EH) program which includes the EH Living Learning Community (ECOS); reflection on professional outcomes; documentation and self-assessment of learning experience.

ENGR 401 Interdisciplinary Design
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Instruction and practice in the design process applied to an interdisciplinary design project including establish the customer need; determine requirements in terms of function (what) and performance (how well); develop alternative design concepts; perform trade-off studies among performance, cost and schedule; embodiment and detail design; iterate the above steps; major interdisciplinary design project.
Prerequisites: Senior classification and approval of instructor.

ENGR 402 Interdisciplinary Design II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Product detail and design development process including case studies; may include project management, marketing considerations, manufacturing detailed design specifications; failure modes, applications of codes and standards, selection of design margins; product (component) development guidelines; intellectual property, product liability and ethical responsibility.
Prerequisites: ENGR 401; junior or senior classification.

ENGR 410 Global Engineering Design
Credits 0 to 3. 0 to 3 Lecture Hours.
Intercultural models and their application to engineering design in diverse, multinational and multidisciplinary settings; engineering design project working in international teams of students, faculty and industry experts; applying engineering skills to the project; includes the study and application of intercultural models, global enterprise fundamentals and remote collaboration technologies; required for the International Engineering Certificate.
Prerequisite: Junior or senior classification or approval of instructor.

ENGR 421 Technology Company Management, Leadership, and Corporate Culture
Credits 3. 3 Lecture Hours.
Strategic challenges associated with enterprise management and leadership; establishing and maintaining a sustainable brand; developing an effective corporate culture; dealing with global competition; case studies in strategic thinking.
Prerequisites: Junior or senior classification in the college of engineering.

ENGR 430 Fundamentals of Subsea Engineering
Credits 3. 3 Lecture Hours.
Orientation to subsea engineering fundamentals, including SURF (Subsea, Umbilicals/Controls, Risers, Flowlines) equipment and configurations; exposure to practical, industry focused problems; subsea equipment components; design considerations and design drivers; subsea production operations; integrity critical maintenance activities.
Prerequisite: Junior or senior classification; enrolled in the College of Engineering or approval of instructor.

ENGR 432 Subsea Project Implementation
Credits 3. 3 Lecture Hours.
Overview of the realization of a subsea development project; includes all stages from discovery to pre-commissioning of the subsea infrastructure.
Prerequisites: Grade of C or better in ENGR 430.

ENGR 450 Finding Your Leadership Qualities
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Exploration of personal leadership qualities and perspective; case studies in leadership in engineering enterprises; business etiquette and personal marketing.
Prerequisites: Grade of C or better in ENGR 351; acceptance into the Zachry Leadership Program; junior or senior classification or approval by instructor.

ENGR 451 Leading for a Lifetime: Continual Learning and Influence
Credits 3. 2 Lecture Hours. 2 Lab Hours.
The proposed change is to course name and number as well as including a non-traditional course. This course includes a retreat prior to the start for the semester. The location for the retreat may vary from semester to semester.
Prerequisites: Grade of C or better in ENGR 450; acceptance into the Zachry Leadership Program; junior or senior classification or approval by instructor.

ENGR 456 Engineering Product Lean Launch
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Exercises in the creation of an engineering-centric business using lean startup principles; customer and market validation; value proposition creation; minimum viable product (MVP) development; customer value chain discovery; communication skill training; development of a business model canvas for a student-developed engineering product business idea.
Prerequisite: Junior or senior classification in the College of Engineering.

ENGR 462 Engineering Entrepreneurship Hour
Credit 1. 1 Lecture Hour.
Designed to engage with successful technology entrepreneurs from across the nation; learn about the characteristics of successful entrepreneurs and their strategies in launching and sustaining businesses on technology innovation; network with highly successful entrepreneurs and develop relations valuable to professional careers.
Prerequisites: Junior or senior classification or approval of instructor.
ENGR 470 Engineering Projects in Community Service
Credits 1 to 2. 1 to 2 Other Hours.
Project course using team approach to engage students in open-ended community service projects involving non-profit agencies; includes project management, understanding the complete design process, awareness of the customer in engineering design, and the ability to communicate effectively. May be taken six times for credit.
Prerequisites: ENGR 111 or approval of instructor; junior or senior classification in an engineering major.

ENGR 482/PHIL 482 Ethics and Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Development of techniques of moral analysis and their application to ethical problems encountered by engineers, such as professional employee rights and whistle blowing; environmental issues; ethical aspects of safety, risk and liability and conflicts of interest; emphasis on developing the capacity for independent ethical analysis of real and hypothetical cases.
Prerequisite: Junior classification.
Cross Listing: PHIL 482/ENGR 482.

ENGR 484 International Engineering Internship
Credits 0 to 6. 0 to 6 Lecture Hours.
International Engineering Internship.
Prerequisite: Junior or senior classification.

ENGR 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of problems in any area of engineering. May be taken 3 times for credit.
Prerequisites: Junior or senior classification; approval of the college.

ENGR 489 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours. 0 to 6 Lab Hours.
Selected topics in an identified field of engineering. May be repeated for credit.

ENGR 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in the College of Engineering. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

ENTC - Engineering Technology (ENTC)

ENTC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
I, II, S Selected topics in an identified area of engineering technology. May be repeated for credit.
Prerequisite: Approval of instructor.

ENTC 399 High Impact Experience
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes; documentation and self-assessment of learning experience at mid-curriculum point.
Prerequisites: Grade of C or better in ESET 350, IDIS 343 or MMET 376; approval of instructor.

ENTC 481 Seminar
Credit 1. 1 Lecture Hour.
Presentation of selected topics from current literature and related industrial operations in various technical areas; films showing practical application of manufacturing and industrial processes; lectures from industrial representatives.
Prerequisite: Senior classification.

ENTC 484 Professional Internship
Credit 1. 1 Lecture Hour.
Directed internship in a private firm, government agency/laboratory, or non-governmental organization to provide work and/or research experience related to the student's program and career objectives. May be taken two times for credit.
Prerequisites: Junior and senior classification and approval of internship agency and instructor.

ENTC 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Permits work in a special problem area on an individual basis with the intent of promoting independent reading, research and study; to supplement existing course offerings or subjects not presently covered.
Prerequisites: Senior classification and approval of instructor.

ENTC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of engineering technology.
Prerequisite: Approval of instructor.

ENTC 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in the college of engineering. May be taken four times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

ENST-Environmental Studies (ENST)

ENST 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in environmental studies. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.
ENTO - Entomology (ENTO)

ENTO 101 Introduction to Academic Success in Entomology
Credit 1. 1 Lecture Hour.
Orientation to academic success within higher education and specifically the Bachelor of Science degree in entomology; awareness of academic and campus support services available for student success; development of goals for academic and career planning, including creation and utilization of degree planner; awareness of personal self-management strategies, including learning styles, time management, goal setting, stress management and development of personal strategies for implementation of personal self-management into practice.

ENTO 102 Continuing Academic Success in Entomology
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
Continued exploration to academic success within higher education and specifically the Bachelor of Science degree in Entomology; increase awareness of academic and campus support services available for student success; development of goals for academic and career planning, including creation and utilization of degree planner; awareness of personal self-management strategies, including learning styles, time management, goal setting, stress management, and development of personal strategies for implementation of personal self-management into practice. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: ENTO 101.

ENTO 201 General Entomology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Survey of the major classes of arthropods with special emphasis on species of economic or biological importance; general insect anatomy, physiology, metamorphosis and classification; survey of the biologies of insect orders and major families using common injurious and beneficial species to relate material to production agriculture and the urban environment.

ENTO 208 Veterinary Entomology
Credits 2. 2 Lecture Hours.
Insects and their relatives causation of economic loss, impacts to well-being and transmission of disease pathogens to domestic and companion animals and wildlife as well as health and well-being of humans through occupational or recreational exposure; insect biology, economic importance and principles and methods of prevention and control.
Prerequisite: Co-enrollment in ENTO 209.

ENTO 209 Veterinary Entomology Laboratory
Credit 1. 2 Lab Hours.
Insects and their relatives causation of economic loss, impacts to well-being and transmission of disease pathogens to domestic and companion animals and wildlife, as well as health and well-being of humans through occupational or recreational exposure; laboratory emphasizes identification of major arthropod pests, use of microscopy and dissection equipment.
Prerequisite: Concurrent enrollment with ENTO 208.

ENTO 210 Global Public Health Entomology
Credits 3. 3 Lecture Hours.
Impacts of insects and insect-borne diseases on public health and well-being around the globe; insect biology, bloodfeeding, and transmission of human diseases; role of insect borne diseases on human history, socioeconomic development, and public health infrastructure.
Prerequisite: Freshman or sophomore classification or approval of instructor.

ENTO 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study in entomology.
Prerequisites: Freshman or sophomore classification; approval of instructor and department head.

ENTO 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of entomology. May be repeated for credit.
Prerequisite: Approval of instructor.

ENTO 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in entomology. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ENTO 300/WFSC 300 Field Studies
Credits 3. 3 Other Hours.
Integration of principles of animal and plant ecology with environmental factors to characterize wildlife populations; intensive analysis of specific areas will emphasize either the development of a wildlife management plan or a general vertebrate natural history survey.
Prerequisite: Prior approval of instructor and concurrent enrollment in WFSC 450/ENTO 450 and WFSC 451/ENTO 451.
Cross Listing: WFSC 300/ENTO 300.

ENTO 301 Biodiversity and Biology of Insects
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to orders and most important families of insects; order-level morphology and family-level natural history; collection of insects identified to family level provides introduction to collection methods and specimen preparation.
Prerequisites: ENTO 201, or ENTO 208 and ENTO 209; BIOL 111 and BIOL 112; junior or senior classification or approval of instructor.

ENTO 305 Evolution of Insect Structure
Credits 3. 2 Lecture Hours. 3 Lab Hours.
External morphology of insects; evolution of form and function.
Prerequisite: ENTO 201, or ENTO 208 and ENTO 209; BIOL 111.

ENTO 306 Insect Physiology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Physiology of insects; structure and function of internal organ systems and their role in insect success.
Prerequisite: ENTO 201, or ENTO 208 and ENTO 209; BIOL 111 and BIOL 112; CHEM 101, CHEM 111, CHEM 102 and CHEM 112, or CHEM 119 and CHEM 120.

ENTO 320 Honey Bee Biology
Credits 3. 3 Lecture Hours.
Introduction of honey bee biology and beekeeping practices to science and non-science majors; honey bees as the model insect to introduce general principles of biology and entomology.
Prerequisite: Junior or senior classification or approval of instructor.

ENTO 321 Beekeeping
Credit 1. 3 Lab Hours.
Basic Knowledge and techniques used in apiculture; tools and knowledge needed to keep bees responsibly and productively.
Prerequisites: ENTO 320 or concurrent enrollment, junior or senior classification or approval of instructor.
ENTO 322 Insects and Human Society
Credits 3. 3 Lecture Hours.
Emphasis on the role insects have played in the development of human cultures; aspects include health, food production and storage, art, music and architecture; overview of historic, present day, and future roles insects will have on environmental movements (green societies), and in underdeveloped, developing and developed societies.
Prerequisite: Junior or senior classification.

ENTO 401 Principles of Integrated Pest Management
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integrated pest management (IPM) concepts, principles, development and application; IPM constitutes a series of pest control tactics and strategies toward more sustainable agriculture, natural resources, and urban and rural health and well-being.
Prerequisite: ENTO 201 or ENTO 208; ENTO 209.

ENTO 402 Field-Crop Insects
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Application of management strategies for insect/mite pests of small grains, corn, cotton, rice, sorghum, stored products and sunflower; nature and symptoms of damage, life history and habits of common pests. Laboratory consists of pest and pest damage identification supported by field trips.
Prerequisites: ENTO 201, or ENTO 208 and ENTO 209.

ENTO 403 Urban Entomology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Biology, economic importance and control strategies for arthropod pests commonly invading households and commercial structures in urban environments; laboratory consists of urban pest identification and special presentations and demonstrations covering topics related to urban pest problems and their control. Offered in 2011-2012 academic year and alternating years thereafter.
Prerequisites: ENTO 201, or ENTO 208 and ENTO 209, or approval of instructor.

ENTO 423 Medical Entomology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Biology, disease relationships, and control of insects and other arthropods parasitic on or in humans; aspect of the fields of clinical and preventative medicine; survey, collection and taxonomy of medically-important arthropods in laboratory sessions.
Prerequisites: BIOL 111; junior or senior classification or approval of instructor.

ENTO 424 Insect Ecology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Provides basic ecological background with an applied interpretation, emphasizing influences of insect populations and communities on ecosystem processes that influence landscape structure, function and change.
Prerequisites: ENTO 201, or ENTO 208 and ENTO 209; BIOL 111; junior or senior classification or approval of instructor.

ENTO 425 Disease Ecology
Credits 3. 3 Lecture Hours.
Ecological interactions that influence the distribution and abundance of pathogens, vectors, and hosts ultimately determine the spread of disease; impacts of urbanization, climate change, and other human influenced environmental changes on disease dynamics; integration of disease ecology into pathogen and vector monitoring and comprehensive strategies to reduce disease occurrence.
Prerequisite: ENTO 208, ENTO 209 and ENTO 423; junior or senior classification, or approval of instructor.

ENTO 426/VIBS 426 Methods in Vector-Borne Disease Ecology
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Methodological understanding of how vector-borne diseases are studied in the field and laboratory; hands-on exploration of the ecology disease systems in a one health framework; concepts of design, execution and presentation of research projects; outdoor field work and bio-safety level 2 laboratory.
Prerequisites: Junior or senior classification and approval of instructor.
Cross Listing: VIBS 426/ENTO 426.

ENTO 428 Insect Biotechnology
Credits 3. 3 Lecture Hours.
Applications of genetic engineering and biotechnology; specific problems dealing with insects and control of insect pests.
Prerequisites: ENTO 429 or concurrent enrollment; GENE 301, GENE 315, GENE 320/BIMS 320, or FIVS 308; junior or senior classification or approval of instructor.

ENTO 429 Insect Biotechnology Laboratory
Credit 1. 3 Lab Hours.
Basic technical experience in insect molecular biology and biotechnology, including genomic DNA isolation, PCR, cloning, sequencing and gene manipulation techniques; focus on insect applications for improvement of human health and agriculture.
Prerequisites: ENTO 428 or concurrent enrollment; junior or senior classification or approval of instructor.

ENTO 431/FIVS 431 The Science of Forensic Entomology
Credits 3. 3 Lecture Hours.
Explores the science, methodology and technology employed to gather, preserve and present information about insects and other arthropods in such a manner that this information can be used in courts of law as evidence and testimony to help resolve issues of a criminal or civil nature.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FIVS 431/ENTO 431.

ENTO 432/FIVS 432 Applied Forensic Entomology
Credit 1. 3 Lab Hours.
Laboratory-based offering practical experience using scientific information, methodology, technology, and legal procedures inherent to the field of forensic entomology; emphasis on collecting, preserving, and identifying information as evidence and expert witness testimony in courts of law.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: FIVS 432/ENTO 432.

ENTO 435 Case Studies in Problem Solving
Credits 3. 3 Lecture Hours.
Development of reasoning strategies by examining a variety of case studies, science and scientific methods; solving real-world problems as part of an investigative team.
Prerequisite: ENTO 201, or ENTO 208 and ENTO 209; ENTO 482; senior classification or approval of instructor.

ENTO 450/WFSC 450 Caribbean Conservation
Credits 2. 6 Lab Hours.
Provide experience in and appreciation for diverse tropical habitats and the problems associated with conserving these habitats; design and conduct individual research projects on topics of their choice with approval from the instructors on project design and feasibility.
Prerequisites: Concurrent enrollment in ENTO 300/WFSC 300 and ENTO 451/WFSC 451; junior or senior classification.
Cross Listing: WFSC 450/ENTO 450.
ENTO 451/WFSC 451 Caribbean Research Seminar
Credit 1. 1 Other Hour.
Document research activities; keep a journal of activities and research methods during study abroad trips.
Prerequisites: Concurrent enrollment in ENTO 300/WFSC 300 and ENTO 450/WFSC 450; junior or senior classification.

ENTO 455 Field Entomology in the Tropics
Credits 3. 9 Other Hours.
Intensive hands-on, field-based experiences in Costa Rica at the Texas A&M Softis Center for Research and Education; study of insect diversity, behavior and natural history and insight into the challenges in conserving biodiversity; two-week course designed to provide authentic research experiences in a tropical rainforest; involvement in physically demanding fieldwork, extensive collecting and sampling, specimen sorting and preparation, as well as field observation of insect natural history and behavioral experiments; learn how to keep field notes, work in teams to solve research questions and communicate research through various media.
Prerequisites: Grade of C or better in BIOL 111 and BIOL 112; or approval of instructor; any course in entomology recommended.

ENTO 481 Seminar
Credit 1. 1 Lecture Hour.
Report of original investigations, current literature and special features of entomology.
Prerequisites: ENTO 201, or ENTO 208 and ENTO 209; junior or senior classification.

ENTO 482 Occupational and Professional Development
Credits 2. 2 Lecture Hours.
Organized instruction in written and oral communication; acquaint students with private and public-sector companies and agencies as well as leading professionals from these firms to reinforce academic instruction and prepare students for the transition to employment, graduate and professional schools.
Prerequisites: ENTO 201, or ENTO 208 and ENTO 209; or approval of instructor.

ENTO 484 Professional Internship
Credits 0 to 4. 0 to 4 Other Hours.
Independent study and supervised field experience related to a professional area of interest in entomology. May be taken two times for credit.
Prerequisites: ENTO 201, or ENTO 208 and ENTO 209; junior or senior classification or approval of instructor.

ENTO 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Individual problems.
Prerequisites: ENTO 201, or ENTO 208 and ENTO 209; junior or senior classification; approval of instructor and department head.

ENTO 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of entomology. May be repeated for credit.
Prerequisite: Approval of instructor.

ENTO 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Faculty supervised research in entomology. May be taken two times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification or approval of instructor.

EPFB - Edu Psych Field Based (EPFB)

EPFB 210 Family Involvement and Empowerment
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Field-based course that provides information and skills necessary to work with diverse families; addresses need for positive school-family collaboration and characteristics of families throughout the life cycle, the collaboration of educators with families through the special education process, and the provision of family services through community agencies.

EPFB 301 Teaching Skills I
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Study and development of skills focusing on collaboration, instruction, classroom management and professionalism in P-12 schools; field experience in general education settings. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Admission to professional phase of program.

EPFB 401 Teaching Skills II
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Study and development of skills focusing on individual P-12 students' needs with emphasis on delivering complete lessons from a written plan to include Texas Essential Knowledge and Skills (TEKS) and Individualized Educational Program (IEP) objectives, incorporating modifications appropriately, setting behavioral expectations, and using questioning strategies for high level thinking; field experience in two special education settings. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Admission to professional phase of program.

EPSY - Educational Psychology (EPSY)

EPSY 284 Internship
Credits 0 to 7. 0 to 7 Other Hours.
Directed internship in a community, public or private organization to provide on-the-job training and/or applied research experience appropriate to career objectives. May be repeated seven times for credit. Must be taken on a satisfactory/unsatisfactory basis.

EPSY 289 Special Topics In...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of educational psychology. May be repeated for credit.

EPSY 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in educational psychology. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.
EPSY 320 Child Development
Credits 3. 3 Lecture Hours.
Growth and development of the normal child from infancy to adolescence; implications of children's cognitive, language and psychosocial development for success in academic and social interactions.
Prerequisite: Junior or senior classification.

EPSY 321 Adolescent Development
Credits 3. 3 Lecture Hours.
Characteristics of adolescent growth and development emphasizing behavior within secondary school setting; influences of prior development; home, family and community; peer group, as these affect school adjustment and success.
Prerequisite: Junior or senior classification.

EPSY 430 Creativity Theories and Research
Credits 3. 3 Lecture Hours.
Theoretical base of creativity and the research methodologies used to study creativity.
Prerequisite: Junior or senior classification.

EPSY 431 Personal Creativity and Giftedness
Credits 3. 3 Lecture Hours.
Personal giftedness and creativity and its innerrelativity with development, relationships, and learning.
Prerequisite: Junior or senior classification.

EPSY 432 Creativity and Creative Problem Solving
Credits 3. 3 Lecture Hours.
Creativity research; historical background and application of the framework and tools of the Parnes/Osborn Creative Problem Solving Process.
Prerequisite: Junior or senior classification.

EPSY 433 Lateral Thinking
Credits 3. 3 Lecture Hours.
Edward deBono's theories and approach to creativity known as lateral thinking which is used throughout the world to increase creative thinking in individuals.
Prerequisite: Junior or senior classification.

EPSY 435 Educational Statistics
Credits 3. 3 Lecture Hours.
Statistical concepts and techniques and their application in behavioral sciences.
Prerequisite: Junior or senior classification.

EPSY 459 Practicum in Educating the Gifted and Talented
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Theory and strategies for instruction and guidance of the gifted and talented through a supervised experience in a laboratory setting with gifted and talented children and/or adolescents. May be taken two times for credit.
Prerequisites: Approval of department head and instructor; junior or senior classification.

EPSY 484 Field Experiences
Credits 0 to 6. 0 to 6 Other Hours.
University-supervised experience in a professional employment setting related to specializations in guidance and special education. May be repeated to 6 hours total.
Prerequisites: Approval of student's advisor and department head.

EPSY 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Research problems and readings in areas selected to supplement existing offerings; individual reports, oral and written, required.
Prerequisites: Junior or senior classification; approval of instructor.

EPSY 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of educational psychology. May be repeated for credit.
Prerequisite: Approval of instructor.

EPSY 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in educational psychology. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

**ESET - Electronic Sys Eng Tech (ESET)**

ESET 210 Circuit Analysis
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Electric and magnetic principles of components used in DC and AC circuits; transient analysis; phasor analysis; Ohm's and Kirchhoff's laws, Thevenin's and Norton's theorems, mesh and nodal equations; measurement of current, voltage and waveforms with meters and oscilloscopes.
Prerequisite: Grade of C or better in MATH 151.

ESET 211 Power Systems and Circuit Applications
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of energy systems; power generation/distribution; motors/generators; AC power analysis; power factor correction; application of Thevenin's and Norton's Theorems, Superposition Theorem, and Mesh and Nodal analysis; resonant circuits; passive filters; nonsinusoidal circuits; pulse waveforms; measurements of AC circuits; circuit analysis using Multisim.
Prerequisites: Grade of C or better in ESET 210 and MATH 152; electronic systems engineering technology major.

ESET 219 Digital Electronics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Survey of digital applications, number systems, digital logic devices and circuits, sequential logic.

ESET 269 Embedded Systems Development in C
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to programming using the C programming language and embedded microcontroller systems; fundamental language syntax and symbantics, concentration of the application to embedded systems.
Prerequisites: Grade of C or better in ESET 219 or concurrent enrollment; electronic systems engineering technology or multidisciplinary engineering technology majors.

ESET 300 Industrial Electricity
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Industrial applications of electrical theory, codes, circuitry, wiring devices, motors and controllers, switch gear and solid state controls.
Prerequisite: PHYS 207; grade of C or better in ENGR 217/PHYS 217 or PHYS 217/ENGR 217; junior or senior classification in industrial distribution or engineering technology.
ESET 315 Local-and-Metropolitan-Area Networks  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Design, operation, application and management of LANs and MANs; topologies, cabling systems, protocols, bridges, routers, hubs, switches, security, media and transport systems; Internet and TCP/IP topics including the protocol stack, router operation and addressing issues.  
Prerequisites: Grade of C or better in ESET 219; electronic systems engineering technology major.

ESET 319 Engineering Leadership  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Exploration of Emotional Intelligence (EI), identification of personal EI competencies and areas for improvement, and development of these competencies and skills; determination of techniques to anticipate and manage our emotions, and to anticipate and work with the emotions of others.  
Prerequisite: Grade of C or better in ENGL 103 or ENGL 104; electronic systems engineering technology major.

ESET 329 Six Sigma and Applied Statistics  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Concepts of probability and statistics, mean, variance, Gaussian/uniform/Student/Weibull distributions, and their applications in electronics design, analysis, and troubleshooting; Six Sigma process and tools including Gauge R&R, test of hypotheses, analysis of variance, linear regression, response surface method, control chart, and design of experiments.  
Prerequisites: Grade of C or better in ESET 210 and MATH 152; electronic systems engineering technology major.

ESET 333 Product Development  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Process of product development to create an idea; development of a business plan; market research; voice of customer; managing resources; project management; identifying product partners; creating a unique product and/or company.  
Prerequisite: Grade of C or better in ENGR 112, ENGR 217/PHYS 217, or PHYS 217/ENGR 217, or concurrent enrollment; electronic systems engineering technology major or embedded systems integration minor.

ESET 349 Microcontroller Architecture  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Microcontrollers including type of circuits and how they function; architecture of microcontrollers; instruction sets and how they are programmed.  
Prerequisites: Grade of C or better in ESET 219 and ESET 269; electronic systems engineering technology major.

ESET 350 Analog Electronics  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Study of semiconductor devices including diodes, field effect transistors, bipolar junction transistors, and operational amplifiers; applications include signal conditioning, power supplies, active filters, discrete transistor amplifiers, and transistor switching/driver circuits.  
Prerequisites: Grade of C or better in ESET 210; grade of C or better in CHEM 107 and CHEM 117, or CHEM 120; grade of C or better in ENGL 103 or ENGL 104, PHYS 218 or ENGR 216/PHYS 216 or PHYS 216/ENGR 216, and MATH 152, and PHYS 206 or PHYS 218; junior or senior classification in electronic systems engineering technology.

ESET 352 Electronics Testing I  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Testing of electronic devices and systems; including test planning, test reporting, test specifications, parametric testing, measurement accuracy, test hardware, sampling theory, digital signal processing based testing, and calibrations; both circuit analysis (2/3) and circuit design (1/3) with several analog and mixed-signal systems.  
Prerequisites: Grade of C or better in ESET 300; junior or senior classification in electronic systems engineering technology.

ESET 355 Electromagnetics and High Frequency Systems  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
High frequency concepts including topics in basic electromagnetics, transmission lines, antennas, and RF circuit design; applications including wireless communication systems, fiber optic systems, and high frequency PCB layout.  
Prerequisites: Grade of C or better in ESET 211, PHYS 207, and ENGR 217/PHYS 217 or PHYS 217/ENGR 217; junior or senior classification in electronic systems engineering technology.

ESET 359 Electronic Instrumentation  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Fundamentals of electronic measurement systems, signals, sampling theorem, analog to digital and digital to analog conversions; signal conditioning; bio-potentials and biomedical transducer characteristics; digital signal processing; computer-based data acquisition using graphical development environment; and digital communication protocols.  
Prerequisites: Grade of C or better in ESET 349 and ESET 350; grade of C or better in ENGL 103 or ENGL 104; junior or senior classification in electronic systems engineering technology.

ESET 366 Communications Electronics  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Fundamental communications concepts, frequency domain, analog and digital modulation, transmitter and receiver architectures, communication circuits including filters/oscillators/PLLs/amplifiers/mixers, fiber optics.  
Prerequisites: Grade of C or better in ESET 350 or concurrent enrollment; junior or senior classification; or approval of instructor.

ESET 369 Embedded Systems Software  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
A study of the technical aspects of embedded computer software systems, with emphasis on embedded real-time systems, programming techniques and development methodologies.  
Prerequisites: Grade of C or better in ESET 349; junior or senior classification in electronic systems engineering technology.

ESET 400 Industrial Automation  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Industrial applications of electronic devices; instrumentation; AC and DC drives; local area networks; cell and area controllers and advanced applications of programmable controllers.  
Prerequisites: Grade of C or better in ESET 300; junior or senior classification in industrial distribution.

ESET 415 Advanced Network Systems and Security  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Advanced topics of the network systems and security including network design and protocol (BGP, IP Routing, IPv6, NAT, DNS); network security (ACLs, TCP/IP security, and VPN); socket programming and cryptographic protocols.  
Prerequisites: Grade of C or better in ESET 315; junior or senior classification in electronic systems engineering technology or approval of instructor.
ESET 419 Engineering Technology Capstone I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Project management tools for a formal technical proposal; addresses scope, schedule, risk, cost, milestones and deliverables; planning and initial design of prototype implemented in ESET 420; teams must have sponsor and technical advisor.
Prerequisites: Grade of C or better in ESET 319 or MXET 300, ESET 333 or MMET 361, and ESET 369; must be taken the fall or spring semester immediately prior to ESET 420; senior classification.

ESET 420 Engineering Technology Capstone II
Credits 2. 6 Lab Hours.
Second semester course in capstone design sequence; focus on design implementation, testing, documentation, demonstration, and presentation of a fully functional prototype; professional design tools for schematic capture, printed circuit board layout and software development, integration and validation.
Prerequisites: Grade of C or better in ESET 419; grade of C or better in ESET 352, ESET 415, ESET 455 and ESET 462, or concurrent enrollment; senior classification in electronic systems engineering technology.

ESET 435 Data Communications
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Data communications concepts and techniques involving error detection and correction, data link control, switching, client-server computing, data compression, data security, internet protocol (IP), transmission control protocol (TCP), includes development of a data link control layer and a client server system utilizing socket by using C Programming Language in Visual C++ environment.
Prerequisites: ESET 315 and ESET 369 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 444 Building Energy Management Systems
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Essential elements of energy management from understanding energy production to consumption; identification of the major components of energy management of buildings, energy audit to business (strategy), Heating Ventilating Air Conditioning (HVAC), control systems, economics (ROI) and engineering system integration.
Prerequisites: Senior classification.

ESET 452 Electronics Testing II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Advanced testing techniques of electronic devices and systems; study of advanced electronics test methodologies; emphasis on circuits containing analog to digital converters (ADCs) and digital to analog converters (DACs); device interface board design and data analysis; both circuit analysis (2/3) and circuit design (1/3) using industry grade state-of-the-art equipment.
Prerequisites: Grade of C or better in ESET 349 and ESET 352; junior or senior classification in electronic systems engineering technology.

ESET 453 Validation and Verification
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Validation of semiconductor devices; differences between validation and production testing; extensive use of Altium for simulation and layout of circuits; use of Spotfire to analyze data acquired as part of validation process; focus on acquisition of valid data and clear and concise presentation of data to stakeholders.
Prerequisites: Grade of C or better in ESET 352; junior or senior classification in electronic systems engineering technology.

ESET 455 Wireless Transmission Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
System engineering aspects of microwave, satellite and cellular communication systems; power budget calculations, propagation analysis, systems descriptions; CNR, CIR; review of modulations practical engineering considerations.
Prerequisites: Grade of C or better in ESET 315 and ESET 355; junior or senior classification in electronic systems engineering technology.

ESET 456 Embedded Sensors and Internet of Things (IoT) Systems
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integration of off-the-shelf sensors and embedded intelligence components to form data acquisition, monitoring and control of remote equipment and systems through wired and wireless networks; algorithm development and implementation in interrupt-driven and RTOS-based firmware environments; collection, reduction, analysis and information extraction of data from multiple edge devices using industry-standard cloud-based software environments.
Prerequisites: Grade of C or better in ESET 355, ESET 359, and ESET 369; junior or senior classification in electronic systems engineering technology.

ESET 462 Control Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Components, principles and techniques fundamental to automated control systems; study of transfer functions, network analysis using Laplace transforms, Z transforms, feedback control systems theory, digital computer simulation and computer-based controls systems.
Prerequisites: Grade of C or better in ESET 359 and ESET 369; junior or senior classification in electronic systems engineering technology.

ESET 469 Embedded Real Time Software Development
Credits 3. 3 Lecture Hours.
Survey of the operation and use of Real Time Kernels as the basis for embedded system firmware development; includes task operation, inter-task communications, synchronization, dynamic memory, multitask system design and defensive programming techniques; embedded RTOS applications.
Prerequisites: Grade of C or better in ESET 369; junior or senior classification in electronic systems engineering technology.

ESSM 102 Introduction to Natural Resources and Ecosystem Management
Credit 1. 1 Lecture Hour.
Introduction to natural resources including range and forest and ecosystem system approach to wildland management; survey of the field of natural resources and related industries.

ESSM 201 Exploring Ecosystem Science and Management
Credit 1. 1 Lecture Hour.
Exploration of knowledge, skills and abilities required for varied careers within ecosystem science and management; development of a professional portfolio and résumé; exploration of career options through team approach; conduct one service project.

ESSM 203 Forest Trees of North America
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Taxonomy, phylogeny, and identification of the important forest trees of North America and their ecological and social uses and benefits.
Prerequisites: BIOL 101, BIOL 107, BIOL 111 or BIOL 113 and BIOL 123 or equivalent.
ESSM 281 Seminar in Ecosystem Science and Management
Credit 1. 1 Other Hour.
Writing intensive, focused on writing and formatting technical documents relevant to ecosystem sciences and management; includes memos, short synthesis papers and one longer review paper.
Prerequisites: RENR, FORS, RLEM, ECOR and SPSA majors only.

ESSM 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in ecosystem science and management. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ESSM 300 Field Studies in Forest Ecosystems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Field-oriented focus on forest ecosystem science and management; problem-solve management questions through data collection and team-based research; investigate the relationships between landowner objectives, mensuration, silviculture, ecology, soils, and regeneration-focused harvesting systems; foster the development of student-faculty relationships; enhance professional knowledge and skills.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 301 Wildland Watershed Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elements of watershed management including range, forest and other natural resources and principles and practices of wildland management for protection, maintenance and improvement of water resource values.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 302 Wildland Plants of North America
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Familiarization with the distribution and economic value of important wildland plants including range, forest and other natural resources in Texas and North America and fundamentals of sight identification of these plants; plant collection required.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 303 Agrostology
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Classification and identification of grasses based on macro- and micromorphological variations of spikelets; interpretation of spikelet variation and use of diagnostic keys to identify important species of North America including range, forest and other natural resources; a grass collection required.
Prerequisites: Junior or senior classification or approval of instructor.

ESSM 304 Rangeland Plant Taxonomy
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Interpretation of plant morphology for keying and identification of important flowering rangeland plants; vegetative and floral characters for important plant families including toxic compounds affecting domestic livestock. Plant collection required.
Prerequisites: Junior or senior classification or approval of instructor.

ESSM 305 Watershed Analysis and Planning
Credits 3. 3 Lecture Hours.
Provide an integrated framework for watershed planning that addresses the related biophysical, social and economic issues; comprehensive in scope and approach giving students the tools and techniques for developing sound watershed management policy and practice; water issues, problems and regulations for Texas.
Prerequisite: Junior or senior classification.

ESSM 306 Plant Functional Ecology and Adaptation
Credits 3. 3 Lecture Hours.
Investigation of physiological mechanisms influencing ecological patterns and processes, including plant acclimation and adaptation in contrasting habitats; abiotic controls on species productivity and distribution; underlying genetic and evolutionary mechanisms contributing to the occurrence of specific genotypes and phenotypes in unique environments.
Prerequisites: RENR 205, any BIOL course, junior or senior classification or approval of instructor.

ESSM 307 Forest Protection
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Destructive agents in forestry as related to importance, identification, cause, extent of losses and protective measures.
Prerequisites: RENR 205, or equivalent, junior or senior classification or approval of instructor.

ESSM 308 Fundamentals of Environmental Decision-Making
Credits 3. 3 Lecture Hours.
Introduction to environmental issues in natural resources management; fundamental principles and methods for understanding biosocial interdependencies in complex environmental issues; use of computer-aided group decision-making techniques to develop cooperative strategies for resolving local or global environmental issues.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 309 Forest Ecology
Credits 3. 3 Lecture Hours.
Life history and general characteristics of trees; structure and function of forest ecosystems; fundamental principles of forest tree physiology and ecology applied to an analysis of tree growth in relation to environmental factors and present day forest management; global changes and forests.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 310 Forest Tree Improvement and Regeneration
Credits 3. 3 Lecture Hours.
Genetic improvement or manipulation of forest trees through breeding or transformation; regeneration of forests including reproduction, nursey production, stand establishment, natural regeneration and problems affecting regeneration.
Prerequisites: BIOL 101, BIOL 113 or equivalent; junior or senior classification.

ESSM 311 Biogeochemistry and Global Change
Credits 3. 3 Lecture Hours.
Framework for understanding biogeochemical cycles, their significance at both global and ecosystem levels of organization, and their contemporary relevance to ecosystem science and management.
Prerequisites: RENR 205, RENR 215, any BIOL and/or CHEM course, junior or senior classification or approval of instructor.

ESSM 313 Vegetation Sampling Methods and Designs in Ecosystems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Basis for vegetation sampling in ecosystems including range, forest and other natural resources; methods for conducting sampling; selection of sampling unit appropriate for vegetation type; sampling statistics; mean comparisons; regression analysis; sampling design principles; development of sampling plan; presentation and interpretation of sampling data.
Prerequisites: Any MATH course satisfying university core curriculum, junior or senior classification or approval of instructor.
ESSM 314 Principles of Rangeland Management Around the World
Credits 3. 3 Lecture Hours.
Basic knowledge of world rangeland ecosystems, how these systems are managed in diverse cultural settings; principles of underlying ecological processes influenced by various land management practices; foster understanding of the values that people in different countries place on rangeland resources; use of these values to enhance geologically sustainable and socially acceptable rangeland management practices.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 315 Rangeland Inventory and Monitoring
Credit 1. 2 Lab Hours.
Theory and methods to inventory rangeland vegetation; sampling design; analysis of inventory data; interpretation of sampling data; preparation of a technical report; presentation of inventory data in text, tables, and graphs using the style of the Rangeland Ecology and Management discipline.
Prerequisites: ESSM 313, junior or senior classification or approval of instructor.

ESSM 316 Range Ecology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Organization and distribution of rangeland ecosystems of the world, with emphasis on North America; community dynamics and functions stressed including biotic history, succession, disturbance regimes, competitive interactions, herbivory, energy flow and nutrient cycling; conservation of rangeland resources.
Prerequisites: RENR 205, RENR 215, ESSM 302, and ESSM 314, junior or senior classification or approval of instructor.

ESSM 317 Vegetation Management
Credits 3. 3 Lecture Hours.
Familiarization with practices that cause changes in rangeland vegetation composition for multiple uses; understanding of criteria for range improvement practices; comparison of expected responses of livestock forage production, watershed parameters and wildlife to vegetation changes following range improvements; systems concept for planning, analysis and implementation of range improvement practices.
Prerequisites: ESSM 314, junior or senior classification or approval of instructor.

ESSM 318 Coupled Social and Ecological Systems
Credits 3. 3 Lecture Hours.
Resilience-based stewardship of social-ecological systems including range, forest and other natural resources; ecological concepts of resilience, sustainability, ecosystem services and vulnerability; investigation of linkages among social and ecological system components; contribution to sustainability and provision of ecosystem services; evaluation of multiple knowledge sources as the basis for adaptive ecosystem management.
Prerequisites: RENR 205, AGEC 105 or equivalent, junior or senior classification or approval of instructor.

ESSM 319 Principles of Forestry
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Theory and practice of forestry in controlling forest establishment, composition, structure and growth; principles of natural and artificial regeneration; intermediate cultural operations; silvicultural systems; use and control of fire in forests; principles of sustainable stand management.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 320 Ecosystem Restoration and Management
Credits 3. 3 Lecture Hours.
A basic conceptual framework for restoration ecology and ecological restoration including range, forest and other natural resources; major principles of ecology related to practical problems confronting humankind, such as, environmental pollution and degradation, exotic species invasions, land use and management trade-offs and consequences; importance of biological diversity.
Prerequisite: RENR 205, RENR 215 or equivalent, junior or senior classification or approval of instructor.

ESSM 324 Forest Measurements
Credits 2. 4 Lab Hours.
Measures and measurement of the dimensions and attributes of forested areas including the diameters, heights, volume and biomass of trees within a well-defined area; tools used for forest measurement; the conduct of forest inventories; summary measures and reports of inventory results; remote sensing and related technologies that assist forest measurements.
Prerequisites: ESSM 313 and ESSM 319 or concurrent enrollment; junior or senior classification.

ESSM 351/RENR 405 Geographic Information Systems for Resource Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geographic Information Systems (GIS) approach to solving spatial problems and managing natural resources, including the acquisition, management, manipulation, analysis, and mapping of spatial and non-spatial databases; identification of natural and relevant features from various data sources; integration of relevant technologies and data; extensive use of GIS software to solve real-world problems. Only one of the following will satisfy the requirements for a degree: ESSM 351/RENR 405, RENR 405/ESSM 351, ESSM 651, BAEN 651 and RENR 651.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RENR 405/ESSM 351.

ESSM 398 Interpretation of Aerial Photographs
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Identification and evaluation of natural and cultural features on aerial photographs; methods for extracting information concerning land use, vegetative cover, surface and structural features, urban/industrial patterns and archaeological sites.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 404 Changing Natural Resource Policy
Credits 3. 3 Lecture Hours.
Process through which environmental policies are changed; study theories of social and political change; teams use theories with their original research on environmental policy problems to create and implement plans for changing environmental policies in their own communities.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 405 Forest Resource Assessment and Management
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Integration of biophysical, economic and social factors in forest resource analysis, management planning and decision making; applications of interdisciplinary knowledge and multiple-use principles to practical forest management problems.
Prerequisite: Senior classification or approval of instructor.
ESSM 406 Natural Resources Policy  
Credits 3. 3 Lecture Hours.  
Natural resources and forest policy development in the United States and review of current issues in forest and related natural resource policy.  
Prerequisite: Junior or senior classification or approval of instructor.  

ESSM 415 Range Analysis and Management Planning  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Basic concepts and theories of range management systems. Resource inventory, analysis and management planning.  
Prerequisites: AGEC 105 or ECON 202, ESSM 314, ESSM 317; junior or senior classification or approval of instructor.  

ESSM 416 Fire Ecology and Natural Resource Management  
Credits 3. 3 Lecture Hours.  
Behavior and use of fire in the management of natural resources including range, forest and other natural resources; principles underlying the role of weather, fuel characteristics and physical features of the environment related to the development and implementation of fire management plans.  
Prerequisite: RENR 205 or equivalent, junior or senior classification or approval of instructor.  

ESSM 417 Prescribed Fire  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Use of prescribed fire to achieve ecosystem management objectives; understanding of how to plan and implement prescribed fires; coursework on fire behavior, fuel properties and the social aspects of prescribed fire and wildfire; how to safely use fire to achieve multiple outcomes including biodiversity conservation, reduced hazardous fire risk, livestock production and timber management.  
Prerequisites: ESSM 416.  

ESSM 420 Ecological Restoration of Wetland and Riparian Systems  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
How wetland and riparian areas link terrestrial and aquatic systems and function hydrologically and ecologically within watersheds; integrated approaches for restoration of degraded wetland and riparian systems; improving water resources through vegetation management with a special interest in rangelands.  
Prerequisites: RENR 205, junior or senior classification or approval of instructor.  

ESSM 430 Advanced Restoration Ecology  
Credits 3. 3 Lecture Hours.  
A dynamic discipline relying heavily on the fundamentals of ecology; practice translating and communicating key ecological concepts to advanced case studies in ecological restoration; enhance skills for professional applications.  
Prerequisites: RENR 205, ESSM 320, ESSM 420; junior or senior classification.  

ESSM 440 Wetland Delineation  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Covers the application of the 1987 Wetland Delineation Manual in use by the Army Corps of Engineers (CORPS); field indicators of hydrophic vegetation; hydric soils, wetland hydrology, methods for making jurisdictional determinations in non-disturbed and disturbed areas, recognition of problem wetlands and technical guidelines for wetlands.  
Prerequisite: Junior or senior classification.  

ESSM 444 Remote Sensing of the Environment  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Principles and techniques necessary for applying remote sensing to diverse issues in studying and mapping land uses and land covers of the terrestrial environment; emphasizes a hands-on learning approach with theoretical foundations and applications in both aerial and satellite remote sensing, using optical and lidar datasets.  
Prerequisite: Junior or senior classification or approval of instructor.  

ESSM 446 Unmanned Aerial Systems (UAS) for Remote Sensing  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Fundamental components of small unmanned aerial systems (sUAS), sensors and platforms, UAS operational concepts, the principles of UAS data collection, legal framework within which UAS should be operated and applied, data processing software and the generation of orthomosaics and 3D point clouds, emphasizes the use of UAS in a broad spatial sciences, technology and applications context, including vegetated ecosystems.  
Prerequisites: ESSM 444 or approval of instructor; junior or senior classification.  

ESSM 459 Programming for Spatial Data Applications  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Programming for spatial data applications in general and for natural resources application in particular; basic programming concepts and constructs for the creation and manipulation of spatial data; automating of processes; programming behind spreadsheet and GIS applications.  
Prerequisites: ESSM 351/RENR 405 or equivalent, junior or senior classification or approval of instructor.  

ESSM 461 Spatial Databases for Data Storage, Manipulation and Analysis  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
Relational databases and advanced geodatabase capabilities; types of geodatabases; Structured Query Language including join-types and subqueries; ArcGIS Desktop Advanced.  
Prerequisites: ESSM 459; junior or senior classification or approval of instructor.  

ESSM 462/GEOG 462 Advanced GIS Analysis for Natural Resources Management  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Advanced topics in geographic information systems (GIS) to solve natural resource problems; manipulation of raster data types; three-dimensional modeling; emphasis on geoprocessing as it relates to applied projects particularly with habitat suitability models; field and lab use of global positioning systems (GPS); internet-based GIS modeling.  
Prerequisites: ESM 351/RENR 405 or AGSM 461 or equivalent or approval of instructor; junior or senior classification.  
Cross Listing: GEOG 462/ESSM 462.  

ESSM 464 Spatial Project Management  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Integration of key components of spatial project management to ensure a successful project implementation using life-cycle methodology and spatial project management; strategy and planning, requirements analysis, design, development, deployment, and operations and maintenance; term project working with real world data to develop and manage a spatial project for practical applications.  
Prerequisites: ESSM 351/RENR 405 and ESSM 444, junior or senior classification or approval of instructor.
ESSM 480 Plant Identification and Undergraduate Range Management Exam Team Competitions
Credits 0 to 3. 0 to 3 Other Hours.
Knowledge of plants morphology, identification and distribution for the profession of range management; knowledge of range management across the world; weekly tests to train on plant and range management knowledge. May be repeated for credit.
Prerequisites: Junior or senior classification or approval of instructor.

ESSM 481 Senior Seminar
Credit 1. 1 Lecture Hour.
Completion of professional e-portfolio, résumé and job application; exploration of job search, application, and interview; discipline competency exams; program evaluation.
Prerequisite: Senior classification in ESSM degree program.

ESSM 484 Internship
Credits 0 to 4. 0 to 4 Other Hours.
Supervised experience program conducted in the student’s area of specialization.
Prerequisite: Approval of student’s advisor.

ESSM 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual study and research upon a selected range problem.
Prerequisite: Approval of student’s advisor.

ESSM 489 Special Topics in... Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of rangeland ecology and management. May be repeated for credit.
Prerequisite: Approval of instructor.

ESSM 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in ecosystem science and management. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of instructor.

EURO - European Studies (EURO)

EURO 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in European studies selected for each student individually.
Prerequisites: Approval of instructor and department head.

EURO 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of European studies. May be repeated for credit.
Prerequisite: Approval of instructor.

EURO 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in European languages and cultures. May be taken three times for credit.
Prerequisites: Freshman or sophomore classification and approval of department head.

EURO 405/FILM 405 European Cinema
Credits 3. 3 Lecture Hours.
Exploration of key movements in European cinema from 1895 to the present, including both national cinematic traditions, such as Italian Neorealism or French New Wave, and international trends such as Formalism, Expressionism, or Auteurism.
Prerequisite: FILM 251/ENGL 251, FILM 299, or approval of instructor.
Cross Listing: FILM 405/EURO 405.

EURO 441/RUSS 441 The Russian Novel I: Tolstoy and Dostoevsky
Credits 3. 3 Lecture Hours.
Study of the major works of Tolstoy and Dostoevsky; discussion of the literary nature and purpose of novels, especially in the context of Russian culture; taught in English.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RUSS 441/EURO 441.

EURO 442/RUSS 442 The Russian Novel II: The Twentieth Century
Credits 3. 3 Lecture Hours.
Study of major Russian novels from ca. 1900 to the end of Stalinism; exploration of topics relevant to Russia’s experience in the 20th century; taught in English.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: RUSS 442/EURO 442.

EURO 443/RUSS 443 Contemporary Russian Prose
Credits 3. 3 Lecture Hours.
Study of Russian and Soviet 20th century prose literature, with emphasis on post-Stalinist and post-glasnost writers; taught in English.
Prerequisite: RUSS 201 or concurrent enrollment, or approval of instructor.
Cross Listing: RUSS 443/EURO 443.

EURO 444/RUSS 444 Russian Drama
Credits 3. 3 Lecture Hours.
Introduction to the masterpieces of Russian drama from the 19th century to the present; includes such authors as Pushkin, Chekhov, Gorky, Arbuzov, Rozov and Petrushevskaya; taught in English.
Prerequisite: RUSS 201 or concurrent enrollment, or approval of instructor.
Cross Listing: RUSS 444/EURO 444.

EURO 446/RUSS 446 Russian Artistic Culture I: Beginnings to 1900
Credits 3. 3 Lecture Hours.
Masterpieces of Russian art, including architecture, dance, theater, music, and literature, from its beginnings until ca. 1900; taught in English.
Prerequisite: RUSS 201 or concurrent enrollment, or approval of instructor.
Cross Listing: RUSS 446/EURO 446.

EURO 447/RUSS 447 Russian Artistic Culture II: 1890 to Present
Credits 3. 3 Lecture Hours.
Masterpieces of Russian art, including architecture, dance, theater, music, film, and literature, from ca. 1890 to the present; taught in English.
Prerequisite: RUSS 201 or concurrent enrollment, or approval of instructor.
Cross Listing: RUSS 447/EURO 447.

EURO 451/ITAL 451 Introduction to Italian Culture
Credits 3. 3 Lecture Hours.
Introduction to the culture of the Italian Peninsula, from Middle Ages to present; study of major works of literature, political science, visual arts, music and cinema, to set Italy’s culture in its social and historical context; taught in English.
Prerequisite: ITAL 201 or registration therein, or approval of instructor.
EURO 453/ITAL 453 Italian Literature
Credits 3. 3 Lecture Hours.
Survey of Italian literature; focus on literary portrayal of reality in modern and contemporary Italian culture, the dialogue with the classical tradition, and literature’s potential to affect and be affected by social critique; taught in English.
Prerequisite: ITAL 201 or concurrent enrollment, or approval of instructor.
Cross Listing: ITAL 453/EURO 453.

EURO 456/ITAL 456 Contemporary Italy
Credits 3. 3 Lecture Hours.
Examination of changes in Italian society and culture since World War II, with focus on their narration and interpretation by representative authors and filmmakers, and on multicultural literary production in present-day Italy; taught in English.
Prerequisite: ITAL 201 or concurrent enrollment or approval of instructor.
Cross Listing: ITAL 456/EURO 456.

EURO 484 Internship
Credits 1 to 3. 1 to 3 Other Hours.
Directed Internship in a private firm or public agency to provide experience and learning appropriate to the student’s degree program and career objectives. Must be taken on a satisfactory/unsatisfactory basis. May be taken two times for credit.
Prerequisite: Junior or senior classification.

EURO 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in European studies, selected for each student individually.
Prerequisite: Approval of instructor and department head.

EURO 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of European studies. May be repeated for credit.
Prerequisite: Approval of instructor.

EURO 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in European languages and cultures. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of department head.

EVEN - Environmental Engr (EVEN)

EVEN 201 Introduction to the Environmental Engineering Profession
Credit 1. 1 Lecture Hour.
Introduction to the study and practice of environmental engineering; professionalism and professional registration; engineering ethics; exercises in technical communication.
Prerequisites: Grade of C or better in ENGL 103 or ENGL 104; or approval of instructor.

EVEN 301/CVEN 301 Environmental Engineering
Credits 3. 3 Lecture Hours.
Water quality; material balances; chemical, physical and biological processes; water quality modeling; water and wastewater treatment; air quality; solid and hazardous waste management.
Prerequisites: Grade of C or better in CHEM 107; Grade of C or better in CVEN 302 and MATH 308, or concurrent enrollment.
Cross Listing: CVEN 301/EVEN 301.

EVEN 304/CVEN 304 Environmental Engineering Lab
Credit 1. 3 Lab Hours.
Environmental measurements on physical, chemical, biological and biotechnological parameters of water.
Prerequisites: CVEN 301/EVEN 301 or CVEN 301/CVEN 301, or concurrent enrollment; CVEN 311/EVEN 311 or concurrent enrollment; or approval of instructor.
Cross Listing: CVEN 304/EVEN 304.

EVEN 311/CVEN 311 Fluid Dynamics
Credits 3. 3 Lecture Hours.
Fluid properties; statics; kinematics; basic conservation principles of continuity, energy and momentum; similitude and hydraulic models; incompressible flow in pipes; fluid dynamic drag.
Prerequisites: Grade of C or better in MATH 251 and CVEN 221; grade of C or better in CVEN 302, or concurrent enrollment; CVEN-311 also taught at Galveston campus.
Cross Listing: CVEN 311/EVEN 311.

EVEN 339/CVEN 339 Water Resources Engineering
Credits 3. 3 Lecture Hours.
Quantitative hydrology, precipitation, hydrograph analysis, reservoir and stream routing; groundwater, Darcy equation, well equation, well design; probability concepts in design; water law; dams; reservoirs; spillways; open channel and pipe network hydraulics; pumps; urban stormwater drainage; flood damage mitigation.
Prerequisite: CVEN 311/EVEN 311.

EVEN 399 Mid-Curriculum Professional Development
Credits 0. 0 Lecture Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from environmental engineering body of knowledge; documentation of experience appropriate to eventual professional licensure; self-assessment of learning at mid-curriculum point.
Prerequisites: EVEN 301/CVEN 301 or CVEN 301/EVEN 301; EVEN 304/CVEN 304; EVEN 311/CVEN 311 or CVEN 301/EVEN 301; CVEN 302; CVEN 221; or approval of instructor.

EVEN 400 Design Problems in Environmental Engineering I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Capstone design project of an interdisciplinary or specialized nature involving both technical and non-technical aspects of an environmental engineering problem; managing a project through the evaluation, selection and preparation of an appropriate design solution for an open-ended problem; project to be completed in EVEN 401.
Prerequisites: EVEN 402/CVEN 402 or CVEN 402/EVEN 402; EVEN 413/CVEN 413 or CVEN 413/EVEN 413; senior classification; admitted to major degree sequence in environmental engineering; or approval of instructor.

EVEN 401 Design Problems in Environmental Engineering II
Credits 2. 0 Lecture Hours. 6 Lab Hours.
Continuation and completion of capstone environmental engineering project developed in EVEN 400; critical evaluation, revision, preparation and communication of final design solution.
Prerequisite: EVEN 400.
EVEN 402/CVEN 402 Engineered Environmental Systems
Credits 3. 3 Lecture Hours.
Unit operations and processes in environmental engineering; physical, chemical and biological treatment of water and wastewater; treatment system analysis and design.
Prerequisites: Grade of C or better in CVEN 301/EVEN 301 or EVEN 301/CVEN 301.
Cross Listing: CVEN 402/EVEN 402.

EVEN 404 Environmental Unit Operations Laboratory
Credit 1. 3 Lab Hours.
Applications of laboratory methods to measure fundamental aspects of behavior of environmental engineering processes; examination of critical chemical, physical and biological processes that control behavior of materials in multiple media (air, water, land) in natural and engineered systems; evaluation of effects of important process variables.
Prerequisites: CVEN 301/EVEN 301 or EVEN 301/CVEN 301; EVEN 304/CVEN 304; CHEM 222 or concurrent enrollment; CVEN 402/EVEN 402 or EVEN 402/CVEN 402 or concurrent enrollment; admitted to major degree sequence in environmental engineering; or approval of instructor.

EVEN 406 Environmental Protection and Public Health
Credits 3. 3 Lecture Hours.
Communicable and noncommunicable diseases; environmental risk assessment; environmental assessments; comprehensive environmental planning; small water and wastewater systems; solid waste management; hazardous spills and waste management; vector control; environmental administration.
Prerequisites: Grade of C or better in CVEN 301/EVEN 301 or EVEN 301/CVEN 301; or approval of instructor.
Cross Listing: CVEN 402/EVEN 402.

EVEN 413/CVEN 413 Natural Environmental Systems
Credits 3. 3 Lecture Hours.
Water quality assessment of natural environmental systems; development and calibration of models to describe fate and transport of contaminants in aquatic systems; application of models to design of water quality control facilities.
Prerequisite: Grade of C or better in EVEN 301/CVEN 301 or CVEN 301/EVEN 301.
Cross Listing: CVEN 413/EVEN 413.

EVEN 458/CVEN 458 Hydraulic Engineering of Water Distribution Systems
Credits 3. 3 Lecture Hours.
Pressure conduit hydraulics; design, modeling, and analysis of water conveyance and distribution systems including pipelines, pipe networks, and pumps.
Prerequisite: Grade of C or better in CVEN 339/EVEN 339 or EVEN 339/CVEN 339 or approval of instructor.
Cross Listing: CVEN 458/EVEN 458.

EVEN 462/CVEN 462 Engineering Hydrogeology
Credits 3. 3 Lecture Hours.
Groundwater in the hydrologic cycle; aquifer properties; well hydraulics, testing, and design; groundwater quality; and groundwater management and sustainability.
Prerequisites: Grade of C or better in CVEN 311/EVEN 311 or EVEN 311/CVEN 311; Grade of C or better in CVEN 301/EVEN 301, EVEN 301/CVEN 301, CVEN 339/EVEN 339, or EVEN 339/CVEN 339; junior or senior classification; or approval of instructor.
Cross Listing: CVEN 462/EVEN 462.

EVEN 463/CVEN 463 Engineering Hydrology
Credits 3. 3 Lecture Hours.
Occurrence, distribution and properties of natural waters of the earth; measurement and engineering analysis of hydrologic phenomena including precipitation, streamflow and groundwater, hydrologic design of water resources development and management projects.
Prerequisite: Grade of C or better in CVEN 339/EVEN 339 or EVEN 339/CVEN 339.
Cross Listing: CVEN 463/EVEN 463.

EVEN 466 Sustainability and Life Cycle Analysis
Credits 3. 3 Lecture Hours.
Definitions of sustainability and sustainable development from social, economic, political, and technical perspectives; life-cycle analysis and quantitative assessment of sustainability; industrial ecology; valuation of environmental goods and externalities; sustainable infrastructure design and management.
Prerequisites: Junior or senior classification or approval of instructor.

FILM - Film Studies (FILM)

FILM 215/INTS 215 Global Cinema
Credits 3. 3 Lecture Hours.
History and theory of global cinema; historical, socio-political, national and international contexts of film production and reception; transnational film.

FILM 251/ENGL 251 Introduction to Film Analysis
Credits 3. 3 Lecture Hours.
Fundamental aspects of film analysis and criticism; ENGL-251 also taught at Galveston and Qatar campuses.
Cross Listing: ENGL 251/FILM 251.

FILM 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Selected fields of film studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.
Prerequisite: FILM 251/ENGL 251 or FILM 299, and approval of instructor.

FILM 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special topics in an identified area of film studies.

FILM 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in film.
Prerequisites: FILM 251/ENGL 251 or FILM 299 and freshman or sophomore classification and approval of instructor.

FILM 299 History of Film
Credits 3. 3 Lecture Hours.
Historical development of major periods, movements and styles, including several different national cinemas.

FILM 324/ENGL 324 Science Fiction and Film
Credits 3. 3 Lecture Hours.
History and trajectory of science fiction film into the 21st century by filmmakers such as Kubrick, Jenkins, Cameron, Coogler and others.
Prerequisites: 3 credits of literature at 200-level or above.
Cross Listing: ENGL 324/FILM 324.
FILM 343/WGST 343 Sex, Gender and Cinema
Credits 3. 3 Lecture Hours.
Exploration of a significant topic at the intersection of women's/gender studies and film, such as cinema and sexuality studies, cinema and women, and cinema and masculinity; may include discussion of production, film content, and/or reception.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: WGST 343/FILM 343.

FILM 345/COMM 345 Media Industries
Credits 3. 3 Lecture Hours.
Survey of the business organization, economic structures and processes, and regulations of the media industry.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: COMM 345/FILM 345.

FILM 349 Documentary Cinema
Credits 3. 3 Lecture Hours.
History and theory of documentary cinema; examination of documentary film's ability to both reflect and shape the history of its time. May be taken two times for credit.
Prerequisite: Junior or senior classification, or approval of instructor.

FILM 351/ENGL 351 Advanced Film
Credits 3. 3 Lecture Hours.
A different film topic each term; sample topics include major directors, historical periods, fiction into film, film genres. May be repeated for credit.
Prerequisite: ENGL 251/FILM 251 or FILM 251/ENGL 251 or FILM 299 or approval of instructor; junior or senior classification.
Cross Listing: ENGL 351/FILM 351.

FILM 356/ENGL 356 Literature and Film
Credits 3. 3 Lecture Hours.
Novels and films based on them; writers and filmmakers such as Virginia Woolf, John Steinbeck, John Ford, Sally Potter, John Huston, Charlotte Bronte and Peter Bogdanovich.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: ENGL 356/FILM 356.

FILM 358/ENGL 358 Screenwriting
Credits 3. 3 Lecture Hours.
Analysis of screenplay structure coupled with writing assignments illustrating principles of form.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 358/FILM 358.

FILM 376/PHIL 376 Philosophy, Film and Evil
Credits 3. 3 Lecture Hours.
Application of philosophical methods and analyses to the medium of film; survey of various depictions and treatments of evil within the genre of science fiction; investigation of depictions and treatments of evil arising from consideration of human encounters with alien others.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: PHIL 376/FILM 376.

FILM 394 Studies in Film Genre
Credits 3. 3 Lecture Hours.
Study of a specific film genre, such as Western, Gangster, Mystery, Science Fiction; genre varies each time course is taught; movies are screened and analyzed along with assigned readings that explore characteristics of the genre and its cultural importance. May be repeated for credit.
Prerequisite: ENGL 251/FILM 251, FILM 251/ENGL 251, or FILM 299, or approval of instructor.

FILM 398/AFST 398 Africana Cinema
Credits 3. 3 Lecture Hours.
Overview of African cinema; historical survey of cinema from Africa and the African Diaspora; introducing films produced in several geographical regions and reflecting different filmmaking traditions. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: AFST 398/FILM 398.

FILM 401 National Cinema History
Credits 3. 3 Lecture Hours.
Cinema History of a given film-producing nation other than the United States, such as Japanese Film, Swedish Film, South African Film. May be taken three times for credit.
Prerequisites: ENGL 251/FILM 251, FILM 251/ENGL 251, or FILM 299, or approval of instructor.

FILM 402/PERF 402 Intermedia Performance
Credits 3. 3 Lecture Hours.
Study of theory, history, literature and techniques of intermedia composition and design for film, theatre, dance, interactive media, and other forms of performance; examination of the collaborative creative process; projects in interdisciplinary performance.
Prerequisites: Junior or senior classification.
Cross Listing: PERF 402/FILM 402.

FILM 405/EURO 405 European Cinema
Credits 3. 3 Lecture Hours.
Exploration of key movements in European cinema from 1895 to the present, including both national cinematic traditions, such as Italian Neorealism or French New Wave, and international trends such as Formalism, Expressionism, or Auteurism.
Prerequisite: FILM 251/ENGL 251, FILM 251/ENGL 251, or FILM 299, or approval of instructor.
Cross Listing: EURO 405/FILM 405.

FILM 406 Propaganda and Dissidence
Credits 3. 3 Lecture Hours.
Use of film as a medium to promote political ideology, government propaganda, political dissidence, and subversion, with focus on Europe.
Prerequisite: Junior or senior classification or approval of instructor.

FILM 415/CLAS 415 The Ancient World in Film
Credits 3. 3 Lecture Hours.
Study of modern films as they relate to ancient literary texts that inspired them or with which they share common themes; relationship between Greek epic, tragedy, and comedy and their cinematic adaptations; treatment of Rome as an idea or ideal in the work of both ancient Romans and modern filmmakers.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 415/FILM 415.

FILM 417 Film Authorship
Credits 3. 3 Lecture Hours.
Exploration of a major film author (director, screenwriter or writer/director) as a vehicle for emphasizing intensive analysis, scholarship, film criticism and the question of individual authorship with the collective enterprise of filmmaking.
Prerequisites: ENGL 251/FILM 251, FILM 251/ENGL 251, or FILM 299, or approval of instructor.

FILM 425/FREN 425 French Film
Credits 3. 3 Lecture Hours.
Overview of French cinema; historical survey of cinema from France and the French Diaspora; introducing films produced in several geographical regions and reflecting different filmmaking traditions. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FREN 425/FILM 425.
FILM 435/GERM 435 German Film
Credits 3. 3 Lecture Hours.
Consideration and analysis of major works and directors of German Film; interpretation of culture through film; relationship of film to history, literature, and other arts; taught in English. May be repeated for credit. 
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: GERM 435/FILM 435.

FILM 445/COMM 435 Rhetoric of Television and Film
Credits 3. 3 Lecture Hours.
Critical analysis of television and film; close readings of such mediated texts; special attention to writing television and film criticism. 
Prerequisite: Junior or senior classification. 
Cross Listing: COMM 435/FILM 445.

FILM 455/ITAL 455 Italian Cinema
Credits 3. 3 Lecture Hours.
Survey of Italian cinema from Neorealism to the present; taught in English. 
Prerequisites: Junior or senior classification, or approval of instructor. 
Cross Listing: ITAL 455/FILM 455.

FILM 465/CHIN 465 Chinese Film
Credits 3. 3 Lecture Hours.
Consideration and analysis of major works and directors of Chinese film; interpretation of culture through film; relationship of film to history, literature and other arts; taught in English. May be taken two times for credit. 
Prerequisite: Junior of senior classification, or approval of instructor. 

FILM 481 Seminar in Film Studies
Credits 3. 3 Lecture Hours.
Seminar on a figure, theme, style, movement or theory in film studies, with practice in the methods of research in film studies, culminating in a substantial research paper. Open to seniors enrolled in the interdisciplinary minor in film studies and to others with approval of the Coordinator of Film Studies. May be taken two times for credit. 
Prerequisite: FILM 251/ENGL 251 or FILM 299, or approval of instructor; junior or senior classification.

FILM 484 Internship in Film Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed internship in a public or private organization to provide students with applied experience in Film Studies; internship will be supervised by selected agency personnel and appropriate faculty; experiences and requirements will vary slightly according to placement and student interests. 
Prerequisite: FILM 251/ENGL 251 or FILM 299; approval of instructor.

FILM 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Selected fields of film studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit. 
Prerequisite: FILM 251/ENGL 251 or FILM 299, and approval of instructor.

FILM 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of film studies. 
Prerequisite: Junior or senior classification or approval of instructor.

FILM 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in film. 
Prerequisites: FILM 251/ENGL 251 or FILM 299; approval of instructor.

FINC - Finance (FINC)

FINC 201 Personal Finance
Credits 3. 3 Lecture Hours. 
(BUSI 1307) Personal Finance. Financial management problems of the individual consumer; budgeting, insurance, saving and investing, and home financing. May not be used as a finance elective. 

FINC 210 Opportunities in Finance I
Credit 1. 1 Lecture Hour.
Introduction to major career paths in finance and assessment of students’ aptitudes and interests with respect to these career paths. 
Prerequisite: Freshman or sophomore classification in Mays Business School.

FINC 211 Opportunities in Finance II
Credit 1. 1 Lecture Hour.
Exploration of specific career competencies in various financial workplaces via lectures, practitioner presentations, and field experiences. 
Prerequisites: FINC 210 and approval of instructor.

FINC 216 Introduction to Securities and Commodities Trading
Credit 1. 1 Lecture Hour.
Introduction to financial markets and the instruments that trade in them; describes how financial markets operate; compare and contrast a wide variety of common financial instruments, including debt, equity, derivatives and commodities; basic functions of real-world data sources (especially Bloomberg and the Wall Street Journal); and career paths in the field of finance. 
Prerequisite: Freshman or sophomore classification in business.

FINC 268 Careers in Energy Finance
Credit 1. 1 Lecture Hour.
Introduction to finance-related careers in the energy industry; business models of energy companies; investment business drivers; activities and characteristics of various industry-specific corporate departments, including Upstream, Downstream, oil and gas commodity trading, risk management, and treasury.

FINC 285 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Directed study of selected problems in the area of finance not covered in other courses. May be taken five times. 
Prerequisites: FINC 341 or concurrent enrollment and approval of department head.

FINC 341 Finance (FINC)
Credits 3. 3 Lecture Hours. 
Financial practices and financial management of modern business corporations; cash flow, planning, procurement of funds, management of long-term funds and working capital. Only one of the following will satisfy the requirements for a degree: FINC 341 and FINC 342. 
Prerequisite: ACCT 230 or concurrent enrollment; ISTM 210 (or AGEC 217 or MARA 250) or concurrent enrollment; MGMT 211 or concurrent enrollment; and admission to upper division in Mays Business School or admission to Maritime Administration; also taught at Galveston campus.
FINC 342 Introductory Finance for the Petroleum Ventures Program
Credits 3. 3 Lecture Hours.
Basic principles of corporate finance, investments, financial institutions, and international finance; the Federal Reserve System; interest rates; time value of money; characteristics and valuation of stocks and bonds; securities markets; business organization; capital budgeting analysis. Only one of the following will satisfy the requirements for a degree: FINC 341 and FINC 342.
Prerequisites: Admission to Petroleum Ventures Program and approval of instructor.

FINC 345 Success Factors in Corporate Finance
Credit 1. 1 Lecture Hour.
Overview of tools and analytical techniques used in corporate finance functions, including analysis and presentation of financial information; one-week immersive experience.
Prerequisites: Grade of C or better in FINC 341; admission to corporate finance certificate program or approval of instructor.

FINC 346 Corporate Finance Capstone
Credits 3. 3 Lecture Hours.
Application of interdisciplinary techniques to identify and solve multifaceted corporate finance problems through use of case studies.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment; admission to corporate finance certificate program or approval of instructor.

FINC 350 Ethics in Financial Decision-Making
Credit 1. 1 Lecture Hour.
Recognition and avoidance of breaches of fiduciary duty in the financial workplace; integration of classical ethical codes of conduct into professional decision-making; analysis and application of practitioner standards of conduct.
Prerequisites: Admission to upper division in Mays Business School; FINC majors only.

FINC 351 Investment Analysis
Credits 3. 3 Lecture Hours.
Operation and functions of the organized security exchanges, fundamental security analysis and technical market analysis.
Prerequisites: ACCT 327 or concurrent enrollment; FINC 210 or concurrent enrollment; FINC 341 with a grade of C or better; SCMT 303 or concurrent enrollment, or AP STAT 301 or AP STAT 302 or AP STAT 303.

FINC 351 Managerial Finance I
Credits 3. 3 Lecture Hours.
Managerial problems of financial managers; financial analysis, current asset management, capital budgeting and capital structure.
Prerequisites: ACCT 327 or concurrent enrollment; FINC 210 or concurrent enrollment; FINC 341 with a grade of C or better; SCMT 303 or concurrent enrollment, or AP STAT 301 or AP STAT 302 or AP STAT 303.

FINC 368 Trade Floor Dynamics
Credits 3. 3 Lecture Hours.
Analysis of trade floor activities and behaviors; organizational and process structure of trade floors; characteristics of trade floors that vary by type of asset traded, trading objectives and contract structure; analysis of operational issues including credit constraints, trade strategies, and regulatory compliance.
Prerequisites: FINC 341 or concurrent enrollment; admission to Trading, Risk and Investment Program (TRIP).

FINC 371 Real Estate Decision-Making
Credits 3. 3 Lecture Hours.
Legal, physical and economic characteristics of real estate; overview of real estate market analysis, real estate valuation procedures and real estate production, marketing and financing methods.
Prerequisite: FINC 341 or concurrent enrollment in FINC 341.

FINC 381 Money and Capital Markets
Credits 3. 3 Lecture Hours.
Role of finance and financial institutions in the money and capital markets in the U.S. including supply of and demand for funds, interest rates and flow of funds analysis.
Prerequisite: FINC 341 with a grade of C or better.

FINC 409 Survey of Finance Principles
Credits 3. 3 Lecture Hours.
Financial survey for non-business majors; financial markets, the investment banking process, interest rates, financial intermediaries and the banking system, financial instruments, time value of money concepts, security valuation and selection, and international finance. May not be used to satisfy degree requirements for majors in business or agribusiness.
Prerequisites: Junior or senior classification; for students other than business and agribusiness.

FINC 422 Applied Investment Analysis
Credits 3. 3 Lecture Hours.
Theoretical and analytical developments in security selection and portfolio management; includes macroeconomic analysis, portfolio theory, and portfolio performance evaluation; concepts applied to the allocation of investments in a student-managed equity portfolio.
Prerequisites: Approval of instructor; FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 423 Options and Financial Futures
Credits 3. 3 Lecture Hours.
Valuation of options and financial futures; risk management and hedging applications using options and financial futures; primary focus on stock options, index options, stock index futures, interest rate futures, foreign exchange futures and futures options.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 424 Trading Risk Management
Credits 3. 3 Lecture Hours.
Mid-office risk management strategies using the energy markets as a focus; develops understanding of commodity market behavior, use of forwards and options for risk management, risk management reporting, Greeks and simulation-based VaR analysis.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 425 Active Portfolio Management
Credits 3. 3 Lecture Hours.
Analysis of investment tactics designed to earn abnormal returns; identification and evaluation of active strategies that exploit capital market anomalies and market inefficiencies; portfolio structuring, stock and sector selection, performance measurement, attribution analysis and benchmarks in inefficient markets.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.
FINC 426 Trading Markets
Credits 3. 3 Lecture Hours.
Issues related to securities trading and securities markets; why and how people trade; the operation, structure and regulation of securities markets; focus on equity markets; comparisons to the markets for derivatives and other securities.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 427 Titans of Investing
Credits 3. 3 Lecture Hours.
Readings from the most influential theorists and practitioners of 20th and 21st century investing; case studies and portfolio sector exercises in an institutional context, based on detailed assessment of global investment risks.
Prerequisites: FINC 341 or FINC 409, or concurrent enrollment in either course; approval of instructor.

FINC 428 Fixed Income Analysis
Credits 3. 3 Lecture Hours.
Characteristics of fixed income securities including Treasury issues, federal agency issues, corporate and municipal bonds, mortgage-backed and asset-backed securities; institutional features fixed income markets; risks of bond investing; fixed income valuation; term structure; trade strategies; modeling and assessing credit risks; hedging with fixed income derivatives.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 435 Managerial Finance II
Credits 3. 3 Lecture Hours.
Case studies in the administration of the financial affairs of business enterprises; working capital management, capital budgeting, capital structure, and mergers and acquisitions.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 436 Corporate Finance Capstone
Credits 3. 3 Lecture Hours.
Application of interdisciplinary techniques to identify and solve multifaceted corporate finance problems through use of case studies.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment; admission to corporate finance certificate program or approval of instructor.

FINC 440 Macro Finance
Credits 3. 3 Lecture Hours.
Recent developments in the nature and causes of financial crises; the role of money; financial liquidity; financial leverage; financial stability regulation; unconventional monetary policy and macroprudential policy.
Prerequisites: FINC 351 and FINC 361; FINC 381 or concurrent enrollment.

FINC 441 Private Equity: Insights, Industry Dynamics and Deal Making
Credits 3. 3 Lecture Hours.
Roles of and interactions between the private equity industry's main participants; growth and development of the industry; business model of private equity firms; different performance metrics used by private equity professionals; focus on leveraged buyouts, venture capital funds, due diligence and term sheets.
Prerequisites: FINC 351 and FINC 361.

FINC 443 Valuation
Credits 3. 3 Lecture Hours.
Theory and application of various approaches to corporate valuation; measuring and managing the value of companies; principles of value creation; fundamental valuation methodology; application of value creation principles to managerial problems; special cases and complex valuation issues.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 445/IBUS 446 International Finance
Credits 3. 3 Lecture Hours.
International business transactions, balance of payments and exchange rate systems, exchange rate risk and hedging techniques, sources of funding, relation to international financial institutions and capital instruments; foreign direct investment; international asset and liability management.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.
Cross Listing: IBUS 446/FINC 445.

FINC 446 Technical Analysis of Financial Markets
Credits 3. 3 Lecture Hours.
Use of price, volume and other non-fundamental, market and behavioral data to analyze and predict security prices; emphasis on pattern recognition and correlation analysis over theory and casual analysis; application of technical analysis as an investment discipline for institutional portfolio management; principles, terminology, techniques and emerging theories of technical analysis.
Prerequisites: FINC 351 and FINC 361.

FINC 447/ACCT 447 Financial Statement Analysis
Credits 3. 3 Lecture Hours.
Development of an analytical approach to financial statements, integrating relevant finance and accounting concepts and principles; current topics in financial analysis.
Prerequisites: ACCT 315 or ACCT 327; FINC 341 with a grade of C or better.
Cross Listing: ACCT 447/FINC 447.

FINC 448 Advanced Investments
Credits 3. 3 Lecture Hours.
Application of finance theory to complex investment problems; implementation of asset pricing models, portfolio theory and arbitrage strategies; implication of principles of market efficiency and behavioral finance for selection of individual securities and portfolios.
Prerequisites: FINC 351 and FINC 361.

FINC 449 Financial Modeling
Credits 3. 3 Lecture Hours.
Computer-based modeling of contemporary problems in investments and corporate finance including asset pricing, portfolio optimization, valuation, capital budgeting, cost of capital, risk assessment, and option pricing; using models to evaluate financial decision variables and alternative investment strategies.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 462 Commercial Bank Management
Credits 3. 3 Lecture Hours.
Problems confronting commercial banks such as development and application of credit standards, decisions on loan applications, liquidity management and profit sensitivity to varying levels of interest rates.
Prerequisite: FINC 381 or concurrent enrollment.
FINC 463 Seminar in Commercial Banking  
Credits 3. 3 Lecture Hours.  
Cases and problems on contemporary management challenges and problem-solving techniques in commercial banks.  
**Prerequisite:** Junior or senior classification and approval of instructor.

FINC 464 Commercial Credit Analysis  
Credits 3. 3 Lecture Hours.  
Recognized techniques for assessing the ability and willingness of business firms to service debts as originally agreed; regulatory and ethical requirements for structuring and documenting commercial bank loans to protect interests of shareholders, depositors, and deposit insurers.  
**Prerequisite:** Admission to Mays Commercial Banking Certificate Program, or FINC 361 and approval of advisor.

FINC 465 Seminar in Investment Banking  
Credits 3. 3 Lecture Hours.  
Cases and problems on fundamentals of valuing publicly and privately held firms, underwriting public and private offerings of debt and equity securities, managing capital market risks, complying with SEC and NASD regulations and managing other financial services commonly offered by investment banks.  
**Prerequisite:** Junior or senior classification and approval of instructor.

FINC 466 Wall Street, Investment Banking and the Financial Markets  
Credits 3. 3 Lecture Hours.  
Experience, first-hand, the major financial markets of the United States; visits to major Wall Street firms, security and commodity exchanges, and other financial institutions.  
**Prerequisites:** FINC 351 and FINC 361 and approval of instructor.

FINC 468 Entrepreneurial Finance  
Credits 3. 3 Lecture Hours.  
Analysis of financing for start-up or high-growth businesses; funding sources for early operations, including angel capital, private venture capital, corporate venture capital, strategic alliances and crowdfunding; exit strategies, including initial public offerings (IPO) and mergers and acquisition (M&A).  
**Prerequisites:** FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 472 Real Estate Finance  
Credits 3. 3 Lecture Hours.  
Real estate financing instruments, institutions and techniques; trust deed financing, mortgage underwriting and risk analysis, primary and secondary mortgage markets and institutions.  
**Prerequisites:** FINC 351, FINC 361 and FINC 371; ACCT 328 or concurrent enrollment.

FINC 475 Real Estate Investment Analysis  
Credits 3. 3 Lecture Hours.  
Real estate market analysis, equity investor decision criteria, institutional investment constraints and investment valuation; case analysis of specific real estate investment decisions.  
**Prerequisites:** FINC 351, FINC 361 and FINC 371; ACCT 328 or concurrent enrollment.

FINC 484 Professional Internship  
Credits 1 to 6. 1 to 6 Other Hours.  
Professional internship with practicing professionals under the direction of a faculty member. Available for free elective only and must be taken on a satisfactory/unsatisfactory basis.  
**Prerequisites:** Finance major and approval of instructor and department head.

FINC 485 Directed Studies  
Credits 0 to 6. 0 to 6 Other Hours.  
Directed study on selected problems in the area of finance not covered in other courses.  
**Prerequisites:** Approval of department head; FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected area in finance. May include attention to aspects of real estate finance, corporate financial management, investments, or financial institutions and markets.  
**Prerequisites:** Admission to upper division in Mays Business School and approval of instructor.

### FIVS - Forensic & Inv Science (FIVS)

**FIVS 101 Introduction to Academic Success in Forensic and Investigative Sciences**  
Credit 1. 1 Lecture Hour.  
Orientation to academic success within higher education and specifically the Bachelor of Science degree in forensic and investigative sciences; awareness of academic and campus support services available for student success; development of goals for academic and career planning, including creation and utilization of degree planner; personal self-management strategies, including learning styles, time management and stress management and development of personal strategies for implementation of personal self-management into practice.

**FIVS 102 Continuing Academic Success in Forensic and Investigative Sciences**  
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.  
Continued exploration to academic success within higher education and specifically the Bachelor of Science degree in Forensic and Investigative Sciences; increase awareness of academic and campus support services available for student success; develop goals for academic and career planning, including creation and utilization of degree planner; awareness of personal self-management strategies, including learning styles, time management, goal setting, stress management, and development of personal strategies for implementation of personal self-management into practice. Must be taken on a satisfactory/unsatisfactory basis.  
**Prerequisite:** Grade of C or better in FIVS 101.

**FIVS 123 Forensic Investigations**  
Credits 3. 3 Lecture Hours.  
Overview of forensics from incident scene to court room verdict; principles, concepts, tools and methodologies used in the science and practice of forensics; examination of various forensic fields; evidence recognition, analysis, interpretation and presentation to diverse audiences.

**FIVS 205 Introduction to Forensic and Investigative Sciences**  
Credits 3. 3 Lecture Hours.  
Overview of principles, procedures, and concepts of forensic and investigative sciences; instruction in the definitions, scope, and use of tools, techniques and protocols in forensic applications used to resolve social, regulatory, and legal disputes.  
**Prerequisite:** Freshman or sophomore classification or approval of instructor.
FIVS 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study in forensic and investigative sciences. May be repeated for credit.
Prerequisites: Freshman or sophomore classification; approval of instructor and department head.

FIVS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of forensic and investigative sciences. May be repeated for credit.

FIVS 291 Research
Credits 0 to 4. 0 to 12 Lab Hours.
Research conducted under the direction of a faculty member in the department of entomology. May be repeated 3 times for credit.
Prerequisite: Freshman or sophomore classification.

FIVS 308 Forensic Implications of Inheritance
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Forensic genetics with an emphasis on human molecular genetics, population genetics, and genetic application in the forensic sciences.
Prerequisites: Grade of C or better in BIOL 112; upper division in forensic and investigative sciences; junior or senior classification.

FIVS 316 Biotechnology and Forensics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Illustration of the use of a variety of biotechnology methods for forensic applications; appreciation and understanding of the underlying molecular biology technologies that are used in a diverse array of settings including blood analysis, blood typing, DNA fingerprinting and genetic testing; potential future use of advanced sequencing technologies for forensic applications; consideration of social, ethical and legal implications of these procedures and applications.
Prerequisites: Grade of C or better in FIVS 308.

FIVS 401/SCSC 401 Forensic Soil Science
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Examination of soils biology, chemistry and physical attributes to solve crimes; soil and geologic characteristics associated with crime scene examination; physical, biological and chemical characteristics and use of trace evidence.
Prerequisite: Grade of C or better in FIVS 482.
Cross Listing: SCSC 401/FIVS 401.

FIVS 415 Practice and Principles of Science and Law
Credits 3. 3 Lecture Hours.
Introduction to series of practitioners of forensic science and the justice system; receive instruction on principles, procedures, and practices used in solving legal and societal issues; examine scientific method and scientific knowledge as applied through expert testimony; enhance critical thinking and reasoning skills in studying and debating different positions of current issues of science and law.
Prerequisites: Grade of C or better in FIVS 205 and FIVS 481; grade of C or better in FIVS 431/ENTO 431, FIVS 432/ENTO 432, and FIVS 435, or concurrent enrollment.

FIVS 421 Latent Print Processing
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Information, techniques, and methodologies for processing latent fingerprints and enhancing visible fingerprints at and from crime scenes, as well as from physical evidence.
Prerequisites: Grade of C or better in FIVS 205 and FIVS 422; upper division forensic and investigative sciences academic standing; approval of instructor.

FIVS 422 Crime Scene Investigation
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Principles, procedures, processes and hands-on experience for conducting investigations ranging from general crime scene to death investigations.
Prerequisites: Grade of C or better in FIVS 205 and FIVS 482, upper division forensic and investigative sciences academic standing.

FIVS 431/ENTO 431 The Science of Forensic Entomology
Credits 3. 3 Lecture Hours.
Explores the science, methodology and technology employed to gather, preserve and present information about insects and other arthropods in such a manner that this information can be used in courts of law as evidence and testimony to help resolve issues of a criminal or civil nature.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: ENTO 431/FIVS 431.

FIVS 432/ENTO 432 Applied Forensic Entomology
Credit 1. 3 Lab Hours.
Laboratory-based offering practical experience using scientific information, methodology, technology, and legal procedures inherent to the field of forensic entomology; emphasis on collecting, preserving, and identifying information as evidence and expert witness testimony in courts of law.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: ENTO 432/FIVS 432.

FIVS 435 Case Studies in Problem Solving
Credits 3. 3 Lecture Hours.
Development of reasoning strategies by examining a variety of case studies; science and scientific method solving real-world problems as part of an investigative team.
Prerequisites: Grade of C or better in FIVS 316 and FIVS 481; grade of C or better in FIVS 415 or concurrent enrollment; senior classification or approval of instructor.

FIVS 481 Seminar
Credit 1. 1 Other Hour.
Analysis of research topics related to the fields of forensic science and law. May be taken 4 times for credit.
Prerequisite: Grade of C or better in FIVS 482.

FIVS 482 Occupational and Professional Development
Credits 2. 2 Lecture Hours.
Organized instruction in written and oral communication; acquaint students with private and public-sector companies and agencies as well as leading professionals from these firms to reinforce academic instruction and prepare students for the transition to employment, graduate and professional schools.
Prerequisite: Entry to upper division of FIVS program; junior or senior classification or approval of instructor.

FIVS 484 Professional Internship
Credits 0 to 4. 0 to 4 Other Hours.
Independent study and supervised field experience related to a professional area or interest in forensic science. May be taken 3 times for credit.
Prerequisite: Junior or senior classification and approval of instructor.

FIVS 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study in forensic and investigative sciences. May be repeated for credit.
Prerequisites: Junior or senior classification; upper-division FIVS only; approval of instructor and department head.
FREN 101 Beginning French I
Credits 4.3 Lecture Hours. 2 Lab Hours.
(FREN 1411) Beginning French I. Elementary language study with oral, written, and reading practice. Preparation for conversation. Part of class preparation will be done in language laboratory.
Prerequisite: FREN 102.

FREN 102 Beginning French II
Credits 4.3 Lecture Hours. 2 Lab Hours.
(FREN 1412) Beginning French II. Continuation of FREN 101. Part of class preparation will be done in language laboratory.
Prerequisite: FREN 101.

FREN 201 Intermediate French I
Credits 3.3 Lecture Hours.
Prerequisite: FREN 102.

FREN 202 Intermediate French II
Credits 3.3 Lecture Hours.
(FREN 2312) Intermediate French II. Continuation of FREN 201 with more advanced material.
Prerequisite: FREN 201.

FREN 221 Field Studies I
Credits 3.3 Other Hours.
French language and culture taught in France; supervised travel of cultural interest, living with local families; participation in the activities and courses of a French university or institute; written and oral reports, exams.
Prerequisite: FREN 102 with a grade of B or higher or approval of instructor; concurrent enrollment in FREN 222.

FREN 222 Field Studies II
Credits 3.3 Other Hours.
French language and literature taught in France in cooperation with a French university or institute; exams, written reports.
Prerequisite: FREN 102 with a grade of B or higher or approval of instructor; concurrent enrollment in FREN 221.

FREN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in French, selected for each student individually.
Prerequisite: Approval of instructor and department head.

FREN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of French. May be repeated for credit.
Prerequisite: Approval of instructor.
FREN 418 Seminar in French Civilization
Credits 3. 3 Lecture Hours.
Discussions and observation of particular events and institutions crucial
to the development of French society and culture; analysis of literary,
artistic and cinematic representations of events and phenomena such
as the French revolution, May 1968, and church and state relations;
conducted in French. May be repeated for credit.
Prerequisites: FREN 300 and FREN 301, FREN 306, FREN 311, FREN 321,
FREN 322, FREN 336, or FREN 375.

FREN 422/WGST 422 Studies in Gender and French Literature
Credits 3. 3 Lecture Hours.
The role of gender in the production, dissemination, reception and
interpretation of literary texts in the French tradition, including
continental France as well as the Francophone literatures of West Africa,
Canada, and elsewhere; taught in English.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: WGST 422/FREN 422.

FREN 425/FILM 425 French Film
Credits 3. 3 Lecture Hours.
Overview of French cinema from its origins to the present; interpretation
of French cultural history and politics through film; taught in English.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: FILM 425/FREN 425.

FREN 481 Seminar in French and Francophone Studies
Credits 3. 3 Lecture Hours.
In-depth exploration of topics in French and Francophone literature,
culture, and/or film, involving individual student research projects. May be
taken two times for credit as topics change.
Prerequisite: Junior or senior classification or approval of instructor.

FREN 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each
student individually; written and oral reports.
Prerequisite: Approval of instructor and department head.

FREN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of French. May be repeated for credit.
Prerequisite: Approval of instructor.

FREN 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in French.
May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of department
head.

FRIC 421 Urban Forestry
Credits 3. 3 Lecture Hours.
Conceptual role of trees in improving the urban environment; optimum
use of existing forested areas and the establishment of trees in
appropriate open spaces; tree ordinances, species evaluation, street tree
planning and tree inventory systems.
Prerequisite: Approval of instructor.

FSTC - Food Science & Tech (FSTC)

FSTC 481 Seminar
Credit 1. 1 Lecture Hour.
Guidelines and practice in journal article review and making effective
technical presentations; strategies for conducting a job search;
development of résumés and letters and interviewing targeted for careers
in the food industry or graduate school.
Prerequisite: Senior classification in food science and technology.

GALV - TAMUG Study Abroad (GALV)

GALV 101 Honors Seminar Connections
Credit 1. 1 Other Hour.
Exploration of interdisciplinary connections between academic
disciplines such as science and the humanities; focuses on the question
to consider how science is embedded within culture; proposes the
question on what it means to be human.
Prerequisites: Acceptance to honors program.

GALV 201 Honors Research Methods
Credit 1. 1 Lecture Hour.
Intensive interdisciplinary research; research practices, application of
qualitative and quantitative research methods to questions; emphasis on
social sciences and humanities.
Prerequisites: Grade of C or better in GALV 101 or concurrent enrollment.

GALV 300 TAMUG Study Abroad
Credits 1 to 18. 1 to 18 Lecture Hours.
For students in approved study abroad programs; may be repeated for
credit.

GALV 301 TAMUG Study Abroad
Credits 1 to 18. 1 to 18 Lecture Hours.
For students in approved study abroad programs, may be repeated for
credit.

GALV 401 Honors Service Learning Seminar
Credit 1. 1 Other Hour.
Focus on research on a particular issue; opportunity for discipline
specific writing for publication.
Prerequisites: Grade of C or better in GALV 101 or GALV 201, or approval
of instructor.

GENE - Genetics (GENE)

GENE 101/BICH 101 Perspectives in Biochemistry and Genetics
Credit 1. 1 Lecture Hour.
Introduction to biochemistry and genetics and their relationship to the
biological, biophysical and chemical sciences.
Prerequisite: Biochemistry and genetics major or approval of instructor.
Cross Listing: BICH 101/GENE 101.
GENE 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Introduction to laboratory research.  
Prerequisite: Freshman or sophomore classification in genetics or approval of instructor.

GENE 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of genetics. May be repeated for credit.  
Prerequisites: Freshman or sophomore classification in genetics; approval of instructor.

GENE 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in genetics. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

GENE 301 Comprehensive Genetics  
Credits 3. 3 Lecture Hours.  
Survey of the fundamental principles of genetics: Physical basis of Mendelian inheritance, expression and interaction of genes, linkage, sex linkage, biochemical nature of genetic material and mutation. Only one of the following will satisfy the requirements for a degree: GENE 301, GENE 302, GENE 315 or GENE 320/BIMS 320. Not open to biochemistry or genetics majors.  
Prerequisite: BIOL 111.

GENE 302 Principles of Genetics  
Credits 3. 3 Lecture Hours.  
Mechanisms of inheritance, stressing the conservation of fundamental genetic processes throughout evolution, from bacteria to humans; mutations and phenotypes, Mendelian genetics, population genetics and evolution, and complex inheritance. Course designed for biochemistry, genetics and all majors in biology. Only one of the following will satisfy the requirements for a degree: GENE 301, GENE 302, GENE 315 or GENE 320/BIMS 320. Not open to biochemistry or genetics majors.  
Prerequisite: BIOL 112; concurrent enrollment in GENE 312.

GENE 310 Principles of Heredity  
Credits 3. 3 Lecture Hours.  
Basic principles of classical genetics, molecular genetics, mutation theory and genetic engineering; emphasis on humans and society. Not open to biochemistry and genetics majors.  
Prerequisite: Junior classification.

GENE 312 Comprehensive Genetics Laboratory  
Credit 1. 0 Lecture Hours. 3 Lab Hours.  
Exercises in Mendelian genetics, meiosis, probability theory in pedigrees, population and quantitative genetics, as well as other genetics theory; molecular techniques to examine DNA and analyze outcomes.  
Prerequisite: GENE 301 or GENE 302 or registration therein.

GENE 315 Genetics of Plants  
Credits 3. 3 Lecture Hours.  
Fundamental genetic principles as applied to plants: transmission, replication, expression and interaction of genes; linkage, recombination and mapping; chromosomal and gene mutation; behavior of genes in populations; selection, mating systems, cytoplasmic inheritance; molecular analysis and manipulation of genes and gene products; genetically modified plants. Not open to biochemistry or genetics majors. Only one of the following will satisfy the requirements for a degree: GENE 301, GENE 302, GENE 315 or GENE 320/BIMS 320.  
Prerequisite: BIOL 101 or BIOL 111.

GENE 320/BIMS 320 Biomedical Genetics  
Credits 3. 3 Lecture Hours.  
Fundamental genetic principles as applied to biomedical science; Mendelian inheritance, linkage and genetic mapping, mutagenesis and pedigree analysis; molecular basis of gene function and inherited disease; gene therapy and genetic counseling. Only one of the following will satisfy the requirements for a degree: GENE 301, GENE 302, GENE 315 or GENE 320/BIMS 320.  
Prerequisites: Junior or senior classification; BIMS major with a minimum overall 2.5 TAMU GPA.  
Cross Listing: BIMS 320/GENE 320.

GENE 404/HORT 404 Plant Breeding  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Application of genetics and other sciences to breeding and improvement of horticultural crops; methods and special techniques employed. Offered in even numbered years. Only one of the following will satisfy the requirements for a degree: HORT 404/GENE 404 and SCSC 304.  
Prerequisite: HORT 201, SCSC 205, or GENE 302, or approval of instructor.  
Cross Listing: HORT 404/GENE 404.

GENE 405/BIMS 405 Mammalian Genetics  
Credits 3. 3 Lecture Hours.  
Comparative mammalian genetic systems with emphasis on laboratory animals; organization and expression of mammalian genes; development and use of genetically defined animals in biomedical and genetic research.  
Prerequisite: GENE 302.  
Cross Listing: BIMS 405/GENE 405.

GENE 406/BIOL 406 Bacterial Genetics  
Credits 3. 3 Lecture Hours.  
A problem oriented course surveying the manipulation and mechanisms of genetic systems in bacteria; recombination, gene structure and regulation of bacterial genes, plasmids and phages.  
Prerequisites: GENE 302; BIOL 351.  

GENE 411 Biotechnology for Crop Improvement  
Credits 3. 3 Lecture Hours.  
Use of biotechnology to improve agricultural, horticultural and forest crops; techniques and methods used and case studies where biotechnology has been used to alter traits such as pathogen resistance, protein or oil consumption, ripening, fertility and wood properties.  
Prerequisite: BIOL 111 or equivalent.  
Cross Listing: MEPS 411 and SCSC 411.

GENE 412 Population, Quantitative and Ecological Genetics  
Credits 3. 3 Lecture Hours.  
Concepts of population, quantitative and ecological genetics including dynamics of natural populations with emphasis on quantitative effects and ecological interactions.  
Prerequisites: GENE 301 or GENE 302.

GENE 419/BICH 419 Computational Techniques for Evolutionary Analysis  
Credits 3. 3 Lecture Hours.  
Computational techniques for studying evolution; algorithms for construction and analysis of evolutionary relationships.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: BICH 419/GENE 419.
GENE 420 Bioethics  
Credits 3. 3 Lecture Hours.  
The application of ethical theory to the use of modern genetics and  
biochemistry stressing the social implications of genetic engineering,  
agricultural manipulation and biotechnology.  
Prerequisites: GENE 302; BICH 410 or BICH 440.

GENE 421/BIMS 421 Advanced Human Genetics  
Credits 3. 3 Lecture Hours.  
A rigorous, analytical approach to genetic analysis of humans including  
diagnosis and management of genetic disease in humans; transmission  
of genes in human populations; human cytogenetics; the structure of  
human genes; human gene mapping; molecular analysis of genetic  
disease; genetics screening and counseling.  
Prerequisites: GENE 302; BICH 410 or BICH 440.

GENE 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed study in genetics not included in established courses.  
Prerequisites: Junior or senior classification; approval of instructor and  
department head.

GENE 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of genetics. May be repeated for  
credit.  
Prerequisite: Approval of instructor.

GENE 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Laboratory research supervised by a faculty member.  
Prerequisites: Major in genetics; junior or senior classification in genetics  
or approval of instructor.

**GEOG - Geography (GEOG)**

GEOG 201 Introduction to Human Geography  
Credits 3. 3 Lecture Hours.  
(GEOG 1302) Introduction to Human Geography. A survey of the  
major systems of man-land relations of the world and their dissimilar  
developments; the processes of innovation, diffusion, and adaptation  
stressed with regard to changing relationships between people and their  
environment; also taught at Galveston campus.

GEOG 202 Geography of the Global Village  
Credits 3. 3 Lecture Hours.  
(GEOG 1303) Geography of the Global Village. Survey of world regions;  
globalization; environmental problems at multiple scales; human-  
environment interactions; cultural coherence and diversity; population  
and settlement; geopolitics; social and economic development; place  
identification; also taught at Galveston campus.

GEOG 203 Planet Earth  
Credits 3. 3 Lecture Hours.  
(GEOG 1301) Planet Earth. Earth's physical environment including  
climate, water, landforms, and ecosystems; processes that control  
these systems and their global distributions; human effects on these  
processes.

GEOG 205 Environmental Change  
Credits 3. 3 Lecture Hours.  
Systems perspective on important attributes, elements, and connections  
within earth's physical environment; dynamic nature of environment at  
multiple spatial and temporal scales.

GEOG 213 Planet Earth Lab  
Credit 1. 3 Lab Hours.  
Exercises and maps to illustrate principles of physical geography.

GEOG 215 Geospatial Cornerstone  
Credit 1. 1 Lecture Hour.  
Professional career options, methods, strategies and skills involved in  
successful career planning in the geospatial sciences; highlights high  
impact learning opportunities such as study abroad and internships and the  
development of scientific communication skills.  
Prerequisites: GEOG and GIST majors; sophomore classification or  
approval of instructor.

GEOG 232 Cartography and Visualization  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to science and art of map production; principles of thematic  
map compilation and design; history of thematic mapping; map  
projections; data management and symbolization; common types and  
styles of thematic maps.
GEOG 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individually-supervised research or intensive study on topics not covered in regular courses.
Prerequisite: Approval of department head.

GEOG 289 Special Topics In...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of geography. May be repeated for credit.
Prerequisite: GEOG, GIST or USGE majors, or approval of instructor.

GEOG 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in geography. May be taken 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Freshman or sophomore classification and approval of instructor.

GEOG 301 Geography of the United States
Credits 3. 3 Lecture Hours.
Geographic personality (physical and cultural) of the United States; also taught at Galveston campus.

GEOG 304 Economic Geography
Credits 3. 3 Lecture Hours.
Location of economic activities over the earth; distribution of agriculture, manufacturing, tertiary activities and transportation; economic growth of areas.

GEOG 305 Geography of Texas
Credits 3. 3 Lecture Hours.
Exploration into the geographic personality of Texas; past and current physical and biotic environments; cultural pluralism, including ethnic origins and distinctive human ecologies; and the social, economic and political sources of environmental problems.

GEOG 306 Introduction to Urban Geography
Credits 3. 3 Lecture Hours.
Reasons humankind tends to congregate in cities. Overview of patterns in the geographic distribution of cities, and in the geographic distribution of peoples and activities within cities, and the dynamics of these distributions.

GEOG 309 Geography of Energy
Credits 3. 3 Lecture Hours.
Development of high-energy society; renewable and nonrenewable energy resources; physical and social economies of energy use; geography of energy; energy problems and decisions; dependence of other resources on energy; alternative energy futures.
Prerequisite: Junior classification or approval of instructor.

GEOG 311 Cultural Geography
Credits 3. 3 Lecture Hours.
Human factors which affect man-land relationship; concept of culture, culture areas; population growth and migrations, types of economic activity, urban and transportation geography.

GEOG 312 Data Analysis in Geography
Credits 3. 3 Lecture Hours.
Foundation for collection and analysis of quantitative and qualitative geographic data; emphasis on hands-on, practical experience with commonly used analysis software and qualitative methods including interviewing and archival research; problems commonly encountered in dealing with data.
Prerequisite: STAT 303.

GEOG 320 The Middle East
Credits 3. 3 Lecture Hours.
Regional geography of the Middle East; physical setting and the historical evolution of Middle Eastern landscapes; current issues.
Prerequisites: Junior or senior classification.

GEOG 323 Geography of Latin America
Credits 3. 3 Lecture Hours.
Physical and cultural characteristics of Latin America; physical landscape, cultural succession and the present cultural landscape; details on sub-regions.

GEOG 324 Global Climatic Regions
Credits 3. 3 Lecture Hours.
Climatological processes and their consequences for spatial distributions of climates; survey of earth's climates; relationships among climate, landforms, vegetation, soils and humans.
Prerequisite: GEOG 203 or ATMO 201 or approval of instructor.

GEOG 325 Geography of Europe
Credits 3. 3 Lecture Hours.
Regional geography of European landmass; global, political and cultural characteristics of European geography in historical and ecological contexts.
Prerequisite: Junior or senior classification.

GEOG 327 Geography of South Asia
Credits 3. 3 Lecture Hours.
South Asian geography; political and physical geographic divisions of South Asia; diversity of region; people, history, religion, cultures, political systems, rural and urban settings, climate, and environment; current problems and solutions.
Prerequisite: Junior or senior classification or approval of instructor.

GEOG 330 Resources and the Environment
Credits 3. 3 Lecture Hours.
Changing demand for land and sea resources; international conditions of population growth, resource depletion and geopolitical control; resource perceptions and decision-making.

GEOG 331 Geomorphology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles and fundamentals of landform analysis. Laboratory work in advanced map interpretation.
Prerequisite: GEOL 101 or GEOG 203; also taught at Galveston campus.

GEOG 335 Pattern and Process in Biogeography
Credits 3. 3 Lecture Hours.
Distribution of organisms across the earth and on environmental and cultural processes that have contributed to these patterns of distribution; dynamic nature of biogeographic patterns; impacts of contemporary and prehistoric humans on plant and animal distributions; methods for exploring biogeographic patterns and detecting change.
Prerequisite: Junior or senior classification.
GEOG 352/GEOL 352 GNSS in the Geosciences  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Fundamentals of Global Navigation Satellite Systems (GNSS); basic geodesy, figure of the earth; frames of reference, map projection, datums, ellipsoids; GPS accuracy and precision; applications in earth resource mapping and database creation; elementary GPS phase data processing.  
**Prerequisite:** Junior or senior classification or approval of instructor.  
**Cross Listing:** GEOL 352/GEOG 352.

GEOG 355 Concepts in Geographic Education  
Credits 3. 3 Lecture Hours.  
Key concepts and generalizations of geography; learning theory applied to geography and environmental education; development of field and computer-based technical/intellectual skills required to teach geography; curriculum and instructional issues related to geography.  
**Prerequisites:** GEOG 201 or GEOG 202; GEOG 203 or equivalent.

GEOG 360 Natural Hazards  
Credits 3. 3 Lecture Hours.  
Introduction to the types and causes of natural events that pose risk to society; an examination of prevailing concepts and theories of human response and vulnerability; characteristics of natural events; natural hazard paradigms; case studies.  
**Prerequisites:** GEOG 203 or GEOL 101; junior or senior classification; also taught at Galveston campus.

GEOG 361 Remote Sensing in Geosciences  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Introduction to the principles, techniques and applications of remote sensing technology in geosciences including the analysis and interpretation of airborne and spaceborne remote sensing data for studying key earth system processes.  
**Prerequisite:** Junior or senior classification.

GEOG 370/MARS 370 Coastal Processes  
Credits 3. 3 Lecture Hours.  
Introduction to the coastal system, waves and wave dominated coasts, shoreline morphodynamics, tidal and lake coasts, long term coastal development, sea level changes, subtidal and beach ecosystems, coastal dunes and wetlands, structures and organizations, coastal management and coastal hazards.  
**Cross Listing:** MARS 370/GEOG 370.

GEOG 380 Workshop in Environmental Studies  
Credits 2 to 6. 2 to 6 Lab Hours.  
The study, understanding and solution of human environment problems based on principles learned in the classroom; library, laboratory and field work carried out by individuals and in groups; reports on work accomplished. May be repeated for credit as many as three times.  
**Prerequisite:** GEOG 330.

GEOG 390 Principles of Geographic Information Systems  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Basic concepts of design, planning and implementation of geographic information systems.  
**Prerequisite:** Junior or senior classification.

GEOG 391 Geodatabases  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
GIS data modeling; introductory and advanced spatial SQL (structured query language); spatial database management system (DBMS) server setup, management and maintenance; spatial DBMS design, implementation, tuning, performance analysis and indexing; connecting spatial data services and warehouses to GIS software.  
**Prerequisite:** Junior or senior classification.

GEOG 392 GIS Programming  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Programming for geographic information science applications; principles of programming syntax and data structures; development of custom GIS programs; integration of programs into commercial GIS platforms.  
**Prerequisites:** GEOG 390 or equivalent, or approval of instructor; junior or senior classification.

GEOG 398 Interpretation of Aerial Photographs  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Identification and evaluation of natural and cultural features on aerial photographs; methods for extracting information concerning land use, vegetative cover, surface and structural features, urban/industrial patterns and archaeological sites.  
**Prerequisites:** Junior or senior classification or approval of instructor.

GEOG 400 Arid Lands Geomorphology  
Credits 3. 3 Lecture Hours.  
Introduction to the geomorphology of deserts; processes, origin and evolution of arid lands; urban geomorphology in drylands; desertification.  
**GEOG 401 Political Geography  
Credits 3. 3 Lecture Hours.**  
The political process at a variety of geographic scales: international, intranational and urban; origins of territorial organization and conflicts over access to and use of space and its resources.

GEOG 404 Spatial Thinking, Perception and Behavior  
Credits 3. 3 Lecture Hours.  
Spatial thinking, spatial perception of the environment and the ways thinking and perception influence spatial behavior; role of geospatial technologies in supporting spatial thinking; models of spatial thinking acquisition; cognitive maps and spatial decision making; developing spatial thinking and individual differences.  
**Prerequisite:** Junior or senior classification.

GEOG 405 Field Trips  
Credits 1 to 4. 1 to 4 Other Hours.  
Supervised field trip to investigate the physical, economic and cultural processes that influence the spatial development and distribution on the landscape. May be repeated for credit.  
**Prerequisites:** GEOG 201, GEOG 202, GEOG 203 or GEOG 205, or concurrent enrollment; approval of instructor.

GEOG 406 Geographic Perspectives on Contemporary Urban Issues  
Credits 3. 3 Lecture Hours.  
Contemporary readings on spatial patterns and processes in urban environments; sprawl; human-environment interaction; housing; development and growth; concept of place; scale; power and policy.  
**Prerequisite:** GEOG 304 or GEOG 306 or equivalent.

GEOG 420 Geography of Terrorism  
Credits 3. 3 Lecture Hours.  
Exploration of global terrorism and counter terrorism; regional conflicts and mass violence; construction of places and regions associated with terror; American reactions to global terrorism.  
**Prerequisite:** Junior or senior classification.

GEOG 430 Environmental Justice  
Credits 3. 3 Lecture Hours.  
Exploration into the spatial variability and human geography of exposure to environmental hazards in U.S. and international contexts; emphasizes environmental equity and environmental racism as it relates to occupational, leisure, and residential geography.  
**Prerequisites:** GEOG 201 or GEOG 202; junior or senior classification.
GEOG 434 Hydrology and Environment  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Examination of hydrologic processes in relation to climate, soils, vegetation, land use practices, and human impacts; natural scientific perspectives emphasized; field and laboratory included.  
Prerequisite: GEOG 203 or equivalent.

GEOG 435 Principles of Plant Geography  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Plant distributions, their associations and environmental relationships; survey of the principal explanatory systems; field and laboratory study of area patterns at various geographic scales. A weekend field trip is required.  
Prerequisite: BIOL 101 or BIOL 107 or BIOL 301 or approval of instructor.

GEOG 440 History and Nature of Geography  
Credits 3. 3 Lecture Hours.  
Summary of classical knowledge of world; development of thought on nature of geography from 1800 to present.  
Prerequisite: Junior or senior classification.

GEOG 442/GEOS 442 Past Climates  
Credits 3. 3 Lecture Hours.  
Terrestrial and marine proxy records of past climate variability, including tree rings, coral, and sediments; past climate change events such as the Little Ice Age and Medieval Warm Period; greenhouse gases and global temperature; insight into the nature of climate change and challenges humankind faces in the next few centuries.  
Prerequisites: ATMO 201, or GEOG 203, or GEOL 101, or GEOL 104, or OCNG 251, junior or senior classification.  
Cross Listing: GEOS 442/GEOG 442.

GEOG 450 Field Geography  
Credits 3. 1 Lecture Hour. 6 Lab Hours.  
Introduction to field methods; documenting materials, reconnaissance, the field plan; mapping traverse, base maps and aerial photographs; recording techniques; interview procedures. Fields trips required, some on weekends and/or semester breaks, for which departmental fees may be assessed to cover costs.  
Prerequisite: 15 hours of geography or equivalent.

GEOG 461 Digital Image Processing in the Geosciences  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Key remote-sensing digital image processing methods; advanced topics in feature extraction, radiometric calibration, image enhancement, pattern recognition and geoscience applications.  
Prerequisite: GEOG 361 or equivalent and junior or senior classification.

GEOG 462/ESSM 462 Advanced GIS Analysis for Natural Resources Management  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Advanced topics in geographic information systems (GIS) to solve natural resource problems; manipulation of raster data types; three-dimensional modeling; emphasis on geoprocessing as it relates to applied projects particularly with habitat suitability models; field and lab use of global positioning systems (GPS); internet-based GIS modeling.  
Prerequisites: ESSM 351/RENR 405 or AGSM 461 or equivalent or approval of instructor; junior or senior classification.  
Cross Listing: ESSM 462/GEOG 462.

GEOG 467 Dynamic Modeling of Earth and Environmental Systems  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Dynamical systems modeling; key concepts and processes in earth and environmental systems; human impact on these systems; model building and testing; system behavior over time; model validation and sensitivity; examples from the applications in earth and environmental sciences.  
Prerequisite: GEOG 203 or approval of instructor.

GEOG 475 Advanced Topics in GIS (Geographic Information Systems)  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Advanced Topics in Geographic Information Systems. Topics related to GIS implementation, spatial database design, spatial data analysis, and various advanced GIS applications.  
Prerequisite: GEOG 390 or equivalent.

GEOG 476 GIS Practicum  
Credits 3. 3 Other Hours.  
Introduction to current topics in Geographic Information Science including ethical and legal issues surrounding spatial technologies, proper GIS management practices and professional certification; development of professional research, technical and communication skills through participation in a coordinated internship or independent research project. Meets writing-intensive course requirements for environmental geosciences, environmental studies and geography majors.  
Prerequisites: Senior classification and enrollment in Geographic Information Science and Technology or approval of instructor.

GEOG 477 Terrain Analysis and Mapping  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Geomorphometry for land surface characterization; fundamentals of terrain analysis; theory of land surface dynamics; application of software for digital terrain modeling and analysis.  
Prerequisites: GEOG 361 and GEOG 390 or equivalents, or approval of instructor; junior or senior classification.

GEOG 478 WebGIS  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Investigation of web-based geographic information systems; introduction to server-oriented architectures for web-based applications and services; development of web applications; management of web servers, web services and databases.  
Prerequisites: GEOG 390 or equivalent, or approval of instructor; junior or senior classification.

GEOG 479 Principles of Geocomputation  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Geocomputation including geospatial technologies, computational techniques and algorithms utilizing high-performance computing; fundamental geocomputation principles, artificial and computational intelligence.  
Prerequisites: GEOG 361, GEOG 390, GEOG 475; CSCE 110 or CSCE 111.

GEOG 484 Internship  
Credits 0 to 12. 0 to 12 Lecture Hours.  
Directed internship in a private firm, government agency or non-governmental organization to provide work experience related to the student’s degree program and career objectives.  
Prerequisites: Junior or senior classification and approval of internship agency and departmental internship director.

GEOG 485 Directed Studies  
Credits 1 to 23. 1 to 23 Other Hours.  
Individually supervised research or advanced study on restricted areas not covered in regular courses.  
Prerequisite: Approval of department head.
GEOG 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of geography. May be repeated for credit.
Prerequisite: Approval of instructor.

GEOG 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in geography. May be repeated for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

GEOL - Geology (GEOL)

GEOL 101 Principles of Geology
Credits 3. 3 Lecture Hours.
(GEOL 1303, GEOL 1403*) Principles of Geology. Physical and chemical nature of the Earth and dynamic processes that shape it; plate tectonics, Earth's interior; materials it is made of, age and evolution, earthquakes, volcanism, erosion and deposition; introduces physical and chemical principles applied to the Earth; also taught at Galveston campus. Not open to students who have taken GEOL 103 or GEOL 104.

GEOL 102 Principles of Geology Laboratory
Credit 1. 2 Lab Hours.
(GEOL 1103, GEOL 1403*) Principles of Geology Laboratory. Laboratory exercise-based introduction to the physical and chemical nature of the Earth and dynamic process that shape it; rock and mineral types; topographic and geologic maps; complements GEOL 101 but can be taken independently; also taught at Galveston campus.

GEOL 104 Physical Geology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Earth materials, structures, external and internal characteristics; physical processes at work upon or within the planet. A working knowledge of high school chemistry and mathematics is required; also taught at Qatar campus.

GEOL 106 Historical Geology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
(GEOL 1104 and 1304, 1404) Historical Geology. Hypotheses of Earth’s origin; age dating of geologic materials; development and history of life; plate tectonic reconstructions, geologic history, and paleogeography, with emphasis on the North American plate.
Prerequisite: GEOL 101 or equivalent; also taught at Galveston campus.

GEOL 150 Introduction to the Solid Earth
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introduction to the dynamic earth for careers in geosciences; origin and structure of the earth; earth materials and processes, particularly as they relate to plate tectonics; maps as a basic tool of geologists; not open to students who have taken GEOL 101 or GEOL 104.

GEOL 152 History of the Earth
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Evolution of life, plate tectonics processes, geography and climate through earth's history; the timing of major events in earth history; sedimentary environments and stratigraphy; fossils; biostatigraphic and radiometric dating of rocks; not open to students who have taken GEOL 106.
Prerequisites: GEOL 150, GEOL 101 and GEOL 102, or GEOL 104 or equivalent.

GEOL 180 Introduction to Geology and Geophysics
Credit 1. 1 Lecture Hour.
Introduction to careers in geology and geophysics; campus resources for academic and personal success; tools for developing study skills and navigating the university; use of reflection to assess personal strengths, weaknesses and responsibilities and to devise strategies for improvement.
Prerequisite: Approval of instructor.

GEOL 203 Mineralogy
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Crystallography, crystal chemistry, mineral chemistry, optical crystallography, physical properties, and geologic occurrence of rock-forming and economic minerals.
Prerequisites: MATH 151 or MATH 142; CHEM 119, or CHEM 101 and CHEM 111, or CHEM 107 and CHEM 117; GEOL 150 or equivalent.

GEOL 207 Dinosaur World
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Survey of dinosaur paleobiology and paleoecology; terrestrial paleoclimate and paleoenvironments of the Mesozoic; dinosaur ancestors; appearance and radiation of dinosaurs; paleoecology and paleobiology of major dinosaur groups; extinction of large dinosaurs and the Cretaceous/Paleogene mass extinction; the appearance and ancestry of birds.

GEOL 208 Life on a Dynamic Planet
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Critical events in the Earth's 4.6 billion-year history that shaped life as we know it and the tools to investigate them; interactions between global environments, the evolution of life and the geologically recent development of human societies.

GEOL 210 Geological Communication
Credits 3. 3 Lecture Hours.
Introduction to communicating as a scientist particularly in geological settings; using precise language, illuminating graphs and correct mathematical and chemical symbols to describe geological observations and concepts in writing; using basic statistics to describe geological data and uncertainty; recognizing scientific ethical dilemmas and plagiarism and interpretation.
Prerequisites: MATH 151 or MATH 142; ENGL 104; GEOL 150 or equivalent.

GEOL 250 Geological Field Methods
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fundamental aspects of geologic mapping; field observation, data gathering and recording, use of a Brunton compass, pace-and-compass mapping, measurement of stratigraphic sections; topographic map use and interpretation, interpretation of geologic map patterns, construction of geologic cross sections; Integrating field and remote data to address geologic problems using GIS software.
Prerequisites: GEOL 152 or equivalent.

GEOL 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed studies in specific problem areas of geology.
Prerequisite: Approval of instructor.

GEOL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of geology. May be repeated for credit.
Prerequisite: Approval of instructor.
GEOL 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in geology. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Freshman or sophomore classification and approval of instructor.

GEOL 300 Field Geology
Credits 6. 6 Other Hours.
Basic concepts of field relationships and field techniques are used to develop geologic maps, stratigraphic columns, cross-sections and geologic interpretations for a variety of geologic provinces. Course conducted off-campus in a field camp for six weeks.
Prerequisites: GEOL 302, GEOL 306, GEOL 309, GEOL 312 or approval of instructor.

GEOL 301 Mineral Resources
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Origin, geologic relations and geographic distribution of mineral and energy resources; mineral economics, mining and reclamation and global economics in the resource industry; identification and classification of economic minerals including energy resources, base and precious metals, chemical industrial minerals and gemstones.
Prerequisites: GEOL 101 or GEOL 320; CHEM 106 or higher.

GEOL 302 Introduction to Petrology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to the origin and evolution of igneous, sedimentary, and metamorphic rocks; classification and petrographic analysis of major rock types; relationships to tectonic settings.
Prerequisites: GEOL 104 and GEOL 203 or approval of instructor.

GEOL 304 Igneous and Metamorphic Petrology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Origin and evolution of igneous and metamorphic rocks; identification, classification and petrographic analysis; relationships to tectonic settings; genetic processes inferred from laboratory studies and field occurrences.
Prerequisites: GEOL 203; CHEM 120, or CHEM 107 and CHEM 117, or equivalent.

GEOL 305 Paleobiology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of paleobiology; study of organisms important in the marine fossil record; application of paleontology to geologic problems.
Prerequisite: GEOL 106 or approval of instructor.

GEOL 306 Sedimentology and Stratigraphy
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Origin of sediments and sedimentary rocks; climate, weathering, and weathering products; transport, deposition, and depositional environments for sediments; field and laboratory studies in description and interpretation of genesis of sedimentary rocks; principles of stratigraphy and basin analysis; plate tectonics and the formation of sedimentary basins; stratigraphic nomenclature; geologic time and correlation; sequence stratigraphy and basin architecture.
Prerequisite: CHEM 119 or equivalent; GEOL 152 or equivalent.

GEOL 307 Dinosaur World
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Evolutionary development of dinosaurs and Mesozoic geography, climate and terrestrial environments including dinosaur morphology; evolutionary relationships; dinosaur metabolism; and constraints imposed by gigantism; their latitudinal distribution; casual mechanism for dinosaur extinction.

GEOL 309 Introduction to Geological Field Methods
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Geological mapping methods, field observation procedures and data gathering and recording; use of Brunton compass; pace-and-compass mapping; topographic map use and interpretation; measurement of structural elements; interpretation of geologic map patterns; measurement of stratigraphic sections; construction of geologic cross sections; six day geologic mapping project during either spring break or two three-day weekends.
Prerequisites: GEOL 101 or GEOL 104; GEOL 106.

GEOL 310 Planetary Geology
Credits 3. 3 Lecture Hours.
Introduction to planetary science; organization and composition of the solar system, including the planets, satellites and asteroids; surface features and internal structures of the terrestrial planets and moons; the dynamic processes of planetary resurfacing, including volcanism, tectonism, weathering and impacts; the history and future of solar system exploration.
Prerequisites: GEOL 101 or equivalent; junior or senior classification or approval of instructor; also taught at Galveston campus.

GEOL 311 Principles of Geological Writing
Credit 1. 1 Lecture Hour.
Principles of writing for geological reports; format and style for abstracts, grant proposals, journal manuscripts and industry reports; evaluating written reports for revision and editing; using proper referencing and citation style; methods of maintaining clarity in documents; using web tools for geological communication.

GEOL 312 Structural Geology and Tectonics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fundamentals of the deformation of the lithosphere ranging from plate to atomic scales; stress, strain, experimental rock deformation, microscopic mechanisms and mechanical behaviors; analysis of faults, folds, flow and rock fabrics; subsurface interpretation; regional tectonics of selected areas; practical experience in geometric and kinematic analysis, constructing balanced cross sections.
Prerequisites: GEOL 104 or GEOL 150 or equivalent; MATH 142 or MATH 152; and PHYS 218 or PHYS 201.

GEOL 314 Paleontology and Geobiology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Biogeosphere-geosphere interactions, including procaryote controls on sedimentary geochemistry and organismal distributions, and fossil preservation; fossils in the context of evolutionary theory and global change; identification of important groups of marine fossils; use of fossils to determine the stratigraphic age of rocks and the history of life on Earth.
Prerequisites: CHEM 101, CHEM 107, or CHEM 119; GEOL 306.
GEOL 320 Geology for Civil Engineers
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of physical and engineering geology; properties of minerals, rocks and soils; active surface and subsurface processes; applications to the siting, design, construction, operation and maintenance of engineered works and the protection of the environment. A three-day field trip is required (a field trip fee is charged at registration).
Prerequisite: Sophomore classification.

GEOL 330 Geologic Field Trips
Credits 1 to 3. 1 to 3 Other Hours.
Field trips to observe, analyze and interpret the geology and geophysics of selected localities in Texas and adjacent regions; complements classroom experience. Trip frequencies, duration, dates and study localities vary with semester.
Prerequisite: GEOL 101 or GEOL 104 or approval of instructor. May be repeated for credit.

GEOL 350 Summer Field Geology
Credits 3. 3 Other Hours.
Intense immersive geologic mapping experience, integrating geological skills from throughout the curriculum; concepts of field relationships and field techniques are used to develop geologic maps, stratigraphic columns, cross-sections and geologic interpretations for a variety of geologic provinces; conduct off-campus in a field area or areas for three to four weeks.
Prerequisites: GEOL 304, GEOL 314, GEOL 306, GEOL 250 and GEOL 312.

GEOL 352/GEOG 352 GNSS in the Geosciences
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of Global Navigation Satellite Systems (GNSS); basic geodesy, figure of the earth; frames of reference, map projection, datums, ellipsoids; GPS accuracy and precision; applications in earth resource mapping and database creation; elementary GPS phase data processing.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: GEOG 352/GEOL 352.

GEOL 404 Geology of Petroleum
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Origin, migration and accumulation of petroleum; typical U.S. oil and gas fluids; laboratory work in subsurface geology.
Prerequisites: GEOL 104 or GEOL 150; also taught at Qatar campus.

GEOL 410 Hydrogeology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geologic conditions determining the distribution and movement of ground water and their effect on the hydrologic properties of aquifers.
Prerequisite: MATH 151 and MATH 152, or equivalent; junior or senior classification.

GEOL 420 Environmental Geology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geologic concepts of the nature of geologic environments and the dynamics of geologic processes needed to characterize and quantify human interactions with specific geologic systems including aquifers, watershed, coastlines and wetlands; specific techniques, including geophysical and geochemical techniques, field mapping, geographical information systems and remote sensing used to monitor human-geosphere interactions.
Prerequisites: GEOL 101 or GEOG 203; junior or senior classification or approval of instructor.

GEOL 440 Engineering Geology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of soil, rock and fluid mechanics and basic engineering practices as applied to the analysis of the geologic environment for engineering uses. Designed for geoscience majors who have not had engineering courses.
Prerequisites: GEOL 312 or approval of instructor; PHYS 218.

GEOL 450 Geology Senior Project
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Conducting and communicating a team research project in geology and/or geophysics; formulating a research question and a plan to answer that question; synthesizing and interpreting the geological and geophysical literature; written and oral presentation of findings and critiquing those findings.
Prerequisites: GEOL 210 and GEOL 312, or approval of undergraduate advisor.

GEOL 451 Introduction to Geochemistry
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Chemical principles and processes responsible for the formation and cycling of earth materials, with emphasis on low temperature equilibria and kinetics in rockwater systems.
Prerequisite: GEOL 302 or approval of instructor.

GEOL 478 Earth Science Modeling
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Techniques for building, solving and analyzing numerical models applied to a wide variety of problems in geology, geochemistry, geobiology and geophysics; derivation and scaling of conservation laws; finite difference and finite element techniques; programming in MATLAB or a higher-level language.
Prerequisites: MATH 151; MATH 152; junior or senior classification.

GEOL 481 Seminar
Credit 1. 1 Other Hour.
Review of selected topics in the geological literature; preparation of oral and written reports.
Prerequisite: Approval of department head.

GEOL 484 Internship
Credits 0. 0 Other Hours.
Directed internship in a private firm, government agency or non-governmental organization to provide work experience related to the student's degree program and career objectives. May be taken two times.
Prerequisites: Junior or senior classification and approval of internship agency and approval of instructor.

GEOL 485 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Advanced problems in geology; also taught at Galveston and Qatar campuses.

GEOL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of geology. May be repeated for credit.
Prerequisite: Approval of instructor.

GEOL 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in geology. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.
GEOP - Geophysics (GEOP)

GEOP 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in geophysics. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Freshman or sophomore classification and approval of instructor.

GEOP 313 Geophysical Field Methods
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Planning, safe execution and analysis of applied geophysical surveying including magnetics, gravity, resistivity, induced polarization, seismic reflection, seismic refraction, ground-penetrating radar, frequency-domain and time-domain electromagnetic induction; experimental design, precise navigation, quality assurance and control, data management, elementary processing, error analysis and estimation, visualization and interpretation procedures.
Prerequisites: GEOP 341; PHYS 206 and PHYS 207, or equivalent; MATH 308; GEOL 250.

GEOP 341 Fundamentals of Geophysics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
The structure, composition and evolution of the earth; the concepts and application of various geophysical methods to infer earth structure, including seismology, gravity and geodesy, magnetics; generation of internal heat and heat loss; quantification of the driving forces of plate tectonics and isostatic topography.
Prerequisites: PHYS 206 and PHYS 207, or equivalent; MATH 308; GEOL 210 and GEOL 150 or equivalent.

GEOP 361 Geophysical Signal Processing
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental concepts in digital signal processing for geophysicists; practical applications of sampling theory, Fourier analysis, filter design, spectral decomposition, instrument deconvolution, and methods of finding hidden signals within geophysical data; Matlab-based laboratory exercises involve analysis of various types of real geophysical/geological data.
Prerequisites: GEOP 341, PHYS 221 and MATH 311 or equivalent.

GEOP 413 Near-surface Geophysics
Credits 3. 3 Lecture Hours.
Fundamentals of traditional and emergent surface and borehole geophysical methods, as they are applied to shallow (less than 100 meters) subsurface investigations; emphasis on electrical, magnetic and electromagnetic methods; seismic reflection and crosswell tomography.
Prerequisites: GEOP 313 and GEOP 361, or approval of instructor.

GEOP 421 Seismology
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Mathematical theory of elasticity and seismic wave propagation; properties of body and surface waves and applications to inference of earth structure; introduction to source theory; use of seismic data to determine major earth structures; characteristics of seismic noise fields; influence seismic anisotropy.
Prerequisites: GEOP 361, MATH 311 and PHYS 221, or approval of instructor.

GEOP 435 Methods of Geophysical Exploration
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to theory of gravity, magnetic, electrical and seismic exploration methods; physical properties of earth materials and their influence on geophysical measurements; limitations of geophysical data in the interpretation of subsurface structure.
Prerequisites: GEOL 309; MATH 251.

GEOP 470 Computational Geophysics
Credits 3. 3 Lecture Hours.
Techniques used in the study of geophysical processes, including heat and chemical transport in the Earth, rock deformation and viscous fluid flow; development of conservation laws, relevant boundary conditions and analytical solutions; introduction to numerical solutions.
Prerequisites: GEOL 101 or GEOL 104; MATH 308; or approval of instructor.

GEOP 484 Internship
Credits 0. 0 Other Hours.
Directed internship in a private firm, government agency or non-governmental organization to provide work experience related to the student’s degree program and career objectives. May be taken two times.
Prerequisites: Junior or senior classification and approval of internship agency and approval of instructor.

GEOP 485 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Advanced problems in geophysics.

GEOP 489 Special Topics In...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in geophysics. May be repeated for credit.
Prerequisite: Junior or senior classification.

GEOP 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in geophysics. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

GEOS - Geosciences (GEOS)

GEOS 101 Introduction to the Geosciences
Credits 0-1. 0-1 Lecture Hours.
Introduction to the geosciences; geography, geology, geophysics, atmospheric sciences and oceanography; areas and opportunities in the various geoscience fields. Open to all freshman and sophomore non-geoscience students interested in geosciences. May be taken three times for credit.
GEOS 105 Introduction to Environmental Geoscience  
Credit 3. 3 Lecture Hours.  
Key concepts and generalizations of global environmental issues within an Earth systems science framework including climate change, air pollution, land and coastal degradation, water resources and pollution, and habitat loss; environmental ethics, economics and politics; environmental issues in Texas. Enrollment preference will be given to environmental geoscience and environmental studies majors.

GEOS 110 Disasters and Society  
Credit 3. 3 Lecture Hours.  
Exploration of the science behind disasters; how they occur, the choices society makes that create or affect disasters, how certain populations are privileged during disasters by the decisions society has made and how science informs preparation for and response to future disasters.

GEOS 205 Environmental Geosciences Cornerstone  
Credit 1. 1 Lecture Hour.  
Professional career options, methods, strategies and skills involved in successful career planning in the environmental sciences; highlights high impact learning opportunities such as study abroad and internships and the development of scientific communication skills.  
Prerequisites: ENST and ENSG majors; sophomore classification or approval of instructor.

GEOS 210 Climate Change  
Credit 3. 3 Lecture Hours.  
Examination of the science of climate change; past and present causes of global-scale climate change; basis for projections of future climate change and its potential impacts; existing and proposed policy responses; critical evaluation of scientific information.

GEOS 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
.. Selected topics in an identified area of geosciences. May be repeated for credit.  
Prerequisite: Approval of instructor.

GEOS 291 Research  
Credit 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in the College of Geosciences. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

GEOS 301 College of Geosciences Study Abroad  
Credit 1 to 18. 1 to 18 Other Hours.  
For students in approved programs abroad. May be repeated for credit.  
Prerequisites: Admission to approved program and approval of academic dean.

GEOS 401 Polar Regions of the Earth: Science, Society and Discovery  
Credit 3. 3 Lecture Hours.  
Overview of disciplines and topics that define modern polar science in the north and the south; includes history of the Polar Regions, polar geosciences, major polar scientific projects, and special topics; participate as individuals and teams in education, outreach and science projects.  
Prerequisite: Junior or senior classification.

GEOS 405 Environmental Geosciences  
Credit 3. 2 Lecture Hours. 2 Lab Hours.  
Dynamics and human interactions with near-surface environments including land, atmosphere and oceans through problem-based learning; interdisciplinary environmental problem topic, for example, water quality, urbanization, coastal development, or environmental pollution; geoscience techniques used for monitoring human-geosphere interaction.  
Prerequisites: GEOS 105; junior or senior classification.

GEOS 410 Global Change  
Credit 3. 3 Lecture Hours.  
The interaction of the earth, atmosphere, oceans, cryosphere and life, including the impact of human society on the environment and climate; global change modeling; politics, policy and decision making; and personal awareness.  
Prerequisite: Junior or senior classification.

GEOS 430 Global Science and Policy Making  
Credit 3. 3 Lecture Hours.  
Policy making derived from global science and technology; how advice is communicated to the federal government and the public; current and future societal concerns that could affect future policy making; knowledge and information used to set priorities, decide budget allocations, and establish public policy.  
Prerequisite: Junior or senior classification or approval of instructor.

GEOS 431 Environmental Regulatory Compliance in Geoscience  
Credit 3. 3 Lecture Hours.  
Knowledge and practical experience necessary for analyzing and evaluating environmental protection and stewardship principles; application of evolving environmental laws and regulations to the human business enterprise; exploration of the interplay between stakeholders in the development of sound environmental management and regulatory strategies.  
Prerequisites: BESC 367 or approval of instructor; junior or senior classification.

GEOS 442/GEOG 442 Past Climates  
Credit 3. 3 Lecture Hours.  
Terrestrial and marine proxy records of past climate variability, including tree rings, coral, and sediments; past climate change events such as the Little Ice Age and Medieval Warm Period; greenhouse gases and global temperature; insight into the nature of climate change and challenges humankind faces in the next few centuries.  
Prerequisites: ATMO 201, or GEOG 203, or GEOL 101, or GEOL 104, or OCNG 251; junior or senior classification.  
Cross Listing: GEOG 442/GEOG 442.

GEOS 443 Global Biogeochemical Cycles  
Credit 3. 3 Lecture Hours.  
Use of biogeochemical cycles to study the Earth system; description of movement and transformation of major elements such as C, N, P and trace elements; flux of material in and out of atmosphere, hydrosphere, pedosphere, and lithosphere; chemical and physical transformations that occur in Earth system.  
Prerequisites: CHEM 119 and CHEM 120; select two from ATMO 201, or OCNG 251, or GEOG 203 or GEOG 205, or GEOL 101 or GEOL 104 or GEOL 150.
GEOS 444 The Science and Politics of Global Climate Change  
Credits 3. 3 Lecture Hours.  
Examination of the policy and scientific debate over climate change; how scientific debates produce 'knowledge'; how political debates produce policies; how policy debates use science; scientific evidence for climate change; impacts of climate change; possible responses to climate change; the political debate over climate change.  
Prerequisite: GEOS 210; junior or senior classification or approval of instructor.

GEOS 470 Data Analysis Methods in Geosciences  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Topics and methods encountered while performing research in the geosciences; conceptualization of a scientific problem, data collection and processing, appropriate analysis techniques and data archiving and management; multi-disciplinary approach with an emphasis on real-world applications from environmental, atmospheric, and oceanographic sciences.  
Prerequisites: Junior or senior classification; MATH 151; STAT 211, STAT 301, STAT 302, or STAT 303, or concurrent enrollment.

GEOS 471 Data Methods in Geosciences Laboratory  
Credit 1. 2 Lab Hours.  
Computational techniques required to perform statistical analysis of geosciences data; probability, confidence intervals, linear regression, analysis of variance and principle component analysis and performing statistical analysis using MATLAB; techniques for visualization and interpretation of results; emphasis on real world problems found in environmental, atmospheric, and oceanographic sciences.  
Prerequisites: Junior or senior classification; MATH 151; STAT 211, STAT 301, STAT 302, or STAT 303, or concurrent enrollment.

GEOS 481 Seminar  
Credit 1. 1 Other Hour.  
Acquaint students with current research themes in the environmental field. May be repeated 4 times for credit.  
Prerequisite: Junior or senior classification.

GEOS 483 Service Learning in the Geosciences  
Credits 3. 3 Other Hours.  
Integrates community-engaged experiences with academic course content; includes service activities, critical reflection on the relationship between course content and service experience; emphasis on the ethical and civic dimensions of service in geosciences; professional development training. May be taken up to six hours for credit.  
Prerequisites: Approval of instructor.

GEOS 484 Internship  
Credits 0 to 6. 0 to 6 Other Hours.  
Provides opportunity to gain practical experience in a working situation either during the semester or summer; work experience must have relevance to the degree sought and/or career objectives. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: Junior or senior classification and approval of internship agency and departmental director.

GEOS 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Advanced problems in geosciences.

GEOS 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of geosciences. May be repeated for credit.

GEOS 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of a faculty member in the College of Geosciences. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

GERM - German (GERM)  

GERM 101 Beginning German I  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(GERM 1411) Beginning German I. Elementary language study with oral, written and reading practice. Preparation for conversation. Part of class preparation will be done in language laboratory.

GERM 102 Beginning German II  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(GERM 1412) Beginning German II. Continuation of GERM 101. Part of class preparation will be done in language laboratory.  
Prerequisite: GERM 101.

GERM 104 Intensive Beginning German  
Credits 8. 8 Lecture Hours. 0 Lab Hours.  
(GERM 1411 and 1412) Intensive Beginning German. Accelerated elementary language study, with oral, listening, reading, and writing practice. Equivalent to GERM 101 and GERM 102.

GERM 201 Intermediate German I  
Credits 3. 3 Lecture Hours.  
(GERM 2311) Intermediate German I. Readings of average difficulty; review of grammar; practice in conversation composition.  
Prerequisite: GERM 102 or GERM 104.

GERM 202 Intermediate German II  
Credits 3. 3 Lecture Hours.  
(GERM 2312) Intermediate German II. Continuation of GERM 201 with more advanced material. Some literary selections included in class readings.  
Prerequisite: GERM 201.

GERM 204 Intensive Intermediate German  
Credits 6. 6 Lecture Hours.  
(GERM 2311 and 2312) Intensive Intermediate German. Accelerated intermediate-level language study, with oral, listening, reading, and writing practice. Equivalent to GERM 201 and GERM 202.  
Prerequisite: GERM 102 or GERM 104.

GERM 221 Field Studies I  
Credits 3. 3 Other Hours.  
German language and culture taught in Germany; supervised travel of cultural interest; living with local families; participation in the activities and courses of a German university or institute; written and oral reports, exams.  
Prerequisites: GERM 102 or GERM 104; GERM 222 or concurrent enrollment.

GERM 222 Field Studies II  
Credits 3. 3 Other Hours.  
German language and literature taught in Germany in cooperation with a German university or institute; exams, written reports.  
Prerequisites: GERM 102 or GERM 104; GERM 221 or concurrent enrollment.
GERM 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Individual supervision of readings or assigned projects in German, selected for each student individually.  
Prerequisite: Approval of instructor and department head.

GERM 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of German. May be repeated for credit.  
Prerequisite: Approval of instructor.

GERM 310 Composition  
Credits 3. 3 Lecture Hours.  
Development of writing skills in German; emphasis on grammatical construction; taught in German.  
Prerequisites: GERM 202, GERM 204, or GERM 222; junior or senior classification or approval of instructor.

GERM 311 Conversation  
Credits 3. 3 Lecture Hours.  
Development of effective communication skills in spoken German, with emphasis on language appropriate to various social context; taught in German.  
Prerequisite: GERM 202, GERM 204, or GERM 222; junior or senior classification or approval of instructor.

GERM 315 Literary Investigations: German Short Fiction  
Credits 3. 3 Lecture Hours.  
Readings of selected works of short prose from the early 20th century to the present with emphasis on principles of literary analysis; conducted in German.  
Prerequisites: GERM 202, GERM 204, or GERM 222; junior or senior classification or approval of instructor.

GERM 316 Advanced Business German  
Credits 3. 3 Lecture Hours.  
Continuation of GERM 203; reading and oral practice of German pertinent to business, trade and international commerce.  
Prerequisite: GERM 202, GERM 204, or GERM 222; junior or senior classification or approval of instructor.

GERM 321 German Culture and Civilization I  
Credits 3. 3 Lecture Hours.  
German culture and civilization from classical antiquity to 1830; major stylistic periods in literature and the fine arts; conducted in German.  
Prerequisite: GERM 202, GERM 204, or GERM 222; junior or senior classification or approval of instructor.

GERM 322 German Culture and Civilization II  
Credits 3. 3 Lecture Hours.  
German culture and civilization from 1830 to the present; conducted in German.  
Prerequisite: GERM 202, GERM 204, or GERM 222; junior or senior classification or approval of instructor.

GERM 331 German Literary Expression I  
Credits 3. 3 Lecture Hours.  
Readings of selected drama, poetry, and prose works of German literature from the Middle Ages through Romanticism; problems involved in defining dramatic, lyric, and epic genres considered; structural and aesthetic elements of literary works; conducted in German.  
Prerequisite: GERM 310 or GERM 315, or concurrent enrollment.

Credits 3. 3 Lecture Hours.
Analysis of artistic mediations of the Holocaust across diverse textual and visual media with particular focus on aesthetic, political, pedagogical, and ethical challenges. Course conducted in English.
Prerequisite: Junior or senior classification or approval of instructor.

GERM 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually; written and oral reports.
Prerequisite: Approval of instructor and department head.

GERM 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of German. May be repeated for credit.
Prerequisite: Approval of instructor.

GERM 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in German. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of department head.

HBRW - Hebrew (HBRW)

HBRW 101 Elementary Modern Hebrew I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Elementary language study with oral, written and reading practice; preparation for conversation; part of class preparation to be done in the language laboratory.

HBRW 102 Elementary Modern Hebrew II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Continuation of HBRW 101; part of class preparation to be done in the language laboratory.
Prerequisite: HBRW 101.

HBRW 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual supervision of readings or assigned projects in Hebrew, selected for each student individually.
Prerequisites: Approval of instructor and department head.

HBRW 289 Special Topics in...
Credits 3. 3 Lecture Hours.
Selected topics in an identified area of Hebrew studies. May be repeated for credit.
Prerequisite: Approval of instructor.

HEFB - Health Ed Field Based (HEFB)

HEFB 222/KNFB 222 Teaching and Schooling in Modern Society
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Developing an understanding of students in multiple settings and levels; development, structure, history, finance, and management of schools in a democratic society; philosophical, ethical and moral dimensions of teaching; professional role of teacher.
Prerequisites: Junior or senior classification; majors only.
Cross Listing: KNFB 222/HEFB 222.

HEFB 324/KNFB 324 Technology and Teaching Skills for the 21st Century Learner
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Preparation of future Health and Physical Education teachers with practical skills related to: technology in the classroom/gymnasium, strategies for addressing urban education and English language learners, liability, management and classroom discipline, development of professional communication skills and time management; includes field-based experiences in diverse classroom settings.
Prerequisites: Grade of C or better in HEB 222/KNFB 222 or KNFB 222/HEFB 222; grade of C or better in BIOL 107 or BIOL 111; junior classification.
Cross Listing: KNFB 324/HEFB 324.

HEFB 325/KNFB 325 Introduction to Secondary School Teaching
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduce fundamental teaching skills and theories necessary for preparing reflective teachers; examine classroom management, learning strategies and assessment techniques; classroom lectures combined with field-based experiences to link theory into practice.
Prerequisites: Grade of C or better in HEB 324/KNFB 324; junior classification.
Cross Listing: KNFB 325/HEFB 325.

HEFB 450/KNFB 450 Supervised Student Teaching
Credits 6. 0 Lecture Hours. 6 Other Hours.
Observation and participation in an accredited public school classroom; techniques of teaching student’s teaching fields, and appropriate instructional strategies for assigned student population.
Prerequisites: Grade of C or better in HLTH 415 or KNFB 416.
Cross Listing: KNFB 450/HEFB 450.

HHUM - Health Humanities (HHUM)

HHUM 107 Introduction to the Health Humanities
Credits 3. 3 Lecture Hours.
Introduction to the methods and approaches of the health humanities; exposure to key scholarship in this field as well as major methods and approaches; application of such skills to the analysis of cultural case studies such as illness narratives or contemporary debates in scientific bioethics.
Cross Listing: COMM 107, ENGL 107, and PHIL 107.

HHUM 482 Health Humanities Senior Seminar
Credits 3. 3 Lecture Hours.
Capstone course; application of skills and knowledge acquired during health humanities concentration coursework; exposure to specialized methods of inquiry; development and execution of an individualized final project.
Prerequisites: ENGL 107, COMM 107, or HHUM 107; junior or senior classification.
Cross Listing: COMM 482 and ENGL 482.
HISP - Hispanic Studies (HISP)

HISP 201 Current Issues in Hispanic Studies
Credit 1. 1 Lecture Hour.
Exploration of current issues and concerns in Hispanic Studies through attendance and participation in Hispanic Studies-related events and lectures by noted academics and professionals in Hispanic Studies; in-class discussions. May be taken three times for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: ENGL 104.

HISP 204 Spanish and Spanish American Literature in Translation
Credits 3. 3 Lecture Hours.
Survey of literature from the Spanish-speaking world from the Middle Ages to the present; English translations of masterpieces of Spanish language literature; authors such as Cervantes, Lope de Vega, Dario, Garcia Marquez; also taught at Galveston campus. Taught in English.

HISP 205 Don Quixote and the Other Arts
Credits 3. 3 Lecture Hours.
A study of Miguel de Cervantes’ masterwork, Don Quixote, and its representations in other arts such as painting, film and music. Taught in English.
Prerequisite: ENGL 104.

HISP 206 Food in the Hispanic World
Credits 3. 3 Lecture Hours.
A study of food, food preparation and consumption in the Hispanic world from historical, geographical, artistic, social and psychological perspective. Taught in English.
Prerequisite: ENGL 104.

HISP 250 Contemporary Spanish Culture
Credit 1. 1 Lecture Hour.
Cultural and practical orientation for students participating in the summer study abroad programs in Spain; brief introduction to contemporary social and cultural institutions; discussions of Spanish university system; oral reports and final paper; readings and discussion in English and Spanish.
Prerequisite: SPAN 101 or equivalent.

HISP 250 Contemporary Mexican Culture
Credit 1. 1 Lecture Hour.
Introduction to contemporary Mexican social, cultural, and political institutions; discussion of Mexican university system; readings and discussion in Spanish and English. For preparation for study abroad program in Mexico.
Prerequisite: SPAN 101 or equivalent.

HISP 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual supervision of readings or assigned projects in Hispanic Studies, selected for each student individually.
Prerequisites: Approval of instructor and department head.

HISP 289 Special Topics In...
Credits 3. 3 Lecture Hours.
Selected topics in an identified area of Hispanic Studies. May be taken three times for credit.
Prerequisites: ENGL 104; freshman or sophomore classification; approval of department head.

HISP 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research in Hispanic Studies conducted under the direction of faculty member. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

HISP 325 Hispanic Literature and Film
Credits 3. 3 Lecture Hours.
The language of film, and film as fiction; the relationship between film and literature; films as expressions of cultural realities through the adaptation of Hispanic literary works; readings and lectures in English.

HISP 362/ENGL 362 Latino/a Literature
Credits 3. 3 Lecture Hours.
Survey of literature from the Spanish-speaking world in the U.S. written mostly in English; examination of historical and social contexts of cultural production; may include novels, poetry, short stories, plays, and films to gain understanding of aesthetic expression of diverse Latino/a authors, including but not limited to Mexican Americans, Puerto Ricans, Cuban Americans and Dominican Americans.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 362/HISP 362.

HISP 363 Borderlands: U.S. and Mexico
Credits 3. 3 Lecture Hours.
Multiple images of the U.S./Mexico border, their creation, their evolution, and their conflicting representations in filmic, literary and musical texts.
Prerequisites: ENGL 104 and junior or senior classification.

HISP 471/RELS 471 Hispanic Religions
Credits 3. 3 Lecture Hours.
Exploration of the history and practice of Hispanic religion, including spirit possession, evil eye, consumption of sacred substances, healing traditions, ex-votos, relics, prophecy, omens, monsters, astrology, witchcraft, the Inquisition, festivals, pilgrimage, mystics and religious contributions of diverse ethnic groups.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 471/HISP 471.

HISP 474/RELS 474 Diversity Lessons from Medieval Spain
Credits 3. 3 Lecture Hours.
Crucible of cultures--Christian, Jewish, and Muslim--that was medieval Spain and modern implications of that experience in diversity.
Prerequisites: ENGL 104 and junior or senior classification.
Cross Listing: RELS 474/HISP 474.

HISP 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual supervision of readings or assigned projects in Hispanic Studies, selected for each student individually.
Prerequisites: Junior or senior classification; approval of instructor and department head.

HISP 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of Hispanic studies. May be taken three times for credit.
Prerequisites: ENGL 104; junior or senior classification; approval of department head.

HISP 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research in Hispanic Studies conducted under the direction of faculty member. May be taken two times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
HIST - History (HIST)

HIST 101 Western Civilization to 1660
Credits 3.3 Lecture Hours.
(HIST 2311) Western Civilization to 1660. Ancient civilizations, Greek, Roman and Asian, Christianity; medieval civilization in west, eastern Europe; political, social and intellectual developments from earliest human cultures to 1660.

Credits 3. 3 Lecture Hours.
War and social change in Europe during the twentieth century; relationships between front lines and home fronts; government and civil society; gender and war; ethnic and national identities in Eastern, Central, and Western Europe.

Prerequisite: Junior or senior classification.

HIST 338 The Rise of the European Middle Class
Credits 3. 3 Lecture Hours.
Survey of European society and social classes from the origins of capitalism in the Middle Ages to the triumph of the ‘middle class world’ in the 19th century; rise of the middle class, development of bourgeois ideology and culture, and creation of the working class.

Prerequisite: Junior or senior classification.

HIST 339 Eastern Europe Since 1453
Credits 3. 3 Lecture Hours.
Eastern Europe from the fall of the Byzantine Empire to the present; the Ottoman, Habsburg, Russian and Soviet Empires; the origins of modern East European states.

HIST 341 Latin America to 1810
Credits 3. 3 Lecture Hours.
Political history of South America from exploration and settlement to independence; colonial institutions; commercial systems.

Prerequisite: Junior or senior classification.

HIST 342 Latin America Since 1810
Credits 3. 3 Lecture Hours.
Political history of independent South American nations since independence with emphasis upon ABC countries; economic, social and cultural development; foreign relations.

Prerequisite: Junior or senior classification.

HIST 343 Inter-American Relations
Credits 3. 3 Lecture Hours.
Cultural, diplomatic and economic relations in the Western Hemisphere in historical perspective.

Prerequisite: Junior or senior classification or approval of instructor.
HIST 344/AFST 344 History of Africa to 1800
Credits 3. 3 Lecture Hours.
Origins of humankind in Africa; development and spread of pastoralism, agriculture and iron-working; formation of states and empires; impact of Christianity and Islam; rise of international trade in gold, ivory and slaves; African diaspora.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 344/HIST 344.

HIST 345/AFST 345 Modern Africa
Credits 3. 3 Lecture Hours.
Survey of Africa since 1800; pre-colonial African states and societies; establishment and impact of European colonial rule; rise of nationalist movements; achievement of independence; problems of political stability and economic development in contemporary Africa; South Africa's apartheid regime and its opponents.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 345/HIST 345.

HIST 346/AFST 346 History of South Africa
Credits 3. 3 Lecture Hours.
Selected themes in the history of South Africa from the African Iron Age to the Apartheid regime; history of race relations in the 19th and 20th centuries and the rise of a modern industrial state.
Cross Listing: AFST 346/HIST 346.

HIST 347/RELS 347 Rise of Islam, 600-1258
Credits 3. 3 Lecture Hours.
Late-Antiquity; Pre-Islamic Arabia; the rise of Islam and a historical survey of the development of the Islamicate civilizations from c. 600 to the Mongol Conquests c. 1258 with an emphasis on politics, religion, society and culture.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 347/HIST 347.

HIST 348 Modern Middle East
Credits 3. 3 Lecture Hours.
Survey of the Middle East since 1800; introduction to Islam and Islamic civilization; decline of the Ottoman Empire; European imperialism; rise of nationalist movements; Zionism and the emergence of Israel; Arab-Israeli conflict; impact of oil; revolution in Iran and Islamic resurgence.
Prerequisite: Junior or senior classification.

HIST 349/ASIA 349 The Vietnam War/The American War
Credits 3. 3 Lecture Hours.
Vietnam's relations with the West; French colonialism; origins and development of Vietnamese nationalism; Cold War and American involvement; wartime societies in North and South Vietnam; expansion of the war to Cambodia and Laos; anti-war movements in the United States; reasons for American defeat; consequences and lessons of the war.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 349/HIST 349.

HIST 350/ASIA 350 World War II in Asia and the Pacific
Credits 3. 3 Lecture Hours.
Origins and development of Japanese imperialism; Japan's expansion into East and Southeast Asia and the Pacific; wartime societies; collaboration and resistance; effects of the war in the United States on Japanese-Americans; outcomes of the war; remembrance of the war.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 350/HIST 350.

HIST 352/ASIA 352 Modern East Asia
Credits 3. 3 Lecture Hours.
Impact of the West on traditional China and Japan; the response through modernization; rise of nationalism and formation of modern nation states.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 352/HIST 352.

HIST 353 Modern South Asia
Credits 3. 3 Lecture Hours.
Evolution of cultures, politics and societies in Indian sub-continent from c.1500 to present; rise and demise of empires (especially Mughal and British); anti-colonialism and emergence of nation states; social and cultural struggles and debates.
Prerequisite: Junior or senior classification.

HIST 356/ASIA 356 Twentieth Century Japan
Credits 3. 3 Lecture Hours.
Industrialization and modernization of Japan; its rise from an isolated nation to a major world power and economic giant.
Cross Listing: ASIA 356/HIST 356.

HIST 357/AFST 357 Out of Africa: The Black Diaspora and the Modern World
Credits 3. 3 Lecture Hours.
History and cultures of the peoples of the African Diaspora from the fourteenth through the nineteenth centuries; social, political, and economic impact on Africa, the Americas, Europe, and the Arab World; emphasis on race, gender, identity, and migration.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 357/HIST 357.

HIST 359 American Environmental History
Credits 3. 3 Lecture Hours.
History of American attitudes toward nature: use of land, water, timber, oil, coal, wildlife and other natural resources in the United States; conservation movement and significant conflicts over resources; changing perception of the physical environment.

HIST 360 History of Energy in America
Credits 3. 3 Lecture Hours.
Impact of energy upon industrial America; emphasis on relationship between energy and industrial development, emergence of state and federal energy policies, role of energy in foreign policy, growth of energy-oriented industries and impact of energy development on the environment.

HIST 361 Technology and Engineering in Western Civilization, 1400-Present
Credits 3. 3 Lecture Hours.
Man's material culture and his understanding of the physical world since the 15th century; role of the Renaissance and the Scientific, Agricultural and Industrial Revolutions in Europe; the resulting transformations in western civilization.

HIST 362 History of Science
Credits 3. 3 Lecture Hours.
The ideas of the great scientists and their impact on society; the Newtonian Revolution; Lavoisier and the new chemistry; Darwin and evolutionary thought; Enrico Fermi, Robert Oppenheimer and the development of nuclear energy.
HIST 363 History of Science in America
Credits 3. 3 Lecture Hours.
The major developments in the physical and life sciences from colonial times to the present; the lives and scientific contributions of such famous American scientists as Benjamin Franklin, Joseph Henry, Thomas Edison and J. Robert Oppenheimer.

HIST 364 History of Technology and Engineering in America, 1607-Present
Credits 3. 3 Lecture Hours.
American technological development from the colonial times to the present; technology in society, factors affecting technological development, changing attitudes toward technological accomplishments and the effects of technology upon society.

HIST 365/RELS 365 Religion in Early America
Credits 3. 3 Lecture Hours.
Religion in North America from colonial beginnings to eve of Civil War; relations between European Christianity, Native Americans and African Americans; religious pluralism, reform movements, social and political change.
Prerequisite: Junior or senior classification.
Cross Listing: RELS 365/HIST 365.

HIST 366/RELS 366 Religion in Modern America
Credits 3. 3 Lecture Hours.
Religion in America from the Civil War to contemporary period; relationship of religion and racial formation, capitalism, gender, sexuality, immigration; religious pluralism; evangelicalism; role of religious politics and social movements.
Prerequisite: Junior or senior classification.
Cross Listing: RELS 366/HIST 366.

HIST 367 Colonization of North America
Credits 3. 3 Lecture Hours.
Geographic setting; early English, French, Dutch, Swedish discovery, conquest and settlement, 1497-1763; colonial administration; colonial life; inter-colonial wars.

HIST 368 The Birth of the Republic, 1763-1820
Credits 3. 3 Lecture Hours.
Impact of French and Indian War; British colonial policy 1763-1775; War for Independence; Confederation crisis; Constitution-making and ratification; development of political parties; problem of foreign entanglements; War of 1812; conflict of nationalist and sectionalist tendencies; historiography and interpretation.

HIST 369 The United States, 1820-1860
Credits 3. 3 Lecture Hours.
Jacksonian democracy; impact of nationalism and sectionalism; manifest destiny and Mexican War; slavery controversy; expansion.

HIST 370 Civil War and Reconstruction
Credits 3. 3 Lecture Hours.
Survey of background and causes of the war; military, political, economic, and diplomatic aspects of the war; life behind the lines; Reconstruction and post-war adjustments, 1861-1877.

HIST 371 America in the Gilded Age, 1877-1901
Credits 3. 3 Lecture Hours.
The United States from 1877 to 1901; political, cultural and economic developments.

HIST 372 Reform, War and Normalcy: The United States, 1901-1929
Credits 3. 3 Lecture Hours.
Emergence of Progressivism; reform in the cities and states; reforms and foreign policies of the Theodore Roosevelt, William Howard Taft and Woodrow Wilson administrations; World War I and aftermath; Harding-Coolidge normalcy; the Jazz Age; Hoover and the Great Crash.

HIST 373 The Great Depression and World War II
Credits 3. 3 Lecture Hours.
The United States, 1929-1945; cultural, social, economic, and political developments in the nation; global diplomacy and military strategy; also taught at Galveston campus.

HIST 374 The United States After World War II
Credits 3. 3 Lecture Hours.
The United States since World War II; political, economic, cultural and social changes and role as a world leader; also taught at Galveston campus.

HIST 376 Great Scientists in History
Credits 3. 3 Lecture Hours.
History of fundamental scientific principles through biography; Galileo, Newton, Darwin, Mendel, Curie, Einstein, Pauling, and others.
Prerequisite: Junior or senior classification.

HIST 401 Slavery in World History
Credits 3. 3 Lecture Hours.
Comparative history of human slavery; slavery in the Ancient World, Asia, Africa; varieties of modern slavery in the New World since 1500; abolition of slavery and continuing forms of human bondage in the contemporary world.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 401 and ASIA 401.

HIST 402 Germany Since 1815
Credits 3. 3 Lecture Hours.
A survey of the unification of Germany; creation of the German Empire; Weimar Republic; rise and fall of Nazi Germany; and the role of Germany in international diplomacy.

HIST 404 Post 1945 Germanies
Credits 3. 3 Lecture Hours.
Examines Germany from the end of World War II to the end of the 20th century; includes political, social, cultural, and economic life in divided and occupied Germany; covers Germany since reunification in 1990.
Prerequisite: Junior or senior classification.

HIST 405 History of the Holocaust
Credits 3. 3 Lecture Hours.
History of the Nazi Holocaust; Third Reich; Jewish Ghetto life and concentration camps; role of the military, S.S. and German business; lessons and legacies; also taught at Galveston campus.

HIST 406 The Era of the French Revolution and Napoleon, 1715-1815
Credits 3. 3 Lecture Hours.
Origins and events of the French Revolution; Napoleon Bonaparte and the First Empire; social, economic, political and military developments in France and Europe.

HIST 407 History of France Since 1815
Credits 3. 3 Lecture Hours.
Nineteenth century Bourbon, Orleanist, Bonapartist and Republican regimes; France in World Wars I and II; De Gaulle and the role of France in the 20th century.
HIST 409 Youth in Modern Asia: Rebellions and Conformities
Credits 3. 3 Lecture Hours.
Twentieth century history of youth in Asia; social, cultural and political youth movements; roots of rebellions and conformities; colonialism and post-colonialism; war and anti-war movements; role of hippies, class and consumerism; femininity and masculinity; globalization and national identity; religion and morality; education; music.
Prerequisites: Junior or senior classification or approval of instructor.

HIST 410 Russian History to 1801
Credits 3. 3 Lecture Hours.
Origins and Christianization of Russia; establishment and decline of Kievan Rus’ state; Mongol conquest and domination of Russia; rise of Moscow, establishment of tsardom, expansion of state in sixteenth and seventeenth centuries; Peter the Great’s reforms; emergence of Russian Empire as a major power; era of Catherine the Great.

HIST 411 Imperial Russia 1801-1917
Credits 3. 3 Lecture Hours.
The last century of the autocratic Romanov dynasty and the social, intellectual, economic and political forces that ended it; political culture; society in transition, international affairs and revolutionary groups in an era of reform, counter-reform, reaction and industrialization.

HIST 412 Soviet Union 1917-1991
Credits 3. 3 Lecture Hours.
Political and social evaluation of the Soviet system; the Russian Revolution and consolidation of Bolshevik power; Civil War; power struggles among Lenin’s successors; Stalin’s industrial revolution, collectivization, and terror; Khrushchev’s de-Stalinization campaign, stagnation under Brezhnev; Gorbachev’s attempts at radical reform; the collapse of the Soviet Union.

HIST 416 Texas as Border Region
Credits 3. 3 Lecture Hours.
History of Texas since annexation; slavery and its aftermath; border cultures and identities; race and ethnicity; modernization and its discontents.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 418 Intellectual History from the Ancient Near East to the Early Middle Ages
Credits 3. 3 Lecture Hours.
Political, social, cultural and religious histories of significant figures, groups, schools of thought and movements in western Afro-Eurasia from the Assyrian Empire to the later Roman Empire; developments in political theory, literature, sociology, arts, architecture, music, philosophy, law, sciences and education.
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 418 and RELS 418.

HIST 419/RELS 419 Intellectual History, 500 to 1600
Credits 3. 3 Lecture Hours.
Political, social, cultural and religious histories of significant figures, groups, schools of thought and movements in western Afro-Eurasia from the rise of Islam to the Renaissance; developments in political theory, literature, sociology, arts, architecture, music, philosophy, law, sciences and education.
Prerequisite: Junior or senior classification.
Cross Listing: RELS 419/HIST 419.

HIST 420 European Intellectual History from the Enlightenment to 1900
Credits 3. 3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy in the 18th and 19th centuries.

HIST 421 European Intellectual History in the Twentieth Century
Credits 3. 3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from the turn of the century to the present.

HIST 425/RELS 425 The Sacred and Profane in History
Credits 3. 3 Lecture Hours.
Case studies of the sacred in varied times and regions; holy persons; holy places; holy objects; language and literature of the sacred; competing concepts of the holy within society; gender and the holy; institutions promoting holy people and places; the impact of social, political, cultural and intellectual developments on the relationship between the sacred and the profane.
Prerequisites: Junior or senior classification.
Cross Listing: RELS 425/HIST 425.

HIST 426/CLAS 426 The Ancient Greeks
Credits 3. 3 Lecture Hours.
Greek History and civilization from the Archaic Age to Alexander the Great (8th-late 4th century B.C.).
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 426/HIST 426.

HIST 427/CLAS 427 The Roman Republic
Credits 3. 3 Lecture Hours.
Major events and issues in Roman history from the beginnings of the Republic to its incipient disintegration.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 427/HIST 427.

HIST 428/CLAS 428 The Roman Empire: Principate
Credits 3. 3 Lecture Hours.
Major events and issues in Roman history from the late Republic to the consolidation of the state of Late Antiquity.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 428/HIST 428.

HIST 429/CLAS 429 The Roman Empire: Transformations
Credits 3. 3 Lecture Hours.
Major events and issues in Roman history from the rise of Christianity as an imperial religion to the end of Late Antiquity.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 429/HIST 429.

HIST 431 The Kingdom of Ireland, 1541-1800
Credits 3. 3 Lecture Hours.
History of Ireland from the mid sixteenth century through the end of the eighteenth century; impact of religion, politics, warfare, land disputes, famine, and international developments; creation of the United Kingdom.
Prerequisite: Junior or senior classification.

HIST 432 The Nation of Ireland, 1800 to the Present
Credits 3. 3 Lecture Hours.
History of Ireland from the creation of the United Kingdom through the end of the twentieth century; British-Irish relations; agrarian unrest and violence; famine; political, cultural, and religious developments.
Prerequisite: Junior or senior classification.

HIST 435 Sixteenth-Century Britain
Credits 3. 3 Lecture Hours.
Changes in social, cultural, economic, political and religious institutions and organization; growth of the nation state; the ‘new monarchy’; Reformation and religious settlement; international relations; inflation and social dislocation; the role of Parliament.
HIST 436 Seventeenth-Century Britain
Credits 3. 3 Lecture Hours.
Social, political, economic, cultural and religious developments, Puritanism and the Revolution of the 1640s, the Restoration, establishment of constitutional monarchy after 1688, Great Britain’s rise as an imperial power.

HIST 437 Eighteenth Century Britain
Credits 3. 3 Lecture Hours.
Political, social, economical, intellectual, cultural, and imperial history of Great Britain in the eighteenth century.
Prerequisite: Junior or senior classification.

HIST 438 Nineteenth Century Britain
Credits 3. 3 Lecture Hours.
Political, social, economic, cultural, intellectual and military history of Great Britain from 1815 to 1914.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 439 Twentieth Century Britain
Credits 3. 3 Lecture Hours.
Constitutional, political, economic, military, social and cultural history of Great Britain since 1900.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 440 World War II
Credits 3. 3 Lecture Hours.
Origins; military campaigns in Europe, North Africa, Asia, and the Pacific; European, Japanese, Asian, and American home fronts; collapse of Germany; atomic warfare; legacies.
Prerequisite: Junior or senior classification.

HIST 441 History of Mexico, 1821 to the Present
Credits 3. 3 Lecture Hours.
Political, economic and social development of Mexico since independence and her relation to other world powers.

HIST 442 World War II
Credits 3. 3 Lecture Hours.
Examination of the causes and consequences of revolutionary activity, battlefields and homefronts during the War for Independence; social, political and economic impact of the Revolution on diverse peoples and communities both in the new United States and abroad; historical memory of the American Revolution.
Prerequisite: Junior or senior classification.

HIST 443 American Military History to 1901
Credits 3. 3 Lecture Hours.
American military experience from colonial days to 1901; causes, nature and effect of the wars in which the United States has participated.

HIST 444 American Military History Since 1901
Credits 3. 3 Lecture Hours.
American military experience from 1901 to present; causes, nature and effect of wars in which the United States has participated; effect of war on American history.

HIST 445 History of Military Strategy
Credits 3. 3 Lecture Hours.
Military thought and theory, 1700 to the present.
Prerequisite: Junior or senior classification.

HIST 446 Law and Society in the United States through Reconstruction
Credits 3. 3 Lecture Hours.
How political and social conditions in American history have produced fundamental constitutional principles, changes and practices; historical evolution of written and unwritten Constitution; state law, legal theory, legal profession and private law through the Civil War and Reconstruction.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 447 Law and Society in the United States through Reconstruction
Credits 3. 3 Lecture Hours.
Analysis of themes in American legal and constitutional history since 1865; examination of social, cultural, and political context surrounding major Supreme Court decisions; social impact of laws and Supreme Court decisions; investigation of legal activities such as moot court and amicus curiae briefs.
Prerequisites: Junior or senior classification.

HIST 449 History of Brazil, 1822 to the Present
Credits 3. 3 Lecture Hours.
Focus on parts of North America where slavery dominated the economy, politics and demographics; experiences of native, African and European-descended peoples in such regions from the colonial period to the end of slavery; debates about geographical and cultural roots of regional identities.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 450 Southern Identities and Cultures Since Reconstruction
Credits 3. 3 Lecture Hours.
Focus on parts of North America where slavery dominated the economy, politics and demographics; experiences of native, African and European-descended peoples in such regions from the colonial period to the end of slavery; debates about geographical and cultural roots of regional identities.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 451 Southern Identities and Cultures through Reconstruction
Credits 3. 3 Lecture Hours.
Focus on the aftermath of slavery and defeat in those parts of North America where slavery dominated the economy, politics and demographics; transformations in race, culture and politics in such regions and emergence of new identities since Reconstruction; debates over the geographic and cultural roots of the American South.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 452 The American Revolution
Credits 3. 3 Lecture Hours.
The causes and consequences of revolutionary activity, battlefields and homefronts during the War for Independence; social, political and economic impact of the Revolution on diverse peoples and communities both in the new United States and abroad; historical memory of the American Revolution.
Prerequisite: Junior or senior classification.

HIST 453 The American Frontier
Credits 3. 3 Lecture Hours.
Westward movement; patterns of westward expansion, pioneer settlement, the West in diplomacy and influence of frontier on American life and institutions.

HIST 454 The History of the American City
Credits 3. 3 Lecture Hours.
History of American Cities; a social, economic and political study of industry, labor and immigration; development of a metropolitan society.

HIST 455 History of the American City
Credits 3. 3 Lecture Hours.
History of American agricultural development from the Revolutionary period to the present; technological developments, major farm industries, labor, regional development, farm movements and farm programs.

HIST 456 American Agricultural History
Credits 3. 3 Lecture Hours.
History of childhood and family in American history; examination of how region, race, ethnicity, class and gender shape children’s and the family’s experiences; consideration of how social, cultural, economic, and political structures shape ideas about and activities of children and families in America.
HIST 459 American Society and Culture to 1877  
Credits 3. 3 Lecture Hours.  
Century of social and political thought, religion, science, scholarship and education in the United States.

HIST 460 American Society and Culture Since 1877  
Credits 3. 3 Lecture Hours.  
Continuation of HIST 459 from 1877 to the present.

HIST 461/WGST 461 History of American Women  
Credits 3. 3 Lecture Hours.  
Cultural, political, legal and religious factors that helped shape the role and character of women in American society from colonial times to the present; historical role of women in the development of the nation.  
Cross Listing: WGST 461/HIST 461.

HIST 462 American Foreign Relations to 1913  
Credits 3. 3 Lecture Hours.  
History of U.S. foreign relations and policies to 1913.  
Prerequisite: Junior or senior classification or approval of instructor.

HIST 463 American Foreign Relations Since 1913  
Credits 3. 3 Lecture Hours.  
History of U.S. foreign relations and policies since 1913.  
Prerequisite: Junior or senior classification or approval of instructor.

HIST 464 International Developments Since 1918  
Credits 3. 3 Lecture Hours.  
General survey of world politics since close of World War I; problems and ideologies of great powers of Europe and factors and conditions which explain present political tendencies and policies.

HIST 468/LMAS 468 Latinx Civil Rights Movements  
Credits 3. 3 Lecture Hours.  
Latinx civil rights movements in the twentieth century; Mexican American, Puerto Rican, Cuban, Central American; racism, economic inequality, labor exploitation, segregation, anti-immigrant sentiment, gender discrimination; role of liberalism, multiethnic coalitions, third world liberation movements, revolutionary nationalism, religion; movement philosophies and strategies; contemporary immigrant rights movements.  
Prerequisites: Junior or senior classification or approval of instructor.  
Cross Listing: LMAS 468/HIST 468.

HIST 469 History of Collective Protest and Violence  
Credits 3. 3 Lecture Hours.  
Examination of collective protest and violence on a case study basis and in comparative and historical context; emphasis on causes, the nature of participation, assumptions and goals, and the character of repression.  
Prerequisite: Junior or senior classification.

HIST 470 American Business History  
Credits 3. 3 Lecture Hours.  
Management strategy and structure of the modern corporation in 19th and 20th century America and the corporation's changing roles in American society.

HIST 473/WGST 473 Women's History in the Modern U.S.  
Credits 3. 3 Lecture Hours.  
History of women in the U.S. from the late nineteenth century to the present; role of intersectionality in defining the experience of modern womanhood; women as activists, workers, consumers, mothers, and feminists; experiences, lives and influence of women of color; examination of contemporary social, political and economic histories.  
Prerequisite: Junior or senior classification or approval of instructor; HIST-473 also taught at Galveston campus.  
Cross Listing: WGST 473/HIST 473.

HIST 474 Topics in Historical Ethnical Conflict  
Credits 3. 3 Lecture Hours.  
Analysis of a specific instance of historical ethnic conflict; examination of the social, political, religious, and economic factors contributing to that historical conflict; discussion of structural factors influencing ethnic, national and other group efforts to advance claims to separate identity and self-government; case study will vary by semester.  
Prerequisite: Senior classification.

HIST 475 Empire and History  
Credits 3. 3 Lecture Hours.  
Empires in their formative, medieval, early modern and modern periods within a comparative framework with a case-study approach; geographic range varies; politics, religion, culture, literature, arts, economics, environment, race, gender, identity formation, technology, class, medicine, sciences, philosophy, labor, violence, agriculture, immigration, slavery, diplomacy and industrialization. May be taken 3 times for credit.  
Prerequisite: Junior or senior classification.

HIST 477/WGST 477 Women and Gender in Modern European History  
Credits 3. 3 Lecture Hours.  
Women in Europe from the 18th century to the present: women's contributions to their societies; realities of their daily lives and their responses; perceptions of women; role of institutions in defining women's roles; significance for women of industrialization, revolution, warfare, scientific discoveries; interaction of class, race and gender.  
Cross Listing: WGST 477/HIST 477.

HIST 481 Seminar in History  
Credits 3. 3 Lecture Hours.  
Literature of an issue, event, period or people in history; use of primary source materials connected with the field of the seminar; problems of bibliography, historiography and historical method; and experience in writing.  
Prerequisite: 21 credits of history, 9 of which must be 300-level or above.  
Open to senior history majors or with instructor's approval.

HIST 485 Directed Studies  
Credits 0 to 3. 0 to 3 Other Hours.  
Selected fields of history not covered in depth by other courses. Reports and extensive reading required.  
Prerequisite: Approval of department head; also taught at Galveston campus.

HIST 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of history.

HIST 491 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research conducted under the direction of faculty member in history.  
Prerequisites: 24 hours if history, with 12 or more at 300-level or above; junior or senior classification and approval of instructor.
HIST 497 Independent Honors Studies  
Credits 1 to 3. 1 to 3 Other Hours.  
Directed independent studies for upper division Honors students, regardless of academic major, in selected aspects of history.  
Prerequisites: Junior or senior classification either as Honors student or with overall GPR of 3.25 and letter of approval from head of student’s major department and approval of head, Department of History.

HLTH - Health (HLTH)

HLTH 210 Introduction to the Discipline  
Credits 3. 3 Lecture Hours.  
Concepts essential to understanding the discipline: competencies and career opportunities for professional health educators in school and community settings.  
Prerequisites: Current health major.

HLTH 214/KINE 214 Health and Physical Activity for Children  
Credits 3. 3 Lecture Hours.  
(PHED 1331) Health and Physical Activity for Children. Coordinated school health and physical activity programs appropriate for elementary aged children; focus on the content of the curriculum and the philosophical underpinnings of programming related to health and physical activity.  
Cross Listing: KINE 214/HLTH 214.

HLTH 216 First Aid  
Credits 2. 2 Lecture Hours.  
(PHED 1306) First Aid. Basic first aid instruction leading to University Level, first aid course completion recognition.

HLTH 221 Safety  
Credits 3. 3 Lecture Hours.  
The magnitude of the accident problem as it relates to individual and community well-being; promotion of safe behavior.

HLTH 222 Concepts in Peer Health Education  
Credits 3. 3 Lecture Hours.  
Preparation as peer educators and campus community leaders; experiential learning; includes various health topics, program development, presentation and public speaking, communication and group facilitation.

HLTH 231 Healthy Lifestyles  
Credits 3. 3 Lecture Hours.  
(PHED 1304) Healthy Lifestyles. Health issues relevant to students; included are mental health, use and abuse of drugs, human sexuality, communicable diseases, environmental and consumer health.

HLTH 236 Introduction to Health Disparities and Diversity  
Credits 3. 3 Lecture Hours.  
Explore in-depth the racial, ethnic, and cultural dimensions that underlie health and health disparities; emphasis on culture, social economic status and governmental policies as they influence the adaptation of health practices.

HLTH 240/KINE 240 Computer Technology in Health and Kinesiology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Application of current technology in the areas of health and kinesiology; fundamentals of computers and their use; application of commercial software to health and kinesiology settings; use of computer networks for communications and research.  
Prerequisite: Freshman or sophomore classification in health or kinesiology.  
Cross Listing: KINE 240/HLTH 240.

HLTH 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Work on a specified topic with the intent of promoting independent reading, research and study; supplement existing course offerings or subjects not presently covered.  
Prerequisites: Freshman or sophomore classification; approval of instructor.

HLTH 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in health. May be repeated 4 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

HLTH 331 Community Health  
Credits 3. 3 Lecture Hours.  
Aspects of the community that relate to health; identification and analysis of community health programs; organizational pattern and functions of voluntary and governmental health agencies; organizing the community for health action; and coordination of school and community health programs.  
Prerequisite: Grade of C or better in HLTH 231 or concurrent enrollment.

HLTH 332 School Health Program  
Credits 3. 3 Lecture Hours.  
Background, development, administration and framework of the school health program; role of the school health team; nature and function of school health services and healthful school living.  
Prerequisite: Grade of C or better in HLTH 210, HLTH 231, HEB 222/KNFB 222, BIOL 319, and BIOL 320, junior classification.

HLTH 333 Spirituality and Health  
Credits 3. 3 Lecture Hours.  
Exploration of the relationship between spirituality, religion, health, health education and spiritual health; identification of techniques to measure spiritual health/wellness and enlighten healthcare professionals to the role spiritual health plays in healing; identification of spirituality topics important to health care professionals.  
Prerequisite: Grade of C or better in HLTH 231, HLTH 331, or approval of instructor.

HLTH 334 Women's Health  
Credits 3. 3 Lecture Hours.  
A broad range of health issues that are either unique to women or of special importance to women; information for the health consumer; preparation as an advocate of healthy lifestyles; awareness of the role health plays in the life of all women.  
Prerequisite: Junior or senior classification.

HLTH 335 Human Diseases  
Credits 3. 3 Lecture Hours.  
Causes of disease, course of communicable disease, body’s defense against disease and classification and description of diseases.  
Prerequisite: Grade of C or better in BIOL 319, BIOL 320, HLTH 210, HLTH 231, and HLTH 240/KINE 240.

HLTH 342 Human Sexuality  
Credits 3. 3 Lecture Hours.  
Many aspects of human sexuality; physiology and function of human reproductive system, factors involved in learning sex roles, biological and emotional motivations associated with the sexual aspects of life and their relationship to marriage and family planning.
HLTH 353 Drugs and Society
Credits 3.3 Lecture Hours.
Use and abuse of drugs in today's society; physiological, sociological and psychological factors involved.
Prerequisite: Grade of C or better in BIOL 319, BIOL 320, HLTH 210, HLTH 231, and HLTH 240/KINE 240.

HLTH 354 Medical Terminology for the Health Professions
Credits 3.3 Lecture Hours.
Designed for students interested in pursuing a career in a health, medical, scientific or other helping profession; develop medical word power skills combined with related health and disease knowledge.
Prerequisite: Junior or senior classification.

HLTH 403 Consumer Health
Credits 3.3 Lecture Hours.
#Selection, evaluation and understanding of health information, medical services, advertising of products and sociocultural factors in consumer health protection.
Prerequisite: Junior or senior classification.

HLTH 405 Rural Health
Credits 3.3 Lecture Hours.
Issues facing rural health care; emphasis on understanding the geographical characteristics of rural communities and their affect on health care delivery.
Prerequisites: Grade of C or better in HLTH 331; junior or senior classification.

HLTH 407 Global Health
Credits 3.3 Lecture Hours.
Overview of global health issues; synthesis of historical, cultural, environmental, economic and political perspectives; gathering and understanding international health statistics; cultural, social and political impacts on health and health care behaviors; clinical and population-based approaches to health management and illness resolution; ethical issues implicit in conducting health research; private and public agency relief strategies; opportunities for employment in international health.
Prerequisites: Grade of C or better in HLTH 210, HLTH 231, HLTH 240/KINE 240, BIOL 319, BIOL 320 and COMM 203; grade of C or better in ENGL 103 or ENGL 104.

HLTH 410 Worksite Health Promotion
Credits 3.3 Lecture Hours.
Careful examination of strategies to design, implement and evaluate exercise and health programs in worksites; including health risk assessment, marketing protocol, needs assessment, corporate culture issues, policy development and cost-benefit analysis.
Prerequisite: Grade of C or better in HLTH 210, HLTH 231, HLTH 240/KINE 240, BIOL 319, BIOL 320, and COMM 203; grade of C or better in ENGL 103 or ENGL 104.

HLTH 415 Health Education Methodology
Credits 3.3 Lecture Hours.
Theory and practice in the development and use of creative and traditional health education strategies in secondary schools and community settings; emphasis is given to cognitive, affective and behavioral teaching strategies.
Prerequisites: Grade of C or better in HLTH 210, HLTH 222, HLTH 231, HLTH 240/KINE 240, HLTH 331, BIOL 319, BIOL 320, and COMM 203; grade of C or better in ENGL 103 or ENGL 104; senior classification.

HLTH 421 Elementary School Health Instruction
Credits 3.3 Lecture Hours.
Modern issues, trends, content and material in elementary school health programs; research and instructional strategies essential for reading in content areas with an emphasis on developing the coordinated school health education for health and kinesiology teacher certification majors.
Prerequisite: Grade of C or better in HLTH 210, HLTH 231, HEFB 222/KNFB 222, HEFB 324/KNFB 324, BIOL 319, and BIOL 320; junior classification.

HLTH 425 Health Program Evaluation
Credits 3.3 Lecture Hours.
Theory and practice in evaluation of health programs in school and community; analysis of test results; evaluation of standardized health tests.
Prerequisites: Grade of C or better in HLTH 210, HLTH 222, HLTH 231, HLTH 240/KINE 240, HLTH 331, BIOL 319, BIOL 320, and COMM 203; grade of C or better in ENGL 103 or ENGL 104; senior classification and approved acceptance to field experience.

HLTH 429 Environmental Health
Credits 3.3 Lecture Hours.
Health aspects of environments; health problems related to water, air and noise pollution; pesticides; population and radiation; examination of various micro-environments which either promote or hinder human health and well-being and their implications for community planning and utilization of human resources.
Prerequisite: Junior or senior classification.

HLTH 440 Contemporary Issues for Community Health Interns
Credits 3.3 Lecture Hours.
Preparatory course for advanced students in the community health internship program.
Prerequisite: Grade of C or better in HLTH 210, HLTH 222, HLTH 231, HLTH 240/KINE 240, HLTH 331, BIOL 319, BIOL 320, and COMM 203; grade of C or better in ENGL 103 or ENGL 104; acceptance to internship program.

HLTH 445 Professional Practice in Health Education
Credits 2.2 Lecture Hours.
Information, perspectives and skills to promote health and quality of life effectively in community, school, workplace and health-care settings; boundary-crossing partnerships across health disciplines; the role of collaborative efforts to better meet community health needs.
Prerequisites: Admission to professional phase of program; junior or senior classification.

HLTH 481 Seminar in Allied Health
Credit 1.1 Lecture Hour.
Admission to allied health professional school and/or careers; research on selected allied health fields, discussion of transition from college environment to professional school/career environment including professional development. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Junior or senior classification.

HLTH 482 Grant Writing in Health
Credit 1.1 Lecture Hour.
A writing intensive course focused on grant writing in the field of health education and health promotion; grant application written by student on a health-related topic using a recursive writing process. May be taken two times for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Grade of C or better in HLTH 210, HLTH 231, HLTH 240/KINE 240, BIOL 319, BIOL 320, and COMM 203; grade of C or better in ENGL 103 or ENGL 104.
HLTH 484 Community Health Internship  
Credits 0 to 12. 0 to 12 Other Hours.  
Supervised internship at selected community, public or private health agencies.  
Prerequisites: Grade of C or better in HLTH 415, HLTH 425, and HLTH 440; completion of all coursework.

HLTH 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed study of special problems within the discipline.  
Prerequisites: Junior or senior classification; approval of instructor.

HLTH 489 Special Topics in...  
Credits 0 to 4. 0 to 4 Lecture Hours.  
Selected topics in an identified area of the discipline. May be repeated for credit.

HLTH 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in health. May be repeated 4 times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

HORT - Horticultural Sciences (HORT)

HORT 201 Horticultural Science and Practices  
Credits 3. 3 Lecture Hours.  
(AGRI 1315, AGRI 1415*, HORT 1301, HORT 1401*) Horticultural Science and Practices. Structure, growth and development of horticultural plants from a practical and scientific approach; environmental effects, basic principles of propagation, greenhouse and outdoor production, nutrition, pruning and chemical control of growth, pest control and branches of horticulture.

HORT 202 Horticultural Science and Practices Laboratory  
Credit 1. 3 Lab Hours.  
(HORT 1101, AGRI 1115, HORT 1401*, AGRI 1415*) Horticultural Science and Practices Laboratory. Methods and practices related to production of horticultural crops; practical exercises in greenhouse and field.  
Prerequisite: HORT 201 or registration therein.

HORT 203 Floral Design  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Principles of design illustrated with the use of floral materials; floral design elements and techniques including color, form, line and texture; history and utilization of floral art in society.

HORT 281 Horticulture as a Profession  
Credit 1. 1 Lecture Hour.  
Comprehensive view of the opportunities in the art and science of horticulture; sub-disciplines by crop (fruit, vegetable, ornamental, floral) and approach (landscape production, sales, management, floral design, research); examination of the national and international scope of horticulture including the major horticultural regions in Texas; construction of a professional e-portfolio.

HORT 291 Research  
Credits 1 to 3. 1 to 3 Other Hours.  
Research conducted under the direction of faculty member in horticulture. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

HORT 301 Garden Science  
Credits 3. 3 Lecture Hours.  
Identification, propagation, soil management, fertilization, growth control and protection of common garden plants: indoor ornamentals, landscape ornamentals, fruits and vegetables; special topics include home landscaping, container gardens, bonsai, herbs and medicinal plants and hobby greenhouse management. The effects of organic and non-organic practices on the garden ecosystem.

HORT 302 Garden Science Lab  
Credit 1. 3 Lab Hours.  
Practical activities in identification, propagation, fertilization, media preparation, soil management, irrigation and protection of indoor ornamentals, landscape ornamentals, fruits and vegetables common in gardens in Texas. Organic and non-organic methods.

HORT 306 Trees and Shrubs for Sustainable Built Environments  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Better known woody ornamental trees and shrubs; identification, morphology, classification, nomenclature and adaptability for use in landscape environments.  
Prerequisite: BIOL 101, BIOL 111, BIOL 113, HORT 201, HORT 301, LAND 101, or RENR 205, or approval of instructor.

HORT 308 Plants for Sustainable Landscapes  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Identification and use of indigenous and introduced landscape plants; plants for special uses in urban environments; emphasis on plants' ornamental attributes, cultural requirements, and adaptability in urban and suburban environments.  
Prerequisite: BIOL 101, BIOL 111, BIOL 113, HORT 201, HORT 301, LAND 101, or RENR 205, or approval of instructor.

HORT 315 Issues in Horticulture  
Credits 3. 3 Lecture Hours.  
Analysis of contemporary economic, technological, environmental, human resource, and regulatory issues that impact the way global horticultural firms compete; emphasis on problem recognition and analysis of managerial decisions by firms throughout the entire horticultural supply chain.  
Prerequisites: HORT 201 and HORT 202.

HORT 319 Fruit and Nut Production  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Rootstocks, cultivars, identification, site selection, pollination, pruning, fruit thinning, dormancy, orchard culture management, irrigation, pest control, harvesting and post harvest physiology of temperate fruit and nut species.  
Prerequisite: HORT 201.

HORT 325 Vegetable Crop Production  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Origin, nutritive value, economic importance, botany and cultural practices of the major vegetable crops. Lab activities include organic and non-organic production of major vegetable crops.

HORT 326 Plant Propagation  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Principles, practices and techniques followed in the sexual and asexual propagation of horticultural plants: seed technology and seed propagation, rooting and propagation of cuttings, graftage and budding systems, layering and propagation by specialized plant structures, biotechnology and tissue culture systems for micropropagation.
HORT 328 Wild Edible, Cultivated and Poisonous Herbs
Credits 3. 3 Lecture Hours.
Identification, reported uses and cultivation of popular garden herbs, historically useful herbs and wild edible and poisonous herbs; the history of phytomedicinal herbs and the role of horticulture in the advent of select modern pharmaceuticals and nutraceuticals; native Texas wild edible and culturally-useful herbs; reported uses and efficacy of essential oils of herbal plants; propagation and production of cultivated herbs and wild edible plants.
Prerequisites: HORT 201 or approval of instructor.

HORT 332 Horticulture Landscape Graphics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Graphic representation of landscape design; demonstrations of technique; examination of drawing examples and drawing production; basic hand graphics techniques for visual-thinking and presentation-quality landscape drawings.
Prerequisite: Junior or senior classification.

HORT 335 Sociohorticulture
Credits 3. 3 Lecture Hours.
Horticulture as it relates to humans through people-plant interactions; use of horticulture to improve quality of life; awareness and appreciation of the economic, environmental, social and health benefits of plants.
Prerequisite: Junior classification.

HORT 360 Landscapes of Sustainable Built Environments
Credits 3. 3 Lecture Hours.
Construction and maintenance considerations for landscapes in urban sustainable environments, specifically green roofs, bioretention cells, rain gardens, and living walls; how to maximize benefits of each system, current trends in regulatory and permitting processes of green infrastructure, and the development of industry-wide guidelines versus standards.
Prerequisites: Grade of C or better in HORT 201 or concurrent enrollment, or junior or senior classification.

HORT 400 Field Studies in Horticulture
Credits 1 to 3. 1 to 9 Other Hours.
History of garden design and the development of the field of Ornamental Horticulture; designs of famous designers Capability Brown and Gertrude Jekyll; pastoral and formal design themes; plant selection and placement from an artistic and functional design perspective; European manipulation of plant form.
Prerequisites: HORT 201 or HORT 301 and approval of instructor.

HORT 404/GENE 404 Plant Breeding
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of genetics and other sciences to breeding and improvement of horticultural crops; methods and special techniques employed. Offered in even numbered years. Only one of the following will satisfy the requirements for a degree: HORT 404/GENE 404 and SCSC 304.
Prerequisite: HORT 201, SCSC 205, or GENE 302, or approval of instructor.
Cross Listing: GENE 404/HORT 404.

HORT 416 Understanding Wine: From Vines to Wines and Beyond
Credits 3. 3 Lecture Hours.
Facets of wine in the United States and around the world; the history of wine, grape growing and winemaking, types of wine, wine etiquette, beer and spirits, sensory evaluation, wine marketing, and winery tasting room and event management.
Prerequisites: Must be 21 years of age; junior senior classification.

HORT 418 Nut Culture
Credits 3. 3 Lecture Hours.
Orchard management, native grove development, cultivars, fruit setting, soils, nutrition, propagation, pest control, harvesting, shelling, storage and marketing of temperate tree nut crops grown in the U.S. with major emphasis on pecans. Offered in odd numbered years.
Prerequisite: HORT 319 or approval of instructor.

HORT 419 Viticulture and Small Fruit Culture
Credits 3. 3 Lecture Hours.
Classic wine grape culture in Europe and U.S. are taught; influence of climate, soil, cultivar, rootstock, canopy and management is presented; nutrition, water, spacing, trellis, pruning, IPM and harvest are integrated for quality yields; culture of muscadines, berries, figs and persimmons are taught. Offered in even numbered years.
Prerequisite: HORT 319 or approval of instructor.

HORT 420 Concepts of Wine Production
Credits 3. 3 Lecture Hours.
Basic wine grapes of the world and where they are produced; evaluation of wine style and quality through formal laboratory tastings.
Prerequisites: HORT 201 or NFSC 201; must be 21 years of age; junior or senior classification.

HORT 421 Enology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Provides a basic understanding of each step of the wine making process; emphasis on home and small scale commercial wine production as related to Texas conditions.
Prerequisites: Must be 21 years of age; junior or senior classification.

HORT 423 Tropical Horticulture
Credits 3. 3 Lecture Hours.
Production, processing and marketing of coffee, bananas, cacao, mango, cashew, pineapple, coconut and root and tuber crops; recent significant developments in plant breeding and cultural practices. Offered in odd numbered years.
Prerequisites: HORT 201 or approval of instructor.

HORT 424 Horticulture as a Medium for Creative Expression
Credits 3. 3 Lecture Hours.
Horticultural plants used in gardens and other art forms throughout world history with particular emphasis given to those horticultural plants represented in Italian landscapes and gardens; characteristics of historical art periods and how to 'read' and interpret historical gardens; identification of plants in various art forms; appreciation for the enjoyment of plants in daily life and how to nurture and care for plants; production and marketing of horticultural plants and flowers in Europe.
Prerequisites: Junior or senior classification; or approval of instructor.

HORT 425 Landscape Maintenance and Construction
Credits 3. 3 Lecture Hours. 3 Lab Hours.
Principles and practices of grading, drainage and construction of residential and small commercial landscapes; cost and bid estimation; soil preparation; transplanting operations; control of landscape diseases and pests; maintenance of landscape areas.
Prerequisite: HORT 201 or approval of instructor.
HORT 426 International Floriculture Marketing  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Importance, cost, and opportunities in marketing floral products, fresh cut flowers, flowering potted plants, foliage plants, and bedding/garden plants; topics include: world production areas, economic value, species grown, marketing channels, retail environments, current/future consumers, postharvest handling, promotion/advertising, perceived/added value, marketing trends and employment opportunities.  
Prerequisites: HORT 201; junior or senior classification.  

HORT 428 Greenhouse Technology & Sustainable Crop Production Systems  
Credits 3. 3 Lecture Hours.  
Greenhouse Technology & Sustainable Crop Production Systems.  
Technology used to operate and manage energy efficient greenhouses for sustainable production of crops; greenhouse structures, equipment and automation; heating, cooling and ventilating systems; environmental computerized controls; environmental inputs as they affect plant physiological processes and influence plant growth and development including temperature and light, root substrates, water quantity and quality, irrigation efficiency, fertilization sources and integrated pest management; sustainable crop production systems and practices for hydroponics, plug production, photoperiodic crops, vernalization and lighting technology to produce vegetative and reproductive plant products; scheduling, controlling growth, harvesting and marketing practices for commercially important, high quality, high value crops.  
Prerequisite: HORT 201, junior or senior classification, or approval of instructor.  

HORT 429 Floriculture Crop Production  
Credits 3. 3 Lecture Hours. 2 Lab Hours.  
Production of floriculture crops in the greenhouse environment; scheduling and controlling crop growth for target market periods; specific flowering crops will be used as models to demonstrate potted flowering plant, cut flower, and garden plant production systems; hands-on crop production experience in lab.  
Prerequisite: HORT 201 or approval of instructor.  

HORT 431 Nursery Production and Management  
Credits 3. 3 Lecture Hours. 2 Lab Hours.  
Container, field and protected culture production of ornamental nursery plants (shrubs, trees, ground covers, bedding plants and herbaceous perennials); retail and wholesale nursery-site selection and development, financing, niche-marketing, personnel and labor management; wholesale nursery production cycles and systems, storage and shipping.  

HORT 432 Horticulture Landscape Design  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Application of the principles and elements of design to planning and developing both exterior residential landscape designs and interior commercial designs  
Prerequisites: HORT 332 or concurrent enrollment; HORT 306 or concurrent enrollment, or HORT 308; or approval of instructor.  

HORT 435 Urban Horticulture  
Credits 3. 3 Lecture Hours.  
Introduction to urban horticulture and its role in community development and well-being; emphasis on career opportunities and the roles of the urban horticulture programmer. Offered in odd numbered years.  
Prerequisite: Junior or senior classification.  

HORT 440 International Horticulture  
Credits 3. 3 Lecture Hours.  
Examines the source of horticultural commodities; shows how geography, culture, politics, and history influence our markets, gardens and kitchens; educates students on interpreting different garden styles.  
Prerequisites: HORT 201 or HORT 301 and approval of instructor.  

HORT 442 Horticulture Landscape Design II  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Computer-aided-drafting (CAD) to produce site layout, grading and planting plan, and construction details for small-scale landscape design; advanced design principles and practices in their historical context, includes design and drafting of hardscape details, manipulation of earth forms, ecological urban park design to traditional garden design.  
Prerequisites: HORT 432; HORT 306 or HORT 308, or concurrent enrollment, or approval of instructor.  

HORT 450 Processing Coffee and High-Value Horticultural Crops  
Credits 3. 3 Lecture Hours.  
Examination of the principles behind coffee processing and other high-value food crops including cultivation; different unit processing operations; methods for preservation; packaging and marketing strategies; and a processing plant visit.  
Prerequisite: Junior or senior classification or approval of instructor.  

HORT 451 Retail Floristry  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Principles of floral design in a commercial shop enterprise; aspects of design in vase arrangements, personal flowers, sympathy flowers and flowers for special occasions; production costs and profit analysis, selling techniques and customer relations; term project required.  
Prerequisite: HORT 203 or approval of instructor.  

HORT 452 Floral Design: Weddings and Personal Flowers  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Basic principles of floral design as applied to wedding work; design principles and mechanics as applied to corsages, headpieces, hand bouquets and ceremony and reception decorations; history of wedding traditions; selling and pricing weddings.  
Prerequisite: HORT 203 or HORT 451 or approval of instructor.  

HORT 453 Floral Art  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Advanced study of floral design as an art form in contrast to a commercial florist operation; interpretive expression of design principles and color stressed along with international design styles.  
Prerequisites: HORT 203.  

HORT 454 Special Event Design and Production  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Role of event planners, production managers, designers, and decorators within traditional event management practices; analyze how artistic components are used in visual styling to achieve a specific purpose; impact of collaborative planning, effective research, and strong communication skills, social psychological and economic influences as they relate to event planning.  
Prerequisite: Junior or senior classification.  

HORT 460 Landscape Estimating, Bidding, and Operations  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Landscape estimating, bidding and sales processes; business structures, insurance and bonding requirements and business management; overhead costing structures and management; case study involves bidding from a set of landscape plans and specifications.  
Prerequisites: Junior or Senior classification.
HORT 481 Seminar
Credits 2. 2 Lecture Hours.
Advanced preparation for the transition from college to the work environment including career investigation, presentation techniques and practice, resume and e-portfolio preparation, and professional development and career advancement; required of all senior students in horticulture.
Prerequisite: Junior or senior classification.

HORT 484 Internship
Credits 1 to 9. 1 to 9 Other Hours.
On-the-job experience program in the student's area of horticultural specialization. May be taken three times for credit.
Prerequisites: Sophomore, junior or senior classification; approval of instructor; 2.0 GPR in major and overall.

HORT 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special problems and projects in any area of horticulture.
Prerequisite: Junior or senior classification or approval of department head.

HORT 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of horticultural science. May be repeated for credit.
Prerequisite: Approval of instructor.

HORT 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in horticulture. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

HUMA - Humanities (HUMA)

HUMA 304/RELS 304 Indian and Oriental Religions
Credits 3. 3 Lecture Hours.
Beliefs and practices of Hinduism, Jainism, Sikhism, Buddhism, Confucianism, Taoism and Shinto with particular attention to their philosophical presuppositions.
Cross Listing: RELS 304/HUMA 304.

HUMA 321 Political Islam and Jihad
Credits 3. 3 Lecture Hours.
Interaction between Islamic movements and politics in various Middle Eastern countries; the meaning and evolution of jihad; the role of Islam as a tool for political and social mobilization.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: INTS 321 and RELS 321.

HUMA 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Directed Studies in humanities. May be repeated for credit.
Prerequisite: Approval of department head.

HUMA 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of humanities. May be repeated for credit.
Prerequisite: Approval of instructor.

IBUS - International Business (IBUS)

IBUS 285 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed study of selected problems in international business not covered in other courses. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification in business.

IBUS 289 Special Topics in...
Credits 1 to 3. 1 to 3 Lecture Hours. 0 to 3 Lab Hours.
Selected topics in an identified area of international business. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification in business.

IBUS 301 Business Study Abroad
Credits 1 to 18. 1 to 18 Lecture Hours.
For students in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School and selected for program; approval of study abroad coordinator and academic dean.

IBUS 401/MKTG 401 Global Marketing
Credits 3. 3 Lecture Hours.
Survey of the aspects involved in marketing goods and services in a global marketplace; social, political, legal and economic issues associated with conducting business globally.
Prerequisite: MKTG 321.
Cross Listing: MKTG 401/IBUS 401.

IBUS 402/MKTG 402 International Marketing: Study Abroad
Credits 3. 3 Lecture Hours.
Introduction to the facets of doing business in an international setting; provides exposure to a variety of foreign cultures; facilitates understanding of the international marketplace in which these students will function.
Prerequisites: MKTG 321 or MKTG 409; junior classification; 2.5 GPR overall.
Cross Listing: MKTG 402/IBUS 402.

IBUS 403/MKTG 403 International Market Entry Strategies
Credits 3. 3 Lecture Hours.
A research-based course in which students prepare an analysis of a country, or region outside the U.S., and use it in the preparation of a marketing plan for a good or service to be introduced and marketed in that country.
Prerequisites: MKTG 321 or MKTG 409; concurrent registration in IBUS 402/MKTG 402 or MKTG 402/IBUS 402; junior or senior classification.
Cross Listing: MKTG 403/IBUS 403.

IBUS 430/ACCT 430 Global Immersion in Accounting
Credits 3. 3 Lecture Hours.
Combination of classroom work in the spring and a field trip to the selected country in summer; introduction to international opportunities within the public accounting firms; meet with former students to gain a local and corporate view of business in the selected country.
Prerequisites: ACCT 327 and approval of instructor.
Cross Listing: ACCT 430/IBUS 430.
IBUS 440/ISTM 440 International Technology Management
Credits 3. 3 Lecture Hours.
Examines global information and communications technology (ICT) business environment; challenges and opportunities for technology companies in the region; history, culture, politics, economic issues, and infrastructure influencing ICT support and innovation in the region; combination of classroom work in the spring and a field trip to the selected country in the summer; repeatable for credit if taken in a different country.
Prerequisites: Junior or senior classification; approval of instructor.
Cross Listing: ISTM 440/IBUS 440.

IBUS 445/ACCT 445 International Accounting
Credits 3. 3 Lecture Hours.
Introduction and examination of accounting issues unique to multinational enterprises and international business activity; only ACCT 445/IBUS 445 sections count for the accounting coursework requirements for the CPA exam.
Prerequisites: ACCT 315 or ACCT 327; FINC 341.

IBUS 446/FINC 445 International Finance
Credits 3. 3 Lecture Hours.
International business transactions, balance of payments and exchange rate systems, exchange rate risk and hedging techniques, sources of funding, relation to international financial institutions and capital instruments; foreign direct investment; international asset and liability management.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.
Cross Listing: FINC 445/IBUS 446.

IBUS 450/ MGMT 450 International Environment of Business
Credits 3. 3 Lecture Hours.
Broad survey of international business issues; analyzes the environment in which international businesses operate; examines international economic issues including trade theory, investment theory, foreign exchange and capital markets, and balance of payments; introduces multinational enterprises, global competition, international organizations, treaties and international law, national trade policies and the determinants of competitiveness of firms in international markets.
Prerequisites: Admission to upper division in Mays Business School.
Cross Listing: MGMT 450/IBUS 450.

IBUS 452/ MGMT 452 International Management
Credits 3. 3 Lecture Hours.
An overview of international management to include international dimensions of organizational behavior; theory, strategy and human resource management; application of theoretical ideas to real-world situations through case analyses, presentations, projects and interactive class discussion.
Prerequisite: MGMT 450/IBUS 450 or MGMT 450/IBUS 450, or concurrent enrollment.
Cross Listing: MGMT 452/IBUS 452.

IBUS 453/ MGMT 453 Emerging Economies: Brazil, Russia, India, China
Credits 3. 3 Lecture Hours.
Examination of present and future dynamics of the emerging economies of Brazil, Russia, India and China and their impact on the developing and developed worlds; importance of BRIC countries and their position in the world; history and development of these countries and the current business environment in each.
Prerequisite: MGMT 363.
Cross Listing: MGMT 453/IBUS 453.

IBUS 455 Asian Business Environment
Credits 3. 3 Lecture Hours.
The scope of business environments of Asia; geographical, demographic and cultural makeup; economic integration; human and cultural elements; financial and communication infrastructures; risk and market analysis; trade and investment patterns; Asian MNC's. May be repeated for credit if taken in a different country.
Prerequisite: Admission to upper division in Mays Business School.

IBUS 456 European Integration and Business
Credits 3. 3 Lecture Hours.
History and institutional structure of the European Union; its regional cultures, values, economies and rifts; challenges faced by corporations and people in the region, including issues involving doing business with the European Union.
Prerequisite: Admission to upper division in Mays Business School.

IBUS 457/ MGMT 457 Global Entrepreneurship
Credits 3. 3 Lecture Hours.
Practical issues associated with taking small- and medium-size business global; includes importing and exporting, developing global strategies, evaluating market opportunities, regional impact on economies and people.
Prerequisite: Admission to upper division in Mays Business School.
Cross Listing: MGMT 457/IBUS 457.

IBUS 459 Latin American Markets
Credits 3. 3 Lecture Hours.
Comparing and contrasting the Latin American, Canadian and U.S. markets across different variables, including culture, economics, social and legal aspects. May be repeated for credit if taken in a different country.
Prerequisite: MKTG 321.

IBUS 484 International Business Internship
Credits 1 to 4. 1 to 4 Other Hours.
International business internship with practicing professionals under the direction of a faculty member.
Prerequisites: Admission to upper division in Mays Business School; approval of department head.

IBUS 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Directed study on selected problems in the area of international business.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

IBUS 489 Special Topics in...
Credits 0 to 4. 0 to 4 Other Hours.
Selected topics in an identified area of international business. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

IDIS - Industrial Distribution (IDIS)

IDIS 240 Introduction to Industrial Distribution
Credits 3. 3 Lecture Hours.
Definition, history, types of industrial distribution; range of products; line of distribution; function of and services provided by distributors; distributor operational and financial analyses; measures of organizational effectiveness; employment and advancement opportunities in the field of industrial distribution.
IDIS 330 Sales Engineering
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Sales and sales management techniques for analyzing distribution challenges and providing solutions through effective communication; establishing credibility, effective questioning techniques, developing solutions, presenting solutions, anticipating objections and gaining a commitment, plus techniques for building, developing and compensating an effective sales organization.
Prerequisites: Grade of C or better in IDIS 240 or concurrent enrollment; industrial distribution major.

IDIS 340 Manufacturer Distributor Relations
Credits 3. 3 Lecture Hours.
Approaches and procedures for developing and maintaining effective manufacturer distributor relations: marketing channel design, channel roles, managing uncertainty, legal and ethical imperatives, conflict resolution, decision support and strategic marketing.
Prerequisites: Grade of C or better in IDIS 240 or concurrent enrollment; industrial distribution major.

IDIS 343 Distribution Logistics
Credits 3. 3 Lecture Hours.
Study of concepts, issues and techniques used to plan, analyze and control the logistics network; examination of three key logistical decision-making areas: inventories, facilities and transportation; techniques and technologies for managing and optimizing the logistical (supply) chain.
Prerequisites: Grade of C or better in IDIS 240; STAT 201, STAT 211 or STAT 303; industrial distribution major.

IDIS 344 Distributor Information and Control Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Industrial distribution systems including hardware and software operations; inventory management, vendor evaluation; physical distribution systems; use of bar codes, radio frequency and other automated data entry techniques; purchasing operations.
Prerequisites: Grade of C or better in IDIS 240; industrial distribution major.

IDIS 421 Healthcare Distribution Networks
Credits 3. 3 Lecture Hours.
Examination of the value chain in the health care supply chain; emphasis on distributors in terms of competitive strategy, market power, distinctive capabilities and strategic alliances.
Prerequisites: IDIS 343; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 424 Purchasing Applications in Distribution
Credits 3. 3 Lecture Hours.
Applications of purchasing systems, specifically for the distribution industry; emphasis on supplier relations, strategic purchase planning, supplier evaluation, global purchasing techniques, cost analysis, life cycle costing, value analysis; case studies and procurement modeling for distributors.
Prerequisites: Grade of C or better in IDIS 340; grade of C or better in IDIS 343 or concurrent enrollment; junior or senior classification in industrial distribution major.

IDIS 433 Industrial Sales Force Development
Credits 3. 3 Lecture Hours.
Techniques and processes for developing, maintaining and leading high performing industrial sales organizations; organization planning and forecasting processes, processes and procedures for identifying and developing talented sales professionals who can operate within a sales process and provide solutions to customers while growing profitable accounts.
Prerequisite: Grade of C or better in IDIS 330; senior classification in industrial distribution.

IDIS 434 The Quality Process in Distribution
Credits 3. 3 Lecture Hours.
Fundamental concepts in data analytics in distribution operations; using data management tools to process transaction data into useful information; various statistical and analytical models to make strategic decision making; predictive analytics, simulation and risk analysis, linear optimization, and data mining.
Prerequisites: Grade of C or better in IDIS 434; senior classification in industrial distribution.

IDIS 444 Ethics and Leadership in Distribution
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Second semester course in capstone design sequence; addresses the importance of leadership to distribution firms, role of culture, leadership theories, human capital development and management, change management and the importance of ethics.
Prerequisites: Grade of C or better in IDIS 464; grade of C or better in IDIS 433, IDIS 434, and IDIS 450, or concurrent enrollment; must be taken in the last semester of coursework; senior classification in industrial distribution.

IDIS 445 International Sales and Marketing
Credits 3. 3 Lecture Hours.
Principles, cultural aspects of selling in the Latin American market, business-to-business selling environment, and marketing products, services and solutions in Latin America; local/country market analysis, strategic marketing, sales planning, alliances and partnerships, and operational support.
Prerequisite: Junior or senior classification.

IDIS 450 Analytics for Distribution Operation
Credits 3. 3 Lecture Hours.
Fundamental concepts in data analytics in distribution operations; using data management tools to process transaction data into useful information; various statistical and analytical models to make strategic decision making; predictive analytics, simulation and risk analysis, linear optimization, and data mining.
Prerequisites: Grade of C or better in IDIS 343 and IDIS 344; senior classification in industrial distribution.

IDIS 454 New Directions in Distributor Competitiveness
Credits 3. 3 Lecture Hours.
Investigation of new research in distributor competitiveness; focus on defining distribution strategy in changing market places; exploration of the latest applied findings and how companies are successfully implementing initiatives; project management approach to demonstrate the development of competitive advantage and design strategies for implementation.
Prerequisites: Junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.
IDIS 455 Humanitarian Distribution Networks  
Credits 3. 3 Lecture Hours.  
Humanitarian logistics; essential knowledge to model distribution systems in humanitarian environments; supplemented by case studies and a project.  
Prerequisites: IDIS 343; junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 464 Distributor Operations and Financial Management  
Credits 3. 3 Lecture Hours.  
First course in a two-semester capstone project course sequence; assessment of firm performance utilizing financial statement analysis and industry studies; methods for planning, implementing and monitoring profitability from distributor operations; procedures for controlling cash flow; credit, receivables, inventory, personnel and productivity; and related financial operations.  
Prerequisites: Grade of C or better in IDIS 343; ACCT 209; ENTC 399 or concurrent enrollment; must be taken the long semester immediately prior to IDIS 444; senior classification in industrial distribution major.

IDIS 481 Seminar - Internship Preparation  
Credit 1. 1 Lecture Hour.  
Develop an understanding of the distribution industry and its opportunities; prepare students for summer internships; provide students with opportunities to network with industry and companies that will be hiring summer interns.  
Prerequisite: Minimum of 60 credit hours.

IDIS 484 Professional Internship  
Credits 2. 2 Other Hours.  
Independent study and on-the-job supervised experience related to a professional area of interest in industrial distribution.  
Prerequisites: IDIS 481; junior or senior classification.

IDIS 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Permits work in a special problem area on an individual basis with the intent of promoting independent reading, research and study; to supplement existing course offerings or subjects not presently covered.  
Prerequisites: Senior classification and approval of instructor.

IDIS 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of industrial distribution.  
Prerequisite: Approval of instructor.

INST-Interdisciplinary Studies (INST)  

INST 210 Understanding Special Populations  
Credits 3. 3 Lecture Hours.  
Referral, assessment and categorization of special populations including physical, cognitive and affective characteristics; cultural, ethnic, economic and linguistic differences; giftedness; special education and compensatory programs; awareness of legislative history that results in rights for special populations.  
Prerequisite: Sophomore classification or above.

INST 222 Foundations of Education in a Multicultural Society  
Credits 3. 3 Lecture Hours.  
Historical, philosophical and cultural foundations of education emphasizing education for a multicultural society; also taught at Qatar campus.

INST 291 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research conducted under the direction of faculty member in teaching, learning and culture. May be taken three times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

INST 301 Educational Psychology  
Credits 3. 3 Lecture Hours.  
Application of psychology to problems of teaching. Nature and operation of principles of learning, transfer of training; nature, measurement and significance of individual differences; conditions influencing efficiency of learning.  
Prerequisite: Junior or senior classification.

INST 362 English as a Second Language Methods I  
Credits 3. 3 Lecture Hours.  
Basic principles of language acquisition, multiple approaches to second language acquisition; individual differences and second language acquisition; stages of second language development; multiple approaches to assessment.

INST 363 English as a Second Language Methods II  
Credits 3. 3 Lecture Hours.  
Strategies and techniques for teaching English language learners; curriculum design and material development, instruction of English language learners, content area instruction, and language assessment instruments; a historical perspective of the education of English language learners in United States' schools.  
Prerequisite: INST 362.

INST 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in teaching learning and culture. May be repeated 2 times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

INTS - International Studies (INTS)  

INTS 201 Introduction to International Studies  
Credits 3. 3 Lecture Hours.  
Introduction to the basic concepts and frameworks for analyzing global events and understanding the current international situation; for freshman and transfer international studies majors.

INTS 205 Current Issues in International Studies  
Credit 1. 1 Lecture Hour.  
Exploration of current issues and problems in International Studies through attendance of events, lectures by noted international academics and professionals, and in-class discussions. May be taken three times for credit.  
Prerequisite: International studies major.

INTS 211/ENGL 211 Foundations in Cultural Studies  
Credits 3. 3 Lecture Hours.  
Introduction to history, influence and major ideas of Cultural Studies; use of culture as a means to critique social problems and understand social forces; analysis of culture in its relationship to power; participation in project investigating contemporary U.S. youth subcultures.  
Cross Listing: ENGL 211/INTS 211.
INTS 215/FILM 215 Global Cinema
Credits 3. 3 Lecture Hours.
History and theory of global cinema; historical, socio-political, national
and international contexts of film production and reception; transnational
film.
INTS 251 Contemporary Issues in the Middle East
Credits 3. 3 Lecture Hours.
Exploration of current political and cultural issues in the Middle East.
INTS 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual supervision of readings or assigned projects in international
studies. May be taken two times for credit.
Prerequisites: Approval of instructor and department head.
INTS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Introduction to the broad range of disciplines and issues explored in the
international studies curriculum. May be repeated for credit.
Prerequisite: Freshman or sophomore classification.
INTS 300 International Experience
Credits 0. 0 Other Hours.
Language immersion program abroad; minimum of ten weeks; completed
after the fourth semester of the target foreign language; study abroad
program, internship, volunteer service work, or a combination of these
options with department approval. Must be taken on a satisfactory/ unsatisfactory basis.
Prerequisites: Grade of C or better in INTS 201; grade of C or better
in ARAB 202, CHIN 202, FREN 202, GERM 202, ITAL 202, JAPN 202,
RUSS 202, SPAN 202, or SPAN 203; major in international studies; junior
or senior classification.
INTS 301 Theories of Globalization
Credits 3. 3 Lecture Hours.
Diverse global and international cultural processes in their economic and
political contexts; analyses of theoretical lenses on transnationalism
including diaspora, hybridity, liminality, marginality, cyborgism, nomadism,
scapes and flows and others; case studies of global cultures.
Prerequisite: Junior or senior classification or approval of instructor.
INTS 311/ENLG 309 Cultural Politics
Credits 3. 3 Lecture Hours.
Exploration of the concept of cultural politics across several academic
disciplines in the humanities and social sciences; broad interrogation of
relationships that mediate culture and power in national and international
contexts; focus on how culture shapes and is shaped by society, political
perspectives and actions.
Prerequisites: Junior or senior classification; or approval of the instructor.
Cross Listing: ENLG 309.
INTS 321 Political Islam and Jihad
Credits 3. 3 Lecture Hours.
Interaction between Islamic movements and politics in various Middle
Eastern countries; the meaning and evolution of jihad; the role of Islam as
a tool for political and social mobilization.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HUMA 321 and RELS 321.
INTS 401 Urbanism and Modernism
Credits 3. 3 Lecture Hours.
Interdisciplinary examination of the transition from rural traditions to
urban alienation, covering modernist currents in culture, history, politics,
and society; exploration of the problems of urbanism as represented by
the most renowned twentieth-century artists; study of such topics as
modernist urban design, urban alienation, modernist cities, dystopia, and
urbanism.
Prerequisites: International studies major; INTS 201.
INTS 403 Nations and Nationalisms
Credits 3. 3 Lecture Hours.
Interdisciplinary approach where nation is understood as modern political
entity distinct from country; examination of historical and philosophical
origins of idea of nationalism; theories on nationhood, national identity
and rise of nationalism; global variety of concrete test cases to highlight
actual functions (wars, decolonization, symbolic representations in film,
etc.).
Prerequisites: International studies major; INTS 201.
INTS 405 War and Memory
Credits 3. 3 Lecture Hours.
Examination of world wars, colonial wars, genocides, and historical
crimes from the late nineteenth century until the present; analysis of
the changing memory of those traumatic events as evident in historical
accounts, commemorations, film, and literature.
Prerequisites: International studies major; INTS 201.
INTS 407 Diversity in a Globalized World
Credits 3. 3 Lecture Hours.
Examination of the cultural constructs that arise through the encounters
with colonialism from the conquest of the Americas to the present;
cultural studies and literary analysis to identify and interrogate the
common principles of human interaction in the face of cultural diversity.
Prerequisites: International studies major; INTS 201.
INTS 409 Culture, Neoliberalism and Globalism
Credits 3. 3 Lecture Hours.
Examination of largely North Atlantic cultural forms and meanings
that arise in the context of neoliberalism from the late 1970’s to the
present; cultural studies and broad-based social analysis to identify and
interrogate the many relational contexts where power circulates through
urban objects and meanings.
Prerequisites: INTS 201; international studies major; junior or senior
classification.
INTS 410 Gender and the Global Modern
Credits 3. 3 Lecture Hours.
Relationship of the concepts of gender and modernity in the 20th and
the 21st centuries from an international perspective; global theories of
gender and sex across genres.
Prerequisites: INTS 201; junior or senior classification or approval of
instructor.
INTS 481 Senior Seminar in International Studies
Credits 3. 3 Lecture Hours.
Capstone course designed to produce in-depth research projects; based
on student’s international experience and specific area of expertise
acquired in major.
Prerequisites: International Studies major; INTS 201; senior
classification; completed international experience.
INTS 484 Directed Internship
Credits 0 to 3. 0 to 3 Other Hours.
Directed internship in a private firm, government or non-profit agency outside the United States; provide on-the-job experience appropriate to the student's program of work and career objectives. To be taken on a satisfactory/unsatisfactory basis. Maximum of 3 credit hours may count towards degree.
Prerequisites: INTS 201; approval of internship coordinator.

INTS 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Research problems and readings for students majoring in international studies; directed independent study of an international issue related to student's area of interest.
Prerequisite: Junior or senior classification or approval of instructor.

INTS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of international studies. May be repeated for credit.
Prerequisite: Junior or senior classification or approval of instructor.

INTS 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in international studies.
Prerequisites: INTS 201; junior or senior classification and approval of instructor.

INTS 497 Independent Honors Study
Credits 3. 3 Other Hours.
Directed independent studies designed to produce a senior honors thesis; based on international experience and interdisciplinary expertise acquired in major.
Prerequisites: INTS major; honors candidate; completed international experience.

ISEN - Indust & Systems Engr (ISEN)

ISEN 101 Introduction to Industrial Engineering
Credit 1. 1 Lecture Hour.
Introduction to industrial engineering; overview of the curriculum; presentations by faculty and industry to familiarize with the department and the scope of industrial engineering applications.

ISEN 210 Fundamentals of Industrial Engineering Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Engineering design for product development, problem definition and need identification, information gathering and concept generation, decision making and concept selection; industrial engineering concepts including design for manufacturing, assembly, sustainability and environment; economic decision making and cost evaluation; risk, reliability and safety; quality; robust design and optimization.
Prerequisite: ENGR 102.

ISEN 230 Informatics for Industrial Engineers
Credits 3. 3 Lecture Hours.
Structured programming concepts for implementing mathematical and statistical models in industrial engineering problems; emphasis on introductory production and service system problems and computer-based approaches to solve the problems; engineering applications of probability and statistics concepts.
Prerequisite: CSCE 206, CSCE 111, CSCE 121, or CSCE 110 or equivalent; concurrent enrollment in STAT 211.

ISEN 281 Essential of Modern Manufacturing Methods for Engineering Design
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamental basis from materials and manufacturing methods selection in engineering design; basic elements and theory of a range of materials manufacturing methods, with specific emphasis on recent developments in the field including rapid prototyping 3D, computer control of machines - tools, automation robotics micro-fabrication and metrology.
Prerequisites: ENGR 112 or ENGR 217/PHYS 217.

ISEN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Problems of limited scope in industrial engineering approved on an individual basis intended to promote independent study.
Prerequisite: Approval of department head.

ISEN 289 Special Topics in...
Credits 1 to 5. 1 to 5 Other Hours.
Selected topics in an identified area of Industrial Engineering. May be repeated for credit.
Prerequisites: Approval of instructor.

ISEN 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in industrial and systems engineering. May be taken four times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ISEN 302 Economic Analysis of Engineering Projects
Credits 2. 2 Lecture Hours.
Principles of economic equivalence; time value of money; analysis of single and multiple investments; comparison of alternatives; capital recovery and after-tax analysis of economic projects.
Prerequisite: MATH 152 or MATH 172; also taught at Qatar campus.

ISEN 303 Engineering Economic Analysis
Credits 3. 3 Lecture Hours.
Principles of economic equivalence; time value of money; analysis of single and multiple investments; comparison of alternatives; capital recovery and tax implications; certainty; uncertainty; risk analysis; public sector analysis and break-even concepts.
Prerequisite: MATH 152.

ISEN 310 Uncertainty Modeling for Industrial Engineering
Credits 3. 3 Lecture Hours.
Models and methods based on probability and statistics for industrial engineering applications; random variables, expectation, distribution fitting, reliability of systems, central limit theorem and interval estimates in the context of production and service systems.
Prerequisites: ISEN 230 or concurrent enrollment, and STAT 211; junior or senior classification.

ISEN 320 Operations Research I
Credits 3. 3 Lecture Hours.
Development and application of fundamental deterministic optimization models and solution methods; focus on quantitative modeling and formulation of linear, integer, and network flow problems; use of computer optimization software to model and solve real-life problems.
Prerequisites: MATH 304 or MATH 323; junior or senior classification.
ISEN 330 Human Systems Interaction  
Credits 3. 3 Lecture Hours. 
Principles of human factors and ergonomics; emphasis on design to support human capabilities, limitations, and interaction tendencies in sociotechnical work systems; topics include human information processing, physiological and biomechanical functioning, and implications for design of the workplace and jobs; case studies in manufacturing, medicine, aerospace, ground transportation, and computer interaction. 
Prerequisites: MMET 181; junior classification. 

ISEN 340 Operations Research II  
Credits 3. 3 Lecture Hours. 
Probabilistic methods for industrial and service systems; stochastic processes used in industrial engineering, including Poisson processes and discrete and continuous-time Markov chains; applications to production operations, inventory control, revenue management, quality control, reliability, digital simulation and finance. 
Prerequisites: MATH 304 and ISEN 310; junior or senior classification. 

ISEN 350 Quality Engineering  
Credits 3. 2 Lecture Hours. 3 Lab Hours. 
Strategic approach to implementing quality, process and business improvement methods using data analysis tools; total quality management and six sigma approaches to define, measure, analyze, improve and control processes; principles of lean engineering; control charts; process capability analysis; basic metrology, applied statistics, lean principles and process capability. 
Prerequisites: ISEN 310 and ISEN 230; junior or senior classification. 

ISEN 355 System Simulation  
Credits 3. 2 Lecture Hours. 3 Lab Hours. 
Systems simulation structure, logic and methodologies; development of simulation models; data handling methods; analysis of simulation data; verification and validation; system simulation languages, models and analysis; applications to industrial situations. 
Prerequisites: ISEN 230 and ISEN 310; junior or senior classification. 

ISEN 360 Lean Thinking and Lean Engineering in the Process Industries  
Credits 3. 3 Lecture Hours. 
Philosophical, managerial, and operational principles of lean thinking within the context, tools, and practices of lean engineering; emphasis on the pharmaceutical and process industry; design of lean systems; lean cell design, modeling of lean manufacturing systems, and operation of manufacturing cells; queuing network theory for the analysis of lean systems. 
Prerequisites: STAT 211; junior or senior classification for students other than INEN majors. 

ISEN 370 Production Systems Engineering  
Credits 3. 3 Lecture Hours. 
Principles, models, and techniques for planning and analysis of production and distribution systems; application of linear, integer, and nonlinear optimization models and solution methods for aggregate planning, supply chain planning, push (MRP) and pull (JIT) material flow management, inventory control under deterministic and stochastic demands, operations scheduling, and production scheduling. 
Prerequisites: ISEN 230 and ISEN 320; junior or senior classification. 

ISEN 399 Professional Development  
Credits 0. 0 Other Hours. 
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point. 
Prerequisites: ISEN 210 and ISEN 230; junior or senior classification or approval of instructor. 

ISEN 405 Facilities Design and Material Handling  
Credits 3. 3 Lecture Hours. 
Principles of facilities location, layout, and material handling systems and to practice designing facilities; modeling, design, and analysis techniques; methodologies in facilities location, layout, and material handling; integration of ergonomics analysis techniques and their implications on design, layout, safety and quality. 
Prerequisites: ISEN 210 and ISEN 320; junior or senior classification. 

ISEN 408 Supply Chain and Logistics  
Credits 3. 3 Lecture Hours. 
Principles, models and techniques for planning, analysis and design of supply chain systems; optimization principles, including linear and integer programming, applied to supply chain planning and operations; information technology, design models, databases, and strategic and tactical decision making. 
Prerequisites: ISEN 320, ISEN 340, and ISEN 370; junior or senior classification. 

ISEN 410 Advanced Engineering Economy  
Credits 3. 3 Lecture Hours. 
Principles of economic equivalence; borrowing, lending, and investing; establishing minimum attractive rate of return; replacement analysis; capital budgeting; uncertainty analysis; decision trees. 
Prerequisites: ISEN 210 or ISEN 302; junior or senior classification. 

ISEN 411 Engineering Management Techniques  
Credits 3. 3 Lecture Hours. 
Techniques relating to managing engineering activities; engineer’s transition into management; engineering managerial functions; motivation of individual and group behavior; productivity assessment/improvement; managing the quality function and communications. 
Prerequisite: Senior classification in industrial engineering. 

ISEN 413 Advanced Data Analytics for Industry  
Credits 3. 3 Lecture Hours. 
Data mining; linear discriminant analysis (LDA), principal component analysis (PCA) and other methods; classification, clustering, and mining, information extraction; dealing with uncertainty, Bayesian inference; neural models, regression and feature selection. 
Prerequisites: ISEN 310 and ISEN 350; junior or senior classification. 

ISEN 414 Total Quality Engineering  
Credits 3. 2 Lecture Hours. 3 Lab Hours. 
Principles of total quality engineering; total quality management philosophy, engineering approaches for designing quality into products and processes; off-line experimentation methods for the robust design; emphasis on teamwork and continuous quality improvement. 
Prerequisite: STAT 211; junior or senior classification. 

ISEN 416 Facilities Location, Layout and Material Handling  
Credits 4. 3 Lecture Hours. 3 Lab Hours. 
Analytical treatment of facilities location, physical layout, material flow and handling, combined with heuristic algorithms to assist in the design of production/service facilities; fundamental concepts applied through a sequence of design projects. 
Prerequisites: ISEN 315; ISEN 316 or registration therein.
ISEN 425 Design and Analysis of Industrial Systems with Simulation
Credits 3. 2 Lecture Hours. 3 Lab Hours.
In-depth study into the design-modeling and subsequent analysis of
contemporary production/service systems; factory/service systems are
modeled using the ARENA/SIMAN V simulation-animation language;
emphasis is placed on the critical analysis of alternative flow designs of
modeled systems using flow and economic parameters to assess system
improvement.
Prerequisites: ISEN 210 and ISEN 355.

ISEN 434 Human Error and Resilient System Design
Credits 3. 3 Lecture Hours.
Human error from a sociotechnical systems perspective; role of error in
complex system failures; human behavioral modes and system design
factors; analytical methods for defining the roles and impact of errors in
large-scale system accidents; real-world case studies.
Prerequisites: ISEN 330; junior or senior classification.

ISEN 440 Systems Thinking
Credits 3. 3 Lecture Hours.
Systems thinking process, systems of systems and the fundamental
considerations associated with the engineering of large-scale systems, or
systems engineering including systems modeling, design and the system
development process.
Prerequisites: MATH 304 or approval of instructor; junior or senior
classification.

ISEN 442 Organizational Systems
Credits 3. 3 Lecture Hours.
Role of people and organizations in the design and development of
complex engineered systems; providing engineers with the skills needed
to effectively manage large-scale system development programs.
Prerequisites: ISEN 330; junior or senior classification.

ISEN 450 Healthcare Systems Engineering
Credits 3. 3 Lecture Hours.
Explores components of healthcare system, existing problems in
healthcare systems; need for engineering to analyze healthcare system
problems; application of industrial engineering tools in improving
healthcare system; role of industrial engineering in addressing healthcare
policy issues.
Prerequisites: ISEN 340 and ISEN 355, or approval of instructor; junior or
senior classification.

ISEN 453 Manufacturing Operations
Credits 3. 3 Lecture Hours.
Analytical principles of manufacturing systems design, analysis and
control; emphasis placed on stochastic analysis; role of variability and
impact on cycle time; push versus pull production strategies including
Kanban and constant WIP control; probability, queueing theory, Little’s Law,
heavy traffic approximations, and queueing networks.
Prerequisites: ISEN 340; junior or senior classification.

ISEN 460 Capstone Senior Design
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Engineering design including identification of a problem; development,
analysis and evaluation of alternative solutions; and recommendations
for and, where possible, development of systems improvement tools;
application of experience and training to provide a product or solution
that helps company clients; balancing client needs with academic
requirements.
Prerequisite: ISEN 210, ISEN 330, ISEN 340, ISEN 350, ISEN 355 and
ISEN 370; junior or senior classification.

ISEN 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Permits work on special project in industrial engineering. Project must be
approved by department head.
Prerequisite: Senior classification in industrial engineering.

ISEN 489 Special Topics in...
Credits 1 to 5. 1 to 5 Lecture Hours. 0 to 5 Lab Hours.
In-depth study of areas of current student interest and recent advances;
normally used for first time offering of new courses.
Prerequisite: Approval of instructor.

ISEN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in industrial
and systems engineering. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
ISTM 313 Foundations of Data Analytics for Non-MIS Majors  
Credits 3. 3 Lecture Hours.  
Use and application of data modeling, Structured Query Language (SQL), Database Management Systems (DBMS) and data visualization in the solution of business problems. Only one of the following will satisfy the requirements for a degree: ISTM 313 or ISTM 315.  
Prerequisites: Admission to upper division in Mays Business School.  

ISTM 315 Database Programming  
Credits 3. 3 Lecture Hours.  
Use and application of Structured Query Language (SQL); Database Management Systems (DBMS) in the solution of business problems; database programming. Only one of the following will satisfy the requirements for a degree: ISTM 313 or ISTM 315.  
Prerequisites: ISTM 310; ISTM 320; or approval of instructor.  

ISTM 320 Business Systems Analysis and Design  
Credits 3. 3 Lecture Hours.  
Techniques and methods currently used in system analysis and design including object oriented methods; use of automated tools to support systems development.  
Prerequisite: ISTM 250; ACCT 230 and MGMT 211, or concurrent enrollment; admission to upper division in Mays Business School or approval of instructor if major is outside of Mays Business School.  

ISTM 325 Business Object Oriented Programming with Java  
Credits 3. 3 Lecture Hours.  
Introduction of abstract data types, inheritance, object identity, polymorphism as they relate to building business objects and business classes; use of Java programming language depicting the object orientation concepts; use of class libraries and Java packages for business object construction.  
Prerequisites: Admission to upper division in Mays Business School; ISTM 250.  

ISTM 410 Management of Information Systems  
Credits 3. 3 Lecture Hours.  
Strategic management of information systems; change and risk management processes during information systems implementation; role of information systems to support business goals; writing business cases for request for proposals and responses; project management techniques.  
Prerequisite: ISTM 310; ISTM 320; or approval of instructor.  

ISTM 415 Information Systems Capstone Project  
Credits 3. 3 Lecture Hours.  
Design and development of information system software based on technical specifications; multi-platform environment; database server and web server software deployment.  
Prerequisites: ISTM 315; ISTM 410; or approval of instructor.  

ISTM 420 Web-Enabled Applications  
Credits 3. 3 Lecture Hours.  
Distributed business applications using the World Wide Web; advanced discussions of the concepts of internet, intranet, extranet; different methods to design web-enabled applications; active web applications; cutting edge website design; legacy to web integration; use of web-oriented languages.  
Prerequisites: Admission to upper division in Mays Business School.  

ISTM 425 Complex Business Application Design  
Credits 3. 3 Lecture Hours.  
Business application development alternatives; COM and CORBA object models; use of Visual Basic; use of ActiveX controls, ActiveX Servers and ActiveX Documents.  
Prerequisites: ISTM 250; senior classification.  

ISTM 440/IBUS 440 International Technology Management  
Credits 3. 3 Lecture Hours.  
Examines global information and communications technology (ICT) business environment; challenges and opportunities for technology companies in the region; history, culture, politics, economic issues, and infrastructure influencing ICT support and innovation in the region; combination of classroom work in the spring and a field trip to the selected country in the summer; repeatable for credit if taken in a different country.  
Prerequisites: Junior or senior classification; approval of instructor.  
Cross Listing: IBUS 440/ISTM 440.  

ISTM 450 Business Intelligence and Data Mining  
Credits 3. 3 Lecture Hours.  
Rationale for Business Intelligence and data mining through business case studies; lab training using data mining software; and process of data mining by using commercial data mining software on large data sets.  
Prerequisites: Grade of 'C' or better in SCMT 303 or equivalent; junior or senior classification.  

ISTM 455/SCMT 455 Cybersecurity Management  
Credits 3. 3 Lecture Hours.  
Explores business, managerial and technological aspects of information and cybersecurity; analysis, design, implementation and management issues surrounding effective information security; includes risk management, business continuity planning, and security policy development.  
Prerequisite: ISTM 310 or SCMT 375.  
Cross Listing: SCMT 455/ISTM 455.  

ISTM 481 Information Systems Seminar  
Credit 1. 1 Other Hour.  
Exposure to professional issues, contemporary information systems topics, potential MIS careers and employers. May be taken three times for credit.  
Prerequisite: Admission to upper division in Mays Business School; or approval of instructor.  

ISTM 484 Management Information Systems Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
A directed internship in an organization to provide students with a learning experience supervised by professionals in organizational settings appropriate to the student's professional objectives. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Management Information Systems major and approval of academic advisor and instructor.  

ISTM 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed study of selected problems in an area of management information systems not covered in other courses.  
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.  

ISTM 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topic in an identified field of management information systems.  
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.
ISTM 601 Fundamentals of Business Programming
Credits 3. 3 Lecture Hours.
Business Application Development using both procedural and object-oriented programming techniques; use of component based software design and development for distributed business software systems.
Prerequisite: Graduate business classification or approval of instructor.

ISTM 610 Business Data Communications
Credits 3. 3 Lecture Hours.
Concepts and technology of on-line and network-based systems in business; analysis of data communication requirements, design, selection and application of network technologies including wide and local area networks, distributed processing, network architecture, and systems management and control; software simulation projects emphasized. Classification 6 students may not enroll in this course.
Prerequisites: Graduate classification.

ISTM 612 Management Information Systems
Credits 1 to 3. 1 to 3 Lecture Hours.
Concepts, theories, and the strategic role of information systems as applied to business organizations; highly integrative/cross functional in nature. Classification 6 students may not enroll in this course.
Prerequisite: Enrollment is limited to MBA students.

ISTM 615 Business Database Systems
Credits 3. 3 Lecture Hours.
Information processing and management involving applications and user orientation in a business environment using commercially available database management systems.
Prerequisite: Knowledge of one programming language.

ISTM 620 Systems Analysis and Design
Credits 3. 3 Lecture Hours.
Methodologies, techniques, and tools for information systems analysis and design; the analysis and logical design of business processes and management information systems focusing on the systems development life cycle; techniques for logical system design.
Prerequisite: ISTM 615 or concurrent enrollment.

ISTM 622 Advanced Data Management
Credits 3. 3 Lecture Hours.
Data/database management and advanced SQL techniques; issues of data security, backup and recovery, large scale databases, master data management, concurrent user data access, scalability, and policies.
Prerequisites: ISTM 615 or equivalent; graduate classification in business.

ISTM 624 Advanced Systems Analysis and Design
Credits 3. 3 Lecture Hours.
Advanced topics in business systems analysis and design; alternative methodologies such as agile development, extreme programming, Rational Unified Process; Unified Modeling Language; bench marking and best practices for systems development; cost/benefit analysis, estimation and budgeting for business information systems; testing; patterns, domain-driven design; process modeling; service-oriented architecture and cloud computing.
Prerequisite: ISTM 620 or equivalent; graduate classification in business.

ISTM 630 MIS Project Management and Implementation
Credits 3. 3 Lecture Hours.
Advanced coverage of systems development topics with emphasis on the management and implementation of business computing systems; group project orientation to include feasibility analysis, alternative evaluation and selection, and management approval; use of software engineering tools where appropriate. Classification 6 students may not enroll in this class.
Prerequisite: ISTM 620.

ISTM 631 Information Systems Design and Development Project
Credits 3. 3 Lecture Hours.
Design and delivery of functional, multi-platform application system using current technologies; user interface design emphasized; issues of mobile device forms, software delivery, and development.
Prerequisites: Graduation classification; ISTM 622; ISTM 630.

ISTM 635 Business Information Security
Credits 3. 3 Lecture Hours.
Explores the business, managerial, and technological aspects of information security; analysis, design, and implementation issues surrounding effective information security; authentication, authorization, availability, business continuity planning, confidentiality, disaster recovery, encryption, firewalls, fraud protection, security policy development, integrity, risk management, virus protection, VPNs and wireless security. Classification 6 students may not enroll in this course.
Prerequisite: ISTM 610.

ISTM 637 Data Warehousing
Credits 3. 3 Lecture Hours.
Provides an understanding of the process by which a data warehouse system is designed and developed along with the underlying concepts and software systems; includes OLAP models and their differences with standard OLTP models.
Prerequisite: ISTM 615 or approval of instructor.

ISTM 643 Corporate Information Planning
Credits 3. 3 Lecture Hours.
Concepts regarding the design and use of computer-based management information and decision support systems; combinations of computing hardware and software and design concepts evaluated to meet managers' information needs. Classification 6 students may not enroll in this course.
Prerequisites: ISTM 615 or equivalent or approval of instructor.

ISTM 645 IT Security Controls
Credits 3. 3 Lecture Hours.
Familiarization with planning, design, and implementation of controls to minimize risks to business information; focus on the importance of managing business information security; introduction to the tools, concepts and theories to safeguard an organization's information systems and IT assets; understanding of cryptography and application, operations, and physical security.
Prerequisite: ISTM 635.

ISTM 650 Business Data Mining
Credits 3. 3 Lecture Hours.
Rationale for business Data Mining through case studies of business applications; process of data mining by using commercial Data Mining software on very large data sets; half of the course devoted to lab training in the use of Data Mining software including SAS Enterprise Miner and SPSS Clementine.
Prerequisite: STAT 652 or approval of instructor.
ITAL - Italian (ITAL)

ITAL 101 Beginning Italian I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(ITAL 1411) Beginning Italian I. Elementary language study with oral, written and reading practice; preparation for conversation; part of class preparation will be done in language laboratory.

ITAL 102 Beginning Italian II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(ITAL 1412) Beginning Italian II. Continuation of ITAL 101; part of class preparation will be done in the language laboratory.

ITAL 201 Intermediate Italian I
Credits 3. 3 Lecture Hours.
(ITAL 2311) Intermediate Italian I. Readings of average difficulty; review of grammar; practice in conversation and composition.

ITAL 202 Intermediate Italian II
Credits 3. 3 Lecture Hours.
(ITAL 2312) Intermediate Italian II. Continuation of ITAL 201 with more advanced material.

ITAL 285 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Individual supervision of readings or assigned projects in Italian, selected for each student individually.

ITAL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Italian studies. May be repeated for credit.

ITAL 303 Composition and Conversation
Credits 3. 3 Lecture Hours.
Readings of contemporary Italian prose; intensive review of grammar and syntax; development of written and oral skills; expansion of vocabulary, translations, compositions and short presentation.

ITAL 451/ EURO 451 Introduction to Italian Culture
Credits 3. 3 Lecture Hours.
Introduction to the culture of the Italian Peninsula, from Middle Ages to present; study of major works of literature, political science, visual arts, music and cinema, to set Italy's culture in its social and historical context; taught in English.

ITAL 452/ WGST 452 Women and Gender in Italy
Credits 3. 3 Lecture Hours.
The historical and cultural dynamics forging the notion of woman and gender in Italian society and cultural production; discussion of cultural works, media and theoretical texts concerning subjectivity and language, body and culture; taught in English.

Prerequisite: Approval of instructor and department head.

Cross Listing: EURO 451/ITAL 451.

Cross Listing: WGST 452/ITAL 452.
ITAL 453/EURO 453 Italian Literature
Credits 3. 3 Lecture Hours.
Survey of Italian literature; focus on literary portrayal of reality in modern and contemporary Italian culture, the dialogue with the classical tradition, and literature's potential to affect and be affected by social critique; taught in English.
Prerequisite: ITAL 201 or concurrent enrollment, or approval of instructor.
Cross Listing: EURO 453/ITAL 453.

ITAL 455/FILM 455 Italian Cinema
Credits 3. 3 Lecture Hours.
Survey of Italian cinema from Neorealism to the present; taught in English.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: FILM 455/ITAL 455.

ITAL 456/EURO 456 Contemporary Italy
Credits 3. 3 Lecture Hours.
Examination of changes in Italian society and culture since World War II, with focus on their narration and interpretation by representative authors and filmmakers, and on multicultural literary production in present-day Italy; taught in English.
Prerequisite: ITAL 201 or concurrent enrollment or approval of instructor.
Cross Listing: EURO 456/ITAL 456.

ITAL 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually; written and oral reports.
Prerequisite: Approval of instructor and department head.

ITAL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Italian. May be repeated for credit.
Prerequisite: Approval of instructor.

ITAL 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in interdisciplinary engineering.
Prerequisites: Sophomore classification and approval of interdisciplinary engineering director or delegate.

ITAL 499 High Impact Experience for Interdisciplinary Engineers
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point.
Prerequisites: ITDE major, junior or senior classification.

JAPN 101 Beginning Japanese I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(JAPN 1411) Beginning Japanese I. Elementary language study with oral, written and reading practice; preparation for conversation; part of class preparation to be done in the language laboratory.

JAPN 102 Beginning Japanese II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(JAPN 1412) Beginning Japanese II. Continuation of JAPN 101; part of class preparation to be done in the language laboratory.
Prerequisite: JAPN 101.

JAPN 201 Intermediate Japanese I
Credits 4. 4 Lecture Hours.
Readings of average difficulty; review of grammar; practice in conversation and composition.
Prerequisite: JAPN 102.

JAPN 202 Intermediate Japanese II
Credits 4. 4 Lecture Hours.
Continuation of JAPN 201 with more advanced material.
Prerequisite: JAPN 201.

JAPN - Japanese (JAPN)
JAPN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in Japanese, selected for each student individually; written or oral reports.
Prerequisite: Approval of instructor and Director of AALO.

JAPN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Japanese studies. May be repeated for credit.
Prerequisite: Approval of instructor.

JAPN 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research in Japanese studies conducted under the direction of faculty member approved by the Director of AALO. May be taken 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

JAPN 301 Upper Level Japanese I
Credits 3. 3 Lecture Hours.
Reading and listening practice using authentic and near-authentic materials; conversation practice in different levels of formality; composition and grammar; conducted in Japanese.
Prerequisite: JAPN 202.

JAPN 302 Upper Level Japanese II
Credits 3. 3 Lecture Hours.
Continuation of JAPN 301 with more advanced material.
Prerequisite: JAPN 301.

JAPN 325 Japanese Language and Culture through Manga
Credits 3. 3 Lecture Hours.
Examination of Japanese and Asian visual, linguistic, and cultural traditions, with emphasis on genre of Manga.
Prerequisite: JAPN 202.

JAPN 401 Advanced Japanese I
Credits 3. 3 Lecture Hours.
Readings with selected grammar and kanji lessons; focus on Japanese traditional and popular culture, religion, and history; taught in Japanese.
Prerequisite: JAPN 302 or equivalent.

JAPN 402 Advanced Japanese II
Credits 3. 3 Lecture Hours.
Readings with selected grammar and kanji lessons; focus on Japanese private and business life, education, politics, and contemporary culture; taught in Japanese.
Prerequisite: JAPN 302 or equivalent.

JAPN 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects selected for each student individually; written or oral reports.
Prerequisite: Approval of instructor and Director of AALO.

JAPN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Japanese studies. May be repeated for credit.
Prerequisite: Approval of instructor.

JAPN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research in Japanese studies conducted under the direction of faculty member approved by the Director of AALO. May be taken 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

JOUR - Journalism (JOUR)

JOUR 102 American Mass Media
Credits 3. 3 Lecture Hours.
(COMM 1307) American Mass Media. Introductory survey of mass communication media, their history and social role, to provide an understanding of the development and importance of mass communication media in modern society.

JOUR 200 Mass Media Information
Credits 3. 3 Lecture Hours.
Strategies and procedures in identifying, gathering, analyzing and organizing information for the mass media; sources and methods; evaluation and validation of evidence; legal and ethical considerations.
Prerequisites: Grade of C or better in JOUR 102, freshman or sophomore classification; enrollment in the USLA-BA-JNS concentration or JOUR minor; or approval of program director.

JOUR 203 Media Writing I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
(COMM 2311) Media Writing I. Basic journalistic techniques common to all media; integration of news gathering, writing and editing; ethics. Limited to minors in journalism, or with approval of program director.
Prerequisites: Grade of C or better in JOUR 102 and JOUR 200; enrollment in the USLA-BA-JNS concentration or JOUR minor; or approval of program director.

JOUR 215 Interviewing: Principles and Practice
Credits 3. 3 Lecture Hours.
Theory and practice of methods in selected interview settings; emphasis on communication between two persons, questioning techniques, and the logical and psychological bases of interpersonal persuasion.

JOUR 230 Communication Technology Skills
Credits 3. 3 Lecture Hours.
Introduction to interactive media and media literacy skills in the digital domain; survey of technology histories, standards, and markets for industries such as multichannel TV, digital radio, video games, steaming media, epublishing, teleconferencing, and social networking.
Prerequisites: Enrollment in communication or telecommunication media studies majors, USLA-BA-JNS concentration, or JOUR minor.
Cross Listing: COMM 230/JOUR 230.

JOUR 250 New Media and the Independent Voice
Credits 3. 3 Lecture Hours.
Examination of new media as independent voices for cultural and political movements; principles governing the design, presentation, and evaluation of blogs as a persuasive medium in society.
Cross Listing: COMM 250/JOUR 250.

JOUR 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Research problems related to communication field. Individual work, fitted to special needs of specific student as determined by his or her interests and aptitude.
Prerequisites: Enrollment in USLA-BA-JNS concentration or JOUR minor; approval of the program director.
JOUR 289 Special Topics in...
Credits 3. 3 Other Hours.
Selected topics in an identified area of journalism and mass communication. May be repeated for credit.
Prerequisites: Enrollment in USLA-BA-JNS concentration or JOUR minor.

JOUR 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a chosen faculty member in Journalism Studies. May be taken for a maximum of 3 hours credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

JOUR 301/COMM 307 Communication Law and Policy
Credits 3. 3 Lecture Hours.
Law and policy that create the context and consequences for communication via mass media, social media, organizational, group and interpersonal communication, free speech, free press, libel, privacy, copyright, cybersecurity, constitutional principles, international law and human rights, fairness, equity and diversity in communication.
Prerequisites: Junior or senior classification, or approval of instructor; COMM-307 also taught at Galveston campus.
Cross Listing: COMM 307/JOUR 301.

JOUR 303 Media Writing II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Interpretative news gathering and writing for various media; basic communication law and ethics; assigned practice on campus or other publications.
Prerequisites: JOUR 203, enrollment in journalism minor or USLA-BA-JNS concentration; or approval of program director.

JOUR 304 Editing for the Mass Media
Credits 3. 3 Lecture Hours.
Principles and practice of editing including: improving and tightening text; writing headlines, titles and subheads; self-editing and editing others; tailoring texts for specific audiences; understanding style guides.
Prerequisite: Grade of C or better in JOUR 203; enrollment in journalism minor or USLA-BA-JNS concentration; or approval of program director.

JOUR 317/COMM 317 Social Media Law
Credits 3. 3 Lecture Hours.
Laws and regulations applied to social media, including communication law applied to enduring issues in the social media context; legal problems unique to social media; free speech, commercial speech and employment law as they affect individual users of social media as well as groups and organizations promoting points of view or products via social media, and employers.
Prerequisites: Grade of C or better in COMM 307/JOUR 301 or JOUR 301/COMM 307; junior or senior classification or approval of instructor.
Cross Listing: COMM 317/JOUR 317.

JOUR 341 Mobile Journalism
Credits 3. 3 Lecture Hours.
Multimedia journalism; photography, audio and video as used in journalism; reporting stories; adaptation of storytelling across media platforms; real-time mobile publishing.
Prerequisites: Junior or senior classification or approval of instructor.

JOUR 359 Reporting Sports
Credits 3. 3 Lecture Hours.
Gathering, organizing, researching, evaluating and writing sports information; employing accepted professional sports writing style across various news media platforms.
Prerequisites: Junior or senior classification.

JOUR 365/COMM 365 International Communication
Credits 3. 3 Lecture Hours.
Mass media, international, and cross-cultural audiences, theoretical, pragmatic, political and ethical issues; including cultural differences, comparative media systems, development, communication, patterns of world news flow, political propaganda, impact of international advertising and other issues.
Prerequisite: Junior or senior classification; COMM-365 also taught at Galveston and Qatar campuses.
Cross Listing: COMM 365/JOUR 365.

JOUR 450 Political Reporting
Credits 3. 3 Lecture Hours.
Interviewing; reporting; and writing various types of political stories and commentary; exploration of ethical principles and issues in political reporting including role of free press in a democracy.
Prerequisite: Junior or senior classification or approval of instructor.

JOUR 451 Arts & Entertainment Journalism
Credits 3. 3 Lecture Hours.
Arts & Entertainment Journalism. Journalistic coverage of arts and entertainment issues and events; examination of reviews and feature stories; feature writing and criticism; extensive workshop experience; emphasis on the value of research, self-editing and revision.
Prerequisite: Junior or senior classification or approval of instructor.

JOUR 455 Literary Nonfiction
Credits 3. 3 Lecture Hours.
Explores the art of writing literary nonfiction, a major trend in 21st century journalism; examines several forms of literary nonfiction, including personal essay, memoir, historical biography and modern narrative: to be written in each form; provides extensive workshop experience; emphasizes the value of critiques, self-editing and revision.
Prerequisite: Junior or senior classification or approval of instructor.

JOUR 458/COMM 458 Global Media
Credits 3. 3 Lecture Hours.
Study of globalization through media ownership; content, flow, cultural values, political power and technological impact; implications of globalization for local economies and audiences.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: COMM 458/JOUR 458.

JOUR 468 Magazine Feature Writing
Credits 3. 3 Lecture Hours.
Focus on the ability to communicate through a variety of styles including traditional long-form magazine writing and profiles; critical analysis and adaptation of writing skills for the latest trends in magazine, including audio and multimedia storytelling and the advent of purely digital magazines.
Prerequisites: JOUR 203; junior or senior classification, or approval of instructor; major in university studies-journalism or minor in journalism.

JOUR 484 Internship
Credits 0 to 3. 0 to 3 Other Hours.
Directed internship in a private firm or public agency to provide on-the-job experience appropriate to the student's degree program and career objectives. To be taken on a satisfactory/unsatisfactory basis. Maximum of 3 credits may apply toward degree.
Prerequisites: Junior or senior classification; enrollment in USLA-BA-JNS concentration or JOUR minor; approval of instructor.
JOUR 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Research problems related to communication field. Individual work, fitted to special needs of specific student as determined by his or her interests and aptitude.
Prerequisites: Junior or senior classification; enrollment in USLA-BA-JNS concentration or JOUR minor; approval of instructor.

JOUR 489 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of journalism and mass communication. May be repeated for credit.
Prerequisites: Junior or senior classification; enrollment in USLA-BA-JNS concentration or JOUR minor; or approval of instructor.

JOUR 490 Journalism as a Profession
Credits 3. 3 Lecture Hours.
Exit-level course for interdisciplinary minor in Journalism; requires students to produce publication-quality projects; includes seminars in contemporary news media issues and practices.
Prerequisites: Junior or senior classification; enrollment in USLA-BA-JNS concentration or JOUR minor; and approval of instructor.

JOUR 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a chosen faculty member in Journalism Studies. May be taken for a maximum of 3 hours credit.
Prerequisites: Grade of C or better in JOUR 203; junior or senior classification and approval of instructor.

KINE - Kinesiology (KINE)

KINE 120 The Science of Basic Health and Fitness
Credit 1. 1 Lecture Hour. 1 Lab Hour.
Overview of the human body; scientific fundamentals of stress, fitness, nutrition, disease and drug use; interdisciplinary focus on wellness and longevity; integrated physical activity experiences centering on principles and applications of the scientific basis of conditioning; not open to students who have taken KINE 223; also taught at Galveston campus.

KINE 121 Physical and Motor Fitness Assessment
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Assessment of individual physical fitness and motor ability profiles for students majoring in kinesiology.
Prerequisite: Kinesiology major.

KINE 167 Visual and Performing Arts—Jazz Dance II
Credit 1. 2 Lab Hours.
Visual and Performing Arts—Jazz Dance II. Intermediate study of jazz dance; review of historical background and cultural heritage; includes several jazz styles; proper body mechanics and alignment; placement exam required on the second day of class.
Prerequisite: Beginning jazz dance or approval of instructor.

KINE 175 Gender Neutral Partnering
Credit 1. 2 Lab Hours.
Explores the fundamental principles of partnering; explores the properties of momentum, weight sharing, contact improvisation, breath, timing and trust; develops movement phrases on the principles of impromptu and partnering.
Prerequisite: DCED 372 or approval of instructor.

KINE 198 Health and Fitness Activity
Credit 1. 2 Lab Hours.
Half lecture; half activity; student choice of designated fitness or strength related activities; lecture portion covers current health topics.

KINE 199 Required Physical Activity
Credit 1. 2 Lab Hours.
(Any 1-hour PHED activity course) Required Physical Activity. Selection from a wide variety of activities designed to increase fitness and/or encourage the pursuit of lifetime activity; also taught at Galveston campus.

KINE 201 Pilates Apparatus
Credits 2. 2 Lecture Hours.
Study of Pilates apparatus work as designed by Joseph H. Pilates; basic principles of Pilates including breathing, pelvic and ribcage placement, scapulae stabilization, head and cervical alignment; uses apparatuses such as reformer, cadillac, chair, and barrel; incorporates the use of props such as rollers, mini balls, physioballs, blocks, therabands and pinky balls into apparatus work. May be taken 2 times for credit.
Prerequisites: KINE 198--Pilates Mat I; dance science track majors only or approval of instructor.

KINE 210 The Art of Movement
Credits 3. 3 Lecture Hours.
Introductory course that examines and appreciates movement as expressed by every culture; movement is a function driven by context, whether practical or artistic; this course examines how dance is used to advance personal, social expression via design, patterning, connoted meaning, and inter-connectivity of form; in-class discussions, applications, and presentations, students attend and critique off-campus dance productions to enhance perspective, experience and appreciation of dance movement; Galveston campus; also taught at College Station campus.

KINE 213 Foundations of Kinesiology
Credits 3. 3 Lecture Hours.

KINE 214/HLTH 214 Health and Physical Activity for Children
Credits 3. 3 Lecture Hours.
(PHED 1331) Health and Physical Activity for Children. Coordinated school health and physical activity programs appropriate for elementary aged children; focus on the content of the curriculum and the philosophical underpinnings of programming related to health and physical activity.
Cross Listing: HLTH 214/KINE 214.

KINE 215 Fundamentals of Coaching
Credit 1. 1 Lecture Hour.
(PHED 1321) Fundamentals of Coaching. Study modern theories and applications related to coaching; philosophies, styles, techniques, team organization, liability and administration.
Prerequisite: Kinesiology majors and coaching minors only.

KINE 223 Introduction to the Science of Health and Fitness
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Overview of the human body systems; interdisciplinary focus on wellness, fitness, nutrition, disease, drug use; integrated physical activity centering on principles and applications of conditioning; collect data, evaluate information, formulate plans based on findings; experience with pedometers, heart rate monitors, bioelectrical impedance devices, software and other technology; also taught at Galveston campus.
KINE 240/HLTH 240 Computer Technology in Health and Kinesiology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of current technology in the areas of health and kinesiology; fundamentals of computers and their use; application of commercial software to health and kinesiology settings; use of computer networks for communications and research.
Prerequisite: Freshman or sophomore classification in health or kinesiology.
Cross Listing: HLTH 240/KINE 240.
KINE 260 Movement Lab: Ballet I
Credits 2. 0 Lecture Hours. 5 Lab Hours.
Understand body alignment through ballet technique; assess individual muscular and skeletal imbalances during a ballet technique class; video references of proper body alignment; anatomical explanation and assessment of individual’s use of lateral rotation in ballet technique. May be taken 3 times for credit.
Prerequisites: Grade of B or better in DCED 260; dance science majors, dance concentration majors and dance minors; or approval of instructor.
KINE 271 Movement Lab: Modern Dance I
Credits 2. 0 Lecture Hours. 5 Lab Hours.
Understand body alignment through modern dance; assess individual muscular and skeletal body imbalances during a modern dance class; introduction of how to work with imbalances in the body while executing proper dance technique; understand the structural and muscular alignment of parallel versus lateral rotation. May be taken 3 times for credit.
Prerequisites: Grade of B or better in DCED 271; dance science majors, dance concentration majors and dance minors; or approval of instructor.
KINE 282 Culture of Wellness
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Explore the dimensions of wellness across worldwide cultures; analyze, compare and contrast wellness choices and their impact on the individual and society; investigate a global region and its wellness practices; integrate physical activity experiences that are centered on the history and culture of a focus activity that originated outside the United States.
KINE 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Work on a specified topic with the intent of promoting independent reading, research and study; supplement existing course offerings or subjects not presently covered.
Prerequisites: Freshman or sophomore classification; approval of instructor.
KINE 289 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours.
Selected topics in an identified area of kinesiology. May be repeated for credit.
KINE 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in kinesiology. May be repeated 4 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.
KINE 302 Applied Exercise Physiology for Coaches
Credit 1. 1 Lecture Hour.
Survey of the physiology of exercise with an emphasis on topics in applied physiology that coaches should understand in working with student athletes of both genders and different ages.
Prerequisites: Grade of C or better in KINE 306 or concurrent enrollment; junior or senior classification or approval of instructor.
KINE 305 Sport Nutrition
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Optimal nutritional intake in support of peak performance in sport and dance; food as fuel and which fuels are most important to specific sport/dance activities; the role nutritional supplements can play; fluid balance; weight management for athletes and dancers.
Prerequisites: NFSC 202 or equivalent or approval of instructor; junior or senior classification.
KINE 306 Functional Anatomy for Coaches
Credit 1. 2 Lab Hours.
Introduction to musculoskeletal anatomy and movement analysis and the applications of these topics to basic sport skills.
Prerequisite: Junior or senior classification or approval of instructor.
KINE 307 Lifespan Motor Development
Credits 3. 3 Lecture Hours.
Developmental characteristics and contemporary issues associated with motor behavior across the lifespan.
Prerequisite: Junior or senior classification or approval of instructor.
KINE 308 Integrated Adventure Education
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Philosophy of outdoor education in a physical education program; designing and implementing outdoor adventure activities in an experiential and interdisciplinary manner for reinforcing the Texas Essential Knowledge and Skills.
Prerequisites: Junior or senior classification or instructor approval.
KINE 311 Fundamental Rhythms and Dance
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Appreciation of rhythms and dance movements in a cultural context; analysis of dance performance; basic understanding of the various dance components.
Prerequisite: Approval of instructor.
KINE 312 Coaching of Baseball
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Theory and practice of coaching fundamentals in baseball.
Prerequisite: Grade of C or better in KINE 215.
KINE 314 Coaching of Soccer
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Study of modern theories and applications related to coaching soccer.
Prerequisites: Grade of C or better in KINE 215.
KINE 317 Coaching of Football
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Theory and practice of coaching fundamentals in football.
Prerequisite: Grade of C or better in KINE 215.
KINE 318 Athletic Injuries
Credits 3. 3 Lecture Hours.
Overview of the profession of athletic training; comprehensive analysis of the theories and practices in preventing, recognizing and treating common athletic injuries.
Prerequisites: Grade of C or better in BIOL 319 or KINE 306; junior or senior classification.
KINE 320 Advanced Athletic Injuries
Credits 3. 3 Lecture Hours.
Principles and procedures of therapeutic modalities, therapeutic exercise and rehabilitation as they relate to physical education, athletic training and physical therapy.
Prerequisites: KINE 318 and approval of instructor.
KINE 321 Coaching of Volleyball  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Coaching fundamentals in volleyball.  
Prerequisites: Grade of C or better in KINE 215.  

KINE 324 Career Development in Coaching and Youth Development  
Credits 3. 3 Lecture Hours.  
Topic relevant to and career options in the coaching profession; preparation of future coaches and youth development professionals for successful careers; exploration and development of skills and knowledge to lead and manage individuals and teams.  
Prerequisites: Junior or senior classification; approval of instructor.  

KINE 325 Event and Tournament Operations for Coaches  
Credits 2. 2 Lecture Hours.  
Develop knowledge and skills related to event and tournament organization; working with sport governing bodies, school officials, comprehending risk management, financial management; classroom experiences, observations and field-based experiences to link theory into practice.  

KINE 334 Coaching in Personal Training  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
An overview of the knowledge, skills, and expectations associated with being a competent personal trainer or fitness professional; fundamentals in addressing an individual’s health, medical and fitness status, along with comprehending fitness concepts including nutrition, bioenergetics, biomechanics and applied anatomy.  
Prerequisites: Grade of C or better in BIOL 111; junior or senior classification; or approval of instructor.  

KINE 335 Coaching in Group Fitness  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
An overview of the knowledge, skills and expectations associated with being a competent group fitness instructor; creation, application and adaptation of a variety of group fitness classes based on population size, skill level, equipment available and facility space; basic business practices and professional certification procedures that are required of a fitness professional.  
Prerequisites: Grade of C or better in BIOL 111; junior or senior classification; or approval of instructor.  

KINE 340 Essentials of Strength and Conditioning  
Credits 3. 3 Lecture Hours.  
Current principles and procedures essential to strength training and conditioning practices; emphasis on development and practical applications of scientific based anaerobic conditioning, flexibility, mobility, muscular strength, power and aerobic endurance program designs.  
Prerequisites: Junior or senior classification; grade of C or better in KINE 318 or KINE 320; recommend KINE 199 Majors Aerobic Movement, KINE 199 Majors Resist Flex prior to registering.  

KINE 351 Coaching of Basketball  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Theory of fundamental skills needed to coach basketball with emphasis on knowledge of rules, strategies and skill analysis.  
Prerequisites: Grade of C or better in KINE 215.  

KINE 355 Coaching of Track  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Theory and practice of coaching fundamentals in track and field events.  
Prerequisite: Grade of C or better in KINE 215.  

KINE 361 Movement Lab: Ballet II  
Credits 2. 0 Lecture Hours. 5 Lab Hours.  
Self evaluation of correct body alignment and imbalances while executing proper ballet technique; observation and assessment of the student’s progression throughout the semester in regards to proper alignment and technique. May be taken 3 times for credit.  
Prerequisite: Grade of B or better in DCED 361; dance science majors, dance concentration majors and dance minors; or approval of instructor.  

KINE 372 Movement Lab: Modern Dance II  
Credits 2. 0 Lecture Hours. 5 Lab Hours.  
Self evaluation of correct body alignment and imbalances while executing proper modern dance technique; observation and assessment of the student’s progression throughout the semester in regards to proper alignment and technique. May be taken 3 times for credit.  
Prerequisite: Grade of B or better in DCED 372; dance science majors, dance concentration majors and dance minors; or approval of instructor.  

KINE 386 Sport Physiology  
Credits 3. 3 Lecture Hours.  
Scientific physiological principles as they relate to sport and exercise in the preparation of current and future coaches; emphasis on cognitive, physiological knowledge and practical applications necessary to earn a creditable national certification; safely and effectively train athletic, fitness and general populations.  
Prerequisites: KINE 121 and KINE 213; grade of C or better in KINE 302.  

KINE 403 Dance Wellness  
Credits 3. 3 Lecture Hours.  
Using scientific methods to evaluate the dancer’s body; implementation of dance screening process and creation of programs to address specific dance related injuries, imbalances or misalignments; study of current research in dance medicine/science and application of this knowledge to increase longevity of movement.  
Prerequisites: BIOL 319, BIOL 320; dance science track majors only; admittance into the professional phase or approval of instructor; junior or senior classification.  

KINE 404 Coaching Psychology  
Credits 3. 3 Lecture Hours.  
Mental aspects of coaching for performance improvement in athletic and exercise settings; focus on coaching applications of theoretical concepts including individual differences, motivation, team and group dynamics, leadership, performance enhancement, positive and negative health behaviors and youth development.  
Prerequisite: Junior or senior classification, or approval of instructor.  

KINE 406 Motor Learning and Skill Performance  
Credits 3. 3 Lecture Hours.  
Learning in psychomotor domain; motor learning theories, physiological bases of skill behavior, motor and skill learning, state of performer and application of instructional techniques in motor learning and skill performance.  
Prerequisites: Grade of C or better in BIOL 319, BIOL 320, and PHYS 201.  

KINE 407 Motor Control and Learning Lab  
Credit 1. 3 Lab Hours.  
Insight into the perception-action processes that support the learning and control of complex multi-joint movements to perform activities of daily living; reaction time and movement time, random and blocked practice, uni-manual and bi-manual skills; labs and measures collected and linked with papers discussing neural areas supporting action planning, memory encoding and storage, retrieval and forgetting.  
Prerequisites: Grade of C or better in KINE 406 or concurrent enrollment; junior or senior classification.
KINE 425 Tests and Measurements
Credits 3. 3 Lecture Hours.
Comprehensive examination of the conceptual and theoretical aspects of measurement and evaluation in the field of kinesiology; emphasis on the application of statistical techniques germane to measurement and evaluation.
Prerequisites: Junior or senior classification; or approval of instructor for non-majors.

KINE 426 Exercise Biomechanics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
An integrated, mechanistic study of biomechanics of human motion during physical activity and exercise; biology and mechanical properties of the human movement system including bones, tendons, ligaments, cartilage, skeletal muscles, joints and whole body systems investigated.
Prerequisites: Grade of C or better in PHYS 201, BIOL 319, and BIOL 320; junior or senior classification; admission to the professional phase of program or approval of instructor for non-majors.

KINE 427 Therapeutic Principles
Credits 3. 3 Lecture Hours.
Examination of human tissue types, characteristics, and physiology pertaining to injury, pain transmission, and the healing process; study of common therapeutic modalities such as ultrasound and electricity with emphasis on physiological mechanisms of effect.
Prerequisites: Grade of C or better in BIOL 319, BIOL 320, and PHYS 201; junior or senior classification.

KINE 429 Adapted Physical Activity
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Kinesiology for individuals with handicapping conditions; emphasis on cognitive recognition of such handicaps as postural deviations, emotional disturbances, convulsive disorders, vision and auditory problems, and other learning disability conditions.
Prerequisite: Grade of C or better in HEFB 222/KNFB 222 or KNFB 222/HEFB 222; grade of C or better in BIOL 107 or BIOL 111; approval of instructor for non-majors.

KINE 431 Ropes Course and Group Process
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Techniques of group facilitation for initiatives of ropes/challenge course events; activity presentation and sequencing, safety techniques and construction principles, and processing experiences for transfer of learning.
Prerequisite: Junior or senior classification; approval of instructor.

KINE 433 Physiology of Exercise
Credits 3. 3 Lecture Hours.
Physiological bases of exercise and physical conditioning; measurement of metabolic efficiency during exercise, neuromuscular efficiency and body composition.
Prerequisites: Grade of C or better in BIOL 319, BIOL 320, and PHYS 201; junior or senior classification; approval of instructor for non-majors.

KINE 435 Physiology of Exercise Lab
Credit 1. 3 Lab Hours.
Investigation of the body's response and adjustment of physiological systems to exercise; benefits to physiological systems from exercise.
Prerequisites: Grade of C or better in KINE 433; junior or senior classification; admission to the professional phase.

KINE 439 Exercise Evaluation and Prescription
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Prerequisites: Grade of C or better in KINE 433 or concurrent enrollment; senior classification; admission to the professional phase of program or approval of instructor for non-kinesiology majors.

KINE 462 Movement Lab: Ballet III
Credits 2. 0 Lecture Hours. 5 Lab Hours.
Peer evaluation of body alignment, imbalances and biomechanics of movement; explanation of kinesthetic principles and injury prevention through ballet technique; conditioning programs for a peer's imbalances and improper technique in a ballet class. May be taken 3 times for credit.
Prerequisites: Grade of B or better in DCED 462; dance science majors; dance concentration majors and dance minors; or approval of instructor.

KINE 473 Movement Lab: Modern Dance III
Credits 2. 0 Lecture Hours. 5 Lab Hours.
Peer evaluation of body alignment, imbalances and biomechanics of movement; explanation of kinesthetic principles and injury prevention through modern dance technique; develop conditioning program for a peer’s imbalances and improper technique in a modern dance class. May be taken 3 times for credit.
Prerequisites: Grade of B or better in DCED 473; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 482 Seminar
Credit 1. 1 Lecture Hour.
Acquaint students with current research and the research process in their chosen field of study (kinesiology). May be taken four times for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Grade of C or better in BIOL 319, BIOL 320, KINE 302, and KINE 306; junior or senior classification.

KINE 483 Practicum in Kinesiology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Participation and study in the areas of fitness assessment, exercise and/or sport programming, and fitness/sport administration; acquisition and practice of professional and/or clinical skills in kinesiology.
Prerequisites: KINE 199 (Aerobic Movement); senior classification; admission to the professional phase; approval of instructor.

KINE 484 Internship in Kinesiology
Credits 0 to 12. 0 to 12 Other Hours.
Supervised internship with corporate fitness centers, rehabilitation centers, hospitals, recreation centers and similar agencies and organizations.
Prerequisites: Grade of C or better in KINE 483; completion of all coursework.

KINE 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Special problems in kinesiology assigned to individual students or to groups.
Prerequisites: Junior or senior classification; approval of instructor.

KINE 489 Special Topics in...
KNFB 222/HEFB 222 Teaching and Schooling in Modern Society
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Developing an understanding of students in multiple settings and levels; development, structure, history, finance, and management of schools in a democratic society; philosophical, ethical and moral dimensions of teaching; professional role of teacher.
Prerequisite: Majors only; junior or senior classification.
Cross Listing: HEFB 222/KNFB 222.

KNFB 315 Elementary School Physical Activities
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Physical activities, materials and curriculum in elementary schools.
Prerequisite: Grade of C or better in HEFB 222/KNFB 222 or KNFB 222/HEFB 222; grade of C or better in BIOL 107 or BIOL 111; grade of C or better in PHYS 201; junior or senior classification.

KNFB 324/HEFB 324 Technology and Teaching Skills for the 21st Century Learner
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Preparation of future Health and Physical Education teachers with practical skills related to: technology in the classroom/gymnasium, strategies for addressing urban education and English language learners, liability, management and classroom discipline, development of professional communication skills and time management; includes field based experiences in diverse classroom settings.
Prerequisites: Grade of C or better in HEFB 222/KNFB 222 or KNFB 222/HEFB 222; grade of C or better in BIOL 107 or BIOL 111; junior or senior classification.
Cross Listing: HEFB 324/KNFB 324.

KNFB 325/HEFB 325 Introduction to Secondary School Teaching
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduce fundamental teaching skills and theories necessary for preparing reflective teachers; examine classroom management, learning strategies and assessment techniques; classroom lectures combined with field-based experiences to link theory into practice.
Prerequisites: Grade of C or better in HEFB 324/KNFB 324; junior classification.
Cross Listing: HEFB 325/KNFB 325.

KNFB 416 Middle and Secondary School Physical Activities
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Physical activities, teaching strategies, media techniques and curriculum in middle and secondary schools.
Prerequisites: Grade of C or better in HEFB 222/KNFB 222 or KNFB 222/HEFB 222, or concurrent enrollment; approved acceptance to field experience.

KNFB 450/HEFB 450 Supervised Student Teaching
Credits 6. 6 Other Hours.
Observation and participation in an accredited public school classroom; techniques of teaching student’s teaching fields, and appropriate instructional strategies for assigned student population.
Prerequisites: Grade of C or better in HLTH 415 or KNFB 416.
Cross Listing: HEFB 450/KNFB 450.

LAND - Landscape Architecture (LAND)

LAND 101 Introduction to Landscape Architectural Practice
Credit 1. 1 Lecture Hour.
Explores and evaluates the diversity of landscape architectural practice; defines the traditional practice forms and examines evolving and boundary expanding opportunities for future practice; introduces the departmental curriculum and faculty.

LAND 111 Landscape Architecture Communications I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Introduction to basic drafting and drawing required for landscape architecture projects, introduction to basic concepts, principles of graphic composition and pencil sketching techniques.

LAND 112 Landscape Architectural Communications II
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Advanced study in traditional and computer-based communication techniques in landscape architecture including studio explorations in concept and analysis graphics, color sketching, perspective drawing and rendering, desktop publishing, image capturing and manipulation, and compilation of graphic presentations; lecture, demonstrations and studio assignments.
Prerequisite: LAND 111 or approval of instructor.

LAND 210 Microclimatic Urban Design: Cool Solutions for Hot Cities
Credits 3. 3 Lecture Hours.
Introduction to methods of designing thermally-comfortable urban microclimates to reduce negative impacts of hot cities on human health and well-being; includes methods of analyzing and illustrating climate data; human thermal comfort modeling; application to urban design and landscape architecture; no previous drawing or design skills necessary.

LAND 211 Landscape Design I
Credits 4. 2 Lecture Hours. 7 Lab Hours.
Beginning studio course in land design; forces that produce useable three-dimensional site-space relationships; problems presented to give a basic knowledge, scope and application of landscape architecture design principles. Overnight field trip required.
Prerequisites: LAND 112; junior or senior classification or approval of instructor.

LAND 212 Landscape Design II
Credits 4. 2 Lecture Hours. 7 Lab Hours.
Continuation of LAND 318; basic design principles that combine natural systems (such as landform, water, vegetation, wildlife habitat, soils, climate) and human-built systems (such as roads, building utilities).
Prerequisites: LAND 211 and LAND 231.
LAND 211 Landscape Design III
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Continuation of LAND 311; land design projects of increased complexity and emphasis on sustainability, with site scale problems used to demonstrate complete design thought. One or more field trips may be required.
Prerequisite: LAND 311.

LAND 232 Landscape Construction II
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Second construction studio course; essential construction materials and systems applied in landscape development; topics include statics and mechanics of simple structures; properties and procedures of wood, masonry and concrete construction; construction sequencing and material costs; development of a construction document package required. Construction observation field trips required.
Prerequisites: LAND 211 and LAND 231; junior or senior classification.

LAND 240 History of Landscape Architecture
Credits 3. 3 Lecture Hours.
Introduction to history of land use, urban design and planning, and site design from prehistory to the present in Europe, Asia, Africa and Australia; contemporary issues in landscape architecture such as sustainability, ecological design, and professional roles, both historically and at present, with comparisons to American examples.
Prerequisite: Sophomore classification or higher.

LAND 241 History and Development of Landscape Architecture in North America
Credits 3. 3 Lecture Hours.
Interaction between people and the land in North America from first settlement to the present; settlement patterns, sustainable land use, urban design and plan, and site design in context of cultural, social, and technological factors; current issues in landscape architecture, landscape urbanism, and land-use planning.

LAND 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in landscape architecture. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

LAND 301 Landscape Architecture Theory
Credits 3. 3 Lecture Hours.
Landscape Architecture. Relevant theoretical discourse in landscape architecture, urban planning and urban design; urban theory, social and cultural theory; critical and creative thinking; ecological planning and design; design process and sustainable development; environmental philosophy and environmental aesthetics.
Prerequisite: Junior classification or approval of instructor.

LAND 311 Landscape Design III
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Design process, sustainable landscape design, synthesis and design refinement; problems to stimulate highly creative self-motivated results, design thinking to integrate behavioral settings into natural and/or built landscape systems.
Prerequisites: LAND 212 and LAND 232; junior or senior classification.

LAND 312 Landscape Design IV
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Continuation of LAND 311; land design projects of increased complexity and emphasis on sustainability, with site scale problems used to demonstrate complete design thought. One or more field trips may be required.
Prerequisite: LAND 311.

LAND 331 Landscape Construction III
Credits 4. 2 Lecture Hours. 4 Lab Hours.
Third construction studio course; sustainable water management techniques in landscape development; theory, principles and techniques of low impact development; construction document preparation, working drawings, project layout and design; theory and principles of irrigation and lighting design. Field trips required.
Prerequisites: LAND 320 and LAND 330; junior or senior classification.

LAND 412 Landscape Design VI
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Capstone studio; advanced study and research designed to go beyond the core design experience; introduction of issues, methodologies, tools and techniques developing in professional practice.
Prerequisite: LAND 312.

LAND 431 Professional Practice
Credits 3. 3 Lecture Hours.
Procedures, management and ethical frameworks in which professional landscape architectural practice occurs; topics include forms of practice, employment, proposal preparation, fee and contract structures, project management, roles of the landscape architect, presentations and public participation, legal and ethical responsibilities.
Prerequisites: Senior classification; approval of instructor.

LAND 484 Summer Internship
Credits 0. 0 Lecture Hours.
Practical experience in an office of design allied professionals; 10 week internship with a minimum of 400 hours; continuous employment; departmental pre-approval through the department internship coordinator required. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Upper level classification and approval of internship coordinator; LAND 321.

LAND 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in various phases of landscape architecture assigned to individual students or to groups. Consultation and assigned collateral reading.
Prerequisite: Approval of department head.

LAND 489 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified field of landscape architecture. May be repeated for credit.

LAND 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in landscape architecture. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
LAND 494 Internship
Credits 6. 6 Lecture Hours.
An internship (15 week, 600 hours) with a landscape architecture or landscape architecture-related company that exposes the student to landscape architectural professional practice; monthly reports, final internship portfolio and internship supervisor assessment letter required; distance education course with non-resident status.
Prerequisites: LAND 321 and approval of coordinator.

LBAR - College of Liberal Arts (LBAR)

LBAR 181 First-Year Seminar in the Liberal Arts
Credits 1 to 3. 1 to 3 Lecture Hours.
First-year seminar on interdisciplinary topics of interest in the humanities and social sciences. May be taken on a satisfactory/unsatisfactory basis. May be repeated for credit.
Prerequisites: Freshman or sophomore classification; approval of the dean of liberal arts.

LBAR 200 Topics in Liberal Arts I
Credits 3. 3 Lecture Hours.
Introduction to the program, development of critical thinking skills and international perspectives; introductory course for the Liberal Arts Cornerstone Honors Learning Community.
Prerequisite: Admission to College of Liberal Arts Cornerstone Program Learning Community.

LBAR 203 Foundations of the Liberal Arts: Humanities
Credits 0 to 3. 0 to 3 Lecture Hours.
The intellectual roots and characteristic values and methods of liberal arts studies with emphasis on humanities disciplines. May be taken up to three hours for credit.
Prerequisite: Approval of the dean of liberal arts.

LBAR 204 Foundations of the Liberal Arts: Social Sciences
Credits 0 to 3. 0 to 3 Lecture Hours.
The intellectual roots and characteristic values and methods of liberal arts studies with emphasis on social science disciplines. May be taken up to three hours for credit.
Prerequisite: Approval of the dean of liberal arts.

LBAR 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Readings for specific needs of major or minor in departments in Liberal Arts.

LBAR 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of liberal arts. May be repeated for credit.
Prerequisite: Freshman or sophomore classification in liberal arts or approval of instructor.

LBAR 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Liberal Arts.
Prerequisites: 3 hours of 200-level courses in any department in the College of Liberal Arts; freshman or sophomore classification and approval of instructor.

LBAR 300 Liberal Arts Study Abroad
Credits 1 to 18. 1 to 18 Other Hours.
For students in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to approved program; approval of study abroad coordinator and academic dean.

LBAR 330 Introduction to International Study
Credits 1 to 3. 1 to 3 Lecture Hours.
Readings and research preparatory to participation in a summer or semester at an international site.
Prerequisite: Approval of the dean of liberal arts.

LBAR 331 Studies in European Civilization and Culture I
Credits 1 to 6. 1 to 6 Lecture Hours.
European civilization and culture as seen especially through literature, history, philosophy and the arts. To be taught only at an overseas site.
Prerequisite: LBAR 330 or approval of instructor.

LBAR 332 Studies in European Civilization and Culture II
Credits 1 to 6. 1 to 6 Lecture Hours.
European civilization and culture as seen especially through political, social and economic developments. To be taught only at an overseas site.
Prerequisite: LBAR 330 or approval of instructor.

LBAR 392 Cooperative Education: Liberal Arts
Credit 1. 1 Other Hour.
Educational work assignment for a student in a career-related field; supervision by the employer, co-op coordinator and course instructor; technical report approved by the course instructor required. To be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Approval of college co-op coordinator.

LBAR 400 Topics in Liberal Arts II
Credits 3. 3 Lecture Hours.
Emphasis on developed critical thinking, international perspectives and scholarly research; capstone course in the Liberal Arts Cornerstone Program Honors Learning Community. May be taken 3 times for credit as topics will vary each semester.
Prerequisites: LBAR 200 and admission to College of Liberal Arts Cornerstone Learning Program Community.

LBAR 484 Internship
Credits 0 to 12. 0 to 12 Other Hours.
Directed internship in a private firm, government or non-profit agency; provides experiential learning appropriate to the student’s major and career objectives. Must be taken on a satisfactory/unsatisfactory basis. May be taken a maximum of 12 hours for credit.
Prerequisites: Junior or senior classification and approval of major advisor.

LBAR 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Readings for specific needs of major or minor in departments in Liberal Arts; also taught at Qatar campus.

LBAR 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of liberal arts. May be repeated for credit.

LBAR 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Liberal Arts. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of dean of college.
LDEV - Land Development (LDEV)

LDEV 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual instruction in selected aspects of land development not adequately covered by other courses with stress on reports and readings in selected areas of land development.
Prerequisite: Junior classification or approval of instructor.

LDEV 489 Special Topics in...
Credits 1 to 6. 1 to 6 Lecture Hours.
Selected topics in an identified area of land and real estate development. May be repeated for credit.
Prerequisite: Junior classification or approval of instructor.

LING -Linguistics (LING)

LING 209/ENGL 209 Introduction to Linguistics
Credits 3. 3 Lecture Hours.
Nature of human language and of linguistics; includes an introduction to phonology, syntax, semantics and morphology and the role of spoken and written discourse in sustaining societal arrangements.
Cross Listing: ENGL 209/LING 209.
LING 291 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in linguistics.
Prerequisites: LING 209/ENGL 209; freshman or sophomore classification and approval of instructor.

LING 307 Language and Culture
Credits 3. 3 Lecture Hours.
Language and its correlations with other aspects of culture; nature and definition of language; non-technical overview of linguistic science and language as it is related to other behavior.
Prerequisite: Junior or senior classification.

LING 310/ENGL 310 History of the English Language
Credits 3. 3 Lecture Hours.
Phonological, grammatical and lexical history of the English language; brief discussion of some other Indo-European languages; principles of linguistic change, as reflected in English.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 310/LING 310.

LING 403 Language and Gender
Credits 3. 3 Lecture Hours.
Language and gender from a sociolinguistic perspective; gender in the words and structures of language; gender representation and gendered language use in the media, and a variety of sociocultural contexts; language use in intimate relationships; computer-mediated discourse; language, sexuality, and sexual orientation.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 403 and WGST 403.

LING 481 Senior Seminar
Credits 3. 3 Lecture Hours.
Seminar on significant figures, movements and issues in linguistics or rhetoric, with special attention to the methods and materials of scholarship.
Prerequisites: Junior or senior classification; 6 credits in linguistics.
LING 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed individual study of topics in linguistics. May be repeated for credit.

LING 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of linguistics. May be repeated for credit.

LING 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in linguistics. May be repeated 2 times for credit.
Prerequisites: 6 credits of linguistics; junior or senior classification and approval of instructor.

LMAS - Latino/Mex Amer Studies (LMAS)

LMAS 201 Introduction to Latino/Mexican American Studies
Credits 3. 3 Lecture Hours.
Introductory survey of the historical presence of U.S. Latinos and Mexican Americans from an interdisciplinary perspective that incorporates the group’s global origins; application of critical thinking skills to the study of Latinos and Mexican Americans.

LMAS 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Special problems not covered by other courses; course depends upon needs and interest of the student and upon the number of credit hours. May be repeated for credit.
Prerequisites: Freshman or sophomore classification; approval of instructor.

LMAS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of Latino/a, Mexican-American studies. May be repeated for credit.
Prerequisite: Approval of instructor.

LMAS 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in Interdisciplinary Critical Studies faculty or affiliated faculty. May be repeated for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Freshman or sophomore classification.

LMAS 422 Race, Ethnicity, Crime and Justice
Credits 3. 3 Lecture Hours.
Racial/ethnic disparities in criminal offending and victimization, as well as different experiences with law enforcement, judicial, and correctional agencies.
Prerequisites: SOCI 220 or equivalent.
Cross Listing: AFST 422 and SOCI 422.

LMAS 468/HIST 468 Latinx Civil Rights Movements
Credits 3. 3 Lecture Hours.
Latinx civil rights movements in the twentieth century; Mexican American, Puerto Rican, Cuban, Central American; racism, economic inequality, labor exploitation, segregation, anti-immigrant sentiment, gender discrimination; role of liberalism, multiethnic coalitions, third world liberation movements, revolutionary nationalism, religion; movement philosophies and strategies; contemporary immigrant rights movements.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: HIST 468/LMAS 468.
LMAS 484 Internship  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed internship in a public or private organization to provide students with applied experience; opportunity to observe first hand issues and problems covered in Latino/a and Mexican-American Studies courses; designed to enhance and clarify the student's career objectives. May be taken for credit up to six hours.  
Prerequisites: Approval of instructor.

LMAS 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study of identified topics in Latino/a, Mexican-American studies. May be repeated for credit.  
Prerequisites: Junior or senior classification; approval of Instructor.

LMAS 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Other Hours.  
Selected topics in an identified area of Latino/a, Mexican-American studies. May be repeated for credit.  
Prerequisites: Junior or senior classification; approval of Instructor.

LMAS 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in interdisciplinary critical studies or affiliated faculty. May be repeated for credit.  
Prerequisites: Junior or senior classification; approval of Instructor.

MARA - Maritime Administration (MARA)

MARA 205 Introduction to Ships and Shipping  
Credits 3. 3 Lecture Hours. 0 Lab Hours.  
Introduction to the maritime industry and ships used in transportation of goods and services. Shipboard nomenclature, types and missions of merchant ships, shipbuilding nomenclature and dimensions, shipbuilding materials and methods, modes of cargo handling and their impact on ship design.

MARA 212 Business Law  
Credits 3. 3 Lecture Hours.  
Legal principles of business, legal reasoning, dispute resolution and procedure, contract law, bankruptcy law, property law, Uniform Commercial Code sections concerning contracts, security interests, negotiable instruments and sales.  
Prerequisite: Sophomore classification.

MARA 250 Management Information Systems  
Credits 2. 2 Lecture Hours.  
Introduction to the concepts and applications of management information systems, including information technology concepts, computer hardware, common business software, software selection and development, management information systems (MIS), decision support systems (DSS), and working in a digital world.

MARA 281 Seminar in Undergraduate Research Methods  
Credit 1. 1 Lecture Hour.  
An introduction to necessary undergraduate research methods in economics and business; preparation for investigative writing requirements in upper division courses in maritime business administration.

MARA 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed study on selected problems in the area of maritime administration not covered in other courses.  
Prerequisite: Approval of MARA department head.

MARA 289 Special Topics  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Study of selected topics in an identified area of maritime administration.  
Prerequisite: Approval of MARA department head.

MARA 301 Ocean Transportation I  
Credits 3. 3 Lecture Hours.  
Examination of theory and practice in the management of transportation logistics, labor, rate-making, role of government, international conventions and treaties; exposure to current trends and developments in shipping.  
Prerequisites: MARA majors - MARA 205; MGMT 211, ACCT 230, and MARA 250, or concurrent enrollment; admission to upper division in Maritime Administration; MART majors - MART 103; ECON 202 or ECON 203.

MARA 304 Ocean Transportation II  
Credits 3. 3 Lecture Hours.  
Marine insurance problems and cases and how they relate directly to a ship's officer; hull, cargo, and personal injury cases are examined from the officers' and insurers' points of view; introduction to Admiralty Law and the court process for seamen's rights and ship owners' privileges; actual hearings and trials are observed to complete the background.  
Prerequisite: MARA 301 for MART and MARA students.

MARA 324 Managerial Maritime Finance  
Credits 3. 3 Lecture Hours.  
Continuation of topics introduced in Business Finance (FINC 341) including risk and return, investment valuation, the selection of risky investment projects, capital structure, dividend policy, and methods of raising long-term capital; applications to the maritime industry are made where appropriate.  
Prerequisite: FINC 341.

MARA 350 Maritime Business Computer Programming and Security  
Credits 3. 3 Lecture Hours.  
Concepts of computer programming and security utilizing Visual Basic for Applications with emphasis to business and maritime area specifically, includes basic programming logic, programming in VBA, computer security principles and techniques for enhancing computer security.  
Prerequisites: MARA 250 and junior or senior classification.

MARA 363 The Management Process  
Credits 3. 3 Lecture Hours.  
Management as an academic discipline; goal setting; planning, controlling and decision-making; models for thinking about organizations; organization design; organization change; models for understanding individual behavior; job performance and job satisfaction; interpersonal behavior, motivation and leadership, behavior in work groups; careers in management, ethics and international management.  
Prerequisites: MARA majors - MGMT 211, ACCT 230, and MARA 250, or concurrent enrollment; admission to upper division in Maritime Administration; MART and other majors - junior or senior classification.
MARA 373 Personnel Management  
Credits 3. 3 Lecture Hours.
Strategic issues in managing human resources; shared responsibilities of line managers and human resource staff for developing and implementing human resource policies and procedures; human resource planning; job design, analysis and evaluation; staffing; compensation; performance appraisal; training and development career management; labor relations; legal, ethical and international issues.  
Prerequisite: Junior or senior classification.

MARA 401 Brokerage and Chartering  
Credits 3. 3 Lecture Hours.
Operational and legal environment of ship brokerage and chartering; responsibilities of owner and charterer under various charter forms; American, British and Canadian acts governing charters and bills of lading; rules and regulations concerning loading and discharging.  
Prerequisites: MARA 301 and senior classification.

MARA 402 Inland Waterways  
Credits 3. 3 Lecture Hours.
Development of inland waterways of the U.S. and federal policies relating to them; port and terminal development, competition with other transportation forms, manpower, rates, environmental concerns and the impact of waterway systems on regional economies.  
Prerequisites: MARA 301; ECON 202 or ECON 203; junior or senior classification.

MARA 416 Port Operations, Administration and Economics  
Credits 3. 3 Lecture Hours.
Concepts of the port and methods of intermodal transfer; port functions divided and analyzed along business lines - economics, management, finance, accounting and marketing; cost studies.  
Prerequisites: MARA 301 and junior or senior classification.

MARA 421 Admiralty Law  
Credits 3. 3 Lecture Hours.
Essential principles of admiralty, general maritime, and international law as applicable to the marine industry and ocean shipping; evolution and state of the law concerning maritime liens, ship mortgages, rights of seamen and harbor workers, limitation of liability, bills of lading and cargo carriage, collision liability, general average, marine salvage, charter parties, and international rights and responsibilities of ships and shipping.  
Prerequisites: MARA majors - MGMT 211, ACCT 230, and MARA 250, or concurrent enrollment; admission to upper division in Maritime Administration; MART and other majors - junior or senior classification.

MARA 424 Intermodal Transportation  
Credits 3. 3 Lecture Hours.
Historical development, structure, function, and regulation of highway, rail, water, pipeline, and air transportation systems. Application of economic concepts and principles to transportation development and operations.  
Prerequisites: MARA majors - MGMT 211, ACCT 230, and MARA 250, or concurrent enrollment; admission to upper division in Maritime Administration; MART majors - MART 200; ECON 203 and junior or senior classification.

MARA 435 Labor Law and Policy  
Credits 3. 3 Lecture Hours.
Federal and state public policy and laws regulating human resource management including National Labor Relations Act, Railway Labor Act, Fair Labor Standards Act, employment discrimination statutes, statutes regarding public sector unionization, and other relevant legal authorities; various forms of dispute settlement including litigation, mediation, fact finding and arbitration; legal ramifications of strategic human resource management decision making.  
Prerequisites: MARA majors - MGMT 211, ACCT 230, and MARA 250, or concurrent enrollment; admission to upper division in Maritime Administration; MART and other majors - junior or senior classification.

MARA 440 Global Economy and Enterprise Management  
Credits 3. 3 Lecture Hours.
Economic, political, social and ethical environments of international business including the determinants of trade and investment patterns and the logic of government interventions in both trade and capital markets; structure, strategy and operations of the international firm.  
Prerequisites: MARA majors - MARA 281; MGMT 211, ACCT 230, and MARA 250, or concurrent enrollment; admission to upper division in Maritime Administration and senior classification; MPPC majors - POLS 232; ECON 203 and senior classification.

MARA 450 Maritime Supply Chain Management  
Credits 3. 3 Lecture Hours.
Introduction to the concepts involved in supply chain management (SCM); SCM encompasses the functional areas of procurement, operations management, inbound/outbound transportation, customer service, and information technologies; emphasizes how these functional areas are integrated to achieve the firm's overall objectives.  
Prerequisites: SCMT 303 and SCMT 364.

MARA 466 Strategic Management  
Credits 3. 3 Lecture Hours.
Strategic issues facing organizations, including top management decision making and social responsibility; environmental and industry analysis; establishing organizational mission and objectives; corporate, business and functional level strategy formulation; global and multidomestic strategies; strategic implementation and control; integrating operations, finance, marketing and human resource strategies; case analysis.  
Prerequisites: MARA 281, MARA 363, MKTG 321, SCMT 364, FINC 341, and senior classification.

MARA 470 Environmental Law  
Credits 3. 3 Lecture Hours.
Broad background of basic statutes, regulations and cases dealing with the major issues in international and federal environmental law; focus on pragmatic training in statutory, regulatory and treaty reading and interpretation; analysis of administrative and legislative intent for law.  
Prerequisites: MARA majors - MGMT 211, ACCT 230, and MARA 250, or concurrent enrollment; admission to upper division in Maritime Administration; MART and other majors - junior or senior classification.

MARA 475 Business Leadership  
Credits 3. 3 Lecture Hours.
Focus on theory and practice of leadership; familiarize with components, theory and models of leadership; compare/contrast styles; review leadership/followership relationship as a collaborative activity resulting in achieved goals; analyze cultural and global components and ethical issues associated with leadership.  
Prerequisite: MGMT 211, ACCT 230, and MARA 250, or concurrent enrollment; admission to upper division in Maritime Administration; junior or senior classification.
MARA 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study on selected problems in the area of maritime administration not covered in other courses.
Prerequisites: MGMT 211, ACCT 230, and MARA 250, or concurrent enrollment; admission to upper division in Maritime Administration; cumulative GPA of 2.5 or higher.

MARA 491 Research in Maritime Administration
Credits 0 to 4. 0 to 4 Other Hours.
Research in Maritime Administration. Research conducted under the direction of faculty member in Maritime Administration. May be repeated 2 times for credit. Please see academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

MARA 493 International Maritime Management Experience
Credits 3. 3 Lecture Hours.
Combination of classroom and two week international travel emphasizing cultural and historic aspects of maritime industry; direct contact with managers and regulators in the international maritime industry; examination of different management styles, business practices and regulatory approaches.

MARB 310 Introduction to Cell Biology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Cellular structure/function; prokaryotic vs. eukaryotic cells; examination of cellular membranes and membrane transport; analysis of DNA replication, transcription, and protein translation (an extension of their treatment in MARB 301); introduction to the components and genetics of immunity.
Prerequisites: BIOL 112, CHEM 228, MARB 301; junior or senior classification or approval of instructor; MARS 360 is recommended but not required.

MARB 311 Ichthyology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Freshwater and marine fishes. Subject will be mainly systematic, but evolution, ecology, life history, and economics of more important species will be treated.
Prerequisites: BIOL 112 and MARB 315. Curriculum sophomore, junior or senior classification or approval of instructor.

MARB 315 Natural History of Vertebrates
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Natural history of fishes, amphibians, reptiles, birds, and mammals, with emphasis on coastal Texas vertebrates.
Prerequisites: BIOL 112. Curriculum sophomore, junior or senior classification or approval of instructor.
MARB 320 Fisheries Techniques
Credits 4. 3 Lecture Hours. 3 Lab Hours.
An introduction to theory and techniques in fisheries biology and ecology. Experience with fisheries equipment and techniques will be provided in both field and laboratory. Practical sampling design, collection, and interpretation of data from estuarine, coastal and offshore environments will be addressed.
Prerequisites: BIOL 112, MARB 311. Junior or senior classification or approval of instructor.

MARB 334 Biology of Sea Turtles
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Living sea turtles of the world, with emphasis on species in the Atlantic, Gulf and Caribbean basins. Emphasis includes phylogeny, population biology, ecology, life history, behavior, social and economic aspects and their impact on sea turtle conservation and recovery.
Prerequisites: BIOL 112, MARB 315 or instructor approval.

MARB 335 Fish Physiology
Credits 3. 3 Lecture Hours.
Study of the basic physiology of fishes. Examination of fish cardiovascular, renal, digestive, locomotor, reproductive, and central/peripheral nervous systems. Discussion of physiological adaptations enhancing survival in a water medium.
Prerequisites: BIOL 112. Junior or senior classification or approval of instructor.

MARB 340 Tropical Marine Ecology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Field-oriented experience in coral reef, mangrove, sea grass and other tropical marine ecosystems; emphasis on biodiversity, ecology and conservation issues specific to Yucatan Peninsula of Mexico.
Prerequisites: BIOL 112; all students who dive must either be a current AAUS scientific diver or present a current medical examination (which will be provided by the Diving Safety Officer or instructor) completed within the past 12 months and signed by a doctor, to the instructor before class participation in the pool will be allowed; prior to using scuba equipment, all students must provide proof of open water certification or equivalent diving experience (advanced certification recommended); approval of instructor and the Diving Safety Officer is required before any pool activity takes place; Divers Alert Network insurance, or equivalent, is required.

MARB 360 Marine Conservation Biology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Lectures and laboratories cover the major principles of conservation biology; a new synthetic field that applies concepts of ecology, systematics and evolution, biogeography, genetics, behavioral sciences, and social sciences to the conservation of marine fisheries resources. Lab exercises include morphometric and genetic variation, GIS, molecular systematics and phylogenetic inference.
Prerequisite: Junior or senior classification or approval of instructor.

MARB 403 Cetacean Behavior and Behavioral Ecology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
This course consists of lecture of up to date descriptions of Cetacean behavior and ecology; and of labs that evaluate the literature of topics of present relevance.
Prerequisite: MARB 315. Junior or senior classification or approval of instructor.

MARB 405 Marine Parasitology
Credits 3. 3 Lecture Hours.
Fundamentals of parasitology, with emphasis on marine applications. Survey of major parasites of marine animals and the diseases they cause, especially in ecologically and commercially-important host species.
Prerequisites: BIOL 112, junior or senior classification or approval of instructor.

MARB 406 Life in Extreme Environments
Credits 3. 3 Lecture Hours.
Key metabolic and physiological innovations of extremophile organisms; topics include the molecular biology, biochemistry and physiology of organisms living in extreme environments.
Prerequisites: MARB 315; CHEM 228; junior or senior classification or approval of instructor.

MARB 407 Research and Conservation in Greece-Dolphins, Fisheries and Cultural Heritage
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Lectures, readings and labs on the ecology and behavior of the vertebrate fauna of Greece; laboratory hands-on experience of the marine environment from boats, readings, videos, interpretation and select major peer-review scientific papers and books.
Prerequisites: Junior or senior classification; MARB 315 or approval of instructor.

MARB 408 Marine Botany
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Morphology, systematics, ecology, and biochemistry of representative algae, fungi, and submarine grasses.
Prerequisites: BIOL 112; junior or senior classification or approval of instructor.

MARB 409 Biology of Sharks and their Relatives
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Applied knowledge from ichthyology, marine ecology, and oceanography related to sharks, skates and rays in subtropical and tropical latitudes; emphasis placed on hands-on learning experiences coupled with traditional lectures and reading on Chondrichthyan morphology, physiology, life history, behavior and conservation.
Prerequisites: MARB 315; junior or senior classification, or approval of instructor; MARB 311 recommended.

MARB 410 Animal Behavior
Credits 3. 3 Lecture Hours.
Examination of ethological concepts. Discussion of the development, genetics, physiology, and evolution of animal behavior patterns involved in reproduction, territoriality, aggression, communication, population dispersion, sociality, and sociobiology of invertebrates and vertebrates.
Prerequisites: BIOL 112. Curriculum sophomore, junior or senior classification or approval of instructor.

MARB 414 Toxicology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
History and scope of toxicology as it applies to mammals; where possible, marine species will be used for examples and assigned papers.
Prerequisites: BIOL 112, CHEM 227 and CHEM 228.
MARB 415/WFSC 415 Coastal Marine Biology and Geology of Alaska
Credits 3. 3 Lecture Hours.
Field course conducted in south-central Alaska for two weeks; work at the remote Alice Cove Research Station located in Prince William Sound; conduct research on marine mammals behavior and ecology; exploration of the geology and glaciology.
Prerequisites: BIOL 112.
Cross Listing: WFSC 415/MARB 415.

MARB 416 Marine and Coastal Biology of Patagonia, Argentina
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Study of the marine and coastal biology of Peninsula Valdez located in Patagonia, Argentina; augmented lectures with field observations of marine and terrestrial wildlife and local habitats, visits to a nature center and paleontological museum and cruises to observe marine mammals.
Prerequisites: BIOL 112; junior or senior classification or approval of instructor.

MARB 420 Comparative Animal Physiology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Principles of animal physiology are examined using invertebrate and vertebrate model systems. Topics include osmoregulation in marine vs. freshwater vs. terrestrial organisms, excretion, fluid circulation, nervous system structure and function, muscle activity, sensory neurobiology, and endocrine mediation.
Prerequisites: BIOL 112, CHEM 228, MARB 310. Junior or senior classification or approval of instructor. MARB 360 is recommended but not required.

MARB 423 Mariculture
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Study of factors determining the success of efforts to cultivate estuarine and marine species of economic importance. Mariculture practices used worldwide in the production of algae, mollusks, crustaceans, and fishes will be discussed.
Prerequisite: Junior or senior classification or approval of instructor.

MARB 425 Marine Ecology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Relationship between various marine environments and their inhabitants; intra- and interspecific relationships between organisms; structure and function among marine communities. Laboratory emphasis is placed on study of living material and natural habitats in the Gulf of Mexico.
Prerequisites: MARB 315; senior classification or approval of instructor.

MARB 426 Aquatic Animal Nutrition
Credits 3. 3 Lecture Hours.
Chemistry, digestion, absorption and intermediary metabolism of nutrient classes with special emphasis on their relationship to warmwater fish nutrition. Determination of nutrient requirements, feed evaluation, feed processing, ration formulation and feeding practices.
Prerequisites: CHEM 227. Junior or senior classification or approval of instructor.

MARB 430 Coastal Plant Ecology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Study of the identification, distribution, production, and ecological importance of estuarine, coastal marsh, and dune vascular plants; the interaction of plants with their abiotic and biotic environments; and techniques of vegetation management and evaluation
Prerequisites: BIOL 112. Junior or senior classification or approval of instructor.

MARB 433 Applied Bioinformatics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fundamental concepts and methods in bioinformatics using sequence analysis and practical applications; includes biological databases, sequence and structure alignments, structural bioinformatics, gene prediction and genome analysis; emphasis on understanding and application of these concepts.
Prerequisites: MARB 301; junior or senior classification or approval of instructor.

MARB 435 Marine Invertebrate Zoology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Marine Invertebrate Zoology. General biology of marine invertebrate animals; morphology, evolution, and systematics. Laboratory will stress studies of local fauna.
Prerequisites: BIOL 112. Junior or senior classification or approval of instructor.

MARB 437 Pathology of Marine Animals
Credits 3. 3 Lecture Hours.
Examination of changes or loss of physiological function as related to common diseases (viral, bacterial, parasitic) or injury; mechanisms of disease in cells, tissues and organ systems of marine vertebrates; emphasis on marine mammals; fishes and marine reptiles/birds; clinical manifestations, diagnostics and treatments.
Prerequisites: MARB 315; junior or senior classification or approval of instructor.

MARB 438 Coastal Ornithology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Coastal Ornithology. Field and laboratory studies on the identification, classification, distribution and ecology of birds with special emphasis on birds of the Texas Gulf Coast. Classroom lectures to include anatomy, physiology, behavior and migration. Field trips required.
Prerequisites: MARB 315. Junior or senior classification or approval of instructor.

MARB 445 Marine Fisheries Management
Credits 3. 3 Lecture Hours.
Basic knowledge from marine ichthyology, biology of fishes and biological oceanography related to applied aspects of marine fisheries sciences; emphasis placed on management techniques applicable to tidal-influenced inland water, estuaries, and oceans.
Prerequisite: Junior or senior classification, or approval of instructor.

MARB 460 Fisheries Population Dynamics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Principles and concepts of population dynamics related to fish; methods of estimating abundance, mortality, recruitment and sustainable harvest levels; introduction to models for population analysis with emphasis on stock assessments and quantitative fisheries; basic computer programming to explore population behavior and interactions.
Prerequisites: MATH 142, MATH 147, or MATH 151; MARB 311 or approval of instructor.

MARB 466 Evolutionary Biology
Credits 3. 3 Lecture Hours.
A conceptual examination of evolutionary theory, not a survey of specific organismal evolutions. Evidence for the abiotic origin of life is presented, followed by a discussion of micro-evolutionary (including drift and natural selection) and macro-evolutionary (including evolutionary trends) mechanisms. The course concludes with application of these concepts to human evolution.
Prerequisites: BIOL 112. Junior or senior classification or approval of instructor. MARB 301 is recommended but not required.
MARB 482 Seminar in Marine Biology
Credit 1. 1 Lecture Hour.
Compilation of literature pertaining to topics in marine biology. Emphasis placed on preparation of a written report and presentation of a synopsis of that report.
Prerequisite: Junior or senior classification or approval of instructor.

MARB 484 Undergraduate Internship
Credits 0 to 9. 0 to 9 Other Hours.
Supervised study in a research or teaching laboratory remote from TAMUG. Student involvement is to consist of real-life learning or marine biological research, teaching, management, or a combination of these.
Prerequisite: Junior or senior classification or approval of instructor.

MARB 485 Directed Studies
Credits 1 to 6. 1 to 3 Other Hours.
Per Semester. Special topics and problems in field and/or laboratory work suited to analysis by individuals or small groups concerning aspects of marine biology. Usually requires a report describing techniques and results. Only 3 credit hours may be used in the degree plan curriculum.
Prerequisites: 2.25 GPR. Curriculum sophomore, junior or senior classification or approval of instructor.

MARB 489 Special Topics in Marine Biology
Credits 1 to 4. 1 to 4 Lecture Hours.
Study of selected topics in an identified area of marine biology.
Prerequisite: Junior or senior classification or approval of instructor.

MARB 491 Research in Marine Biology
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in Marine Biology. Please see academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of instructor.

MARE - Marine Engr Technology (MARE)

MARE 100 Marine Engineering Fundamentals
Credits 3. 2 Lecture Hours. 3 Lab Hours.
A study of basic marine engineering systems, with emphasis on propulsion plants. Introduction to propulsion plant machinery and shipboard safety practices and equipment; offshore oil production; subsea technologies; petroleum product transport and refinery.

MARE 111 Methods in Engineering Technology
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Analytical methods in engineering technology; problem solving, critical thinking, inductive and deductive reasoning, units and conversions, use of computational software, project management; basic calculations in statics, thermodynamics, electric circuits, engineering economics.

MARE 112 Graphics for Engineering Technology
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Graphical communication in engineering and engineering technology; lettering, sketching techniques, geometric construction, multi-view drawings, dimensioning and notation, piping and electrical diagrams, use of 2-D and 3-D CAD software, use of parametric software.

MARE 200 Basic Operations
Credits 4. 4 Lecture Hours.
Practical application of student’s classroom studies while at sea on training ship during sea-training period. Student required to complete several projects relating to engineering plant of ship.
Prerequisite: Grade of C or better in MART 103.

MARE 202 Marine Thermodynamics
Credits 3. 3 Lecture Hours.
Energy Concepts; First and second law of thermodynamics; Carnot and Rankine principles and reversible heat cycles; Properties of processes of vapors; vapor-power cycles and vapor refrigeration cycles.
Prerequisites: MARE 100, MATH 152 or MATH 161 or concurrent enrollment.

MARE 205 Engineering Mechanics I
Credits 3. 3 Lecture Hours.
Statics, basic vector operations, mechanics of particles and rigid bodies. Center of gravity, analysis of structures, friction, moments of inertia.
Prerequisites: Grade of C or better in MATH 151; grade of C or better in PHYS 218 or PHYS 206.

MARE 206 Engineering Mechanics II
Credits 3. 3 Lecture Hours.
Dynamics; scalar and vector solutions of relative linear velocities and acceleration; kinetics; dynamics of translation and rotation; work; energy; impact; momentum.
Prerequisite: MARE 205.

MARE 207 Electrical Power I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Application of circuit analysis principles to DC and AC circuits having sources and passive inductors, resistors and capacitors; electrical instrumentation; power and voltage/current phase relationships in AC circuits; balanced three-phase AC power circuits; cable sizing.
Prerequisites: Grade of C or better in MATH 151; grade of C or better in PHYS 208 or PHYS 207, or concurrent enrollment.

MARE 209 Mechanics of Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the study of stresses, strains, and deformation of a solid body which results when static forces are applied. Transformation of stresses and strains, torsion, beam deflection, and combined loadings are discussed.
Prerequisite: MARE 205.

MARE 210 Metallurgy for Marine Engineers
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to structure, properties and engineering application of ferrous and nonferrous materials; beneficiation, production of ferrous and nonferrous metals, destructive and nondestructive testing, protective coatings, strengthening and heat treatment; laboratory includes metallographic procedures, mechanical testing, heat treatment, surface treatment, corrosion testing, recrystallization and failure analysis.
Prerequisites: CHEM 107 and CHEM 117.

MARE 211 Steam Propulsion Plants
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fossil fuel steam generators, shipboard propulsion turbines and condensers, reduction gears, line shafting, internal fittings and fluid flow paths, automatic controls, regulatory requirements for safety device settings, system tests and inspections, boiler water/feed water test and treatment, turbine/reduction gear lubrication, computer aided heat balances, parametric analysis of plant performance.
MARE 217 Circuit Analysis
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Electric and magnetic principles of components used in DC and AC circuits; transient analysis; phasor analysis; Ohm's and Kirchoff's laws, Thévenin's and Norton's theorems, mesh and nodal equations; measurement of current, voltage and waveforms with meters and oscilloscopes.
Prerequisites: Grade of C or better in MATH 151; PHYS 208 or PHYS 207 or concurrent enrollment.

MARE 242 Manufacturing Methods I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Introduction to manufacturing methods used in marine industries emphasizing fabrication techniques including oxy-acetylene cutting and welding, brazing, arc welding, pipe welding and sheet metal fabrication. Laboratory exercises will develop the knowledge and skills needed to perform fabrication operations, routine maintenance and emergency repairs of marine engineering structures and systems.

MARE 243 Manufacturing Methods II
Credit 1. 0 Lecture Hours. 3 Lab Hours.
Continued introduction to manufacturing methods used in marine industries including machine, foundry and forge work and other manufacturing technologies. Laboratory emphasizes machine shop practices including safety, use and care of machine and hand tools; measuring instruments, layout, gauging, cutting speeds and feeds, drilling, tapping, threading, turning and milling.
Prerequisite: Approval of Instructor.

MARE 261 Engineering Analysis
Credits 3. 3 Lecture Hours.
Review of mathematical concepts previously studied (e.g., complex quantities, vectors and calculus), coupled with study of advanced concepts (e.g., differential equations, Laplace Transforms, statistics and numerical methods) with a view to emphasize applications in nuclear engineering, electrical engineering, thermodynamics, heat transfer and turbine theory.
Prerequisite: MATH 152 or MATH 161.

MARE 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special problems in marine engineering technology not covered by any other course in the curriculum; work may be in either theory or laboratory.
Prerequisite: Approval of department head.

MARE 289 Special Topics
Credits 1 to 5. 0 to 5 Lecture Hours. 3 to 5 Lab Hours.
Selected topics in an identified area of marine engineering technology. May be repeated for credit.
Prerequisite: Approval of instructor.

MARE 300 Intermediate Operations
Credits 4. 4 Lecture Hours.
Training program for second sea-training period. Sea project required of each student under supervision of officer-instructors. Lifeboat and safety training.
Prerequisite: Junior or senior classification or approval of instructor.

MARE 305 Fluid Mechanics Theory
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Theory of incompressible and compressible fluid flow, introduction to fluid power systems and controls, and dynamics of turbomachinery. Mathematical analysis of piping systems to determine pump head, system resistance, and pipe sizing optimization. Topics include physical properties of fluids, continuity equation, Bernoulli's Equation, Darcy's Equation, series and parallel flow, relative roughness, friction factors, dimensional analysis, and laws of similitude.
Prerequisite: Junior or senior classification or approval of instructor.

MARE 306 Electrical Power II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Electrical power generation and distribution; AC and DC rotating machinery; transformers; controllers and safety devices; operation, maintenance and repair procedures and practices; static converters AC/DC and DC/AC that are used in modern electric propulsion systems.
Prerequisite: MARE 207.

MARE 307 Marine Electronics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the theory of electronic circuits. Fundamentals and basic concepts of semiconductors; solid-state components; power supplies; amplifiers; inverters; rectifiers; oscillators; digital and analog integrated circuits. Application in automation, motor controllers, battery-charging systems, communications; and propulsion plant monitoring systems.
Prerequisite: MARE 207.

MARE 309 Marine Construction Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to materials science and engineering, structural, property relationships; advanced manufacturing techniques from the point of view of marine applications such as subsea pipelines, ship hulls, etc.; corrosion and biofouling. Laboratory includes experimental testing of materials properties, materials syntheses and heat treatment techniques.
Prerequisite: CHEM 107 and CHEM 117.

MARE 312 Diesel Propulsion Plants
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Marine Diesel Engines. Comprehensive study of diesel engines, thermodynamics of air standard cycles, actual compression ignition engine cycles, emissions and emission controls, fuel injection systems and turbo charging systems, engine material properties, operational parameters including forces and temperatures resulting from combustion and inertial dynamics. Laboratory includes computer-aided parametric analysis of engine performance and use of low-speed diesel propulsion plant simulator.
Prerequisites: MARE 305, MARE313. Junior or senior classification or approval of instructor.

MARE 313 Heat Transfer
Credits 3. 3 Lecture Hours.
Fundamentals of heat transfer modes and different solution techniques; 1-D and 2-D heat conduction in transient and steady state conditions; convection heat transfer under different flow conditions; forced convection in internal and external flows; analysis and selection of heat exchangers; and, thermal radiation heat transfer.
Prerequisites: MARE 202, MARE 261, and MARE 305 or concurrent enrollment.
MARE 315 Thermodynamics for Technologists
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Thermal and mechanical energy transformations; relationships applied to flow and non-flow processes in power and refrigeration cycles; devices include compressors, turbines, heat exchangers, nozzles, diffusers, pumps and piston-cylinder models; computer modeling.
Prerequisites: Grade of C or better in PHYS 206 or PHYS 218.

MARE 317 Marine Analog Electronics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Study of semiconductor devices including diodes, field effect transistors, bipolar junction transistors and operational amplifiers; applications include signal conditioning, power supplies, active filters, discrete transistor amplifiers and transistor switching/driver circuits.
Prerequisites: Grade of C or better in ESET 210 or MARE 207.

MARE 318 Strength of Materials
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Stress and strain; elastic moduli Poisson's ratio; torsion, bending, unsymmetrical bending; design of beams and shafts; deflection of beams; buckling of columns; material and strength characterization laboratory tests.
Prerequisites: MMET 207 or MARE 210; MMET 275 or MARE 205.

MARE 350 Commercial Cruise Internship
Credits 4. 4 Other Hours.
Training program for second sea-training period; sea project required of each student under supervision of officer-instructors; lifeboat and safety training.
Prerequisites: MARE 100, MARE 200, MART 103. Junior or senior classification or permission of MARR and MART department heads.

MARE 399 High Impact Experience in Marine Engineering Technology
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification.

MARE 400 Advanced Operations
Credits 4. 4 Lecture Hours.
Training program for third sea-training period. At the end of this period each student will have achieved the knowledge and will have demonstrated the ability to take complete charge of a modern marine power plant while underway at sea.
Prerequisite: Junior or senior classification or approval of instructor.

MARE 401 Marine Auxiliary Systems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study of the principal shipboard auxiliary systems, including auxiliary fired-boilers, sea water service, ballast, freshwater service, lubricating oil, fuel oil storage and transfer, distilling, refrigeration and steering systems; major components, operation and maintenance, and interrelationship with other auxiliary systems.
Prerequisites: MARE 100, or MARR 101 with a grade of C or better.

MARE 402 Shipboard Automation and Control
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Study of automation in marine power plants; including electronic and pneumatic proportional, integral and derivative control elements; applications in boiler combustion and water level control; engine speed control; remote sensing and performance monitoring systems.
Prerequisites: MARE 307.

MARE 405 Fundamentals of Naval Architecture
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Ship geometry and arrangement; ship-form calculations; intact and damaged stability; ships’ structure; fundamentals of resistance and propulsion; ship motion, maneuverability, and control; introduction to ship design, construction, and overhaul.
Prerequisites: Junior or senior classification or approval of instructor.

MARE 424 Gas Turbine Power Generation
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Application of the Brayton cycle to gas turbine power cycles, including ideal gas cycle analysis, compressor design and construction, gas turbine construction, operation and maintenance for marine and industrial installations.
Prerequisites: MARE 202, MARE 205, MARE 309 or concurrent enrollment and permission of instructor.

MARE 434 Offshore Energy, Oil, and Gas Production
Credits 3. 3 Lecture Hours.
Orientation to the offshore and gas industry; petroleum exploration, production, and marketing; platform and floating production facilities; operations; classification of production systems; economics and risk management.
Prerequisite: Junior or senior classification or approval of instructor.

MARE 437 Applied Finite Element Analysis
Credits 3. 3 Lecture Hours.
Fundamental finite element techniques; direct approach and energy formulation; element equations; assembly and solution schemes; computer implementation; applications to field problems.
Prerequisites: MARE 209 and MARE 261.

MARE 441 Engineering Economics and Project Management
Credits 3. 3 Lecture Hours.
Analysis of engineering economics and management, using costs and benefits of various engineering options. Topics include time value of money, cash flows, analysis techniques, interests rates, inflation, depreciation, optimization, statistics, network analysis and critical path programming.
Prerequisite: Junior or senior classification or advisor approval.

MARE 451 Senior Design Project I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Design, modeling, testing and validation processes; design of equipment, components or systems for marine and related power generation applications; complete design process including definition of the problem, research for existing designs and related technologies, conceptualization and evaluation of alternatives, development of preliminary design, refining and generation of final design and documents.
Prerequisites: MARE 206, MARE 209, MARE 305, MARE 306, MARE 307, and MARE 313, or concurrent enrollment; senior classification.

MARE 452 Senior Design Project II
Credits 2. 1 Lecture Hour. 3 Lab Hours.
This course is a continuation of MARE 451. Development of theoretical, computational or experimental models using the design developed in MARE 451. Formulation, construction and/or fabrication work. Refining, experimenting and testing of models considering alternatives. Analyzing results and preparing and submitting design documents including a project report.
Prerequisite: MARE 451 or MARR 451.
MARE 459 Mechanical Vibrations  
Credits 3. 3 Lecture Hours.  
Basic theory of vibrating systems with single and multiple degrees of freedom and principles of transmission and isolation of vibrations.  
Prerequisites: MARE 206; MARE 261.

MARE 481 Seminar  
Credit 1. 1 Other Hour.  
Preparation of Engineering licensure; ethics and professional practice; safety, health, and the environment; review of engineering mathematics, probability and statistics; review of statics, dynamics, strength of materials, fluid mechanics and materials science; review of heat and mass transport processes; review of electricity, power, magnetism, instrumentation and data.  
Prerequisite: Senior classification.

MARE 484 Undergraduate Internship  
Credits 0 to 6. 0 to 6 Other Hours.  
Supervised study with an approved power generator, either electrical, mechanical, or thermal power. Alternatively, studies can be with a research, manufacturing or repair facility whose primary mission is to support power generation. May be taken for credit up to 6 hours.  
Prerequisites: 2.5 GPR and completion of 300 level courses.

MARE 485 Directed Studies  
Credits 1 to 8. 1 to 8 Other Hours.  
Special problems in marine engineering technology not covered by any other course in the curriculum. May be repeated for credit.  
Prerequisites: Approval of department head. Junior or senior classification or approval of instructor.

MARE 489 Special Topics  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of marine engineering technology. May be repeated for credit.  
Prerequisites: Junior or senior classification or approval of instructor.

MARE 491 Research in Marine Engineering Technology  
Credits 1 to 4. 1 to 4 Other Hours.  
Research in Engineering Technology. Research conducted under the direction of faculty member in Marine Engineering Technology. May be repeated 2 times for credit. Please see academic advisor in department.  
Prerequisites: Junior or senior classification or approval of instructor.

MARE 497 Directed Research  
Credits 1 to 8. 1 to 8 Lecture Hours.  
Directed study with an approved power generator, either electrical, mechanical, or thermal power. Alternatively, studies can be with a research, manufacturing or repair facility whose primary mission is to support power generation. May be taken for credit up to 8 hours.  
Prerequisites: 2.5 GPR and completion of 300 level courses.

MARE 498 Special Topics  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of marine engineering technology. May be repeated for credit.  
Prerequisites: Junior or senior classification or approval of instructor.

MARE 499 Independent Study  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Independent study in an area of marine engineering technology. May be repeated for credit.  
Prerequisites: Approval of instructor. Junior or senior classification or approval of instructor.

MARR - Marine Engineering Technology (MARR)  

MARR 101 Marine Engineering Fundamentals  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
A study of basic marine engineering systems, with emphasis on propulsion plants; propulsion plant machinery, watch standing organization and duties, shipboard safety practices and equipment.

MARR 102 Engine Room Resource Management and Dynamics  
Credit 1. 0 Lecture Hours. 2 Lab Hours.  
Marine engineering watch standing and operations, safety and security, effective resource management and control of engine room equipment, leadership and managerial skills.

MARR 200 Basic Operations  
Credits 6. 6 Lecture Hours.  
Practical application of student's classroom studies while at sea on training ship during sea-training period. Student required to complete several projects relating to engineering plant of ship.  
Prerequisite: MART 103.

MARR 300 Intermediate Operations  
Credits 6. 6 Lecture Hours.  
Training program for second sea-training period. Sea project required of each student under supervision of officer-instructors. Lifeboat and safety training.  
Prerequisite: Junior or senior classification or approval of instructor.

MARR 400 Advanced Operations  
Credits 6. 6 Lecture Hours.  
Training program for third sea-training period. At the end of this period each student will have achieved the knowledge and will have demonstrated the ability to take complete charge of a modern marine power plant while underway at sea.  
Prerequisite: Junior or senior classification or approval of instructor.

MARR 451 Senior Capstone Project I  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Design, modeling, testing and validation processes; design of equipment, components, or systems for seagoing vessels; use of design manuals, material/equipment specifications and industry regulations applicable to marine engineering technology.  
Prerequisites: Grade of C or better in MARE 206; MARE 242, MARE 309, and MARE 313, or concurrent enrollment; senior classification.

MARR 481 Seminar  
Credit 1. 1 Other Hour.  
Preparation for USCG 3rd Assistant Engineer examination; review or marine engineering safety; review of motor plants; overview of steam plants; review of electricity and electrical control systems; review of refrigeration systems and general subjects.  
Prerequisites: Senior classification; enrollment in marine engineering technology license option program.

MARS - Marine Science (MARS)  

MARS 101 Marine Science Matters  
Credit 1. 1 Lecture Hour.  
A non-technical introduction to the field of marine sciences, including biology, ocean activities, and marine industries. Course includes lectures, seminars, outside speakers, and industrial contacts.

MARS 210 Marine Geography  
Credits 3. 3 Lecture Hours.  
Introduction to the physical and cultural patterns of the coastal zones of the world. Interrelationships between the physical forms and processes and the cultural patterns are used to analyze human use and abuse of the sea.

MARS 252 Introductory Marine Science Laboratory  
Credit 1. 3 Lab Hours.  
Overview of the global ocean environment and the interrelated sub-disciplines; the important of the ocean for the earth's ecosystems and human impact on the ocean; field work and boat trip, water and benthic sediment collection and analysis; navigation chart work.  
Prerequisite: OCNG 251 or concurrent enrollment.
MARS 280 Coastal and Ocean Resources
Credits 3. 3 Lecture Hours.
Coastal and Ocean Resources. Resources from the ocean including food, minerals, transportation and recreation. Methods of recovery and utilization of resources from the ocean, efficiency and cost effectiveness. Provides a foundation for understanding the wealth of resources available from the ocean and its margins, to include the impact of human activity on these resources.

MARS 281 Sophomore Seminar in Marine Sciences
Credit 1. 1 Lecture Hour.
Compilation and discussions of literature pertaining to topics in marine sciences. Emphasis placed upon preparation and presentation of a written report.
Prerequisite: Sophomore standing or approval of instructor.

MARS 285 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special topics and problems suited to analysis by individuals or small groups concerning special aspects of marine sciences.
Prerequisite: Approval of department head.

MARS 289 Special Topics in Marine Sciences
Credits 1 to 4. 1 to 4 Lecture Hours.
Study of selected topics in an identified area of marine sciences.
Prerequisite: Approval of instructor.

MARS 303 Computing and Data Display
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elements of programming and data display primarily through the MATLAB computing environment; includes an introduction to statistics and hypothesis testing with MATLAB.
Prerequisite: Junior or senior classification or approval of instructor.

MARS 305 Environmental Micropaleontology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Major animal, plant and protist microfossils groups, ecology, biostratigraphy, paleoenvironmental and paleoclimatic utility, primary preparation techniques, basic microscopy, research design and dissemination. Coastal foraminifera, thecamoebians and ostracods emphasized. Field trips required.
Prerequisites: GEOL 101 and GEOL 102.

MARS 306 Coastal Sedimentary Geology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
A survey of modern coastal sedimentary systems, including principles of sedimentology and sediment analysis; laboratory includes a large group field projects; local field trips required.
Prerequisites: GEOL 101 and GEOL 102.

MARS 310 Field Methods in Marine Sciences
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Techniques of documenting collected materials, the methods of reconnaissance and the mapping of traverses in the major coastal environments; sampling and recording techniques, interview procedures and the use of maps and remotely sensed imagery.
Prerequisites: CHEM 120; PHYS 202, PHYS 208, or PHYS 207, and PHYS 217/ENGR 217; GEOL 101; GEOL 102.

MARS 325 Introduction to GIS for Marine Sciences
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geographic Information Systems (GIS) are introduced for marine sciences and management. Basic use of software including creation of GIS models is covered. Creating, editing and querying GIS shape files is treated utilizing one of the standard GIS software packages such as ArcGIS.
Prerequisite: Junior or senior classification or approval of instructor.

MARS 330 Petroleum Geology
Credits 3. 3 Lecture Hours.
Origin, migration and accumulation of petroleum; reservoir rock, traps, accumulation and conditions, and subsurface methods.
Prerequisites: GEOL 101 and GEOL 102.

MARS 340 Geochemistry
Credits 3. 3 Lecture Hours.
Chemical principles and processes that govern the behavior of geologic materials; silica and carbonate low temperature equilibrium and kinetics.
Prerequisites: CHEM 120, GEOL 101, and GEOL 102.

MARS 350 Advanced Computer Applications
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Data manipulation, merging, selection, filtering and querying in Microsoft Office primarily using large real data sets. Introduction to GIS, MatLab and other software relevant to science and/or business applications. Discussion of algorithm development in structured and object oriented programming languages.

MARS 360 Biochemistry
Credits 4. 4 Lecture Hours.
General introductory biochemistry; structures of the four classes of biologically important molecules (proteins, carbohydrates, lipids and nucleotides); how these biomolecules are generated from molecular building blocks; relationship of biomolecule structure to biochemical reactivity such as kinetics and enzyme regulation; membrane phospholipids and glycoproteins and the structure and function of membranes; catabolic reaction pathways of monosaccharides and fatty acids; oxidative phosphorylation and photosynthesis.
Prerequisites: BIOL 111, BIOL 112, CHEM 228. Junior or senior classification or approval of instructor.

MARS 361 Marine Biochemistry Laboratory
Credit 1. 3 Lab Hours.
Selected methods used to characterize, purify, identify and isolate biomolecules. The laboratory is designed to complement the MARS 360 lecture.
Prerequisite: MARS 360 or concurrent enrollment.

MARS 365 Integrated Marine Sciences Laboratory
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Integrated lectures, field and laboratory exercises for data collection and analysis of physical, chemical, biological and geological measurements in ocean, coastal and estuarine environments.
Prerequisites: MATH 142 or 152, PHYS 202 or PHYS 208, OCNG 251, MARS 252, CHEM 102 and CHEM 112, BIOL 112 and GEOL 101 and GEOL 102, junior or senior classification or approval of instructor.

MARS 370/GEOG 370 Coastal Processes
Credits 3. 3 Lecture Hours.
Introduction to the coastal system, waves and wave dominated coasts, shoreline morphodynamics, tidal and lake coasts, long term coastal development, sea level changes, subtidal and beach ecosystems, coastal dunes and wetlands, structures and organizations, coastal management and coastal hazards.
Cross Listing: GEOG 370/MARS 370.
MARS 408 Estuarine and Coastal Hydrodynamics
Credits 3. 3 Lecture Hours.
Physical processes in estuarine and coastal environments in various time scales: turbulent, tidal and residual (subtidal); study of salts, suspended solids, nutrients and heat affected by water movement; physical, biogeochemical processes and mass transport.
Prerequisites: MATH 251, PHYS 218, junior or senior classification or approval of instructor.

MARS 410 Physical Oceanography
Credits 3. 3 Lecture Hours.
Elements of the physics of the ocean; descriptive aspects and theoretical explanations of circulation, characteristic structure and waves.
Prerequisites: OCNG 251, MARS 252, MATH 152, PHYS 208, junior or senior classification or approval of instructor.

MARS 412 Remote Field Investigations in Marine Sciences
Credits 1 to 6. 1 to 6 Lecture Hours.
An overview of marine sciences in remote locations varying by instructor and selected topics; lectures on recent scientific papers, methods and concepts related to field area; individual projects; data collection; data analysis and presentation.
Prerequisite: Junior or senior classification or approval of instructor.

MARS 415 Remote Sensing Technology
Credits 3. 3 Lecture Hours.
An introduction to the uses of remote sensing technology in the marine sciences, including electromagnetic, acoustic, and seismic methods. Generation, transmission, and reception methods. Active and passive systems, multispectral techniques, and signal analysis systems.
Prerequisites: PHYS 202 or 208, BIOL 112. Junior or senior classification or approval of instructor.

MARS 423 Ecological Economics
Credits 3. 3 Lecture Hours.
An integrated study of management of ecology and economics; conceptual and professional economic and environmental policies; ethical concerns and economic benefits of nature to humans, human and nature's economies, and the complex connections between humans and nature with the valuing of ecosystems integrity.
Prerequisite: Junior or senior classification.

MARS 425 Coastal Wetlands Management
Credits 3. 3 Lecture Hours.
Wetlands management laws, regulations, wetland delineation and applications of Geographic Information System (GIS) to wetlands management; biological species in wetlands delineation; basic biogeochemical cycles and interactions in wetlands.
Prerequisites: BIOL 112, GEOL 101, and GEOL 102; concurrent enrollment in MARS 426 or approval of instructor.

MARS 426 Coastal Wetlands Delineation Laboratory
Credit 1. 3 Lab Hours.
Coastal wetlands delineation, including mapping techniques, Geographic Information System (GIS) and theodolite; biological species and biogeochemical factors in wetlands delineation.
Prerequisites: BIOL 112, GEOL 101, and GEOL 102; concurrent enrollment in MARS 425 or approval of instructor.

MARS 428 Coastal Development and Human Health
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Exploration of public environmental health issues associated with urbanization in coastal areas; topics address population pressures on coasts, infectious and chronic disease, the natural and built environment, toxicology, sanitation, forms and media of pollution, and the application of environmental health science to coastal zone management.
Prerequisites: CHEM 120 or equivalent; BIOL 112; junior or senior classification or approval of instructor; CHEM 383 and MARS 325 are recommended but not required.

MARS 430 Geological Oceanography-Plate Tectonics
Credits 3. 3 Lecture Hours.
Understanding the complex interactions of the earth system and the critical role that geological oceanography plays in these interactions, specifically the plate tectonic aspects of geological oceanography.
Prerequisites: GEOL 101, OCNG 251, junior or senior classification or approval of instructor.

MARS 431 Geological Oceanography-Earth's Climate
Credits 3. 3 Lecture Hours.
Understanding the complex interactions of the earth system and the critical role that geological oceanography plays in these interactions, specifically the paleoceanographic/climate change aspects of geological oceanography.
Prerequisites: GEOL 101, OCNG 251, junior or senior classification or approval of instructor.

MARS 432 Peak Oil, Global Warming and Resource Scarcity
Credits 3. 3 Lecture Hours.
The concept of peak oil, resource depletion, and human-induced climate change and the broad consequences for food and water supplies, mortality rates, conflict, migration, and political stability; scientific/social/political debates surrounding these issues, and the individual/local/national/global options for living in a globally-warmed world with declining natural resources.
Prerequisites: Any two from GEOL 101, GEOL 102, OCNG 251, MARS 280, or approval of instructor.

MARS 435 Exploration Geophysics
Credits 3. 3 Lecture Hours.
Physiomechanical properties of rocks and sediments; seismic reflection and refraction principles applicable to offshore, coastal and onshore exploration; determination of media velocity and stratigraphy from reflection and refraction studies in both marine and non-marine systems.
Prerequisites: PHYS 202, PHYS 208, or PHYS 207, and PHYS 217/ENGR 217; GEOL 101; GEOL 102; MATH 151, MATH 142, or MATH 147.

MARS 440 Chemical Oceanography
Credits 3. 3 Lecture Hours.
Composition of sea salt and dissolved material in the ocean; biogeochemistry and measurements of oxygen, nutrient and other major elements, trace metals and radioisotopes; formation, composition and alterations of detrital material and marine sediments and other chemical processes; simple models relating ocean chemistry to the circulation of masses of water.
Prerequisites: CHEM 102, OCNG 251, junior or senior classification or approval of instructor.
MARS 450 Principles of Marine Instrumental Analysis  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Fundamental principles and practical applications for state-of-the-art analytical instrumentation applied to marine and environmental science. Topics include atomic and molecular spectroscopy, gas and liquid chromatography, radiochemistry, x-ray spectroscopy, mass spectrometry and field instrumentation. Students work with instruments and make presentation on them to the class.  
Prerequisites: CHEM 102 and 228, PHYS 202, MATH 131 or 151. Junior or senior classification or approval of instructor.  

MARS 456 Coastal Water Policy  
Credits 3. 3 Lecture Hours.  
History, past and present legislation, the government entities and agencies molding the policies affecting coastal water policy in Texas.  
Prerequisite: Junior or senior classification or approval of instructor.  

MARS 460 Capstone Undergraduate Research Experience I  
Credit 1. 1 Lecture Hour.  
Methodology for research outlines, organization and strategies; research ethics, writing and presentation of results.  
Prerequisites: MARS 491 or concurrent enrollment, senior classification or approval of instructor.  

MARS 461 Capstone Undergraduate Research Experience II  
Credit 1. 1 Lecture Hour.  
Research and scientific communications; development of a scientific abstract, poster presentation, oral presentation or written scientific paper.  
Prerequisites: MARS 491 or concurrent enrollment, senior classification or approval of instructor.  

MARS 470 Eco-Environmental Modeling  
Credits 3. 3 Lecture Hours.  
Biological components are in chemical and physical environments which are influenced by the bio-system and flows of energy, water and chemical species. Coupling to the complex atmospheric, aquatic and terrestrial systems is important. Modeling entails mathematical tools and the underlying science, focusing on scientific models, from the simplest to the elaborate.  
Prerequisites: CHEM 102, BIOL 112 and MATH 151 or approval of instructor.  

MARS 481 Seminar  
Credit 1. 1 Lecture Hour.  
Problem-oriented discussion session. Topics and reports selected for current relevance. May be repeated once only for credit.  
Prerequisite: Junior or senior classification or approval of instructor.  

MARS 484 Undergraduate Internship  
Credits 0 to 6. 0 to 6 Other Hours.  
Supervised study in a research or teaching laboratory within or outside of the Texas A&M University System. Student involvement is to consist of real-life learning or marine sciences research, teaching, management or a combination of these.  
Prerequisites: Junior or senior classification or approval of instructor. Approval of the department head.  

MARS 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Special topics and problems suited to analysis by individuals or small groups concerning special aspects of marine sciences.  
Prerequisites: Junior or senior classification or approval of instructor. Approval of department head.  

MARS 488 Writing Intensive Directed Studies in Marine Sciences  
Credits 1 to 6. 1 to 6 Other Hours.  
A writing-intensive course leading to the equivalent of a mini thesis in an area of interest to the faculty and student; introduces students to the rigors of writing for publication in professional journals in their major.  
Prerequisite: Junior or senior classification.  

MARS 489 Special Topics in Marine Sciences  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Study of selected topics in an identified area of marine sciences.  
Prerequisite: Junior or senior classification or approval of instructor.  

MARS 491 Research in Marine Sciences  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in Marine Sciences. May be repeated 2 times for credit. Please see academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.  

MART - Marine Transportation (MART)  

MART 103 Basic Safety and Lifeboatman Training  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to lifesaving equipment and apparatus, personal survival techniques, personal social and environmental responsibility and introductory medical first aid and CPR; practical lifeboat and survival training for the U.S. Coast Guard certification as life boatman.  
Prerequisite: Admission to license option program.  

MART 115 Seamanship I  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
(STCW). Theory and application of traditional seamanship, such as handling of natural fiber, synthetic and wire ropes, block and tackle and marlinespike; introduction to competencies of the deck department, including safe systems of work, inspections and maintenance, anchoring, mooring operations, ladder use, crane operations and duties of the lookout and quartermaster.  
Prerequisite: Admission to deck license option program.  

MART 200 Deck Sea Training I: Basic Communications, Navigation and seamanship  
Credits 4. 4 Other Hours.  
Practical application of shoreside studies aboard training ship during first training cruise; basic projects in communications, navigation, seamanship and rules of the road.  
Prerequisites: Grade of C or better in MART 103, MART 115 or MART 203, MART 201, and MART 204, or concurrent enrollment, or approval of MART department head; admission into Deck License Option Program.  

MART 201 Vessel Structure and Ship Knowledge  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Introduction to ship nomenclature and design, types and methods of ship construction, admeasurement and typical outfitting of various types of commercial vessels; classification societies, shipbuilding materials and methods, structural components and appurtenances of vessels.  
Prerequisite: Admission to deck license option program.
MART 202 Ship Stability and Trim  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Principles of flotation and buoyancy; inclining experiments; free surface; 
transverse and longitudinal stability; trim; motion of ship in waves and 
seasways; application of stability, trim and stress tables; effect of center 
of gravity on seaworthiness and stability; actions in event of partial loss 
of intact buoyancy; fundamentals of watertight integrity.  
Prerequisites: Grade of C or better in MART 200 or NAUT 200, or 
concurrent enrollment; MART 103, MART 115, MART 201 and MART 204, 
or concurrent enrollment, or approval of MART department head.  

MART 204 Terrestrial Navigation  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Fundamentals of piloting, chart construction and development, aids 
to navigation, useful publications, principles of magnetism and 
the magnetic compass, great circle, Mercator and middle latitude sailing.  
Prerequisites: Admission to deck license option program; algebra and 
trigonometry recommended.  

MART 205 Marine Surveying  
Credits 3. 3 Lecture Hours.  
Fundamentals of marine surveying using the various types of maritime 
surveys; writing survey reports by meeting regulatory and industry 
standards for submission to maritime clients.  
Prerequisites: Grade of C or better in MART 115 or MART 203, and 
MART 202 (MART majors); or MARR 205 (MARR majors); or MARR 101 
(MARR majors); or MARE 100 (MARR-NLO majors); or approval of 
instructor.  

MART 208 Maritime Meteorology  
Credits 3. 3 Lecture Hours.  
Weather and forecasting techniques used by merchant mariners to 
determine cloud formation, precipitation, visibility, atmospheric pressure, 
fronts, ocean currents, weather and voyage routing and ship maneuvering 
based upon ship’s technology and reporting equipment; ocean passage 
planning.  
Prerequisite: MART 204 or concurrent enrollment or approval of 
department head.  

MART 210 Integrated Navigation I: RADAR/ARPA/ECDIS  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Theory, operation and interpretation of marine radar and automatic radar 
plotting aids (ARPA) and Electronic Chart Display Systems (ECDIS); 
introductory level watchkeeping, including applied use of radar, ARPA 
and ECDIS; U.S. Coast Guard Certification as “RADAR Observer” and 
Standards of Training, Certification and Watchkeeping (STCW) Radar and 
ARPA endorsements.  
Prerequisites: Grade of C or better in MART 200 or NAUT 200; grade 
of C or better in MART 103, MART 115 or MART 203, MART 201 and 
MART 204, or concurrent enrollment or approval of department head.  

MART 212 Marine Dry Cargo Operations  
Credits 3. 3 Lecture Hours.  
Modern dry cargo principles associated with handling general cargo, 
bulk cargo, refrigerated cargo, dangerous cargo, containers, roll-on roll- 
off; cargo ventilation, securing of cargo, stability and trim, cargo gear 
stresses and heavy lift operations; documentation required for cargo 
operations, along with practical cargo stowage problems.  
Prerequisites: Grade of C or better in MART 200 or NAUT 200; grade 
of C or better in MART 103, MART 115 or MART 203, MART 201 and 
MART 204, or concurrent enrollment or approval of department head.  

MART 213 Liquified Gas Tankers  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Preparation as cargo officer for loading, discharging and transit of 
liquefied gas cargoes; emphasis on physical and chemical properties, 
operations, safety, firefighting and pollution prevention.  
Prerequisites: MART majors - Grade of C or better in MART 200 or 
NAUT 200, or concurrent enrollment or approval of MART department 
head; MARE majors - Grade of C or better in MARE 200 or MARR 200, or 
concurrent enrollment or approval of MART department head.  

MART 215 Seamanship II  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Topics include mechanical appliances aboard ship, accident prevention, 
vessel sanitation, vessel operations, marine inspection laws and 
regulations, communications, ship’s business and International 
Conventions.  
Prerequisites: Grade of C or better in MART 200 or NAUT 200; grade 
of C or better in MART 103, MART 115 or MART 203, MART 201 and 
MART 204, or concurrent enrollment or approval of department head.  

MART 265 Introduction to Dynamic Positioning OSVDPA Phase I  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Basic understanding and operation of Dynamic Positioning technology; 
theory and nomenclature of Dynamic Positioning principles and 
equipment; practical training utilizing Class C simulators; operating, 
maneuvering and familiarization with simulated DP vessels; satisfactory 
completion of this course provides the student entry in to the Off Shore 
Service Vessel Dynamic Positioning Authority (OSVDPA) scheme.  
Prerequisites: Grade of C or better in MART 201, MART 204, and 
MART 200; sophomore or junior classification.  

MART 285 Directed Studies  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Directed study in problems in marine transportation not covered by other 
courses in the department.  
Prerequisite: Approval of department head.  

MART 289 Special Topics in Marine Transportation  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Study of selected topics in an identified area of marine transportation or 
nautical science.  
Prerequisite: Approval of department head.  

MART 300 Deck Sea Training II: Intermediate Communications, 
Navigation and Seamanship  
Credits 4. 4 Other Hours.  
Practical application of shoreside studies aboard training ship during 
second training cruise; intermediate projects in communications, 
navigation, seamanship and rules of the road.  
Prerequisites: Grade of C or better in MART 200 or NAUT 200; grade 
of C or better in MART 202, MART 210 or MART 306, MART 212 or 
MART 312, MART 215 or MART 301, MART 303 and MART 321, or 
concurrent enrollment; junior or senior classification or approval of MART 
department head.  

MART 303 Celestial Navigation  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Full range of celestial navigation; survey of nautical astronomy, sight 
reduction, sextants, compass error determination, and solutions of the 
navigational triangle by various methods.  
Prerequisites: Grade of C or better in MART 200 or NAUT 200; grade 
of C or better in MART 103, MART 115 or MART 203, MART 201 and 
MART 204, or concurrent enrollment or approval of MART department head.
MART 305 Ship Construction and Stability
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Shipbuilding nomenclature, dimensions, construction and classification. Classification societies, shipbuilding materials and methods, structural components. Ship's line drawing and form calculations; principles of flotation and buoyancy; inclining experiments; free surface; transverse stability; trim and longitudinal stability; motion of ships in waves, seaways and dynamic loads; ship's structure tests and propulsion; labs focus on manual and computer-based stability and trim calculations using standard industry-based software.
Prerequisites: Junior or senior classification; MART 103, PHYS 201 or PHYS 218 or approval of instructor.

MART 307 Global Maritime Distress Safety System
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Requirements, regulations, equipment, principles and hands-on operating procedures of each Global Maritime Distress Safety System subsystem, including: SARTS, EPIRBS NAVTEX, INMARSAT, SAFETYNET, VHF Survival Craft Transceivers, DSC, and HF Radio telephone; USCG and FCC certification as GMDSS Operator and Maintainer; minimum passing grade 75.
Prerequisites: Grade of C or better in MART 200 or NAUT 200; grade of C or better in MART 103, MART 115 or MART 203, MART 201 and MART 204, or concurrent enrollment or approval of department head.

MART 308 Fast Rescue Craft
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Search and rescue techniques through fast rescue craft maneuvers and team management; description of various rescue craft and U.S. Coast Guard 'Fast Rescue Craft' Standard of Watchkeeping endorsement.
Prerequisites: MART majors - Grade of C or better in MART 200 or NAUT 200; grade of C or better in MART 103, MART 115 or MART 203, MART 201 and MART 204, or concurrent enrollment or approval of department head; MARE majors - Grade of C or better in MARE 200 or MARE 203; grade of C or better in MART 103.

MART 310 Integrated Navigation II: Electronic Navigation
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Theory, operation and application of marine electronic navigation systems and aids; includes marine gyrocompass, vessel steering systems, hydrosonic systems, satellite navigation systems, AIS and VDR; intermediate level watchkeeping, including applied use of radar, ARPA and ECDIS.
Prerequisites: Grade of C or better in MART 200 or NAUT 200; grade of C or better in MART 204, MART 210 or MART 306, MART 303 and MART 321, or concurrent enrollment or approval of MART department head.

MART 311 Tug and Towing Operations
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Knowledge associated with the safe, efficient operation of towing vessels through classroom discussion and through underway, hands-on vessel training aboard the T/V Ranger and barges.
Prerequisites: MART 300 or MART 350 or NAUT 300, or concurrent enrollment or approval of department head.

MART 313 Marine Liquid Cargo Operations
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles and practice of bulk liquid, gas handling and carriage by water craft; theoretical and practical problems involved in loading, stowing and discharging of petroleum, chemical, elevated temperature and cryogenic cargoes; marine pollution abatement, personnel safety and firefighting techniques and systems.
Prerequisites: MART majors - Grade of C or better in MART 200 or NAUT 200; MART 103, MART 115 or MART 203, MART 201 and MART 204, or concurrent enrollment or approval of department head; MARE majors - Grade of C or better in MARE 200 or MARR 200, MART 103, or concurrent enrollment or approval of MART department head.

MART 315 Seamanship III
Credits 4. 4 Other Hours.
Principles and methods of propulsion and steering of ships including hull, propeller and rudder design; ship handling at sea, in narrow channels, docking, undocking, mooring; study of the principles of hydrodynamics that govern ship movement.
Prerequisites: MART 300 or MART 350 or NAUT 300, or concurrent enrollment or approval of instructor.

MART 321 Navigation Rules, International and Inland
Credits 2. 2 Lecture Hours.
Purpose, application and knowledge of the International Regulations for Preventing Collision at Sea (COLREGS) and the Inland Navigation Rules and Regulations (Inland Rules).
Prerequisites: Grade of C or better in MART 200 or NAUT 200; grade of C or better in MART 103, MART 115 or MART 203, MART 201 and MART 204, or concurrent enrollment or approval of department head.

MART 350 Deck Sea Training II – Commercial Internship
Credits 4. 4 Other Hours.
Practical application of shoreside studies aboard an assigned merchant vessel during second training cruise; intermediate projects in communications, navigation, seamanship, rules for the road and other subjects pertaining to the maritime industry. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Grade of C or better in MART 200 or NAUT 200, MART 202, MART 210 or MART 306, MART 212 or MART 312, MART 215 or MART 301, MART 303, and MART 321, or concurrent enrollment; junior or senior classification or approval of MART department head.

MART 400 Deck Sea Training III: Advanced Communications, Navigation and Seamanship
Credits 4. 4 Other Hours.
Practical application of shoreside studies aboard training ship during third training cruise; advanced projects in communications, navigation, seamanship and rules of the road.
Prerequisites: Grade of C or better in MART 300, MART 350, or NAUT 300; grade of C or better in MART 307, MART 310 or MART 304, and MART 313 or MART 406, or concurrent enrollment; junior or senior classification or approval of MART department head.

MART 401 Maritime Security
Credits 3. 3 Lecture Hours.
Presentation and analysis of historical and current maritime security issues, leading to the understanding of, and proficiency in, security-related duties and responsibilities of licensed Deck Officers aboard ship and of maritime industry personnel ashore.
Prerequisites: MART 300 or MART 350 or NAUT 300, or concurrent enrollment or approval of department head.
MART 403 Advanced Topics in Shipboard Operations
Credits 2. 2 Lecture Hours.
Advanced shipboard operations for the Third Mate, AGT, Oceans as a bridge watchstander or cargo officer on container vessels, bulk carriers, tankers or gas carriers; focus on all areas of concern to a watchstander. 
Prerequisites: MART 300 or MART 350 or NAUT 300, or concurrent enrollment or approval of department head.

MART 404 The Navigator
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Intensive application all available means of navigation; including principles of electronic, terrestrial and celestial; demonstration of knowledge, understanding and proficiency in U.S. Coast Guard examination topics. 
Prerequisites: MART 300 or MART 350 or NAUT 300, or concurrent enrollment or approval of department head.

MART 410 Integrated Navigation III: Bridge Watchstanding
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Advanced level Bridge Watchkeeping; integration of navigation, communications and seamanship in Bridge Resource Management (BRM) training required under the International Convention on the Standards for Training and Certification of Watchkeepers, using simulator-based teaching techniques. 
Prerequisites: Grade of C or better in MART 300, MART 350, or NAUT 300; grade of C or better in MART 321, MART 210 or MART 306, and MART 310 or MART 304, or concurrent enrollment or approval of MART department head.

MART 484 Internship
Credits 0 to 6. 0 to 6 Other Hours.
Special topics and problems in field and/or laboratory work suited to analysis by individuals or small groups concerning internships of marine transportation; may require a report describing techniques and results. May be repeated for credit. Must be taken on a satisfactory/unsatisfactory basis. 
Prerequisites: Junior or senior classification or approval of department head.

MART 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Directed study in problems in marine transportation not covered by other courses in the department. 
Prerequisite: Senior classification or approval of department head.

MART 489 Special Topics in Marine Transportation
Credits 1 to 3. 1 to 3 Lecture Hours. 0 to 3 Lab Hours.
Study of selected topics in an identified area of marine transportation or nautical science. 
Prerequisites: Approval of MART department head. Junior or senior classification or approval of instructor.

MART 491 Research in Marine Transportation
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in Marine Transportation. May be repeated 2 times for credit. See academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded. 
Prerequisites: Junior or senior classification and approval of instructor.

MART 498 Maritime Medical Care
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Basic and advanced training for medical care of the sick and injured in the maritime environment; fundamentals of identification and assessment of and appropriate interventions for life-threats and other medical or trauma related conditions commonly encountered at sea; must complete course within one year of graduation. 
Prerequisites: MART majors - Grade of C or better in MART 300, MART 350, or NAUT 300, or concurrent enrollment or approval of MART department head; MARE majors - Grade of C or better in MARR 300, MARE 300, or MARE 350, or concurrent enrollment or approval of MART department head.

MASC - Integrated Math & Sci (MASC)

MASC 320 Inquiries in Physical Science
Credits 3. 3 Lecture Hours.
Integration and connections among topics in physical sciences–matter, energy, force, motion, scientific cycles; focuses on inquiry emphasizing experimental design, data analysis and collection, and use of models in the physical sciences. 
Prerequisites: BIOL 111, BIOL 113 and BIOL 123, CHEM 106 and CHEM 116, GEOL 101 or GEOG 203, ASTR 101 and ASTR 102, and PHYS 205; junior or senior classification; admission to teacher certification.

MASC 351 Problem Solving in Mathematics
Credits 3. 3 Lecture Hours.
Problem solving strategies in math and science; evaluate conjectures and arguments; writing and collaborating on problem solutions; posing problems and conjectures; constructing knowledge from data; developing relationships from empirical evidence; connecting mathematics concepts; readings, discussions, and analyses will model and illustrate mathematics problems solving and proofs. 
Prerequisites: 6 hours of mathematics.

MASC 420 Inquiries in Life and Earth Sciences
Credits 3. 3 Lecture Hours.
Integration and connections among topics in the life and earth sciences–diversity, natural selection, ecosystem development, earth’s features, and weather systems; inquiry emphasizing experimental design, data analysis and collection; use of models in the life and earth sciences. 
Prerequisites: BIOL 111 or BIOL 113 and BIOL 123, CHEM 106 and CHEM 116, GEOL 101 or GEOG 203, ASTR 101 and ASTR 102, and PHYS 205; junior or senior classification; admission to teacher certification.

MASC 450 Integrated Mathematics
Credits 3. 3 Lecture Hours.
Integration and connections among topics and ideas in mathematics and other disciplines; connections between algebra and geometry and statistics and probability; focus for integration with authentic problems requiring various branches of mathematics. 
Prerequisites: MASC 351; admission to teacher education; junior classification.
MASE - Maritime Systems Engr (MASE)

MASE 400 Introduction to Coastal Engineering
Credits 3. 3 Lecture Hours.
Mechanics of shallow water wave motion; wave diffraction, refraction and reflection; wave forecasting; water level fluctuations; coastal processes and geomorphology; erosion control and shoreline stabilization; coastal structures; beach nourishment; dredging; introduction to physical and computer models and modeling techniques; design in coastal engineering.
Prerequisites: OCEN 300; senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 401 Underwater Acoustics
Credits 3. 3 Lecture Hours.
Fundamentals of underwater acoustics, SONAR equations, propagation of underwater sound, acoustic transducers and arrays, noise in the ocean environment, design and prediction of SONAR systems, ocean engineering applications of underwater sound.
Prerequisites: CVEN 301/EVEN 311, CVEN 336. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 407 Capstone Design II
Credits 3. 6 Lab Hours.
Design of a major engineered system based on a proposal developed in MASE 406 completed as a group project; realistic application of engineering skills and tools, experience managing a significant engineering-design effort. This is a writing-intensive course including a major report and weekly one-page written reports.
Prerequisites: MASE 406. Enrollment in OCSE major degree sequence.

MASE 410 Measurements in the Ocean Laboratory
Credit 1. 3 Lab Hours.
Fundamental techniques and instrumentation for field and laboratory measurements pertaining to coastal and ocean engineering (e.g., currents, wave height, wave/sediment interaction, mass transport, surveying, etc.); experiment planning; data analysis and presentation; written reports on methodology, analysis, and results of experiments.
Prerequisites: OCEN 300, MASE 400. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study on selected current problems in the ocean and/or maritime industry. Offered to enable individuals or groups to undertake and complete with credit some specialized investigation not covered by other courses.
Prerequisites: Approval of department head. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 489 Special Topics
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in a identified area of maritime systems engineering. May be repeated for credit.
Prerequisite: Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 491 Research in Maritime Systems Engineering
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in Maritime Systems Engineering. May be repeated 2 times for credit. Please see academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor. Enrollment in OCSE major degree sequence.

MASE 493 Enrichment in Maritime Systems Engineering
Credits 1 to 3. 1 to 3 Lecture Hours.
Selected topics in a identified area of maritime studies. May be repeated 3 times for credit.
Prerequisites: Junior or senior classification and approval of instructor. Approval of department head. Junior or senior classification or approval of instructor. Approval of department head.

MAST - Maritime Studies (MAST)

MAST 101 Connections
Credit 1. 1 Lecture Hour.
A first year experience seminar to explore the connections between academics disciplines to develop creative and critical thinking strategies which will increase abilities to implement solutions, refine information literacy skills, and identify the resources available for a successful transition from high school to the university environment. Prerequisites: None.

MAST 220 Introduction to Museums and Conservation
Credits 3. 3 Lecture Hours.
Introduction to museums, cultural heritage and collections care; best practice for non-profit institutions, public engagement, and the collection, preservation and exhibition of material culture; emphasis on archaeological, ethnographic and historical collections, or other collections of cultural significance.

MAST 226 Museums, Law and Ethics
Credits 3. 3 Lecture Hours.
Exploration of museum law and ethics; interdisciplinary topics.

MAST 240 Introduction to Maritime Studies
Credits 3. 3 Lecture Hours.
First year experience; exploration of Maritime Studies; interdisciplinary topics.

MAST 252 Crafts of the Maritime World
Credits 3. 3 Lecture Hours.
An exploration of various crafts, skills and aesthetic/design used in and supporting the maritime world; hands-on activities and practical experience of various skills and processes, using traditional tools required to put a ship to sea; from carpentry to rope-making, sewing canvas sails to making blocks.

MAST 265 Elissa Sail Training
Credits 3. 3 Lecture Hours.
Fundamentals of seamanship on a late 19th century square-rigged sailing vessel; train in sailing and maintenance of the 1877 barque ELISSA (owned and operated by the Texas Seaport Museum); lectures and activities in maritime life and seafaring history.

MAST 270 Historic Seafaring and Maritime Heritage
Credits 3. 3 Lecture Hours.
Fundamentals of traditional seamanship and an exploration of the cultures and technologies of seafaring people throughout history and in various geographical locations.

MAST 289 Special Topics
Credits 1 to 3. 1 to 3 Lecture Hours.
Credit Selected topics in a identified area of maritime studies. May be repeated for credit.
MAST 321 Industrial Diving Orientation  
Credits 3. 3 Lecture Hours. 2 Lab Hours.  
Illustrates the realities of operating in the scientific, commercial and military diving disciplines; practice real world training scenarios involving multiple aspects of each of the three fields.

MAST 333 Viking Archaeology and Norse Mythology  
Credits 3. 3 Lecture Hours.  
Overview of Viking Age (ca. 800 to 1100 C.E.) in Northern Europe; topics include Norse seafaring, world-view, society, archaeology, religion and cosmology as known from the archaeological and literary record.  
Prerequisite: Junior or senior classification or approval of instructor.

MAST 336 Maritime Foreign Policy  
Credits 3. 3 Lecture Hours.  
Strategies used by governments to guide international actions; objectives of state leaders in decision making; sources, processes, objectives and outcomes of maritime policy choices.  
Prerequisite: Junior or senior classification or approval of instructor.

MAST 340 Museums and the Construction of Identities  
Credits 3. 3 Lecture Hours.  
Examination of the cultural construction of identity within the museum context; personal and collective, corporeal and virtual, national and global identities; ways in which those identities are formed and reformed.  
Prerequisites: Junior or senior classification or approval of instructor.

MAST 345 Texas Maritime Culture and History  
Credits 3. 3 Lecture Hours.  
The coastal peoples, maritime history and culture of the Texas Gulf Coast ranging from pre-historic times to the present day; geography's influence on exploration, resources utilization, development and inland access; Texas ports historic and modern; shipwreck sites and historical texts; La Salle's La Belle, Texas Navy, Mexican War logistics; Civil War Naval actions, Texas Fisheries, tourism and recreation.  
Prerequisite: Junior or senior classification.

MAST 350 A History of Wooden Ship Construction  
Credits 3. 3 Lecture Hours.  
This course is designed to give undergraduate students an overview of ship construction and possible cultural factors that may influence how a shipwright builds a vessel.  
Prerequisites: Junior or senior classification or approval of instructor.

MAST 354 Ancient Egyptian Seafaring  
Credits 3. 3 Lecture Hours.  
Archaeology, iconography and written records of ancient Egypt as they relate to local and international trade by land, river and sea, beginning in Neolithic times (c. 5000 B.C.) to the end of the New Kingdom (c. 1069 B.C.).  
Prerequisites: ANTH 316; junior or senior classification or approval of instructor.

MAST 365 Material Culture  
Credits 3. 3 Lecture Hours.  
Examination of material evidence of human life, from cradles to graves, churches to forts, teapots to landscapes; material culture artifacts, the processes and technologies used to create them and their use in every day life; application to archaeology, museum studies and basic engineering.  
Prerequisites: Junior or senior classification or approval of instructor.

MAST 369 Collections Care and Management  
Credits 3. 3 Lecture Hours.  
Managing collections in libraries, archives and museums; media and collections storage; digitization and metadata processes; use of writing styles and citations.  
Prerequisites: MAST 220; junior or senior classification or approval of instructor.

MAST 371 Archaeology of the Pacific  
Credits 3. 3 Lecture Hours.  
Overview of the archaeology, history and cultures of the Pacific Rim; emphasizing the cultures of Polynesia, Melanesia, and Micronesia.  
Prerequisite: Junior or senior classification or approval of instructor.

MAST 411 International Maritime Culture  
Credits 3. 3 Lecture Hours.  
Strategies used in the exploitation of marine, coastal, and island habitats throughout human evolutionary history and the variety and complexity of adaptations in such environments; lectures and group discussions with occasional slide or movie presentations.  
Prerequisites: Junior or senior classification.

MAST 425 Thesis and Technical Writing  
Credits 3. 3 Lecture Hours.  
Rhetorical techniques for professional expository prose; intertextual argumentation and analysis.  
Prerequisite: Junior or senior classification; ENGL 104 and ENGL 203 or ENGL 210.

MAST 470 Advanced Museum Studies  
Credits 3. 3 Lecture Hours.  
Exploration of advanced topics in museum programs; preservation, research, education, outreach; development and implementation; emphasis on historical contexts, disciplinary intersections, ethical obligations and professional responsibilities; service to community, state and national interest and advancement of sciences.  
Prerequisite: MAST 220; junior or senior classification.

MAST 480 Honors Seminar in Service Learning  
Credit 1. 1 Lecture Hour.  
Opportunities for community service through active community participation; includes structured time for reflection; use of skills and knowledge in real-life situations; extend learning beyond the classroom; foster a sense of caring for others.  
Prerequisites: Junior or senior classification or permission from the instructor and must be a member of the Honors Program.

MAST 481 Seminar in Maritime Studies  
Credit 1. 1 Lecture Hour.  
This course is intended to provide students with the opportunity to conduct in-depth research on a particular issue, event, period, or people in maritime studies.  
Prerequisite: This one-credit hour course is open to senior maritime studies majors or approval of instructor.
MAST 484 Undergraduate Internship
Credits 0 to 6. 0 to 6 Other Hours.
Supervised study in a research or teaching laboratory remote from TAMUG. Student involvement is to consist of real-life learning or research, teaching, management, or a combination of these.
Prerequisite: Junior or senior classification or approval of instructor.

MAST 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Individually supervised research or advanced study on restricted area not covered in regular courses.
Prerequisite: Junior or senior classification or approval of instructor.

MAST 489 Special Topics
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in a identified area of maritime studies. May be repeated for credit.
Prerequisite: Junior or senior classification or approval of instructor.

MAST 491 Research in Maritime Studies
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in Maritime Studies. May be repeated 2 times for credit. Please see academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

MATH - Mathematics (MATH)

MATH 102 Algebra
Credits 3. 3 Lecture Hours.
(MATH 1314, 1414) Algebra. Sets, structure of number system; absolute values, solution sets of linear and nonlinear equations, of systems of equations, and of inequalities; relations and functions, graphical representations, graphical representations, progressions, mathematical induction, determinants; also taught at Galveston campus.

MATH 140 Mathematics for Business and Social Sciences
Credits 3. 3 Lecture Hours.
(MATH 1324) Mathematics for Business and Social Sciences. Application of common algebraic functions, including polynomial, exponential, logarithmic and rational, to problems in business, economics and the social sciences; includes mathematics of finance, including simple and compound interest and annuities; systems of linear equations; matrices; linear programming; and probability, including expected value. Only one of the following will satisfy the requirements for a degree: MATH 140 and MATH 168.
Prerequisite: High school algebra I and II and geometry; also taught at Galveston campus.

MATH 142 Business Calculus
Credits 3. 3 Lecture Hours.
(MATH 1325) Business Calculus. Limits and continuity; techniques and applications of derivatives including curve sketching and optimization; techniques and applications of integrals; emphasis on applications in business, economics, and social sciences. Only one of the following will satisfy the requirements for a degree: MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisites: MATH 140 or MATH 150, or equivalent or acceptable score on Texas A&M University math placement exam; also taught at Galveston campus.

MATH 147 Calculus I for Biological Sciences
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introduction to differential calculus in a context that emphasizes applications in the biological sciences. Only one of the following will satisfy the requirements for a degree: MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisite: MATH 150 or equivalent or acceptable score on TAMU Math Placement Exam; also taught at Galveston campus.

MATH 148 Calculus II for Biological Sciences
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introduction to integral calculus in a context that emphasizes applications in the biological sciences; ordinary differential equations and analytical geometry. Only one of the following will satisfy the requirements for a degree: MATH 148, MATH 152 and MATH 172.
Prerequisite: MATH 147, MATH 151 or approval of instructor; also taught at Galveston campus.

MATH 150 Functions, Trigonometry and Linear Systems
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(MATH 2412) Functions, Trigonometry and Linear Systems. Graphs, functions, college algebra and trigonometry, linear systems and vectors; also taught at Galveston and Qatar campuses.

MATH 151 Engineering Mathematics I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(MATH 2413) Engineering Mathematics I. Rectangular coordinates, vectors, analytic geometry, functions, limits, derivatives of functions, applications, integration, computer algebra. MATH 171 designed to be a more demanding version of this course. Only one of the following will satisfy the requirements for a degree: MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisite: MATH 150 or equivalent or acceptable score on TAMU Math Placement Exam; also taught at Galveston and Qatar campuses.

MATH 152 Engineering Mathematics II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(MATH 2414) Engineering Mathematics II. Differentiation and integration techniques and their applications (area, volumes, work), improper integrals, approximate integration, analytic geometry, vectors, infinite series, power series, Taylor series, computer algebra. MATH 172 designed to be a more demanding version of this course. Only one of the following will satisfy the requirements for a degree: MATH 148, MATH 152 and MATH 172.
Prerequisite: MATH 151 or equivalent; also taught at Galveston and Qatar campuses.

MATH 161 Engineering Mathematics II
Credits 3. 3 Lecture Hours.
Differentiation and integration techniques and their applications (area, volumes, work), improper integrals, approximate integration, analytic geometry, vectors, infinite series, power series, Taylor series. Only one of the following will satisfy the requirements for a degree: MATH 152, MATH 161 and MATH 172.
Prerequisite: MATH 151 or equivalent; Galveston campus.
MATH 167 Explorations in Mathematics  
Credits 3. 3 Lecture Hours.  
Application of mathematics to topics of contemporary societal importance using quantitative methods; may include elements of management science (optimal routes, planning and scheduling), statistics (sampling/polling methods, analyzing data to make decisions), cryptography (codes used by stores, credit cards, internet security), fairness (apportionment, voting) patterns (symmetry, tessellations, fractals), world health.  
Prerequisites: High school algebra I and II.  

MATH 168 Finite Mathematics  
Credits 3. 3 Lecture Hours.  
Linear equations and applications; systems of linear equations, matrix algebra and applications, linear programming, probability and applications, statistics. Only one of the following will satisfy the requirements for a degree: MATH 140 and MATH 168.  
Prerequisites: High school algebra I and II and geometry; also taught at Galveston campus.  

MATH 170 Freshman Mathematics Laboratory  
Credit 1. 2 Lab Hours.  
Computing and problem solving laboratory; introduction to the various mathematical disciplines; development of skills in mathematical problem solving and skills in teamwork. May be taken two times for credit.  
Prerequisites: Concurrent enrollment in MATH 150, MATH 171, or MATH 172; admission to College of Science.  

MATH 171 Calculus I  
Credits 4. 4 Lecture Hours.  
Vectors, functions, limits, derivatives, Mean Value Theorem, applications of derivatives, integrals, Fundamental Theorem of Calculus. Designed to be more demanding than MATH 151. Only one of the following will satisfy the requirements for a degree: MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.  
Prerequisite: MATH 150 or equivalent or acceptable score on TAMU Math Placement Exam.  

MATH 172 Calculus II  
Credits 4. 4 Lecture Hours.  
Techniques of integration, applications of integrals, improper integrals, sequences, infinite series, vector algebra and solid analytic geometry. Designed to be more demanding than MATH 152. Only one of the following will satisfy the requirements for a degree: MATH 148, MATH 152 and MATH 172.  
Prerequisite: MATH 147, MATH 151 or MATH 171 or equivalent with a grade of C or better.  

MATH 200 Horizons of Mathematics  
Credit 1. 1 Lecture Hour.  
Overview of different areas and topics of mathematics including logic, infinite sets, elements of topology, elements of history of mathematics; introduction to future courses in math degree plans and to some areas of research done by mathematics department faculty; topics may vary at the discretion of the instructor.  
Prerequisites: MATH and APMS majors; freshmen or sophomore classification; approval of instructor.  

MATH 217 Explorations in Mathematics  
Credits 3. 3 Lecture Hours.  
Application of mathematics to topics of contemporary societal importance using quantitative methods; may include elements of management science (optimal routes, planning and scheduling), statistics (sampling/polling methods, analyzing data to make decisions), cryptography (codes used by stores, credit cards, internet security), fairness (apportionment, voting) patterns (symmetry, tessellations, fractals), world health.  
Prerequisites: High school algebra I and II.  

MATH 218 Finite Mathematics  
Credits 3. 3 Lecture Hours.  
Linear equations and applications; systems of linear equations, matrix algebra and applications, linear programming, probability and applications, statistics. Only one of the following will satisfy the requirements for a degree: MATH 140 and MATH 168.  
Prerequisites: High school algebra I and II and geometry; also taught at Galveston campus.  

MATH 220 Freshman Mathematics Laboratory  
Credit 1. 2 Lab Hours.  
Computing and problem solving laboratory; introduction to the various mathematical disciplines; development of skills in mathematical problem solving and skills in teamwork. May be taken two times for credit.  
Prerequisites: Concurrent enrollment in MATH 150, MATH 171, or MATH 172; admission to College of Science.  

MATH 221 Several Variable Calculus  
Credits 4. 4 Lecture Hours.  
Vector algebra and solid analytic geometry; calculus of functions of several variables; Lagrange multipliers; multiple integration, theory, methods and application; line and surface integrals, Green’s and Stokes’ theorems; Jacobians. Designed to be more demanding than MATH 251 and MATH 253. Only one of the following will satisfy the requirements for a degree: MATH 221, MATH 251 and MATH 253.  
Prerequisite: MATH 148, MATH 152, or MATH 172.  

MATH 225 Advanced Spreadsheet Techniques  
Credit 1. 1 Lecture Hour.  
Advanced commands, formatting and functionality of spreadsheets, with Excel being the particular example.  
Prerequisite: MATH or APMS major.  

MATH 251 Engineering Mathematics III  
Credits 3. 3 Lecture Hours.  
(MATH 2315) Engineering Mathematics III. Vector algebra; calculus of functions of several variables, partial derivatives, directional derivatives, gradient, multiple integration, line and surface integrals, Green’s and Stokes’ theorems. MATH 221 designed to be a more demanding version of this course. Only one of the following will satisfy the requirements for a degree: MATH 221, MATH 251 and MATH 253.  
Prerequisite: MATH 148, MATH 152, or MATH 172; also taught at Galveston and Qatar campuses.  

MATH 253 Engineering Mathematics III  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(MATH 2415) Engineering Mathematics III. Vector algebra; calculus of functions of several variables, partial derivatives, directional derivatives, gradient, multiple integration, line and surface integrals, Green’s and Stokes’ theorems, computer algebra. MATH 221 designed to be a more demanding version of this course. Only one of the following will satisfy the requirements for a degree: MATH 221, MATH 251 and MATH 253.  
Prerequisite: MATH 148, MATH 152, or MATH 172.  

MATH 281 Seminar in Mathematics  
Credit 1. 1 Lecture Hour.  
Designed to familiarize students with mathematics pertaining to real world applications in such areas as biology, signal processing, quantum computation and robotics. May be taken four times for credit.  

MATH 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special problems not covered by any other lower-division course in the curriculum; intended for freshman and sophomore students.  
Prerequisite: Approval of department head.  

MATH 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of mathematics. May be repeated for credit.  
Prerequisite: Approval of instructor.  

MATH 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in mathematics. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.
MATH 300 Foundations of Mathematics  
Credits 3. 3 Lecture Hours.  
Foundations of mathematics including logic, set theory, combinatorics, and number theory.  
Prerequisite: Grade of C or better in MATH 148, MATH 152 or MATH 172, or equivalent.  

MATH 302 Discrete Mathematics  
Credits 3. 3 Lecture Hours.  
Formal structures for describing data, algorithms and computing devices; theory and applications of sets, graphs and algebraic structures.  
Prerequisite: MATH 148, MATH 152, or MATH 172.  

MATH 304 Linear Algebra  
Credits 3. 3 Lecture Hours.  
Introductory course in linear algebra covering abstract ideas of vector space and linear transformation as well as models and applications of these concepts, such as systems of linear equations, matrices and determinants. MATH 323 designed to be a more demanding version of this course. Only one of the following will satisfy the requirements for a degree: MATH 304, MATH 309, MATH 311 and MATH 323.  
Prerequisite: MATH 148, MATH 152, or MATH 172; junior or senior classification; also taught at Galveston campus.  

MATH 308 Differential Equations  
Credits 3. 3 Lecture Hours.  
Prerequisites: MATH 221, MATH 251, or MATH 253, or concurrent enrollment; knowledge of computer algebra system; also taught at Galveston and Qatar campuses.  

MATH 309 Linear Algebra for Differential Equations  
Credits 3. 3 Lecture Hours.  
Systems of linear equations, matrices, determinants, vector spaces, linear transformations, eigenvalues and eigenvectors, diagonalization, inner product spaces, orthogonal functions, separation of variables, Fourier series, Bessel functions. Only one of the following will satisfy the requirements for a degree: MATH 304, MATH 309, MATH 311 and MATH 323.  
Prerequisites: MATH 221, MATH 251, or MATH 253; MATH 308 or concurrent enrollment; junior or senior classification or approval of instructor.  

MATH 311 Topics in Applied Mathematics I  
Credits 3. 3 Lecture Hours.  
Systems of linear equations, matrices, determinants, vector spaces, linear transformations, eigenvalues and eigenvectors, diagonalization, inner product spaces, orthogonal functions; vector analysis, including gradient, divergence, curl, line and surface integrals, Gauss’, Green’s and Stokes’ theorems. Only one of the following will satisfy the requirements for a degree: MATH 304, MATH 309, MATH 311 and MATH 323.  
Prerequisites: MATH 221, MATH 251, or MATH 253; MATH 308 or concurrent enrollment; junior or senior classification or approval of instructor; also taught at Galveston and Qatar campuses.  

MATH 323 Linear Algebra  
Credits 3. 3 Lecture Hours.  
Linear equations and matrices; real vector spaces, linear transformations, change of bases, determinants, eigenvalues and eigenvectors, diagonalization, inner products. Designed to include more theory and be more demanding than MATH 304. Only one of the following will satisfy the requirements for a degree: MATH 304, MATH 309, MATH 311 and MATH 323.  
Prerequisites: MATH 148, MATH 152 or MATH 172; MATH 300; junior or senior classification or approval of instructor.  

MATH 325 The Mathematics of Interest  
Credits 3. 3 Lecture Hours.  
The mathematical theory associated with interest; annuities; varying annuities; sinking funds and amortization; coupon bonds; valuation of noncallable bonds; yield to maturity; yield curve; spot rates and forward rates; internal rate of return; duration and convexity; portfolio immunization.  
Prerequisites: MATH 142, MATH 147, MATH 151 or MATH 171.  

MATH 356 Structure of Mathematics I  
Credits 3. 3 Lecture Hours.  
Informal logic, sets, relations, functions, whole numbers, numeration systems, binary operations, integers, elementary number theory, modular systems, rational numbers and the system of real numbers. Designed primarily for elementary teacher certification. Others must have consent of instructor.  
Prerequisites: Must have completed University Core Curriculum mathematics requirements with a grade of C of better.  

MATH 366 Structure of Mathematics II  
Credits 3. 3 Lecture Hours.  
Geometry, measurement and coordinate geometry. Designed primarily for elementary teacher certification. Others must have consent of instructor.  
Prerequisite: MATH 365 or equivalent with a grade of C or better.  

MATH 367 Basic Concepts of Geometry  
Credits 3. 3 Lecture Hours.  
Formal development of geometry; finite [Euclidean and non-Euclidean]. Designed primarily for elementary mathematics teacher certification. Others must have consent of instructor.  
Prerequisite: MATH 366 or equivalent with a grade of C or better.  

MATH 375 Intermediate Real Analysis  
Credits 3. 3 Lecture Hours.  
Development of the real numbers, limits, foundations and major theorems of calculus. Designed primarily for mathematics teacher certification. Others must have consent of instructor.  
Prerequisite: MATH 300 or equivalent.  

MATH 376 Intermediate Abstract Algebra  
Credits 3. 3 Lecture Hours.  
Relations, functions, binary operators, rings, homomorphisms, integral domains and fields. Designed primarily for mathematics teacher certification. Others must have consent of instructor.  
Prerequisites: MATH 300 or MATH 302; MATH 304 or equivalent.  

MATH 396 Communications in Mathematics  
Credit 1. 1 Lecture Hour.  
Electronic, written, and oral communications in mathematics.  
Prerequisites: MATH 300, junior or senior classification, and mathematics major.
MATH 401 Advanced Engineering Mathematics  
Credits 3. 3 Lecture Hours.  
Engineering mathematics including Perturbation Theory, Fourier series and partial differential equations. Designed primarily for engineering majors. Others must have consent of instructor.  
Prerequisite: MATH 308; also taught at Galveston campus.

MATH 403 Mathematics and Technology  
Credits 3. 3 Lecture Hours.  
Mathematical problem-solving and communication through the use of various technologies (both hardware and software). Intended primarily, but not limited to, students working toward teacher certification.  
Prerequisite: MATH 367 or MATH 467 with a grade of C or better.

MATH 407 Complex Variables  
Credits 3. 3 Lecture Hours.  
Fundamental theory of analytic functions, including residues and their applications.  
Prerequisite: MATH 221, MATH 251, or MATH 253.

MATH 409 Advanced Calculus I  
Credits 3. 3 Lecture Hours.  
Axioms of the real number system; point set theory of R1; compactness, completeness and connectedness; continuity and uniform continuity; sequences, series; theory of Riemann integration.  
Prerequisites: MATH 300; MATH 221, MATH 251 or MATH 253.

MATH 410 Advanced Calculus II  
Credits 3. 3 Lecture Hours.  
Differential and integral calculus of functions defined on Rm including inverse and implicit function theorems and change of variable formulas for integration; uniform convergence.  
Prerequisites: MATH 304 or MATH 323; MATH 409.

MATH 411 Mathematical Probability  
Credits 3. 3 Lecture Hours.  
Probability spaces, discrete and continuous random variables, special distributions, joint distributions, expectations, law of large numbers, the central limit theorem.  
Prerequisite: MATH 221, MATH 251, or MATH 253.

MATH 412 Theory of Partial Differential Equations  
Credits 3. 3 Lecture Hours.  
Formulation and solution of partial differential equations of mathematical physics; Fourier series and transform methods, complex variable methods, methods of characteristics and first order equations.  
Prerequisite: MATH 308 or approval of instructor.

MATH 414 Fourier Series and Wavelets  
Credits 3. 3 Lecture Hours.  
Fourier series and wavelets with applications to data compression and signal processing.  
Prerequisite: MATH 304, MATH 309, MATH 311, or MATH 323; also taught at Qatar campus.

MATH 415 Modern Algebra I  
Credits 3. 3 Lecture Hours.  
A study of groups, rings, fields with emphasis on the theoretical aspects and proofs.  
Prerequisite: MATH 300; MATH 304, MATH 309, MATH 311, or MATH 323.

MATH 416 Modern Algebra II  
Credits 3. 3 Lecture Hours.  
Continuation of topics introduced in MATH 415 including Galois Theory and the Sylow Theorems with emphasis on the theoretical aspects.  
Prerequisite: MATH 415, junior or senior classification.

MATH 417 Numerical Methods  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Numerical methods for applications; qualitative discussion of convergence and stability properties; computer implementation; interpolation and quadrature, initial value problems, matrix decompositions, interactive solution of linear and non-linear systems, least squares approximation, boundary value problems for ordinary differential equations.  
Prerequisites: MATH 304, MATH 309, MATH 311, or MATH 323; MATH 308; ability to program; junior or senior classification.

MATH 419 Applications of Actuarial Science  
Credits 2. 2 Lecture Hours.  
Applications of actuarial science using mathematical and statistical methods to assess risk in the insurance and finance industries; emphasis on probability, statistics, finance and economics; focus on using probabilistic models in the estimation of insurance premiums.  
Prerequisite: MATH 411 or STAT 414 or approval of math advisor.

MATH 420 Application of Actuarial Science II  
Credits 2. 2 Lecture Hours.  
Use of mathematical and statistical methods to price various financial instruments, such as bonds; understanding how the term structure of interest rates affect the price of these instruments.  
Prerequisite: MATH 325 or concurrent enrollment, or approval of instructor.

MATH 423 Linear Algebra II  
Credits 3. 3 Lecture Hours.  
Eigenvalues, similarity and canonical forms, advanced topics to be chosen by the instructor.  
Prerequisites: MATH 300 or CSCE 222/ECEN 222; MATH 304 or MATH 323, or approval of instructor.

MATH 425 The Mathematics of Contingent Claims  
Credits 3. 3 Lecture Hours.  
The mathematical theory associated with asset price dynamics; binomial pricing models; Black-Scholes analysis; hedging; volatility smile; implied volatility trees; implied binomial trees.  
Prerequisites: MATH 308; MATH 411, STAT 211 or STAT 414.

MATH 427 Introduction to Number Theory  
Credits 3. 3 Lecture Hours.  
Prime and composite integers; Euclidean algorithm; modular arithmetic; Chinese remainder theorem; unique factorization; quadratic reciprocity; Riemann zeta function; representation of numbers as a sum of squares.  
Prerequisites: MATH 300; MATH 304 or MATH 323.

MATH 431 Structures and Methods of Combinatorics  
Credits 3. 3 Lecture Hours.  
Enumerative techniques generating functions, partially ordered sets, extremal combinatorics, recursive techniques, generating functions techniques.  
Prerequisites: MATH 300 or MATH 308; MATH 325 or concurrent enrollment, or approval of instructor.

MATH 433 Applied Algebra  
Credits 3. 3 Lecture Hours.  
Applications to number theory, coding theory, and other areas.  
Prerequisites: MATH 300 or MATH 302; MATH 304 or MATH 323.
MATH 436 Introduction to Topology  
Credits 3. 3 Lecture Hours.  
Metric spaces; continuity of metric spaces; topological spaces; basic notions; separation axioms; compactness; local compactness; connectedness; basic notions in homotopy theory; quotient spaces, paracompactness and topological manifolds.  
Prerequisites: MATH 300; MATH 221, MATH 251, or MATH 253.

MATH 437 Principles of Numerical Analysis  
Credits 4. 4 Lecture Hours. 3 Lab Hours.  
Mathematical principles of numerical analysis and their application to the study of particular methods; fixed-point iteration, Newton’s method; normed vector spaces and operators, Schur decomposition, convergent matrices, minimization methods, conjugate gradient method; polynomial interpolation of Lagrange and Hermite; best approximation, Bernstein and Weierstrass Theorems, numerical quadrature.  
Prerequisites: MATH 304, MATH 309, MATH 311, or MATH 323; MATH 308; MATH 409; ability to program; junior or senior classification.

MATH 439 Differential Geometry of Curves and Surfaces  
Credits 3. 3 Lecture Hours.  
Local and global theory of parameterized curves; regular surfaces, local coordinates, first fundamental form, orientation, area; Gauss map, second fundamental form; Gauss Bonnet theorem; additional topics to be selected by the instructor.  
Prerequisites: MATH 308; MATH 304 or MATH 323.

MATH 442 Mathematical Modeling  
Credits 3. 3 Lecture Hours.  
The construction of mathematical models from areas such as economics, game theory, integer programming, mathematical biology and mathematical physics.  
Prerequisites: MATH 304, MATH 309, MATH 311, or MATH 323; MATH 308 or equivalent.

MATH 446 Principles of Analysis I  
Credits 3. 3 Lecture Hours.  
Construction of the real and complex numbers; topology of metric spaces, compactness and connectedness; Cauchy sequences, completeness and the Baire Category Theorem; Continuous Mappings; introduction to Point-Set Topology.  
Prerequisites: MATH 409; junior or senior classification.

MATH 447 Principles of Analysis II  
Credits 3. 3 Lecture Hours.  
Riemann-Stieltjes integration; sequences and series of functions; the Stone-Weierstrass and Arzela-Ascoli Theorems; introduction to Lebesgue measure theory and integration.  
Prerequisites: MATH 446 or approval of instructor; junior or senior classification.

MATH 460 Tensors and General Relativity  
Credits 3. 3 Lecture Hours.  
Vectors and tensors in special relativity, curvature, manifolds, covariant differentiation, Einstein field equations, Schwarzschild geometry and black holes, cosmology, gauge field theories.  
Prerequisites: MATH 308; PHYS 331 or MATH 323 or MATH 311; junior or senior classification.

MATH 461 Modern Geometry  
Credits 3. 3 Lecture Hours.  
Modern development of Euclidean geometry (Hilbert axioms) with historical and philosophical context; independence of the parallel postulate; models of hyperbolic non-Euclidean geometry.  
Prerequisite: Grade of C or better in MATH 304, MATH 309, MATH 311, MATH 300 or MATH 323.

MATH 469 Introduction to Mathematical Biology  
Credits 3. 3 Lecture Hours.  
Introduction to mathematical modeling techniques in the biological sciences; continuous versus discrete models; deterministic versus stochastic models; includes population dynamics and ecology, spread of infectious diseases, population genetics and evolution, spatial pattern formation.  
Prerequisites: MATH 304 or MATH 323; MATH 308 or equivalent.

MATH 470 Communications and Cryptography  
Credits 3. 3 Lecture Hours.  
Introduction to coded communications, digital signatures, secret sharing, one-way functions, authentication, error control and data compression.  
Prerequisites: MATH 304 or MATH 309 or MATH 311 or MATH 323; CSCE 110 or CSCE 111 or CSCE 121 or CSCE 206 or ENGR 112; approval of instructor.

MATH 471 Elliptic Curve Cryptography  
Credits 3. 3 Lecture Hours.  
Theory of the group law on elliptic curves with applications to problems in cryptography; elliptic curves over finite fields, rational numbers, real and complex numbers; elliptic curve based cryptosystems, digital signatures, and factorization methods.  
Prerequisites: MATH 415 or MATH 433.

MATH 472 Topological Data Analysis  
Credits 3. 3 Lecture Hours.  
Topological Data Analysis with a view toward persistent homology of point clouds for applications to data analysis; homology of simplicial complexes over a field; functorial clustering methods; persistent homology; real-world applications to data analysis.  
Prerequisites: MATH 304, MATH 309, MATH 311, or MATH 323.

MATH 475 Directed Studies  
Credits 1 to 8. 1 to 8 Other Hours.  
Special problems in mathematics not covered by any other course in the curriculum. Work may be in either theory or laboratory.  
Prerequisite: Approval of department head; also taught at Galveston campus.

MATH 480 The Putnam Challenge  
Credit 1. 1 Lecture Hour.  
Intensive individualized training for preparation for the Putnam Exam, a national contest for mathematics majors. May be taken four times for credit.  
Prerequisites: Approval of instructor; junior or senior classification.
MATH 491 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Active research of basic nature under supervision of Department of Mathematics or affiliated department graduate faculty member; a maximum of 6 hours of credit can be used in degree plans. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Mathematics or applied mathematical sciences major or minor; junior or senior classification or approval of mathematics advisor; also taught at Galveston campus.

MEEN - Mechanical Engineering (MEEN)

MEEN 210 Geometric Modeling for Mechanical Design  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Foundations of geometric modeling as applied to mechanical design through use of modern computer-aided design (CAD) and physical prototyping tools; basics of systematic design methodology; geometric visualization concepts: multiview orthographic, isometric, oblique, perspective; three-dimensional representations, surface and solid modeling; dimensioning and tolerancing; rapid prototyping using 3D printing.  
Prerequisites: Mechanical engineering major; grade of C or better in ENGR 102, and PHYS 206 or PHYS 218.

MEEN 221 Statics and Particle Dynamics  
Credits 3. 3 Lecture Hours.  
Application of the fundamental principles of Newtonian mechanics to the statics and dynamics of particles; equilibrium of trusses, frames, beams and other rigid bodies.  
Prerequisites: For non-mechanical engineering majors; admission to an engineering major; Grade of C or better in PHYS 206 or PHYS 218; grade of C or better in MATH 251 or MATH 253, or concurrent enrollment.

MEEN 222/MSEN 222 Materials Science  
Credits 3. 3 Lecture Hours.  
Mechanical, optical, thermal, magnetic and electrical properties of solids; differences in properties of metals, polymers, ceramics and composite materials in terms of bonding and crystal structure.  
Prerequisites: Grade of C or better in CHEM 102 and CHEM 112, or CHEM 104 and CHEM 114, or CHEM 107 and CHEM 117; grade of C or better in PHYS 206 or PHYS 218.  
Cross Listing: MSEN 222/MEEN 222.

MEEN 225 Engineering Mechanics  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Application of the laws of classical mechanics to simplified, plausibly real world problems or interest to mechanical engineering, including the analysis of cables, frames, trusses, beams, machines and mechanisms.  
Prerequisites: Mechanical engineering major; grade of C or better in PHYS 206 or PHYS 218; grade of C or better in MATH 251 or MATH 253, or concurrent enrollment.

MEEN 260 Mechanical Measurements  
Credits 3. 3 Lecture Hours. 3 Lab Hours.  
Introduction to the basic principles of engineering experimentation including: instrumentation and measurement techniques, signal processing and data acquisition, statistical data analysis, and interpretation and reporting of results.  
Prerequisites: Grade of a C or better in MEEN 225 or MEEN 221; grade of C or better in ECEN 215 and STAT 211; grade of a C or better in MATH 308 and MEEN 315, or concurrent enrollment.

MEEN 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed studies in specific problem areas of mechanical engineering.  
Prerequisites: MEEN classification; approval by instructor and department head or delegate.

MEEN 289 Special Topics in...  
Credits 0 to 4. 0 to 4 Other Hours.  
Selected topics in an identified area of mechanical engineering. May be repeated for credit.  
Prerequisite: Approval of instructor.

MEEN 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in mechanical engineering. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

MEEN 315 Principles of Thermodynamics  
Credits 3. 3 Lecture Hours.  
Theory and application of energy methods in engineering; conservation of mass and energy; energy transfer by heat, work and mass; thermodynamic properties; analysis of open and closed systems; the second law of thermodynamics and entropy; gas, vapor and refrigeration cycles.  
Prerequisites: Grade of a C or better in MEEN 221, MEEN 225, or CVEN 221; grade of a C or better in MATH 251 or MATH 253.

MEEN 344 Fluid Mechanics  
Credits 3. 3 Lecture Hours.  
Application of laws of statics, buoyancy, stability, energy and momentum to behavior of ideal and real fluids; dimensional analysis and similitude and their application to flow through ducts and piping; lift and drag and related problems.  
Prerequisites: Grade of C or better in MEEN 315.

MEEN 345 Fluid Mechanics Laboratory  
Credit 1. 3 Lab Hours.  
Introduction to basic fluid mechanics instrumentation; experimental verification and reinforcement of the analytical concepts introduced in MEEN 344.  
Prerequisites: Grade of C or better in MEEN 260; grade of C or better in MEEN 344 or concurrent enrollment.

MEEN 357 Engineering Analysis for Mechanical Engineers  
Credits 3. 3 Lecture Hours.  
Practical foundation for the use of numerical methods to solve engineering problems: Introduction to Matlab, error estimation, Taylor series, solution of non-linear algebraic equations and linear simultaneous equations; numerical integration and differentiation; initial value and boundary value problems; finite difference methods for parabolic and elliptic partial differential equations.  
Prerequisites: Grade of C or better in MATH 308; grade of C or better in MEEN 210 or concurrent enrollment.

MEEN 360 Materials and Manufacturing Selection in Design  
Credits 3. 3 Lecture Hours.  
Selecting materials and manufacturing processes in design; emphasis on material mechanical properties; microstructure production and control; manufacturing processes for producing various shapes for components and structures; use of design methodology.  
Prerequisites: Grade of C or better in MEEN 210 and MEEN 260.
MEEN 361 Materials and Manufacturing in Design Laboratory
Credit 1. 3 Lab Hours.
Experiments in materials characterization and manufacturing processes; emphasis on material mechanical properties; microstructure production and control; manufacturing processes for producing various shapes for components and structures.
Prerequisites: Grade of C or better in MEEN 260; grade of C or better in MEEN 360 or concurrent enrollment.

MEEN 363 Dynamics and Vibrations
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Dynamics and Vibration. Application of Newtonian and energy methods to model dynamic systems (particles and rigid bodies) with ordinary differential equations; solution of models using analytical and numerical approaches; interpreting solutions; linear vibrations.
Prerequisites: Grade of C or better in MEEN 225 or MEEN 221, and MATH 308; grade of a C or better in MEEN 357, or concurrent enrollment.

MEEN 364 Dynamic Systems and Controls
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Mathematical modeling, analysis, measurement and control of dynamic systems; extensions of modeling techniques of MEEN 363 to other types of dynamic systems; introduction to feedback control, time and frequency domain analysis of control systems, stability, PID control, root locus; design and implementation of computer-based controllers in the lab.
Prerequisites: Grade of C or better in MEEN 260 and MEEN 363.

MEEN 368 Solid Mechanics in Mechanical Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Stress analysis of deformable bodies and mechanical elements; stress transformation; combined loading; failure modes; material failure theories; fracture and fatigue; deflections and instabilities; thick cylinders; curved beams; design of structural/mechanical members; design processes.
Prerequisites: Grade of a C or better in MEEN 221 or MEEN 225.

MEEN 381 Seminar
Credit 1. 2 Other Hours.
Presentations by practicing engineers and faculty addressing: effective communications, engineering practices, professional registration, ethics, career-long competence, contemporary issues, impact of technology on society and being informed; preparation of a resume, a lifelong learning plan, two papers, two oral presentations and complete an online assessment of the mechanical engineering program.
Prerequisite: Major in mechanical engineering.

MEEN 399 High Impact Experience for Mechanical Engineers
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at midpoint.
Prerequisite: Junior or senior classification.

MEEN 401 Introduction to Mechanical Engineering Design
Credits 3. 2 Lecture Hours. 3 Lab Hours.
The design innovation process; need definition, functional analysis, performance requirements and evaluation criteria, conceptual design evaluation, down-selected to an embodiment; introduction to systems and concurrent engineering; parametric and risk analysis, failure mode analysis, material selection, and manufacturability; cost and life cycle issues, project management.
Prerequisites: Grade of C or better in MEEN 360, MEEN 361, MEEN 364, MEEN 441, and MEEN 461.

MEEN 402 Intermediate Design
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Product design and development process including case studies; project management, marketing considerations, manufacturing, detailed design specifications; failure modes, application of codes and standards, selection of design margins; product (component) development guidelines; intellectual property, product liability and ethical responsibility.
Prerequisite: Grade of C or better in MEEN 401.

MEEN 404 Engineering Laboratory
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Systematic design of experimental investigations; student teams identify topics and develop experiment designs including: establishing the need; functional decomposition; requirements; conducting the experiment; analyzing and interpreting the results and written and oral reports documenting the objectives, procedure, analysis, and results and conclusion of two or three experiments.
Prerequisites: Grade of C or better in MEEN 360, MEEN 361, MEEN 364 and MEEN 461; grade of C or better in MEEN 401 or concurrent enrollment.

MEEN 406 Energy Management in Industry
Credits 3. 3 Lecture Hours.
Energy systems and components frequently encountered in industrial environments; application of basic principles of thermodynamics, heat transfer, fluid mechanics and electrical machinery to the analysis and design of industrial system components and systems; improved energy utilization.
Prerequisites: Grade of C or better in MEEN 260 and MEEN 315.

MEEN 408 Mechanics of Robotic Manipulators
Credits 3. 3 Lecture Hours.
Forward and inverse kinematics and differential kinematics of robot manipulators, path planning, motion planning, dynamics of robot manipulators and control algorithms; PD/PID control, computed torque algorithm.
Prerequisites: MEEN 364 or equivalent; junior or senior classification.

MEEN 410 Internal Combustion Engines
Credits 3. 3 Lecture Hours.
Thermodynamics of cycles for internal combustion engines and gas turbines, including fuels and combustion; performance characteristics of various types of engines.
Prerequisite: MEEN 344 or equivalent.

MEEN 411 Mechanical Controls
Credits 3. 3 Lecture Hours.
Application of classical and modern control theory techniques to modeling, analysis and synthesis of linear, mechanical control systems.
Prerequisite: MEEN 364.

MEEN 414 Principles of Turbomachinery
Credits 3. 3 Lecture Hours.
Aero-thermodynamic and mechanical design of turbomachinery components including steam and gas turbine stages, compressor stages, and inlet and exhaust systems, and their integration into power and thrust generation units; design and off-design behaviors of turbine and compressor stages and units; design with SolidWorks.
Prerequisites: MEEN 421; junior or senior classification.
MEEN 417/NUEN 417 Basics of Plasma Engineering and Applications
Credits 3. 3 Lecture Hours.
Basic plasma properties and confinement techniques; single particle
orbits in electric and magnetic fields, moments of Boltzmann equation
and introduction to fluid theory; wave phenomena in plasmas and
introduction to plasma kinetic theory; analysis of laboratory plasmas
and plasma applications including fusion, electric propulsion, materials
processing and plasmas enhanced chemistry.
Prerequisites: Grade of C or better in PHYS 208 or equivalent; senior
classification in nuclear, mechanical or aerospace engineering, or
physics.
Cross Listing: NUEN 417/MEEN 417.

MEEN 421 Thermal-Fluids Analysis and Design
Credits 3. 3 Lecture Hours.
Integration of thermodynamics, fluid mechanics and heat transfer
through application to the design of various thermal systems comprised
of several components requiring individual analyses; analysis of the
entire system; representative applications of thermal-fluids analysis with
a design approach.
Prerequisite: Grade of C or better in MEEN 461.

MEEN 431 Advanced System Dynamics and Controls
Credits 3. 3 Lecture Hours.
Unified framework for modeling, analysis, synthesis, design and
simulation of mechanical systems with energy exchange across
multiple domains; study of mechanical, electrical, hydraulic and thermal
subsystems; Newtonian mechanics, rigid body dynamics, multiple
degrees of freedom vibrations and control system design.
Prerequisites: MEEN 364; junior or senior classification.

MEEN 432 Automotive Engineering
Credits 3. 3 Lecture Hours.
Introduction to vehicle dynamics; application of engineering mechanics
principles to analysis of acceleration and braking, cornering and handling;
analysis and design of drive train, suspension, brakes, and tires to
achieve desired performance.
Prerequisite: MEEN 363.

MEEN 433 Mechatronics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Basic principles of digital logic and analog circuits in mechanical
systems; electrical-mechanical interfacing; sensors and actuators; digital
control implementation; precision design and system integration.
Prerequisite: MEEN 364 or equivalent.

MEEN 434 Dynamics and Modeling of Mechatronic System
Credits 3. 3 Lecture Hours.
Mechatronic interactions in lumped parameter and continuum systems;
review of integral and differential electromagnetic laws, including
motions; lumped elements and dynamic equations of motion; linear and
nonlinear actuators and transducers; field transformation and moving
media; electromagnetic force densities and stress tensors.
Prerequisite: MEEN 364.

MEEN 436 Principles of Heating, Ventilating and Air Conditioning
Credits 3. 3 Lecture Hours.
Application of thermodynamics fluid mechanics, and heat transfer to
the design of HVAC equipment; selection of equipment, piping and duct
layouts.
Prerequisite: Grade of a C or better in MEEN 344 or equivalent.

MEEN 437 Principles of Building Energy Analysis
Credits 3. 3 Lecture Hours.
Analysis of building energy use by applying thermodynamics and heat
transfer to building heating and cooling load calculations; heat balance
and radiant time series calculation methods; psychrometric analysis,
indoor air quality, effect of solar radiation on heating and cooling of
buildings. Required design project.
Prerequisites: MEEN 315 or equivalent; junior or senior classification.

MEEN 439 Solar Energy Engineering
Credits 3. 3 Lecture Hours.
Solar energy; solar angles and radiation; solar thermal systems; solar
water heating and space heating; concentrated solar power; energy
storage; solar photovoltaics; solar cell manufacturing; other solar energy
technologies.
Prerequisite: MEEN 315.

MEEN 440 Bio-inspired Engineering Design
Credits 3. 3 Lecture Hours.
Expand design space available to engineering by developing and
understanding of how nature solves problems; study of effective bio-
inspired design and biomimetic applications to draw solutions from
nature; enhance concept generation through the use of bio-inspired
design; use current state of the art methods in bioinspired design; view
nature's solutions to different problems form an engineering perspective.
Prerequisite: MEEN 368, BMEN 361, or BAEN 375.

MEEN 441 Design of Mechanical Components and Systems
Credits 3. 3 Lecture Hours.
Design of machine elements, characteristics of prime movers, loads
and power transmission elements as related to mechanical engineering
design.
Prerequisite: MEEN 368.

MEEN 442 Computer Aided Engineering
Credits 3. 3 Lecture Hours.
Effective and efficient use of modern computer hardware and software in
modeling, design, and manufacturing; simulation of a broad spectrum of
mechanical engineering problems.
Prerequisites: MEEN 363 and MEEN 368.

MEEN 444 Finite Element Analysis in Mechanical Engineering
Credits 3. 3 Lecture Hours.
Introduction to basic theory and techniques; one- and two-dimensional
formulations for solid mechanics applications; direct and general
approaches; broader aspects for field problems; element equations,
assembly and solution schemes; computer implementation,
programming and projects; error sources and application consideration.
Prerequisites: MEEN 357 and 368 or equivalents.

MEEN 445 Mechanics of Compliant Materials
Credits 3. 3 Lecture Hours.
Study of mechanics; three-dimensional analysis tools and techniques
needed to model linear behavior of fluids and solids in response to
imposed loads and deformations.
Prerequisite: Grade of C or better in MEEN 344.

MEEN 451 Viscoelastic Materials
Credits 3. 3 Lecture Hours.
Mechanical and mathematical basis for modeling linear viscoelastic
materials which focus on polymeric solid materials; characterization of
viscoelastic material properties from experimental tests; applications of
stress and deformation relationships for viscoelastic structural members
subjected to axial, torsional, and bending loads.
Prerequisites: Grade of C or better in MEEN 368.
MEEN 453 Additive and Subtractive Processes in Custom Manufacturing
Credits 3.3 Lecture Hours.
Machining theory; traditional and non-traditional machining processes; CNC machines and tools; geometric dimensioning and tolerance (GD&T); additive manufacturing systems and processes; materials in additive manufacturing.
Prerequisites: Grade of C or better in MEEN 360 and MEEN 361, or equivalent.

MEEN 454 Tribology-Mechanical Interface Design
Credits 3.3 Lecture Hours.
History and significance of tribology, rough surfaces, hertzian contact, rough surfaces in contact, friction of surfaces in contact, surface failures/wear, boundary lubrication, fluid properties, thick film lubrication, thin film lubrication, micro- and nano-tribology.
Prerequisites: Grade of C or better in MEEN 344 and MEEN 368.

MEEN 455 Engineering with Plastics
Credits 3.3 Lecture Hours.
Polymer structure, processing, property characterization at the molecular, microscopic and macroscopic dimensional levels for thermoplasts, thermoplastics, elastomers, fibers and advanced fibrous nonparticle filled composites and smart multi-performance structures.
Prerequisite: MEEN 222/MSEN 222; junior or senior classification.

MEEN 458 Processing and Characterization of Polymers
Credits 3.3 Lecture Hours.
Introduction of flow behavior in polymers; structure-property-process relationship; mixing rules for polymer blends; mechanical properties; laboratory demonstrations: injection molding, extrusion, melt mixing, and study of morphology using OM, SEM, and TEM.
Prerequisite: MEEN 222/MSEN 222.

MEEN 459 Sound and Vibration Measurements
Credits 3.3 Lecture Hours.
Basic acoustics, review of vibration theory, wave propagation in vibrating systems, sound radiation from vibrating systems, sound and vibration sensors and instrumentation, data acquisition systems, measurement techniques, spectral analysis, spatial FFT analysis, design of experiments with vibro-acoustic systems, applications.
Prerequisites: MEEN 363; MATH 308.

MEEN 460 Corrosion Engineering
Credits 3.3 Lecture Hours.
Basic corrosion phenomena are described, including mixed potential theory, types of corrosion, experimental methods, and prevention techniques.
Prerequisite: MEEN 360 and MEEN 361, or equivalent.

MEEN 461 Heat Transfer
Credits 3.3 Lecture Hours.
Heat transfer by conduction, convection and radiation: steady and transient conduction, forced and natural convection, and blackbody and gray body radiation; multi-mode heat transfer; boiling and condensation; heat exchangers.
Prerequisite: Grade of C or better in MEEN 344.

MEEN 463 Cogeneration Systems
Credits 3.3 Lecture Hours.
Design and analysis of cogeneration system; selection of the prime mover, matching power and thermal needs, institutional factors, economic evaluations, financial options and the study of actual and hypothetical systems.
Prerequisite: MEEN 421 or equivalent.

MEEN 464 Heat Transfer Laboratory
Credit 1.3 Lab Hours.
Basic measurement techniques in conduction, convection, and radiation heat transfer; experimental verification of theoretical and semi-empirical results; uncertainty analysis.
Prerequisites: Grade of C or better in MEEN 345; grade of C or better or MEEN 461 or concurrent enrollment.

MEEN 467 Mechanical Behavior of Materials
Credits 3.3 Lecture Hours.
Fundamentals of flow and fracture in metals, emphasizing safe design by anticipating response of materials to complex stress and environmental service conditions; micromechanisms of flow, fatigue, creep and fracture; fracture mechanics approach to design. Special emphasis given to microstructure-mechanical property relationship and damage tolerant design.
Prerequisite: MEEN 360 and MEEN 361.

MEEN 469 Alternative Energy Conversion
Credits 3.3 Lecture Hours.
Design and analysis of alternative energy conversion processes and systems that are based on converting energy directly (e.g., fuel cells, photovoltaics), utilizing non-combustible heat sources (e.g., geothermal, ocean gradients, solar and nuclear fission and fusion) and obtaining energy from the environment (e.g., wind, hydroelectric, ocean tides and waves).
Prerequisite: MEEN 315.

MEEN 471 Elements of Composite Materials
Credits 3.3 Lecture Hours.
Fundamentals concerned with relating structure of multiphase materials to physical properties; plastic, metallic and ceramic matrices reinforced with continuous and discontinuous fibers, whiskers and particulates.
Prerequisites: Grade of C or better in MEEN 360, MEEN 361, and MEEN 368.

MEEN 472 Gas Dynamics
Credits 3.3 Lecture Hours.
Fundamental analysis of compressible flows and its application to supersonic airfoils/projectiles, jet and rocket nozzles, normal and oblique shock waves, explosion waves, shock tubes, supersonic wind tunnels, and compressible pipe flows.
Prerequisite: MEEN 344.

MEEN 475 Materials in Design
Credits 3.3 Lecture Hours.
The heuristics of synthesis of material properties, configuration and processing in the optimization of material selection in the design process; product design and development overview, failure mode effects analysis, design margin establishment; role of the generic failure modes and codes and standards; fundamental characteristics of process methods.
Prerequisites: Grade of C or better in MEEN 360 and MEEN 361.

MEEN 477 Air Pollution Engineering
Credits 3.3 Lecture Hours.
Design of air pollution abatement equipment and systems to include cyclones, bag filters and scrubbers; air pollution regulations; permitting; dispersion modeling; National Ambient Air Quality Standards.
Prerequisite: Grade of C or better in BAEN 340, CVEN 311/EVEN 311, or MEEN 344.
Cross Listing: BAEN 477 and SENG 477.
MEEN 480 Research Methods and Experiences  
Credits 3. 3 Lecture Hours.
Application of various methodologies used in engineering research, including literature review, study design, data collection, statistical analysis, uncertainty quantification through the Kline-McClintock approach, quality assurance techniques; development of understanding of adviser-advisee relationship fundamentals, personal responsibilities and initiatives, responsive and effective communication; topics include all sub disciplines of mechanical engineering; activities include peer evaluation, relationship building, and collaboration across disciplines.
Prerequisites: Junior or senior classification and approval of instructor; Qatar campus.

MEEN 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.
Special problems relating to a specific project in some phase of mechanical engineering. A commitment of two semesters with 6 hours 485 credit is required.
Prerequisites: Approval of department head and senior classification.

MEEN 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of mechanical engineering.
Prerequisite: Approval of instructor.

MEEN 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in mechanical engineering. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

MEFB - Mid Grds Ed Field Based (MEFB)  

MEFB 351 Introduction to Middle Grades: Adolescent Development, Philosophy and Organization  
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Study of young adolescents in domains of physical, social, emotional, cognitive, interpersonal, moral growth and development; organizational structure of middle schools supporting development of young adolescents through teaming and interdisciplinary work; investigates roles and responsibilities of middle level teachers.
Prerequisite: Junior classification.

MEFB 450 Social Studies Methods in the Middle Grades  
Credits 3. 2 Lecture Hours. 6 Other Hours.
Trends and issues related to middle grades curriculum development and instruction in social studies and Humanities; integration of content, planning, teaching-learning experiences; evaluation of teaching and learning in social studies.
Prerequisites: MEFB 352; admission to teacher education; senior classification.
Corequisites: RDNG 470 and RDNG 490.

MEFB 452 Curriculum and Instruction for Middle Grades  
Credits 3. 2 Lecture Hours. 6 Other Hours.
Study of educational theory and instructional strategies appropriate to middle grades education including planning and development of interdisciplinary and multidisciplinary curricula; student centered learning and methodologies.
Prerequisites: Admission to teacher education; senior classification.

MEFB 460 Math Methods in Middle Grades  
Credits 3. 2 Lecture Hours. 6 Other Hours.
Examines theories, provides practice in teaching methods essential to successful mathematics learning; focuses on content and criteria central to teaching mathematics for understanding, skill development, and problem solving; readings, discussions, analyses; modeling and practicing mathematics teaching and learning.
Prerequisites: MASC 351 and MASC 450; admission to teacher education; senior classification.
Corequisites: MEFB 452, MEFB 470, RDNG 490.

MEFB 470 Science Methods in Middle Grades  
Credits 3. 2 Lecture Hours. 6 Other Hours.
Problems-based-learning course integrating science content, scientific inquiry skills and field-based instruction; technology-mediated teaching, learning, and assessment.
Prerequisites: MEFB 352; admission to teacher education; senior classification.
Corequisites: MEFB 460; MASC 450.

MEFB 497 Supervised Clinical Teaching  
Credits 6. 30 Other Hours.
Culmination of teaching education program; integrate and apply knowledge and skills learned from program of study while observing and participating in accredited schools with university supervision. Must be taken on a satisfactory/ unsatisfactory basis.
Prerequisites: Admission and retention in teacher education program; successful completion of all coursework.

MEPS-Molecular & Env Plant Sci (MEPS)  

MEPS 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in molecular and environmental plant sciences. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

MEPS 313 Introduction to Plant Physiology  
Credits 3. 3 Lecture Hours.
General course dealing with principal life processes of higher plants; influence of environmental factors on these processes. Agricultural and ecological significance of life processes of plants.
Prerequisites: BIOL 111; CHEM 222 or CHEM 227.

MEPS 411 Biotechnology for Crop Improvement  
Credits 3. 3 Lecture Hours.
Use of biotechnology to improve agricultural, horticultural and forest crops; techniques and methods used and case studies where biotechnology has been used to alter traits such as pathogen resistance, protein or oil consumption, ripening, fertility and wood properties.
Prerequisite: BIOL 111 or equivalent.
Cross Listing: GENE 411 and SCSC 411.

MEPS 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.
Individual problems or research not covered by other coursework. Report required.
Prerequisites: Junior or senior classification and prior approval of instructor or department head.
MEPS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of plant physiology. May be repeated for credit.

MEPS 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in molecular and environmental plant sciences. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded. Prerequisites: Junior or senior classification and approval of instructor.

METR - Meteorology (METR)

METR 302 Weather Reports and Forecasting
Credits 3. 3 Lecture Hours.
Weather and Reports Forecasting. Basic description of atmospheric characteristics and processes relevant to the understanding of weather patterns and atmospheric principles. Prerequisite: Junior or senior classification or approval of instructor; Galveston campus.

MGMT - Management (MGMT)

MGMT 105 Introduction to Business
Credits 3. 3 Lecture Hours.
(BUSI 1301) Introduction to Business. Survey of economic systems, forms of business ownership and running the small business; organizing and managing businesses; managing human resources; managing production and information; managing marketing; introducing financial issues including accounting, money, and banking, securities markets; business issues and challenges including legal and regulatory environment, business ethics, and international business. Limited to students in freshman or sophomore classification.

MGMT 209 Business, Government and Society
Credits 3. 3 Lecture Hours.
Impact of the external environment-legal, political, economic and international-on business behavior; market and non-market solutions to contemporary public policies confronting business persons examined including antitrust law, employment and discrimination law, product safety regulation, consumer protection and ethics. May not be used to satisfy degree requirements for majors in business. Prerequisites: Sophomore classification; for students other than business and agribusiness majors.

MGMT 211 Legal and Social Environment of Business
Credits 3. 3 Lecture Hours.
Role of government in business and society; analysis of social policy and legal institutions; ethical problems in management decisions; administrative law; antitrust law; employment and discrimination law; regulation of business transactions; protection of property rights; regulation of information in markets including securities and product safety; international business law. Prerequisite: Sophomore classification; also taught at Galveston campus.

MGMT 212 Business Law
Credits 3. 3 Lecture Hours.
(BUSI 2301) Business Law. Legal principles of business; legal reasoning; dispute resolution and procedure; contract law; bankruptcy law; property law; Uniform Commercial Codes sections concerning contracts, security interests, negotiable instruments and sales. Prerequisite: Sophomore classification.

MGMT 261 Introduction to Entrepreneurship
Credit 1. 1 Lecture Hour.
Exposure to the mindset of entrepreneurship through interaction with successful entrepreneurs and hands-on activities for exploring the 21st century global entrepreneurial economy. May be taken two times for credit. Prerequisite: Freshman classification in the Startup Living Learning Community.

MGMT 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of business and management. May be repeated for credit. Prerequisite: Approval of instructor.

MGMT 309 Survey of Management
Credits 3. 3 Lecture Hours.
Survey for non-business majors of the basic functions and responsibilities of managers; includes the environmental context of management, planning and decision making, organization structure and design, leading and managing people, and the controlling process; issues of globalization, ethics, quality and diversity integrated throughout the course. May not be used to satisfy degree requirements for majors in business. Prerequisites: Junior classification; for students other than business and agribusiness majors.

MGMT 363 Managing People in Organizations
Credits 3. 3 Lecture Hours.
The role and importance of human behavior in organizations; models for understanding individual, group, and team dynamics, including individual differences, motivation, and leadership; managing organizational change; ethical issues in organizations; cross-cultural issues in managing people in organizations; the organizational context as determined by human resource management and organization design. Prerequisite: MGMT 211; ACCT 230 or concurrent enrollment; ISTM 210, MARA 250, or AGEC 217, or concurrent enrollment; admission to upper division in Mays Business School.

MGMT 372 Advanced Concepts in Organizational Behavior
Credits 3. 3 Lecture Hours.
Builds on the survey of organizational behavior in MGMT 363; review of core concepts and their application in organizational settings; includes personality and individual differences, job design, group and team dynamics, leadership and decision-making, conflict and cooperation, cross-cultural aspects of behavior in organizations. Prerequisite: MGMT 363.

MGMT 373 Managing Human Resources
Credits 3. 3 Lecture Hours.
Strategic issues in managing human resources; shared responsibilities of line managers and human resource staff for developing and implementing human resource policies and procedures; human resource planning, job design, analysis and evaluation, staffing, compensation, performance appraisal; training and development; career management; labor relations; legal, ethical and international issues. Prerequisite: MGMT 363.
MGMT 376/SOCI 376 Entrepreneurial Perspectives
Credits 3. 3 Lecture Hours.
Entrepreneurship as a career choice and its impact on society and economy; definitions of entrepreneurship; discovery of entrepreneurial opportunities and start-up funding; innovation and entrepreneurship theories for analyzing and predicting success of start-up and established entrepreneurial organizations.
Prerequisite: Admission to upper division in Mays Business School.
Cross Listing: SOCI 376/MGMT 376.

MGMT 422 Management Consulting
Credits 3. 3 Lecture Hours.
The field of management consulting from the perspective of both the individual consultant and the consulting firm; fundamentals of diagnosing situations, planning and executing assignments, client management, common mistakes and ethical issues in consulting including a variety of diagnostic and problem-solving methodologies.
Prerequisite: MGMT 363.

MGMT 424 Organizational Design, Change and Development
Credits 3. 3 Lecture Hours.
Aspects of effectively planning for and introducing changes in organizational structures and procedures based on environmental demands; examination of the successful management of organizational and behavioral changes, focusing on planned and unplanned changes, and emphasizing development of change strategies and measurement of change effectiveness.
Prerequisite: MGMT 363.

MGMT 425 Human Resource Selection
Credits 3. 3 Lecture Hours.
Theory and application of methods for the recruitment and selection of managerial, non-professional and professional employees; exposure to scientific issues such as reliability and validity, legal issues such as equal opportunity and affirmative action, and selection techniques such as interviews and testing.
Prerequisite: MGMT 373.

MGMT 427 Human Resource Compensation
Credits 3. 3 Lecture Hours.
Theories and techniques of designing and managing programs of direct compensation and benefits, including the role of rewards in motivation, job evaluation, pay discrimination and comparable worth, internal and external equity comparisons and benefit plans.
Prerequisite: MGMT 373.

MGMT 430/WGST 430 Employment Discrimination Law
Credits 3. 3 Lecture Hours.
Legal issues surrounding employment discrimination, including disparate treatment and impact; intent; affirmative action; sexual harassment; pregnancy, sex, race, religious, salary, disability, age, and ethnic discrimination; policy issues and perspectives to aid human resource specialists and managers.
Prerequisites: Admission to upper division in Mays Business School and senior classification.
Cross Listing: WGST 430/MGMT 430.

MGMT 432 Managing the Nonprofit Organization
Credits 3. 3 Lecture Hours.
Broad trends shaping the nonprofit sector, a primary driver of social change and key player in society and the economy that provides an array of goods and services; complex management challenges that confront nonprofits as they balance their mission and values against the requirements of effective management with limited resources.
Prerequisite: MGMT 363.

MGMT 435 Labor Law and Policy
Credits 3. 3 Lecture Hours.
Federal and state public policy and laws regulating human resource management including National Labor Relations Act, Railway Labor Act, Fair Labor Standards Act, employment discrimination statutes, statutes regarding public sector unionization, and other relevant legal authorities; various forms of dispute settlement including litigation, mediation, fact finding and arbitration; legal ramifications of strategic human resource management decision making.
Prerequisites: Admission to upper division in Mays Business School and senior classification.

MGMT 439 Negotiations
Credits 3. 3 Lecture Hours.
Overview of the various theories and processes of negotiation relevant to the broad spectrum of negotiation problems faced by employees and managers, and in situations outside of organizations; discovery of optimal solutions to problems and means to implement solutions through classroom simulations, role playing and case studies.
Prerequisite: MGMT 363.

MGMT 440 Creativity and Innovation in Business
Credits 3. 3 Lecture Hours.
Examines factors that may foster or stifle individual, team, organizational creative performance; presents techniques that may improve creative thinking skills.
Prerequisite: MGMT 363.

MGMT 450/IBUS 450 International Environment of Business
Credits 3. 3 Lecture Hours.
Broad survey of international business issues; analyzes the environment in which international businesses operate; examines international economic issues including trade theory, investment theory, foreign exchange and capital markets, and balance of payments; introduces multinational enterprises, global competition, international organizations, treaties and international law, national trade policies and the determinants of competitiveness of firms in international markets.
Prerequisite: Admission to upper division in Mays Business School.
Cross Listing: IBUS 450/MGMT 450.

MGMT 452/IBUS 452 International Management
Credits 3. 3 Lecture Hours.
An overview of international management to include international dimensions of organizational behavior, theory, strategy and human resource management; application of theoretical ideas to real-world situations through case analyses, presentations, projects and interactive class discussion.
Prerequisite: MGMT 450/IBUS 450 or IBUS 450/MGMT 450, or concurrent enrollment.
Cross Listing: IBUS 452/MGMT 452.

MGMT 453/IBUS 453 Emerging Economies: Brazil, Russia, India, China
Credits 3. 3 Lecture Hours.
Examination of present and future dynamics of the emerging economies of Brazil, Russia, India and China and their impact on the developing and developed worlds; importance of BRIC countries and their position in the world; history and development of these countries and the current business environment in each.
Prerequisite: MGMT 363.
Cross Listing: IBUS 453/MGMT 453.
MGMT 457/IBUS 457 Global Entrepreneurship
Credits 3. 3 Lecture Hours.
Practical issues associated with taking small- and medium-size business
global; includes importing and exporting, developing global strategies,
evaluating market opportunities, regional impact on economies and
people.
Prerequisite: Admission to upper division in Mays Business School.
Cross Listing: IBUS 457/MGMT 457.

MGMT 460 Managing Projects
Credits 3. 3 Lecture Hours.
Application of management processes to complex interdisciplinary organizational environments through the study of program and project management; adoptions of traditional management theories to the project environment; master typical project management microcomputer software for project planning; resource allocation; project budgeting; and control of project cost, schedule and performance.
Prerequisite: MGMT 363.

MGMT 461 Entrepreneurship and New Ventures
Credits 3. 3 Lecture Hours.
The entrepreneurial process from conception of a business idea to the actual start up of the venture; environmental scanning for new opportunities; matching individual skills and attributes with the requirements of the venture; evaluating the viability, growth potential and markets for the venture; securing financing; beginning operations.
Prerequisites: Admission to upper division in Mays Business School and senior classification.

MGMT 464 The Political Environment of Business
Credits 3. 3 Lecture Hours.
Role of business in contemporary society; the large corporation and its external environment; ownership and control controversy; private and collective choice processes; role of regulation; social issues including pollution, discrimination, consumer protection, corporate social and ethical responsibilities, corporate political activity; international business relations.
Prerequisites: MGMT 363 and senior classification.

MGMT 465 Corporate Governance
Credits 3. 3 Lecture Hours.
Overview of the theories and practice of corporate governance; history of corporations, role and relationship of boards of directors, shareholders and management; concepts of agency cost, shareholder activism, executive compensation and international corporate governance in globalized markets; ethical issues and corporate social responsibility.
Prerequisite: MGMT 363.

MGMT 466 Strategic Management
Credits 3. 3 Lecture Hours.
Strategic issues facing organizations, including top management decision making and social responsibility; environmental and industry analysis; establishing organizational mission and objectives; corporate, business and functional level strategy formulation; global and multidomestic strategies; strategic implementation and control; integrating operations, finance, marketing and human resource strategies; case analysis.
Prerequisites: MGMT 363; FINC 341; SCMT 364; MKTG 321; senior classification.

MGMT 470 Entrepreneurial Small Business
Credits 3. 3 Lecture Hours.
Exploration of practical approaches to growing a small business, evaluating and projecting financial performance, raising capital, legal formations and issues, human resource management, business plan development, franchising and family business; networking opportunities with local business leaders, successful former student entrepreneurs and current student entrepreneurs operating at the student incubator.
Prerequisites: Admission to upper division in Mays Business School and senior classification.

MGMT 475 Leadership Development
Credits 3. 3 Lecture Hours.
Explores the evolution of leadership theory and practice with an emphasis on effective and ineffective leaders' traits, behaviors, and styles in profit and not-for-profit work organizations; reviews critical aspects of leader role behavior from theoretical and practical perspectives; examines leader effectiveness at the individual, group, and strategic level.
Prerequisite: MGMT 363.

MGMT 476/SOCI 476 Entrepreneurship Practice
Credits 3. 3 Lecture Hours.
Practical skills for creating new businesses; evaluating, planning and operational strategy, including assessing the technology; product and service markets, value creation model; financing strategies; legal, regulatory, socio-economic drivers, risks; leadership to develop management team, advisory board; go-to-market strategy; develop own entrepreneurial opportunities or those of faculty and entrepreneurs.
Cross Listing: SOCI 476/MGMT 476.

MGMT 477 Entrepreneurship: The Lean Startup Approach
Credits 3. 3 Lecture Hours.
Application of current lean startup methodologies working directly with existing student entrepreneurs and mentors in preparing for the launch of a real business at the student incubator (Startup Aggieland); act as advocates and consultants assisting with organizational structure, marketing and market validation, financial analysis and risk assessment.
Prerequisites: Junior or senior classification and approval of instructor.

MGMT 478/SOCI 450 Social Entrepreneurship
Credits 3. 3 Lecture Hours.
Applying business principles and practices to solve social, economic and environmental problems; social entrepreneurship concepts and issues in scaling social enterprise ventures including management tools, organization structures, funding sources, impact measurement; experience in opportunity recognition, designing, planning, pitching social mission ventures; build social capital with social enterprise founders.
Cross Listing: SOCI 450/MGTMT 478.

MGMT 481 Seminar in Management
Credit 1. 1 Other Hour.
Discussions and observation of current management practice in the public and private sectors of the nation; reading and discussion of current events and changes taking place in management theory and/or its application and practice in actual business and government situations. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School or admission to Maritime Administration, or approval of instructor; also taught at Galveston campus.
MGMT 484 Management Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
Internship in management: staffing; planning; organizing; leading and controlling. Enrollment is limited to those who have managerial responsibilities for the resources used by a business firm or the like.  
Prerequisites: Management major; MGMT 363; approval of instructor prior to internship.  

MGMT 485 Directed Studies  
Credits 1 to 3. 1 to 3 Other Hours.  
Directed study on selected problems in the area of management not covered in other courses.  
Prerequisites: Admission to upper division in Mays Business School; senior classification and approval of department head.  

MGMT 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of management. Consult the professor offering a particular special topics course for details. May be repeated for credit.  
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.  

MICR - Microbiology (MICR)  

MICR 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of microbiology. May be repeated for credit.  
Prerequisite: Approval of instructor.  

MICR 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Active research of basic nature under the supervision of a Department of Biology faculty member.  
Prerequisites: Freshman or sophomore classification and approval of instructor.  

MICR 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of microbiology. May be repeated once for credit.  

MICR 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Active research of basic nature under the supervision of a Department of Biology faculty member.  
Prerequisites: Junior or senior classification and approval of instructor.  

MKTG - Marketing (MKTG)  

MKTG 298 Marketing Internship Experience  
Credits 0. 0 Other Hours.  
Participation in a 300-hour internship in a field related to certificate program. May be repeated for credit. Must be taken on a satisfactory/unsatisfactory basis.  

MKTG 299 Marketing Professional Organization Involvement  
Credits 0. 0 Other Hours.  
Participation in an approved professional marketing organization. May be repeated for credit. Must be taken on a satisfactory/unsatisfactory basis.  

MKTG 321 Marketing  
Credits 3. 3 Lecture Hours.  
Exploration of the activities and managerial decisions involved in the provision of products to customers; includes strategic marketing fundamentals, buyer behavior, market segmentation, managerial issues related to the marketing mix (product, pricing, distribution, and promotion) decision variables, and social and ethical issues.  
Prerequisite: ACCT 230 and MGMT 211, or concurrent enrollment; ISTM 210, AGEC 217, or MARA 250, or concurrent enrollment; admission to upper division in Mays Business School or admission to Maritime Administration; also taught at Galveston campus.  

MKTG 322 Consumer Behavior  
Credits 3. 3 Lecture Hours.  
Application of behavioral science designed to provide in-depth knowledge of the fundamental theories and concepts of consumer behavior, with an emphasis on consumers in the marketplace as individuals, as decision makers, and as influenced by culture.  
Prerequisite: MKTG 321.  

MKTG 323 Marketing Research  
Credits 3. 3 Lecture Hours.  
Nature and uses of marketing research in business; methods of collecting, analyzing and interpreting data needed for business decisions, with specific application to problems in marketing.  
Prerequisites: MKTG 321; SCMT 303 or AP STAT 301 or AP STAT 302 or AP STAT 303.  

MKTG 325 Services Marketing and Retailing Concepts  
Credits 3. 3 Lecture Hours.  
Study of how service organizations, including retailers, require a distinctive approach to marketing strategy in development and execution; e.g. banks, schools, hospitals, hotels, professional services and transportation companies; specifically applies marketing concepts in service industry setting; opportunities to meet industry thought leaders in retailing and other service industries.  
Prerequisite: MKTG 321.  

MKTG 326 Innovations in Retailing  
Credits 3. 3 Lecture Hours.  
Retail strategies such as channels of distribution, private labels, customer service levels, visual presentation, pricing, and marketing mix that influence a retail business model.  
Prerequisite: MKTG 321.  

MKTG 335 Professional Selling  
Credits 3. 3 Lecture Hours.  
General principles of personal selling in both consumer and industrial markets plus specialty selling.  
Prerequisite: MKTG 321.  

MKTG 336 Managing Business to Business Relationships  
Credits 3. 3 Lecture Hours.  
Customer relationship management concepts and tools; sales technology; organizational buyer behavior; planning; channels; new products; performance management.  
Prerequisite: MKTG 335.  

MKTG 345 Social Media and Public Relations  
Credits 3. 3 Lecture Hours.  
Marketing and promotional strategy related to social media, the internet and interactive media; managing publicity and public relations with a wide variety of stakeholders.  
Prerequisite: MKTG 321.  

MKTG 346 Marketing Management  
Credits 3. 3 Lecture Hours.  
Biology faculty member.  
Active research of basic nature under the supervision of a Department of Biology faculty member.  
Prerequisites: Freshman or sophomore classification and approval of instructor.
MKTG 347 Advertising and Creative Marketing Communications  
Credits 3. 3 Lecture Hours.  
Advertising and integrated marketing communications; market segmentation and targeting; development of multi-media campaigns; emphasis on enhancing creativity, critical thinking, and communication skills.  
Prerequisite: MKTG 321.

MKTG 401/IBUS 401 Global Marketing  
Credits 3. 3 Lecture Hours.  
Survey of the aspects involved in marketing goods and services in a global marketplace; social, political, legal and economic issues associated with conducting business globally.  
Prerequisite: MKTG 321.  
Cross Listing: IBUS 401/MKTG 401.

MKTG 402/IBUS 402 International Marketing: Study Abroad  
Credits 3. 3 Lecture Hours.  
Introduction to the facets of doing business in an international setting; provides exposure to a variety of foreign cultures; facilitates understanding of the international marketplace in which these students will function.  
Prerequisites: MKTG 321 or MKTG 409; junior classification; 2.5 GPR overall.  
Cross Listing: IBUS 402/MKTG 402.

MKTG 403/IBUS 403 International Market Entry Strategies  
Credits 3. 3 Lecture Hours.  
A research-based course in which students prepare an analysis of a country, or region outside the U.S., and use it in the preparation of a marketing plan for a good or service to be introduced and marketed in that country.  
Prerequisites: MKTG 321 or MKTG 409; concurrent registration in IBUS 402/MKTG 402 or MKTG 402/IBUS 402; junior or senior classification.  
Cross Listing: IBUS 403/MKTG 403.

MKTG 404 Data Visualization for Marketers  
Credits 3. 3 Lecture Hours.  
Summarize, analyze and interpret complex data using graphical representation to inform and drive business decisions; data analysis and design principles to effectively explore data and communicate insights from data using visualization techniques.  
Prerequisites: MKTG 321.

MKTG 409 Principles of Marketing  
Credits 3. 3 Lecture Hours.  
Survey of the basic concepts and decisions associated with product, promotion, distribution, and pricing; focuses on developing marketing strategies that contribute to building long-term customer relationships and achieving the organization’s objectives. May not be used to satisfy degree requirements for a major in business.  
Prerequisites: Junior classification; for students other than business and agribusiness majors.

MKTG 425 Retail Merchandising  
Credits 3. 3 Lecture Hours.  
Theories, concepts and practices relating to the merchandising of products for enhancing sales and profit growth of retail businesses; emphasis on retail math, purchasing decisions, vendor negotiations, communications skills, assortment planning and competitive analysis.  
Prerequisite: MKTG 321.

MKTG 426 Advanced Retail Case Study  
Credits 3. 3 Lecture Hours.  
Problems and opportunities faced by retailing organizations; development of an effective strategy through application-oriented seminars and activities, interaction with industry guest speakers and executives; analysis of retail strategies in field settings and completion of a semester long retail audit; participation in a national case competition.  
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

MKTG 427 Retailing Strategy and Metrics  
Credits 3. 3 Lecture Hours.  
Survey of the concepts, policies, theories and practices for managing a retail firm in a competitive environment; includes functions of retailers, retail customers, supply chain, legal and ethical behavior; location analysis, pricing, promotion, customer services and layout.  
Prerequisites: MKTG 321.

MKTG 430 Marketing Consulting  
Credits 3. 3 Lecture Hours.  
Consulting tools and techniques, managing client relationships, preparing reports and presentations, problem-solving processes; semester-long client project.  
Prerequisites: MKTG 323.

MKTG 431 Marketing Analytics  
Credits 3. 3 Lecture Hours.  
Data driven marketing strategy, data handling and management techniques, use of statistical software to estimate marketing models, project based course focused on making decision making.  
Prerequisite: MKTG 321.

MKTG 432 Corporate Social Responsibility  
Credits 3. 3 Lecture Hours.  
Study of the role of corporate social responsibility, corporate governance and business ethics with an emphasis on the marketing perspective.  
Prerequisites: MKTG 321.

MKTG 435 Advanced Selling  
Credits 3. 3 Lecture Hours.  
In-depth strategic account planning, extensive role-play and team selling exercises, sales analytics, networking and prospecting, strategic goal setting and time management.  
Prerequisites: MKTG 335.

MKTG 436 Sales Leadership  
Credits 3. 3 Lecture Hours.  
Ethical planning, organizing, staffing, training, motivating and evaluating salespeople; understanding the sales environment and organization as well as career and time management.  
Prerequisite: MKTG 335.

MKTG 438 Strategic Digital Marketing  
Credits 3. 3 Lecture Hours.  
Implications of the internet and related digital technologies for marketing; evolution of the digital marketplace and impact on firms’ marketing mix decisions; competitive advantage; public policy issues; future trends and developments.  
Prerequisite: MKTG 321.
MKTG 440 Services Marketing
Credits 3. 3 Lecture Hours.
Focuses on the unique challenges of managing a service-based business; delivering quality service to customers and building strong customer relationships; applicable to for-profit and not-for-profit organizations that depend on service excellence for competitive advantage.
Prerequisite: MKTG 321.

MKTG 441 Service Quality in Healthcare
Credits 3. 3 Lecture Hours.
Preparation for a career in healthcare leadership by focusing on opportunities to improve the service experience of patients, providers and other stakeholders; improve the quality of life; enhance the efficient and effective use of healthcare resources.
Prerequisite: MKTG 321.

MKTG 442 Innovation and Product Management
Credits 3. 3 Lecture Hours.
Opportunity identification, concept generation, concept and program evaluation, development and launch of the various types of new products; specific topics include creativity, design, launch and management of new products.
Prerequisite: MKTG 321.

MKTG 443 The Business of Healthcare
Credits 3. 3 Lecture Hours.
Preparation for contributing to the healthcare system by gaining an understanding of selected business of healthcare topics such as the role of healthcare in the economy, the cost of healthcare, the patient experience, technology and ethics.
Prerequisites: MKTG 321.

MKTG 444 HealthTech for Improving Customer Care
Credits 3. 3 Lecture Hours.
Contemporary examination of the development, marketing and co-created value-in-use aspects of technology products (e.g., databases, applications, mobiles, wearables) in the health industry used to improve the delivery, payment and consumption of care.
Prerequisite: MKTG 321.

MKTG 445 Account Planning and Research
Credits 3. 3 Lecture Hours.
Concepts in account planning; gathering and analyzing data (database analysis, focus groups, interviews, surveys); compilation of research into a situation analysis and creative brief for use in a national advertising case competition.
Prerequisites: MKTG 321, approval of instructor.

MKTG 447 Advanced Advertising: Case Competition
Credits 3. 3 Lecture Hours.
Development of a fully integrated, multi-million dollar budgeted advertising campaign plan; participation in a national case competition.
Prerequisite: MKTG 321; approval of instructor.

MKTG 448 Marketing Strategy
Credits 3. 3 Lecture Hours.
Marketing decision-making and strategies in case situations; integration of product, pricing, distribution, and promotion considerations for the purposes of determining and evaluating the optimal marketing strategy.
Prerequisite: MKTG 323; graduating marketing senior.

MKTG 449 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of marketing. May be repeated once for credit.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

MLSC - Military Science (MLSC)

MLSC 121 Introduction to the United States Army I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Introduction to the United States Army and the Army Reserve Officer Training Corps (ROTC); its purpose in the Army and its advantages; Army customs, courtesies, traditions, and Army values; Army history and individual soldier skills with an emphasis on leadership; includes a leadership laboratory.

MLSC 122 Introduction to the United States Army II
Credits 2. 1 Lecture Hour. 3 Lab Hours.
The second half of an introductory two-semester survey of the United States Army; principles of leadership, Army history, management theory and individual soldier skills; emphasis on critical thinking and problem solving skills; foundation for tactical and leadership concepts; includes a leadership laboratory.

MLSC 221 Tactics and Leadership Theory I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Dimensions of creative and innovative leadership strategies through team dynamics and leadership theories that form the basis of the Army leadership framework (trait and behavior theories); infantry tactics, techniques and procedures; includes a leadership laboratory.

MLSC 222 Tactics and Leadership Theory II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
The second half of a two-semester survey on leadership theory and infantry tactics; emphasis on leading tactical teams in a complex environment; Army planning and orders process; adaptive leadership styles in the context of military operations; case studies on the importance of teamwork and tactics in real-world scenarios; includes a leadership laboratory.

MLSC 321 Adaptive Leadership and Tactical Operations I
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Theoretical and practical application of adaptive leadership as it relates to planning, executing and evaluating complex tactical operations; ability to assess risk, ethical decision-making, managing people and critical thinking skills in a tactical environment; includes a leadership laboratory.
MLSC 322 Adaptive Leadership and Tactical Operations II  
Credits 3. 3 Lecture Hours. 1 Lab Hour.  
The second half of a two-semester survey on adaptive leadership and tactical operations; ethical decision-making, planning, executing and evaluating military operations at a tactical level; preparation to attend the Leadership, Development and Assessment Course (LDAC) for the Army's commissioning process; includes a leadership laboratory.

MLSC 421 The Army Officer and the Profession of Arms I  
Credits 3. 3 Lecture Hours. 1 Lab Hour.  
Advanced study, research and practical application of Army training, operations and doctrine; the military as a profession, functioning as a member of a staff, and officer corps; law of land warfare, principles of war, and rules of engagement and their application; duties and responsibilities of a Second Lieutenant in the United States Army; includes a leadership laboratory.

MLSC 422 The Army Officer and the Profession of Arms II  
Credits 3. 3 Lecture Hours. 1 Lab Hour.  
Dynamics of leadership in a complex world; cultural awareness, terrorism, non-governmental organizations, and operational security; off-site battlefield analysis and application of military concepts; maintaining an ethical climate in an organization, military support structures, and equal opportunity; duties and responsibilities of a Second Lieutenant in the United States Army; includes a leadership laboratory.

MLSC 485 Directed Studies  
Credits 1 to 3. 1 to 3 Other Hours.  
Directed study of problems in the field of military science.  
Prerequisite: Junior or senior classification with approval of department head.

MLSC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified field of military science. May be repeated for credit.

MLSC 491 Research  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Research conducted under the direction of a faculty member in military science. May be taken three times for credit.  
Prerequisite: Junior or senior classification or approval of instructor.

MMET - Mfg & Mech Engr Tech (MMET)  

MMET 105 Engineering Graphics  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
(ENGR 1204, ENGR 1304) Engineering Graphics. Graphical approach to the engineering design process as applied to products; methods of graphical communications, three-dimensional geometry, working drawings, data analysis, computer graphics, introduction to team dynamics and creative problem solving.

MMET 181 Manufacturing and Assembly Processes I  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
A survey of metal manufacturing processes; traditional machining, non-traditional machining, welding, fabrication, casting and assembly.  
Prerequisite: Grade of C or better in MMET 105, ENGR 102, or ENGR 111, or concurrent enrollment.

MMET 201 Manufacturing and Materials  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Survey of metallic and non-metallic materials; selection and applications of materials; introduction to traditional and non-traditional manufacturing processes, assembly processes, and metrology.  
Prerequisite: Grade of C or better in ENGR 102 or ENGR 111, CHEM 107, and CHEM 117; industrial distribution major.

MMET 206 Nonmetallic Materials  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to structure, properties, processing and application of forest products, plastics, ceramics and composites; laboratory includes processing, physical and mechanical testing, applications, surface treatment and material identification.  
Prerequisite: CHEM 102 or CHEM 107 with a grade of C or better; manufacturing and mechanical engineering technology or industrial distribution major or approval of department.

MMET 207 Metallic Materials  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to structure, properties and engineering application of ferrous and nonferrous materials; beneficiation, production of ferrous and nonferrous metals, destructive and nondestructive testing, protective coatings, strengthening and heat treatment; laboratory includes metallographic procedures, mechanical testing, heat treatment, surface treatment, corrosion testing, recrystallization and failure analysis.  
Prerequisite: CHEM 102 or CHEM 107 with a grade of C or better; manufacturing and mechanical engineering technology or industrial distribution major or approval of department.

MMET 275 Mechanics for Technologists  
Credits 3. 3 Lecture Hours.  
(ENGR 2301, ENGR 2401) Mechanics for Technologists. Forces, moments and couples in 2-D and 3-D systems; equilibrium of rigid bodies; structural analysis; friction and applications; centroids and moments of inertia.  
Prerequisites: Grade of C or better in MATH 152 and PHYS 206 or PHYS 218; manufacturing and mechanical engineering technology major.

MMET 281 Manufacturing and Assembly Processes II  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Continuation of MMET 181, polymer manufacturing processes, additive manufacturing, advance manufacturing.  
Prerequisites: Grade of C or better in MMET 181 and MMET 206; manufacturing and mechanical engineering technology major or approval of department.

MMET 301 Mechanical Power Transmission  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Overview of the engineering concepts of mechanical power and the components within a system to provide transmission of that power into useful work; experimental application of the related theory as it relates to the industrial distributor; ‘real world’ knowledge learned for application in industry.  
Prerequisites: Grade of C or better in ENGL 103 or ENGL 104; grade of C or better in MATH 151, MATH 152, CHEM 107, CHEM 117, PHYS 206, and ENGR 216/PHYS 216 or PHYS 216/ENGR 216; grade of C or better in MMET 201 or concurrent enrollment; junior or senior classification in industrial distribution.
MMET 303 Fluid Mechanics and Power
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Fluid mechanics and fluid power applications for technologists; fluid properties; conservation of energy and momentum; incompressible flow in pipes; standard symbols: components and control of hydraulic systems and pneumatic systems. 
Prerequisites: Grade of C or better in MMET 275; manufacturing and mechanical engineering technology major.

MMET 307 Computer Design Graphics
Credits 3. 3 Lecture Hours.
Use of microcomputers with currently available CAD software as an aid in the design process and as a means of increasing engineering productivity; review of ANSI standards and an introduction to a variety of computer graphics applications encountered in industry; user-oriented. 
Prerequisites: Grade of C or better in MMET 105 or MMET 181.

MMET 313 Industrial Welding Processes
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and practical applications of industrial welding and cutting processes; experience in operation of various machines and processes. 
Prerequisites: Grade of C or better in MMET 181, MMET 207 and MMET 376; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 320 Quality Assurance
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Applied statistical process control and design-of-experiment techniques for quality improvement and process characterization; emphasis on organizations operating in a continuous-improvement, customer-driven environment; statistical thinking; control charts; capability analysis of product, process and measurement system; experimental process characterization, prediction models and input variable control. 
Prerequisites: Grade of C or better in STAT 211; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 361 Product Design and Solid Modeling
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design processes and methodologies including quality function deployment, materials and process selection, and design for manufacturing and assembly; fundamentals of modeling part geometry and mechanical assembly using parametric CAD software. 
Prerequisites: Grade of C or better in ENGR 216/PHYS 216 or PHYS 216/ENGR 216, MMET 181, MMET 206, MMET 207, and MMET 275; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 363 Mechanical Design Applications I
Credits 3. 3 Lecture Hours.
Principles of design of mechanical components; theories of failure; Soderberg and Goodman diagrams; fatigue and fracture design criteria; materials and their selection to engineering applications; component assembly aspects; design of fasteners and springs as examples. 
Prerequisites: Grade of C or better in ENGL 103 or ENGL 104; grade of C or better in MMET 376, MATH 151, MATH 152, CHEM 107, CHEM 117, PHYS 206, and ENGR 216/PHYS 216 or PHYS 216/ENGR 216; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 370 Thermodynamics for Technologists
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Thermal and mechanical energy transformations; relationships applied to flow and non-flow processes in power and refrigeration cycles; devices include compressors, turbines, heat exchangers, nozzles, diffusers, pumps and piston-cylinder models; computer modeling. 
Prerequisites: Grade of C or better in PHYS 206, and ENGR 216/PHYS 216 or PHYS 216/ENGR 216; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 376 Strength of Materials
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Stress and strain; elastic moduli Poisson's ratio; torsion, bending, unsymmetrical bending; design of beams and shafts; deflection of beams; buckling of columns; material and strength characterization laboratory tests. 
Prerequisites: Grade of C or better in ENGL 103 or ENGL 104; grade of C or better in MMET 207, MMET 275, MATH 151, MATH 152, CHEM 107, CHEM 117, PHYS 206, and ENGR 216/PHYS 216 or PHYS 216/ENGR 216; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 380 Computer-Aided Manufacturing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Basic concepts in computer-aided manufacturing with emphasis on a system approach to manufacturing activities; use of numerical control machine tools and other computer based software as applied to different industries. 
Prerequisites: Grade of C or better in MMET 181 and MATH 152; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 383 Manufacturing Information Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Use of information technology for manufacturing enterprise applications, including computer-integrated manufacturing, database, computer networking, web-technology and enterprise resource planning. 
Prerequisites: Grade of C or better in MMET 380; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 401 Fluid Power Transmission
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Engineering concepts of hydraulics and pneumatic power and its components within a system to provide transmission of that power into useful work; experimental application of the related theory as it relates to the industrial distributor; real world knowledge learned for application in industry. 
Prerequisites: Grade of C or better in ENGL 103 or ENGL 104; grade of C or better in MMET 201, MMET 301, PHYS 207, MATH 151, MATH 152, CHEM 107, CHEM 117, PHYS 206, ENGR 216/PHYS 216 or PHYS 216/ENGR 216, and ENGR 217/PHYS 217 or PHYS 217/ENGR 217; junior or senior classification in industrial distribution.

MMET 402 Inspection Methods and Procedures
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Methods and procedures in nondestructive inspection of materials and industrial products; ultrasonics, dye penetrants, magnetic particle, radiography and supportive evaluation methods such as weld sectioning, polishing, etching and macroscopic analysis. 
Prerequisites: Grade of C or better in MMET 281 and MMET 376; junior or senior classification in manufacturing and mechanical engineering technology.
MMET 405 Weldability of Ferrous Metals
Credits 3. 3 Lecture Hours.
Applied principles of metallurgy with reference to weldability of ferrous metals.
Prerequisites: Grade of C or better in MMET 207 and MMET 313; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 410 Manufacturing Automation and Robotics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Hardware for automated work handling, conveyors, loaders, robots, storage devices; power sources and methods of control, electric motors, controllers, program logic controllers, robot programming; interfacing of equipment controls; and manufacturing work cells.
Prerequisites: Grade of C or better in MMET 361, MMET 376, MMET 383 and ESET 300; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 412 Production and Inventory Planning
Credits 3. 2 Lecture Hours. 2 Lab Hours.
An introductory treatment of models and techniques for the planning of production and inventory systems.
Prerequisites: Grade of C or better in MMET 320, MMET 383 and ISEN 302; senior classification in manufacturing and mechanical engineering technology.

MMET 414 Micro/Nano Manufacturing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Product miniaturization and impact; review of atomic structure, electrical and physical properties of materials; ultraprecision machining; microlithography; dry and wet etching/sputtering techniques; isotropic and anisotropic processes; pattern transfer with additive processes; surface micromachining; microreplication processes; introduction to packaging technology and nanometry; manufacturing of selected microsystems (MEMS) and their applications.
Prerequisites: Grade of C or better in CHEM 107, PHYS 207, and ENGR 217/PHYS 217 or PHYS 217/ENGR 217; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 418 Medical Manufacturing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Surveys relevant regulations, biocompatibility of engineering materials, and emphasizes suitable techniques for medical device manufacturing.
Prerequisites: Grade of C or better in MMET 181; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 422 Manufacturing Technology Projects
Credits 2. 1 Lecture Hour. 3 Lab Hours.
A capstone projects course utilizing a team approach to an analysis and solutions of manufacturing problems.
Prerequisites: Grade of C or better in MMET 429; grade of C or better in MMET 410, MMET 412 and MMET 463, or concurrent enrollment; must be taken in fall or spring semester; senior classification in manufacturing and mechanical engineering technology.

MMET 429 Managing People and Projects in a Technological Society
Credits 3. 3 Lecture Hours.
Supervisory and project management duties and responsibilities in technology based organizations and the methods required to fulfill these functions.
Prerequisites: Grade of C or better in ISEN 302 and MMET 361; grade of C or better in MMET 363, or concurrent enrollment; must be taken in the fall or spring semester immediately prior to MMET 422; senior classification in manufacturing and mechanical engineering technology.

MMET 463 Mechanical Design Applications II
Credits 3. 3 Lecture Hours.
Applications of principles of analysis and design of machines and machine elements including linkages, robots, cam and follower systems, shafts, gears, clutches, belt and chain drives; introduction to the mathematical tools for the analysis and design of these machines and machine elements.
Prerequisites: Grade of C or better in MMET 361 and MMET 363; senior classification in manufacturing and mechanical engineering technology.

MODL - Modern Languages (MODL)

MODL 221/ENGL 221 World Literature
Credits 3. 3 Lecture Hours.
(ENGL 2332) World Literature. Survey of world literature from the ancient world through the sixteenth century in relation to its historical and cultural contexts; texts selected from a diverse group of authors, traditions and genres.
Cross Listing: ENGL 221/MODL 221.

MODL 222/ENGL 222 World Literature
Credits 3. 3 Lecture Hours.
(ENGL 2333) World Literature. Survey of world literature from the seventeenth century to the present in relation to its historical and cultural contexts; texts selected from a diverse group of authors, traditions and genres.
Cross Listing: ENGL 222/MODL 222.

MODL 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually. Written and oral reports. No class meetings.
Prerequisite: Approval of department head.

MODL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of modern languages. May be repeated for credit.
Prerequisite: Approval of department head.

MODL 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually. Written and oral reports. No class meetings.
Prerequisite: Approval of department head.

MODL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of modern languages. May be repeated for credit.
Prerequisite: Approval of department head.
MSEN - Materials Science & Engr (MSEN)

MSEN 201 Fundamentals of Materials Science and Engineering
Credits 3. 3 Lecture Hours.
Fundamental principles of materials science and engineering and their application toward complex engineering challenges; relationship between materials structure and structural and functional properties of engineered materials; property-performance relationships; principle classes of materials, as illustrated through key materials advances; current directions in the field.
Prerequisites: Grade of C or better in MSEN 210 or concurrent enrollment;
Grade of C or better in CHEM 107 or CHEM 119 and PHYS 206.

MSEN 205 Materials in Society
Credits 2. 2 Lecture Hours.
Introduction to the study and practice of materials science and engineering; current topics in materials research and development, focusing on the impact of advanced materials on engineering fields and society; application of scientific engineering principals to guiding materials engineering process, with examples drawn from real-life case studies.
Prerequisite: Grade of C or better in MSEN 201, or concurrent enrollment;
Grade of C or better in CHEM 107 or CHEM 119 and PHYS 206.

MSEN 210 Thermodynamics of Materials
Credits 3. 3 Lecture Hours.
Basic concepts and fundamental laws of thermodynamics; processes and thermodynamic engines; phase equilibria and phase diagrams of simple substances; chemical reactions of condensed phases; computational software for thermodynamic and phase diagram calculations.
Prerequisites: Grade of C or better in MSEN 201, AERO 413, BMEN 343, CHEN 322, CVEN 306, MSEN 222/MSEN 222, MMET 206, MSEN 222/ MEEN 222, or NUEN 265, or concurrent enrollment; grade of C or better in MATH 152 or concurrent enrollment.

MSEN 222/MEEN 222 Materials Science
Credits 3. 3 Lecture Hours.
Mechanical, optical, thermal, magnetic and electrical properties of solids; differences in properties of metals, polymers, ceramics and composite materials in terms of bonding and crystal structure.
Prerequisites: Grade of C or better in CHEM 102 and CHEM 112, or CHEM 104 and CHEM 114, or CHEM 107 and CHEM 117; grade of C or better in PHYS 206 or PHYS 218.
Cross Listing: MEEN 222/MSEN 222.

MSEN 250 Soft Matter
Credits 3. 3 Lecture Hours.
Structure, properties and function of various classes of soft matter including colloids, polymers, amphiphils, liquid crystals and biomacromolecules; basic concepts of viscoelasticity, glass transition, liquid-liquid and liquid-solid transitions and gelation; forces acting between mesoscopic objects; supramolecular self-assembly in soft condensed matter.
Prerequisites: Grade of C or better in CHEM 120; MSEN 201, or concurrent enrollment.

MSEN 260 Structure of Materials
Credits 3. 3 Lecture Hours.
Materials structure over many orders of scale; structure of non-crystalline materials; symmetry, unit cell and the atomic structure of crystalline materials; liquid crystals; structural defects in ordered solids; microstructures and hierarchical structures.
Prerequisites: Grade of C or better in MSEN 201, AERO 413, BMEN 343, CHEN 322, CVEN 306, MSEN 222/MSEN 222, MMET 206, MSEN 222/ MEEN 222, or NUEN 265, or concurrent enrollment.

MSEN 281 Materials Science and Engineering Seminar
Credit 1. 1 Other Hour.
Presentation of technical advances in the field of materials science and engineering; applications toward solving engineering challenges; presentations from visiting industry, academic speakers, and faculty; introduction to current research themes and focal points in industry.
Prerequisite: Grade of C or better in MSEN 201, or concurrent enrollment.

MSEN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected problems in the area of materials science and engineering. May be taken for credit 4 times.
Prerequisite: Approval of instructor.

MSEN 289 Special Topics In...
Credits 1 to 3. 1 to 3 Lecture Hours. 0 to 3 Lab Hours.
Selected topics in an identified area of materials science and engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

MSEN 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in materials science and engineering. May be taken for credit 4 times.
Prerequisites: Freshman or sophomore classification and approval of instructor.

MSEN 301 Unified Materials Lab I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integration of materials synthesis, structural characterization and property evaluation; theory and practice of experimental and simulation techniques; emphasis on relationship between processing parameters and resulting materials structure.
Prerequisites: Grade of C or better in MSEN 210 and MSEN 260, or concurrent enrollment.

MSEN 302 Unified Materials Lab II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integration of materials synthesis, structural characterization and property evaluation; theory and practice of experimental and simulation techniques; emphasis on relationship between materials structure and resulting materials physical properties.
Prerequisite: Grade of C or better in MSEN 301 and MSEN 320, or concurrent enrollment.

MSEN 305 Kinetics of Materials
Credits 3. 3 Lecture Hours.
Application of physical principles that drive evolution of materials as they approach thermodynamic equilibrium states; includes Gibbs free energy, driving forces, point defects, diffusion in solids, interface and grain boundary motion, nucleation, growth, transformation diagrams, precipitation, phase separation, ordering and solidification.
Prerequisite: Grade of C or better in MSEN 210.
MSEN 320 Deformation and Failure Mechanisms in Engineering Materials
Credits 3. 3 Lecture Hours.
Survey of deformation and failure mechanisms in different materials, including metals, ceramics, polymers and composites; effect of atomic structure, defects and microstructure on deformation and failure; deformation and failure mechanism maps and effects of temperature and deformation rate.
Prerequisite: Grade of C or better in MSEN 260.

MSEN 325 Properties of Functional Materials
Credits 3. 3 Lecture Hours.
Origins of functional materials properties from their electronic and molecular structure; electron theory in solids; electronic transport and dielectric behavior; optical and magnetic properties; current applications of functional materials.
Prerequisite: Grade of C or better in MSEN 260.

MSEN 330 Numerical Methods for Materials Scientists and Engineers
Credits 3. 3 Lecture Hours.
Computing platforms addressing scientific/engineering problems related to materials science and engineering; analyze data; implement mathematical models of materials behavior; numerical methods to solve materials-related problems.
Prerequisite: Grade of C or better in MATH 308, MSEN 305, and MSEN 320.

MSEN 360 Materials Characterization
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles and techniques used in characterization of different materials, including metals, ceramics, polymers, composites and semiconductor systems; microstructural, chemical/compositional and surface analysis methods; interpretation and analysis of the characterization results.
Prerequisite: Grade of C or better in MSEN 250 and MSEN 260.

MSEN 380 Communicating Materials Science and Engineering
Credit 1. 1 Lecture Hour.
Effective communication of technical topics in materials science and engineering to technical and non-technical audiences; emphasis on written reports.
Prerequisite: Grade of C or better in COMM 205 or ENGL 210; grade of C or better in MSEN 302, or concurrent enrollment.

MSEN 399 High Impact Professional Development
Credits 0. 0 Other Hours.
Student participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point.
Prerequisites: Grade of C or better in MSEN 250 and MSEN 260; junior or senior classification.

MSEN 400 Design and Analysis of Materials Experiments
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Systematic design of experimental investigations; team approach to identify topics and develop experiment designs including establishing the need, associated requirements and objective; conduct experiments; characterize materials; analyze and interpret results; documenting the procedures, analysis, results and conclusions; present written and oral reports.
Prerequisites: Grade of C or better in MSEN 302.

MSEN 401 Materials Research and Design I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Research and design process; need definition, functional analysis, performance requirements, evaluation criteria, conceptual design evaluation; introduction to systems engineering; parametric and risk analysis, failure analysis, material selection and manufacturability; cost and life cycle issues, project management; topics from sponsored research or an industry-sponsored design project.
Prerequisites: Grade of C or better in MSEN 281, MSEN 205 and MSEN 400.

MSEN 402 Materials Research and Design II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Continuation of MSEN 401; development of innovative solutions to research or industry-provided design challenges; structured framework and methodology for design activities; innovation, computational materials science, synthesis/processing and analysis/characterization of material components; project definition, management, customer interaction and effective team participation; presentations and design reviews.
Prerequisite: Grade of C or better in MSEN 401.

MSEN 410 Materials Processing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Synthesis, properties and processing of technologically important inorganic materials (metals and ceramics); includes thermodynamics and kinetics of different materials processing methods, casting, deformation processing, heat treatments, powder processing and sintering, coating and thin films processing, etc.
Prerequisite: Grade of C or better in MSEN 250, MSEN 305, and MSEN 320; junior or senior classification.

MSEN 415 Defects in Solids
Credits 3. 3 Lecture Hours.
Overview of point, line and surface defects in solids; relates defect properties to diffusion, deformation, phase transformations; focuses on atomic defects in crystals, with additional examples from liquid crystals, superconductors and ferromagnets; incorporates atomistic modeling to examine defect structure.
Prerequisite: Grade of C or better in MSEN 250, MSEN 305, and MSEN 320; junior or senior classification.

MSEN 420 Polymer Science
Credits 3. 3 Lecture Hours.
Types of polymerization; molecular characteristics of polymer chains; single chain statistics and rubber elasticity; phase transitions, glass transition, viscoelasticity and time-temperature superposition; polymer structure at the molecular, microscopic and macroscopic level; polymer thermosets, thermoplastics, elastomers, fibers, and advanced nanoparticle-filled composites.
Prerequisite: Grade of C or better in PHYS 206 and CHEM 120; junior or senior classification; or approval of instructor.

MSEN 426 Polymer Laboratories
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Laboratory to prepare those interested in polymer research with necessary experimental and analytical skills to conduct and analyze experimental work.
Prerequisite: Grade of C or better in MSEN 250, junior or senior classification; or approval of instructor.
MSEN 430 Nanomaterials Science
Credits 3. 3 Lecture Hours.
Nanotechnology and nanomaterials; types, fabrication, characterization methods and applications; current roles in technology and future impact of such systems on industry targeting.
Prerequisite: Grade of C or better in MSEN 260, junior or senior classification; or approval of instructor.

MSEN 440 Materials Electrochemistry and Corrosion
Credits 3. 3 Lecture Hours.
Survey of thermodynamic and kinetic fundamentals of electrochemistry; multiscale materials corrosion mechanisms; details of interfacial aqueous electrochemical mechanisms and the environmental effects when materials are exposed to different conditions.
Prerequisite: Grade of C or better in MSEN 201, AERO 413, BMEN 344, CHEN 322, CVEN 306, MEEN 222/MSEN 222, MMET 207, MSEN 222/MEEN 222, or NUEN 265; or approval of instructor.

MSEN 444 Corrosion and Electrochemistry Lab
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Laboratory practice and principles for corrosion and electrochemistry methods; design, carry out and analyze a series of labs illustrating the most important techniques in the field; builds to an open-ended corrosion engineering problem resulting in preparation of a technical report for a hypothetical client.
Prerequisite: Grade of C or better in MSEN 440, or approval of instructor.

MSEN 446 Corrosion Prevention and Control Methods
Credits 3. 3 Lecture Hours.
Cathodic protection and coatings; functional engineering approach to controlling and preventing aqueous corrosion; impressed current, galvanic anodes, organic, inorganic and hybrid coatings; case studies in oil and gas, energy, automotive and different industries.
Prerequisites: Grade of C or better in MSEN 201, or approval of instructor.

MSEN 458 Fundamentals of Ceramics
Credits 3. 3 Lecture Hours.
Structure-property relationships of ceramics and ceramic composites; atomic bonding in ceramics; crystalline and glassy structures; phase equilibria and ceramic reactions; mechanical, electrical, thermal, dielectric, magnetic and optical properties; ceramic processing; different properties of ceramics will be related to their underlying structure.
Prerequisite: Grade of C or better in MSEN 440, or approval of instructor.

MSEN 470 Computational Materials Science and Engineering
Credits 3. 3 Lecture Hours.
Modern methods of computational modeling and simulation of materials properties and phenomena, including synthesis, characterization and processing of materials, structures and devices; quantum, classical and statistical mechanical methods, including semi-empirical atomic and molecular-scale simulations and other modeling techniques using macroscopic input.
Prerequisites: Grade of C or better in MATH 308, MSEN 305, and MSEN 320.

MSEN 472 Atomistic Simulation of Materials
Credits 3. 3 Lecture Hours.
Modern methods of computational modeling and simulation of materials properties and phenomena at the atomistic scale; quantum, classical and statistical mechanical methods, including semi-empirical atomic and molecular-scale simulations, and other modeling techniques using macroscopic input.
Prerequisite: Grade of C or better in MSEN 470, or approval of instructor.

MSEN 484 Internship
Credits 0 to 4. 0 to 4 Other Hours.
Practical experience working in a professional materials science and engineering setting offered on an individual basis. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Junior or senior classification and approval of instructor.

MSEN 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study of selected problems in the area of materials science and engineering. May be taken four times for credit.
Prerequisite: Approval of instructor.

MSEN 489 Special Topics In...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of materials science and engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

MSEN 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a faculty member in materials science and engineering. May be taken four times for credit.
Prerequisites: Junior or Senior classification or approval of instructor.

MUSC - Music (MUSC)

MUSC 102 Fundamentals of Music
Credits 3. 3 Lecture Hours.
(MUSI 1303) Fundamentals of Music. Introduction to the basic elements of music (pitch, rhythm, scales, intervals and triads) and how these elements interrelate to form musical compositions; the application of musical understanding to particular instruments such as the guitar, keyboard, recorder and voice.

MUSC 201 Music and the Human Experience
Credits 3. 3 Lecture Hours.
The study of a circumscribed musical topic in its sociohistorical context; emphasis on the aesthetic, social and cultural issues affecting music rather than on technical analysis. May be repeated for credit.

MUSC 204 Music Theory I
Credits 3. 3 Lecture Hours.
(MUSI 1311) Music Theory I. Structural principles of diatonic harmony and voice leading, phrase and period structure, rhythmic structure and aural and written analysis and composition of small instrumental and vocal musical forms found in common practice period and recent popular musics.
Prerequisites: PERF major or minor, or approval of instructor.

MUSC 205 Music Theory II
Credits 3. 3 Lecture Hours.
(MUSI 1312) Music Theory II. Continuation of structural principles of tonal harmony and voice leading, including chromaticism and modulation; composition and analysis of larger musical forms, including binary, rounded binary, ternary, rondo, theme and variations and sonata form.
Prerequisites: MUSC 204, PERF major or minor, or approval of instructor.
MUSC 209 Global Musicianship  
Credits 3. 3 Lecture Hours.  
Aesthetics and meaning-making in global music traditions; analysis of musical structures and performance; advanced practice in rhythm, melody, listening skills, harmony, improvisation and oral analysis.  
Prerequisites: Major or minor in PERF, or approval of instructor.

MUSC 211 Collaborative Musicianship  
Credits 3. 3 Lecture Hours.  
Project-based approach to Western music traditions; critical reflection on aesthetics and performance of Western music; cross-cultural influences; notation and ear training; knowledge applied to the creative process.  
Prerequisites: Major or minor in PERF, or approval of instructor.

MUSC 214 Perspectives on World Music  
Credits 3. 3 Lecture Hours.  
A thematic overview of basic issues in ethnomusicology; provides an appreciation for the diversity of ways in which music sound and music making are organized in world cultures; includes music making and the performance event, music and identity, music and nationalism, and music and globalization.

MUSC 215 Fieldwork in World Music  
Credits 3. 3 Lecture Hours.  
Hands-on experience with readings in and critical analysis of ethnographic musical research; philosophies and practices of fieldwork on the world’s music.

MUSC 221 Guitar Heroes  
Credits 3. 3 Lecture Hours.  
Survey of social, cultural and aesthetic transformations of music history centered on important classical guitarists; exploration of their performance and compositional/musical styles; analysis of how their contributions gave rise to and revived the guitar’s popularity as a concert-level instrument in both the classical and folk idioms.

MUSC 222 Music of the Americas  
Credits 3. 3 Lecture Hours.  
Evolution of music of the Americas and the Caribbean; influence of natives, people of forced relocation and people from European communities; the syncretic process of music making.

MUSC 225 History of Jazz  
Credits 3. 3 Lecture Hours.  
Non-technical survey of jazz as America’s classical music, from the earliest recorded blues through the most recent trends; examination of how jazz has broadly expressed issues of modern life.

MUSC 226 History of Rock  
Credits 3. 3 Lecture Hours.  
Examination of the development of rock music; emphasis on how the sounds and meaning of music reflects culture, ideology and history; also taught at Galveston campus.

MUSC 227 Popular Music of India  
Credits 3. 3 Lecture Hours.  
Introduction to Indian popular musics and society; focus on musical, cultural and aesthetic features of “Bollywood” films and film songs; overview of Indian social, cultural and religious expression.

MUSC 228 History of Electronic Music  
Credits 3. 3 Lecture Hours.  
Historical survey of electronic music, including key technological advancements, people and musical works; exploration of electronic music from different genres and countries.

MUSC 235 Introduction to Composition  
Credits 3. 3 Lecture Hours.  
Significant styles and techniques in contemporary music including classical, jazz and popular trends; contemporary sonic design achieved through written exercises, reading and critical listening.

MUSC 245 Composition I  
Credit 1. 2 Other Hours.  
Instruction in composition; the writing of small-form musical compositions employing contemporary styles; techniques in writing for instrumental, vocal, electronic and mixed-media resources. May be taken two times for credit.  
Prerequisites: Grade of C or better in MUSC 235, or approval of instructor.

MUSC 255 Keyboard Instruction  
Credit 1. 2 Other Hours.  
(MUSI 1181, MUSI 1182, MUSI 2181, MUSI 2182) Keyboard instruction.  
Instruction in keyboard performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction.  
Prerequisite: Approval of instructor.

MUSC 280 Ensemble Performance—University Concert Bands  
Credit 1. 3 Lab Hours.  
Four select musical performing ensembles (Wind Symphony, Symphonic Winds, Symphonic Band, and Concert Band) composed of 65 to 100 members each and devoted to learning the extensive literature written for wind band; activities include at least two concerts per semester; occasional national and international tours each spring. Students may register in up to but no more than two different sections of this course. May be repeated for credit.

MUSC 281 Ensemble Performance—Small Ensembles  
Credit 1. 3 Lab Hours.  
Participation in small ensemble performance; the study and performance of small ensemble repertory from all historical periods and styles. May be repeated for credit.  
Prerequisite: Satisfactory audition.

MUSC 282 Ensemble Performance—Jazz Ensemble  
Credit 1. 3 Lab Hours.  
A select musical performing ensemble of 18 to 25 members devoted to performing all styles and periods of jazz music from big band to modern jazz; activities include at least 2 performances each semester. May be repeated for credit.  
Prerequisite: Satisfactory audition.

MUSC 283 Ensemble Performance—University Orchestras  
Credit 1. 3 Lab Hours.  
Two select orchestral performing ensembles (Chamber Orchestra and Philharmonic Orchestra) devoted to the rehearsal and performance of orchestral literature of various historical backgrounds; activities include full ensemble rehearsal, individual practice and public performances with the development of knowledge, understanding and appreciation for aspects of music ranging from the Renaissance to the Modern Era.  
Prerequisites: Previous orchestral experience; successful audition.
MUSC 290 Ensemble Performance—Choir  
Credit 1. 1 Other Hour.  
A select musical performing ensemble composed of 40 to 70 members devoted to learning and performing works from the vast repertory of choral music from all historical periods and styles; several performances, occasionally with orchestra, each semester on and off campus. Students may register in up to but no more than two different sections of this course. May be repeated for credit.  
Prerequisite: Satisfactory audition.

MUSC 316 Music and Technology  
Credits 3. 3 Lecture Hours. 1 Lab Hour.  
Study of music produced with the aid of electronic and computer technologies; critical listening and analysis of music literature; understanding of technical concepts; required laboratory provides creative practical experience in studio and live performance applications.  
Prerequisite: Junior or senior classification.

MUSC 317 Recording and the Producer  
Credits 3. 3 Lecture Hours.  
Tools and techniques of studio recording; the studio as compositional tool; recorded literature examining the creative and ideological impact of the producer; recording projects applying course techniques and exploring aesthetic concepts.  
Prerequisite: Junior or senior classification.

MUSC 318 Electronic Composition  
Credits 3. 3 Lecture Hours.  
Project-based study of techniques for creating electronic and mixed-media performance; critical analysis of important electronic and interactive works; interactive media programming techniques for sound and video synthesis, sampling, digital signal processing.  
Prerequisites: Junior or senior classification.

MUSC 324/ANTH 324 Music in World Cultures  
Credits 3. 3 Lecture Hours.  
Examination of music from an ethnomusicological perspective focusing on musical performance and the complex interrelationship of music to culture, society and daily life; examination of music from a variety of cultures through a series of case studies.  
Prerequisite: Senior classification.

MUSC 345 Composition II  
Credit 1. 2 Other Hours.  
Advanced instruction in composition; the writing of large-form musical compositions employing contemporary styles; techniques in writing for instrumental, vocal, electronic and mixed-media resources. May be repeated for credit.  
Prerequisite: MUSC 245 with a grade of C or better, or approval of instructor.

MUSC 355 Individual Performance—Keyboard II  
Credit 1. 2 Lab Hours.  
Advanced instruction in keyboard performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be repeated for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

MUSC 381 Ensemble Performance  
Credits 3. 3 Lecture Hours.  
Performance and research in ensemble settings covering a wide variety of genres from world cultures, including contemporary, historical, popular, folk and classical genres.  
Prerequisites: Performance Studies major or minor, junior or senior classification, or approval of instructor.

MUSC 400 Senior Seminar and Project  
Credits 3. 3 Other Hours.  
Culminating senior project on an individually-chosen research topic, presentation of a recital, or lecture-demonstration.  
Prerequisites: Senior classification; completion of all 300- and 400-level coursework with a grade of C or better required for the B.A. in Music; music major; approval of instructor, advisor, and department head.

MUST 221/ARCH 221 Foundations of Museum Studies  
Credits 3. 3 Lecture Hours.  
Introduction to museums, cultural heritage and collections care; best practices for non-profit institutions, public engagement and the collection, preservation and exhibition of material culture; emphasis on archaeological, ethnographic, and historical collections, or other collections of cultural significance.  
Cross Listing: ARCH 221/MUST 221.

MXET - Multidiscip Engr Tech (MXET)  

MXET 300 Mechatronics I – Mobile Robotic Systems  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Mechanical, electronic, software, control and communications aspects of embedded intelligence-based electromechanical systems with a focus on mobile robotic platforms.  
Prerequisites: Grade of C or better in MXET 375, PHYS 207, and ENGR 217/PHYS 217 or PHYS 217/ENGR 217; grade of C or better in ESET 359 and ESET 369 or concurrent enrollment.

MXET 375 Applied Dynamic Systems  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Study of translational mechanical system dynamics, rotational mechanical system dynamics, electrical system dynamics modeling, electro-mechanical/mechatronics system dynamics, fluid power dynamics and 2 dimensional rigid body dynamics.  
Prerequisites: Grade of C or better in MMET 275; junior or senior classification in an engineering technology major.

MXET 400 Mechatronics II – Industrial Robotic Systems  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Study and analysis of industrial robotics and automation processes necessary for robot-centric work cell design and operation.  
Prerequisites: Grade of C or better in MXET 300; grade of C or better in ESET 462 or concurrent enrollment, junior or senior classification in multidisciplinary engineering technology.
**NAUT - Nautical Science (NAUT)**

**NAUT 200 Basic Communications, Navigation and Seamanship**  
Credits 6. 6 Lecture Hours.  
Practical application of classroom studies aboard training ship during first training cruise; basic projects in communications, navigation, seamanship and rules of the road.  
Prerequisites: MART 103, MART 203, MART 204 or approval of MART department head.

**NAUT 300 Intermediate Communications, Navigation and Seamanship**  
Credits 6. 6 Lecture Hours.  
Practical application of classroom studies aboard training ship during second training cruise; intermediate projects in communications, navigation, seamanship and rules of the road; thorough study made of U.S. Public Health requirements in first aid.  
Prerequisites: MART 200 or NAUT 200, 301, 303, METR 302, or approval of MART department head; junior or senior classification or approval of instructor.

**NAUT 400 Advanced Communications, Navigation and Seamanship**  
Credits 6. 6 Lecture Hours.  
Practical application of classroom studies aboard training ship during third training cruise; advanced projects in communications, navigation, seamanship and rules of the road.  
Prerequisites: NAUT 200, 300, 302, 304 MART 321, 406; junior or senior classification or approval of instructor.

**MXET 635 Advanced Applied Dynamics for Mechatronic Systems**  
Credits 3. 3 Lecture Hours.  
Translational mechanical system dynamics, rotational mechanical system dynamics, electrical system dynamics modeling, mechatronics system dynamics, fluid power dynamics, rigid body dynamics and applied dynamics modeling using finite element method; automotive, oil and gas drilling and robotic applications.  
Prerequisites: Graduate classification or approval of instructor.

**MXET 681 Seminar**  
Credit 1. 1 Other Hour.  
Selected topics presented by the faculty, students and outside speakers.  
Prerequisites: Graduate classification or approval of instructor.

**MXET 685 Directed Studies**  
Credits 1 to 12. 1 to 12 Other Hours.  
Directed study of topics not within scope of thesis research and not covered by other formal courses. May be repeated for credit.  
Prerequisites: Graduate classification or approval of instructor.

**MXET 689 Special Topics in...**  
Credits 1 to 4. 1 to 4 Other Hours.  
Selected topics in an identified area of engineering technology. May be repeated for credit.  
Prerequisites: Graduate classification or approval of instructor.

**MXET 691 Research**  
Credits 1 to 23. 1 to 23 Other Hours.  
Research for thesis or dissertation. May be repeated for credit.  
Prerequisites: Graduate classification or approval of instructor.

**MXET 692 Professional Study**  
Credits 1 to 23. 1 to 23 Other Hours.  
Approved professional study of project.  
Prerequisites: Approval of Instructor.

**NFSC - Nutrition and Food Science (NFSC)**

**NFSC 201 Food Science**  
Credits 3. 3 Lecture Hours.  
(AGRI 1329) Food Science. The fundamental biological, chemical and physical scientific principles associated with the study of foods; topics include food composition and nutrition, food additives and regulations, food safety and toxicology, food processing, food engineering, food biotechnology, product development and sensory evaluation.

**NFSC 202 Fundamentals of Human Nutrition**  
Credits 3. 3 Lecture Hours.  
(BIOL 1322, HECO 1322) Fundamentals of Human Nutrition. Principles of nutrition with application to the physiologic needs of individuals; food sources and selection of an adequate diet; formulation of Recommended Dietary Allowances; nutritional surveillance; for non-nutrition majors only.

**NFSC 203 Scientific Principles of Human Nutrition**  
Credits 3. 3 Lecture Hours.  
Chemistry and physiology of proteins, carbohydrates, lipids, vitamins and minerals; their ingestion, digestion, absorption, transport and metabolism.  
Prerequisite: CHEM 119; majors only.

**NFSC 204 Perspectives in Nutrition and Food Science**  
Credit 1. 1 Lecture Hour.  
Current trends in the fields of nutrition and food science; critical review relevant literature in these fields ranging from popular press to peer-reviewed research; study of original research and market trends in understanding food, food processing, nutrients, health and diseases.  
Prerequisites: NUTR and FSTC majors.

**NFSC 210 Horizons in Nutrition and Food Science**  
Credits 2. 2 Lecture Hours.  
Introduction to nutrition and food science career opportunities through presentations by nutrition and food science researchers and industry professionals; addresses issues of professionalism including portfolio development, teamwork, and critical thinking skills.

**NFSC 211 Scientific Principles of Foods**  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Basic principles underlying selection, preparation and preservation of food in relation to quality standards, acceptability and aesthetics. Introduction to composition, nutritive value, chemical and physical properties of foods; introduction to experimental study of foods.  
Prerequisites: CHEM 101, CHEM 111; NFSC 202 or NFSC 203; sophomore classification or above.

**NFSC 222 Nutrition for Health and Health Care**  
Credits 3. 3 Lecture Hours.  
Analysis of nutrition with emphasis on providing a basic understanding of nutrition and its role in disease prevention and treatment.

**NFSC 285 Directed Studies**  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed study of selected problems in the area of nutrition and food science.  
Prerequisites: Approval of instructor; 2.0 GPR in major and overall.

**NFSC 289 Special Topics in...**  
Credits 1 to 4. 1 to 4 Other Hours.  
Selected topics in an identified area of nutrition and food science. May be repeated for credit.  
Prerequisite: Approval of instructor.
NFSC 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in nutrition and food science. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of department head.

NFSC 300 Religious and Ethnic Foods
Credits 3. 3 Lecture Hours.
Understanding religious and ethnic foods with application to product development, production, and nutritional practices; emphasis on different food rules and priorities with attention given to different religious and ethnic groups within the US and around the world.
Prerequisites: Junior or senior classification or approval of instructor; basic knowledge of food science and nutrition helpful.

NFSC 301 Nutrition Through Life
Credits 3. 3 Lecture Hours.
Analysis of nutrition with emphasis on human biological needs through stages of the life cycle; biochemical, physiological and anthropometric aspects of nutrition.
Prerequisites: NFSC 203; junior classification or approval of department head.

NFSC 303/ANSC 303 Principles of Animal Nutrition
Credits 3. 3 Lecture Hours.
Scientific approach to nutritional roles of water, carbohydrates, proteins, lipids, minerals, vitamins, and other dietary components; emphasis on the comparative aspects of gastrointestinal tracts and on digestion, absorption, and metabolism of nutrients.
Prerequisites: CHEM 119 and a grade of C or better in ANSC 113, or CHEM 222 or CHEM 227; junior classification or approval of instructor.
Cross Listing: ANSC 303/NFSC 303.

NFSC 304 Food Service Systems Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Principles of food service management used in selecting, storing, preparing and serving food in quantity; emphasis on menu planning, quality control, purchasing, equipment and layout/design; application of basic food service systems management principles, including financial planning and personnel issues.
Prerequisites: NFSC 203 and NFSC 211, junior or senior classification.

NFSC 305 Fundamental Baking
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of baking; chemical and physical properties of ingredients, methods of baking all products, fundamental reactions of dough, fermentation and oven baking.
Prerequisite: CHEM 222 or CHEM 227 or approval of department head.

NFSC 307/ANSC 307 Meats
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integrated studies of the meat animal processing sequence regarding the production of meat-type animals and the science and technology of their conversion to human food.
Prerequisites: Grade of C or better in ANSC 111 and ANSC 113; junior classification or approval of instructor.

NFSC 311 Principles of Food Processing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles and practices of canning, freezing, dehydration, pickling and specialty food manufacture; fundamental concepts of various techniques of preparation, processing, packaging and use of additives; processing plants visited.
Prerequisite: NFSC 201; junior or senior classification or approval of department head or instructor.

NFSC 312 Food Chemistry
Credits 3. 3 Lecture Hours.
The fundamental and relevant chemistry and functionality of the major food constituents (water, carbohydrates, lipids, proteins, phytochemical nutraceuticals) and study of food emulsion systems, acids, enzymes, gels, colors, flavors and toxins.
Prerequisite: NFSC 201; CHEM 227; CHEM 237 or approval of department head or instructor.

NFSC 313 Food Chemistry Laboratory
Credit 1. 3 Lab Hours.
Laboratory exercises investigating specific molecules, such as food acids, enzymes, pigments and flavors, and chemical interactions in foods, such as oxidation reactions, emulsion systems, and functional properties from a fundamental chemistry rather than an analytical perspective.
Prerequisite: NFSC 201; CHEM 227; CHEM 237 or approval of department head or instructor.

NFSC 314 Food Analysis
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Selected standard methods for assay of food components; principles and methodology of both classical and instrumental techniques for food analysis.
Prerequisite: NFSC 201; NFSC 311; CHEM 227; CHEM 237 or approval of department head or instructor.

NFSC 315/AGSM 315 Food Process Engineering Technology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elementary mechanics, physical and thermal properties of food and processing materials, heat transfer, mass and energy balances, psychrometrics (properties of air), insulation.
Prerequisites: Grade of C or better in PHYS 201 or PHYS 218, or approval of instructor.
Cross Listing: AGSM 315/NFSC 315.

NFSC 320 Understanding Obesity: A Social and Scientific Challenge
Credits 3. 3 Lecture Hours.
Perspectives of obesity in food science, nutrition, health and psychology; study of obesity factors in relation to genetics, exercise physiology and sociology with emphasis on food and nutrition.
Prerequisites: Junior or senior classification or approval of instructor.

NFSC 324 Food Safety and Preventive Controls for Human Food
Credits 3. 3 Lecture Hours.
Microbiological food spoilage, fermentation and safety; U.S. Food and Drug Administration (FDA) recognized curriculum for "preventive controls qualified individual" within the FDA Hazard Analysis and Risk Based Preventive Controls for Human Food regulation.
Prerequisites: Junior or senior classification or approval of instructor.

NFSC 326/ANSC 326 Food Bacteriology
Credits 3. 3 Lecture Hours.
Microbiology of human foods and accessory substances; raw and processed foods; physical, chemical and biological phases of spoilage; standard industry techniques of inspection and control.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ANSC 326/NFSC 326.
NFSC 327/ANSC 327 Food Bacteriology Lab  
Credit 1. 3 Lab Hours.  
Laboratory to accompany ANSC 326/NFSC 326 or NFSC 326/ANSC 326.  
Cross Listing: ANSC 327/NFSC 327.

NFSC 330 Dairy and Food Technology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Principles and practices involved in processing of milk into market milk, butter, cheese and cheese foods; fundamental principles of these processes as related to their design and control.

NFSC 331 Dairy and Food Technology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Manufacture of frozen, freeze-dehydrated, concentrated and dehydrated dairy foods; fundamental aspects of freezing, concentration and dehydration of foods.  
Prerequisite: NFSC 330 or approval of department head.

NFSC 365 Nutritional Physiology of Vitamins and Minerals  
Credits 3. 3 Lecture Hours.  
Fundamental nutritional significance of fat soluble and water soluble vitamins and minerals to human metabolism, cell biology and physiology; micro-nutrient groups as per metabolic function or biochemical and physiological actions; important dietary sources, absorption, storage, metabolism, (bio)chemistry, deficiency and toxicity of individual nutrients in this context and basis of DRI.

Prerequisites: NFSC 203 and NFSC 301; junior or senior classification.

NFSC 401 Food Product Development  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Design and develop food products using principles of food chemistry, food processing, nutrition, sensory analysis and statistics; team collaborate to improve food product characteristics to meet the needs of a changing society.

Prerequisites: NFSC 201, NFSC 311, NFSC 312, NFSC 313, NFSC 314, NFSC 315/AGSM 315, NFSC 326/ANSC 326, or concurrent enrollment; senior classification or approval of instructor.

NFSC 404 Nutrition Assessment and Planning  
Credits 3. 3 Lecture Hours.  
Examines the methods of determining the nutritional status of individuals, dietary assessment techniques, planning nutritional care including diet modification and nutrition counseling.

Prerequisites: NFSC 203, NFSC 211 and NFSC 301; junior classification or approval of department head.

NFSC 405/POSC 405 Egg and Poultry Meat Processing  
Credits 3. 3 Lecture Hours.  
Principles of egg and poultry meat processing, understanding egg and poultry meat markets, egg and meat grading, product safety, packaging and consumer acceptance of shell eggs and poultry meat, specifically turkey and broilers.

Prerequisites: Junior or senior classification or approval of instructor.  
Cross Listing: POSC 405/NFSC 405.

NFSC 406/POSC 406 Poultry Further Processing  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Science and practice of value-added products; physical, chemical, microbiological and functional characteristics of value-added poultry products as they affect consumer acceptance, efficiency of production and regulatory approval.

Prerequisites: CHEM 222; DASC 326 or NFSC 326/ANSC 326; POSC 309; POSC 405/NFSC 405; junior or senior classification or approval of instructor.

Cross Listing: POSC 406/NFSC 406.

NFSC 407 Nutrition Care and Therapy  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Application of the Nutrition Care Process for clinical diagnoses and conditions; planning of nutritional care plans for complex patients, including the formulation and planning for enteral and parenteral nutrition support.

Prerequisites: NFSC 203, NFSC 211, NFSC 301 and NFSC 404; junior classification; dietetics track; or approval of instructor.

NFSC 410 Nutritional Pharmacometrics of Food Compounds  
Credits 3. 3 Lecture Hours.  
Nutritional pharmacokinetics and pharmacodynamics of food compounds; specific examples of toxicological and pharmacological effects of food compounds.

Prerequisites: NFSC 201, NFSC 202, NFSC 203, CHEM 222, or CHEM 227, or approval of instructor; junior or senior classification.

NFSC 412 Nutritional Treatment of Disease  
Credits 3. 3 Lecture Hours.  
Nutritional intervention in pathological conditions, based on biochemical, physiological and psychological effects of disease state; current research in clinical nutrition.

Prerequisites: NFSC 203; NFSC 301, BIOL 319 and BICH 410, or concurrent enrollment; senior classification or approval of instructor.

NFSC 417/AGSM 417 Food Process Engineering Technology II  
Credits 3. 3 Lecture Hours.  
Applications of basic engineering concepts to understand common unit operations in the food (and related) industry.

Prerequisites: AGSM 315/NFSC 315 or NFSC 315/AGSM 315; approval of instructor.  
Cross Listing: AGSM 417/NFSC 417.

NFSC 420 Supervised Research in Mediterranean Nutrition and Food Processing in Italy  
Credits 3. 3 Other Hours.  
Exploration of principles of Mediterranean diet, European nutrition regulatory aspects, wine-making and food processing in Italy.

Prerequisites: NFSC 201, NFSC 202, or NFSC 203; must be 18 years of age; class and tours taught in English; priority given to majors in FSTC or NUTR.

NFSC 422 Food Processing for Sustainable Nutrition in Brazil  
Credits 3. 3 Other Hours.  
Sustainable nutrition and food processing in Brazil; hands-on learning at the Federal University of Vicosa, the Amazon Biotechnology Center, food processing plants and other research centers in the Amazon, central Brazil and Rio De Janeiro.

Prerequisites: NFSC 201, NFSC 202, or NFSC 203; must be 18 years of age; class and tours taught in English; priority given to majors in FSTC or NUTR.

NFSC 430 Community Nutrition  
Credits 3. 3 Lecture Hours.  
Principles of assessing nutrition problems in populations and planning nutrition programs to promote health in communities including nutrition education and food and nutrition policy; introduction to food and nutrition assistance programs.

Prerequisites: NFSC 203 and NFSC 301; junior or senior classification.
NFSC 440 Therapeutic Microbiology: Probiotics and Related Strategies
Credits 3. 3 Lecture Hours.
Topics relevant to alimentary (gastrointestinal) microbiology including (i) the 'normal' intestinal microbiota; (ii) probiotic and prebiotic nutritional supplements; (iii) recombinant pharmabiotics; (iv) gut-associated lymphoid tissue and mucosal immunity; (v) foodborne gastrointestinal pathogens; and (vi) fermented products as functional foods.
Prerequisites: Undergraduate survey course in microbiology or approval of instructor; junior or senior classification.

NFSC 444 Fundamentals of Food Law
Credits 3. 3 Lecture Hours.
History, development of, and fundamental principles behind current food regulations, including food labeling, adulteration, food safety, food additives, dietary supplements, and import and export laws; overview of government agency jurisdiction, international law and ethics.
Prerequisite: NFSC 201; junior or senior classification.

NFSC 446 Commercial Fruit and Vegetable Processing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Pilot plant and laboratory operations pertaining to processed fruits, vegetables and beverages; new product development emphasized via individual laboratory projects.
Prerequisite: NFSC 311.

NFSC 450 Nutrition and Metabolism of Minerals
Credits 3. 3 Lecture Hours.
The role of minerals in living systems and the exploration of their multitude of functions; chemical properties of minerals and how that relates to function in cells and tissues; consequences of mineral deficiencies based on known functions; insight into experimental approaches used to assess minerals in a living environment.
Prerequisite: NFSC 203, BICH 303, or BICH 410, or approval of instructor.

NFSC 457/ANSC 457 Hazard Analysis and Critical Control Point System
Credits 3. 3 Lecture Hours.
Hazard Analysis and Critical Control Point (HACCP) principles specifically related to meat and poultry; microbiological and process overviews; good manufacturing practices and standard operating procedures development.
Prerequisite: NFSC 326/ANSC 326 or approval of instructor.
Cross Listing: ANSC 457/NFSC 457.

NFSC 469 Experimental Nutrition Laboratory
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Investigation of tools and molecular techniques used in studies of nutrition and metabolism (e.g. obesity, diabetes, cardiovascular disease, etc.); didactic and hands-on laboratory components; includes model systems, measurements of energy balance, body composition, RNA and protein analyses.
Prerequisites: Junior or senior classification or approval of instructor.

NFSC 470/ANSC 470 Quality Assurance for the Food Industry
Credits 3. 3 Lecture Hours.
Principles of food system process control including statistical process control (SPC) and the tools required to assure uniform communication and understanding of quality assurance systems.
Prerequisite: Junior or senior classification.
Cross Listing: ANSC 470/NFSC 470.

NFSC 471 Critical Evaluation of Nutrition and Food Science Literature: Evidence Based Reviews
Credits 3. 3 Lecture Hours.
Evaluation of scientific literature, research methods within the literature, and the quality of scientific studies to produce an evidence-based review in areas specific to nutrition and food science.
Prerequisites: NFSC 202 or NFSC 203; STAT 302; junior or senior classification; knowledge of technical writing helpful.

NFSC 475 Nutrition and Physiological Chemistry
Credits 3. 3 Lecture Hours.
Fundamentals of physiology, biochemistry and nutrition and their relationship to the organismic and cellular metabolism of animals; biochemical basis of hormonal action.
Prerequisites: NFSC 203, NFSC 301, NFSC 365, and BICH 410; senior classification or approval of department head.

NFSC 481 Seminar
Credit 1. 1 Lecture Hour.
Guidelines and practice in journal article review and making effective technical presentations; strategies for conducting a job search; development of résumés and letters and interviewing targeted for careers in nutrition and food science or graduate school.
Prerequisite: Senior classification in nutrition and food science.

NFSC 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study on selected problems in the area of nutrition and food science not covered in other courses.
Prerequisites: Junior or senior classification; approval of department head; 2.0 GPR in major and overall.

NFSC 487/ANSC 487 Sensory Evaluation of Foods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of sensory science principles and practices to food systems including an understanding of discriminative, descriptive and consumer sensory techniques.
Prerequisites: CHEM 222 or CHEM 228; junior or senior classification.
Cross Listing: ANSC 487/NFSC 487.

NFSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of nutrition and food science. May be repeated for credit.
Prerequisite: Junior or senior classification.

NFSC 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a faculty member in nutrition and food science. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.

NRSC - Neuroscience (NRSC)

NRSC 101/VIBS 101 Neuroscience Overview
Credit 1. 1 Lecture Hour.
An introductory survey of neuroscience for freshmen undergraduate students on the basic neuroscience core ideas and neurological disorders.
Cross Listing: VIBS 101/NRSC 101.
NRSC 201/VIBS 201 History of Neuroscience
Credit 1. 1 Lecture Hour.
Wide spectrum of neuroscience discovery beginning at the turn of the 20th Century; emphasis on key discoveries and their rationale, experimental design, experimental methods, major findings and interpretation of results.
Prerequisites: Sophomore classification.
Cross Listing: VIBS 201/NRSC 201.

NRSC 235/PSYC 235 Introduction to Behavioral and Cognitive Neuroscience
Credits 3. 3 Lecture Hours.
Physiological bases of sensation, motor functions, emotion, motivation and complex psychological processes.
Prerequisites: PSYC 107 or BIOL 111.
Cross Listing: PSYC 235/NRSC 235.

NRSC 277/VIBS 277 Introduction to Neuroscience
Credits 3. 3 Lecture Hours.
Neuroscience from the molecular to system levels; fundamental principles and knowledge of neuroscience; current research information on neuroscience.
Prerequisites: Freshman or sophomore classification and approval of instructor.
Cross Listing: VIBS 277/NRSC 277.

NRSC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of neuroscience. May be repeated for credit.
Prerequisite: Approval of instructor.

NRSC 311/PSYC 311 Psychology of Animal Behavior
Credits 3. 3 Lecture Hours.
Problems, principles, and methods of animal psychology; animal learning, motivation, discriminative processes and abnormal, social and instinctual behaviors.
Prerequisites: PSYC 107, BIOL 111, or BIOL 113.
Cross Listing: PSYC 311/NRSC 311.

NRSC 320/PSYC 320 Sensation-Perception
Credits 3. 3 Lecture Hours.
Review of sensory physiology, sensory and perceptual phenomena and the major perceptual theories; current research in the field.
Prerequisites: PSYC 107, junior or senior classification, PSYC 301 and PSYC 302 recommended.
Cross Listing: PSYC 320/NRSC 320.

NRSC 332/PSYC 332 Neuroscience of Learning and Memory
Credits 3. 3 Lecture Hours.
Brain mechanisms of learning and memory from molecular to behavioral levels; synaptic plasticity, model systems, multiple memory systems, diseases of learning and memory.
Cross Listing: PSYC 332/NRSC 332.

NRSC 333/PSYC 333 Biology of Psychological Disorders
Credits 3. 3 Lecture Hours.
Neurobiology and clinical explanation of molecular mechanisms underlying psychiatric disorders and their drug treatments; depression and bipolar, anxiety disorders, mood disorders, psychosis and schizophrenia.
Cross Listing: PSYC 333/NRSC 333.

NRSC 336/PSYC 336 Drugs and Behavior
Credits 3. 3 Lecture Hours.
Physiological, pharmacological and behavioral effects of psychoactive drugs, including short-term and long-term effects of psychoactive drugs, properties of addictive drugs, etiology of addiction, and treatments of drug addiction and withdrawal.
Cross Listing: PSYC 336/NRSC 336.

NRSC 340/PSYC 340 Psychology of Learning
Credits 3. 3 Lecture Hours.
Survey of significant concepts, experimental methods and principles of learning.
Prerequisites: PSYC 107, BIOL 111, or BIOL 113.

NRSC 350/PSYC 350 Cognitive Neuroscience
Credits 3. 3 Lecture Hours.
Research in cognitive neuroscience; methodological advances that enable the study of the human brain safely in the laboratory; complex aspects of the mind like emotion, social behavior and consciousness.
Prerequisite: PSYC 107, PSYC 301, PSYC 302, and NRCS 277 recommended.
Cross Listing: PSYC 350/NRSC 350.

NRSC 360/PSYC 360 Health Psychology and Behavioral Medicine
Credits 3. 3 Lecture Hours.
Health psychology emphasizing behavioral and lifestyle factors in health and illness, prevention and modification of health-compromising behaviors, health care utilization, and psychological management of chronic disorders and psychological management of chronic disorders and terminal illnesses.
Prerequisite: PSYC 107.
Cross Listing: PSYC 360/NRSC 360.

NRSC 401/VIBS 401 Developmental Neurotoxicology
Credits 2. 2 Lecture Hours.
Effects of exposure to toxic substances on the developing nervous system; content to include mechanisms of toxicity of substances potentially devastating to the developing nervous system including lead, mercury and other heavy metals, alcohol, nicotine (smoking), pesticides, flame retardants and others.
Prerequisite: Junior or senior classification.
Cross Listing: VIBS 401.

NRSC 407/VIBS 407 Core Ideas in Neuroscience
Credits 2. 2 Lecture Hours.
General overview of selected core ideas across the full spectrum of neuroscience.
Prerequisite: Junior or senior classification; background in science courses recommended.
Cross Listing: VIBS 407/NRSC 407.
NRSC 434/Biol 434 Regulatory and Behavioral Neuroscience
Credits 3. 3 Lecture Hours.
Cell biology and biophysics of neurons; functional organization of the vertebrate nervous system; physiological basis of behavior.
Prerequisites: BIOL 213; BIOL 319, BIOL 320, BIOL 388, BIOL 413, NRSC 235/PSYC 235, or PSYC 235/NRSC 235, or approval of instructor.
Cross Listing: BIOL 434/NRSC 434.

NRSC 440/PSYC 440 Hormones and Behavior
Credits 3. 3 Lecture Hours.
Principles of hormones and the endocrine system; relationships among hormones, the nervous system and a variety of behaviors in vertebrates including humans.
Prerequisites: PSYC 235/NRSC 235, NRSC 235/PSYC 235, PSYC 340/NRSC 340, NRSC 340/PSYC 340, VIBS 277/NRSC 277, or NRSC 277/VIBS 277, or approval of instructor.
Cross Listing: PSYC 440/NRSC 440.

NRSC 450/VIBS 450 Mammalian Functional Neuroanatomy
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Functional morphology of the domestic animal and human brain using gross specimens, microscopic sections, interactive computer-, DVD-, and video-assisted instructional programs supplemented with clinical case studies.
Prerequisites: Junior or senior classification; BIMS, biology, biochemistry, or psychology majors, or neuroscience minors with overall 3.5 TAMU GPA; or approval of instructor.
Cross Listing: VIBS 450/NRSC 450.

NRSC 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Directed readings or research problems in selected areas designed to supplement existing course offerings conducted under the direction of a member of the Faculty of Neuroscience. May be repeated for credit.
Prerequisite: Approval of member of the faculty of neuroscience.

NRSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of neuroscience. May be repeated for credit.
Prerequisite: Approval of instructor.

NRSC 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a member of the Faculty of Neuroscience. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of member of the faculty of neuroscience.

NUEN - Nuclear Engineering (NUEN)

NUEN 101 Principles of Nuclear Engineering
Credit 1. 1 Lecture Hour.
Introduction to nuclear engineering including global and national energy requirements, radioactivity, radiation protection, and fission and fusion reactor concepts.

NUEN 102 Nuclear Engineering Practice
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point.
Prerequisite: NUEN 101.

NUEN 201 Introduction to Nuclear Engineering I
Credits 3. 3 Lecture Hours.
Atomic and nuclear physics discoveries that have led to the development of nuclear engineering, atomic models, relativity, x-rays, types of nuclear reactors; problem solving techniques.
Prerequisites: MATH 251 or registration therein; PHYS 208.

NUEN 265 Materials Science for Nuclear Energy Applications
Credits 3. 3 Lecture Hours.
Materials science fundamentals with an emphasis on nuclear applications; topics will include bonding, crystal structures crystalline defects, mechanical properties and radiation effects in metal, ceramic and polymer materials.
Prerequisites: CHEM 102, or CHEM 104 and CHEM 114, or CHEM 107; PHYS 218.

NUEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of nuclear engineering. May be repeated for credit.
Prerequisite: Approval of department head.

NUEN 301 Nuclear Reactor Theory
Credits 3. 3 Lecture Hours.
An introduction to neutron diffusion theory, neutron moderation, conditions for criticality of nuclear reactors.
Prerequisites: NUEN 302.

NUEN 302 Introduction to Nuclear Engineering II
Credits 3. 3 Lecture Hours.
Basic radioactivity, nuclear and neutron physics as applied to nuclear engineering.
Prerequisites: NUEN 201; MATH 308 or registration therein.

NUEN 303 Nuclear Detection and Isotope Technology Laboratory
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Interaction of radiation with matter; behavior of various nuclear radiation detectors studied both theoretically and experimentally in laboratory; properties of radionuclides useful to industry considered and evaluated from engineering point of view; writing intensive course.
Prerequisites: NUEN 309/SENG 309; ECEN 215.

NUEN 304 Nuclear Reactor Analysis
Credits 3. 3 Lecture Hours.
The group diffusion method, multi-region reactors, heterogeneous reactors, reactor kinetics, changes in reactivity.
Prerequisite: NUEN 301; MATH 309.

NUEN 309/SENG 309 Radiological Safety
Credits 3. 3 Lecture Hours.
Interactions of nuclear radiations with matter and biological systems; theory and practice of radiation dosimetry as applied to radiation protection; design and application of radiation dosimetry systems for personnel monitoring, area radiation monitoring and accident situation; includes external and internal dosimetry as well as long-term risk analysis.
Prerequisite: NUEN 302.
Cross Listing: SENG 309/NUEN 309.
NUEN 315 Thermodynamics in Nuclear Systems
Credits 3. 3 Lecture Hours.
Introduction of thermodynamic theory and application; thermodynamic properties and conservation of mass and energy; first and second laws of thermodynamics; energy transfer by heat, work and mass; analysis of open and closed systems; key thermodynamic components in nuclear systems including BWR, PWR and other types of reactors; application of thermodynamic cycles to nuclear power systems; and heat and mass balances throughout nuclear systems.
Prerequisites: MEEN 221; MATH 251 or MATH 253.

NUEN 329 Analytical and Numerical Methods
Credits 3. 3 Lecture Hours.
Introduction to use of numerical analysis and advanced analytical techniques for obtaining nuclear reactor flux distributions, temperatures and transients; use of digital computer in obtaining nuclear reactor design information.
Prerequisites: MATH 309 and NUEN 301.

NUEN 405 Nuclear Engineering Experiments
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Experimental measurements of basic nuclear reactor parameters; reactor operation and reactor safety.
Prerequisites: NUEN 303; NUEN 304 or senior classification.

NUEN 406 Nuclear Engineering Systems and Design
Credits 3. 3 Lecture Hours.
Nuclear plant systems; conventional and advanced generation power reactors, nuclear simulators, transient analysis using available software for reactor simulators; nuclear engineering design methodology; problem formulation, criteria, trade-off decisions and design optimization; case studies.
Prerequisite: NUEN 304; MEEN 461 or approval of instructor.

NUEN 410 The Design of Nuclear Reactors
Credits 4. 4 Lecture Hours.
Application of reactor theory and other engineering disciplines in fundamental and practical design of nuclear reactor systems for power applications; use of computer in design operations.
Prerequisites: NUEN 304 and NUEN 406; MEEN 461.

NUEN 417/MEEN 417 Basics of Plasma Engineering and Applications
Credits 3. 3 Lecture Hours.
Basic plasma properties and confinement techniques; single particle orbits in electric and magnetic fields, moments of Boltzmann equation and introduction to fluid theory; wave phenomena in plasmas and introduction to plasma kinetic theory; analysis of laboratory plasmas and plasma applications including fusion, electric propulsion, materials processing and plasma enhanced chemistry.
Prerequisites: Grade of C or better in PHYS 208 or equivalent; senior classification in nuclear, mechanical or aerospace engineering, or physics.
Cross Listing: MEEN 417/NUEN 417.

NUEN 418 Fuel Assembly and 3-D Reactor Core Design and Modeling
Credits 3. 3 Lecture Hours.
Application of state-of-the-art engineering-grade codes in the neutronic design, analysis and modeling of nuclear fuel assembly and core.
Prerequisites: NUEN 304 and junior or senior classification.

NUEN 430 Computer Applications in Nuclear Engineering
Credits 3. 3 Lecture Hours.
Applications of digital computers to solve nuclear engineering problems; nuclear data and cross-section libraries; deterministic methods for linear and non-linear nuclear systems, and Monte Carlo methods for linear nuclear systems.
Prerequisites: NUEN 304, NUEN 329.

NUEN 431 Technical Communications Issues in the Nuclear Industries
Credit 1. 1 Lecture Hour.
Introduction to a variety of topics that present communication challenges; opportunities to learn from a variety of visiting experts concerning the nuances and challenges of, as well as successful methods for, communicating with concerned audiences about technically challenging topics.
Prerequisite: Junior or senior classification or approval of instructor.

NUEN 432 Nuclear Power Plant Fundamentals
Credits 3. 3 Lecture Hours.
Understanding the operation of a nuclear electric general station; includes reactor water chemistry, material science, electrical science; mechanical science, civil engineering for nuclear power plant engineers, and digital process control systems.
Prerequisite: Junior or senior classification in the college of engineering; non-NUEN majors.

NUEN 436 Human Performance for Nuclear Power Plant Engineers
Credits 2. 2 Lecture Hours.
Six modules: human performance fundamentals, the organization and the processes, the individual worker, the engineer, corrective action programs and root cause analysis, and case studies including TMI-2, Chernobyl, Davis-Besse, and Fukushima Daiichi.
Prerequisites: NUEN 432; junior or senior classification in the college of engineering.

NUEN 451 Nuclear Security System Design
Credits 3. 3 Lecture Hours.
The science and engineering associated with the design, evaluation and implementation of systems to secure nuclear and radiological materials; adversary characterization, categorization of nuclear and radiological targets, calculation of consequences associated with failure to protect targets, detection and delay technologies, and mathematical methods for evaluation and managing risk.
Prerequisites: NUEN 303 and NUEN 309/SENG 309 or equivalent, or approval of instructor.

NUEN 460 Nuclear Plant Systems and Transients
Credits 3. 3 Lecture Hours.
Use of engineering principles to elucidate the nuclear, mechanical, electrical and functional interactions among nuclear plant components and systems; reactor protection systems, alarm and trip setpoints, normal and accident transients. Components studied in detail include: core, control rod drive mechanism, neutron source, neutron detectors, primary coolant system, and emergency core cooling system.
Prerequisites: NUEN 301, NUEN 302, NUEN 304, NUEN 406, NUEN 430 or equivalents; MEEN 315, MEEN 344, MEEN 461 or equivalents; junior or senior classification.
NUEN 465 Nuclear Materials Engineering  
Credits 3. 3 Lecture Hours.  
Explore applications of materials science principles in nuclear energy systems; includes crystal structures and defects, metallurgy, and materials thermochemistry; emphasis on nuclear fuel performance, structural material changes, and waste materials; laboratory demonstrations on materials behavior.  
Prerequisites: NUEN 265, MEEN 222/MSEN 222 or equivalent and NUEN 302.

NUEN 475 Environmental Nuclear Engineering  
Credits 3. 3 Lecture Hours.  
Environmental aspects of nuclear power; natural radiation environment and the distribution of radioactivity added to the environment by human activities; evaluation of effects of radiation and radioactivity on the environment and on humans.  
Prerequisite: NUEN 309/SENG 309.

NUEN 479 Radiation Protection Engineering  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Analysis of radiation hazard situations and design of nuclear facilities from a safety standpoint.  
Prerequisite: NUEN 475.

NUEN 481 Seminar  
Credit 1. 1 Lecture Hour.  
Designed to broaden the student’s capability, performance and perspective in nuclear engineering through faculty, student and guest presentations.  
Prerequisite: NUEN 410 or registration therein or NUEN 479 or registration therein.

NUEN 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Problems of limited scope approved on an individual basis intended to promote independent study; program enrichment for capable students; results presented in writing to staff.  
Prerequisites: Junior or senior classification and approval of department head.

NUEN 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of nuclear engineering. May be repeated for credit.  
Prerequisite: Approval of instructor.

NUEN 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of a faculty member in Nuclear Engineering. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

---

NURS - Nursing (NURS)

NURS 301 Nursing Foundation  
Credits 2. 1 Lecture Hour. 1 Lab Hour.  
Introduction to nursing skills including such activities as safety, assessment of vital signs, comfort measures, assistance with daily living activities, environmental concerns, positioning and transporting. We will become familiar with the nursing process, communication and documentation tools. An introduction to the simulation center is highlighted in this class. Orientation to clinical sites and expectations for clinical rotation, as well as mandatory clinical site requirements will be completed.  
Prerequisites: Admission to the BSN program or approval from the Associate Dean for Academic Affairs.

NURS 305 Nursing Dimensions and Informatics  
Credits 3. 3 Lecture Hours.  
This course explores the concepts of informatics and professional dynamics in nursing. Basic computer competencies essential to nursing are introduced, along with skills required to locate and evaluate information (info literacy), arid process and communicate findings (info management) related to evidence-based nursing practice. The roles and behaviors of the professional nurse are also introduced. The influence of ethics and cultural/society issues on the nursing profession are explored as well as opportunities for personal and professional development.  
Prerequisites: Admission to the BSN program or approval from the Associate Dean for Academic Affairs.

NURS 306 Foundations of Nursing Practice Theory  
Credits 5. 5 Lecture Hours.  
Role of the professional nurse utilizing the nursing process as a systematic approach assisting individuals toward optimal health; discussion of the scope of human needs and fundamental principles of nursing concepts, nursing theories, health promotion strategies, health assessment techniques and communication skills in providing basic care for the adult.  
Prerequisites: Admission to the College of Nursing Program; concurrent enrollment and grade of C or better in NURS 307.

NURS 307 Foundations of Nursing Practice Clinical  
Credits 3. 9 Lab Hours.  
Application of fundamental principles of nursing concepts, nursing theories, health promotion strategies, health assessment techniques and communication skills employed in providing basic care of the adult; implementation of the nursing process as a systematic approach by obtaining health histories, utilizing interviewing skills, performing physical and psychosocial assessments, establishing a baseline database and formulating initial nursing plans.  
Prerequisites: Admission to the College of Nursing Program; concurrent enrollment and grade of C or better in NURS 306.

NURS 312 Introduction to Pathophysiology  
Credits 3. 3 Lecture Hours.  
An introduction to pathophysiological alterations in major regulatory mechanisms of the body. Provides a foundation for understanding general nursing practice, various diagnostic procedures and selected therapeutic regimens.
NURS 313 Nursing Fundamentals  
Credits 5. 3 Lecture Hours. 2 Lab Hours.  
An introduction to the scope of human needs, utilization of the nursing process as a systematic approach to meeting those needs and the role of the professional nurse in assisting individuals toward optimal health. Clinical settings are utilized in the application of fundamental concepts, principles of nursing and communication skills that are employed in providing basic client care.  
Prerequisite: Admission to the BSN Program.

NURS 314 Health Assessment  
Credits 3. 1 Lecture Hour. 2 Lab Hours.  
Concepts and principles underlying assessment of the health status of individuals are presented. Emphasis is placed on interviewing skills, health histories, and the physical and psychosocial findings in the well person. Development of communication in the nurse-client relationship and assessment skills are included. Students implement the nursing process by obtaining health histories, performing physical and psychosocial assessments, establishing a database, and formulating initial nursing plans.

NURS 315 Nursing and the Aged  
Credits 3. 2 Lecture Hours. 1 Lab Hour.  
This course presents an overview of age-related changes including physical, emotional, social and environmental transitions in the aging family. Emphasis is placed on developmental patterns and health promotion in the population.

NURS 316 Pharmacology Principles  
Credits 3. 3 Lecture Hours.  
Focuses on the basic drug classifications, concepts and principles of pharmacology, with special consideration for the nursing role in developing a comprehensive approach to the clinical application of drug therapy through the use of the nursing process. Nursing implications relative to the utilization of drug therapy are examined.

NURS 317 Adult Nursing I  
Credits 6. 3 Lecture Hours. 3 Lab Hours.  
This course introduces the student to the use of the nursing process in the care of adults with chronic or non-complex illness. The course uses a systems approach to discuss the effects of illness on individual and family, and to examine the disruption of growth and development patterns across the lifespan from young adult to senior years, emphasizing the nursing process to assist adults in reaching their optimal level of wellness. The course includes clinical laboratory to allow the student the opportunity to apply theoretical concepts to clinical practice in diverse adult populations.

NURS 323 Nursing Care of Women, Families and Newborns  
Credits 4. 2 Lecture Hours. 2 Lab Hours.  
Study of childbearing families and women's health in normal and high-risk situations; role of the nurse in meeting health needs of women, families and their newborns; supervised clinical experiences and/or simulation experiences in the application of the nursing process in meeting these health needs; promotes acquisition of skills in caring for women, families and newborns during uncomplicated and/or complicated health experiences in a variety of settings.  
Prerequisites: Grade of C or better in NURS 306 or NURS 313; grade of C or better in NURS 307 or NURS 314; grade of C or better in NURS 312, NURS 316, and NURS 320.

NURS 385 Directed Studies  
Credits 1 to 3. 1 to 3 Other Hours.  
Individually supervised study in subject matter to be arranged with faculty.  
Prerequisite: Admission to the College of Nursing or approval from the associate dean of academic affairs.

NURS 386 Directed Clinical Studies  
Credits 1 to 3. 1 to 3 Other Hours.  
Individually supervised study focusing on clinical skills in focused areas to be arranged with faculty.  
Prerequisite: Admission to the College of Nursing or approval from the associate dean of academic affairs.

NURS 405 Selected Topics in Nursing  
Credit 1. 1 Lecture Hour.  
A broad introduction to selected topics of current interest in the role of professional nursing.

NURS 411 Evidence-Based Practice for Nurses  
Credits 3. 3 Lecture Hours.  
A study of the principles and methodology of research in nursing practice, with emphasis on evidence based practice research; interpret research, identify its methods and significance, and analyze findings in order to be a consumer of nursing research and practitioner of evidence based practice.  
Prerequisite: Grade of C or better in NURS 306 or NURS 313; grade of C or better in NURS 307 or NURS 314; grade of C or better in NURS 312 and NURS 316, or with approval from the Associate Dean of Academic Affairs.

NURS 412 Care of Mental Health Clients  
Credits 4. 2 Lecture Hours. 2 Lab Hours.  
Demonstrates the relevance of psychosocial nursing concepts to all areas of professional practice. Provides a conceptual integration of the nursing process, theories and research from psychosocial sciences and humanities as these relate to the care of persons with mental disorders. Clinical experience provides an opportunity for application of psychosocial concepts and methods in using the nursing process to promote optimal levels of wellness for individuals, families and target groups.  
Prerequisites: Grade of C or better in NURS 306 or NURS 313; grade of C or better in NURS 307 or NURS 314; grade of C or better in NURS 312 and NURS 316.

NURS 413 Nursing Care of Children and Families  
Credits 4. 3 Lecture Hours. 1 Lab Hour.  
A study of the factors influencing health promotion, protection and maintenance of infants, children and adolescents; examination of family theory, growth and development, primary health care, and acute, chronic, and terminal conditions; clinical experience in caring for healthy, at-risk, acutely and chronically ill infants, children, adolescents and their families.  
Prerequisites: Grade of C or better in NURS 306 or NURS 313, NURS 307 or 314, NURS 312, NURS 316, and NURS 320.
NURS 420 Adult Nursing II
Credits 6. 6 Lecture Hours.
Critical thinking and problem-solving strategies for care of adults with acute or complex illness and injury; examination of effects of acute illnesses in relation to the injury and in relation to the individual's developmental stage, culture and gender; building on Nursing Care of Adults I, a systems approach is used to analyze and intervene in alterations to the health of the individual and family and to help them reach their optimal level of wellness; includes clinical laboratory to allow the opportunity to integrate theoretical concepts to clinical practice in diverse populations.
Prerequisite: Grade of C or better in NURS 312, NURS 313, NURS 314, NURS 316, and NURS 320.

NURS 421 Care of Community Health Clients
Credits 5. 5 Lecture Hours.
The nursing process is utilized in the study of community/public health nursing practice and common health problems encountered in community settings. Health promotion, maintenance, counseling and coordination of care are utilized in providing care to individuals, families, aggregates and populations in community settings. Principles and skills of public health nursing practice are used to assess a community's health and diagnose community health needs.
Prerequisite: Grade of C or better in NURS 306 or NURS 313, NURS 307 or NURS 314, NURS 312, NURS 316 and NURS 320.

NURS 424 Professional Issues
Credits 2. 2 Lecture Hours.
The purpose of this course is to introduce health professions students to professional and ethical/legal issues in everyday practice in health care, develop self-awareness skills about their own values, and those of others, and provide them with tools to engage in self-reflective practice leading to enhancement of patient-centered care and collaborative team work.
Prerequisites: Admission to the College of Nursing.

NURS 430 Transition to Professional Nursing Practice
Credits 5. 3 Lecture Hours. 2 Lab Hours.
Course reflects content that will prepare senior students for transition of entry into practice. Theories and principles concerning human behavior in organizations, with emphasis on leadership roles encountered in professional nursing practice. Senior nursing students in collaboration with nursing faculty refine coordination of care for a diverse population of clients. A clinical practicum will focus on synthesizing and refining skills in the delivery and management of nursing care to various groups of clients. Concepts of clinical decision-making, and inter-professional dynamics are incorporated in the context of legal, ethical, and evidence-based practice.
Prerequisites: Grade of C or better in NURS 305, NURS 306 or NURS 313, NURS 307 or NURS 314, NURS 315, NURS 320, NURS 411, NURS 412, and NURS 420.

NURS 431 Care of Vulnerable Populations
Credits 1 to 3. 1 to 3 Lecture Hours.
Principles of caring for vulnerable populations; includes characteristics of the vulnerable, clinical issues associated with caring for individuals from vulnerable populations, social justice and resilience; activities include development of care plans for the vulnerable, teaching projects and capacity building; option to utilize 16 hours of community health clinical time to complete a mini-immersion experience.
Co-requisite: NURS 421.

NURS 432 Relations in Healthcare: Teamwork and Communication
Credits 1 to 3. 1 to 3 Lecture Hours.
Preparation for inter and intra professional teamwork and communication to improve the culture for professional collaboration with a shared mental model for excellence in quality and safety; goal for effective teamwork and communication is higher quality, safer patient care through highly effective medical teams that optimize the use of resources, information, and people to achieve the best clinical outcomes for patients.

NURS 434 Case Studies in Patient Safety and Quality
Credits 2. 2 Lecture Hours.
Application of evidence based quality improvement and risk reduction tools and strategies to various case studies with the goal of improving patient safety, outcome, and quality of care; case study evaluation of nursing practice and evidence based practice recommendations which highlight the nurse's professional role in patient safety and quality; application of intra/interprofessional communication and teamwork skills to promote a safe environment for healthcare delivery.
Prerequisite: Junior or senior classification.

NURS 456 Complementary and Alternative Medicine/Health Care
Credits 3. 3 Lecture Hours.
This course is an introduction to the practice of complementary and alternative medicine (CAM)/health care. It will explore both conventional health care and CAM allowing the student to examine each of the entities to gain an understanding of what each practice offers. This knowledge will allow the future health care professional to better inform and facilitate the individual's move toward or maintenance of optimal health and health practices. Alternative health care modalities, such as herbal medicine, acupuncture and massage therapy, will be discussed. Websites and online resources pertinent to the topic will be explored and analyzed, including the National Center for Complementary and Alternative Medicine within the National Institutes of Health.

NURS 457 Introduction to Concepts of Forensic Nursing
Credits 3. 3 Lecture Hours.
This course provides an introduction to forensic science as a collaborative approach to criminal investigation. General concepts and principles of forensic science will be explored with an emphasis on the role of the nurse working with victims of violence. Content to be addressed includes: forensic investigation, evidence collection and management, mechanisms of injury and death using post-mortem forensic analysis, interpersonal crimes of violence, and forensic nursing roles.

NURS 460 Nursing Dimensions and Informatics for the RN
Credits 3. 3 Lecture Hours.
This course is designed to build on the informatics knowledge and skills of the practicing nurse. Emphasis is placed on the application of the ANA Standards for Nursing Informatics and Professional Practice and incorporation of information technology to support patient care and clinical decision-making. The course will assist the students to develop the professional role by incorporation of the philosophy of nursing, nursing theory, and clinical reasoning. The nurse's role in interprofessional practice will be explored. The influence of ethics and cultural/society issues on the nursing profession are explored as well as opportunities for personal and professional development.

NURS 461 Application of Evidence Based Practice for the RN
Credits 3. 3 Lecture Hours.
This course is a study of basic research methodologies and an in depth examination of the professional nurse's role in the application of evidence into clinical practice.
NURS 462 Pathophysiology and Pharmacology for the RN
Credits 4. 4 Lecture Hours.
Students will demonstrate the ability to incorporate the principles of pathophysiology and pharmacology in planning healthcare for individuals across the lifespan.

NURS 463 Health Assessment for the RN
Credits 3. 3 Lecture Hours.
In this course, the concepts and principles underlying assessment of the health status of culturally diverse individuals are presented. An emphasis is placed on reviewing and renewing cognitive, affective, and psychomotor skills to obtain health histories and discover physical and psychosocial findings in the well person. The role of genetics in family histories is examined. Successful completion of the course requires students to successfully complete a head-to-toe health assessment examination with accurate documentation of the findings.

NURS 464 Health Promotion Across the Lifespan for the RN
Credits 3. 2 Lecture Hours. 1 Lab Hour.
This course emphasizes the role of the nurse in health promotion across multiple settings with diverse populations. The student will apply principles of teaching/learning, case management, and genetics/genomics to improve the health of general and vulnerable populations.

NURS 465 Care of the Older Adult for the RN
Credits 2. 2 Lecture Hours.
The student will develop competencies and knowledge necessary for providing care and promote health aging in the older adult.

NURS 466 Community Health for the RN
Credits 5. 4 Lecture Hours. 1 Lab Hour.
In this course, students are introduced to community-based health care of culturally diverse populations. The role of the professional nurse as part of an interprofessional team in health promotion, disease prevention, and management of chronic health problems in community settings is explored. Students apply critical reasoning and information technology skills to develop and implement evidence-based projects that positively impact the quality of life of populations. Practicum experiences are individualized.

NURS 467 Leadership and Management for the RN
Credits 5. 3 Lecture Hours. 2 Lab Hours.
In this course, theories and principles of human behavior in organizations are examined, including an exploration of leadership roles in professional nursing practice. The role of regulatory agencies in the provision of quality health care is explored. Students will participate in the evaluation and planning for quality improvement using nurse sensitive indicators. The students will discern the nurse's role in reducing the financial cost of health care. Practicum experiences are individualized.

NURS 468 Professional Practice Issues for the RN
Credits 2. 2 Lecture Hours.
Professional practice issues such as those related to political action, socio-legal concerns, cultural diversity, and ethics are explored with an emphasis on the advocacy role of the nurse. The importance of the nurse leader as a role model for continued professional growth through lifelong learning is emphasized.

NURS 489 Special Topics In...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of nursing. May be repeated for credit.
Prerequisites: Admission to the BSN program or approval from the Associate Dean for Academic Affairs.
NVSC 401 Naval Ships Systems II: Weapons
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Types and purpose of major weapons systems and platforms of the U.S. Naval forces; theory and operational principles of radar, sonar and communication circuits; fire control problem geometry; principles of ballistics, propulsion, launching and guidance of weapons; principles of electronic warfare and nuclear weapons.

NVSC 402 Leadership and Ethics
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Theoretical concepts of Western moral traditions and ethical philosophy; topics include leadership, values, military ethics, Just War Theory, Uniform Code of Military Justice and Naval regulations; examination of ethical foundation for the development of leadership and communication skills; should be taken the semester of graduation.

NVSC 404 Naval Operations and Seamanship
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Relative motion, formation tactics, ship maneuvering behavior and characteristics, applied aspects of ship handling, afloat communications and ship employment; naval warfare, operations concepts, command and control, and joint warfare; review and analysis of case studies involving moral, ethical and leadership issues.
Prerequisite: NVSC 301; junior or senior classification.

NVSC 410 Fundamentals of Maneuver Warfare
Credits 3. 3 Lecture Hours.
Study of the foundational concepts and history of the United States Marine Corps as the premier Maneuver Warfare organization; evolution of amphibious and expeditionary doctrine over time and amid emerging technological challenges; exploration of theoretical concepts utilizing historical case studies.
Prerequisite: Grade of C or better in NVSC 303.

NVSC 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study in problems in the field of naval science not covered by other courses in department.
Prerequisite: Approval of department head.

OCEN - Ocean Engineering (OCEN)

OCEN 201 Introduction to Ocean Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Survey of ocean engineering; concepts and theories of wave-structure interaction; sources of technical information; coastal and ocean structures, moorings, laboratory models; underwater systems; naval architecture; ocean instrumentation; materials and corrosion; hydrographic surveying and positioning, graphics laboratory, recent developments in ocean engineering.
Prerequisite: Grade of C or better in OCEN 221, or concurrent enrollment.

OCEN 213 Principles of Materials Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Description of properties of materials using a unified approach; discussion of the chemical structure, crystalline structure, microstructure, interface structure, and phase diagrams for materials; develop bulk properties and characteristics of metals, polymers, and ceramics; mechanical, electrical, magnetic, thermal, and optical properties for these materials.
Prerequisites: Grade of C or better in OCEN 221 or CVEN 221, or concurrent enrollment.

OCEN 214 Mechanics of Deformable Bodies
Credits 3. 3 Lecture Hours.
Concepts of stress, strain and deformation; factor of safety; stress-strain relationships and material properties; stress concentrations; area moments of inertia; axially loaded members, torsionally loaded members, bending of beams; shear and moment diagrams; stresses due to combined loading; thin-walled pressure vessels; transformation of stress including Mohr’s circle; beam deflections and buckling stability.
Prerequisites: Grade of C or better in OCEN 221 or CVEN 221; grade of C or better in MATH 308 or concurrent enrollment.

OCEN 221 Engineering Mechanics: Statics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
General principles of mechanics; concurrent force systems; statics of particles; equivalent force/moment systems; centroids and center of gravity; equilibrium of rigid bodies; trusses, frames and machines; internal forces in structural members; moments of areas.
Prerequisites: Grade of C or better in MATH 251 or MATH 253, or concurrent enrollment; grade of C or better in ENGR 216/PHYS 216 and PHYS 206; also taught at Qatar campus.

OCEN 261 Applied Numerical Methods
Credits 3. 3 Lecture Hours.
Application of numerical methods to ocean-related engineering problems; development, evaluation and comparison of various techniques for root finding, curve fitting, numerical integration, simultaneous linear algebraic equations, matrix methods, probability and statistics and ordinary differential equations in ocean-related engineering applications.
Prerequisites: Grade of C or better in MATH 308 or concurrent enrollment; also taught at Qatar campus.

OCEN 265 Introduction to Geotechnical Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Physical properties of soils, classification systems, soil exploration, permeability, consolidation, compaction and shear strength; laboratory tests conducted to determine the physical and engineering soil properties needed for application in geotechnical engineering design.
Prerequisite: Grade of C or better in OCEN 214 or CVEN 305.

OCEN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study on selected current problems in the ocean and/or maritime industry; enables individuals or groups to undertake and complete with credit some specialized investigation not covered by other courses.
Prerequisite: Approval of department head.

OCEN 300 Ocean Engineering Wave Mechanics
Credits 3. 3 Lecture Hours.
Physical and mathematical fundamentals of ocean wave behavior; mechanics of wave motion; use of statistics and probability to develop design wave criteria.
Prerequisite: Grade of C or better in OCEN 201; grade of C or better in OCEN 311 or CVEN 311/EVEN 311, or concurrent enrollment; also taught at Galveston and Qatar campuses.

OCEN 311 Fluid Statics and Dynamics
Credits 3. 3 Lecture Hours.
Fluid properties; statics; kinematics; ideal gas law; conservation of mass; linear momentum and Newton’s Second Law; conservation of energy; Bernoulli’s equation; control volume analysis, similitude and hydraulic models; homogeneous flow in pipes; fluid drag, boundary layer basics.
Prerequisites: Grade of C or better in MATH 251, and OCEN 221 or CVEN 221.
OCEN 336 Fluid Dynamics Laboratory
Credit 1. 2 Lab Hours.
Introduction to laboratory techniques, calibration principles, reports and fluid measurements; determination of fluid properties; visualization of types of flow; experiments in closed conduit flow of air, water and oil; fluid drag and turbomachinery tests; open channel and gravity wave demonstrations.
Prerequisite: Grade of C or better in OCEN 311 or CVEN 311/EVEN 311, or concurrent enrollment.

OCEN 341 Engineering Economics and Project Management
Credits 3. 3 Lecture Hours.
Analysis of engineering economics and management, using costs and benefits of various engineering options; project scheduling covered in detail including PERT, GANT and CPM methods; time value of money, cash flows, analysis techniques, interest rates, inflation, depreciation, optimization, statistics, network analysis and critical path programming.
Prerequisites: Junior or senior classification; enrollment in the OCEN program; also taught at Galveston and Qatar campuses.

OCEN 344 Reinforced Concrete Structures
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Analysis and design of reinforced concrete beams, columns, slabs and footings using ultimate strength methods.
Prerequisites: Grade of C or better in CVEN 345 and OCEN 213; also taught at Galveston and Qatar campuses.

OCEN 345 Theory of Ocean Engineering Structures
Credits 3. 3 Lecture Hours.
Functions of and loadings on ocean engineering structures, including sea walls, harbor structures, sea-going vessels, offshore structures and underwater vehicles; analysis of structures including trusses, beams, plates, shells and arches; introduction to stress and failure analysis; introduction to finite element analysis (FEA) including computational mechanics of ocean engineering structures using FEA.
Prerequisites: Grade of C or better in OCEN 214, or approval of instructor.

OCEN 362 Hydromechanics
Credits 3. 3 Lecture Hours.
Kinematics of fluids; differential analysis of fluid flow; homogeneous, incompressible, irrotational and turbulent flows; Euler equations; Navier-Stokes equations; flow of viscous fluids; pumps; introduction to water waves.
Prerequisites: Grade of C or better in OCEN 311 or CVEN 311/EVEN 311; grade of C or better in MATH 308; also taught at Galveston and Qatar campuses.

OCEN 363 Dynamics and Vibrations
Credits 3. 3 Lecture Hours.
Application of Newtonian and energy methods to model dynamic systems with ordinary differential equations; dynamics and vibrations of linear single-and multi-degree of freedom systems of particles and rigid bodies; solutions of models using analytical approaches; interpreting solutions; application to simple floating systems.
Prerequisites: Grade of C or better in OCEN 221 or CVEN 221; grade of C or better in MATH 308 or concurrent enrollment; also taught at Galveston campus.

OCEN 399 Leadership and Experience
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point.
Prerequisites: OCEN 201; junior or senior classification or approval of instructor.

OCEN 400 Basic Coastal Engineering
Credits 3. 3 Lecture Hours.
Mechanics of wave motion; wave refraction, diffraction and reflection; wave forecasting; shore processes; planning of coastal engineering projects; design of seawalls, breakwaters, beach nourishment and fixed and floating installations; dredging; risk analysis.
Prerequisites: Grade of C or better in OCEN 300.

OCEN 401 Underwater Acoustics for Ocean Engineers
Credits 3. 3 Lecture Hours.
Fundamentals of underwater acoustics, SONAR equations, propagation of underwater sound, acoustic transducers and arrays, noise in the ocean environment, design and prediction of SONAR systems, ocean engineering applications of underwater sound.
Prerequisite: Grade of C or better in OCEN 311 or CVEN 311/EVEN 311.

OCEN 402 Principles of Naval Architecture
Credits 3. 3 Lecture Hours.
Elementary principles of naval architecture; ship geometry and hydrostatics; load line and classification regulations; concept of intact and damaged stability; resistance and propulsion of water-borne vehicles; applications to the design consideration of semi-submersibles, catamarans and drilling rigs.
Prerequisite: Grade of C or better in OCEN 311 or CVEN 311/EVEN 311.

OCEN 403 Dynamics of Offshore Structures
Credits 3. 3 Lecture Hours.
Prediction of loads due to wind, current and waves; introduction to concepts of linear structural dynamics and to the design of ocean structures; mooring and towing analysis; fluid-structure interactions; vibration of submerged structures; offshore pipelines; introduction to risk analysis.
Prerequisites: Grade of C or better in OCEN 300 and CVEN 345; grade of C or better in OCEN 363 or concurrent enrollment.

OCEN 405 Finite Element Analysis in Engineering Design
Credits 3. 3 Lecture Hours.
Introduction to the fundamental theory and techniques; direct approach and energy formulation; element equations, assembly and solution schemes; computer implementation, design considerations; applications to field problems; original computer project required.
Prerequisites: Grade of C or better in OCEN 345 or CVEN 345; grade of C or better in OCEN 214 and OCEN 261; also taught at Galveston and Qatar campuses.

OCEN 406 Capstone Design I
Credit 1. 1 Lecture Hour.
Part one of a two-course sequence; development and presentation of detailed proposals for offshore or coastal engineering projects, which will form the basis for OCEN 407 design projects; includes formulation of project objectives, design constraints, delineation of alternatives, scheduling and analysis of economic and environmental impact.
Prerequisites: Grade of C or better in OCEN 300; grade of C or better in OCEN 400, OCEN 402, and OCEN 403, or concurrent enrollment; also taught at Galveston and Qatar campuses.
OCEN 407 Design of Ocean Engineering Facilities II  
Credits 3. 3 Lecture Hours. 6 Lab Hours.  
Design of structures, equipment and systems for the ocean; environmental, logistical and reliability requirements; complete design process followed through group design project; delineation of alternatives, constraints, economics and environmental consequences included to strengthen real-life problem solving skills.  
Prerequisites: Grade of C or better in OCEN 400, OCEN 402, OCEN 403, and OCEN 406.

OCEN 408 Underwater and Moored System Design  
Credits 3. 3 Lecture Hours.  
Basic principles of thermodynamics, fluid dynamics and human respiration physiology applied to design of underwater habitats, submersibles and diving bells; breathing gas supply for diving systems; heat transfer for underwater systems; pressure vessel design; remotely operated vehicles; subsea flowlines and manifold systems; and design of towed and moored systems.  
Prerequisites: Grade of C or better in OCEN 311 or CVEN 311/EVEN 311.

OCEN 410 Ocean Engineering Laboratory  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Fundamental techniques and instrumentation for field and laboratory measurements pertaining to ocean engineering experiment planning; data analysis and data presentation; written reports describing planning, analysis and results of experiments.  
Prerequisites: Grade of C or better in OCEN 400, OCEN 402, and OCEN 403.

OCEN 411 Environmental Nearshore Hydrodynamics  
Credits 3. 3 Lecture Hours.  
Fundamentals of current and shallow water wave motions; beach response to nearshore processes; coastal sediment and pollutant transport including nearshore currents, longshore onshore-offshore transport and shoreline configuration; facilities for shoreline stabilization, backshore protection and inlet stabilization; environmentally conscious coastal engineering design.  
Prerequisites: Grade of C or better in OCEN 300.

OCEN 415 Offshore Structure Design  
Credits 3. 3 Lecture Hours.  
Design of large structures using diffraction analysis; design project: design of a fixed offshore structure including dynamics effects.  
Prerequisites: Grade of C or better in CVEN 446 and OCEN 300, or concurrent enrollment; also taught at Galveston and Qatar campuses.

OCEN 421 Naval Architecture Design II  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Ship motion and mooring; theory and practice of naval architecture, basic principles and design calculations; hull structural design considerations; ship resistance and propulsion power prediction; propeller selection concepts; dynamic positioning systems; mobile offshore drilling unit (MODU) design considerations; practical design work on a vessel or MODU of the student's choosing under the guidance of the instructor.  
Prerequisites: Grade of C or better in OCEN 362 and OCEN 402.

OCEN 459 Mechanical Vibrations  
Credits 3. 3 Lecture Hours.  
Basic theory of vibrating systems with single and multiple degrees of freedom and principles of transmission and isolation of vibrations.  
Prerequisites: Grade of C or better in OCEN 261 and OCEN 363.

OCEN 461 Ocean Instrumentation and Control Theory  
Credits 3. 3 Lecture Hours.  
Electrical systems components; analog and digital filters-amplifiers; network analysis; instrument behavior and displacement, velocity, acceleration, force, and flow measurements; simple feedback and control theory for linear electromechanical systems; digital data acquisition.  
Prerequisites: Grade of C or better in ENGN 215.

OCEN 463 Hydrodynamics of Offshore Structures  
Credits 3. 3 Lecture Hours.  
Introduction to offshore structures; wave force formulation; wave forces on small structures; floating structure dynamics; modeling dynamics systems of rigid body motion; structure response statistics.  
Prerequisites: Junior or senior classification or approval of instructor; Grade of C or better in OCEN 261, OCEN 363, CVEN 345 and OCEN 300; enrollment in OCEN program; also taught at Galveston and Qatar campuses.

OCEN 465 Subsea Pipeline Design  
Credits 3. 3 Lecture Hours.  
Design and construction practices of submarine oil/gas pipelines and risers; pipe selections, coating, insulation; route selection; operation and installation stresses; stability during laying and operation due to wave and current action; cost analysis considering long term operability and safety.  
Prerequisites: Grade of C or better in OCEN 300 and CVEN 446; also taught at Galveston and Qatar campuses.

OCEN 467 Offshore Random Processes  
Credits 3. 3 Lecture Hours.  
Basic probability theory and engineering statistics; irregular structural excitation and response; random vibration theory with application to offshore processes and structures; development of extreme values used in design of ocean structures.  
Prerequisites: Grade of C or better in OCEN 261, OCEN 363, and OCEN 403; also taught at Galveston and Qatar campuses.

OCEN 474 Port and Harbor Engineering  
Credits 3. 3 Lecture Hours.  
Engineering background and specific skills for design of marine facilities and harbors; includes development of design criteria, channel design, evaluation of operations and extreme loads, dredging and disposal.  
Prerequisites: Junior or senior classification or approval of instructor.

OCEN 481 Seminar  
Credit 1. 1 Lecture Hour.  
Responsibilities and obligations of new ocean engineers; professional ethics, membership in professional societies and professional registrations; case studies and lectures presented by staff and practicing engineers. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: Grade of C or better in OCEN 406.

OCEN 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Special problems in various areas of ocean engineering assigned to individual students or to groups; readings and assignments given and frequent consultations held.  
Prerequisite: Approval of program head.

OCEN 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified field of ocean engineering. May be repeated for credit.  
Prerequisite: Approval of instructor.
Prerequisite: plastics, oil and sound; impact of pollution on society.
Sources and fates of marine pollutants; types of pollutants including various lengths and purposes; addresses preparation for various ocean communication of various forms of writing and for oral presentations of exploration of the fundamental skills required for effective credits 3. 3 lecture hours.

OCNG 203 Communicating Oceanography
Credit 1. 2 Lab Hours.
Learn and practice basic writing skills for ocean science; basic background on the research being conducted in the Department of oceanography through seminars given by Oceanography graduate students.
Prerequisites: OCNG 251.

OCNG 251 Oceanography
Credits 3. 3 Lecture Hours.
(GEOL 1345, GEOL 1445*) Oceanography. Overview of the ocean environment; interrelation of the subdisciplines of ocean sciences; importance of the oceans to human beings; human impact on the oceans; also taught at Galveston campus.

OCNG 252 Oceanography Laboratory
Credit 1. 2 Lab Hours.
(GEOL 1145, GEOL 1445*) Oceanography Laboratory. Hands-on laboratory experiments and exercises demonstrating principles of ocean sciences; emphasis on the unique interdisciplinary nature of the ocean and current ocean issues relevant to today's society. Honors sections and contracts are also available; also taught at Galveston campus.

OCNG 281 Seminar
Credit 1. 1 Other Hour.
Basic background on the research being conducted in the Department of Oceanography through seminars given by Oceanography graduate student; basic writing skills for ocean science through instruction and assignments during the semester.
Prerequisites: OCNG 251; OCNG 252; or approval of instructor.

OCNG 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in oceanography. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Freshman or sophomore classification and approval of instructor.

OCNG 303 Professional Communication in Oceanography
Credits 3. 3 Lecture Hours.
Exploration of the fundamental skills required for effective communication of various forms of writing and for oral presentations of various lengths and purposes; addresses preparation for various ocean science-related careers.
Prerequisite: OCNG 203; COMM 203 or COMM 205, junior or senior classification or approval of instructor.

OCNG 350 Marine Pollution
Credits 3. 3 Lecture Hours.
Sources and fates of marine pollutants; types of pollutants including plastics, oil and sound; impact of pollution on society.
Prerequisite: Junior or senior classification or approval of instructor.

OCNG 404 Ocean Observing Systems
Credits 3. 3 Lecture Hours.
Investigate the rationale behind ocean observing systems; familiarize with the relevant social, scientific design, technology and policy issues associated with observing systems.
Prerequisite: OCNG 251 or approval of instructor.

OCNG 410 Physical Oceanography
Credits 3. 3 Lecture Hours.
Elements of the physics of the sea; descriptive aspects as well as cause and effect relations in respect to currents, thermal structure and waves. Intended for majors in the physical sciences or engineering.
Prerequisites: MATH 152; junior or senior classification.

OCNG 420 Biological Oceanography
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Biological aspects of the marine environment; marine organisms; productivity of the sea; marine pollution and fouling; use of the sea.
Prerequisites: BIOL 112 or OCNG 251; junior or senior classification; also taught at Galveston campus.

OCNG 425 Microbial Oceanography
Credits 3. 3 Lecture Hours.
Diversity and ecology of microorganisms in the ocean; role in the Earth system both in the contemporary ocean and the geological past.
Prerequisites: Junior or senior classification, OCNG 251, or approval of instructor.

OCNG 430 Geological Oceanography
Credits 3. 3 Lecture Hours.
History of Oceanography; physiographic provinces of the oceans, their origins and sediments; geological sampling techniques and geophysical methods; coasts and beaches, paleoceanography; global tectonics.
Prerequisites: OCNG 251 or GEOL 101 or GEOL 104 or GEOG 203; junior or senior classification.

OCNG 440 Chemical Oceanography
Credits 3. 3 Lecture Hours.
Chemical aspects of the marine environment; biogeochemical cycles of organic and inorganic constituents; primary productivity, the carbon dioxide system, nutrient cycles, stable and radioactive isotopes in the sea.
Prerequisites: CHEM 120 and OCNG 251; junior or senior classification.

OCNG 443 Oceanographic Field and Laboratory Methods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Development of skills needed to collect, prepare and analyze oceanographic samples; perform data analysis, interpretation and reporting for common oceanographic analyses.
Prerequisite: STAT 211, CHEM 120, junior or senior classification or approval of instructor.

OCNG 451 Mathematical Modeling of Ocean Climate
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Problem-based course in theoretical and computer techniques applied to mathematical solutions of ocean climate, including ocean circulation, climate variability, El Niño.
Prerequisite: MATH 308.
OCNG 453 Hydrothermal Vents and Mid-Ocean Ridges
Credits 3. 3 Lecture Hours.
Exploration of the creation of various types of hydrothermal fluids, the associated chemical behavior of vent and plume fluids, and the ecology of hydrothermal vent systems; emphasis on the interdependence of the geological, chemical, and biological aspects of hydrothermal systems.
Prerequisite: OCNG 251; BIOL 112; CHEM 120; junior or senior classification or approval of instructor.

OCNG 456 MATLAB Programming for Ocean Sciences
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Computation techniques for oceanographic data processing using MATLAB; focus on the analysis of oceanographic-related data sets and real-world oceanographic applications; analyze individual data sets.
Prerequisite: Junior or senior classification or approval of the instructor.

OCNG 461 Advanced Oceanographic Data Analysis and Communication
Credits 3. 3 Lecture Hours.
Project design and planning for oceanographers; oceanographic data organization and analysis; synthesis and interpretation of data analysis; technical report writing and presentation.
Prerequisites: OCNG 203, OCNG 410, and GEOS 470, or approval of the instructor.

OCNG 469 Python for Geosciences
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Core language Python programming, scientific programming analysis methods, analysis of large geophysical data sets, plotting geophysical data, interpolation.
Prerequisite: Junior or senior classification.

OCNG 481 Seminar
Credit 1. 1 Lecture Hour.
Analysis, review and critique of current research themes in oceanography based on reading assignments and seminar presentations. May be taken four times for credit.
Prerequisite: Junior or senior classification.

OCNG 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special reading assignments, problems and discussion on oceanographic topics of mutual interest to student and instructor.
Prerequisites: OCNG 251 or approval of instructor. An honors section is also available.

OCNG 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of oceanography. May be taken two times for credit.
Prerequisite: OCNG 251 or approval of instructor. An honors section is also available.

OCNG 491 Research
Credits 0 to 9. 0 to 9 Other Hours.
Research conducted under the direction of faculty member in oceanography. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded. Honors section also available.
Prerequisites: Junior or senior classification and approval of instructor.

PERF - Performance Studies (PERF)

PERF 101 Introduction to Performance Studies
Credits 3. 3 Lecture Hours.
Survey of topics in the interdisciplinary field of performance studies, including forms of performance, performance in everyday life and performance in global and intercultural contexts; in-class performance exercises and discussions; major writing component.

PERF 202 Introduction to Performance Technology
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Basic hardware, software, and aesthetic concepts of technology-based artistic performance; basic electricity, electronics, troubleshooting, audio and video design software, study of significant works, and participation in a departmental production.

PERF 223 Aesthetics of Activism
Credits 3. 3 Lecture Hours.
The use of performance in activist contexts to achieve social and political change; examination of activism, including struggles for social justice, economic equality and civil rights, as performance; examination of the arts, including performance, theatre, music, dress and design, as tools for activism.

PERF 284 Performance Studies Internship
Credits 0 to 4. 0 to 4 Lecture Hours.
Supervised experience program conducted in the area of the student’s interest in performance studies. May be taken three times for credit.
Prerequisite: PERF 101.

PERF 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Directed Studies in specific problems in identified areas of performance studies. May be taken for credit up to 3 hours.
Prerequisites: Approval of instructor and department head; PERF majors and minors only.

PERF 289 Special Topics in...
Credits 3. 3 Other Hours.
 Selected topics in performance studies. May be taken for credit seven times.
Prerequisite: Approval of instructor.

PERF 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in performance studies. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

PERF 292 Cooperative Education in Performance Studies
Credits 0 to 3. 0 to 3 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; technical report on a related subject area approved by the instructor. May be taken two times for credit.
Prerequisite: PERF 101.
PERF 301 Performance in World Cultures
Credits 3. 3 Lecture Hours.
Application of the tools of performance studies to explore the enactment of the arts in world cultures and the ways the people of every society express themselves in performance; examination of different genres of performance through music, theatre, verbal art and dress. **Prerequisite:** Junior or senior classification or approval of instructor; PERF-301 also taught at Galveston campus.

PERF 303 Creating Performance
Credits 3. 3 Lecture Hours.
Live and mediated performance; techniques and skills for performance; practical experience; discussion and critical analysis of performance; strategies for devising performance. **Prerequisites:** Major or minor in PERF; junior or senior classification or approval of instructor.

PERF 310 History of Performance in the Ancient World
Credits 3. 3 Lecture Hours.
Historical approach to performance in the ancient world; primary and secondary evidence for performance practice; application of historical methods in the study of performance. **Prerequisites:** Junior or senior classification, or approval of instructor.

PERF 311 History of Performance in the Common Era
Credits 3. 3 Lecture Hours.
Historical approach to performance practices and texts in the Common Era to 1800; transmission of performance styles, techniques and genres across cultures; applications of historical methods in the study of performance. **Prerequisites:** Junior or senior classification or approval of instructor.

PERF 312 History of Performance Modern Era
Credits 3. 3 Lecture Hours.
Development of performance practices and texts in the 19th-21st centuries; performance styles, techniques and genres in and across cultures; application of historical methods in the study of performance. **Prerequisites:** Junior or senior classification or approval of instructor.

PERF 325 Dance and World Cultures
Credits 3. 3 Lecture Hours.
Examination of international relationships between dance, culture, identity, gender, youth and politics; relationships between dancing, gender and politics in specific cultures and in globalization; variety of dance practices around the globe. **Prerequisite:** Junior or senior classification.

PERF 326 Dance and Identity in the United States
Credits 3. 3 Lecture Hours.
Analysis of dance events as complex sites for social action; examines dances performed by diverse groups of people; considers such issues as identity, community, diversity, gender and representation in the United States. **Prerequisite:** Junior or senior classification.

PERF 327/AFST 327 Popular Musics in the African Diaspora
Credits 3. 3 Lecture Hours.
Examination of a range of popular musics from the twentieth century that have emerged in conjunction with the historical global spread of peoples and cultures from the African continent; technical knowledge about music is not required; focus on social and cultural contexts for popular music. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** AFST 327/PERF 327.

PERF 328 Japanese Traditional Performing Arts
Credits 3. 3 Lecture Hours.
Study of various genres of Japanese performing arts from the 7th century to the present; understanding the genres in their historical and cultural contexts and recognizing shared aesthetic values. **Prerequisites:** Junior or senior classification or approval of instructor.

PERF 333 Movement in Performance Studies
Credits 3. 3 Lecture Hours.
Embodied practices in performance studies; examination of the role movement plays in aesthetics, communication, religion, society, individual experience and politics; investigation of varied movement practices. **Prerequisites:** Junior or senior classification.

PERF 338 Performing Communities
Credits 3. 3 Lecture Hours.
Consideration of socio-cultural, aesthetic and ethical issues in arts-based community engagement; development of a community-based performance project. **Prerequisites:** Junior or senior classification.

PERF 402/FILM 402 Intermedia Performance
Credits 3. 3 Lecture Hours.
Study of theory, history, literature and techniques of intermedia composition and design for film, theatre, dance, interactive media, and other forms of performance; examination of the collaborative creative process; projects in interdisciplinary performance. **Prerequisites:** Junior or senior classification. **Cross Listing:** FILM 402/PERF 402.

PERF 450 Seminar in 20th-21st Century Performance
Credits 3. 3 Lecture Hours.
Social, political and aesthetic issues and problems in 20th-21st century performance idioms; study of genres, styles, artistic movements; may include performance. May be taken two times for credit when content varies. **Prerequisites:** Junior or senior classification or approval of instructor.

PERF 451 Seminar in Historical Performance
Credits 3. 3 Lecture Hours.
Historical contexts for performance genres, styles or movements prior to the 20th century; texts, performance practices and contexts of performance genres, styles or movements prior to the 20th century; emphasis on historical methods; production participation may be required. May be taken two times for credit if content differs. **Prerequisites:** Junior or senior classification or approval of instructor.

PERF 452 Seminar in Global Performance
Credits 3. 3 Lecture Hours.
Intersection of cultures in performances; representations and expressions of culture; focus on culture as the ground for performance; may culminate in a performance. May be taken two times for credit if content differs. **Prerequisites:** Junior or senior classification or approval of instructor.
PERF 453 Seminar in Performance Ethnography
Credits 3. 3 Lecture Hours.
Theories and methods of ethnographic research; ethnographic research in the study of performance; ethnography of performance; ethnographic field work may be required.
Prerequisites: Junior or senior classification or approval of instructor.

PERF 454 Seminar Performing the City
Credits 3. 3 Lecture Hours.
Vernacular and aesthetic performance traditions in a city or cities; politics, culture, economics and geography of city or cities; may include a faculty-led field trip.
Prerequisites: Junior or senior classification or approval of instructor.

PERF 460 Seminar in Performance Theory
Credits 3. 3 Lecture Hours.
In-depth examination of one or more contemporary theories of performance. Emphasis on problems, research, and innovations relevant to performing and analyzing performance; writing intensive.
Prerequisites: Junior or senior classification or approval of instructor.

PERF 461 Seminar in Folklore
Credits 3. 3 Lecture Hours.
Expressive forms in vernacular culture; folklore genres and traditions of expression; local and regional customs; material culture and narrative; processes of meaning-making; aesthetics in vernacular performance.
Prerequisites: Junior or senior classification or approval of instructor.

PERF 481 Capstone Seminar: Performance as Research
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Capstone senior project on an individually-chosen research topic, presentation of a performance or interdisciplinary project; major writing and oral communication components.
Prerequisites: Performance studies major; completion of all performance studies coursework or taken concurrently with this course; approval of instructor, advisor and department head.

PERF 483 Performance Practicum
Credits 1 to 3. 1 to 3 Other Hours.
Faculty-supervised performance experience in a public setting as part of a department production or an approved external production. May be taken four times for credit.
Prerequisite: Junior or senior classification and approval of instructor.

PERF 484 Performance Studies Internship
Credits 0 to 4. 0 to 4 Other Hours.
Supervised experience program conducted in the area of the student's interest in performance studies. May be taken three times for credit.
Prerequisites: PERF 101; junior or senior classification.

PERF 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Directed Studies in specific problems in identified areas of performance studies. May be taken for credit up to 3 hours.
Prerequisites: Approval of instructor and department head; PERF majors and minors only.

PERF 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in performance studies. May be repeated for credit.
Prerequisite: Approval of instructor.

PERF 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in performance studies. May be taken two times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

PERF 492 Cooperative Education in Performance Studies
Credits 0 to 3. 0 to 3 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; technical report on a related subject area approved by the instructor. May be taken two times for credit.
Prerequisites: PERF 101; junior or senior classification.

PETE - Petroleum Engineering (PETE)

PETE 201 Introduction to Petroleum Engineering
Credit 1. 1 Lecture Hour.
Overview and history of the petroleum industry and petroleum engineering; nature of oil and gas reservoirs, exploration and drilling, formation evaluation, well completions and production, surface facilities, reservoir mechanics, improved oil recovery; impact of ethical, societal, environmental considerations; career development resources, including professional society.
Prerequisite: Approval of department head.

PETE 225 Introduction to Drilling Systems
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to petroleum drilling systems, including fundamental petroleum engineering concepts, quantities and unit systems, drilling rig components, drilling fluids, pressure loss calculations, casing, well cementing, and directional drilling.
Prerequisites: Grade of C or better in MATH 152, PHYS 206, and ENGR 216/PHYS 216 or PHYS 216/ENGR 216; grade of C or better in CHEM 107 and CHEM 117, or concurrent enrollment.

PETE 281 Capstone Seminar: Performance as Research
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Capstone senior project on an individually-chosen research topic, presentation of a performance or interdisciplinary project; major writing and oral communication components.
Prerequisites: Performance studies major; completion of all performance studies coursework or taken concurrently with this course; approval of instructor, advisor and department head.

PETE 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special problems in various areas of petroleum engineering assigned to individual students or to groups.
Prerequisites: Approval of department head.

PETE 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of petroleum engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

PETE 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of a faculty member in petroleum engineering. May be taken two times for credit. Registration in multiple sections of this course is possible within a given semester.
Prerequisites: Freshman or sophomore classification and approval of instructor.

PETE 300 Summer Practice
Credits 0.
Required. No Credit. Industry practice to familiarize the petroleum engineering student with practices and equipment of the petroleum industry. Approval of advisor required.
PETE 301 Petroleum Engineering Numerical Methods  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Use of numerical methods in a variety of petroleum engineering problems; numerical differentiation and integration; root finding; numerical solution of differential equations; curve fitting and interpolation; computer applications; introduction to the principles of numerical simulation methods.  
Prerequisites: Grade of C or better in MATH 308, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 311 Reservoir Petrophysics  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Systematic theoretical and laboratory study of physical properties of petroleum reservoir rocks; lithology, porosity, elastic properties, strength, acoustic properties, electrical properties, relative and effective permeability, fluid saturations, capillary characteristics and rock-fluid interactions such as adsorption and absorption.  
Prerequisites: Grade of C or better in MATH 251, PHYS 207, and ENGR 217/PHYS 217 or PHYS 217/ENGR 217; grade of C or better in CHEM 107, CHEM 117, and GEOL 104, or concurrent enrollment.

PETE 314 Transport Processes in Petroleum Production  
Credits 3. 3 Lecture Hours.  
Basics and applications of fluid mechanics (statics; mass, energy, momentum balances; laminar and turbulent flow, Reynolds number, Moody diagram; non-Newtonian fluid flow; multi-phase flow; flow in porous media, non-Darcy flow; heat transfer (heat conduction, convection, heat exchangers); emphasis on analogies and similarities within mass, energy and momentum transport.  
Prerequisites: Grade of C or better in MEEN 315, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 321 Formation Evaluation  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Well-log interpretation for formation evaluation of hydrocarbon-bearing reservoirs; basic rock physics principles; theory of tool operation; analysis of open hole logs and core measurements to estimate hydrocarbon reserves and petrophysical properties of the formation such as porosity, net pay thickness, water/hydrocarbon saturation, permeability and saturation-dependent capillary pressure; formation evaluation of clay-free and shaly-sand formations as well as basic introduction to formation evaluation of organic-shale formations.  
Prerequisites: Grade of C or better in PETE 301, PETE 310, PETE 311, and GEOL 404, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 322 Well Testing  
Credits 3. 3 Lecture Hours.  
Analysis of well performance under varied reservoir conditions including evaluation of unsteady, pseudo-steady and steady state flow; well testing methods used to determine well and reservoir parameters; applications to conventional and unconventional wells producing gas and/or liquids; fundamentals of preparing and operating well test equipment to monitor, measure and gather samples for evaluating well performance.  
Prerequisites: Grade of C or better in PETE 301, PETE 310, PETE 311, and GEOL 404, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 323 Fundamentals of Reservoir Engineering  
Credits 3. 3 Lecture Hours.  
Determination of reserves; material balance methods; aquifer models; fractional flow and frontal advance; displacement, pattern and vertical sweep efficiencies in waterfloods; enhanced oil recovery processes; design of optimal recovery processes; introduction and performance analysis of unconventional reservoirs.  
Prerequisites: Grade of C or better in PETE 301, PETE 310, PETE 311, and GEOL 404, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 324 Well Testing  
Credits 3. 3 Lecture Hours.  
Analysis of well performance under varied reservoir conditions including evaluation of unsteady, pseudo-steady and steady state flow; well testing methods used to determine well and reservoir parameters; applications to conventional and unconventional wells producing gas and/or liquids; fundamentals of preparing and operating well test equipment to monitor, measure and gather samples for evaluating well performance.  
Prerequisites: Grade of C or better in PETE 301, PETE 310, PETE 311, and GEOL 404, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 325 Petroleum Production Systems  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Petroleum operation and oil field equipment including onshore and offshore production systems; wellbore inflow and outflow and backpressure analysis; downhole completion and sand control equipment; artificial lift equipment and design; stimulation, workover/completion nomenclature; flow assurance; produced fluids, fluid separation and metering, safety systems, pressure boosting and monitoring.  
Prerequisites: Grade of C or better in PETE 301, PETE 310, and PETE 314, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 335 Technical Presentations I  
Credit 1. 1 Lecture Hour.  
Preparation of a written technical paper proposal on a subject related to petroleum technology and an oral presentation of the proposal in a formal technical conference format.  
Prerequisites: Grade of C or better in COMM 203, COMM 205, COMM 243, or ENGL 210; junior or senior classification.

PETE 336 Petroleum Technical Presentation I  
Credit 1. 3 Lab Hours.  
Preparation of a written technical paper on a subject related to petroleum technology.  
Prerequisites: Grade of C or better in ENGL 210; junior or senior classification, petroleum engineering majors only or approval of department head; Qatar campus.

PETE 337 Junior Student Paper Contest  
Credits 0.  
No Credit. Presentation of a technical proposal on a subject related to petroleum technology judged by petroleum professionals at the junior level departmental student paper contest. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: Grade of C or better in PETE 335.
PETE 353 Petroleum Project Evaluation  
**Credits 3. 3 Lecture Hours.**  
Economic analysis and investment decision methods in petroleum and mineral extraction industries; depletion, petroleum taxation regulations, and projects of the type found in the industry; mineral project evaluation case studies.  
**Prerequisites:** Grade of C or better in PETE 301 and PETE 310, or concurrent enrollment.

PETE 355 Drilling Engineering  
**Credits 3. 3 Lecture Hours.**  
Design and evaluation of well drilling systems; identification and solution of drilling problems; wellbore hydraulics, well control, casing design; well cementing directional drilling, offshore drilling.  
**Prerequisites:** Grade of C or better in CVEN 305, PETE 225, and PETE 314; grade of C or better in PETE 321 and PETE 325, or concurrent enrollment.

PETE 401 Reservoir Simulation  
**Credits 2. 1 Lecture Hour. 3 Lab Hours.**  
Solution of production and reservoir engineering problems using state-of-the-art commercial reservoir simulation software, using data commonly available in industry; emphasis on reservoir description, reservoir model design and calibration, production forecasting and optimization, economic analysis and decision making under uncertainty.  
**Prerequisites:** Grade of C or better in PETE 310, PETE 321, PETE 323, PETE 324, and PETE 353.

PETE 402 Integrated Asset Development  
**Credits 3. 1 Lecture Hour. 6 Lab Hours.**  
Capstone design encompassing previously acquired skills; project teams formed to solve practical petroleum engineering problems using current tools; technical content of the projects may include any combination of drilling and completion, formation evaluation, inflow/outflow design and analysis, and application of reservoir engineering principles.  
**Prerequisites:** Grade of C or better in PETE 310, PETE 321, PETE 323, PETE 324, and PETE 410.

PETE 404 Integrated Reservoir Modeling  
**Credits 3. 3 Lecture Hours.**  
Geophysical, geological, petrophysical and engineering data with geostatistical methods to create reservoir descriptions for dynamic reservoir modeling (simulation); geostatistical concepts such as variogram modeling, kriging and sequential Gaussian simulation; combines several techniques to quantify uncertainty in a realistic dynamic reservoir simulation.  
**Prerequisite:** Grade of C or better in PETE 401, or concurrent enrollment.

PETE 406 High Performance Drilling Design and Operational Practices  
**Credits 3. 3 Lecture Hours.**  
Preparation in achieving differentiating drilling performance in the most complex wells; includes training in the underlying physics of each type of performance limiter and real time and engineering practices to address the limitation; performance management workflows and change models required to effectively change the way organizations conduct work essential in achieving higher performance.  
**Prerequisite:** Grade of C or better in PETE 355.

PETE 408 Probabilistic Reserves Evaluation  
**Credits 3. 3 Lecture Hours.**  
Oil and gas reserves definitions and reporting regulations; probabilistic reserves estimation methods; unconventional resources characterization; reserves valuation techniques.  
**Prerequisite:** Grade of C or better in PETE 353 or approval of instructor.

PETE 409 Enhanced Oil Recovery  
**Credits 3. 3 Lecture Hours.**  
Fundamentals and theory of enhanced oil recovery; polymer flooding, surfactant flooding, miscible gas flooding and steam flooding; application of fractional flow theory; strategies and displacement performance calculations.  
**Prerequisites:** Grade of C or better in PETE 310 or approval of instructor.

PETE 410 Production Engineering  
**Credits 3. 3 Lecture Hours.**  
Fundamental production engineering design, evaluation and optimization for oil and gas producing well; well deliverability; formation damage and skin analysis; well completion selection; technologies that improve oil and gas well performance including artificial lift and well stimulation.  
**Prerequisites:** Grade of C or better in PETE 321, PETE 323, PETE 324 and PETE 325.

PETE 412 Surface Production Facilities  
**Credits 3. 3 Lecture Hours.**  
Overview of separation and treatment of production fluid; fundamentals of gas-liquid separation; design and performance analysis of two- and three-phase separators; oil desalting, sweetening and stabilization; water treatment; overview of gas separation, dehydration and sweetening.  
**Prerequisite:** Senior classification or approval of instructor; Qatar campus.

PETE 413 Natural Gas Engineering  
**Credits 3. 3 Lecture Hours.**  
Flow of natural gas in reservoirs and wellbores and gathering systems; deliverability testing; production surveillance and monitoring; production forecasting, flow measurement; and compressor sizing.  
**Prerequisites:** Grade of C or better in PETE 233, PETE 324, and PETE 325.

PETE 416 Solving Common Production Engineering Problems  
**Credits 3. 3 Lecture Hours.**  
Application of petroleum engineering tools, methods and techniques to solve real problems that petroleum engineers encounter in producing individual wells; focus primarily on problems associated with single-phase gas wells and uses Microsoft Excel to solve many of these problems.  
**Prerequisite:** Grade of C or better in PETE 410.

PETE 418 Deterministic Reserves Evaluation  
**Credits 3. 3 Lecture Hours.**  
Oil and gas reserves definitions and reporting regulations; deterministic estimation methods; unconventional resources characterization; reserves valuation techniques.  
**Prerequisite:** Grade of C or better in PETE 353 or approval of instructor.

PETE 435 Technical Presentations II  
**Credit 1. 1 Lecture Hour.**  
Preparation of a written technical paper on a subject related to petroleum technology and an oral presentation of the paper in a formal technical conference format.  
**Prerequisites:** PETE 337.

PETE 436 Petroleum Technical Presentation II  
**Credit 1. 3 Lab Hours.**  
Preparation of a written technical paper on a subject related to petroleum technology and an oral presentation of the paper in a formal technical conference format.  
**Prerequisites:** Grade of C or better in PETE 336; senior classification, petroleum engineering majors only or approval of department head; Qatar campus.
PETE 437 Senior Student Paper Contest
Credits 0.
No credit. Presentation of a technical petroleum engineering topic judged by petroleum professionals at the senior level departmental student paper contest. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Grade of C or better in PETE 435.

PETE 453 Petroleum Entrepreneurship
Credits 3. 3 Lecture Hours.
Exploration of the various aspects of entrepreneurship with a focus on petroleum asset valuation and prospect analysis in the energy sector; exposure to all aspects of the journey including business idea generation, raising early stage capital, staffing the enterprise, developing the business plan and selling the concept to investors.
Prerequisites: Grade of C or better in PETE 353.

PETE 485 Directed Studies
Credits 1 to 5. 1 to 5 Other Hours.
Special problems in various phases of petroleum engineering assigned to individual students or to groups.
Prerequisites: Junior or senior classification and approval of department head.

PETE 489 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified field of petroleum engineering. Approval of instructor. May be repeated for credit.

PETE 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of a faculty member in petroleum engineering. May be taken two times for credit. Registration in multiple sections of this course is possible within a given semester.
Prerequisites: Junior or senior classification and approval of instructor.

PHIL - Philosophy (PHIL)

PHIL 107 Introduction to the Health Humanities
Credits 3. 3 Lecture Hours.
Introduction to the methods and approaches of the health humanities; exposure to key scholarship in this field as well as major methods and approaches; application of such skills to the analysis of cultural case studies such as illness narratives or contemporary debates in scientific bioethics.
Cross Listing: COMM 107, ENGL 107, and HHUM 107.

PHIL 111 Contemporary Moral Issues
Credits 3. 3 Lecture Hours.
(PHIL 2306) Contemporary Moral Issues. Representative ethical positions and their application to contemporary social problems; also taught at Galveston campus.

PHIL 205 Technology and Human Values
Credits 3. 3 Lecture Hours.
Interaction of personal and societal values with technology and man's self-image, the future and value change.

PHIL 208 Philosophy of Education
Credits 3. 3 Lecture Hours.
Basic social ideas and concepts of human nature in Western civilization; their implications for theories of education.

PHIL 220 Introduction to Logic
Credits 3. 3 Lecture Hours.
(PHIL 2303) Introduction to Logic. Introduction to formal methods of deductive and inductive logic including, but not limited to, truth-tables, formal deduction and probability theory; also taught at Galveston campus.

PHIL 251 Introduction to Philosophy
Credits 3. 3 Lecture Hours.
(PHIL 1301) Introduction to Philosophy. Perennial problems of philosophy such as the existence of God, the mind/body relationship, the limits of knowledge, the foundations of moral judgment, man and the state; also taught at Galveston campus.

PHIL 252/AFST 252 Introduction to Hip-Hop Philosophy
Credits 3. 3 Lecture Hours.
Introduction to philosophy by way of the major themes and subjects of Hip-Hop; critical advocacy of various philosophical ideals.
Cross Listing: AFST 252/PHIL 252.

PHIL 255 C.S. Lewis: Faith and Philosophy
Credits 3. 3 Lecture Hours.
Methods and subject matter of philosophy through the writings of C.S. Lewis; includes reason, science, imagination, faith, problem of evil, atonement and ethics.

PHIL 282 Ethics in a Digital Age
Credits 3. 3 Lecture Hours.
Exploration of the intersection between ethical and social theories, principles, and values and the interconnected digital world; examination of the interplay between these domains for topics such as cybercrime, privacy, surveillance, security, intellectual property rights, artificial intelligence, cyber warfare, internet governance, computing professionalism, and cyber policy and law.

PHIL 283 Latin American Philosophy
Credits 3. 3 Lecture Hours.
Major philosophers in the history of Latin American philosophy, such as Unamuno, Ortega y Gasset, Vasconcelos, Caso and Gutiérrez.

PHIL 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed studies in specific problem areas of philosophy.
Prerequisite: Approval of department head.

PHIL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of philosophy. May be repeated for credit.
Prerequisite: Approval of instructor.

PHIL 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in the department of philosophy and humanities. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of department head.

PHIL 305 Philosophy of the Natural Sciences
Credits 3. 3 Lecture Hours.
Critical analysis of scientific methods and achievements; the nature and types of explanation, discovery and confirmation, models and theories.
Prerequisite: Junior or senior classification or approval of instructor.
PHIL 307 Philosophy of the Social Sciences
Credits 3. 3 Lecture Hours.
Nature and objectivity of the social sciences, their paradigms and patterns of explanation.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 314 Environmental Ethics
Credits 3. 3 Lecture Hours.
Moral basis of duties to preserve or protect plants, animals and environmental systems; foundations of environmental law and policy; the idea of nature in philosophy; critique of social and economic analyses of environmental values.
Prerequisite: Sophomore classification or approval of instructor; also taught at Galveston campus.

PHIL 315 Military Ethics
Credits 3. 3 Lecture Hours.
Major ethical issues in modern military practice: ethics of leadership, just war theory, killing of the innocent and the moral status of the rules of war.

PHIL 320 Philosophy of Mind
Credits 3. 3 Lecture Hours.
Relation of mind to body, nature of thought and knowing, the free will problem, death and immortality.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 330 Philosophy of Art
Credits 3. 3 Lecture Hours.
Theories of artistic creation and aesthetic response as exemplified in art forms such as painting, music, poetry, architecture, dance, theater, sculpture and motion pictures.

PHIL 331/RELS 331 Philosophy of Religion
Credits 3. 3 Lecture Hours.
Philosophical problems of Western religion such as the existence of God, the problem of evil, types of theism, rational, empirical and mystical approaches to God.
Cross Listing: RELS 331/PHIL 331.

PHIL 332 Social and Political Philosophy
Credits 3. 3 Lecture Hours.
Metaphysical commitments and political theory, the nature and proper ends of the state, freedom, equality, authority, and justice, considering such writers as Plato, Aristotle, Machiavelli, Locke, Rousseau, Marx, Dewey.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 334 Philosophy of Law
Credits 3. 3 Lecture Hours.
Traditional legal issues such as definitions of law, relationship between law and morality, and punishment considered from a legal perspective.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 341 Symbolic Logic
Credits 3. 3 Lecture Hours.
Elementary symbolic logic beginning with propositional calculus and first order predicate logic, and their applications.
Prerequisite: PHIL 240.

PHIL 342 Symbolic Logic II
Credits 3. 3 Lecture Hours.
Advanced topics in logic such as the theory of identity, higher order logics, logic of sets, elements of modal logic.
Prerequisite: PHIL 240 or PHIL 341, or approval of instructor.

PHIL 351 Theory of Knowledge
Credits 3. 3 Lecture Hours.
Major topics in epistemology such as the problem of induction, perception theory, memory and the problem of other minds.
Prerequisites: Junior or senior classification or approval of instructor.

PHIL 352/AFST 352 Africana Philosophy
Credits 3. 3 Lecture Hours.
Presentation of the seminal ideas of several influential Africana thinkers; recovery of the neglected traditions in which these thinkers locate themselves. May be taken three times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: AFST 352/PHIL 352.

PHIL 353/AFST 353 Radical Black Philosophies of Race and Racism
Credits 3. 3 Lecture Hours.
Critical evaluation of white supremacy, colonialism and the modern construction of race; examination of the historical background for contemporary theories of race.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: AFST 353/PHIL 353.

PHIL 361 Metaphysics
Credits 3. 3 Lecture Hours.
Topics concerning the fundamental nature of reality such as what exists, the mental and the physical, universals and individuals, space and time, God.
Prerequisites: Junior or senior classification or approval of instructor.

PHIL 371 Philosophy of Literature
Credits 3. 3 Lecture Hours.
Philosophical analysis of the major recurrent themes in world literature including fate, the meaning of tragedy, death, odyssey, good and evil, time and eternity, hope and salvation; works selected from a variety of cultures and historical periods.

PHIL 375 Philosophy of the Visual Media
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Aesthetic, ethical and epistemological issues of photography, cinema and video.

PHIL 376/FILM 376 Philosophy, Film and Evil
Credits 3. 3 Lecture Hours.
Application of philosophical methods and analyses to the medium of film; survey of various depictions and treatments of evil within the genre of science fiction; investigation of depictions and treatments of evil arising from consideration of human encounters with alien others.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FILM 376/PHIL 376.

PHIL 381 Ethical Theory
Credits 3. 3 Lecture Hours.
Values and conduct such as moral relativism, self-interest, utilitarianism, rules, nature of valuation, ethical language and argumentation.
Prerequisite: Junior or senior classification or approval of instructor; also taught at Galveston campus.

PHIL 409/WGST 409 Studies in Gender and Philosophy
Credits 3. 3 Lecture Hours.
Analysis, from a gender-studies perspective, of a single figure or concept in the history of philosophy. May be repeated 1 time for credit with a different focus.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: WGST 409/PHIL 409.
PHIL 410 Classical Philosophy
Credits 3. 3 Lecture Hours.
Major philosophers from 600 B.C. to the end of the third century A.D. including the Pre-Socratics, Socrates, Plato, Aristotle, Hellenistic and Roman philosophy and the Neo-Platonists.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 411 Medieval Philosophy
Credits 3. 3 Lecture Hours.
Major philosophers from the early Christian centuries through the 14th century, emphasizing such writers as Augustine, Aquinas, Duns Scotus and William of Ockham.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 412 Seventeenth-Century Philosophy
Credits 3. 3 Lecture Hours.
Significant seventeenth-century texts in metaphysics, epistemology, moral psychology, and political philosophy; authors such as Descartes, Hobbes, Spinoza, Leibniz, and Locke.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 413 Eighteenth-Century Philosophy
Credits 3. 3 Lecture Hours.
Significant eighteenth-century texts from philosophers such as Berkeley, Rousseau, Hume, and Kant.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 414 Nineteenth Century Philosophy
Credits 3. 3 Lecture Hours.
Contributions of such philosophers as Hegel, Marx, Kierkegaard, Nietzsche, Husserl, Mill and Bradley.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 415 American Philosophy
Credits 3. 3 Lecture Hours.
The thought of philosophers such as Peirce, James, Royce, Santayana, Mead, Dewey and Whitehead.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 416 Recent British and American Philosophy
Credits 3. 3 Lecture Hours.
Major philosophers in contemporary Anglo-American thought such as Moore, Russell, Wittgenstein, Ayer, Quine, Austin and Ryle.
Prerequisites: PHIL 240.

PHIL 417 Phenomenology
Credits 3. 3 Lecture Hours.
Phenomenology from its nineteenth-century origins to the present; authors such as Brentano, Husserl, Scheler, Heidegger, Merleau-Ponty, Levinas, Henry, Marion.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 418 Existentialism
Credits 3. 3 Lecture Hours.
Existentialism from its nineteenth-century origins to the present; philosophers such as Kierkegaard, Nietzsche, Buber, Rosenzweig, Sartre, de Beauvoir, and Camus.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 419 Current Continental Philosophy
Credits 3. 3 Lecture Hours.
Major thinkers concerned with ‘postmodern’ topics in hermeneutics, poststructuralism, critical theory, deconstructionism, contemporary Marxist strategies, semiotics and feminist theory.
Prerequisite: Junior classification or approval of instructor.

PHIL 420 Philosophy of Language
Credits 3. 3 Lecture Hours.
The nature of language; the various uses of language and their philosophical import; the nature of meaning, truth, reference and issues surrounding formal representations of natural languages.
Prerequisites: PHIL 240 and junior or senior classification; or approval of instructor.

PHIL 421 Philosophical Inquiry in Schools
Credits 3. 3 Lecture Hours.
In-depth engagement with the theory and practice of pre-college (K-12) philosophy.
Prerequisites: Junior or senior classification or approval of instructor.

PHIL 422 Modern Jewish Thought and Philosophy
Credits 3. 3 Lecture Hours.
An overview of modern Jewish thought and philosophy spanning Jewish European thinkers from the 18th century to the 20th century.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 464/PHIL 464.

PHIL 423 Ethics and Engineering
Credits 3. 3 Lecture Hours.
Development of techniques of moral analysis and their application to ethical problems encountered by engineers, such as professional employee rights and whistle blowing; environmental issues; ethical aspects of safety, risk and liability and conflicts of interest; emphasis on developing the capacity for independent ethical analysis of real and hypothetical cases.
Prerequisite: Junior classification.
Cross Listing: ENGR 482/PHIL 482.

PHIL 424 Philosophy of Language
Credits 3. 3 Lecture Hours.
The nature of language; the various uses of language and their philosophical import; the nature of meaning, truth, reference and issues surrounding formal representations of natural languages.
Prerequisites: PHIL 240 and junior or senior classification; or approval of instructor.

PHIL 425 Philosophical Inquiry in Schools
Credits 3. 3 Lecture Hours.
In-depth engagement with the theory and practice of pre-college (K-12) philosophy.
Prerequisites: Junior or senior classification or approval of instructor.

PHIL 426 Modern Jewish Thought and Philosophy
Credits 3. 3 Lecture Hours.
An overview of modern Jewish thought and philosophy spanning Jewish European thinkers from the 18th century to the 20th century.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 464/PHIL 464.

PHIL 427 Ethics and Engineering
Credits 3. 3 Lecture Hours.
Development of techniques of moral analysis and their application to ethical problems encountered by engineers, such as professional employee rights and whistle blowing; environmental issues; ethical aspects of safety, risk and liability and conflicts of interest; emphasis on developing the capacity for independent ethical analysis of real and hypothetical cases.
Prerequisite: Junior classification.
Cross Listing: ENGR 482/PHIL 482.

PHIL 428 Medical Ethics
Credits 3. 3 Lecture Hours.
Critical analysis of major ethical issues in medicine including truth-telling, confidentiality, paternalism, genetics, abortion, infanticide, euthanasia and social justice in health care.

PHIL 429 Ethics and Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Development of techniques of moral analysis and their application to ethical problems encountered by engineers, such as professional employee rights and whistle blowing; environmental issues; ethical aspects of safety, risk and liability and conflicts of interest; emphasis on developing the capacity for independent ethical analysis of real and hypothetical cases.
Prerequisite: Junior classification.
Cross Listing: ENGR 482/PHIL 482.

PHIL 430 Professional Internship
Credits 0 to 6. 0 to 6 Other Hours.
Prerequisite: Approval of instructor and department head.

PHIL 431 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Prerequisite: Approval of department head.

PHIL 432 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Prerequisite: Approval of instructor.

PHIL 433 Ethical Issues in...
PHLT 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in the department of philosophy and humanities. May be taken two times for credit.
Prerequisites: Junior or senior classification and approval of dean of college.

PHLT 497 Independent Honors Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed independent studies in specific philosophical problems.
Prerequisites: Junior or senior classification either as Honors students or with overall GPR of 3.25; letter of approval from head of student's major department.

**PHLT - Public Health (PHLT)**

**PHLT 270 Broad Street Learning Community I**
Credits 3. 3 Lecture Hours.
Introduction to the program, development of critical thinking skills and international perspectives; introductory for the Public Health Studies Broad Street Honors Learning Community.
Prerequisites: Admission to Broad Street Society Honors Learning Community; public health major.

**PHLT 289 Special Topics In...**
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of public health. May be taken three times for credit.
Prerequisite: PHLT major or approval of instructor.

**PHLT 301 Public Health Concepts**
Credit 1. 1 Lecture Hour.
Familiarization with public health including aspects such as different disciplines within the profession; local, national and international agencies that have interest in public health and public health code of ethics.

**PHLT 302 Foundations of Public Health**
Credits 3. 3 Lecture Hours.
History, philosophy, development and careers of public health; core values, ethics, concepts, functions and essential services of public health; population health and health improvement.
Prerequisites: Public health major or minor, junior or senior classification, or approval of instructor.

**PHLT 303 Social Context of Population Health**
Credits 3. 3 Lecture Hours.
Exploration of social determinants of population health and the socio-cultural roots of health improvement; socio-economic, behavioral and other factors that impact human health and contribute to health improvement and health disparities.
Prerequisites: Public health major or minor, junior or senior classification, or approval of instructor.

**PHLT 304 Biological Basis of Public Health**
Credits 3. 3 Lecture Hours.
Biological mechanisms in individuals and populations affecting human health and disease; adverse health events including diseases, exposure to pathogens and toxins, and nutritional deficiencies.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

**PHLT 305 Epidemiology in Public Health**
Credits 3. 3 Lecture Hours.
Principles of epidemiology, a systematic approach to collecting and evaluating information on distributions of health outcomes in populations; history of epidemiology, descriptive epidemiology, epidemiologic methods, association and causation, evidence-based public health and applications.
Prerequisites: Public health major or minor, junior or senior classification, or approval of instructor.

**PHLT 306 Border Health**
Credits 3. 3 Lecture Hours.
United States-Mexico border public health system; includes issues important to public health at the border; addresses health challenges.
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

**PHLT 307 Public Health in the Global Context**
Credits 3. 3 Lecture Hours.
Frameworks for understanding population health on a global scale; physical, social, cultural, geographic, political and economic interactions and interdependencies that influence global population health status.
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

**PHLT 308 Comparative Global Health Systems**
Credits 3. 3 Lecture Hours.
Public health issues from population health and comparative perspectives at the global level; exploration of different public health systems in developing and developed countries.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

**PHLT 309 Population Health Promotion**
Credits 3. 3 Lecture Hours.
Major issues in population health promotion, including applying the concept of social determinants of health: the socio-economic, behavioral, and other factors that impact human health to address population health issues.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

**PHLT 310 Public Health Writing**
Credit 1. 1 Lecture Hour.
Strategies to become more familiar with types of writing required as public health students or public health professionals; strengthens and increases general writing skills; establishes a foundation for continued development in writing. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

**PHLT 311 Narrative Approach to Public Health**
Credit 1. 1 Lecture Hour.
Familiarization with the writing style required for public health; instruction in writing styles and narrative techniques to increase and strengthen writing abilities in public health disciplines such as environmental and occupational health, health promotion and community health sciences, health policy and management, epidemiology and biostatistics. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.
PHLT 313 Health Care and Public Health System  
Credits 3. 3 Lecture Hours.  
Two distinct systems – health care system: an individual and medical services model and the public health system: population level disease prevention and health education.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 314 Public Health Data Management and Assessment I  
Credits 2. 2 Lecture Hours.  
Familiarization with using the CDC software Epi-Info for managing, analyzing and assessing population health data; focus on using Epi-Info to produce descriptive data reports including tables and graphs.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 315 Public Health Data Management and Assessment II  
Credits 2. 2 Lecture Hours.  
Continuation of PHLT 314; familiarization with using the CDC software Epi-Info for managing, analyzing and assessing population health data; focus on using Epi-Info to generate inferential statistics such as confidence intervals and p-values.  
Prerequisite: Public health major; PHLT 314; or approval of instructor.

PHLT 330 The Environment and Public Health  
Credits 3. 3 Lecture Hours.  
Environmental exposures and population health; public health core knowledge; includes methods for defining environmental contamination; identifying contaminants, pathogens and toxins; assessing risks and causality; determining health impact; methods to decrease exposures.  
Prerequisite: Public health major or minor, junior or senior classification, or approval of instructor.

PHLT 331 Occupational Safety and Health I  
Credits 3. 3 Lecture Hours.  
Regulations and topics of relevance to occupational health professionals; includes legislation and regulations, workers’ compensation, accident investigation, industrial hygiene, ergonomics and fire prevention with an emphasis on the health professionals’ role.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 332 Occupational Safety and Health II  
Credits 3. 3 Lecture Hours.  
Occupational safety and health topics including behavior-based safety, workplace violence, preparedness, hazardous materials, construction, transportation, required written programs and professional resources.  
Prerequisite: Public health major; PHLT 331; or approval of instructor.

PHLT 333 Accident Investigation  
Credits 3. 3 Lecture Hours.  
Principles of accident investigation and how accidents happen in the workplace; integrates procedural, systematic, corrective and formative applications for the occupational health professional.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 334 Fire Safety and Workplace Hazards  
Credits 3. 3 Lecture Hours.  
Principles of fire safety and other workplace hazards such as electrical hazards, chemical hazards, respiratory hazards, falls, confined spaces, bloodborne pathogens, hearing loss, ergonomics and machine hazards.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 335 Hazardous Materials  
Credits 3. 3 Lecture Hours.  
Principles of managing materials in the workplace; role of the health and safety professional in hazardous material management and hazard communication.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 370 Broad Street Learning Community II  
Credits 3. 3 Lecture Hours.  
International perspectives on public health and healthcare, comparative historical, political and cultural effects on public health; second course in the Broad Street Learning Community sequence.  
Prerequisites: Grade of B or better in PHLT 270.

PHLT 410 Public Health Communication  
Credits 3. 3 Lecture Hours.  
Exploration of different communication approaches for addressing public health challenges; basic concepts of public health-specific communication, including risk communication, the use of mass media and evaluation of public health communication programs.  
Prerequisites: PHLT 310; public health major; or approval of instructor.

PHLT 411 Project Management in Public Health  
Credits 3. 3 Lecture Hours.  
Exploration of successful project management and administration in public health settings; includes project development, budgeting and implementation.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 412 Health Advocacy and Policy  
Credits 3. 3 Lecture Hours.  
Concepts of legal, ethical, economic and regulatory dimensions of public health policy; the roles, influences and responsibilities of the different agencies and branches of government; advocacy for the public’s health at all levels of society.  
Prerequisites: Grade of C or better in PHLT 313; public health major; junior or senior classification; or approval of instructor.

PHLT 413 Public Health Informatics  
Credits 3. 3 Lecture Hours.  
Broad range of knowledge and skills encompassed by PHI; bridging public health data/information needs, information technology and stakeholders; creating user requirements to guide system design; evidence-based public health; electronic health records.  
Prerequisite: PHLT 302 or approval of instructor.

PHLT 414 Applications of Epidemiology in Public Health  
Credits 3. 3 Lecture Hours.  
Application of the concept of distribution, determinants and measurement of health and disease outcomes in populations in real life situations through lectures, case studies and presentations.  
Prerequisites: Public health major; PHLT 305; or approval of instructor.

PHLT 415 Emergency Management in Public Health  
Credits 3. 3 Lecture Hours.  
Principles and practices of emergency management at the local, state, national and international levels; explores stages of emergency management such as preparedness, response and recovery; includes population health and the basic processes, approaches and interventions; emergency management systems in the United States; actors in emergency management.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.
PHLT 416 Public Health Leadership and Ethics  
Credits 3. 3 Lecture Hours.  
Overview of major leadership and ethical theories, current leadership and ethical issues and their impact on public health practice.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 432 Human Factors and Ergonomic Health and Safety  
Credits 3. 3 Lecture Hours.  
Principles of ergonomics including principles of anatomy, physiology, instrument design, and work environments; emphasis on ergonomic design, implementing ergonomic programs.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 433 Industrial Inspections and Audit Techniques  
Credits 3. 3 Lecture Hours.  
Principles of conducting industrial audits for fire, safety and security; emphasis on the role of the health and safety professional, assessing safety programs and meeting regulatory requirements.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 434 Project Cost Benefit and Economics  
Credits 3. 3 Lecture Hours.  
Estimation and management of project costs; emphasis on improving accuracy of cost projection, making better modifications to cost on work in-progress.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 436 Infectious Disease in the Developing World: Risks, Challenges, and Solutions  
Credits 3. 3 Lecture Hours.  
Study of the challenges of infectious disease control in the developing world; topics include common infectious diseases, how they spread, social and economic consequences and the factors that influence prevalence.  
Prerequisites: Public Health Studies major; junior or senior classification, or approval of instructor.

PHLT 441 Strategies for Population Health Improvement  
Credits 3. 3 Lecture Hours.  
The three core functions of public health and strategies for improving population health; case studies exploring multiple types of interventions; involves class discussion, break-out groups and group assignments.  
Prerequisite: PHLT 302; PHLT 411 or concurrent enrollment; public health major; junior or senior classification; or approval of instructor.

PHLT 445 Applications of Public Health  
Credits 3. 3 Lecture Hours.  
Combines knowledge and skills related to public health experience and coursework to address public health issues; process of developing, implementing and evaluating public health interventions; role assignment and responsibilities in group assignments and presentations.  
Prerequisite: Grade of C or better in PHLT 441; public health major; junior or senior classification; or approval of instructor.

PHLT 470 Global Public Health Systems and Practice Experiences  
Credits 3. 3 Other Hours.  
Study abroad experiences led by School of Public Health faculty in select countries; lectures prior to departing and lectures and classes in country; engage in public health practice and research activities in country; visit public health agencies and programs in country.  
Prerequisites: Junior or senior classification; approval of instructor.

PHLT 484 Public Health Studies Field Experience  
Credits 3. 3 Other Hours.  
On the job training in the area of public health studies industry; development of objectives and goals; evaluation by supervisor required.  
Prerequisites: Approval of instructor; junior or senior classification; public health major with a minimum overall 3.0 TAMU GPA.

PHLT 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed study of selected problems in the area of public health studies. May be taken four times for credit.  
Prerequisite: Approval of instructor.

PHLT 489 Special Topics In...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of public health. May be repeated for credit.  
Prerequisites: PHLT 485; junior or senior classification and approval of instructor.

PHLT 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in public health studies. May be taken two times for credit.  
Prerequisite: PHLT 491; junior or senior classification and approval of instructor.

PHYS 101 Freshman Physics Orientation  
Credit 1. 1 Lecture Hour.  
Critical thinking skills and problem solving in physics: time management and teaming skills.  
Prerequisite: Physics majors; non-majors requires approval of instructor.

PHYS 102 Freshman Physics Orientation II  
Credit 1. 1 Lecture Hour.  
Critical thinking skills and problem solving in physics: time management and teaming skills. For physics majors. Registration by non-majors requires approval of instructor.

PHYS 109/ASTR 109 Big Bang and Black Holes  
Credits 3. 3 Lecture Hours.  
Designed to give an intuitive understanding of the Big Bang and Black Holes, without mathematics, and de-mystify them for the non-scientist.  

PHYS 119/ASTR 119 Big Bang and Black Holes: Laboratory Methods  
Credit 1. 2 Lab Hours.  
Hands-on understanding of the concepts surrounding the Big Bang and Black Holes; emphasis on the evidence-based decision making process, methods and presentation; for non-scientists. Companion course for ASTR 109/PHYS 109/PHYS 109/ASTR 109.  
Prerequisite: ASTR/PHYS 109/ASTR 109 or registration therein.  
Cross Listing: ASTR 119/PHYS 119.

PHYS 123 Physics for Future Presidents  
Credits 3. 3 Lecture Hours.  
Physics needed to be an effective policy maker or world leader but appropriate for any citizen, since all citizens need to understand the world in which they live and work; fundamental principles of physics made comprehensible and usable by those not in science- or math-related fields.  
Prerequisite: Basic math skills; also taught at Galveston campus.
PHYS 125 Soft Matter Physics for Non-physicists  
**Credits 3.** 3 Lecture Hours. 2 Lab Hours.  
Modern physics in action with hands-on physics experience in simple experiments for non-physicists majors; introduction to thermodynamics and soft matter physics; heat, temperature, thermodynamic efficiency, phase transitions, mechanical properties of soft matter, heat transfer mechanisms; physical measurements.

**PHYS 148 Introduction to Quantum Mechanics**  
**Credits 3.** 3 Lecture Hours.  
The basic level of concepts of quantum mechanics such as wave-particle duality, complementarity, quantum interference and entanglement, and their applications to fields such as quantum communication and quantum computing  
**Prerequisites:** High school physics and calculus.

**PHYS 201 College Physics**  
**Credits 4.** 3 Lecture Hours. 3 Lab Hours.  
(PHYS 1301 and 1101, 1401) College Physics. Fundamentals of classical mechanics, heat, and sound. Primarily for architecture, education, premedical, predental, and preveterinary medical students; also taught at Galveston campus.

**PHYS 202 College Physics**  
**Credits 4.** 3 Lecture Hours. 3 Lab Hours.  
(PHYS 1302 and 1102, 1402) College Physics. Continuation of PHYS 201. Fundamentals of classical electricity and light; introduction to contemporary physics.  
**Prerequisite:** PHYS 201; also taught at Galveston campus.

**PHYS 205 Concepts of Physics**  
**Credits 4.** 3 Lecture Hours. 3 Lab Hours.  
General survey physics course for K-8 preservice teachers integrating physics content and laboratory activities relevant to physics-related subject matter included in the current Texas and national standards for elementary school science; includes aspects of mechanics, waves, electricity, magnetism and modern physics.  
**Prerequisite:** Major in interdisciplinary studies or interdisciplinary technology or approval of instructor.

**PHYS 206 Newtonian Mechanics for Engineering and Science**  
**Credits 3.** 3 Lecture Hours.  
**Prerequisites:** Grade of C or better in MATH 151 or MATH 171, or equivalent; also taught at Galveston and Qatar campuses.

**PHYS 207 Electricity and Magnetism for Engineering and Science**  
**Credits 3.** 3 Lecture Hours.  
(PHYS 2326, PHYS 2526*) Electricity and Magnetism for Engineering and Science. Calculus-based electricity and magnetism; electromagnetic phenomena; basic laws of electricity and magnetism; science and engineering problems involving charges, electromagnetic fields, and electrical circuits.  
**Prerequisites:** Grade of C or better in PHYS 206; grade of C or better in MATH 152 or MATH 172 or equivalent; also taught at Galveston and Qatar campuses.

**PHYS 216/ENGR 216 Experimental Physics and Engineering Lab II - Mechanics**  
**Credits 2.** 1 Lecture Hour. 3 Lab Hours.  
Description and application of laws of physical motion to the solution of science and engineering problems; using sensing, control and actuation for experimental verification of physics concepts while solving engineering problems.  
**Prerequisites:** Grade of C or better in MATH 151 or MATH 171 or equivalent; grade of C or better in ENGR 102; grade of C or better and concurrent enrollment in PHYS 206; also taught at Galveston campus.  
**Cross Listing:** ENGR 216/PHYS 216.

**PHYS 217/ENGR 217 Experimental Physics and Engineering Lab III - Electricity and Magnetism**  
**Credits 2.** 1 Lecture Hour. 3 Lab Hours.  
Electromagnetism and electromechanical systems; use of sensing, control and actuation to demonstrate key physical relationships through the transducer relationships linking pressure, temperature and other physical stimuli to changes in electric and magnetic fields.  
**Prerequisites:** Grade of C or better in MATH 152 or MATH 172, or equivalent; grade of C or better in PHYS 206 or equivalent; grade of C or better in PHYS 216/ENGR 216 or ENGR 216/PHYS 216; grade of C or better and concurrent enrollment in PHYS 207; also taught at Galveston campus.  
**Cross Listing:** ENGR 217/PHYS 217.

**PHYS 221 Optics and Thermal Physics**  
**Credits 3.** 3 Lecture Hours.  
Wave motion and sound, geometrical and physical optics, kinetic theory of gases, laws of thermodynamics.  
**Prerequisites:** PHYS 207 or PHYS 208, or concurrent enrollment; MATH 221, MATH 251, or MATH 253, or concurrent enrollment; MATH 308 or concurrent enrollment; also taught at Qatar campus.

**PHYS 222 Modern Physics for Engineers**  
**Credits 3.** 3 Lecture Hours.  
Atomic, quantum, relativity and solid state physics.  
**Prerequisites:** PHYS 207 or PHYS 208; MATH 308 or concurrent enrollment; also taught at Qatar campus.

**PHYS 225 Electronic Circuits and Applications**  
**Credits 3.** 1 Lecture Hour. 4 Lab Hours.  
Linear circuit theory and applications of solid-state diodes, bipolar and field-effect transistors, operational amplifiers and digital systems.  
**Prerequisites:** PHYS 207 and PHYS 227, or PHYS 208; MATH 308.

**PHYS 226 Physics of Motion Laboratory for the Sciences**  
**Credit 1.** 2 Lab Hours.  
(PHYS 2125, PHYS 2425*) Physics of Motion Laboratory for the Sciences. The first semester laboratory to accompany a two-semester course sequence in introductory physics; topics include material covered in a typical calculus-based introductory physics course on the principles of mechanics and motion.  
**Prerequisites:** MATH 151 or MATH 171; concurrent enrollment in PHYS 206; also taught at Galveston campus.

**PHYS 227 Electricity and Magnetism Laboratory for the Sciences**  
**Credit 1.** 2 Lab Hours.  
(PHYS 2126, PHYS 2526*) Electricity and Magnetism Laboratory for the Sciences. The second semester laboratory to accompany a two-semester course sequence in introductory physics; topics include material covered in a typical calculus-based introductory physics course on the principles of electricity and magnetism.  
**Prerequisites:** MATH 152 or MATH 172; PHYS 206 or PHYS 218; concurrent enrollment in PHYS 207; also taught at Galveston campus.
PHYS 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum; intended for use as lower-level credit.
Prerequisite: Approval of instructor.

PHYS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 6 Lab Hours.
Selected topics in an identified area of physics. May be repeated for credit.
Prerequisite: Approval of instructor.

PHYS 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in physics. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

PHYS 302 Advanced Mechanics I
Credits 3. 3 Lecture Hours.
Classical mechanics of particles and rigid bodies; review of Newtonian mechanics and foundations of Lagrangian and Hamiltonian formalism.
Prerequisite: PHYS 309 and PHYS 331; PHYS 332 or concurrent enrollment, or approval of instructor.

PHYS 303 Advanced Mechanics II
Credits 3. 3 Lecture Hours.
Applications of Lagrangian and Hamiltonian methods to selected problems of classical mechanics.
Prerequisite: PHYS 302.

PHYS 304 Advanced Electricity and Magnetism I
Credits 3. 3 Lecture Hours.
Electrostatics; dielectrics; electrical current and circuits; magnetic fields and materials; induction; Maxwell's equations.
Prerequisites: PHYS 331; PHYS 332 or concurrent enrollment, or approval of instructor.

PHYS 305 Advanced Electricity and Magnetism II
Credits 3. 3 Lecture Hours.
Radiation and optics. Electromagnetic waves; radiation; reflection and refraction; interference; diffraction; special relativity applied to electrodynamics.
Prerequisite: PHYS 304.

PHYS 309 Modern Physics
Credits 3. 3 Lecture Hours.
Special relativity; concepts of waves and particles; introductory quantum mechanics.
Prerequisite: PHYS 221; also taught at Qatar campus.

PHYS 327 Experimental Physics I
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Laboratory experiments in modern physics and physical optics with an introduction to current, state-of-the-art recording techniques.
Prerequisites: PHYS 225; PHYS 309.

PHYS 328 Experimental Physics II
Credit 1. 1 Lecture Hour. 1 Lab Hour.
Laboratory experiments in modern physics and physical optics with an introduction to current, state-of-the-art recording techniques.
Prerequisites: PHYS 327 or concurrent enrollment.

PHYS 331 Theoretical Methods for Physicists I
Credits 3. 3 Lecture Hours.
Applications involving vectors; vector and additional methods for advanced electricity and magnetism; relationship and solutions of classical wave equation, heat equation, and Schrodinger equation; harmonic motion on finite or periodic lattice and in continuum; tensor and matrix notation in classical mechanics and electricity and magnetism.
Prerequisite: PHYS 221 or approval of instructor.

PHYS 332 Theoretical Methods for Physicists II
Credits 3. 3 Lecture Hours.
Methods to solve the important equations of theoretical physics, emphasizing the effects of boundary conditions and quantization on their solutions and restricted to the essential physical symmetries associated with free space, spheres, cylinders, and rectangles; if time permits, introduction to symmetries in physics and to asymptotic methods.
Prerequisites: PHYS 331; restricted to physics majors.

PHYS 339 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in physics. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

PHYS 391 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in physics. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

PHYS 401 Computational Physics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to computational and simulation techniques widely used in physics applications and research, including trajectory integration, wave motion analysis, molecular dynamics, Monte Carlo methods, statistical mechanics of spin systems, phase transitions, quantum evolution, bound state problems, and variational methods.
Prerequisites: PHYS 332; knowledge of a high level language.

PHYS 408 Thermodynamics and Statistical Mechanics
Credits 4. 4 Lecture Hours.
Statistical method, macroscopic thermodynamics, kinetic theory, black body radiation, Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics.
Prerequisite: PHYS 412.

PHYS 412 Quantum Mechanics I
Credits 3. 3 Lecture Hours.
Postulates of wave mechanics; wave packets; harmonic oscillator; central field problem; hydrogen atom; approximation methods.
Prerequisites: PHYS 332; PHYS 309; PHYS 332; junior or senior classification.

PHYS 414 Quantum Mechanics II
Credits 3. 3 Lecture Hours.
Continuation of PHYS 412. Electron spin; addition of angular momenta; atomic structure; time dependent perturbations; collision theory; application of quantum mechanics to atomic, solid state, nuclear or high energy physics.
Prerequisite: PHYS 412.

PHYS 416 Physics of the Solid State
Credits 3. 3 Lecture Hours.
A survey of solid state physics; an introduction to crystal structures and the physics of electrons, lattice vibrations and phonons; applications to semiconductors; magnetism; superconductivity; physics of nanostructures; brief introduction to selected current topics in condensed matter physics.
Prerequisites: PHYS 304 and PHYS 412.

PHYS 418 High Energy Physics
Credits 3. 3 Lecture Hours.
A broad spectrum of elementary particle physics along with historical and recent publication, covering symmetry in quarks and leptons, fundamental interactions, relativistic kinematics, Feynman diagrams, Dirac equation, cross-sections for particle reactions, unification of fundamental forces, accelerators and detectors and other current topics.
Prerequisite: Grade of C or better in PHYS 309 or equivalent.
PHYS 425 Physics Laboratory  
Credits 2. 6 Lab Hours.  
Experiments in nuclear, atomic, and molecular physics using modern instrumentation and equipment of current research.  
Prerequisite: PHYS 327 or equivalent.

PHYS 426 Physics Laboratory  
Credits 2. 6 Lab Hours.  
Experiments in solid state and nuclear physics. Modern instrumentation and current research equipment are employed.  
Prerequisite: PHYS 327 or equivalent.

PHYS 485 Directed Studies  
Credits 1 to 4. 1 to 12 Other Hours.  
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum.  
Prerequisite: Approval of instructor; also taught at Galveston campus.

PHYS 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
0 to 4 Lab Hours.  
Selected topics in an identified field of physics. May be repeated for credit.  
Prerequisite: Approval of instructor.

PHYS 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in physics. May be repeated 3 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor; also taught at Qatar campus.

PLPA - Plant Pathology (PLPA)  

PLPA 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in plant pathology. May be repeated 3 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

PLPA 301 Plant Pathology  
Credits 3. 3 Lecture Hours.  
Introduction to fundamental principles of plant pathology; diagnosis, cause and control of plant diseases.  
Prerequisites: BIOL 113, BIOL 101, or BIOL 111.

PLPA 303 Plant Pathology Laboratory  
Credit 1. 2 Lab Hours.  
Isolation, identification of plant pathogens and clinical diagnosis and control of plant diseases.  
Prerequisite: PLPA 301 or registration therein.

PLPA 334 Turfgrass Pathology  
Credits 3. 3 Lecture Hours. 0 Lab Hours.  
Recognizing turfgrass problems and understanding biological mechanisms in the disease process; principles of disease management strategies.  
Prerequisite: Junior or senior classification.

PLPA 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special problems for advanced undergraduates to permit study of subject matter not available in existing courses.  
Prerequisites: PLPA 301 and prior approval of instructor or department head.

PLPA 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of plant pathology. May be repeated for credit.  
Prerequisite: PLPA 301 or approval of instructor.

PLPA 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in plant pathology. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

POLS - Political Science (POLS)  

POLS 200 Foundations of Political Science  
Credits 3. 3 Lecture Hours.  
Survey of the scholarly discipline of political science and its theoretical foundations, principal subfields, major research questions and modes of scholarship.

POLS 203 Introduction to Political Theory  
Credits 3. 3 Lecture Hours.  
Introduction to the study of political theory, with attention to major themes in the history of political thought; discussion of the nature of politics; examination of method in political theory and its relation to the discipline of political science.

POLS 206 American National Government  
Credits 3. 3 Lecture Hours.  
(GOV 2305) American National Government. Survey of American national government, politics, and constitutional development; also taught at Galveston and Qatar campuses.

POLS 207 State and Local Government  
Credits 3. 3 Lecture Hours.  
(GOV 2306) State and Local Government. Survey of state and local government and politics with special reference to the constitution and politics of Texas; also taught at Galveston and Qatar campuses.

POLS 209 Introduction to Political Science Research  
Credits 3. 3 Lecture Hours.  
Introduction to the philosophy and practice of social science and to modes of research in major subfields of political science.  
Prerequisite: Political science majors must have completed POLS 209 before they enroll in their last 18 hours of 300- and 400-level POLS courses. This means a student may take no more than 6 hours of upper division (300- and 400-level courses) before completing POLS 209. Enrollment is restricted to political science majors.

POLS 229 Introduction to Comparative Politics  
Credits 3. 3 Lecture Hours.  
A comparison of political institutions, processes and issues across a wide variety of political systems.
POLS 231 Introduction to World Politics
Credits 3. 3 Lecture Hours.
Analysis of contemporary world from point of view of nation-state; political problems, factors involved in foreign policies and relations of nations; also taught at Galveston campus.

POLS 232 Introduction to Public Policy
Credits 3. 3 Lecture Hours.
Introduction to public policy; social, economic, political and cultural contexts of public policy; study of policy analysis and policymakers; examines public problems, policy choice, and limits of governmental action; Galveston campus.

POLS 233 Politics and Policy in the United States
Credits 3. 3 Lecture Hours.
Survey of institutions of American government, mass political behavior, and policy fields of significant contemporary importance.

POLS 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual instruction in selected aspects of political science not adequately covered by other courses.
Prerequisite: Approval of department head.

POLS 289 Special Topics in...
Credits 3. 3 Other Hours.
Selected topics in an identified area of political science and public policy. May be taken for credit seven times.
Prerequisite: POLS 206 or approval of department head.

POLS 291 Research
Credits 0 to 6. 0 to 6 Other Hours.
Research conducted under the direction of a faculty member in political science. May be taken three times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

POLS 302/COMM 302 The Mass Media and Politics
Credits 3. 3 Lecture Hours.
Examination of mass media impact on politics and political behavior; and governmental impact on the mass media.
Prerequisite: POLS 206 or approval of department head; junior or senior classification.
Cross Listing: COMM 302/POLS 302.

POLS 304 Latino Politics in the United States
Credits 3. 3 Lecture Hours.
Survey of historical and contemporary issues in Latino politics in the U.S.; race and ethnicity in the context of U.S. politics; comparisons of racial and ethnic group experiences in the U.S. with those experienced by racial and ethnic groups elsewhere; Latino access to the political system through political participation.
Prerequisite: Junior or senior classification.

POLS 306 Contemporary Political Problems and Issues
Credits 3. 3 Lecture Hours.
Major contemporary political problems and issues with primary emphasis on the U.S. Each term one to three problems or issues will be examined in some depth. Students may register in up to but no more than two different sections of this course. May be repeated for credit.
Prerequisite: POLS 206 or approval of department head. NOTE: POLS 306 courses taken in a study abroad program may not count toward this limit; please consult with the undergraduate advisor.

POLS 308 Game Theoretic Methods in Political Science
Credits 3. 3 Lecture Hours.
Core concepts of game theory to study strategic interaction in politics; game theory using simple mathematical models to describe social situations, understand political and social phenomena; emphasis on model building skills and problem solving.
Prerequisites: POLS 206 and junior or senior classification or approval of department head.

POLS 309 Polimetrics
Credits 3. 3 Lecture Hours.
Theory, techniques, and application of quantitative analysis in political science; focus on quantitative techniques commonly used to evaluate empirical theories of politics.
Prerequisites: POLS 209 and 9 additional hours of political science or approval of instructor.

POLS 312 Ethnic Conflict
Credits 3. 3 Lecture Hours.
Examination of government institutions designed to structure ethnic relations; source of ethnic conflict; mechanisms to facilitate the peaceful resolution of ethnic conflict.
Prerequisite: Junior or senior classification.

POLS 313 Public Opinion
Credits 3. 3 Lecture Hours.
Role of public opinion in a democratic political system--its formation, properties and patterns, with special attention to problems of linking public opinion to public policy.
Prerequisite: POLS 206 or approval of department head.

POLS 314 Interest Groups
Credits 3. 3 Lecture Hours.
Role of interest groups in politics; types of groups and resources; internal dynamics; group strategies/tactics (including PACs); forms of indirect and direct lobbying; influence of groups in political arena.
Prerequisite: POLS 206 or approval of department head.

POLS 315 Political Parties
Credits 3. 3 Lecture Hours.
Organization, history, and activities of political parties and functions they serve in national, state and local politics in the United States and elsewhere.
Prerequisite: POLS 206 or approval of department head.

POLS 316 Urban Politics
Credits 3. 3 Lecture Hours.
Politics at the community level; urban and metropolitan political systems.
Prerequisites: POLS 206 and POLS 207 or approval of department head.

POLS 317/WGST 317 Women in Politics
Credits 3. 3 Lecture Hours.
Role of women in the political system; treatment of women in political theory; effect of law on women's status; women as political leaders; current policy issues of concern to women.
Prerequisite: POLS 206.
Cross Listing: WGST 317/POLS 317.

POLS 318 Theories of International Relations
Credits 3. 3 Lecture Hours.
Examination of major paradigms of international relations; focus on theory development and application to cases.
Prerequisites: POLS 206, POLS 209, and junior or senior classification or approval of department head.
POLS 319 The American Presidency
Credits 3.3 Lecture Hours.
The American Presidency and the primary relationships and responsibilities of the office, dealing with the public, decision making, influencing Congress, and implementing policy.
Prerequisite: POLS 206 or approval of department head.

POLS 320 Race and Politics in the United States
Credits 3.3 Lecture Hours.
The politics of race in the United States: contrast of the political experiences of racial groups with the ideals and realities of democratic political systems.
Prerequisites: POLS 206 and POLS 207 and junior or senior classification.

POLS 322 Western European Government and Politics
Credits 3.3 Lecture Hours.
Political institutions and ideas of major European countries. Prospects for political integration.
Prerequisite: POLS 206 or approval of department head.

POLS 323 Political Systems of Latin America
Credits 3.3 Lecture Hours.
Survey of the major features of the political process in Latin America; key political groups and sources and characteristics of their political power; studies of selected countries.
Prerequisite: POLS 206 or approval of department head.

POLS 324 Politics of Global Inequality
Credits 3.3 Lecture Hours.
Examination of the causes and consequences of economic inequality between rich and poor states; evaluation of competing explanations for poverty of less-developed countries; development strategies employed by poor states; and structure of global economic relations.
Prerequisite: Junior or senior classification.

POLS 325 African Politics
Credits 3.3 Lecture Hours.
Survey of African politics from pre-colonial period to contemporary era; examination of local experience of democracy, governance, economic development in light of varied colonial experiences, independence movements, international political economy, informal sources of political power.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 326 Government and Politics of Eastern Europe
Credits 3.3 Lecture Hours.
Political, social and economic transformations in the post-Communist Eastern and Southern European countries; examination of the interrelations between political, economic and social issues that impact the building of new governments and institutions in these countries.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 327 Congressional Politics
Credits 3.3 Lecture Hours.
Prerequisite: POLS 206 or approval of department head.

POLS 328 Globalization and Democracy
Credits 3.3 Lecture Hours.
Examination of the political and economic origins of globalization; effects of globalization on advanced industrial democracies; effect on less developed nations; evaluation of the economic, social, cultural and political consequences of globalization.
Prerequisite: Junior or senior classification.

POLS 333 International Cooperation
Credits 3.3 Lecture Hours.
Contemporary issues, problems, and solutions in international cooperation.
Prerequisites: POLS 206; junior or senior classification or approval of department head.

POLS 335 International Conflict
Credits 3.3 Lecture Hours.
Examination of major theoretical explanations of war and conflict resolution.
Prerequisites: POLS 206; junior or senior classification or approval of department head.

POLS 338 Government and Politics of the Former Soviet Union
Credits 3.3 Lecture Hours.
Major political issues of the post-communist transition in the former Soviet Union.
Prerequisite: POLS 206 or approval of department head.

POLS 340 Introduction to Public Administration
Credits 3.3 Lecture Hours.
American public administration; development of public service; the political and constitutional context; organization theory; leadership and decision-making; personnel and resource staff functions; administrative law and regulation; ethics and administrative accountability.
Prerequisite: POLS 206 or approval of department head; also taught at Galveston campus.

POLS 342 Politics and Bureaucracy
Credits 3.3 Lecture Hours.
Public bureaucracy in the context of a political environment; role of experts, the use of political power and problems of bureaucratic accountability and responsibility.
Prerequisite: POLS 206 or approval of department head.

POLS 347 Politics of Energy and the Environment
Credits 3.3 Lecture Hours.
U.S. energy and environmental problems and politics and the political, legal, and institutional factors influencing their development and implementation.
Prerequisites: POLS 206 or approval of department head; junior or senior classification or approval of instructor; also taught at Galveston campus.

POLS 349 Early Political Thought
Credits 3.3 Lecture Hours.
Political thought from Greek antiquity to Renaissance.
Prerequisite: POLS 206 or approval of department head.

POLS 350 Modern Political Thought
Credits 3.3 Lecture Hours.
Political thought from Machiavelli to Marx.
Prerequisite: POLS 206 or approval of department head.

POLS 352 Empirical Democratic Theory
Credits 3.3 Lecture Hours.
Examination of empirical political science theory about the nature and consequences of democratic government in the modern era; study of scientific theory that accounts for the rise, characteristics and behavior of democratic political systems.
Prerequisites: POLS 206, POLS 207, and POLS 209; junior or senior classification.
POLS 353 Constitutional Rights and Liberties
Credits 3. 3 Lecture Hours.
Legal issues, controversies and significant developments in constitutional rights and liberties, and the impact of these developments upon American politics, culture and social institutions.
Prerequisite: POLS 206 or approval of department head; also taught at Galveston campus.

POLS 355 United States Constitutional Development
Credits 3. 3 Lecture Hours.
Leading decisions of the Supreme Court. Trends in our constitutional development since 1789; expansion through judicial interpretation of powers delegated to national government.
Prerequisites: POLS 206 and HIST 105 or approval of department head.

POLS 357 National Judicial Politics
Credits 3. 3 Lecture Hours.
Political factors that influence judicial selection; decision making and policy-making roles and impact of the U.S. Supreme Court and Federal Court System.
Prerequisites: POLS 206, POLS 209, and junior or senior classification or approval of department head.

POLS 358 Comparative Judicial Politics
Credits 3. 3 Lecture Hours.
Survey of the major features of court systems of the world; examination of the role played by courts in the politics of selected nations of the world; comparison of judicial decision making in selected counties; the impact of courts in developing democracies.
Prerequisites: POLS 206 and 207, junior or senior classification.

POLS 359 American Political Thought
Credits 3. 3 Lecture Hours.
American political thought from colonial times to the present.
Prerequisite: POLS 206 or approval of department head.

POLS 362 Latin American Political Thought
Credits 3. 3 Lecture Hours.
Survey of various traditions in the history of Latin American political thought; key texts in the history of political theory in the Spanish-American continent.
Prerequisites: POLS 206; junior or senior classification or approval of instructor.

POLS 364 Global Political Thought
Credits 3. 3 Lecture Hours.
Global perspective on the history of political ideas and contemporary political philosophy; confrontation and conversion of East Asia and Middle Eastern concepts of political problems and Western perspectives; impact of culture on the shaping of political ideas.
Prerequisite: Junior or senior classification.

POLS 365 Asian Governments and Politics
Credits 3. 3 Lecture Hours.
Contemporary political systems of Asia, political institutions, actors and processes.
Prerequisite: POLS 206 or approval of department head.

POLS 366 Political Conflicts of the Middle East
Credits 3. 3 Lecture Hours.
The internal, regional and international politics of the Middle East; study of selected political conflicts; the influence of the region's cultures, religions, natural resources and outside political forces.
Prerequisites: Grade of C or better in POLS 206; junior or senior classification or approval of instructor; Galveston campus.

POLS 367/WGST 367 Women in Government in Comparative Perspective
Credits 3. 3 Lecture Hours.
Examination of women's representation in government based on comparison across multiple nation-states; focus on legislative and executive branches of democratic governments.
Prerequisites: POLS 206; junior or senior classification or approval of department head.
Cross Listing: WGST 367/POLS 367.

POLS 368 Latin American Legislatures
Credits 3. 3 Lecture Hours.
Survey of the major features of the legislative branch in Latin America; examination of the role played by legislatures in the politics of selected countries; studies of executive-legislative relations in selected countries; participation by traditionally excluded groups in legislatures.
Prerequisites: POLS 206, junior or senior classification or approval of department head.

POLS 369 Theories of Democracy
Credits 3. 3 Lecture Hours.
Definitions and justifications of democratic political systems; criticisms of democratic legitimacy, difficulties encountered by actual democratic regimes; methodological problems of assessing the fulfillment of democratic goals.
Prerequisite: POLS 206 or approval of instructor.

POLS 375 Campaigns and Elections
Credits 3. 3 Lecture Hours.
Theories of voter choice; effects of mass media and campaign finance regulations on the conduct and outcome of elections; effects of elections on policy; emphasis on U.S. national elections.
Prerequisite: POLS 206 or approval of department head.

POLS 412 International Political Economy
Credits 3. 3 Lecture Hours.
Politics of international economic relations; interactions between political and economic realms in the contemporary world.
Prerequisites: POLS 206; junior or senior classification or approval of department head.

POLS 413 American Foreign Policy
Credits 3. 3 Lecture Hours.
Evolution of U.S. foreign policies since World War II. Policy process; role of executive, legislative, bureaucratic and private institutions; current foreign policy issues and problems.
Prerequisite: POLS 206 or approval of department head.

POLS 415 Contemporary Issues in American Foreign Policy
Credits 3. 3 Lecture Hours.
Detailed analysis of a selected aspect of American foreign policy.
Prerequisite: POLS 206 or approval of department head.

POLS 423 U.S.-Latin American Relations
Credits 3. 3 Lecture Hours.
Political, economic and social relations between the United States and Latin American nations from independence to the present.
Prerequisites: POLS 206, POLS 207 and POLS 323; junior or senior classification.
POLS 424 Comparative Governmental Institutions
Credits 3. 3 Lecture Hours.
Study of the politics and structure of governmental institutions in a comparative venue; examination of the building blocks by which patterns of governments and institutions can be identified across various political systems of the world; role of institutions across different types of political systems and how they are affected by global economic factors.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 429 Issues in World Politics
Credits 3. 3 Lecture Hours.
Selected issues of importance in contemporary world politics. May be repeated for credit.
Prerequisite: POLS 206 or approval of department head.

POLS 432 The Politics of European Union
Credits 3. 3 Lecture Hours.
Examination of the institutional, economic and political forces that led to the development of the European Economic Union; impact of the European Union on world affairs.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 435 Voting Behavior
Credits 3. 3 Lecture Hours.
Voting decisions, electoral behavior and consequences for the political system.
Prerequisite: POLS 206 or approval of department head.

POLS 439 Foreign Policy Decision Making
Credits 3. 3 Lecture Hours.
Examination of decision processes in contemporary world politics; individual, group and organizational aspects of decision making in the context of world events.
Prerequisites: POLS 206, POLS 209, and junior or senior classification or approval of department head.

POLS 440 Public Policies and Policymaking
Credits 3. 3 Lecture Hours.
Socio-economic, political, and institutional factors as they affect the development, implementation and impact of public policies. Strategies of choice by political regimes in the formation of public policies.
Prerequisite: POLS 206 or approval of department head.

POLS 447 National Security Policy
Credits 3. 3 Lecture Hours.
Need for national security policy, the factors involved in determining defense policy and the resulting problems; special attention to the United States.
Prerequisite: POLS 206 or approval of department head.

POLS 454 Contemporary Political Ideas
Credits 3. 3 Lecture Hours.
Contemporary political ideas such as liberalism, socialism, communism and fascism; role of ideology in political change.
Prerequisite: POLS 206 or approval of department head.

POLS 455 Traditions of Political Theory
Credits 3. 3 Lecture Hours.
Survey of particular schools or historical periods of normative political theory. May be taken three times.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 461 Jurisprudence
Credits 3. 3 Lecture Hours.
History of legal philosophy from the ancient Greeks to the present; exploration of recurring themes such as natural law, legal positivism, legal realism, sociological jurisprudence and Marxist jurisprudence; exposure to various issues, such as liberty, privacy, obedience, responsibility and punishment.
Prerequisite: POLS 206 or approval of department head.

POLS 462/WGST 462 Women and the Law
Credits 3. 3 Lecture Hours.
The legal status of American women from the adoption of the Constitution to the present: constitutional developments; the 19th Amendment and the proposed Equal Rights Amendment; employment; family law; reproductive rights; education; sexual equality in context of other claims to equality; law and social norms.
Prerequisite: POLS 206 or approval of department head.
Cross Listing: WGST 462/POLS 462.

POLS 475 Government and the Economy
Credits 3. 3 Lecture Hours.
Constitutional and legal framework of governmental involvement in economy; governmental budget in management of business cycle; regulation of business activities; governmental economic planning in democratic societies.
Prerequisite: POLS 206 or approval of department head.

POLS 481 Research Seminar
Credits 3. 3 Other Hours.
In-depth study of topics associated with particular sub-field of political science; experience designing and implementing major, original research project.
Prerequisites: POLS 206, POLS 207, POLS 209, 9 credits in POLS at or above 300 level; junior or senior political science major or approval of instructor.

POLS 484 Internship
Credits 0 to 3. 0 to 3 Other Hours.
Directed internship in a public organization to provide students with on-the-job training and applied research experience with professionals in settings appropriate to the student's degree plan and career objectives. May be taken three times for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Majors only; approval of department head.

POLS 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Individual instruction in selected aspects of political science not adequately covered by other courses.
Prerequisite: Approval of department head; also taught at Qatar campus.

POLS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of political science and public policy. May be repeated for credit.
Prerequisite: POLS 206 or approval of department head.

POLS 491 Research
Credits 0 to 6. 0 to 6 Other Hours.
Research conducted under the direction of a faculty member in political science. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
POLS 497 Independent Honors Studies
Credits 0 to 4. 1 to 4 Other Hours.
Directed independent studies for upper division Honors students, regardless of academic major, in selected aspects of political science.
**Prerequisites:** Junior or senior classification either as Honors student or with overall GPR of 3.25; letter of approval from head of student's major department.

**PORT - Portuguese (PORT)**

PORT 101 Beginning Portuguese I
Credits 4. 4 Lecture Hours. 1 Lab Hour.
(PORT 1411) Beginning Portuguese I. Elementary language study with aural, oral, written, and reading practice; preparation for conversation; part of class preparation done in language laboratory. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.
**Prerequisite:** PORT 101 with a grade of C or better.

PORT 102 Beginning Portuguese II
Credits 4. 4 Lecture Hours. 1 Lab Hour.
(PORT 1412) Beginning Portuguese II. Continuation of PORT 101; part of class preparation done in language laboratory. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.
**Prerequisite:** PORT 101 with a grade of C or better.

PORT 201 Intermediate Portuguese I
Credits 3. 3 Lecture Hours.
(PORT 2311) Intermediate Portuguese I. Readings of average difficulty; review of grammar, practice in conversation and composition. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.
**Prerequisite:** PORT 102 with a grade of C or better.

PORT 202 Intermediate Portuguese II
Credits 3. 3 Lecture Hours.
(PORT 2312) Intermediate Portuguese II. Continuation of PORT 201 with more advanced material. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.
**Prerequisite:** PORT 201 with a grade of C or better.

POSC - Poultry Science (POSC)

POSC 201 General Avian Science
Credits 3. 3 Lecture Hours.
Introduction to the poultry industry to include past, present and future industry dynamics; avian anatomy/physiology as they impact commercial production; management principles and practices of breeding, incubation, brooding, nutrition, disease control and marketing technology.

POSC 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed studies in specific problem areas of poultry science.
**Prerequisite:** Approval of instructor.

POSC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of poultry science. May be repeated for credit.
**Prerequisite:** Approval of instructor.

POSC 291 Research
Credits 1 to 2. 1 to 2 Other Hours.
Research conducted under the direction of faculty member in poultry science. May be repeated 2 times for credit.
**Prerequisites:** Freshman or sophomore classification and approval of instructor and department head.

POSC 302 Avian Science Laboratory
Credit 1. 2 Lab Hours.
Field trips and application of basic skills in production of poultry meat and eggs. Recommended supplement to POSC 201.
**Prerequisite:** Junior or senior classification or approval of instructor.

POSC 304 Judging
Credits 3. 6 Other Hours.
Intensive, individualized training in selection standards for meat and egg strains of poultry, grading standards for egg and live and ready-to-cook poultry, and organizing and managing poultry shows; practice requires visits to processing plants. May be repeated for credit.
**Prerequisite:** Junior or senior classification or approval of instructor.

POSC 308 Avian Anatomy and Physiology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Anatomy and physiology of the major body systems of the bird, including the cardiovascular, gastrointestinal, respiratory, endocrine and reproductive systems; influence of the environment on bird physiology, including effects of stress. Laboratory exercises include dissection and microscopic analysis of the major body system and assessment of environmental conditions.
**Prerequisites:** BIOL 111; POSC 201; junior or senior classification or approval of instructor.

POSC 309 Poultry Meat Production
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Modern integrated broiler and turkey production; housing and equipment, nutrition, flock health, pest control, grower relations, marketing and financial management; lab involves blood testing, growth trials, posting birds, processing, and observation of a local integrated poultry operation.
**Prerequisite:** Junior or senior classification or approval of instructor.

POSC 313 Game Birds and Ornamental Fowl
Credits 3. 3 Lecture Hours.
Commercial game bird production; nutrition, incubation, rearing, breeder care, diseases, marketing, housing requirements and economic considerations; management of rare and ornamental fowl.
**Prerequisite:** Junior or senior classification or approval of instructor.

POSC 316 Breeder and Hatchery Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Housing and equipment, incubation technology, embryology, nutrition and flock health; lab involves hatchery management, blood testing, semen evaluation, artificial insemination, basic embryology and observation of a local hatchery.
**Prerequisite:** Junior or senior classification or approval of instructor.

POSC 326 Commercial Egg Industry
Credits 3. 3 Lecture Hours.
Production, management, marketing, economics and integration of commercial laying hen operations.
**Prerequisite:** Junior or senior classification or approval of instructor.
POSC 333 Instincts and Behavior  
**Credits 3. 3 Lecture Hours.**  
Investigation of the reasoning behind evolved reproductive strategies with integration of veterinary and avian science perspectives; examination of individual differences in behavior and their development in particular environments.  
**Prerequisite:** Junior or senior classification or approval of instructor.  

POSC 381 Investigation of Professional Development in Poultry Science  
**Credits 2. 2 Other Hours.**  
An investigation of career options and the research process as applied to poultry science.  
**Prerequisite:** Junior or senior classification or approval of instructor.  

POSC 402 Skills in Poultry Evaluation  
**Credit 1. 2 Lab Hours.**  
Practical application of judging and husbandry skills used in poultry exhibition and production. Primarily designed for preservice vocational agriculture teachers.  
**Prerequisite:** Junior or senior classification or approval of instructor.  

POSC 405/NFSC 405 Egg and Poultry Meat Processing  
**Credits 3. 3 Lecture Hours.**  
Principles of egg and poultry meat processing, understanding egg and poultry meat markets, egg and meat grading, product safety, packaging and consumer acceptance of shell eggs and poultry meat, specifically turkey and broilers.  
**Prerequisite:** Junior or senior classification or approval of instructor.  

**Cross Listing:** NFSC 405/POSC 405.  

POSC 406/NFSC 406 Poultry Further Processing  
**Credits 4. 3 Lecture Hours. 2 Lab Hours.**  
Science and practice of value-added products; physical, chemical, microbiological and functional characteristics of value-added poultry products as they affect consumer acceptance, efficiency of production and regulatory approval.  
**Prerequisites:** CHEM 222; DASC 326 or NFSC 326/ANSC 326; POSC 309; POSC 405/NFSC 405; junior or senior classification or approval of instructor.  
**Cross Listing:** NFSC 406/POSC 406.  

POSC 411 Poultry Nutrition  
**Credits 3. 3 Lecture Hours.**  
Principles of poultry nutrition with emphasis on all major nutrient classes and their relationships with the avian digestive system.  
**Prerequisites:** CHEM 222 or equivalent; junior or senior classification or approval of instructor.  

POSC 412 Poultry Feed Formulation  
**Credit 1. 1 Lecture Hour.**  
Practical feeding of poultry with emphasis on specific nutrient requirements of various species and computer least cost diet formulations.  
**Prerequisites:** POSC 411; junior or senior classification or approval of instructor.  

POSC 414 Avian Genetics and Breeding  
**Credits 3. 2 Lecture Hours. 2 Lab Hours.**  
Basic concepts of avian genetics and breeding principles, inheritance of economically important qualitative and quantitative traits; statistical analysis of breeding results; application of molecular genetics, mating systems analyses, breeder management; and incubation of hatching eggs.  
**Prerequisite:** Junior or senior classification or approval of instructor.  

POSC 425 Environmental Physiology  
**Credits 3. 3 Lecture Hours.**  
Environmental influences on the physiology of animals and humans; review of shelter engineering to promote animal welfare and production during stressful climatic conditions. Chronic and acute stress in a variety of birds and animals.  
**Prerequisite:** Junior or senior classification or approval of instructor.  

POSC 427 Animal Waste Management  
**Credits 3. 3 Lecture Hours.**  
An applied approach to current and emerging issues relating to responsible management of animal waste; the role of biological aspects of production management decisions evaluated in an examination of regulatory and environmental requirements; current case studies and exposure to field situations. Field trips may be required for which departmental fees may be assessed.  
**Prerequisite:** Junior or senior classification or approval of instructor.  

POSC 429 Advanced Food Bacteriology  
**Credits 4. 3 Lecture Hours. 2 Lab Hours.**  
Microbiology of foodborne human pathogens of food animals, raw and processed food, and human disease; methods to control incidence of pre- and post-harvest contamination.  
**Prerequisites:** DASC 326 or FSTC 326 or BIOL 351 or VTPB 405; junior or senior classification.  

POSC 444 International Poultry Production  
**Credits 3. 3 Lecture Hours.**  
Two-week intensive and comparative on-site study of international poultry production; rearing and husbandry, housing and equipment, nutrition, flock health and processing.  
**Prerequisite:** Junior or senior classification.  

POSC 454 Animal Welfare  
**Credits 3. 3 Lecture Hours.**  
Issues from an animal's perspective; opportunities to study the general questions that typically affect the welfare of an animal; insight to practices that can be used to improve the welfare of an animal.  
**Prerequisite:** Junior or senior classification.  

POSC 481 Poultry Science Systems  
**Credits 2. 1 Lecture Hour. 2 Lab Hours.**  
Individual and team approaches for the collection, interpretation, synthesis and presentation of information on integration of all aspects of the poultry industry to address issues facing it; emphasis on oral and written communication.  
**Prerequisite:** Senior classification.  

POSC 484 Internship  
**Credits 0 to 5. 0 to 5 Other Hours.**  
A supervised internship in the poultry industry to provide practical experience in a real world setting that is consistent with the student's professional interests.  
**Prerequisites:** Junior or senior classification and approval of department head.  

POSC 485 Directed Studies  
**Credits 1 to 4. 1 to 4 Other Hours.**  
Directed study of selected problems not covered by other courses in the department. Content of course will be adapted to interest and needs of students.  
**Prerequisites:** Junior or senior classification and approval of instructor.
Cross Listing: differences, sexual response and love and attraction.

Interface between human sexuality, reproductive development and gender

Credits 3. 3 Lecture Hours.

PSYC 210/WGST 210 Psychological Aspects of Human Sexuality

Prerequisite:

self, prejudice) socio-cultural contexts.

between psychological processes and diverse (e.g., motivation, memory,
and globalized world by critically examining the dynamic relationship

Introduction to various issues surrounding an increasingly interconnected

Credits 3. 3 Lecture Hours.

PSYC 209/AFST 209 Psychology of Culture and Diversity

Introduction to various issues surrounding an increasingly interconnected and
globalized world by critically examining the dynamic relationship between
psychological processes and diverse (e.g., motivation, memory, self, prejudice) socio-cultural contexts.

Prerequisite: PSYC 107.

Cross Listing: AFST 209/PSYC 209.

PSYC 210/WGST 210 Psychological Aspects of Human Sexuality

Interface between human sexuality, reproductive development and gender
roles across the lifespan; theoretical and research literature promotes
understanding of hormonal influences, learning processes, cultural
differences, sexual response and love and attraction.

Prerequisite: PSYC 107.

PSYC 225 Lifespan Development

Credits 3. 3 Lecture Hours.

(PSYC 2314) Lifespan Development. Major theoretical perspectives and
empirical research examining psychological processes across the
lifespan; changes across the lifespan in emotional, cognitive, personality
and social processes; stages of the lifespan including infancy, childhood,
adolescence, adulthood and the end of life.

PSYC 235/NRSC 235 Introduction to Behavioral and Cognitive Neuroscience

Credits 3. 3 Lecture Hours.

Physiological bases of sensation, motor functions, emotion, motivation
and complex psychological processes.

Prerequisites: PSYC 107 or BIOL 111.

Cross Listing: NRSC 235/PSYC 235.

PSYC 245 Introduction to Psychological Science Methods

Credits 3. 3 Lecture Hours.

(PSYC 2317) Introduction to Psychological Science Methods. Basic
elements of statistics and research methods in the psychological and
brain sciences; topics include ethics in psychological research,
measurement, research design and descriptive and inferential statistics.

PSYC 251 Survey of Industrial/Organizational Psychology

Credits 3. 3 Lecture Hours.

Literature and research in the basic theories and practices of I/O psychology including selection, testing, job analysis, performance appraisal, training, employee motivation, job satisfaction, leadership, and group processes within organizations.

PSYC 285 Directed Studies

Credits 0 to 3. 0 to 3 Other Hours.

Directed readings or research problems in selected areas designed to
supplement existing course offerings; individual report required.

Prerequisites: Approval of instructor; major in psychology.

PSYC 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.

Selected topics in an identified area of psychology. May be repeated for credit.

Prerequisite: PSYC 107.

PSYC 291 Research

Credits 0 to 3. 0 to 3 Other Hours.

Research conducted under the supervision of a chosen faculty member in
the department of psychology; involves discussion and weekly
presentation of student research projects. May be repeated for credit.

Prerequisites: PSYC 285; freshman or sophomore classification.

PSYC 300/WGST 300 Psychology of Women

Credits 3. 3 Lecture Hours.

Theoretical and research literature relevant to psychological assumptions about the female personality; challenges to and verification of these assumptions by recent experimental studies.

Prerequisite: PSYC 107.

Cross Listing: WGST 300/PSYC 300.

PSYC 301 Elementary Statistics for Psychology

Credits 4. 3 Lecture Hours. 2 Lab Hours.

Practical knowledge of statistics up through analysis of variance.

Practice sessions devoted to numerical problems. Will not satisfy
mathematics requirement in College of Liberal Arts curricula.

Prerequisites: Grade of C or better in PSYC 107; MATH 140 or MATH 150 with a grade of C or better, MATH 168, MATH 142, MATH 166, MATH 151, MATH 171, MATH 131, or MATH 147; major in psychology.

PSYC - Psychology (PSYC)

PSYC 105 First Semester Experience

Credit 1. 1 Lecture Hour.

Development of building blocks essential to success at Texas A&M University and in the Psychology major; introduction to understanding how adjusting to college life and exploring strategies will help manage time and motivation; examination of methods for effective studying and test preparation; information about psychology graduate school and careers in psychology without a graduate-level degree.

Prerequisites: First semester students in psychology.

PSYC 107 Introduction to Psychology

Credits 3. 3 Lecture Hours.

(PSYC 2301) Introduction to Psychology. Introductory course dealing with elementary principles of human behavior; also taught at Galveston campus.

PSYC 206/AFST 206 Black Psychology

Credits 3. 3 Lecture Hours.

Critical examination of psychological experience, theories, and methods from perspectives grounded in the ‘Black experience’.

Cross Listing: AFST 206/PSYC 206.

PSYC 208 Stereotypes, Prejudice, and Minority Experience

Credits 3. 3 Lecture Hours.

Overview of theory and research relating to stereotyping, prejudice,
discrimination, and minority experiences from a social psychological
perspective.

Prerequisite: PSYC 107.

PSYC 209/AFST 209 Psychology of Culture and Diversity

Credits 3. 3 Lecture Hours.

Introduction to various issues surrounding an increasingly interconnected and
globalized world by critically examining the dynamic relationship between
psychological processes and diverse (e.g., motivation, memory, self, prejudice) socio-cultural contexts.

Prerequisite: PSYC 107.

Cross Listing: AFST 209/PSYC 209.

PSYC 210/WGST 210 Psychological Aspects of Human Sexuality

Credits 3. 3 Lecture Hours.

Interface between human sexuality, reproductive development and gender
roles across the lifespan; theoretical and research literature promotes
understanding of hormonal influences, learning processes, cultural
differences, sexual response and love and attraction.

Prerequisite: PSYC 107.

PSYC 302 Research Methods and Design in Psychology  
**Credits 4. 3 Lecture Hours. 2 Lab Hours.**  
Research techniques in psychology with emphasis on the experimental method; laboratory exercises applied to specific problems in psychology.  
**Prerequisites:** Grade of C or better in PSYC 107 and PSYC 301; major in psychology.

PSYC 303 Psychology of Women of Color  
**Credits 3. 3 Lecture Hours.**  
Interdisciplinary theories to study the unique yet intersectional experiences of women from different racial groups, ethnicities, nationalities and cultural backgrounds; scholarly research from the diversity science field; contemporary topics that have developed in a global context; examination of complex issues, which affect women of color across the lifespan.  
**Prerequisite:** Grade of C or better in AFST 201 or PSYC 107 or WGST 200, or approval of instructor.  
**Cross Listing:** AFST 303 and WGST 303.

PSYC 304 Psychology of Sport and Physical Activity  
**Credits 3. 3 Lecture Hours.**  
The relationship of psychology to sport; topics include history, application of learning principles, social psychology, personality variables, psychological assessment, youth sport, women in sport, the psychology of coaching, sports law and ethics.  
**Prerequisite:** Junior or senior classification.

PSYC 305 Psychology of Adjustment  
**Credits 3. 3 Lecture Hours.**  
Adjustment problems of normal people; application of psychological principles to family, school and community life.

PSYC 306 Abnormal Psychology  
**Credits 3. 3 Lecture Hours.**  
Survey of behavior pathology; functional and organic psychoses, psychoneurosis, character disorders, psychophysiological disorders, alcohol and drug addiction and mental retardation; therapeutic and diagnostic methods.  
**Prerequisites:** PSYC 107; junior or senior classification; PSYC 301 and PSYC 302 recommended; also taught at Galveston campus.

PSYC 307 Developmental Psychology  
**Credits 3. 3 Lecture Hours.**  
Growth and development of normal child from infancy to adolescence with emphasis on elementary school years.  
**Prerequisites:** PSYC 107; junior or senior classification; PSYC 301 and PSYC 302 recommended.

PSYC 311/NRSC 311 Psychology of Animal Behavior  
**Credits 3. 3 Lecture Hours.**  
Problems, principles, and methods of animal psychology; animal learning, motivation, discriminative processes and abnormal, social and instinctual behaviors.  
**Prerequisites:** PSYC 107, BIOL 111, or BIOL 113.  
**Cross Listing:** NRSC 311/PSYC 311.

PSYC 315 Social Psychology  
**Credits 3. 3 Lecture Hours.**  
Social psychological variables operating on the individual; results of experimental laboratory findings; interaction of personality and social behavior.  
**Prerequisites:** PSYC 107.

PSYC 316/COMM 316 Media Psychology  
**Credits 3. 3 Lecture Hours.**  
Examine the role of media and its impact on human behavior, emotions and thoughts; topics include mass media, social media and how they influence individual and societal functioning across a range of important psychological topics; e.g., self-image, sexual behavior, mental health, violence.  
**Prerequisites:** PSYC 107.  
**Cross Listing:** COMM 316/PSYC 316.

PSYC 319 History and Systems of Psychology  
**Credits 3. 3 Lecture Hours.**  
Historical analysis of pre-scientific psychology in philosophy and physiology through the period of the psychological 'schools.'  
**Prerequisite:** PSYC 107.

PSYC 320/NRSC 320 Sensation-Perception  
**Credits 3. 3 Lecture Hours.**  
Review of sensory physiology, sensory and perceptual phenomena and the major perceptual theories; current research in the field.  
**Prerequisites:** PSYC 107; junior or senior classification; PSYC 301 and PSYC 302 recommended.  
**Cross Listing:** NRSC 320/PSYC 320.

PSYC 323 Psychology of Adolescence  
**Credits 3. 3 Lecture Hours.**  
Psychological problems of normal teenage individual; ways and means of aiding youth to meet these problems constructively.  
**Prerequisites:** PSYC 107; junior or senior classification; PSYC 301 and PSYC 302 recommended.

PSYC 330 Personality  
**Credits 3. 3 Lecture Hours.**  
Review of personality theories, techniques of assessment and research relevant to understanding individual differences.  
**Prerequisites:** PSYC 107; junior or senior classification; PSYC 301 and PSYC 302 recommended.

PSYC 332/NRSC 332 Neuroscience of Learning and Memory  
**Credits 3. 3 Lecture Hours.**  
Brain mechanisms of learning and memory from molecular to behavioral levels; synaptic plasticity, model systems, multiple memory systems, diseases of learning and memory.  
**Prerequisites:** PSYC 235/NRSC 235, NRSC 235/PSYC 235, PSYC 340/NRSC 340, NRSC 340/PSYC 340, VIBS 277/NRSC 277, or NRSC 277/VIBS 277.  
**Cross Listing:** NRSC 332/PSYC 332.

PSYC 333/NRSC 333 Biology of Psychological Disorders  
**Credits 3. 3 Lecture Hours.**  
Neurobiology and clinical explanation of molecular mechanisms underlying psychiatric disorders and their drug treatments; depression and bipolar, anxiety disorders, mood disorders, psychosis and schizophrenia.  
**Prerequisites:** PSYC 235/NRSC 235, NRSC 235/PSYC 235, PSYC 340/NRSC 340, NRSC 340/PSYC 340, VIBS 277/NRSC 277, or NRSC 277/VIBS 277.  
**Cross Listing:** NRSC 333/PSYC 333.
PSYC 336/NRSC 336 Drugs and Behavior
Credits 3. 3 Lecture Hours.
Physiological, pharmacological and behavioral effects of psychoactive drugs, including short-term and long-term effects of psychoactive drugs, properties of addictive drugs, etiology of addiction, and treatments of drug addiction and withdrawal.
Cross Listing: NRSC 336/PSYC 336.

PSYC 340/NRSC 340 Psychology of Learning
Credits 3. 3 Lecture Hours.
Survey of significant concepts, experimental methods and principles of learning.
Prerequisites: PSYC 107, BIOL 111, or BIOL 113.

PSYC 345 Human Cognitive Processes
Credits 3. 3 Lecture Hours.
Human cognition and information processing: perception, attention, memory, reasoning and problem solving; experimental methods and data, and contemporary theories of human cognition.
Prerequisites: PSYC 107; junior or senior classification.

PSYC 346 Psychology of Language
Credits 3. 3 Lecture Hours.
Examines theories of how language is acquired, comprehended, produced, stored and used in normal and brain-impaired individuals.
Prerequisites: PSYC 107; or junior or senior classification.

PSYC 350/NRSC 350 Cognitive Neuroscience
Credits 3. 3 Lecture Hours.
Research in cognitive neuroscience; methodological advances that enable the study of the human brain safely in the laboratory; complex aspects of the mind like emotion, social behavior and consciousness.
Prerequisite: PSYC 107; PSYC 301, PSYC 302, and NRSC 277 recommended.
Cross Listing: NRSC 350/PSYC 350.

PSYC 352 Organizational Psychology
Credits 3. 3 Lecture Hours.
Literature and research in basic theories and practices of organizational psychology including employee motivation, leadership, job satisfaction, counterproductive work behaviors, organizational commitment, culture, climate, communication, and group processes within organizations.
Prerequisites: PSYC 107; junior or senior classification; PSYC 301 and PSYC 302 recommended.

PSYC 353 Personnel Psychology
Credits 3. 3 Lecture Hours.
Literature and research in basic theories and practices of personnel psychology including job analysis, testing and validation, selection, performance appraisal, training, and legal issues in employment decision making.
Prerequisites: PSYC 107; junior or senior classification; PSYC 301 and PSYC 302 recommended.

PSYC 354 Conflict and Negotiation
Credits 3. 3 Lecture Hours.
Examination of the field of conflict and negotiation, including the structure and causes of common interpersonal, intragroup, and intergroup conflicts, effective negotiation strategies, ethics, mediation, and the development of negotiating skills.
Prerequisite: PSYC 107.

PSYC 360/NRSC 360 Health Psychology and Behavioral Medicine
Credits 3. 3 Lecture Hours.
Health psychology emphasizing behavioral and lifestyle factors in health and illness, prevention and modification of health-compromising behaviors, health care utilization, and psychological management of chronic disorders and psychological management of chronic disorders and terminal illnesses.
Prerequisite: PSYC 107.
Cross Listing: NRSC 360/PSYC 360.

PSYC 365 Psychology of Aging
Credits 3. 3 Lecture Hours.
Examination of the psychological aspects of the aging process including physiology and health, memory and intellectual functioning, personality and social relationships, emotional health and late life transition.
Prerequisite: PSYC 107.

PSYC 371 Forensic Psychology
Credits 3. 3 Lecture Hours.
Interface between psychology and the legal system; role of psychological theories and data, as well as mental health expertise, in the resolution of criminal trials and civil disputes; legal system's impact on the practice of psychology.
Prerequisite: PSYC 107; junior or senior classification; PSYC 301 and PSYC 302 recommended.

PSYC 389 Careers in Psychology
Credits 3. 3 Lecture Hours.
Exploration of graduate study and professional careers in the field of psychology, including teaching, research, and clinical practice; content will include graduate admissions, licensure types, areas of specialization and professional skills related to training and practice in the field of psychology.
Prerequisites: PSYC 107; approval of instructor.

PSYC 407 Behavioral Disorders of Children
Credits 3. 3 Lecture Hours.
Behavior problems related to childhood; psychological aspects of mental retardation, emotional disturbance, physical handicaps and other disorders; causative factors, preventative and therapeutic methods explored; where feasible, practical experience included as requirement.
Prerequisites: PSYC 306; PSYC 307 or equivalent.

PSYC 411 Psychology of Self
Credits 3. 3 Lecture Hours.
Overview of psychological theory and research on issues related to the self, the self-concept and identity, and how these phenomena are integral to the human experience and to mental health and well-being.
Prerequisite: PSYC 107 or approval of instructor.

PSYC 414 Behavior Principles
Credits 3. 3 Lecture Hours.
Behavioral analysis of humans’ complex interactions with their environments: how behavioral repertoires are constructed during maturation process; how existent behaviors are strengthened, weakened or eliminated; and how features of environment exercise control over behavioral components within a repertory.
Prerequisites: 9 hours of psychology; PSYC 107; junior or senior classification; PSYC 301 and PSYC 302 recommended.
PSYC 425 Psychology of Emotion
Credits 3. 3 Lecture Hours.
Examination of the theories and approaches in the psychological study of emotion; topics related to emotion, including predictors of happiness, causes and consequences of emotion, and the role of emotion in society; identification of facial expressions of emotion; examination of techniques that promote happiness.
Prerequisites: PSYC 107.

PSYC 432 Diversity and Inclusion in Organizations
Credits 3. 3 Lecture Hours.
Psychological and organizational theory and research on the experience of diversity and inclusion in organizations.
Prerequisites: PSYC 315, PSYC 352, PSYC 353, or approval of instructor.

PSYC 440/NRSC 440 Hormones and Behavior
Credits 3. 3 Lecture Hours.
Principles of hormones and the endocrine system; relationships among hormones, the nervous system and a variety of behaviors in vertebrates including humans.
Prerequisites: PSYC 235/NRSC 235, NRSC 235/PSYC 235, PSYC 340/NRSC 340, NRSC 340/PSYC 340, VIHS 277/NRSC 277, or NRSC 277/VIHS 277, or approval of instructor.
Cross Listing: NRSC 440/PSYC 440.

PSYC 450 Clinical Psychology
Credits 3. 3 Lecture Hours.
Analysis of the field of clinical psychology with a particular focus on the theoretical and scientific bases for the practice of clinical psychology.
Prerequisites: PSYC majors only; grade of C or better in PSYC 301, PSYC 302 and PSYC 306.

PSYC 470 Psychological Testing and Measurement
Credits 3. 3 Lecture Hours.
Theories and techniques of measurement of psychological concepts; a range of measurement models and procedures; critical tasks of evaluating strategies for measuring psychological concepts and drawing inferences and interpretations from commonly used psychological assessments.
Prerequisites: PSYC 301 recommended; junior or senior classification or approval of instructor.

PSYC 471 Research Writing in Neuroscience
Credit 1. 1 Lecture Hour.
Development of written communication skills; comprehension and communication of neuroscience research concepts to both academics and lay people.
Prerequisite: Junior or senior classification.

PSYC 475 Communicating Neuroscience Concepts
Credit 1. 1 Lecture Hour.
Development of written communication skills; written assignments include summaries of research in the field of neuroscience.
Prerequisite: Junior or senior classification.

PSYC 483 Teaching Scholars
Credits 0 to 3. 0 to 3 Lecture Hours.
Acquisition of experience in educational programs and knowledge about the scientific basis for educational strategies and development of materials in conjunction with serving as a course teaching assistant.
Prerequisites: Major or minor in psychology; junior or senior classification; approval of instructor.

PSYC 484 Field Experiences
Credits 0 to 6. 0 to 6 Other Hours.
Participation in an approved mental health, mental retardation, school, industrial or other approved setting; field experiences supervised by an appropriate professor within an area of student interest; course requirements vary with the setting, the supervising professor and the needs of the individual student. May be repeated for credit.
Prerequisites: PSYC 301 and PSYC 302; 12 hours of psychology; GPR of 2.5 or better in all psychology courses; major in psychology; approval of instructor.

PSYC 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Directed readings or research problems in selected areas designed to supplement existing course offerings. May be repeated for credit.
Prerequisite: Approval of instructor.

PSYC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of psychology. May be repeated for credit.
Prerequisites: PSYC 107 and approval of instructor.

PSYC 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the supervision of a chosen faculty member in the department of psychology; involves discussion and presentation of student research projects. May be repeated for credit.
Prerequisites: PSYC 484 or PSYC 485; approval of instructor.

RDNG - Reading (RDNG)

RDNG 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in reading. May be repeated two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

RDNG 351 Reading in the Elementary School
Credits 3. 3 Lecture Hours.
Recent trends, issues, materials and procedures considered essential for effective teaching of reading, such as comprehension, word analysis, study skills, motivation, grouping, etc.
Prerequisites: Concurrent enrollment in RDNG 473; junior classification or approval of department head.

RDNG 371 Multicultural and Interdisciplinary Literature for Middle Grades
Credits 3. 3 Lecture Hours.
Focuses on multicultural and interdisciplinary literature appropriate for middle grades students; implements and evaluates effective multicultural, interdisciplinary instruction through selection, use and development of literature in middle grades classroom.
Prerequisite: Junior classification.

RDNG 372 Reading and Writing across the Middle Grades Curriculum
Credits 3. 3 Lecture Hours.
Acquaints middle-grade educators to reading and writing instruction in content area education; focuses on development of grade-appropriate reading/writing competencies and educational techniques appropriate to student development in various subjects.
Prerequisite: Junior classification.
RDNG 373 Teaching Reading Through Children's Literature  
Credits 3. 3 Lecture Hours.  
Use of past and contemporary literature for the motivation of wide leisure reading in the elementary grades.  
Prerequisites: Admission to teacher education.  

RDNG 460 Language and Reading  
Credits 3. 3 Lecture Hours.  
Relationship between language and reading, dialect and reading, and linguistics.  

RDNG 465 Reading in the Middle and Secondary Grades  
Credits 3. 3 Lecture Hours.  
Reading needs of middle and secondary school students with emphasis upon curriculum organization for reading development and assessment of student progress in content area reading.  

RDNG 467 Reading and the Language Arts  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Recent trends, issues and research on the impact of listening, oral language, process writing, grammar, spelling and handwriting on the development of reading strategies and communicative competence. Application of research in field settings.  
Prerequisites: RDNG 351 and RDNG 473; admission to teacher education; must be taken concurrently with TEFB 410, TEFB 412 and TEFB 413.  

RDNG 468 Essential Foundations of Language and Literacy for All Learners  
Credits 3. 3 Lecture Hours.  
Relationship among literacy, language, dialect and linguistics; role of the child, community and school through stages of literacy and second language learning; literacy instructional procedures for all learners including dyslexia.  
Prerequisites: RDNG 351 or RDNG 372 or SPED 412.  

RDNG 470 Reading/Language Arts Methods in Middle Grades Education  
Credits 3. 2 Lecture Hours. 6 Other Hours.  
Investigate current trends and issues in teaching listening, oral language, process writing, spelling, grammar and handwriting; explores relationships among the development of various language arts and the development of reading strategies and communicational competencies of middle school learners; application of best instructional practices informed by research.  
Prerequisites: RDNG 351 or RDNG 473; admission to teacher education; senior classification.  
Corequisites: RDNG 490; MEFB 450.  

RDNG 472 Teaching Writing in Elementary and Middle Grade Classrooms  
Credits 3. 3 Lecture Hours.  
Focuses on effective methods of writing instruction and assessment for the middle grades; reviews and reinforces sound writing practices; exposes students to theory and research in the area of writing instruction.  
Prerequisite: Junior classification.  

RDNG 473 Assessment in Reading Instruction  
Credits 3. 3 Lecture Hours.  
Evaluation and use of commonly used achievement tests, development of criterion referenced tests and interpretation and construction of informal measures for assessing reading skills.  
Prerequisites: Grade of C or better in RDNG 351 and RDNG 373.  

RDNG 490 Assessment in Reading Instruction in Middle Grades  
Credits 3. 2 Lecture Hours. 6 Other Hours.  
Evaluation of middle grades students reading performance; selection, understanding, and implementation of formal and informal evaluation procedures in classroom reading assessment, diagnosis, and instruction.  
Prerequisites: MEFB 352; admission to teacher education; senior classification; concurrent enrollment in RDNG 470 and MEFB 450.  

RDNG 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in reading. May be repeated 2 times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.  

**RELS - Religious Studies (RELS)**  

**RELS 200 Religions of the World**  
Credits 3. 3 Lecture Hours.  
Introduction to academic study of religion and some of the world's major religions; emphasis on the nature of religion, diversity of practice across religious traditions, religious appropriation and functions of religion.  

**RELS 202 Religion in America**  
Credits 3. 3 Lecture Hours.  
Survey of major themes in religion in America; examines how religion has influenced and been influenced by American history, culture, economics, politics and social consciousness.  

**RELS 209 Religions of the Ancient World**  
Credits 3. 3 Lecture Hours.  
Religious traditions, ideas and practices of ancient cultures; connections to modern religious traditions.  

**RELS 212/HIST 212 Holy War**  
Credits 3. 3 Lecture Hours.  
Concepts of holy war in Jewish, Christian and Muslim history; language and literature of holy war; motivations for waging holy war; the relationship between war, martyrdom, pilgrimage and sainthood; religious orders engaging in holy war; political aims of holy war; practices of holy war; perspectives of those attacked in holy wars.  
Cross Listing: HIST 212/RELS 212.  

**RELS 220 History of Christianity: Origins to the Reformation**  
Credits 3. 3 Lecture Hours.  
History of Christian doctrine, ecclesiastical organization, and religious practice, origins through Reformation, with emphasis on religion and society; life and teachings of Jesus; apostolic church; patristic period; Christianization of Roman Empire and northern Europe; monasticism; medieval church; Gregorian reform; heresy; papal monarchy; schism and conciliarism; reformations of the sixteenth century.  
Cross Listing: CLAS 220 and HIST 220.  

**RELS 221/HIST 221 History of Islam**  
Credits 3. 3 Lecture Hours.  
Key themes in Islam and Islamic history; Orientalism; pre-Islamic Arabia; the Qur’an; Sunni-Shi'i sectarian divisions; Islamic law; theology; sciences; mystical traditions; rituals of the Muslim faith; cross-cultural and religious encounters; holy war; ritual practices; fundamentalism; women in Islam; Islam in the West.  
Cross Listing: HIST 221/RELS 221.
RELS 222/HIST 222 History of Christianity, Reformation to Present Credits 3. 3 Lecture Hours.
History of Christian religion from the era of the Reformation (sixteenth century) to the present, with emphasis on social, cultural, political and economic history in relation to Christian structures and theological movements.
Cross Listing: HIST 222/RELS 222.

RELS 251/CLAS 251 Classical Mythology Credits 3. 3 Lecture Hours.
Introduction to the most important myths of Greeks and Romans; ancient and modern methods of interpreting myths; the role of myths in ancient literature; readings in English.
Cross Listing: CLAS 251/RELS 251.

RELS 257/COMM 257 Communication, Religion and the Arts Credits 3. 3 Lecture Hours.
Introduction to artistic, religious communication; survey of communication art and media art practices across religious contexts; consideration of communication aesthetics that mediate religious experience.
Cross Listing: COMM 257/RELS 257.

RELS 285 Directed Studies Credits 0 to 3. 0 to 3 Other Hours.
Readings and/or assigned projects for specific needs of students minoring in religious studies; directed independent or individual study in an identified area of religious studies.
Prerequisite: Approval of instructor.

RELS 289 Special Topics in... Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of religious studies. May be repeated for credit.

RELS 291 Research Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Liberal Arts.
Prerequisites: Freshman or sophomore classification and approval of instructor.

RELS 304/HUMA 304 Indian and Oriental Religions Credits 3. 3 Lecture Hours.
Beliefs and practices of Hinduism, Jainism, Sikhism, Buddhism, Confucianism, Taoism, and Shinto with particular attention to their philosophical presuppositions.
Cross Listing: HUMA 304/RELS 304.

RELS 312 Contemplation in the Modern World Credits 3. 3 Lecture Hours.
Interdisciplinary approach to examining contemplative practices: origins in philosophy and religious traditions, goals and techniques of contemplation, contemplation in relation to cultural and social problems or needs.

RELS 317/ANTH 317 Introduction to Biblical Archaeology Credits 3. 3 Lecture Hours.
Application of archaeology in biblical research; basic overview of the material cultures that are the setting for the biblical narratives.
Cross Listing: ANTH 317/RELS 317.

RELS 321 Political Islam and Jihad Credits 3. 3 Lecture Hours.
Interaction between Islamic movements and politics in various Middle Eastern countries; the meaning and evolution of jihad; the role of Islam as a tool for political and social mobilization.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: HUMA 321 and INTS 321.

RELS 326/SOCI 326 Sociology of Religion Credits 3. 3 Lecture Hours.
Institution of religion and religious-related behavior; relationship between dynamic and structural religion and contemporary society.
Prerequisite: SOCI 205
Cross Listing: SOCI 326/RELS 326.

RELS 331/PHIL 331 Philosophy of Religion Credits 3. 3 Lecture Hours.
Philosophical problems of western religion such as the existence of God, the problem of evil, types of theism, rational, empirical, and mystical approaches to God.
Cross Listing: PHIL 331/RELS 331.

RELS 340/ANTH 340 Folklore and the Supernatural Credits 3. 3 Lecture Hours.
Traditional expressions of the supernatural such as superstition, belief tale and divination classified as folklore genres and their relationships to the cultures in which they develop; theories drawn from anthropology, folklore and related social sciences.
Prerequisite: Junior or senior classification or approval of instructor.

RELS 347/HIST 347 Rise of Islam, 600-1258 Credits 3. 3 Lecture Hours.
Late-Antiquity; Pre-Islamic Arabia; the rise of Islam and a historical survey of the development of the Islamicate civilizations from c. 600 to the Mongol Conquests c. 1258 with an emphasis on politics, religion, society and culture.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: HIST 347/RELS 347.

RELS 356 Ritual and Expression in Ancient Religions Credits 3. 3 Lecture Hours.
Expressive practices such as rituals, re-enactments, processions and dance in ancient religious traditions.
Prerequisites: Junior or senior classification.

RELS 360/ENGL 365 The Bible as Literature Credits 3. 3 Lecture Hours.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 365/RELS 360.

RELS 365/HIST 365 Religion in Early America Credits 3. 3 Lecture Hours.
Religion in North America from colonial beginnings to eve of Civil War; relations between European Christianity, Native Americans and African Americans; religious pluralism, reform movements, social and political change.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 365/RELS 365.
RELS 366/HIST 366 Religion in Modern America  
Credits 3. 3 Lecture Hours.  
Religion in America from the Civil War to contemporary period; relationship of religion and racial formation, capitalism, gender, sexuality, immigration; religious pluralism; evangelicalism; role of religious politics and social movements.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 366/RELS 366.

RELS 392/ENGL 392 Studies in Literature, Religion and Culture  
Credits 3. 3 Lecture Hours.  
Exploration of literature treating significant religious topics in the context of cultural setting; features current faculty research on such topics as Tolkien and the making of myth, C.S. Lewis, texts and cultures of the Middle East and Victorian women writers and religion. May be repeated one time for credit.  
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.  
Cross Listing: ENGL 392/RELS 392.

RELS 403/ANTH 403 Anthropology of Religion  
Credits 3. 3 Lecture Hours.  
Cross-cultural, theoretical analysis of religion as a cultural phenomenon; exploring the relationships between religion, culture, society and the individual; also taught at Galveston campus.  
Prerequisite: Junior or senior classification.  
Cross Listing: ANTH 403/RELS 403.

RELS 418 Intellectual History from the Ancient Near East to the Early Middle Ages  
Credits 3. 3 Lecture Hours.  
Political, social, cultural and religious histories of significant figures, groups, schools of thought and movements in western Afro-Eurasia from the Assyrian Empire to the later Roman Empire; developments in political theory, literature, sociology, arts, architecture, music, philosophy, law, sciences and education.  
Prerequisite: Junior or senior classification.  
Cross Listing: CLAS 418 and HIST 418.

RELS 419/HIST 419 Intellectual History, 500 to 1600  
Credits 3. 3 Lecture Hours.  
Political, social, cultural and religious histories of significant figures, groups, schools of thought and movements in western Afro-Eurasia from the rise of Islam to the Renaissance; developments in political theory, literature, sociology, arts, architecture, music, philosophy, law, sciences and education.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 419/RELS 419.

RELS 420 Religion and the Environment  
Credits 3. 3 Lecture Hours.  
Interaction between religion and the environment; examination of religious traditions and their concepts of the natural world; emphasis on cultural contexts and environmental sustainability.  
Prerequisites: RELS 200, RELS 202, RELS 209, GEOS 105, GEOS 205, or GEOG 203.

RELS 425/HIST 425 The Sacred and Profane in History  
Credits 3. 3 Lecture Hours.  
Case studies of the sacred in varied times and regions; holy persons; holy places; holy objects; language and literature of the sacred; competing concepts of the holy within society; gender and the holy; institutions promoting holy people and places; the impact of social, political, cultural and intellectual developments on the relationship between the sacred and the profane.  
Prerequisites: Junior or senior classification.  
Cross Listing: HIST 425/RELS 425.

RELS 436/ANTH 436 Ancient Egypt  
Credits 3. 3 Lecture Hours.  
Archaeology and history of ancient Egypt from earliest times to the end of the New Kingdom period.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: ANTH 436/RELS 436.

RELS 464/PHIL 464 Modern Jewish Thought and Philosophy  
Credits 3. 3 Lecture Hours.  
An overview of modern Jewish thought and philosophy spanning Jewish European thinkers from the 18th century to the 20th century.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: PHIL 464/RELS 464.

RELS 471/HISP 471 Hispanic Religions  
Credits 3. 3 Lecture Hours.  
Exploration of the history and practice of Hispanic religion, including spirit possession, evil eye, consumption of sacred substances, healing traditions, ex-votos, relics, prophecy, omens, monsters, astrology, witchcraft, the Inquisition, festivals, pilgrimage, mystics and religious contributions of diverse ethnic groups.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: HISP 471/RELS 471.

RELS 474/HISP 474 Diversity Lessons from Medieval Spain  
Credits 3. 3 Lecture Hours.  
Crucible of cultures--Christian, Jewish, and Muslim--that was medieval Spain and modern implications of that experience in diversity.  
Prerequisites: ENGL 104 and junior or senior classification.  
Cross Listing: HISP 474/RELS 474.

RELS 480/COMM 480 Religious Communication  
Credits 3. 3 Lecture Hours.  
The role of religious communication as manifested in speeches, sermons, debates, campaigns, and social movements throughout history. May be taken two times for credit.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: COMM 480/RELS 480.

RELS 481 Advanced Seminar in Religious Studies  
Credits 3. 3 Lecture Hours.  
Intensive reading, study and discussion of topics in religious studies; interdisciplinary methods. May be taken four times for credit.  
Prerequisites: Junior or senior classification; university studies-religious thought, practices and cultures (US-RTPC) major or religious studies minor; or approval of instructor.

RELS 484 Internship  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed internship in a public or private organization to provide students with applied experience; opportunity to observe first hand issues and problems covered in religious studies courses; designed to enhance and clarify the student's career objectives. May be taken for credit up to six hours.  
Prerequisites: Approval of instructor.
RELS 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Readings and/or assigned projects for specific needs of students minor ing in religious studies; directed independent or individual study in an identified area of religious studies.
Prerequisite: Junior or senior classification; approval of instructor.

RELS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of religious studies. May be repeated for credit.
Prerequisite: Junior or senior classification, or approval of instructor.

RELS 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Liberal Arts. May be taken 3 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

RENR-Renewable Natural Resources (RENR)

RENR 205 Fundamentals of Ecology
Credits 3. 3 Lecture Hours.
Principles of ecology using a holistic approach treating plants, animals and humans as one integrated whole; composition, structure, nutrient cycles and energetics of biotic communities; adaptations to environmental factors; biotic relationships; and problems of environmental quality and resource use.

RENR 215 Fundamentals of Ecology--Laboratory
Credit 1. 3 Lab Hours.
Sampling and estimating plant-animal populations, measuring environmental factors and recognizing and studying morphological, physiological and behavioral adaptations of plants and animals to biotic or abiotic influences.

RENR 345 Park Ecology and Management
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Classroom and hands-on exposure to outdoor recreation resources management in a major national park facing complex challenges; interactive problem-solving to understand natural resources, management strategies and issues related to a park’s broader region; includes one intensive week in Smoky Mountains National Park. May be taken two times for credit.
Prerequisites: Junior or senior classification; or approval of instructor.

RENR 375 Conservation of Natural Resources
Credits 3. 3 Lecture Hours.
Principles and philosophies associated with the development, management and use of natural resources; ecological and social implications inherent in management alternatives involving the natural environment and use of renewable natural resources.

RENR 400 Study Abroad in Natural Resources
Credits 2 to 12. 2 to 12 Lecture Hours.
Provides students with an opportunity to gain first-hand experience in natural resource management in foreign countries; focus on the interaction of public, communal and private land tenure systems with the ecological and human dimensions of rangeland management, wildlife conservation and nature-based tourism. May be taken two times for credit.
Prerequisite: Junior or senior classification.

RENR 405/ESSM 351 Geographic Information Systems for Resource Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geographic Information Systems (GIS) approach to solving spatial problems and managing natural resources, including the acquisition, management, manipulation, analysis, and mapping of spatial and non-spatial databases; identification of natural and relevant features from various data sources; integration of relevant technologies and data; extensive use of GIS software to solve real-world problems. Only one of the following will satisfy the requirements for a degree: ESSM 351/RENR 405, RENR 405/ESSM 351, ESSM 651, BAEN 651 and RENR 651.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ESSM 351/RENR 405.

RENR 410 Ecosystem Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Concepts and practices relevant to the development of landscape/regional level ecosystem management plans including range, forest and other natural resources; an ecosystem management plan will be developed utilizing a strategic management/coordinated resources approach to establish resource goals, ecosystem resource analysis and impact evaluation and implementation compatible with societal and individual concerns.
Prerequisites: RENR 205, senior classification or approval of instructor.

RENR 460/RPTS 460 Nature, Values, and Protected Areas
Credits 3. 3 Lecture Hours.
Writing-intensive discussion of the ways in which protected areas reflect human values about nature; identify stakeholders in and around protected areas, exploring how interests either conflict or coincide; evaluate social, economic, cultural, and ecological trade-offs of different approaches to conservation.
Prerequisite: RPTS 307 or RPTS 316; or 9 hours of credit in natural resource courses.
Cross Listing: RPTS 460/RENR 460.

RENR 470 Environmental Impact Assessment
Credits 3. 3 Lecture Hours.
The evolution of natural resources regulatory policies and how this influences current procedures for environmental/natural resources assessment and management; demonstration of the environmental impact assessment procedures and policy issues associated with environmental impacts.
Prerequisite: Senior classification or approval of instructor.

RENR 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of renewable natural resources. May be repeated for credit.
Prerequisite: Approval of instructor.

RLEM-Rangeland Ecology & Mgmt (RLEM)

RLEM 321 Field Studies in Ecological Restoration
Credit 1. 2 Lab Hours.
Field trip course that provides examples, visits and field experiences in ecological restoration; reinforces conceptual basis for ecological restoration principles developed in RLEM 320, alternative strategies for succession management, plant materials selection, seedbed preparation, planting technologies and planning ecological restoration programs.
Prerequisites: ESSM 320 or concurrent enrollment; junior or senior classification.
RPTS - Rec, Park & Tourism Sci (RPTS)

RPTS 201 Foundations of Recreation, Parks and Tourism
Credits 3. 3 Lecture Hours.
(PhED 1336) Foundations of Recreation, Parks and Tourism. Analysis of the elements comprising a community, community assessment techniques and community development processes engaged by stakeholders and residents to improve living conditions; definitions and principles associated with community development.

RPTS 209 Park and Tourism Operations
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Planning, execution and supervision of field maintenance and operations.

RPTS 230 Computer Applications in Recreation, Parks and Tourism
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamentals of computer use and the application of software used in careers related to park and tourism enterprises; computer use in decision making and problem solving.

RPTS 291 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in recreation park and tourism sciences.
Prerequisites: Freshman or sophomore classification and approval of instructor.

RPTS 300 Supervised Field Studies
Credits 3. 3 Other Hours.
Survey and application of principles of recreation and parks; selected aspects of park and recreation management in an operational setting under the supervision of an approved agency; preparation and presentation of a comprehensive analysis of a specific problem; offered on an individual basis. May be repeated for credit.

RPTS 301 Leisure and Outdoor Recreation in American Culture
Credits 3. 3 Lecture Hours.
Introduction to the fundamental concepts of leisure and outdoor recreation and how they influence us as individuals, groups and society; critical factors such as self, family, lifespan, ecology, health, work patterns, communications, diversity, popular culture, and consumption are studied in relationship to past, present and future leisure patterns.

RPTS 302 Application of Tourism Principles
Credits 3. 3 Lecture Hours.
Tourism principles applied at local, regional and international levels; examination of the scale, scope and organization of the industry including marketing destinations and experiences; issues related to the economic, technological and political aspects of tourism.
Prerequisite: Junior or senior classification.

RPTS 304 Administration of Recreation Resource Agencies
Credits 3. 3 Lecture Hours.
Contemporary issues and related administrative practices associated with the provision of recreation services and settings; addresses principles associated with recreation resource agency administration; personnel and customer-related administrative issues in recreation resource agencies; concepts and principles relevant to commercial and non-profit recreation resource agencies.
Prerequisites: RPTS 201.

RPTS 307 Interpretation of Natural and Cultural Resources
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles and methods of effective communication with the public at parks, cultural institutions and tourism destinations; application of guided and media-based techniques to connect audiences with meanings inherent in a resource.

RPTS 308 Foundations of Community and Community Development
Credits 3. 3 Lecture Hours.
Analysis of the elements comprising a community, community assessment techniques and community development processes engaged by stakeholders and residents to improve living conditions; definitions and principles associated with community development.
Prerequisite: Junior or senior classification.

RPTS 311 Planning and Implementation of Events and Programs
Credits 3. 3 Lecture Hours.
Planning, operations, administration and evaluation; includes creation and implementation of programs and special events with budgeting, operational and venue logistics, marketing, fund raising, hospitality training and participant satisfaction.
Prerequisite: Junior or senior classification.

RPTS 316 Recreational Management of Wildlands
Credits 3. 3 Lecture Hours.
Management and recreational use of wild and wilderness areas and multiple use management areas; systems and techniques for dealing with management problems in outdoor recreation.
Prerequisite: Junior or senior classification.

RPTS 321 Event Management and Operations II
Credits 3. 3 Lecture Hours.
Principles and applications for effective planning and management of events; planning, promotion, operational logistics, sponsorship and evaluation.
Prerequisite: RPTS 311.

RPTS 323 Tourism Management
Credits 3. 3 Lecture Hours.
Advanced principles and applications of event management, including practical knowledge relating to contracting, media, fund raising, compliance and oversight, risk management, site logistics, sponsorships and vendor management.
Prerequisites: RPTS 311 and RPTS 320.

RPTS 325 Tourism Management
Credits 3. 3 Lecture Hours.
Management issues and tools related to the travel and tourism industry; history, planning, operations, leading, directing and controlling tourism businesses; complexity and scope of tourism systems; issues related to ethics and sustainability; managing tourism in different environments; roles of technology and information technology; future of tourism.
Prerequisites: RPTS 302; junior or senior classification.

RPTS 324 Event Management Final Assessment
Credits 0. 0 Other Hours.
Demonstration of academic knowledge in management of events; document event coordination experience through completion of volunteer work and a website portfolio.
Prerequisites: Enrollment in Professional Event Manager certificate; grade of C or better in RPTS 311 and RPTS 320; grade of C or better in RPTS 321 or concurrent enrollment.
RPTS 331 Tourism Marketing
Credits 3. 3 Lecture Hours.
Application of basic tourism marketing principles and concepts in government, business, and social-cause contexts; situation analysis and operational evaluation; decision making in terms of product, place, price, and channel of distribution mixes for tourism attractions and services.
Prerequisite: RPTS 302 and junior or senior classification.

RPTS 336 Research and Analysis in Recreation and Tourism
Credits 3. 3 Lecture Hours.
Examination of current tourism and recreation research emphasizing specialized research methodology, adaptive techniques and methods of research useful to the recreation and tourism professional; analysis of the methods of problems identification, formulation and solution.
Prerequisites: Junior or senior classification.

RPTS 340 Recreation, Parks, Tourism and Diverse Populations
Credits 3. 3 Lecture Hours.
Review of major judicial decisions and civil rights laws on provision and distribution of leisure services in society; influence of age, disability, ethnicity, national origin, race, religion and gender on individual’s preferences for particular experiences; implications of individual differences for the provision of services.
Prerequisite: Junior or senior classification.

RPTS 370 Youth Development Organizations and Services
Credits 3. 3 Lecture Hours.
Changing views of adolescence and youth culture in the United States; developmental assets and principles of developing positive youth development supports, opportunities and services; mentoring and staff development for youth serving agencies; goals, program emphases, administrative methods and membership of major youth serving organizations.

RPTS 371 Understanding and Developing Effective Skills for Youth Development
Credits 3. 3 Lecture Hours.
Development of skills needed to effectively work with youth; issues such as youth participation, conflict resolution, youth-adult collaboration, leadership development, youth empowerment and youth voice; connection of theoretical concepts to practice.
Prerequisites: RPTS 370 and junior or senior classification.

RPTS 380 Visitor and Resource Protection I
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental values and operations of the National Park Service; communication, leadership and conservation skills and practice needed for employment with federal park agencies; physical fitness training.
Prerequisite: Junior or senior classification or approval of instructor.

RPTS 381 Visitor and Resource Protection II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental values and operations of the visitor and resource protection branch of the National Park Service; law enforcement, customer service, ethics and team cohesion.
Prerequisites: RPTS 380; junior or senior classification; approval of instructor.

RPTS 382 Visitor and Resource Protection III
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Law Enforcement Operations of the National Park Service; policies, laws and procedures designated by 36 US Code of Federal Regulations; focus and analysis of watershed law enforcement events; critical examination of criminal justice system through advanced leadership; assessment of 21st century policing report.
Prerequisites: RPTS 381; junior or senior classification; approval of instructor.

RPTS 401 Tourism and Recreation Enterprises
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Market and financial feasibility analysis; resource characteristics, location and market aspects of tourism and recreation enterprises; sources of funding for facility development; approaches to marketing recreation, park and tourism services; applying knowledge to case study situations.
Prerequisites: RPTS 304 or RPTS 423 and senior classification.

RPTS 402 Park Planning and Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Classification of areas according to primary function, location and clientele served; basic park planning principles involving scale, circulation, function and spatial relationships; methodology for establishing planning goals, objectives and planning strategies.
Prerequisites: Junior or senior classification.

RPTS 403 Financing and Marketing Recreation, Park and Tourism Resources
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Public sources of funding for facility development and of approaches to marketing recreation, park, and tourism services; applying knowledge to case study situations.
Prerequisites: RPTS 304 or RPTS 423; senior classification.

RPTS 404/SCI 404 Sociology of the Community
Credits 3. 3 Lecture Hours.
Organization of American communities examining the bases of community, types of communities and the changes faced by communities.
Prerequisite: SOCI 205; SOCI-404 also taught at Galveston campus.
Cross Listing: SOCI 404/RPTS 404.

RPTS 408 Community Development and Supporting Institutions
Credits 3. 3 Lecture Hours.
Scope, function and mission of domestic and international organizations that support community development efforts.
Prerequisites: RPTS 308 or approval of instructor; junior or senior classification.

RPTS 411 Cruise Tourism
Credits 3. 3 Lecture Hours.
Overview of cruise tourism; management of service sectors; understanding of cultural aspects of places traveled; cruise marketing/decision making; geography of cruising; youth programming; agrotourism; identification of issues related to the economic, technological and political aspects of cruise tourism.
Prerequisite: Junior or senior classification.
RPTS 421 Hotel and Resort Operations
Credits 3. 3 Lecture Hours.
Examination of the crucial elements involved in the successful operation of a hotel or resort and how they interrelate; analysis and application of management principles in the major departments of hotels and resorts to include rooms division, food and beverage, recreation, sales and marketing.
Prerequisite: Junior or senior classification.

RPTS 423 Tourism Management
Credits 3. 3 Lecture Hours.
Management issues and tools related to the travel and tourism industry; history, planning, operations, leading, directing and controlling tourism businesses; complexity and scope of tourism systems; issues related to ethics and sustainability; managing tourism in different environments; roles of technology and information technology; future of tourism.
Prerequisite: RPTS 302.

RPTS 426 Tourism Impacts
Credits 3. 3 Lecture Hours.
Consequences and impacts of various kinds of tourism development for host communities and regions; read and evaluate case studies from Texas, other areas in the United States and internationally; economic, environmental, social, cultural and political impacts associated with tourism proposals, project development, tourist activity, industry expansion and industry decline.
Prerequisite: RPTS 302.

RPTS 444 Service Quality for Hospitality Organizations
Credits 3. 3 Lecture Hours.
Application of SERVQUAL concepts with focus on implementing measures to enhance customer service; in-depth study of planning and administering hospitality service strategies, measurement of service delivery, repair and recovery of service delivery gaps, and management and training of employees; practical applications of research in the field.
Prerequisite: RPTS 302.

RPTS 460/RENR 460 Nature, Values, and Protected Areas
Credits 3. 3 Lecture Hours.
Writing-intensive discussion of the ways in which protected areas reflect human values about nature; identify stakeholders in and around protected areas, exploring how interests either conflict or coincide; evaluate social, economic, cultural, and ecological trade-offs of different approaches to conservation.
Prerequisite: RPTS 307 or RPTS 316; or 9 hours of credit in natural resource courses.
Cross Listing: RPTS 370, RPTS 371 and junior or senior classification.

RPTS 472 Grant Writing and Program Evaluation for Youth Development Organizations
Credits 3. 3 Lecture Hours.
Development of knowledge and skills to successfully write grant proposals and design program evaluation plans for youth development organizations; appropriate funding opportunities and considerations; grant guidelines; budget, timeline, and personnel; program evaluation plan development; evaluating grant proposals.
Prerequisites: RPTS 370 and RPTS 371, or approval of instructor; junior or senior classification.

RPTS 474 Management of Programs and Services for Youth
Credits 3. 3 Lecture Hours.
Organizational behavior, administration and management of public, non-profit and commercial youth programs and agencies; strategic planning, marketing, financial resource development, budgeting and fiscal management; contemporary issues facing youth development field; international perspective on youth agencies.
Prerequisite: RPTS 304, RPTS 323, or RPTS 423; RPTS 370; junior or senior classification.

RPTS 476 Leadership for Outdoor Recreation
Credits 3. 3 Lecture Hours.
Leadership principles related to outdoor recreation; classroom instruction and experiential learning; skills training through field trips; risk management planning, environmental education, group facilitation, and trip planning.
Prerequisite: Junior or senior classification.

RPTS 478 Youth Development Practice
Credits 3. 3 Lecture Hours.
Application of youth development philosophy in community settings; principles and practices of community youth development and existing youth development models; local efforts related to community youth development.
Prerequisite: RPTS 370, RPTS 371 and junior or senior classification.

RPTS 481 Seminar
Credit 1. 1 Lecture Hour.
Development of knowledge and skills necessary for employment in the recreation, park and tourism fields; focus on career preparation and job search strategies, professionalism, networking and opportunities for advanced education.
Prerequisite: Junior or senior classification; RPTS majors only.

RPTS 484 Internship
Credits 0 to 6. 0 to 6 Other Hours.
Practical experience working in a professional recreation, park or tourism setting. Offered on an individual basis. May be repeated for credit.
Prerequisite: RPTS 311, RPTS 340 and RPTS 481.

RPTS 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
For individual research by advanced undergraduates upon a broad range of subjects not included in established courses.
Prerequisite: Junior classification or approval of department head.

RPTS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 9 Lab Hours.
Selected topics in an identified field of recreation and parks. May be repeated for credit.

RPTS 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in recreation park and tourism sciences. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.
RUSS - Russian (RUSS)

RUSS 101 Beginning Russian I
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(RUSS 1411) Beginning Russian I. Elementary language study with oral, written and reading practice. Attention given to background for conversation. Part of class preparation will be done in language laboratory.  
Prerequisite: RUSS 101.

RUSS 102 Beginning Russian II
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(RUSS 2311) Intermediate Russian I. Continuation and review of grammar, selected readings; material to develop conversational and reading ability.  
Prerequisite: RUSS 102.

RUSS 201 Intermediate Russian I
Credits 3. 3 Lecture Hours.  
(RUSS 2312) Intermediate Russian I. Continuation of RUSS 201. Part of class preparation will be done in language laboratory.  
Prerequisite: RUSS 201.

RUSS 202 Intermediate Russian II
Credits 3. 3 Lecture Hours.  
Readings taken from standard works.  
Prerequisite: RUSS 202.

RUSS 211 Russian Conversation
Credits 3. 3 Lecture Hours.  
Development of conversational skills in Russian; building of active vocabulary; exercises with emphasis on correct diction; oral presentations; skits; dialogues; discussion of current events; conducted in Russian.  
Prerequisite: RUSS 101 or equivalent.

RUSS 221 Field Studies I
Credits 3. 3 Lecture Hours.  
Russian language and culture, taught in the former Soviet Union; supervised travel of cultural interest; participation in courses and activities at a Russian university or institute; exams, written and oral reports.  
Prerequisites: RUSS 101 with a grade of B or higher; concurrent enrollment in RUSS 222.

RUSS 222 Field Studies II
Credits 3. 3 Lecture Hours.  
Russian language and literature taught in the former Soviet Union in cooperation with a Russian university or institute; exams, written and oral reports.  
Prerequisites: RUSS 101 with a grade of B or higher; concurrent enrollment in RUSS 221.

RUSS 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.  
Individual supervision of readings or assigned projects in Russian; selected for each student individually.  
Prerequisite: Approval of instructor and department head.

RUSS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of Russian. May be repeated for credit.  
Prerequisite: Approval of instructor.

RUSS 301 Advanced Grammar and Composition I
Credits 3. 3 Lecture Hours.  
Review of grammar at an advanced level; readings of literary texts for analysis and emulation; development of oral and written skills; required for modern languages majors in Russian; conducted in Russian.  
Prerequisite: RUSS 202 or RUSS 222 or registration therein.

RUSS 302 Advanced Grammar and Composition II
Credits 3. 3 Lecture Hours.  
Continuation of RUSS 301; literary interpretation of longer works; particular emphasis on the short stories of Chekhov and other major authors; required for modern languages majors in Russian; conducted in Russian.  
Prerequisite: RUSS 202 or RUSS 222 or concurrent enrollment.

RUSS 322 Masterpieces of Russian Literature
Credits 3. 3 Lecture Hours.  
Selected works of Russian literature, representative of its major authors and most important literary movements; literary analysis and evaluation of each work’s cultural background; conducted in Russian.  
Prerequisite: RUSS 202 or RUSS 222 or registration therein. May be retaken with approval of department head.

RUSS 410 Seminar in Russian Studies
Credits 3. 3 Lecture Hours.  
Exploration of a significant topic, event, or period in Russian literature and culture; taught in Russian.  
Prerequisite: RUSS 202 or RUSS 222.

RUSS 441/EURO 441 The Russian Novel I: Tolstoy and Dostoevsky
Credits 3. 3 Lecture Hours.  
Study of the major works of Tolstoy and Dostoevsky; discussion of the literary nature and purpose of novels, especially in the context of Russian culture; taught in English.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: EURO 441/RUSS 441.

RUSS 442/EURO 442 The Russian Novel II: The Twentieth Century
Credits 3. 3 Lecture Hours.  
Study of major Russian novels from ca. 1900 to the end of Stalinism; exploration of topics relevant to Russia’s experience in the 20th century; taught in English.  
Prerequisite: Junior or senior classification, or approval of instructor.  
Cross Listing: EURO 442/RUSS 442.

RUSS 443/EURO 443 Contemporary Russian Prose
Credits 3. 3 Lecture Hours.  
Study of Russian and Soviet 20th century prose literature, with emphasis on post-Stalinist and post-glasnost writers; taught in English.  
Prerequisite: RUSS 201 or concurrent enrollment, or approval of instructor.  
Cross Listing: EURO 443/RUSS 443.

RUSS 444/EURO 444 Russian Drama
Credits 3. 3 Lecture Hours.  
Introduction to the masterpieces of Russian drama from the 19th century to the present; includes such authors as Pushkin, Chekhov, Gorky, Arbuzov, Rozov and Petrushevskaya; taught in English.  
Prerequisite: RUSS 201 or concurrent enrollment, or approval of instructor.  
Cross Listing: EURO 444/RUSS 444.
RUSS 446/EURO 446 Russian Artistic Culture I: Beginnings to 1900
Credits 3. 3 Lecture Hours.
Masterpieces of Russian art, including architecture, dance, theater, music, and literature, from its beginnings until ca. 1900; taught in English.
Prerequisite: RUSS 201 or concurrent enrollment, or approval of instructor.
Cross Listing: EURO 446/ RUSS 446.
RUSS 447/EURO 447 Russian Artistic Culture II: 1890 to Present
Credits 3. 3 Lecture Hours.
Masterpieces of Russian art, including architecture, dance, theater, music, film, and literature, from ca. 1890 to the present; taught in English.
Prerequisite: RUSS 201 or concurrent enrollment, or approval of instructor.
Cross Listing: EURO 447/ RUSS 447.
RUSS 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually; written and oral reports.
Prerequisite: Approval of instructor and department head.
RUSS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Russian language, literature and civilization.
Prerequisite: Approval of instructor.
RUSS 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in Russian. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of department head.

SCEN - College of Science (SCEN)

SCEN 101 Contemporary Issues in Science - Cosmos, Earth and Humanity
Credits 3. 3 Lecture Hours.
Science for citizens; interdisciplinary survey of contemporary issues in the science of our universe or cosmos, Earth and humanity, including the big bang, evolution, genetics, vaccines and drugs; future outlook on humanity, including artificial intelligence, cryptography and cybersecurity; critically analyze science presented in the news, on television and on social media; ethical implications of research.

SCEN 102 Contemporary Issues in Science - The Environment
Credits 3. 3 Lecture Hours.
Science for citizens; interdisciplinary survey of contemporary issues in and future outlook on the science of our environment, including climate change, energy, plastics, agriculture, and food and water safety; future outlook on the health of our environment; critically analyze science presented in the news, on television and on social media.

SCEN 201 Experiences In Secondary Math and Science Classrooms
Credit 1. 1 Lecture Hour. 1 Lab Hour.
Field based with emphasis on culture of secondary schools through experiences in science, technology, engineering or math classrooms; focuses on characteristics, behaviors and traits of effectively teaching adolescents in diverse middle and high school settings; educational standards, high-stakes testing and research based teaching strategies.
Prerequisite: Major in science or mathematics related field or approval of instructor.

SCEN 289 Special Topics in...
Credits 0 to 3. 0 to 3 Lecture Hours. 0 to 3 Lab Hours.
Selected topics in an identified area of science. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of credit.

SCEN 292 Cooperative Education in Science
Credits 0 to 2. 0 to 2 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be required.
Prerequisite: Approval of the college coordinator of cooperative education.

SCEN 301 College of Science Study Abroad
Credits 0 to 18. 0 to 18 Other Hours.
For student in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to approved program and approval of academic dean.

SCEN 392 Cooperative Education in Science
Credits 2. 20 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be required.
Prerequisite: Approval of the college coordinator of cooperative education.

SCEN 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 8 Lab Hours.
Selected topics in an identified area of science. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of instructor.

SCEN 492 Cooperative Education in Science
Credits 0 to 2. 0 to 2 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be required.
Prerequisite: Approval of the college coordinator of cooperative education.

SCMT - Supply Chain Mgmt (SCMT)

SCMT 300 Business Communications I
Credit 1. 1 Lecture Hour.
Proper techniques for writing major-specific business communications; progress report, memorandum, letter, executive summary; verbal communications via phone call and person-to-person communications; critiques of personal and peer writing.
Prerequisites: Junior or senior classification; SCMT majors only.
SCMT 303 Statistical Methods
Credits 3. 3 Lecture Hours.
Collection, tabulation and presentation of numerical data; sampling, estimation of averages and variation, probability and error, hypothesis testing and correlation.
Prerequisite: ACCT 230 or concurrent enrollment; ISTM 210, AGEc 217, or MARA 250, or concurrent enrollment; MGMT 211 or concurrent enrollment; and admission to upper division in Mays Business School or admission to Maritime Administration major (MARA); also taught at Galveston campus.

SCMT 305 Intermediate Business Statistics
Credits 3. 3 Lecture Hours.
Selected topics in statistical analysis; practical applications to functional problems in accounting, finance, marketing and management; applications of existing computer programs minimize computations.
Prerequisite: SCMT 303 or STAT 301, STAT 302, or STAT 303.

SCMT 309 Supply Chain Management Principles
Credits 3. 3 Lecture Hours.
Integrated management of the make, buy and delivery processes in firms; emphasis on issues specific to the procurement, manufacturing, and logistics disciplines; requirements for operating in a global marketplace; includes cultural, functional and strategic aspects of global business.
Prerequisite: ISTM 209; junior classification; University Studies Business Concentration students only.

SCMT 335 Sourcing and Procurement
Credits 3. 3 Lecture Hours.
Processes to identify and manage suppliers for goods and services to support operations; including sourcing, contracting, negotiations, buying procedures, cost and price analysis, vendor relations, auditing and inspection, supplier relations, and applications to information technology systems.
Prerequisite: SCMT 364 with a grade of C or better; SCMT 340 and SCMT 361; or approval of instructor.

SCMT 336 Data Analytics with Optimization
Credits 3. 3 Lecture Hours.
Application of quantitative decision-making techniques to management decision problems; focus on model development, solution and implementation of results; optimization.
Prerequisites: SCMT 364; junior or senior classification; also taught at Galveston campus.

SCMT 340 Global Supply Chain Management
Credits 3. 3 Lecture Hours.
Extend knowledge of basic concepts of transportation and logistics to specialized situations in international business in order to understand (a) the international trade and commercial environment, (b) exporting and importing documentation and procedures and (c) operations involving international shipping and transportation.
Prerequisite: SCMT 364 with a grade of C or better.

SCMT 345 Business Process Design
Credits 3. 3 Lecture Hours.
Design, implementation and improvement of the processes by which a firm sources, makes, and delivers products and services to meet customer requirements; includes six-sigma, process flow charting, computer simulation, and other techniques to document, analyze, design and improve business processes.
Prerequisite: SCMT 364 with a grade of C or better; SCMT 340 and SCMT 361; or approval of instructor.

SCMT 361 Operations Planning and Control
Credits 3. 3 Lecture Hours.
Planning and controlling the conversion of materials, labor, capital, and information into goods and services for both manufacturing and service organizations; emphasis on managerial and technical aspects of planning and controlling operating systems.
Prerequisite: SCMT 364 with a grade of C or better; or approval of instructor.

SCMT 364 Operations Management
Credits 3. 3 Lecture Hours.
Concepts, issues and techniques used to plan, analyze, and control systems of production; operational problems in producing goods and services.
Prerequisite: SCMT 303, or STAT 301, STAT 302, or STAT 303, or concurrent enrollment; ACCT 230 or concurrent enrollment; ISTM 210, AGEc 217, or MARA 250, or concurrent enrollment; MGMT 211 or concurrent enrollment; and admission to upper division in Mays Business School or admission to Maritime Administration major (MARA); also taught at Galveston campus.

SCMT 375 Supply Chain Security
Credits 3. 3 Lecture Hours.
Security of global supply chains; selection of appropriate technologies utilized in securing global supply chains; planning responses to disaster events in relation to the delivery and receipt of goods and services; designing draft security policies for an organization's supply chain.
Prerequisite: SCMT 364.

SCMT 455/ISTM 455 Cybersecurity Management
Credits 3. 3 Lecture Hours.
Explores business, managerial and technological aspects of information and cybersecurity; analysis, design, implementation and management issues surrounding effective information security; includes risk management, business continuity planning, and security policy development.
Prerequisite: ISTM 310 or SCMT 375.
Cross Listing: ISTM 455/SCMT 455.

SCMT 465 Information Technology for Supply Chain Management
Credits 3. 3 Lecture Hours.
Overview of information technology applications for planning and controlling the design, manufacture and distribution of goods and services; managerial and technical aspects of information technology for product design, shop floor, factory, enterprise and supply chain management.
Prerequisite: SCMT 340 with a grade of C or better; SCMT 361; or approval of instructor.

SCMT 468 Enterprise Resource Planning
Credits 3. 3 Lecture Hours.
Application of advanced information technology for integrating business functions through distributed databases; applications for planning, scheduling, purchasing and costing to multiple layers of the organization.
Prerequisite: SCMT 364.

SCMT 484 Supply Chain Management Internship
Credits 1 to 4. 1 to 4 Other Hours.
A directed internship in an organization to provide students with a learning experience supervised by professionals in organizational settings appropriate to the student's professional objectives. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: SCMT major and approval of academic advisor and instructor.
SCMT 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed study of selected problems in an area of supply chain management not covered in other courses.  
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.  

SCMT 489 Special Topics In...  
Credits 1 to 4. 1 to 4 Other Hours.  
Selected topic in an identified field of supply chain management two times for credit.  
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.  

SCSC - Soil and Crop Sciences (SCSC)  

SCSC 105 World Food and Fiber Crops  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
(AGRI 1307 and AGRI 1107, AGRI 1407) World Food and Fiber Crops. Plant relationships, structure and development; environmental factors affecting plants; technological aspects of agricultural practices; food production for an increasing population.  

SCSC 201 Great Plains Settlement and Farming  
Credits 3. 3 Lecture Hours.  
American Indian hunting and farming; transformation by Manifest destiny, Homestead Act, railroads, Indian Wars, U.S. Army, crops and farm families; effects of World Wars, Great Depression, Dust Bowl, irrigation, fertilization, pest controls, precision farming.  

SCSC 205 Problem Solving in Plant and Soil Systems  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Problems in management of soils, crops, and natural resources; problem solving skills including collecting, interpreting, using and communicating scientific and nonscientific data.  

SCSC 289 Special Topics In...  
Credits 0 to 4. 0 to 4 Other Hours.  
Selected topics in an identified area of soil and crop sciences. May be repeated for credit.  

SCSC 291 Research  
Credits 1 to 3. 1 to 3 Lecture Hours.  
Research conducted under the direction of faculty member in agronomy. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.  

SCSC 301 Soil Science  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Evaluation of the nature and properties of soils; explanation of the various soils, their components and roles in the environment using the scientific methods and technology.  
Prerequisite: Junior or senior classification, or approval of instructor.  

SCSC 302 Recreational Turf  
Credits 3. 3 Lecture Hours.  
Principles underlying construction and maintenance practices for turf facilities including athletic fields, golf courses, parks and home lawns; aesthetic, safety and economic aspects of turf varieties, soil conditions, plant protectants and maintenance equipment.  
Prerequisite: Biology or approval of instructor.  

SCSC 302 Professional Development in Turfgrass  
Credit 1. 2 Lab Hours.  
Includes but not limited to fertilizer, pesticide, irrigation calculations; turfgrass, insect and weed identification and management, soils and rootzone construction; irrigation system operation and auditing; sprayer and spreader operation and calibration; builds upon and allows application of information obtained in SCSC 302; designed to better prepare those intending to compete in the GCSAA and STMA Collegiate Turf Bowl competitions.  
Prerequisite: SCSC 302 or registration therein.  

SCSC 304 Plant Breeding and Genetics  
Credits 3. 3 Lecture Hours. 0 Lab Hours.  
Genetic improvement of crops by hybridization and selection; special breeding methods and techniques applicable to naturally self-pollinated, cross-pollinated and asexually reproduced plants.  
Prerequisite: SCSC 105 or SCSC 205, or approval of instructor.  

SCSC 305 Professional Development in Agronomy  
Credit 1. 2 Lab Hours.  
Enhancement of human relation skills related to a career in soil and crop sciences; field trip to Mississippi to interact with leadership from a global agricultural company; on-campus experiences to improve effective learning practices, job seeking and retention and setting and achieving near-term and long-term professional goals.  
Prerequisites: Junior or senior classification or approval of instructor.  

SCSC 307 Crop Biology and Physiology  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Emphasis on seed biology, germination, development of cells and tissues, anatomy, and growth and development of crop plants; plant hormones and tropisms, membranes and membrane transport, water absorption and transport through plants, photosynthesis, respiration and carbohydrate metabolism, and flowering; environmental effects on crop adaptation, growth, development, and productivity.  
Prerequisites: SCSC 205, junior or senior classification, or approval of instructor.  

SCSC 309 Water in Soils and Plants  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Fundamentals of plant water use, and water movement and storage in soils; evapotranspiration, plant water requirements and irrigation scheduling; issues impacting irrigation and water quality; techniques for measuring soil and plant water relations.  
Prerequisite: Junior or senior classification, or approval of instructor.  

SCSC 310 Soil Morphology and Interpretations  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Field study of morphological features of soil profiles and the morphological characterization of important soils of Texas in relation to soil use and management.  
Prerequisite: SCSC 301 or registration therein.  

SCSC 311 Principles of Crop Production  
Credits 3. 3 Lecture Hours.  
Origin and development of major U.S. agronomic crops; crop and species adaptation; crop management factors such as cultivar selection, planting, pest control, plant nutrition, irrigation, harvesting, organic farming; conservation agriculture; bioenergy crops; influence of markets, government policies, and global economy on cropping strategies; provide an understanding of the major row and drill (agronomic) crops grown in the United States including barley, corn, cotton, grain sorghum, peanuts, rice, soybean and wheat.  
Prerequisites: SCSC 105 or SCSC 205, junior or senior classification, or approval of instructor.  

SCSC 312 Professional Development in Turfgrass  
Credit 1. 2 Lab Hours.  
Enhances knowledge in the areas of turfgrass, insect and weed identification and management, soils and rootzone construction; irrigation system operation and auditing; sprayer and spreader operation and calibration; builds upon and allows application of information obtained in SCSC 312; designed to better prepare those intending to compete in the GCSAA and STMA Collegiate Turf Bowl competitions.  
Prerequisite: SCSC 302 or registration therein.
SCSC 315 Hemp Production and Utilization
Credits 3. 3 Lecture Hours.
Advanced topics in principles and practices of producing hemp and its utilization in industrial, nutritional and therapeutic activities.
Prerequisite: Junior or senior classification.

SCSC 330 Social and Ethical Aspects of International Cropping Systems
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Philosophical basis of ethical decisions; includes slavery, war, population growth, migration, farm workers, chemical inputs, genetically modified organisms, soil and water conservation and protection of wild species.
Prerequisite: Junior or senior classification.

SCSC 401/FIVS 401 Forensic Soil Science
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Examination of soils biology, chemistry and physical attributes to solve crimes; soil and geologic characteristics associated with crime scene examination; physical, biological and chemical characteristics and use of trace evidence.
Prerequisite: Grade of C or better in FIVS 482.
Cross Listing: FIVS 401/SCSC 401.

SCSC 402 Crop Stress Management
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Identification, measurement, biology, physiology and management of crop stress; limitations of specific environments to crop productivity; morphological and physiological crop stress response mechanisms.
Prerequisites: SCSC 307, junior or senior classification, or approval of instructor.

SCSC 405 Soil and Water Microbiology
Credits 3. 3 Lecture Hours.
Roles of soil and water microorganisms in the sustainability and productivity of various ecosystems with specific emphasis on plant-microbial interactions, nutrient cycling, degradation of pesticides and other xenobiotics, generation of trace gases, and soil and water quality; hands-on laboratory experience with current techniques in soil and water microbiology.
Prerequisites: Junior or senior classification, or approval of instructor.

SCSC 406 Soil and Water Microbiology Laboratory
Credit 1. 2 Lab Hours.
Hands-on experience with current techniques for examining the types, numbers, activity and roles of soil and water microorganisms with specific application to the carbon, nitrogen and sulfur cycle; plant-microbial interactions; soil and water quality.
Prerequisites: SCSC 405 or concurrent enrollment; junior or senior classification or approval of instructor.

SCSC 410 International Agricultural Systems
Credits 3. 3 Lecture Hours.
Contrast modern agriculture systems with those in developing countries; emphasis on natural resources and technologies interacting with economic and social development on a global scale.
Prerequisite: Junior or senior classification, or approval of instructor.

SCSC 411 Biotechnology for Crop Improvement
Credits 3. 3 Lecture Hours.
Use of biotechnology to improve agricultural, horticultural and forest crops; techniques and methods used and case studies where biotechnology has been used to alter traits such as pathogen resistance, protein or oil consumption, ripening, fertility and wood properties.
Prerequisite: BIOL 111 or equivalent.
Cross Listing: MEPS 411 and GENE 411.

SCSC 415 Hemp Production and Utilization
Credits 3. 3 Lecture Hours.
Advanced topics in principles and practices of producing hemp and its utilization in industrial, nutritional and therapeutic activities.
Prerequisite: Junior or senior classification.

SCSC 420 Brazilian Agriculture and Food Production Systems
Credits 3 to 6. 3 to 6 Lecture Hours.
Comparison and study of Brazilian and U.S. agriculture and culture related to soil, water, and forest conservation and management in Brazil; tour and learn about Amazon River, rain forest, Brasilia, farm, ranch, and floral production systems, agricultural cooperatives and research, sugar and alcohol production, phosphate mining and production; visit points of interest.
Prerequisite: Junior or senior classification or approval of instructor.

SCSC 421 International Agricultural Research Centers - Mexico
Credits 3. 3 Lecture Hours.
International agricultural research; CIMMYT interaction; modern and underdeveloped tropical agricultural systems; introduction to Mexican culture; critical evaluation of complex and international agricultural issues and research programs.
Prerequisites: Junior or senior classification and approval of instructor.

SCSC 422 Soil Fertility and Plant Nutrient Management
Credits 3. 3 Lecture Hours.
Chemical and biological reactions in soils that influence nutrient availability to plants; environmental aspects associated with nutrient availability and fertilization, especially for nitrogen (N) and phosphorus (P).
Prerequisites: SCSC 301, junior or senior classification, or approval of instructor.

SCSC 427 Sports Field Construction
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Development of knowledge, skills, and experiences for the design and construction of a turfgrass-based sports field; case studies and visits to model fields, guest lectures from sports field owners, designers, and construction company managers; hands-on construction of a small-scale sand-based sports field.
Prerequisites: SCSC 309, junior or senior classification, or approval of instructor.

SCSC 428 Advanced Turf Ecology and Physiology
Credits 3. 3 Lecture Hours.
Examination of how environmental stresses, genetics, and cultural management practices influence the growth, development, and physiology of turfgrasses; exploration of how turf communities function within urban landscapes; introduction to environmental, social, and political issues encountered when managing these areas.

SCSC 429 Turf Management Systems
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Development of turf management plans for large turfgrass sites including parks, golf courses and sports facilities; use of case studies to critically analyze turf management programs.
Prerequisite: SCSC 428.

SCSC 430 Turfgrass Maintenance
Credits 3. 3 Lecture Hours.
Effective leadership and management strategies, organizational structures, human resource management, employee training and motivational strategies, effective professional communication approaches with clientele, employees and within a leadership team within a turfgrass facility framework; emphases on ethics, professional development and life-long learning.
Prerequisite: SCSC 429 or approval of instructor.
SCSC 432 Soil Fertility and Plant Nutrient Management Laboratory  
Credit 1. 3 Lab Hours.  
Methods used in soil testing, fertilizer recommendations, chemical and physical properties of soils, and determination of specific characteristics of a collected and analyzed soil sample.  
Prerequisites: SCSC 301; SCSC 422 or registration therein, junior or senior classification, or approval of instructor.

SCSC 441 Advances in Agronomic Sciences  
Credits 3. 3 Lecture Hours.  
Synthesis, integration and extension of agronomic and related concepts for understanding the functioning and management of agricultural cropping systems.  
Prerequisite: Senior classification or approval of instructor.

SCSC 444 Forage Ecology and Management  
Credits 3. 3 Lecture Hours.  
Investigation of multidisciplinary approaches toward the development of integrated forage, livestock, and wildlife production systems that are economically feasible and environmentally sustainable.  
Prerequisite: Junior or senior classification or approval of instructor.

SCSC 446 Weed Management and Ecology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Practical information related to weed management and ecology for various vegetative systems to include turf and agronomic crops; calibration of applicators, herbicide labels, mode of action of herbicides, herbicide-resistant weed management.  
Prerequisites: BIOL 111, BIOL 101 or BIOL 113, junior or senior classification.

SCSC 453 Essentials for Weed Systematic Identification and Management in Agronomy  
Credits 3. 3 Lecture Hours.  
Fundamental understanding and hands-on training on the basics of plant weed identification and management; relevant to agronomy, turf, horticulture and rangeland science and vegetation identification and management.  
Prerequisite: Junior or senior classification.

SCSC 455 Environmental Soil and Water Science  
Credits 3. 3 Lecture Hours.  
Discussion of physical, chemical, and biological properties of soil and water and the impact on productivity and sustainability of various ecosystems; application of the knowledge of properties and soil processes to develop and evaluate strategies for protecting and/or improving soil and water quality.  
Prerequisite: SCSC 301 or approval of instructor.

SCSC 458 Watershed, Water and Soil Quality Management  
Credits 3. 3 Lecture Hours.  
Land use impact on surface and ground water chemistry; legislation impacting water quality; surface and groundwater impairment and restoration.  
Prerequisite: CHEM 101 or equivalent or approval of instructor; junior or senior classification.

SCSC 481 Senior Seminar  
Credits 2. 2 Lecture Hours.  
Capstone course bringing together student experiences, exams, and exercises necessary for completing and assessing curriculum program learning outcomes.  
Prerequisite: Senior classification.

SCSC 484 Internship  
Credits 0 to 4. 0 to 4 Other Hours.  
Practical on-the-job experience in the student's area of specialization.  
Prerequisites: Junior or senior classification; approval of instructor; 2.0 or better GPR in major and overall.

SCSC 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
For advanced undergraduates to permit field or laboratory investigation or study of subject matter not included in established courses.  
Prerequisite: 10 hours of junior and senior agronomy or approval of instructor.

SCSC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of agronomy. May be repeated for credit.  
Prerequisite: Approval of department head.

SCSC 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in agronomy. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

SEFB - Special Ed Field Based (SEFB)

SEFB 420 Education and Employment Issues in Secondary Special Education  
Credits 3. 2 Lecture Hours. 3 Other Hours.  
Field-based course involving psychological, social, physical and cognitive development of secondary-age students; career assessment; programmatic options within educational and employment settings; transition models from school to adult settings.  
Prerequisites: Admission to professional phase of program.

SEFB 425 Student Teaching in Special Education  
Credits 6. 24 Other Hours.  
Observation and participation in an accredited special education classroom; techniques of teaching special education and appropriate instructional strategies for students with exceptionalities. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Admission to professional phase of program and to student teaching.

SEFB 430 Practicum in Applied Behavior Analysis  
Credits 3. 9 Other Hours.  
University-supervised experience related to specializations in special education and behavior analysis. May be taken 8 times for credit.  
Prerequisites: Junior or senior classification; approval of instructor; approval of department head.

SEFB 499  
Credits 15. 15 Lecture Hours.
SENG - Safety Engineering (SENG)

SENG 309/NUEN 309 Radiological Safety
Credits 3. 3 Lecture Hours.
Interactions of nuclear radiations with matter and biological systems; theory and practice of radiation dosimetry as applied to radiation protection; design and application of radiation dosimetry systems for personnel monitoring, area radiation monitoring and accident situation; includes external and internal dosimetry as well as long-term risk analysis.
Prerequisite: NUEN 302.
Cross Listing: NUEN 309/SENG 309.

SENG 310 Industrial Hygiene Engineering
Credits 3. 3 Lecture Hours.
Application of scientific and engineering principles in the selection and design of control systems related to chemical, physical and ergonomic exposures in the process and manufacturing industries; relationships of criteria, analysis and specifications for the assessment and control of occupational related illnesses.

SENG 312 System Safety Engineering
Credits 3. 3 Lecture Hours.
Application of system safety analytical techniques to the design process; emphasis on the management of a system safety or product safety program; relationship with other disciplines such as reliability, maintainability, human factors and product liability applications.
Prerequisite: Junior or senior classification.

SENG 422 Fire Protection Engineering - Facilities Design
Credits 3. 3 Lecture Hours.
Design of facilities from a fire protection engineering viewpoint including fire detection and fire control systems; materials, equipment, exposures, occupancies and processes; both public and industrial occupancies studied to determine fire protection design specifications.
Prerequisite: SENG 322 or approval of instructor.

SENG 430/CHEN 430 Risk Analysis in Safety Engineering
Credits 3. 3 Lecture Hours.
Concepts of risk and risk assessment, which uses all available information to provide a foundation for risk-informed and cost-effective engineering practices; examples and exercises are drawn from a variety of engineering areas.
Prerequisite: Junior or senior classification.
Cross Listing: CHEN 430/SENG 430.

SENG 455/CHEN 455 Process Safety Engineering
Credits 3. 3 Lecture Hours.
Applications of engineering principles to process safety and hazards analysis, mitigation, and prevention, with special emphasis on the chemical process industries; includes source modeling for leakage rates, dispersion, analysis, relief valve sizing, fire and explosion damage analysis, hazards identification, risk analysis, accident investigations.
Prerequisite: Senior classification in any engineering major.
Cross Listing: CHEN 455/SENG 455.

SENG 460/CHEN 460 Quantitative Risk Analysis in Safety Engineering
Credits 3. 3 Lecture Hours.
Fundamental concepts, techniques, and applications of risk analysis and risk-informed decision making for engineering students; practical uses of probabilistic methods are demonstrated in exercises and case studies from diverse engineering areas.
Prerequisite: Senior or graduate classification.
Cross Listing: CHEN 460/SENG 460.

SENG 477 Air Pollution Engineering
Credits 3. 3 Lecture Hours.
Design of air pollution abatement equipment and systems to include cyclones, bag filters and scrubbers; air pollution regulations; permitting; dispersion modeling; National Ambient Air Quality Standards.
Prerequisite: Grade of C or better in BAEN 340, CVEN 311/EVEN 311, or MEEN 344.
Cross Listing: BAEN 477 and MEEN 477.

SENG 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Permits students to develop special projects in industrial hygiene engineering, safety engineering or fire protection engineering. Project must be approved by department head.

SENG 489 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in industrial hygiene engineering, safety engineering or fire protection engineering of specific student interest. May be repeated for credit.
Prerequisite: Approval of instructor.

SOCI - Sociology (SOCI)

SOCI 203 U.S.-Mexico Border
Credits 3. 3 Lecture Hours.
Understanding of the U.S.-Mexico border from different theoretical perspectives, including structural violence, identity, power and demography.

SOCI 205 Introduction to Sociology
Credits 3. 3 Lecture Hours.
(SOCI 1301) Introduction to Sociology. Sociological perspectives including concepts and methods; social class and social status, the family, minorities, crime, religion, power, urbanization and population; also taught at Galveston campus.

SOCI 206 Global Social Trends
Credits 3. 3 Lecture Hours.
Long-term trends in world societies from ancient times to the present and to the foreseeable future; emphasis on contemporary international issues and problems, techniques of analysis and future projections.

SOCI 207/WGST 207 Introduction to Gender and Society
Credits 3. 3 Lecture Hours.
Similarities and differences between females and males in a number of cultures throughout the world; sociological analysis of gender in relation to social structure.
Cross Listing: WGST 207/SOCI 207.

SOCI 208 Introduction to Aging and Society
Credits 3. 3 Lecture Hours.
Introduction to a multidisciplinary approach to the social study of aging; separating facts from stereotypes about aging, examining basic sociological, psychological, and physiological factors affecting the aging process, and exploring institutions and careers related to aging.
SOCI 210 Sociology of Technology and Science
Credits 3. 3 Lecture Hours.
Examination of technology and science from a variety of theoretical perspectives; process by which engineered products are influenced by social factors as well as how they in turn, impact society; exploration and critique of classic and contemporary theories of technological development.

SOCI 211 Sociology of Deviance
Credits 3. 3 Lecture Hours.
Perspectives on non-normative behavior; theories of deviance.

SOCI 212 Sociology of Popular Culture
Credits 3. 3 Lecture Hours.
Examination of the classic and contemporary social scientific definitions and theories of culture, and popular versus "high" or elite culture(s), various forms and arenas of popular culture, such as television, film, and music, institutions and popular culture, identity (race, class, gender and sexuality) and popular culture.

SOCI 213/WGST 213 Gender and Health
Credits 3. 3 Lecture Hours.
An examination of social and historical context of health in the U.S., including inequities in health by gender, race, class and gendered issues in health professions.
Cross Listing: WGST 213/SOCI 213.

SOCI 217 Introduction to Race and Ethnicity
Credits 3. 3 Lecture Hours.
Introduction to the sociological examination of race and ethnicity in U.S. society; overview of theories and methods in the study of race and ethnicity; an understanding of how they function as individual and group-level identities, and organizing principles in social institutions.

SOCI 220 Methods of Social Research
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Relationships between sociological theory, research, qualitative evaluation of data; construction and use of analytical procedures and research techniques, and participant observation.

SOCI 229 Qualitative Methods
Credits 3. 3 Lecture Hours.
Methodologies in social research with emphasis on qualitative dimensions of inquiry; topics include in-depth interviewing, observation, unobtrusive measures, analysis of documents, fieldwork issues, ethics, note-taking, preliminary data analysis, and an overview of writing research reports based on qualitative research.

SOCI 230 Classical Sociological Theory
Credits 3. 3 Lecture Hours.
Role of theory in sociological study; the development of classical theoretical perspectives providing the foundation for contemporary theory.

SOCI 240 Tourism, Culture and Place
Credits 3. 3 Lecture Hours.
Analysis of tourist encounters; marketing and displaying culture to tourists; implications of tourism for urban economies and landscapes; interactions between tourists and locals; Galveston campus.

SOCI 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Special problems not covered by other courses. Course depends upon needs and interest of the student and upon the number of credit hours.
Prerequisite: Sophomore classification in sociology.

SOCI 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of sociology. May be repeated for credit.
Prerequisite: Approval of instructor; also taught at Galveston campus.

SOCI 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a chosen faculty member in sociology. May be taken for a maximum of three hours total credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

SOCI 304 Criminology
Credits 3. 3 Lecture Hours.
Criminal law and crime rates; explanations of criminal behavior; criminal careers, police, adult courts and prisons.
Prerequisite: Junior or senior classification.

SOCI 308 Community Issues in Aging
Credits 3. 3 Lecture Hours.
Detailed exploration of social forces impacting the elderly and their families at the community level; the impact of demographic, cultural, organizational and social factors on a community's response to an increasingly aging population; and the application of this knowledge through volunteer collaboration with a community nonprofit organization serving the elderly.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 310/WGST 310 Motherhood in Society
Credits 3. 3 Lecture Hours.
Examines expectations and/or practices relating to motherhood, with consideration of their cultural impact; taught from a social science perspective.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: WGST 310/SOCI 310.

SOCI 311 Social Change
Credits 3. 3 Lecture Hours.
Survey of major changes in American and Western society, the forces underlying change and tensions caused by social change.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 312 Population and Society
Credits 3. 3 Lecture Hours.
The causes and implications of major population trends; also taught at Galveston campus.

SOCI 313 Military, War and Society
Credits 3. 3 Lecture Hours.
Major trends and current topics in military organization; the experience and conduct of war; civil-military relations.

SOCI 314 Social Problems
Credits 3. 3 Lecture Hours.
Survey and exploration of causes and consequences of major social problems in American society such as poverty, unemployment, energy, alcohol, other drugs and sexual abuse.

SOCI 315/WGST 315 The Marriage Institution
Credits 3. 3 Lecture Hours.
Courtship, engagement, marriage, family formation, personal adjustment, conflict, financing and child rearing.
Cross Listing: WGST 315/SOCI 315.
SO CI 316/ WGST 316 Sociology of Gender
Credits 3. 3 Lecture Hours.
Sociological explanations of status differences between men and women; cross-cultural comparisons; gender role socialization, cultural stereotypes, discrimination; gender roles and status in the family, economy, religion, science, other social institutions; deviance, victimization and gender; recent social changes.
Cross Listing: WGST 316/ SOCI 316.

SO CI 317/ AFST 317 Racial and Ethnic Relations
Credits 3. 3 Lecture Hours.
Status of racial and ethnic groups such as Native Americans, African Americans, Latino Americans, Asian Americans, European Americans, and other groups in the political, economic, legal and social systems of the United States.
Cross Listing: AFST 317/ SOCI 317.

SO CI 319/ SPMT 319 Sociology of Sport
Credits 3. 3 Lecture Hours.
Social institution of sport and its consequences for American society; social organization from play to professional sport; violence, discrimination, women in sport; socialization implications from participation in sports.
Prerequisite: Junior or senior classification.
Cross Listing: SPMT 319/ SOCI 319.

SO CI 320 Demographic Methods
Credits 3. 3 Lecture Hours.
Procedures and techniques of demographic analysis; examination of demographic data; calculation of rates; construction of life tables; population estimates and projections.
Prerequisite: Junior or senior classification or approval of instructor; also taught at Galveston campus.

SO CI 322 Industrial Sociology
Credits 3. 3 Lecture Hours.
Work relations in jobs; social relations of groups and occupations and the social organization of small work groups, bureaucracies and modern large corporations.

SO CI 323/ AFST 323 Sociology of African Americans
Credits 3. 3 Lecture Hours.
Major elements of the Afro-American subculture in relation to white American society and its major social institutions.
Prerequisite: SOCI 205.
Cross Listing: AFST 323/ SOCI 323.

SO CI 326/ RELS 326 Sociology of Religion
Credits 3. 3 Lecture Hours.
Institution of religion and religious-related behavior; relationship between dynamic and structural religion and contemporary society.
Prerequisite: SOCI 205.
Cross Listing: RELS 326/ SOCI 326.

SO CI 328 Environmental Sociology
Credits 3. 3 Lecture Hours.
A comprehensive overview of environmental sociology, including major sociological theories, concepts and policy issues affecting our understanding of environmental changes; emphasizes social factors that impact environmental quality.
Prerequisite: SOCI 205 or approval of instructor; also taught at Galveston campus.

SO CI 329 Pacific Rim Business Behavior
Credits 3. 3 Lecture Hours.
Theoretical models of Asian cultures and practical protocol/etiquette related to business and work in China, Thailand, South Korea, Japan, Australia, and other Pacific Rim nations; discussions of national character, managerial behavior and values.

SO CI 330 Sociology of Nutrition
Credits 3. 3 Lecture Hours.
Social factors affecting the kind and amount of food consumed around the world; social consequences of nutritional status for family functioning and for international development.

SO CI 332/ WGST 332 Alternative Genders
Credits 3. 3 Lecture Hours.
Examination of theories and case studies involving alternative genders and sexualities, studies in their cultural contexts and including the role of factors such as race, class, ethnicity, age, and physical characteristics.
Prerequisites: 3 credits in SOCI or WGST; junior or senior classification.
Cross Listing: WGST 332/ SOCI 332.

SO CI 335 Sociology of Organizations
Credits 3. 3 Lecture Hours.
How people act in organizations; structures in organizations; the relationship between organizations and their environments.

SO CI 337 International Migration
Credits 3. 3 Lecture Hours.
Survey of theories and trends in international migration.
Prerequisite: Junior or senior classification, or approval of instructor.

SO CI 338 Latino Immigration
Credits 3. 3 Lecture Hours.
Theoretical and empirical examinations of the causes, processes, and impacts of Latin American immigration to the U.S.; Latino/a immigrant experience in the U.S.; effects of immigration on sending and receiving communities.
Prerequisite: Junior or senior classification or approval of the instructor.

SO CI 376/ MGMT 376 Entrepreneurial Perspectives
Credits 3. 3 Lecture Hours.
Enterprise as a career choice and its impact on society and economy; definitions of entrepreneurship; discovery of entrepreneurial opportunities and start-up funding; innovation and entrepreneurship theories for analyzing and predicting success of start-up and established entrepreneurial organizations.
Prerequisite: Admission to upper division in Mays Business School.
Cross Listing: MGMT 376/ SOCI 376.

SO CI 377 Entrepreneurial Thought Leaders Seminar
Credits 3. 3 Lecture Hours.
Origins of entrepreneurial cognition and motivation; entrepreneurial thought leaders share lessons from real world experiences in nonprofit, profit-making enterprise, government, public policy, and social mission domains; reflection on thought leaders experience in innovation and entrepreneurship; build exposure to entrepreneurial thinking, role modeling, mentoring, social capital.

SO CI 402 Sociology of Latin America
Credits 3. 3 Lecture Hours.
Latin American society; integration of viewpoints from the humanities, arts and social sciences.
Prerequisite: Junior or senior classification or approval of instructor.
SOCI 403 Sociology of Latinos
Credits 3. 3 Lecture Hours.
Exploration of social characteristics and acculturation problems of Mexican Americans in the United States; styles of life and cultural variability, social mobility, the struggle for advancement and identity through social movements.

SOCI 404/RPTS 404 Sociology of the Community
Credits 3. 3 Lecture Hours.
Organization of American communities examining the bases of community, types of communities and the changes faced by communities.
Prerequisite: SOCI 205; SOCI 404 also taught at Galveston campus.
Cross Listing: RPTS 404/SOCI 404.

SOCI 408 Death and Dying
Credits 3. 3 Lecture Hours.
Exploration of interdisciplinary social issues surrounding death and dying: the interactions among professionals, families, and dying individuals; the development and functioning of death norms and institutions (e.g., hospitals, funeral homes, hospice, capital punishment); the critical analysis of social/cultural inequalities affecting when and how we die.
Prerequisite: Junior of senior classification or approval of instructor.

SOCI 410/WGST 410 Reproduction, Birth and Power
Credits 3. 3 Lecture Hours.
Examination of topics related to reproductive practices, experiences and ideologies and of the constructed and contested meanings surrounding womanhood, motherhood, sexuality, reproductive freedom and eugenics.
Prerequisites: SOCI 205; junior or senior classification.
Cross Listing: WGST 410/SOCI 410.

SOCI 411 Social Psychology
Credits 3. 3 Lecture Hours.
Effects of social experience and groups on the development of personality, attitudes, values and behavior.
Prerequisite: 3 hours of sociology or psychology.

SOCI 412 Political Sociology
Credits 3. 3 Lecture Hours.
Survey of social bases of power; state formation in advanced industrial societies; origins of welfare state; interrelation of nationalism; culture and class formation.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 413 Social Movements
Credits 3. 3 Lecture Hours.
Survey of social movements; emphasis on social movement participation, emergence and outcomes; analysis of revolutions and movements in the developing world; theory and methods of social movement research.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 415 Sociology of Education
Credits 3. 3 Lecture Hours.
Relationship of social structure and change to education; social background and student performance; teachers and their careers; bureaucracy and change in education.
Prerequisite: SOCI 205.

SOCI 419 Social Class in Contemporary Society
Credits 3. 3 Lecture Hours.
Composition and consequences of social class structure; social class explanations for lifestyle patterns, educational and occupational achievements.
Prerequisite: SOCI 205.

SOCI 420 Advanced Methods of Social Research
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Philosophy and methods of social research, including research design; methods of observation; questionnaires, interviews and other sources of social data; qualitative and quantitative techniques of inference, analysis and research report writing.
Prerequisite: SOCI 220.

SOCI 421/WGST 421 Gender & Crime
Credits 3. 3 Lecture Hours.
Gender & Crime. Gender disparities in contemporary patterns of crime, victimization and incarceration; key concepts, major theories and empirical research studies around gender and crime.
Prerequisite: Grade of C or better in SOCI 207/WGST 207, SOCI 211, SOCI 304, SOCI 316/WGST 316, WGST 200, WGST 207/SOCI 207, or WGST 316/SOCI 316.
Cross Listing: WGST 421/SOCI 421.

SOCI 422 Race, Ethnicity, Crime and Justice
Credits 3. 3 Lecture Hours.
Racial/ethnic disparities in criminal offending and victimization, as well as different experiences with law enforcement, judicial, and correctional agencies.
Prerequisites: SOCI 220 or equivalent.
Cross Listing: AFST 422 and LMAS 422.

SOCI 423 Globalization and Social Change
Credits 3. 3 Lecture Hours.
Examines the effects of globalization on social structure including politics, governments, corporations, work and inequality.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 424/WGST 424 Women and Work in Society
Credits 3. 3 Lecture Hours.
Social context of women's work; work patterns, labor force participation, occupational destinations and occupational mobility; alternatives to the conventional division of labor by sex in society.
Cross Listing: WGST 424/SOCI 424.

SOCI 425 Medical Sociology
Credits 3. 3 Lecture Hours.
Organization, value systems and practice of medicine and the provision of health care in the U.S.; role of physicians, health occupations and patients; marginal and folk medicine.
Prerequisite: SOCI 205.

SOCI 426 Sociology of Work
Credits 3. 3 Lecture Hours.
Overview of classical and contemporary theories of work, changes in labor market structure; contemporary work place organization; occupational stratification by race, class, and gender.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 430 Contemporary Sociological Theory
Credits 3. 3 Lecture Hours.
Basic ideas of contemporary sociological theory: structuralism, functionalism, conflict, symbolic interaction, exchange and their application to current research.
Prerequisite: SOCI 230.

SOCI 445 Sociology of Law
Credits 3. 3 Lecture Hours.
Introduction to the sociology of law; the relation of law to general social control and to organizational dynamics.
SOCI 450/MGMT 478 Social Entrepreneurship
Credits 3. 3 Lecture Hours.
Applying business principles and practices to solve social, economic and environmental problems; social entrepreneurship concepts and issues in scaling social enterprise ventures including management tools, organization structures, funding sources, impact measurement; experience in opportunity recognition, designing, planning, pitching social mission ventures; build social capital with social enterprise founders.
Cross Listing: MGMT 478.

SOCI 463 Gender in Asia
Credits 3. 3 Lecture Hours.
Gender dynamics in Asia; changes in gender roles; women's movements; women and the economy; women and politics; men's and women's private lives.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ASIA 463 and WGST 463.

SOCI 476/MGMT 476 Entrepreneurship Practice
Credits 3. 3 Lecture Hours.
Practical skills for creating new businesses; evaluating, planning and operational strategy, including assessing the technology; product and service markets, value creation model; financing strategies; legal, regulatory, socio-economic drivers, risks; leadership to develop management team, advisory board; go-to-market strategy; develop own entrepreneurial opportunities or those of faculty and entrepreneurs.
Cross Listing: MGMT 476/SOCI 476.

SOCI 478 Professional Development in Sociology I
Credit 1. 1 Lecture Hour.
Career fields available to sociology majors, including the nature of the work, professional expectations, and the credentials for entry in the fields.
Prerequisite: Sociology major; junior or senior classification.

SOCI 479 Professional Development in Sociology II
Credits 2. 2 Lecture Hours.
Preparation for careers in sociology-related professionals by in-depth research of prospective career fields, development of oral, written, and media skills, formation of professional networks, and training in professional ethics, cultural diversity, and leadership.
Prerequisite: Sociology major; junior or senior classification.

SOCI 484 Field Practicum
Credits 0 to 4. 0 to 4 Other Hours.
Field Experiences. Participation in an approved agency. Field experience will be supervised by selected agency personnel and appropriate faculty. Experiences and requirements will vary slightly according to placement and student interests.
Prerequisites: Major in sociology; 12 hours of sociology; approval of undergraduate advisor; also taught at Galveston campus.

SOCI 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Special problems not covered by other courses. Course depends upon needs and interest of the student and upon the number of credit hours.
Prerequisite: Senior classification in sociology.

SOCI 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of sociology. May be repeated for credit.
Prerequisite: Approval of instructor.

SOCI 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a chosen faculty member in sociology. May be taken four times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

SOMS-Schl of Military Sciences (SOMS)

SOMS 111 Principles of Academic and Personal Development
Credits 0-1. 0-1 Lecture Hours.
Identification of personal goals and learning skills promoting academic and career success; development of personal leadership strengths; styles, motivation and values; personal development planning for self-improvement.
Prerequisite: Freshman classification or approval of instructor.

SOMS 180 Survey of Performance Based Training Methods
Credit 1. 1 Lecture Hour.
Introduction to performance oriented training methods and techniques; key concepts and generalizations of training and identification of training needs; study of representative theories of workplace training, performance evaluation, and experiential training techniques.
Prerequisite: Freshman classification or approval of instructor.

SOMS 181 Developing and Instructing Others
Credits 0. 0 Lecture Hours.
Introduction to leadership, mentoring and instructing others in the specific context of military-style training; survey of basic military performance counseling skills; introduction to subordinate instruction and evaluation techniques.
Prerequisites: Freshman classification or approval of instructor.

SOMS 280 Fundamentals of Peer Leadership
Credit 1. 1 Lecture Hour.
Introduction to theories of peer leadership when applied to a specific context; fundamentals and techniques of small group communication; performance evaluation; survey of basic supervisory skills.
Prerequisite: Sophomore classification or approval of instructor.

SOMS 281 Fundamentals of Intentional Leadership
Credits 0-1. 0-1 Lecture Hours.
Exposure to the fundamentals of intentional leadership, deliberate practice, planning and leadership assessment; development of initial personal leadership development plans; alignment of personal and organizational values, vision, mission, purpose and goals toward desired outcomes.
Prerequisites: Grade of C or better in SOMS 280 or approval of department head or director.

SOMS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of leadership theory and practice. May be repeated for credit.
Prerequisites: Freshman or sophomore classification; approval of instructor.

SOMS 380 Workshop in Leadership Education
Credits 0-1. 0-1 Lecture Hours.
The study of leadership theory, intra group relationships, assessment tools for skills development, and techniques for achieving group goals.
Prerequisite: Junior classification or approval of instructor.
Texas A&M University

SOMS 381 Workshop in Leadership Education II
Credits 0-1. 0-1 Lecture Hours.
Continuation of SOMS 380. Fundamentals of small group dynamics; interpersonal communication; application of selected leadership theories; interpretation of individual assessments to include personality traits, values, and signature strengths.
Prerequisites: SOMS 380; junior or senior classification.

SOMS 481 Seminar in Executive Leadership
Credits 0-1. 0-1 Other Hours.
The study of contemporary leadership issues, organizational effectiveness, problem solving, and decision making.
Prerequisite: Senior classification or approval of instructor.

SOMS 482 Seminar in Executive Leadership II
Credits 0-1. 0-1 Other Hours.
Continuation of SOMS 481. Discussion of ethical dilemmas in leadership roles; ethical decision-making; personal accountability in organizational settings.
Prerequisite: SOMS 481 or approval of instructor.

SOMS 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Individual supervision of special readings or assigned projects to promote independent study; program enrichment for capable students; written and oral reports required.
Prerequisite: Approval of instructor.

SOMS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of leadership theory and practice. May be repeated for credit.
Prerequisites: Junior or senior classification; approval of instructor.

SPAN - Spanish (SPAN)

SPAN 101 Beginning Spanish I
Credits 4. 4 Lecture Hours.
(SSPAN 1411) Beginning Spanish I. Elementary language study with oral, written and reading practice; active use of the language in conversation and culture-based projects at the novice high level as defined by the American Council on the Teaching of Foreign Languages; intended for those with no prior knowledge of Spanish. 
Prerequisite: Prior knowledge of Spanish requires the Spanish Placement Test before enrolling for the first time in a college Spanish course; also taught at Galveston campus.

SPAN 102 Beginning Spanish II
Credits 4. 4 Lecture Hours.
(SSPAN 1412) Beginning Spanish II. Continuation of SPAN 101. Active use of the language in conversation, writing, reading, and culture-based projects at the intermediate low level as defined by the American Council on the Teaching of Foreign Languages. 
Prerequisite: SPAN 101 with a grade of C or better or placement by exam; students with prior knowledge of Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course; also taught at Galveston campus.

SPAN 112 Intensive Beginning Spanish
Credits 8. 8 Lecture Hours.
Accelerated study of Spanish with oral, written and reading practice; active use of the language in conversation and culture-based projects at the novice high level as defined by American Council on the Teaching of Foreign Languages; intended for those with no prior knowledge of Spanish; equivalent to SPAN 101 and SPAN 102.
Prerequisite: Prior knowledge of Spanish requires the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 201 Intermediate Spanish I
Credits 3. 3 Lecture Hours.
(SSPAN 2311) Intermediate Spanish I. Active use of the language in conversation, writing, reading and projects at the mid intermediate level as defined by the American Council on the Teaching of Foreign Languages. Only one of the following will satisfy the requirements for a degree: SPAN 201, SPAN 208, SPAN 221.
Prerequisite: SPAN 102 with a grade of C or better or placement by exam; students with prior knowledge of Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 202 Intermediate Spanish II
Credits 3. 3 Lecture Hours.
(SSPAN 2312) Intermediate Spanish II. Continuation of SPAN 201. Active use of the language in conversation, writing, reading and projects at the high intermediate level as defined by the American Council on the Teaching of Foreign Languages. Only one of the following will satisfy the requirements for a degree: SPAN 202, SPAN 218, SPAN 222.
Prerequisite: SPAN 201 with a grade of C or better or placement by exam; students with prior knowledge of Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 203 Intermediate Spanish for Heritage Speakers
Credits 3. 3 Lecture Hours.
Focus on developing speaking, reading and writing abilities in a cultural context centered on Spanish-speaking communities in the U.S.; intended for those who understand casual spoken Spanish and have some functional communication abilities in the language because of family background or sociocultural experience.
Prerequisites: SPAN 201 with a grade of C or better or placement by exam; students with prior knowledge of Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 208 Spanish for Health Professionals I
Credits 3. 3 Lecture Hours.
First half of a two-semester sequence in Spanish, at the mid intermediate level as defined by the American Council on the Teaching of Foreign Language; for those interested in careers in the health professions; presentation and practice of the most important basic communication functions in patient-provider interaction. Only one of the following will satisfy the requirements for a degree: SPAN 201, SPAN 208, SPAN 221.
Prerequisites: SPAN 102 with a grade of C or better or placement by exam; students with prior knowledge of Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.
SPAN 218 Spanish for Health Professionals II
Credits 3. 3 Lecture Hours.
Second half of a two-semester course sequence in Spanish at the high intermediate as defined by the American Council on the Teaching of Foreign Languages; for those interested in careers in the health professions; presentation and practice of the most important basic communication functions in patient-provider interaction. Only one of the following will satisfy the requirements for a degree: SPAN 202, SPAN 218, SPAN 222.
Prerequisite: SPAN 201, SPAN 208, placement by exam, or approval of instructor; students with prior knowledge of Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 221 Field Studies Abroad I
Credits 1 to 6. 1 to 6 Lecture Hours.
Active use of the language in conversation, writing, reading and projects at the mid intermediate level, as defined by American Council on the Teaching of Foreign Languages, in a Spanish-speaking country; participation in academic and cultural activities of a host university or study abroad institute/center. Only one of the following will satisfy the requirements for a degree: SPAN 201, SPAN 208, SPAN 221.
Prerequisite: SPAN 102 with a grade of B or better, placement by exam, or approval of instructor; students with prior knowledge of Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 222 Field Studies Abroad II
Credits 1 to 6. 1 to 6 Lecture Hours.
Active use of the language in conversation, writing, reading and projects at the high intermediate level, as defined by American Council on the Teaching of Foreign Languages, in a Spanish-speaking country; participation in academic and cultural activities of a host university or study abroad institute/center. Only one of the following will satisfy the requirements for a degree: SPAN 202, SPAN 218, SPAN 222.
Prerequisite: SPAN 102 with a grade of B or better, placement by exam, or approval of instructor; students with prior knowledge of Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Individual supervision of readings or assigned projects in Spanish, selected for each student individually.
Prerequisite: Approval of instructor and department head.

SPAN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Spanish. May be repeated for credit.
Prerequisite: Approval of instructor.

SPAN 301 Oral Expression
Credits 3. 3 Lecture Hours.
Development of oral skills in Spanish through pronunciation practice, discussion of current events, skits, interviews, conversations, role play, impromptu debates, rhetoric, public speaking and formal presentations.
Prerequisites: SPAN 202, SPAN 203, SPAN 218, SPAN 222, placement by exam, or approval of instructor; junior or senior classification or approval of instructor.

SPAN 302 Advanced Grammar
Credits 3. 3 Lecture Hours.
Study and practice of Spanish language structures; development of metalinguistic awareness and appropriate usage in socio-pragmatic context. Only one of the following will satisfy the requirements for a degree: SPAN 302 or SPAN 304.
Prerequisites: SPAN 202, SPAN 203, SPAN 218, or SPAN 222; or placement by exam; junior or senior classification or approval of instructor.

SPAN 303 Spanish Composition
Credits 3. 3 Lecture Hours.
Development of writing skills in Spanish; structural analysis of representative texts; drafting, revision and rewriting of short compositions and term papers.
Prerequisites: SPAN 202, SPAN 203, SPAN 218, or SPAN 222; or placement by exam; junior or senior classification or approval of instructor.

SPAN 304 Advanced Grammar for Heritage Speakers
Credits 3. 3 Lecture Hours.
Continuation of SPAN 203; study and practice of Spanish centered on grammatical features of particular concern to heritage speakers in a cultural context focused on Hispanics in the U.S. Only one of the following will satisfy the requirements for a degree: SPAN 302 or SPAN 304.
Prerequisites: SPAN 202, SPAN 203, SPAN 218 or SPAN 222; or placement by exam; junior or senior classification or approval of instructor.

SPAN 306 Business Spanish
Credits 3. 3 Lecture Hours.
Prerequisite: 3 credits of 300-level Spanish courses or approval of instructor.

SPAN 307 Spanish for the Sciences
Credits 3. 3 Lecture Hours.
Development of written and oral scientific communication in Spanish, including listening, speaking, reading and writing, with a focus on general and specialized scientific discourse; field-specific vocabulary and review of structures necessary for academic registers.
Prerequisites: 3 credits of 300-level Spanish courses or approval of instructor.

SPAN 311 Hispanic Culture and Civilization to the 18th Century
Credits 3. 3 Lecture Hours.
Survey of the Hispanic world with emphasis on its history and cultural patterns from pre-Roman times to the 18th century; description and analysis of artistic, historical, literary, political topics. Taught in Spanish.
Prerequisite: SPAN 202, 203, 222 or approval of instructor.

SPAN 312 Hispanic Culture and Civilization: 18th Century to Present
Credits 3. 3 Lecture Hours.
Overview of the Hispanic world, including the United States, from independence in the Americas to present; description and analysis of artistic, historical, literary, political, sociolinguistic topics. Taught in Spanish.
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.
SPAN 318 Oral Communication for Health Professionals
Credits 3. 3 Lecture Hours.
Development of advanced fluency in oral communication skills in Spanish within the context of the medical professions through discussion of health issues pertaining to the Latino/Hispanic community; field trips, service learning, volunteering, interviews, impromptu speaking and formal presentations.
Prerequisite: SPAN 218, 3 credits of 300-level Spanish, or approval of instructor.

SPAN 320 Introduction to Hispanic Literature
Credits 3. 3 Lecture Hours.
Survey of literature from the Spanish-speaking world; emphasis on the language and techniques of literary analysis as applied to examples of poetry, narrative fiction, theater and essay.
Prerequisite: 3 credits of 300-level Spanish courses or approval of instructor.

SPAN 331 Spanish Literature to 1700
Credits 3. 3 Lecture Hours.
Origins and evolution of Spanish literature from the Medieval to the Golden Age traditions; epic, drama, novel, picaresque and satire as reflected in works by Berceo, Cervantes, Garcilaso de la Vega, Lope de Vega, Calderón de la Barca and others; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 332 Spanish Literature from 1700 to 1936
Credits 3. 3 Lecture Hours.
Representative works of Spanish Neoclassicism, Romanticism, realism, naturalism, modernism, and Avant-Garde movements; overview of historical background, cultural and philosophical tendencies; socio-political movements in modern Spain until the Civil War; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 341 Spanish-American Literature from 1492 to 1821
Credits 3. 3 Lecture Hours.
Themes, styles and authors from the meeting of Old and New Worlds through the final days of the Colony; overview of cultural and historical background; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 342 Spanish-American Literature from 1821 to 1935
Credits 3. 3 Lecture Hours.
Themes, styles and authors from Independence to Modernity; overview of cultural and historical background; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 350 Spanish Phonetics and Phonology
Credits 3. 3 Lecture Hours.
Sound system of Spanish with special reference to pronunciation and contrast with sounds of American English; phonological inventory and phonetic variation in Latin American and Peninsular varieties.
Prerequisite: 3 credits of 300-level Spanish courses or approval of instructor.

SPAN 352 Hispanic Linguistics
Credits 3. 3 Lecture Hours.
Study of Hispanic linguistics, including phonetics and phonology, morphology, syntax, change and variation.
Prerequisite: 3 credits of 300-level Spanish courses or approval of instructor.

SPAN 353 Spanish Literature to 1936
Credits 3. 3 Lecture Hours.
Representation of major works and directors of contemporary Hispanic film; interpretation of culture through film; relationship of literature and film; introduction to vocabulary of film criticism in Spanish.
Prerequisites: At least 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 354 Hispanic-American Literature from 1945 to 1990
Credits 3. 3 Lecture Hours.
Analysis of contemporary literature by U.S. Latino/a authors; discussion of prevalent themes including immigration, language, race, gender, identity.
Prerequisites: At least 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 355 Latin American and Peninsular Literature
Credits 3. 3 Lecture Hours.
Survey of literature from the Spanish-speaking world from the origins of photography in the mid-19th century to the present; theoretical, historical and critical readings; analysis of various genres, modes, and formats.
Prerequisites: At least 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 356 Spanish-American Literature from 1945 to 1970
Credits 3. 3 Lecture Hours.
Examination of major works and directors of contemporary Hispanic film; interpretation of culture through film; relationship of literature and film; introduction to vocabulary of film criticism in Spanish.
Prerequisites: At least 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 403 Advanced Writing in Spanish
Credits 3. 3 Lecture Hours.
Building on established skills, practice in and reflection on writing in professional, public, academic, and literary genres; evaluation of a variety of models and development of abilities in audience analysis, critical research, review and revision.
Prerequisites: SPAN 303 and 3 additional SPAN credits at the 400-level, or approval of instructor.

SPAN 407 Spanish-English Translation
Credits 3. 3 Lecture Hours.
Foundations of translation methodology, strategies and practice; rendering of literary and non-literary texts; ethics of translation; emphasis on translation into the first language.
Prerequisite: 6 credits of upper division SPAN with a grade of B or better or approval of instructor.

SPAN 409 Photography in the Hispanic World
Credits 3. 3 Lecture Hours.
Study of works produced by major photographers across the Hispanic world, from the origins of photography in the mid-19th century to the present; theoretical, historical and critical readings; analysis of various genres, modes, and formats.
Prerequisites: 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 410 Hispanic Film
Credits 3. 3 Lecture Hours.
Examination of major works and directors of contemporary Hispanic film; interpretation of culture through film; relationship of literature and film; introduction to vocabulary of film criticism in Spanish.
Prerequisites: At least 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 411 Contemporary Hispanic Society and Culture
Credits 3. 3 Lecture Hours.
Examination of cultural, economic, and political aspects central to 20th and 21st century Hispanic societies.
Prerequisites: At least 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 412 U.S. Hispanic Writers
Credits 3. 3 Lecture Hours.
Analysis of contemporary literature by U.S. Latino/a authors; discussion of prevalent themes including immigration, language, race, gender, identity.
Prerequisites: At least 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 413 Hispanic Culture through Art
Credits 3. 3 Lecture Hours.
Examination of the works of a major artist and/or artistic movement as a vehicle for intensive analysis of elements of Hispanic culture.
Prerequisites: At least 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 414 Mexican Cinema and Culture
Credits 3. 3 Lecture Hours.
Analysis of Mexican films from acclaimed actors, directors and time periods in order to understand the historical, social and political conditions; aesthetic, social, cultural and political analysis surrounding the production of representative films; taught in Spanish.
Prerequisites: 6 credits of 300-level Spanish courses; junior or senior classification, or approval of instructor.
SPAN 417 Advanced Spanish-English Translation
Credits 3. 3 Lecture Hours.
Expansion of translation practice and development of lexical and stylistic competence in specialized fields, including commercial, legal, medical, technical and scientific; mandatory service learning component included.
Prerequisite: SPAN 407 with a grade of B or better or approval of instructor.

SPAN 421 Spanish Language Poetry
Credits 3. 3 Lecture Hours.
Study of lyric poetry in Spanish; analysis of metrics, imagery, language and style across different periods.
Prerequisites: 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 423 Soccer in the Hispanic World
Credits 3. 3 Lecture Hours.
Overall perspective on the sport; analysis of the interaction of soccer, arts and society; comprehensive sociological and aesthetic view of the game in the Spanish-speaking world; soccer as a metaphor for contemporary world; taught in Spanish.
Prerequisites: 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 445 Cervantes
Credits 3. 3 Lecture Hours.
Analysis of Cervantes' life, cultural milieu and works; emphasis on Don Quixote, its significance in Spanish literature and in the development of the modern novel; conducted in Spanish.
Prerequisites: At least 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 450 Contemporary Spanish and Spanish-American Literature
Credits 3. 3 Lecture Hours.
Representative works of authors from both sides of the Atlantic; study of similarities and differences in themes, movements, social and aesthetic concerns among Spanish and Spanish American writers.
Prerequisites: 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 452 Hispanic Sociolinguistics
Credits 3. 3 Lecture Hours.
Regional and social varieties of Spanish; variation in situational contexts (register, style, and modality); theoretical foundations of sociolinguistic variation.
Prerequisites: 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 460 Topics in Hispanic Literature
Credits 3. 3 Lecture Hours.
Exploration of a significant topic, author, movement, genre or period in Hispanic literature. May be taken three times for credit when topics vary.
Prerequisite: 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 461 Topics in Hispanic Culture
Credits 3. 3 Lecture Hours.
Exploration of significant socio-cultural issues in Hispanic society and their influence on cultural and artistic production. May be taken three times for credit when topics vary.
Prerequisites: 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 462 Topics in Hispanic Linguistics
Credits 3. 3 Lecture Hours.
Exploration of significant topics in Hispanic linguistics from different theoretical and applied perspectives. May be taken three times when topics vary.
Prerequisites: 6 credits of 300-level Spanish courses; junior or senior classification or approval of instructor.

SPAN 483 Community Impact through Service Learning in Spanish
Credits 0 to 4. 0 to 4 Other Hours.
Directed service-learning experience in a context where Spanish is necessary to deliver services to underserved populations in the U.S. or abroad. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Majors and Hispanic Studies for Community Engagement minors only; approval of undergraduate studies director; junior or senior classification.

SPAN 484 Internship
Credits 0 to 3. 0 to 3 Other Hours.
Directed internship in a Spanish-speaking professional environment to provide students with training or applied research experience appropriate to career objectives. Must be taken on a satisfactory/unsatisfactory basis. May be taken three times for credit.
Prerequisites: SPAN majors; junior or senior classification and approval of instructor.

SPAN 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Individual supervision of readings or assigned projects selected for each student individually; written and oral reports.
Prerequisite: Approval of instructor and department head.

SPAN 489 Special Topics in...
Credits 3. 3 Lecture Hours.
Selected topics in an identified area of Spanish. May be repeated for credit.
Prerequisite: 6 credits of 300-level Spanish; junior or senior classification.

SPAN 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in Hispanic Studies. May be repeated three times for credit.
Prerequisites: SPAN majors; junior or senior classification and approval of instructor.

SPAN 493 Directed Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in Hispanic Studies. May be repeated three times for credit.
Prerequisites: SPAN majors; junior or senior classification and approval of instructor.
SPED 310 Instructional Strategies for Students with Disabilities  
Credits 3. 3 Lecture Hours.  
Research-based strategies and techniques in teaching students who are at-risk academically or students with disabilities in a variety of general and special education settings; addresses teaching of academics, teacher strategies for engagement and incorporating the use of technology.  
Prerequisite: Admission to professional phase of program.

SPED 311 Assessment of Students with Disabilities  
Credits 3. 3 Lecture Hours.  
Instruction in formal and informal assessment techniques used with students with disabilities, including progress monitoring; development of Individualized Educational Program plans and the IEP process.  
Prerequisite: Admission to professional phase of program.

SPED 312 Effective Reading Instruction for Students with Diverse Abilities  
Credits 3. 3 Lecture Hours.  
Information and competencies in research-based reading instruction for students who have disabilities, are struggling readers, and are bilingual/multilingual; includes reading assessment, dyslexia and effective instruction in phonemic awareness, phonics, reading fluency, vocabulary and comprehension, Response to Intervention (RTI) strategies, and data driven decision-making.  
Prerequisite: Admission to professional phase of program.

SPED 314 Effective Mathematics Strategies for Students with Disabilities  
Credits 4. 4 Lecture Hours.  
Information and competencies through instruction in effective mathematics instruction for students P-12 with academic learning problems and/or disabilities; effective instruction design and teaching techniques, implementation of research-based methods relevant for active authentic learning; considers state and national standards related to teaching and learning mathematics.  
Prerequisites: Admission to professional phase of program.

SPED 414 Methods and Issues in Low-Incidence Disabilities  
Credits 3. 3 Lecture Hours.  
Overview of learning and behavioral characteristics of individuals with low-incidence disabilities such as intellectual disability, autism, physical disabilities, traumatic brain injury, sensory impairments, and multiple disabilities; research-based practices in assessment and education and designing educational environments that facilitate active participation, self-advocacy and independence.  
Prerequisites: Admission to professional phase of program.

SPED 442 Teaching Students with Emotional Disturbances and Behavior Disorders  
Credits 3. 3 Lecture Hours.  
Research-based techniques and materials used in the instruction of students who have emotional and behavioral disorders across a variety of classroom and other educational environments; includes identification and assessment issues, placements, family involvement, and historical and legal issues.  
Prerequisites: Admission to professional phase of program.

SPED 471 Classroom Management and Behavioral Interventions  
Credits 3. 3 Lecture Hours.  
Effective management of classrooms; includes research-based models of classroom discipline, proactive strategies that prevent misbehavior, interventions that decrease problem behaviors, and management systems appropriate for students with disabilities.  
Prerequisites: Admission to professional phase of program.

SPED 491 Research  
Credits 0 to 4. 0 to 4 Lecture Hours.  
Research conducted under the direction of faculty member in special education. May be repeated 2 times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

SPMT - Sport Management (SPMT)

SPMT 217 Foundations of Sport Management  
Credits 3. 3 Lecture Hours.  
History, principles, and objectives of the sport management profession; an overview of the structure of the sport industry; introduction to the scope and variety of career opportunities in sport.

SPMT 220 Olympic Studies  
Credits 3. 3 Lecture Hours.  
History of the Olympic Games and their development over time; analyze, compare and contrast the relationship between the Olympics, cultures and societies; examination of central problems, accomplishments and collaborations revolving around the Olympics from a variety of viewpoints.

SPMT 225 Practical Skills for Sport Professionals  
Credits 3. 3 Lecture Hours.  
Introduction to the writing, communication and technical skills required to succeed in the sport industry; segmented into units based on different professions within the sport industry such as journalism, marketing, technology, public relations, organizational communication and law.

SPMT 230 Introduction to Leadership in Sport Organizations  
Credits 3. 3 Lecture Hours.  
Attainment and application of leaderships skills in the sports setting; analysis of sports leaders and their styles; ethics in sport leaders; preparation to work in youth sports institutions; youth community agencies and sport related non-profit agencies.

SPMT 260 Overview of Practices in Sport  
Credits 2. 2 Lecture Hours.  
History, principles, and objectives of the sport management profession; an overview of the structure of the sport industry; introduction to sport management practices and career opportunities in sport.

SPMT 262 Human Capital Management in Sport  
Credits 3. 3 Lecture Hours.  
Dynamic issues of individual and organizational change; overview of human resources, relational and conflict management, and leadership principles.  
Prerequisite: Grade of C or better in SPMT 260.

SPMT 265 Sport Communication  
Credits 4. 4 Lecture Hours.  
Application of the writing, communication and technical skills required to succeed in the sport industry; utilizing various communication types including oral, written, digital and listening from a global perspective.  
Prerequisites: Grade of C or better in ENGL 103 or ENGL 104; Grade of C or better in SPMT 260, SPMT 262, SPMT 270, SPMT 272, and COMM 203.

SPMT 270 Sport Marketing  
Credits 2. 2 Lecture Hours.  
Broad and contemporary overview of the sport marketing field; differentiating the field of sport and entertainment marketing with the practices and applications of mainstream marketing.
SPMT 272 Sport Marketing Issues  
Credits 3. 3 Lecture Hours.  
Recognition of current issues within the sport marketing field while gaining transferable skills necessary for the sport industry.  
**Prerequisite:** Grade of C or better in SPMT 270.

SPMT 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Work on a specified topic with the intent of promoting independent reading, research and study; supplement existing course offerings or subjects not presently covered. May be repeated for credit.  
**Prerequisites:** Freshman or sophomore classification; approval of instructor.

SPMT 289 Special Topics in...  
Credits 0 to 4. 0 to 4 Lecture Hours.  
Selected topics in an identified area of sport management. May be repeated for credit.

SPMT 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of a faculty member in sport management. May be repeated 4 times for credit.  
**Prerequisites:** Freshman or sophomore classification; approval of instructor.

SPMT 295 Introduction to the Culminating Experience  
Credit 1. 1 Lecture Hour.  
Orientation, observations and experiences in preparation for the Culminating Experience.  
**Prerequisites:** Grade of C or better in SPMT 260, SPMT 265 and SPMT 270.

SPMT 304 Sport Psychology Management and Practice  
Credits 3. 3 Lecture Hours.  
The relationship of psychology to sport and exercise; topics include history, application of learning principles, social psychology, personality variables, psychological assessment, youth sport, and diversity issues in sport and exercise.  
**Prerequisite:** Junior classification.

SPMT 316 Sales Strategies in Sport Organizations  
Credits 3. 3 Lecture Hours.  
Preparation for the sport business workforce via the sales outlet; emphasis on developing skills for success in sport sales.  
**Prerequisites:** Grade of C or better in SPMT 260, SPMT 265, SPMT 270, and SPMT 272.

SPMT 319/SOCI 319 Sociology of Sport  
Credits 3. 3 Lecture Hours.  
Social institution of sport and its consequences for American society; social organization from play to professional sport; violence, discrimination, women in sport; socialization implications from participation in sports.  
**Prerequisite:** Junior or senior classification.  
**Cross Listing:** SOCI 319/SPMT 319.

SPMT 321 Risk Management in Sport Organizations  
Credits 3. 3 Lecture Hours.  
Legal principles and rules of law affecting the administration and operation of health, human performance, recreation and sports programs, resources, areas and facilities; risk management and legal concepts applied to contracts, human rights, constitutional issues, supervision of recreation activities and torts.  
**Prerequisites:** Junior or senior classification; or approval of instructor.

SPMT 330 Application of Leadership Skills in Sport Organizations  
Credits 3. 3 Lecture Hours.  
Development and application of leadership vision to sport organizations; development of leadership skills that create collaborative and management of groups in sports organizations.  
**Prerequisites:** SPMT 230 with a grade of C or better.

SPMT 333 Sport Management  
Credits 3. 3 Lecture Hours.  
Introduction to techniques for proper management of programs in physical activities and athletics including the basic physical education instructional program, intercollegiate and interscholastic athletics, intramural and club programs, and alternative athletic programs such as health clubs, corporate fitness centers and YMCA/YWCAs.  
**Prerequisites:** Junior or senior classification; admission to professional phase of program.

SPMT 334 Sport Communication  
Credits 3. 3 Lecture Hours.  
Communications from the interorganizational level to mass media specific within the unique setting of sport industry.  
**Prerequisites:** Junior or senior classification; sport management majors only or approval of instructor.

SPMT 335 Diversity in Sport Organizations  
Credits 3. 3 Lecture Hours.  
Examine an encompassing perspective of diversity within North American and international sport organizations.  
**Prerequisite:** Junior or senior classification; also taught at Galveston campus.

SPMT 337 International Sport Business  
Credits 3. 3 Lecture Hours.  
The magnitude of global expansion and development of sport familiarity with major firms and organizations on the global scene, major issues in global sports; emphasis on business opportunities available internationally; underlying thesis focuses on the contrasts from the U.S. sport industry to foreign markets.  
**Prerequisite:** Junior or senior classification; also taught at Galveston campus.

SPMT 340 Sport Governance  
Credits 3. 3 Lecture Hours.  
Governance and policy development in sport management; managerial activities related to governance, strategic management, ethics in sport, governance and policy development in specific sport contexts.  
**Prerequisite:** Junior or senior classification.

SPMT 360 Organizational Issues in Sport  
Credits 3. 3 Lecture Hours.  
Gain knowledge and experience in organizational structure, organizational behavior, global issues, human resources, strategic and operational planning, data information systems, evaluation and assessment.  
**Prerequisites:** Grade of C or better in SPMT 260, SPMT 262, SPMT 265, SPMT 270, and SPMT 272.

SPMT 362 Sport Leadership  
Credits 3. 3 Lecture Hours.  
Attainment and application of leadership skills in the sport setting; concepts related to negotiations and change management; ethics and legal issues in sport.  
**Prerequisites:** Grade of C or better in SPMT 260, SPMT 262, SPMT 265, SPMT 270, and SPMT 272.
SPMT 364 Financial Management in Sport
Credits 3. 3 Lecture Hours.
Financial theories and practical application as they impact sport revenues and expenditures; familiarization with current issues and trends in financing sport organizations.
Prerequisites: Grade of C or better in SPMT 260, SPMT 262, SPMT 265, SPMT 270, and SPMT 272.

SPMT 366 Sport Facility and Event Management
Credits 3. 3 Lecture Hours.
Orientation into the design, operations and functions related to cost-effectively managing recreational facilities and events; address key elements of program management, conflict management, group dynamics and customer service.
Prerequisites: Grade of C or better in SPMT 260, SPMT 262, SPMT 265, SPMT 270, and SPMT 272.

SPMT 370 Fan Behavior in Sport
Credits 3. 3 Lecture Hours.
Communication with current and potential consumers; importance of identifying and understanding consumers when planning, creating, and performing marketing activities.
Prerequisites: Grade of C or better in SPMT 260, SPMT 262, SPMT 265, SPMT 270, and SPMT 272.

SPMT 372 Sales Strategies in Sport Organizations
Credits 3. 3 Lecture Hours.
Preparation for the sport business workforce via the sales outlet with emphasis placed on students developing skills necessary for success in sport sales.
Prerequisites: Grade of C or better in SPMT 260, SPMT 262, SPMT 265, SPMT 270, and SPMT 272.

SPMT 374 Strategic Sport Marketing
Credits 3. 3 Lecture Hours.
Managing customers to maximize long-term company profits focused on managing at the strategic level by targeting, acquiring, retaining and growing customers.
Prerequisites: Grade of C or better in SPMT 260, SPMT 262, SPMT 265, SPMT 270, and SPMT 272.

SPMT 402 Pre-Internship Field Experiences
Credit 1. 2 Lab Hours.
Orientation, observations and experiences in preparation for professional internships.
Prerequisites: Senior classification; approved acceptance to field experience.

SPMT 412 Managing Sport Events
Credits 3. 3 Lecture Hours.
Examination of principles involved in planning and managing sport events.
Prerequisites: Junior or senior classification or approval of instructor.

SPMT 420 Sports Facility Planning
Credits 3. 3 Lecture Hours.
Examination of the principles involved in planning and managing sports and recreational facilities.
Prerequisites: Junior or senior classification; admission to professional phase of program or approval of instructor for non-sport management majors.

SPMT 421 Legal Aspects of Sport
Credits 3. 3 Lecture Hours.
Explores the relationship between sport and law, and the fundamentals of law used by sport managers, including contract law, tort law, Constitutional issues, employment and discrimination law, the effect of state and federal statutes on recreational activities and sport, and current legal issues in sports.
Prerequisites: Junior or senior classification; admission to professional phase of program or approval of instructor for non-sport management majors.

SPMT 422 Financing Sport Operations
Credits 3. 3 Lecture Hours.
Study of financial theories and practical application as they impact sport revenues and expenditures; familiarization with current issues and trends in financing sport organizations.
Prerequisites: Junior or senior classification; admission to professional phase of program.

SPMT 423 Marketing Aspects of Sport
Credits 3. 3 Lecture Hours.
Examination of the application of marketing principles to the general sports industry; introduction to the various aspects of marketing that make up the marketing plan.
Prerequisites: Junior or senior classification; admission to professional phase of program.

SPMT 450 Professional Practice in Sport Management
Credits 3. 3 Lecture Hours.
Information, perspectives and skills to promote the management of sports in the community, school, workplace and sport business settings; boundary-crossing partnerships across sport disciplines; the role of collaborative efforts to improve the needs of the sport community.
Prerequisite: Admission to professional phase of program; senior classification.

SPMT 460 Sport Business Planning
Credits 3. 3 Lecture Hours.
Development of a sport business plan; planning, assessing and delivery of all components of a business plan for a sport organization.
Prerequisites: Grade of C or better in SPMT 360, SPMT 362, SPMT 364, SPMT 366, SPMT 370, SPMT 372, and SPMT 374.

SPMT 462 Leadership Application in Sport
Credits 3. 3 Lecture Hours.
Development and application of leadership vision to sport organizations; development of leadership skills that create collaborative management of groups in sports organizations.
Prerequisites: Grade of C or better in SPMT 360, SPMT 362, SPMT 364, SPMT 366, SPMT 370, SPMT 372, and SPMT 374.

SPMT 470 Application of Marketing Strategies in Sport
Credits 3. 3 Lecture Hours.
Examination of the application of marketing principles to the general sport enterprise; creation of sport marketing plans, evaluation of effective methods and practices relevant to sport marketing.
Prerequisites: Grade of C or better in SPMT 360, SPMT 362, SPMT 364, SPMT 366, SPMT 370, SPMT 372, and SPMT 374.
SPMT 472 Data Analysis and Problem Solving in Sport
Credits 3. 3 Lecture Hours.
Acquire market analysis and problem solving skills; understanding of rigorous marketing research methods; learn techniques to create marketing campaigns.
Prerequisites: Grade of C or better in SPMT 360, SPMT 362, SPMT 364, SPMT 366, SPMT 370, SPMT 372, and SPMT 374.

SPMT 481 Seminar
Credit 1. 1 Lecture Hour.
A variety of topical seminars in communicating contemporary and historical sport management subjects designed to complement the curriculum in sport management. May be taken three times for credit.
Prerequisite: Admission to the professional phase of the sport management program; junior or senior classification; or approval of instructor.

SPMT 482 Professional Writing Seminar
Credit 1. 1 Lecture Hour.
Acquaint students with a primary means of communicating contemporary research in sport management; extensive readings, intensive writings and an oral presentation designed to complement the curriculum in sport management by introducing the application of sport management research to organizational decision making. May be taken two times for credit.
Prerequisite: Admission to professional phase of program or approval of instructor; junior or senior classification.

SPMT 483 Practicum in Sport Management
Credits 0 to 3. 0 to 3 Other Hours.
Participation and study in sport management and administration; acquisition and practice of professional and/or clinical skills in sport management. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission to professional phase of program; approval of instructor; junior or senior classification.

SPMT 484 Internship in Sport Management
Credits 0 to 12. 0 to 12 Other Hours.
Supervised internship with sport management organizations; acquisition and practice of professional and/or clinical skills in sport management.
Prerequisites: SPMT 402; completion of all coursework.

SPMT 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Special problems in sport management assigned to individual students or to groups. May be repeated for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Junior or senior classification; approval of instructor.

SPMT 489 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours.
Selected topics in an identified area of sport management. May be repeated for credit.

SPMT 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a faculty member in sport management. May be repeated 4 times for credit.
Prerequisites: Junior or senior classification; approval of instructor.

STAT - Statistics (STAT)

STAT 182 Foundations of Statistics
Credit 1. 1 Lecture Hour.
Elementary topics in statistics; data collection; design of experiments; confidence intervals, hypothesis testing; ethics in statistics; the role of statistics in industry, the health profession and the sciences.
Prerequisite: Statistics majors only.

STAT 201 Elementary Statistical Inference
Credits 3. 3 Lecture Hours.
(MATH 1342, 1442) Elementary Statistical Inference. Data collection, tabulation and presentation; elementary description of the tools of statistical inference; probability, sampling and hypothesis testing; applications of statistical techniques to practical problems; cannot be taken after or concurrently with any other course in statistics or SCMT 303. Only one of the following will satisfy the requirements for a degree: STAT 201, STAT 301, STAT 302 or STAT 303.

STAT 211 Principles of Statistics I
Credits 3. 3 Lecture Hours.
Introduction to probability and probability distributions; sampling and descriptive measures; inference and hypothesis testing; linear regression, analysis of variance.
Prerequisite: MATH 148, MATH 152, or MATH 172; also taught at Galveston campus.

STAT 212 Principles of Statistics II
Credits 3. 3 Lecture Hours.
Design of experiments, model building, multiple regression, nonparametric techniques and contingency tables.
Prerequisite: STAT 211.

STAT 301 Introduction to Biometry
Credits 3. 3 Lecture Hours.
Intended for students in animal sciences. Introduces fundamental concepts of biometry including measures of location and variation, probability, tests of significance, regression, correlation and analysis of variance which are used in advanced courses and are being widely applied to animal-oriented industry. Only one of the following will satisfy the requirements for a degree: STAT 201, STAT 301, STAT 302 or STAT 303.
Prerequisite: MATH 168 or MATH 166 or equivalent; junior or senior classification.

STAT 302 Statistical Methods
Credits 3. 3 Lecture Hours.
Intended for undergraduates in the biological sciences. Introduction to concepts of random sampling and statistical inference; estimation and testing hypotheses of means and variances; analysis of variance; regression analysis; chi-square tests. Only one of the following will satisfy the requirements for a degree: STAT 201, STAT 301, STAT 302 or STAT 303.
Prerequisite: MATH 168 or MATH 166 or equivalent; junior or senior classification.
STAT 303 Statistical Methods
Credits 3.3 Lecture Hours.
Intended for undergraduates in the social sciences. Introduction to concepts of random sampling and statistical inference, estimation and testing hypotheses of means and variances, analysis of variance, regression analysis, chi-square tests. Only one of the following will satisfy the requirements for a degree: STAT 201, STAT 301, STAT 302 or STAT 303.
Prerequisite: MATH 168 or MATH 166 or equivalent; junior or senior classification; also taught at Galveston campus.

STAT 307 Sample Survey Techniques
Credits 3.3 Lecture Hours.
Concepts of population and sample; the organization of a sample survey; questionnaire design. Basic survey designs and computation of estimates and variances.
Prerequisite: STAT 301 or STAT 302 or STAT 303 or SCMT 303.

STAT 312 Statistics for Biology
Credits 3.3 Lecture Hours.
Statistical methods for biological applications including the topics multiple linear regression, experimental design, analysis of variance, categorical data analysis, nonparametric methods, general linear models, density estimation, nonlinear and logistic regression and inference for percentiles.
Prerequisites: MATH 147 or equivalent; STAT 201 or MATH 148, or equivalents.

STAT 335/CSCE 320 Principles of Data Science
Credits 3.3 Lecture Hours.
Theoretical foundations, algorithms and methods of deriving valuable insights from data; includes foundations in managing and analyzing data at scale, e.g., big data; data mining techniques and algorithms; exploratory data analysis; statistical methods and models; data visualization.
Prerequisites: STAT 211 or ECEN 303; STAT 212 or CSCE 222/ECEN 222. Cross Listing: CSCE 320/STAT 335.

STAT 404 Statistical Computing
Credits 3.3 Lecture Hours.
Statistical programming in R and Python; random number generation; design of simulation studies; interactive and dynamic statistical graphics; parallel computing in statistics; statistical and machine learning algorithms.
Prerequisites: STAT 212; junior or senior classification or approval of instructor.

STAT 406 Design and Analysis of Experiments
Credits 3.3 Lecture Hours.
Design fundamentals; completely randomized designs; blocking; factorial, nested, nested-factorial designs; incomplete designs; fractional factorial designs; confounding; general mixed factorials; split plot; analysis of covariance; confounding; general mixed factorials; split plot; analysis of covariance; crossover designs; power analysis, sample size determination.
Prerequisite: STAT 212; STAT 408.

STAT 407 Principles of Sample Surveys
Credits 3.3 Lecture Hours.
Principles of sample surveys and survey design; techniques for variance reduction; simple, stratified and multi-stage sampling; ratio and regression estimates; post-stratification; equal and unequal probability sampling.
Prerequisite: STAT 212.

STAT 408 Introduction to Linear Models
Credits 3.3 Lecture Hours.
Introduction to the formulation of linear models and the estimation of the parameters of such models, with primary emphasis on least squares. Application to multiple regression and curve fitting.
Prerequisites: STAT 212; MATH 304 or MATH 323.

STAT 414 Mathematical Statistics I
Credits 3.3 Lecture Hours.
Mathematical theory of statistics; probability, random variables and their distributions, transformations of random variables, expectations and variance, generating functions, sampling distributions and basic limit theorems.
Prerequisite: MATH 221, MATH 251 or MATH 253.

STAT 415 Mathematical Statistics II
Credits 3.3 Lecture Hours.
Continuation of the mathematical theory of statistics, including principles for statistical inference, formulation of statistical models, reduction of data, point estimation, confidence intervals, hypothesis testing and Bayesian inference.
Prerequisite: STAT 414 or MATH 411.

STAT 421/CSCE 421 Machine Learning
Credits 3.3 Lecture Hours.
Theoretical foundations of machine learning, pattern recognition and generating predictive models and classifiers from data; includes methods for supervised and unsupervised learning (decision trees, linear discriminants, neural networks, Gaussian models, non-parametric models, clustering, dimensionality reduction, deep learning), optimization procedures and statistical inference.
Prerequisites: Grade of C or better in MATH 304 and STAT 211; grade of C or better in CSCE 221 or STAT 404. Cross Listing: CSCE 421/STAT 421.

STAT 426 Methods in Time Series Analysis
Credits 3.3 Lecture Hours.
Autocorrelation and spectral characteristics of univariate, autoregressive and moving average models; identification, estimation and forecasting.
Prerequisites: STAT 408; STAT 414 or approval of instructor.

STAT 436 Multivariate Analysis and Statistical Learning
Credits 3.3 Lecture Hours.
Matrix algebra; random vectors; multivariate distributions; copulas; multivariate generalizations of classical testing; principle component analysis; discriminant analysis; clustering; multidimensional scaling; factor analysis; canonical analysis.
Prerequisites: MATH 304 or MATH 323; STAT 212; STAT 415 or equivalent.

STAT 438 Bayesian Statistics
Credits 3.3 Lecture Hours.
Analysis of scalar and vector-valued parameters; Bayesian linear models; Monte Carlo computational methods; prior elicitation; hypothesis testing and model selection; hierarchical models; selected advanced models; use of statistical packages such as WinBUGS, R or MATLAB.
Prerequisites: MATH 221; STAT 408 or equivalent.

STAT 445 Applied Biostatistics and Data Analysis
Credits 3.3 Lecture Hours.
Applications of regression methods in biostatistics; correlated data analysis; survival analysis; missing data techniques; use of the R programming language.
Prerequisites: STAT 212; STAT 408 or approval of instructor.
STAT 446 Statistical Bioinformatics
Credits 3. 3 Lecture Hours.
Analysis of high-dimensional genomic and proteomic data using R; sequence analysis; genome-wide association studies; proteomics; array-based technologies; classification techniques.
Prerequisites: STAT 212; STAT 408 or approval of instructor.

STAT 459 Categorical Data Analysis
Credits 3. 3 Lecture Hours.
Techniques for the analysis of categorical data; contingency table analysis; logistic regression; Poisson regression; loglinear models; analysis of ordinal data; use of computer software such as SAS or R.
Prerequisite: STAT 212; STAT 408 or equivalent.

STAT 482 Statistics Capstone
Credits 3. 3 Lecture Hours.
Integration of statistical models, design, sampling, graphics and computing for the analysis of real problems; planning, drafting, revising and editing reports; ethics; principles of collaboration and communication.
Prerequisites: STAT 404; STAT 406; STAT 408 and senior classification.

STAT 484 Internship
Credits 0 to 3. 0 to 3 Other Hours.
Directed internship in an organization to provide on-the-job training and applied research experience with professionals in settings appropriate to statistics and student professional interest.
Prerequisites: Major in statistics; 12 completed hours of statistics; 2.5 cumulative GPA; 2.5 GPA in statistics courses; approval of statistics undergraduate advisor.

STAT 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in statistics not covered by another course in the curriculum. Work may be in either theory or methodology.
Prerequisite: Approval of instructor.

STAT 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of statistics. May be repeated for credit.
Prerequisite: Junior or senior classification or approval of department head.

STAT 491 Research
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Research conducted under the direction of faculty members in statistics. May be taken four times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisite: Junior or senior classification or approval of instructor.

TCMG - Technology Management (TCMG)

TCMG 272 Technology and End-User Support
Credits 3. 3 Lecture Hours.
Upgrading, setup, configuration, troubleshooting of computer systems; development of skills to work with end-users; technology needs assessment; escalation and defusing strategies; service learning and community engagement.
Prerequisite: Sophomore classification.

TCMG 274 Foundations of Networking in Education
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Development of knowledge towards application of telecommunications facilities in networking; technical alternatives for delivery of subject matter for educators and trainers.
Prerequisites: TCMG 272 or concurrent enrollment, or approval of instructor.

TCMG 285 Directed Studies
Credits 0 to 12. 0 to 12 Lecture Hours.
Directed readings or research problems in industrial technology.

TCMG 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of industrial technology. May be repeated for credit.

TCMG 291 Research
Credits 0 to 4. 0 to 4 Lecture Hours.
Research conducted under the direction of faculty member in technology management. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

TCMG 303 Unix System Administration Practices
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Development and system administration of the Unix operating system; technical alternatives for proactive and reactive maintenance of system health.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification or approval of instructor.

TCMG 308 Cybersecurity and Digital Ethics
Credits 3. 3 Lecture Hours.
Introduction to cybersecurity; analysis of threats and risks from the environment; development of appropriate strategies to mitigate impact; ethics of extraordinary administrative access; ethics of digital forensics and implications to society.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification or approval of instructor.

TCMG 316 Database Systems Administration and Application
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Database administration and application use techniques; database structures, modeling, configuration, development, security, topologies and access; focus on system administration of Unix-based database systems.
Prerequisite: TCMG 303 with a grade of C or better.

TCMG 402 Instructional Technology and Design
Credits 3. 3 Lecture Hours.
Design principles; development of instruction; contemporary issues and trends; foundations in learning research; requirements for instruction, task and needs analysis, learning situations and instructional models; hardware and software innovations; assessing instructional outcomes; factors affecting utilization.
Prerequisites: EHRD 371 with a grade of C or better; junior or senior classification or approval of instructor.

TCMG 412 Contemporary Issues in Technology Management
Credits 3. 3 Lecture Hours.
Specific innovation or practices nascent to the professional information technology industry; discovery of practical applications and analytics of new innovation.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification.
TCMG 476 Technical Network Capstone
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Development of knowledge and skills towards the application of technical network management in public education and corporate training settings; focus on practices, techniques and tools for managers of technical networks.
Prerequisites: TCMG 303 or TCMG 304 with a grade of C or better; junior or senior classification.

TCMG 484 Professional Internship
Credits 6. 6 Other Hours.
Directed internship in an organization to provide students with a learning experience supervised by professionals in organizational settings appropriate to the student’s professional objectives; must be in good standing with the University. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: EHRD 481 and EHRD 490 with a grade of C or better; approval of instructor.

TCMG 485 Directed Studies
Credits 0 to 12. 0 to 12 Other Hours.
Directed readings or research problems in industrial technology.
Prerequisites: Junior or senior classification; approval of directed studies application.

TCMG 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of industrial technology. May be repeated for credit.
Prerequisite: Approval of instructor.

TCMG 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in technology management.
Prerequisites: Junior or senior classification; approval of instructor.

TEED - Teacher Education (TEED)

TEED 302 Teaching/Learning Processes: Psychological Perspectives on Education
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Psychological perspectives on instruction; examines learning processes, learner motivation, home and cultural influences, learning strategies; design and delivery of instruction; controversies regarding learning and instruction.
Prerequisites: Junior classification; admission to teacher education.

TEED 425 Supervised Clinical Teaching
Credits 12. 36 Other Hours.
Supervised Student Teaching. Culmination of teacher education program; integrate and apply knowledge and skills learned from program of study while observing and participating in accredited schools with university supervision. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission and retention in teacher education program; successful completion of all coursework.

TEFB - Teacher Ed Field Based (TEFB)

TEFB 273 Introduction to Culture, Community, Society and Schools
Credits 3. 2 Lecture Hours. 3 Other Hours.
Field-based course that introduces the culture of schooling and classrooms for analysis within the lens of language, gender, racial, socio-economic, ethnic and academic diversity; the family as a partner in education and educational equality discussed.

TEFB 322 Teaching and Schooling in Modern Society
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Development, structure, management and finance of secondary schools; historical, philosophical, ethical and moral dimensions of teaching; role of school in a democratic society; teaching as a profession.
Prerequisite: Junior or senior classification.

TEFB 324 Teaching Skills II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study and development of teaching skills necessary for applying instructional strategies; teaching general strategies, assessing student learning, and analyzing and synthesizing multiple source data; emphasis given to adolescent development and cultures and to teacher and child cultures.
Prerequisites: Successful completion or concurrent enrollment in TEFB 322; junior or senior classification.

TEFB 371 Dynamics and Management in Multicultural/Inclusionary Learning Environments
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Field-based course focusing on communication, methodology and management perspectives that lead to democratic classrooms; organizational structures that focus on transformative, inclusionary learning; interventions for students with disabilities; analysis of systemic conditions placing children from diverse backgrounds and representing diverse abilities in positions of ‘risk’ for incomplete success in school.
Prerequisites: Junior classification; admission to teacher education; concurrent enrollment in EDCI 454.

TEFB 401 Language Arts in the Middle and Senior School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Methodology of teaching language arts-related content with specific reference to language, literature, journalism, drama and speech interactions among these areas; development of oral competence; coordination with other subjects. Phase IV, Practicum I.
Prerequisites: Completion of Phases I, II and III of the secondary program; admission to teacher education; enrollment in language arts-related teaching field.

TEFB 404 Social Studies in the Middle and Senior High School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Features of social studies instruction in grades 6-12; approaches, methods and instructional materials. Phase IV, Practicum I.
Prerequisites: Completion of Phases I, II and III of the secondary program; admission to teacher education; enrollment in history and/or social science teaching field.

TEFB 406 Science in the Middle and Secondary School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Methods course for the prospective secondary teacher in the physical and biological sciences; implementation of contemporary curricula. Phase IV, Practicum I.
Prerequisites: Completion of Phases I, II and III of the secondary program; admission to teacher education; enrollment in science-related teaching field.

TEFB 407 Mathematics in the Middle and Senior School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Design and teach selected topics from middle and secondary school mathematics. Content, materials and methodology. Phase IV, Practicum I.
Prerequisites: Completion of Phases I, II and III secondary program; admission to teacher education; enrollment in mathematics teaching field.
THAR 407 Performing Literature.
Credits 3. 3 Lecture Hours.
Analysis and performance of poetry, prose and drama; emphasis on translating analytical decisions into performance; solo performance, readers theatre, chamber theatre, and technology in/as performance.

THAR 408 Stage Management and Arts Administration
Credits 3. 3 Lecture Hours.
Principles and practical application of techniques for designing theatre, music and other types of live performance; practical aspects of designing and producing live performances: plays, music events, devised performances, performance art; topics include lighting, sets and space, clothing and costume design, sound; may include specialized techniques such as masks, props, makeup. May be repeated for credit.

Prerequisites: Admission and retention in teacher education program; concurrent enrollment in RDNG 467, TEFB 410 and TEFB 413.

THAR 412 Mathematics in the Elementary School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Designed to help elementary teachers understand basic concepts of science and scientific methods; content relates to natural phenomena involving physical, chemical and biological processes; elementary students appreciation and interest in science.

Prerequisites: MATH 365 and MATH 366; admission to teacher education; concurrent enrollment in RDNG 467, TEFB 410 and TEFB 413.

THAR 413 Science in the Elementary School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Recent trends, issues and procedures related to curriculum development and instruction in the social studies and humanities; integration of content, planning, design of appropriate teaching/learning experiences and evaluation; preparation of prototype materials.

Prerequisites: Admission to teacher education; concurrent enrollment in RDNG 467, TEFB 412 and TEFB 413.

THAR 414 Acting I: Fundamentals
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(DRAM 1351) Acting I: Fundamentals. A Stanislavsky-based approach to the fundamentals of acting, which may include sensory exercises, relaxation, concentration, imagination, improvisation, character analysis and scene work.
THAR 420 Directing Live Performance  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Theatre forms and styles; director's function and responsibility in producing plays; script analysis; directing laboratory scenes.  
Prerequisites: Junior or senior classification.  

THAR 435 New Technology for Performance Design  
Credits 3. 3 Lecture Hours.  
Fundamentals of design software including sound editing, video editing, and rendering for theatre; multi-media installation.  
Prerequisites: Junior or senior classification.  

THAR 445 Design as Performance  
Credits 3. 3 Lecture Hours.  
Design as performance using research methods and the production of new work; disciplines of design, performance, installation and performance as research.  
Prerequisites: Junior or senior classification.  

THAR 482 Topics in American Theatre and Performance  
Credits 3. 3 Lecture Hours.  
Exploration of significant issues in American theatre and performance; emphasis on the aesthetic, social, and cultural issues affecting theatre and performance. May be taken two times for credit.  
Prerequisites: Junior or senior classification.  

UGST - Undergraduate Studies (UGST)  

UGST 001  
Credits 0.  

UGST 181 First Year Seminar  
Credits 0 to 3. 0 to 3 Lecture Hours.  
Seminar on various contemporary topics; introduction to high quality college instruction and research; focus on writing, speaking, discussion and research; open to all majors; restricted to first-time-in-college students and limited in size to provide small class experience; also taught at Qatar campus. May be taken two times for credit.  

UGST 182 Topics in Undergraduate Studies  
Credits 0 to 3. 0 to 3 Lecture Hours.  
Selected interdisciplinary topics related to specific programs as identified by the office of undergraduate studies; for students in approved first year programs. May be taken two times for credit.  
Prerequisite: Freshman classification or approval of instructor; also taught at Qatar campus.  

UGST 211 UScholar Personal Statement  
Credits 0-1. 0-1 Lecture Hours.  
Oral and written reflection on values, goals, and opportunities; preparation of personal statement appropriate for nationally competitive scholarship application. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: University Scholar classification.  

UGST 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study on selected topics in undergraduate studies. May be taken six times for credit.  

UGST 311 UScholar Exploration Series  
Credits 0-1. 0-1 Lecture Hours.  
Selection from a variety of discussion topics designed to foster student-faculty interaction, intellectual and cultural enrichment, inter-and cross-disciplinary connections, and the development of interest and knowledge of issues outside of a student's degree area. May be taken six times for credit. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Junior or senior classification or approval of instructor; admitted to University Scholar program.  

UGST 405 Thesis Writing  
Credits 0-1. 0-1 Lecture Hours.  
Accessing information, searching scholarly literature, and oral or poster presentation of scholarly work and formal research thesis. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Junior or senior classification; admitted to Undergraduate Research Scholars.  

UGST 484 Internship  
Credits 0 to 3. 0 to 3 Other Hours.  
Directed internship in a community, public or private organization to provide students with on-the-job training and/or applied research experience appropriate to career objectives. May be taken three times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.  

UGST 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study on selected topics in undergraduate studies. May be taken six times for credit.  

UGST 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of a faculty member in undergraduate studies. May be taken three times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.  

UGST 492 Cooperative Education in Public Policy  
Credits 0 to 3. 0 to 3 Lecture Hours.  
Educational work assignment in public policy setting related to student's career interest and course of study; supervision of the student will be by the cooperating employer and the instructor; reports, approved by course instructor, will be required. May be taken two times for credit.  
Prerequisites: Junior or senior classification and participation in Public Policy Internship Program.  

UGST 497 Capstone  
Credits 0 to 6. 0 to 6 Lecture Hours.  
Demonstrating mastery of discipline as applied to an original problem through an independent, mentored project; public presentation of work. May be taken two times for credit. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Junior or senior classification; admitted to Undergraduate Service Scholars program.
URPN - Urban & Reg Planning (URPN)

URPN 201 The Evolving City
Credits 3. 3 Lecture Hours.
Introduction to the history of contemporary urban and regional planning and how the evolving forms of cities and regions pose opportunities and/or challenges for planners; understanding key social, economic, political and technological forces that shape city form and function and its ramifications for urban and regional planning.

URPN 202 Building Better Cities
Credits 3. 3 Lecture Hours.
Determinants of land use patterns; classification of uses; idealized conceptual alternatives; location and size criteria; mapping; comprehensive planning process, relationship to circulation planning.

URPN 203 Smart Cities - Bit, Bots and Beyond
Credits 3. 3 Lecture Hours.
Historic perspectives of technological innovation and urbanization; smart-city solutions to tackle the world's challenges in transportation, climate change, aging population, governance, economic growth, and social inclusion; challenges and promises of disruptive technologies; future proof policies and strategies.

URPN 210 Urban Analytical Methods I
Credits 3. 3 Lecture Hours.
Study of various analytical techniques used in urban and regional decision making; quantitative approaches to analyze and manipulate data; utilization of statistical packages for data, analysis and communication to enhance urban planning modeling.
Prerequisite: URPN majors only or approval of instructor.

URPN 220 Digital Communication I
Credits 3. 3 Lecture Hours.
Applications of computer graphics, rendering, and visualization software in urban design, landscape architecture, and environmental analysis; introduction to basic concepts and principles of graphic composition; rendering, visualization, and linkages to landscape-referenced data.
Prerequisite: Landscape Architecture and Urban Planning majors only or approval of instructor.

URPN 240 More Than Monuments: Preservation as Social Justice
Credits 3. 3 Lecture Hours.
Exploration of the ways designers', planners', and preservationists' expertise, combined with historical inquiry and citizen engagement, have fostered social and restorative justice.

URPN 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in landscape architecture and urban planning. May be taken 2 times for credit.
Prerequisites: Freshman or sophomore classification.

URPN 302 Planning Law
Credits 3. 3 Lecture Hours.
Familiarization with the fundamental principles of planning law and legislation; legal foundation for the urban planning process; alternative methods of plan implementation; emphasis on legal issues as they impact land use planning and development at the municipal level of government; participation in mock advocacy trials and public hearings.
Prerequisites: URPN 301; URPN majors only.

URPN 310 Urban Analytical Methods II
Credits 3. 3 Lecture Hours.
Focuses on research conducted by planners, sociologists, anthropologists, political scientists and a variety of applied social scientists; examines variety of procedures employed when conducting research in urban areas; furthers understanding and knowledge of statistical methods employed in social research and elements of geographical analysis.
Prerequisite: Upper division College of Architecture; URPN 210 or approval of instructor, URPN majors only.

URPN 320 Digital Communication II
Credits 3. 3 Lecture Hours.
Advanced applications of computer graphics, rendering, and visualization software in urban design, landscape architecture, and environmental analysis; introduction to basic concepts and principles of graphic composition, rendering, visualization, and linkages to landscape-referenced data.
Prerequisites: URPN 220; department majors only.

URPN 325 Introduction to GIS in Urban and Regional Planning
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Provides an understanding of GIS fundamentals; basic concepts, principles and functions; essential skills for applying GIS in various fields such as urban planning, landscape architecture, land development, environmental studies, transportation and hazard management; based on learning through class projects.
Prerequisite: Upper division College of Architecture; department majors only or approval of instructor.

URPN 326 Advanced GIS in Urban and Regional Planning
Credits 3. 3 Lecture Hours.
Advanced instruction in applications of spatial tools for urban planning, landscape architecture, land development, hazard management, and related problems; GIS applications through review of literature and practice; data quality, uncertainty, the integration of GPS, remote sensing and information technology within the context of urban and regional planning.
Prerequisite: URPN 325 or approval of instructor, department majors only.

URPN 330 Land Development I
Credits 3. 3 Lecture Hours.
Interface between the physical and financial dimensions in design and development to achieve building and project economies; creating a physical product and a financial venture that are responsive to social and environmental concerns and to market economy and finance.
Prerequisite: Department majors only or approval of instructor.

URPN 331 Public and Private Infrastructure Funding
Credits 3. 3 Lecture Hours.
An introduction to issues of financing public and public-private development project; exploring the difference between raising revenue, including the trade offs associated with establishing a sustainable tax base, and raising capital through capital markets; illustration of the range of decisions with financing public and public-private partnerships.
Prerequisite: Upper division College of Architecture; URPN majors only.

URPN 340 Housing and Community
Credits 3. 3 Lecture Hours.
Housing, its development, planning, marketing, designing, financing and production; social and design history and contemporary issues of American housing development, urban renewal, neighborhood structure and community facilities.
Prerequisite: Department majors and minors only or approval of instructor.
URPN 360 Issues in Environmental Quality
Credits 3. 3 Lecture Hours.
Issues in environmental quality; focus on stormwater and ecosystem qualities influenced by land development; design and planning principles and techniques (e.g. low impact development) for sustainable stormwater management in urban and suburban watersheds.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 361 Urban Issues
Credits 3. 3 Lecture Hours.
Issues pertaining to the evolution and development of cities and urban regions; examines the socio-economic, cultural and physical development of urban areas; addresses contemporary problems such as racial tension, unemployment and poverty, housing, pollution and environmental sustainability, traffic and congestion, land use, crime, public health, and other quality of life issues.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 369 Transportation and Urban Form
Credits 3. 3 Lecture Hours.
Examination of the interrelated nature of transportation, land use and urban design; familiarization with the role of transportation in contemporary society; understanding the interrelationships between transportation and urban form at both the regional and community levels.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 370 Health Systems Planning
Credits 3. 3 Lecture Hours.
Introduction to planning in the health care system at both institutional and community levels.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 371 Environmental Health Planning and Policy
Credits 3. 3 Lecture Hours.
Philosophical and historical relationships of human-environment-disease; environmental health domains and associated planning and policy organizations and initiative for monitoring, intervention, and prevention; interdisciplinary approaches for risk analysis of environmental health.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 401 Policy Implementation
Credits 3. 3 Lecture Hours.
Techniques of implementing major urban development programs and plans; capital improvements programming and budgeting; overview of regulatory measures including zoning and subdivision regulations; public involvement process; and fiscal planning.
Prerequisite: URPN majors only.

URPN 409 Urban Design Studio
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Design studio focused on urban design as a human-centered participatory practice; consideration of a project derived through community engagement; interdisciplinary service learning combining methodologies of architecture, landscape architecture and urban design.
Prerequisites: Junior or senior classification; admission to upper level in BED or URPN-BS; URPN 220, URPN 320, URPN 325, URPN 483, concurrent enrollment in URPN 419.

URPN 420 Principles of Urban Design
Credits 3. 3 Lecture Hours.
Theories and fundamental components of urban design including historical trends, case studies, land use arrangement, transportation options, open space networks, urban form, aesthetics and planning policies; application of the history and theory behind differing urban designs to practical projects.
Prerequisites: LAND 101, URPN 201, URPN 202, and URPN 210.

URPN 440 Urban and Regional Economic Development
Credits 3. 3 Lecture Hours.
Examines economic development processes in urban and regional planning; issues explored include theoretical, the economic development planning process, ethics, location factors, intergovernmental relations, budgeting, and private sector revenue generation.
Prerequisite: URPN majors only or approval of instructor.

URPN 450 Emergency Management Principles and Practices
Credits 3. 3 Lecture Hours.
Introduction to the fundamental principles of emergency management.
Prerequisite: Upper division College of Architecture or approval of instructor.

URPN 451 Hazard and Vulnerability Analysis for Planners
Credits 3. 3 Lecture Hours.
Tools and techniques used by city planners and emergency managers to determine their jurisdictions’ hazard risk and social vulnerability to disaster impacts.
Prerequisite: Junior or senior classification, URPN 450 or approval of instructor.

URPN 460 Sustainable Communities
Credits 3. 3 Lecture Hours.
Focuses on sustainable community with applications in public policy/design including societal organization, disciplinary bound design and policy, and empowered approaches to design, social ecology and public policy; reading and review of relevant literature on sustainability, complemented with exercises to illustrate underlying principles.
Prerequisite: Department majors and minors only or approval of instructor.

URPN 467 Land and Property Aspects of Sustainable Development
Credits 3. 3 Lecture Hours.
Sustainability perspectives about values, rights, property and what constitutes an optimum human environment; sustainability principles and case studies emphasizing on-the-ground, incentive-based land development that balances economic growth with environmental quality.
Prerequisites: Upper division College of Architecture.

URPN 469 Urban Infrastructure
Credits 3. 3 Lecture Hours.
Foundation of planning and managing infrastructure and public services; utilization of life-cycle method of infrastructure planning and delivery, research theory and tools to perform basic infrastructure planning.
Prerequisite: URPN majors only or approval of instructor.

URPN 470 Health Systems Planning and Policy
Credits 3. 3 Lecture Hours.
Analyzes health needs at community, regional and national levels; organization and supply of health services at community, regional and national levels; medical technology and its impact on health needs and system organization; medical care financing and its effects on health need and system organization; health planning for natural and human-made disasters; and service-learning for applying planning theories and methods.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 471 Planning Healthier Communities
Credits 3. 3 Lecture Hours.
Planning for the creation of healthier cities/communities; emphasis on the impact of global paradigmatic shifts regarding community health, stakeholder participation, coalition building, leadership, visioning the planning process, and the need for more systemic and process orientation in community building.
Prerequisite: Junior or senior classification or approval of instructor.
URPN 481 Seminar
Credits 3. 3 Lecture Hours.
Seminar discussion of current topics in urban planning.
Prerequisite: Senior classification.

URPN 483 Studio in Urban and Regional Science
Credits 1 to 6. 1 to 6 Lecture Hours.
Studio introduces the confluence of ecological, environmental, economic, social, cultural, and political forces impacting the planning, design, and development of complex urban environments; site planning, design process, sustainability.
Prerequisite: URPN majors only or approval of instructor.

URPN 484 Internship
Credits 3. 3 Other Hours.
Practical experience in an office of design allied professionals; 12 week internship with a minimum of 480 hours; continuous employment; departmental pre-approval through the department internship coordinator required. May not be repeated for credit.
Prerequisites: URPN majors only or approval of internship coordinator.

URPN 485 Directed Studies
Credits 1 to 5. 1 to 5 Other Hours.
Individual instruction in selected aspects of urban planning not adequately covered in other courses. May be taken 3 times for credit.
Prerequisite: Upper level classification.

URPN 489 Special Topics in... Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified field of urban studies. May be repeated for credit.

URPN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in landscape architecture and urban planning. May be taken 2 times for credit.
Prerequisite: Junior or senior classification.

URPN 493 Urban and Regional Studies Capstone Course
Credits 5. 5 Lecture Hours.
Syntheses and application of skills and knowledge gained through coursework applied to the development of creative solutions to real-world projects.
Prerequisites: URPN 310, URPN 331, URPN 410, URPN 469; LAND 494; senior classification; URPN majors only.

URPN 494 Internship
Credits 6. 6 Other Hours.
Practical experience in public, private, non-profit and for profit organizations of design allied professionals; 18 week internship with a minimum of 720 hours; continuous employment; departmental pre-approval through the department internship coordinator required. May not be repeated for credit.
Prerequisites: Upper level classification and approval of internship coordinator.

VIBS 101/NRSC 101 Neuroscience Overview
Credit 1. 1 Lecture Hour.
An introductory survey of neuroscience for freshmen undergraduate students on the basic neuroscience core ideas and neurological disorders.

VIBS 201/NRSC 201 History of Neuroscience
Credit 1. 1 Lecture Hour.
Wide spectrum of neuroscience discovery beginning at the turn of the 20th Century; emphasis on key discoveries and their rationale, experimental design, experimental methods, major findings and interpretation of results.
Prerequisites: Sophomore classification.
Cross Listing: NRSC 201/VIBS 201.

VIBS 204 Fundamentals of Food Toxicology and Safety
Credits 3. 3 Lecture Hours.
Toxicity and safety of various foods and food additives, ingredients and contaminants; occurrence, control and prevention of food transmitted diseases.
Prerequisite: Sophomore classification and CHEM 101.

VIBS 210 Twenty-first Century Global One Health
Credit 1. 1 Lecture Hour.
In depth presentation of concepts of surveillance, epidemiology and resistance, tropical medicine and One Health, climate change and One Health, conservation medicine and One Health and protection science policy and One Health.
Prerequisites: BIMS 101; BIMS 110, VIBS 111, or equivalent; freshman or sophomore classification.

VIBS 211 Twenty-first Century Biological Threats
Credit 1. 1 Lecture Hour.
In depth presentation of different forms of bioterrorism, agroterrorism, sociological perspectives, surveillance, dual use research, advanced vaccine development, global health security and career opportunities.
Prerequisites: BIMS 101; BIMS 110, VIBS 111, or equivalent; freshman or sophomore classification.

VIBS 222 Great Poisonings of the World
Credits 3. 3 Lecture Hours.
Exploration of the effect of intentional and accidental man-made and natural poisonings on humans and the environment and their impact on public policy.
Prerequisite: Freshman or sophomore classification.

VIBS 243 Introductory Mammalian Histology
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Biological aspects of the human body by integrating histology and anatomy and physiology; emphasis on the transition of cell and tissue organization to organ systems that comprise mammalian organisms; builds upon concepts introduced in lower-level biology and builds a foundation to succeed in upper-level histology, anatomy and physiology.

VIBS 277/NRSC 277 Introduction to Neuroscience
Credits 3. 3 Lecture Hours.
Neuroscience from the molecular to system levels; fundamental principles and knowledge of neuroscience; current research information on neuroscience.
Prerequisites: Freshman or sophomore classification and approval of instructor.
Cross Listing: NRSC 277/VIBS 277.
VIBS 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed studies in specific problem areas of veterinary anatomy and public health.
Prerequisites: Freshman or sophomore classification and approval of department head.

VIBS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of veterinary anatomy or topics not covered in other courses. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

VIBS 305 Biomedical Anatomy
Credits 4. 2 Lecture Hours. 4 Lab Hours.
Comprehensive mammalian gross anatomy, using the dog as the model species; laboratory dissection, anatomical nomenclature with human correlates and the application of anatomy to clinical situations.
Prerequisites: BIOL 112; junior or senior classification; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 310 Biomedical Writing
Credit 1. 1 Lecture Hour.
Mechanisms by which knowledge is shared among researchers, clinicians and other science professionals, then disseminated to the general public; an assortment of written assignments to develop writing skills specific for communicating scientific concepts to a variety of audiences. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification.

VIBS 311 Biomedical Explorations through Narrative
Credit 1. 1 Lecture Hour.
Familiarization with the writing style required for biomedical and health science; instruction in writing styles and appropriate techniques to increase and strengthen writing abilities. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification.

VIBS 343 Histology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Normal tissues of vertebrates including histogenesis of some; histogenesis and organography of mammalian tissues.
Prerequisites: BIOL 112; CHEM 228; junior or senior classification; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 401 Developmental Neurotoxicology
Credits 2. 2 Lecture Hours.
Effects of exposure to toxic substances on the developing nervous system; content to include mechanisms of toxicity of substances potentially devastating to the developing nervous system including lead, mercury and other heavy metals, alcohol, nicotine (smoking), pesticides, flame retardants, and others.
Prerequisite: Junior or senior classification.

VIBS 404 Food Toxicology and Safety
Credits 3. 3 Lecture Hours.
Toxicity and safety of various foods and food additives, ingredients, and contaminants; occurrence, control and prevention of food transmitted diseases.
Prerequisite: Junior or senior classification.

VIBS 407/NRSC 407 Core Ideas in Neuroscience
Credits 2. 2 Lecture Hours.
General overview of selected core ideas across the full spectrum of neuroscience.
Prerequisite: Junior or senior classification; background in science courses recommended.

VIBS 408 Neuroscience and Religion
Credits 3. 3 Lecture Hours.
Emphasis on the biology of the human mind in the context of religious implications.
Prerequisites: Junior or senior classification; concurrent enrollment in NRSC 407/VIBS 407 or VIBS 407/NRSC 407.

VIBS 411 Tumor Cell Biology and Carcinogenesis
Credits 3. 3 Lecture Hours.
Principles of tumor biology; role of gene-environment interactions; molecular mechanisms regulating cancer initiation and progression; therapeutic treatment of cancer.
Prerequisites: BIMS 320/GENE 320 or equivalent; junior or senior classification.

VIBS 413 Introduction to Epidemiology
Credits 3. 3 Lecture Hours.
Study and measurement of disease and health in populations; examples from literature and current events; emphasizes concepts and appreciation for epidemiologic approaches and applications in life.
Prerequisite: Junior or senior classification.

VIBS 420 Computer Applications in Public Health Research
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the use of computers for public health research applications, including word processing, spreadsheets, data base management and telecommunications.
Prerequisites: Senior classification or approval of instructor; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 422 Endocrine Toxicology
Credits 4. 4 Lecture Hours.
Impacts of endocrine toxicology on endocrine system; prevalence, environmental and occupational use and disposal of environmental endocrine disrupting chemicals (EDCs); structure, toxicokinetics and mechanism of action of EDCs; effects of EDCs on the development and function, disorders and diseases of the endocrine and reproductive organs.
Prerequisites: Senior classification; approval of instructor.

VIBS 424/VTPP 424 Biomedical Neuroendocrinology and Endocrine Disorders
Credits 3. 3 Lecture Hours.
Neuroendocrine (hypothalamus-pituitary) control of puberty, menstruation, ovulation, pregnancy, labor, lactation, female reproductive cycles, male reproductive functions, thyroid and parathyroid, adrenal and kidney, diabetes, obesity, sleep, memory, learning and aging and their endocrine disorders; overview on biosynthesis, transport and signaling of peptide and neuropeptide hormones, steroids and prostaglandins.
Prerequisites: Honors, junior or senior classification, or approval of instructor.
Cross Listing: VTPP 424/VIBS 424.
VIBS 426/ENTO 426 Methods in Vector-Borne Disease Ecology
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Methodological understanding of how vector-borne diseases are studied in the field and laboratory; hands-on exploration of the ecology disease systems in a one health framework; concepts of design, execution and presentation of research projects; outdoor field work and bio-safety level 2 laboratory.
Prerequisites: Junior or senior classification and approval of instructor.
Cross Listing: ENTO 426/VIBS 426.

VIBS 443 Biology of Mammalian Cells and Tissues
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Molecular phenomena placed in context with tissues, organs and organ systems; cell and tissue structures visualized by light microscopy and electron micrographs for functional relationships; clinical correlations reveal relevance of histology in specific disease states; conceptual thinking exercises facilitate problem solving skills.
Prerequisites: Junior or senior classification in life sciences and interest in health related careers.
VIBS 447 Neurophysiology of Music
Credits 2. 2 Lecture Hours.
Exploration of the heritability and genetics of musical talent, the physiology and physics of hearing, and the neurophysiology of processing sound using primarily German and Austrian compositions. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification.
VIBS 450/NRSC 450 Mammalian Functional Neuroanatomy
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Functional morphology of the domestic animal and human brain using gross specimens, microscopic sections, interactive computer-, DVD- and video-assisted instructional programs supplemented with clinical case studies.
Prerequisites: Junior or senior classification; BIMS, biology, biochemistry, or psychology majors, or neuroscience minors with overall 3.5 Texas A&M GPA; or approval of instructor.
Cross Listing: NRSC 450/VIBS 450.

VIBS 456 Science in Cinema and Society
Credits 3. 3 Lecture Hours.
Examination of the role science depicted in popular culture plays in shaping basic science literacy.
Prerequisites: VIBS 310; majors only; junior or senior classification; approval of instructor.

VIBS 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of a selected problem in veterinary anatomy (with emphasis on neuroscience, cell biology, reproduction, developmental biology, marine mammal anatomy) approved by instructor or selected problems in veterinary public health (with emphasis on food safety, toxicology, epidemiology, informatics, zoonoses).
Prerequisites: Junior or senior classification and approval of instructor.

VIBS 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of veterinary anatomy (with emphasis on neuroscience, cell biology, genetics, reproduction, developmental biology, marine mammal anatomy) or selected topics in veterinary public health, epidemiology, zoonoses, food hygiene, food toxicology and mycotoxicology. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of instructor; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIST - Visual Studies (VIST)

VIST 105 Principles of Design I
Credits 3. 1 Lecture Hour. 7 Lab Hours.
Principles and theory of design and visual communication; elements and organizational structure of the visual language; sign, symbol and meaning; visual perception; problem solving and the creative process; introduction to color theory; emphasis on two-dimensional design.
Prerequisite: Lower division in Visualization.

VIST 106 Principles of Design II
Credits 3. 1 Lecture Hour. 7 Lab Hours.
Fundamentals of spatial design; theory of form; transformations, additive/subtractive techniques as process; 3D composition; traditional modeling and construction techniques; formal visual analysis and critique.
Prerequisite: Grade of C or better in VIST 105.

VIST 131 First Year Seminar
Credit 1. 1 Other Hour.
Seminar on contemporary topics related to Visualization; introduction to college instruction and experiences; focus on writing, exploration, discussion and research.
Prerequisite: Lower division in Visualization.

VIST 170 Introduction to Visualization Computing Environments
Credit 1. 2 Lab Hours.
Procedures, practices and environments useful for visual problem solving using programmatic languages; setup and use of the computing environment; useful system tools and commands; basic programming concepts and constructs.
Prerequisite: Lower division in Visualization.

VIST 201 Writing for Design
Credit 1. 2 Lab Hours.
Writing as a discipline for the development, conceptualization, critique and presentation of visual works; emphasis on portfolio and narrative development.
Prerequisite: Major in visualization.

VIST 205 Principles of Design III
Credits 3. 1 Lecture Hour. 7 Lab Hours.
Introduction to the creative processes, workflows and methodologies used in the field of visualization including interactive design, game design and development and animation.
Prerequisites: Upper division in Visualization.

VIST 206 Visual Studies Studio I
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Theory and practice of visual communication methodologies and processes used in interactive media, game design and development, or animation; visual storytelling.
Prerequisite: Grade of C or better in VIST 205.

VIST 235 Theory and Practice in Visualization
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Professional material development, media theory and trends, copyright law and common business practices; professional practice in pursuit of career paths for creative fields in Visualization.
Prerequisite: Grade of C or better in VIST 205.
VIST 270 Computing for Visualization I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Theory and practice of visual computer based problem solving; system tools; scripting; software design principles and practice; basics of interactive programming and interface design; development concepts and principles useful in digital art and visualization production.
Prerequisite: MATH 151 and upper division in Visualization.

VIST 271 Computing for Visualization II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Continuation of Computing for Visualization I; concepts of object oriented programming; emphasis on principles and techniques useful for three dimensional visualization and real time graphic display.
Prerequisite: MATH 152; grade of C or better in VIST 270.

VIST 275 Introduction to Visualization
Credits 3. 3 Lecture Hours.
Introduction to visualization concepts, techniques and applications; introduction to significant visualization topics including cultural context, visual perception, the digital image, visual language, geometric modeling, animation, image creation, image compositing; application areas, ethical issues in visualization and the future of visualization.
Prerequisites: Grade of C or better in MATH 150 or MATH 151; non Visualization majors only.

VIST 282 2D Visualization Techniques
Credit 1. 2 Lab Hours.
Introduction to software used in the visual arts including 2D raster and vector images for motion graphics, animation, illustration and design. Specific course content will vary based upon curriculum requirements. May be taken for credit up to two hours.
Prerequisite: Major in visualization or minor in art.

VIST 283 3D Visualization Techniques
Credit 1. 2 Lab Hours.
Introduction to software used in the visual arts including 3D modeling, gaming and animation; applicable to 3D printing and rendering. Specific course content will vary based upon curriculum requirements. May be taken for credit up to two hours.
Prerequisite: Major in visualization.

VIST 284 Visualization Techniques
Credit 1. 2 Lab Hours.
Introduction to software used in the visual arts for technical manipulation of content, including film editing, gaming, Augment Reality (AR)/Virtual Reality (VR), or Audio. Specific course content will vary based upon curriculum requirements. May be repeated two times for credit.
Prerequisite: Major in visualization, minor in art, or minor in game design and development.

VIST 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of visualization. May be repeated for credit.
Prerequisite: Approval of instructor.

VIST 305 Visual Studies Studio II
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Theory and practice of visual communication employing digital and conventional media; development of artistic concepts, proposal development and related implementation techniques; introduction to digital painting, 3D modeling, animatics and post production.
Prerequisites: Grade of C or better in VIST 206.

VIST 310 Photography for Visualization
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Advanced aesthetic and thematic control of the digital image; exposure refinement; advanced lighting techniques and digital compositing; digital work-flow; image conversion and control; color management; digital forensics; printing technology, processes and presentation.
Prerequisites: Upper division in Visualization.

VIST 339 Research Techniques in Visualization
Credits 3. 3 Lecture Hours.
Research techniques used in visualization and creative fields; qualitative and quantitative methods, formulating research questions; determining appropriate methods, research planning and designing, data collection, testing and assessment; data analysis and interpretation.
Prerequisites: Grade of C or better in VIST 206 and VIST 235.

VIST 354 Principles of Multimedia Design
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Application and design of web and mobile platforms to create interactive products; planning, design, and development of intuitive user interfaces; focus on user-centered design, interaction principles, and standards-based technologies.
Prerequisite: Grade of C or better in VIST 271 or ARTS 303.

VIST 357 Interaction Design
Credits 3. 3 Lecture Hours.
Concepts, theories and methods in interaction design and interaction; dimensions of interaction design; data gathering methods and evaluation; task analysis; aesthetics and the sensory experience; prototyping, and workflow.
Prerequisite: Upper division in Visualization.

VIST 370 Interactive Virtual Environments
Credits 3. 3 Lecture Hours.
Languages and techniques useful for the creation of real time virtual environments; definition of formal scene description structures; modeling and transformation techniques; simulation techniques; behaviors and message passing; user interaction and animation; multiuser environments; creating virtual interfaces; scripting techniques.
Prerequisite: Grade of C or better in VIST 271.

VIST 372 Creating Digital Environments
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Terminology, principles and practices in the creation of 3D models; mathematical principles of geometrical modeling theory and application of modeling techniques; boolean operations; parametric modeling; modeling; particle systems; L-Systems; nurbs and/or grammar based techniques; lighting setup and control.
Prerequisite: Grade of C or better in VIST 271.

VIST 374 Multimedia Design and Development
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Concepts and techniques for integrating multimedia with user control and interactivity; production of computer presentations and interactive mobile devices; computer animation, graphics, production and use of digital images; scripting techniques; projects for stand-alone computers and mobile devices.
Prerequisite: Junior or senior classification or approval of instructor and undergraduate program coordinator.
VIST 375 Foundations of Visualization  
Credits 3. 3 Lecture Hours.  
Visualization concepts, techniques and applications; major topic areas include cultural context, application areas, visual perception, the digital image, visual language, coordinate systems, geometric representation, modeling animation, image synthesis, image composing, ethics and the future of visualization.  
Prerequisites: Grade of C or better in VIST 271.

VIST 405 Visual Studies Studio III  
Credits 3. 1 Lecture Hour. 5 Lab Hours.  
Theory and practice in the art and science of the visual image; scientific and mathematical principles as process; information theory and sensorial design; interactivity and user integration; integration of real and virtual environments including lighting design and material definition.  
Prerequisites: Grade of C or better in VIST 305, and CARC 301 or VIST 494.

VIST 406 Visual Studies Studio IV  
Credits 3. 1 Lecture Hour. 5 Lab Hours.  
Theory and practice in the development of the digital image; non-traditional modeling methods; camera control and animation techniques; special effects; creative lighting methods; non-photorealistic rendering; integration of traditional and digital media in the creation of visual works.  
Prerequisites: Grade of C or better in VIST 305, and CARC 301 or VIST 494.

VIST 409 Capstone Studio  
Credits 3. 1 Lecture Hour. 5 Lab Hours.  
Completion of the proposed capstone project; integration of core methodologies, concept development, drawing and design, art history, aesthetics, research, methodology and processes, scripting and programming and digital communication; required peer reviewed publication or other appropriate venue.  
Prerequisites: VIST 405 and VIST 439.

VIST 432 Applied Perception  
Credits 3. 3 Lecture Hours.  
Topics in perceptual science useful for Visualization; cognitive, neural and evolutionary processes that undergird perceptual systems; perceptual factors that influence design decision.  
Prerequisite: Upper division in Visualization.

VIST 439 Capstone Proposal Development  
Credit 1. 2 Lab Hours.  
Individual proposal development for capstone studio; demonstration of ideation and concept development, drawing and design, art history, aesthetics, research, methodology and processes, scripting or programming and digital communication.  
Prerequisites: VIST 399 and VIST 375.

VIST 441 Scientific and Technological Developments in Visual Arts  
Credits 3. 3 Lecture Hours.  
Advanced level course focusing on the relationship between art, science and technology; visual arts before the digital revolution; the development of computer graphic arts.  
Prerequisite: Upper division in Visualization.

VIST 442 Digital Characters: Art, Technology, Uses and Meaning  
Credits 3. 3 Lecture Hours.  
Examination of the art and technology employed in the creation of digital characters; exploration of the reasons for, and impact of, their use in popular media and science; digital character creation techniques; estimating performance requirements; visual examples and written work used to illustrate topics and application areas.  
Prerequisite: Grade of C or better in ARTS 349.

VIST 465 Video and Time Based Media  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Exploration of perception, vision and self-expression for communication through time based media; investigation of expression, vision, and visual language as a process; practice of visual communication strategies.  
Prerequisites: Grade of C or better in ARTS 349.

VIST 470 Digital Rendering  
Credits 3. 3 Lecture Hours.  
Creation of photorealistic images; rendering techniques and control; perceptual and physical principles related to creating realistic images; lighting and environmental effects; properties of materials; rendering models and techniques for adding visual detail; shading languages.  
Prerequisite: Grade of C or better in VIST 271.

VIST 472 Digital Compositing  
Credits 3. 3 Lecture Hours.  
Theory and practice of virtual reality; interactive 3D virtual environments; input/output devices, 3D interaction techniques, augmented reality, role corrections, matte techniques, keying, rotoscoping, camera and object tracking, stereo compositing and process workflow.  
Prerequisite: Grade of C or better in VIST 271.

VIST 474 Designing for the Web  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Principles of web page and site creation; elements of visual design; typography for the web; web technologies; controlling the page real estate through cascading style sheets (CSS); imaging for the web; creation and use of color and graphics; web standards; building complete web sites.  
Prerequisite: Upper division in Visualization or minor in Art.

VIST 476/CSCE 447 Data Visualization  
Credits 3. 3 Lecture Hours.  
Visual representation and design of data and information; 3D visualization, infographics, data narratives, principles of visual data encoding and interaction techniques.  
Prerequisite: Grade of C or better in VIST 271, or CSCE 221, or CSCE 441.  
Cross Listing: CSCE 447/VIST 476.

VIST 477/CSCE 446 Virtual Reality  
Credits 3. 3 Lecture Hours.  
Theory and practice of virtual reality; interactive 3D virtual environments; input/output devices, 3D interaction techniques, augmented reality, role of realism in VR, navigation techniques, design guidelines and evaluation methods.  
Prerequisite: Grade of C or better in VIST 271, CSCE 221, or CSCE 441.  
Cross Listing: CSCE 446/VIST 477.

VIST 484 Summer Internship  
Credits 3. 3 Lecture Hours.  
Practical experience in a visualization related company; 10-week internship with a minimum of 400 hours continuous employment; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. May not be repeated for credit.  
Prerequisites: Upper division in Visualization and approval of visualization intern coordinator.

VIST 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Special problems in visual studies. May be repeated for up to 9 credit hours.  
Prerequisite: Approval of instructor and undergraduate program coordinator.
VIST 486 Introduction to Game Design  
Credits 3. 3 Lecture Hours.  
Computer game design; emphasis on interactive storytelling, game play and interface design; history of computer games, review of selected games; analysis of rules of play and simple game prototype development. 
Prerequisite: Grade of C or better in VIST 375, or minor in Game Design and Development. 
VIST 487/CSCE 443 Game Development  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Aesthetic and technical aspects of computer game development, including game mechanics, story development, content creation and game programming; includes game design, interface design, 3D modeling and animation, graphics algorithms, shader programming and artificial intelligence; group project includes the design and development of a game from start to finish. 
Prerequisite: VIST 486 or CSCE 441 or approval of instructor; junior or senior classification. 
Cross Listing: CSCE 443/VIST 487. 
VIST 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. 
Selected topics in an identified field of visual studies. May be repeated for up to 9 credit hours. 
Prerequisite: Approval of instructor and undergraduate program coordinator. 
VIST 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty members in visualization; emphasis on visual studies. May be repeated 2 times for credit. 
Prerequisites: Upper division in Visualization; approval of instructor and undergraduate program coordinator. 
VIST 494 Internship  
Credits 6. 6 Other Hours. 
Practical experience in a visualization related company; equivalent of 600 hours over at least 15 weeks; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. May not be repeated for credit. 
Prerequisites: Upper division in Visualization and approval of Visualization intern coordinator. 

VLCS-Vet Large Animal Clin Sc (VLCS) 

VLCS 422 Equine Disease and Epidemiology  
Credits 3. 3 Lecture Hours.  
Principles and methods of epidemiology applied to equine health and prevention and control of selected equine infectious diseases. 
Prerequisite: Enrollment in equine certificate and junior or senior classification, or approval of instructor. 
VLCS 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study of selected problems in biomedical sciences approved by instructor. May be repeated for credit. 
Prerequisites: Senior classification in biomedical science and approval of department head.

VSCS-Vet Small Animal Clin Sc (VSCS) 

VSCS 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study of a selected problem in biomedical sciences approved by instructor. May be repeated for credit. 
Prerequisites: Junior or senior classification and approval of department head and instructor. 

VTPB - Veterinary Pathobiology (VTPB) 

VTPB 212 Genetics in the News  
Credits 3. 3 Lecture Hours.  
Use of contemporary news articles from the popular press to delve into the science of genetics and genomics and their methodologies to gain a deeper understanding of how data is analyzed and interpreted leading to news headlines. 
Prerequisites: Sophomore classification or approval of instructor; high school or college course in biology recommended. 
VTPB 221 Great Diseases of the World  
Credits 3. 3 Lecture Hours.  
Great infectious and parasitic diseases; introduction to the major diseases affecting humans and other mammals including plague, tuberculosis, AIDS and malaria. 
Prerequisite: Freshman or sophomore classification. 
VTPB 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study of selected problems in microbiology, parasitology, immunology, genetics or pathology as approved by instructor. 
Prerequisites: Approval of department head; freshman or sophomore classification. 
VTPB 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of veterinary pathobiology. May be repeated for credit. 
Prerequisite: Freshman classification. 
VTPB 301/WFSC 327 Wildlife Diseases  
Credits 3. 3 Lecture Hours.  
Basic mechanisms of diseases as they occur in wildlife populations; interplay of habitat requirements, individual physiological requirements and disease producing mechanisms of varied wildlife species. 
Prerequisite: Junior classification or approval of department head. 
Cross Listing: WFSC 327/VTPB 301. 
VTPB 303 Medical Communication in the International Community  
Credits 3. 3 Lecture Hours.  
To develop an awareness that there is a culture associated with the practice of veterinary and human medicine in other countries. 
Prerequisite: Junior or senior classification. 
VTPB 334 Poultry Diseases  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Poultry sanitation and diseases. Prevention and control of environmental, nutritional, parasitic and contagious diseases. 
Prerequisites: BIOL 107 or BIOL 111; junior or senior classification.
VTPB 405 Biomedical Microbiology  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Fundamentals of bacteriology, mycology, virology, infectious diseases, immunology and identification of pathogenic microorganisms.  
Prerequisite: Junior classification in a biological science.

VTPB 407 Advanced Veterinary Microbiology Laboratory  
Credits 1 to 3. 1 to 4 Lab Hours.  
Modular course (one credit per module) that covers immunological and molecular techniques used with bacteria, parasites and viruses in animals for diagnostic and identification purposes.  
Prerequisites: VTPB 405, VTPB 409 and VTPB 438 or concurrent enrollment; junior or senior classification.

VTPB 408 Clinical Microbiology  
Credits 3. 3 Lecture Hours.  
Conceptual basis for understanding pathogenic microorganisms and the mechanisms by which they cause disease in the human body; operates in an integrated manner with the spectrum of microorganisms including viruses, bacteria, fungi and parasites, describing the factors common to all infectious diseases; molecular biology, pathology and immunology explain the mechanisms for spread, immune response and recovery.  
Prerequisites: VTPB 405, VTPB 456 and VTPB 409 or BIOL 454.

VTPB 409 Introduction to Immunology  
Credits 3. 3 Lecture Hours.  
Diverse concepts relative to immunologic mechanisms inherent to domestic and laboratory animals.  
Prerequisite: Advanced classification.

VTPB 410 Cell Mechanisms of Disease  
Credits 3. 3 Lecture Hours.  
Mechanisms, morphologic manifestations and clinical signs of disease processes at the cellular level.  
Prerequisites: CHEM 227 and CHEM 228, or equivalent; junior or senior classification; biomedical sciences major, biomedical engineering major or related field.

VTPB 411 One Health and Tropical Ecology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Traditional lectures, guest lectures, field excursions, field laboratories, discussions, readings, student oral presentations and case studies; form and function of healthy ecosystems, various forms of ecosystem perturbation and how perturbations influence ecosystem, animal, and human health.

VTPB 415 Immunogenetics and Comparative Immunology  
Credits 3. 3 Lecture Hours.  
Genetic mechanisms used to diversify immune receptors; immunoglobulins, T cell receptors, major histocompatibility complex, natural killer cell receptors, toll-like receptors and many others; selected comparative and veterinary examples of different immune recognition systems; evolution of the immune system.  
Prerequisites: Junior or senior classification, GENE 320/BIMS 320 and VTPB 409 or approval of instructor.

VTPB 421 Infectious Diseases of Humans and Animals  
Credits 3. 3 Lecture Hours.  
Pathogenesis of selected bacterial pathogens of humans and animals; bacterial virulence factors, host immune responses; current concepts of extracellular, facultative intracellular and obligate intracellular bacterial diseases.  
Prerequisites: Junior or senior classification.

VTPB 489 Special Topics in...  
Credits 0 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of microbiology, immunology, parasitology, genetics or pathology as approved by instructor.  
Prerequisites: Approval of department head; junior or senior classification.

VTPP 223 Design of Experiments for Physiology Research  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Team or group formulation and refinement of novel hypotheses and design of controlled in vitro experiments; emphasis on production of publishable research in physiology.  
Prerequisite: VTPP 123 or approval of instructor.
VTPP 224 In Vitro Experimentation in Physiology Research
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Team or group collection, analysis and interpretation of data from in vitro experiments; emphasis on production of publishable research in physiology.
Prerequisite: VTPP 223 or approval of instructor.

VTPP 234 Design of Models for Physiology Research
Credits 3. 3 Lecture Hours.
Team or group design of novel models of physiological systems to predict homeostatic behavior arising from the interaction of subsystems; emphasis on production and formal presentation of basic research in physiology.
Prerequisite: VTPP 123 or approval of instructor.

VTPP 235 Analysis and Validation of Models for Physiology Research
Credits 3. 3 Lecture Hours.
Team or group analysis and validation of models of physiological systems to explain disease states and design potential clinical interventions; emphasis on production of publishable applied research in physiology.
Prerequisite: VTPP 234 or approval of instructor.

VTPP 281 Seminar
Credits 4. 4 Other Hours.
Exposure to scientists from a variety of biomedical disciplines through attendance at seminars followed by review and discussion of current scientific work in physiology and related subjects, and subsequent student seminar presentations.
Prerequisites: Freshman or sophomore classification; approval of instructor.

VTPP 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Course for freshman and sophomore students who desire additional laboratory work in physiology to supplement required courses.
Prerequisites: Freshman or sophomore classification; approval of department head.

VTPP 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of veterinary physiology and pharmacology. May be repeated for credit.

VTPP 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Laboratory and/or field research supervised by a faculty member. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Freshman or sophomore classification; approval of instructor.

VTPP 323 Physiology of Domestic Animals
Credits 3. 3 Lecture Hours.
Physiology essential to the understanding of life processes; for animal science, wildlife, agriculture and related fields.
Prerequisite: BIOL 111 or equivalent; junior or senior classification.

VTPP 401/BMEN 400 History of Human and Veterinary Medicine in Europe
Credits 4. 4 Lecture Hours.
Addresses the major developments in human and veterinary medicine in Europe from the Middle Ages to the present; explores key events and figures in medical history and analyzes issues of current biomedical concern in a historical context; for example, animal rights, ethics of humane experimentation, euthanasia.
Prerequisites: Admitted to major degree sequence in biomedical engineering; VTPP 434.
Cross Listing: BMEN 400/VTPP 401.

VTPP 420 Applied Pharmacology
Credits 2. 2 Lecture Hours.
Modern themes about therapeutic drugs in animals and people including drug discovery and development, clinical use of drugs and drug regulation.
Prerequisites: Grade of C or better in BICH 410, VTPP 423, or VTPP 434, or approval of instructor.

VTPP 423 Biomedical Physiology I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Human physiological principles, review of cellular physiology, and development of an understanding of the nervous system and muscle, cardiovascular, and renal physiology; clinical applications related to organ systems.
Prerequisites: VIBS 305; junior or senior classification.

VTPP 424/VIBS 424 Biomedical Neuroendocrinology and Endocrine Disorders
Credits 3. 3 Lecture Hours.
Neuroendocrine (hypothalamus-pituitary) control of puberty, menstruation, ovulation, pregnancy, labor, lactation, female reproductive cycles, male reproductive functions, thyroid and parathyroid, adrenal and kidney, diabetes, obesity, sleep, memory, learning and aging and their endocrine disorders; overview on biosynthesis, transport and signaling of peptide and neuropeptide hormones, steroids and prostaglandins.
Prerequisites: Honors, junior or senior classification, or approval of instructor.
Cross Listing: VIBS 424/VTPP 424.

VTPP 425 Pharmacology
Credits 3. 3 Lecture Hours.
Introduction to pharmacokinetics and pharmacodynamics; survey of major pharmaceutical classes; uses, mechanisms of action and adverse reactions of selected agents.
Prerequisites: VTPP 423 or approval of instructor; junior or senior classification.

VTPP 427 Biomedical Physiology II
Credits 3. 3 Lecture Hours.
Continuation of VTPP 423. Fluid balance and acid-base balance; development of an understanding of respiratory, gastrointestinal, endocrine and reproductive physiology using human and other mammalian models; clinical applications related to organ systems.
Prerequisites: VTPP 423; junior or senior classification.

VTPP 429 Introduction to Toxicology
Credits 3. 3 Lecture Hours.
Principles of toxicology with emphasis on environmental issues and human and animal health issues; study of the regulatory processes concerning toxic chemicals.
Prerequisite: Junior or senior classification.
VTTP 434 Physiology for Bioengineers I  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Engineering analysis of living systems; quantitative aspects of physiology and engineering applications to clinical medicine; body fluid balance, solute transport, endocrinology, reproduction physiology, neurophysiology, and skeletal and smooth muscle physiology.  
**Prerequisite:** Biomedical engineering (BMEN) major or approval of instructor.

VTTP 435 Physiology for Bioengineers II  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Engineering analysis of living systems; quantitative aspects of physiology and engineering applications to clinical medicine; vascular physiology, cardiac physiology, bone physiology, regenerative medicine, renal physiology, pathophysiology.  
**Prerequisite:** VTTP 434 or approval of instructor.

VTTP 438 Analysis of Genomic Signals  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Overview of current high throughput technology for data acquisition and analysis of genomic signals (e.g. mRNA or proteins); emphasis on the microarray technology, methods for analyzing microarray data, and approaches to model the underlying phenomena from the systems biology perspective.  
**Prerequisites:** Junior or senior classification; BIMS 320/GENE 320 or GENE 320/BIMS 320 and BIOL 111, BIOL 112 or BIOL 213 or equivalent; STAT 302 or equivalent.

VTTP 444 Practicum in Biomedical Research  
Credits 3. 3 Other Hours.  
Team or group development of sustainable collaborations that include biomedical research, high-impact educational practices and community service; focus on connecting research experience to future career goals.  
**Prerequisites:** VTTP 423 and VTTP 427 or VTTP 434 and VTTP 435; junior or senior classification.

VTTP 452 Fetal and Embryo Physiology  
Credits 3. 3 Lecture Hours.  
Introduction to the physiologic processes driving embryonic development and pregnancy; focus on embryo implantation, establishment of the placenta, development of the fetal circulatory systems and the molecular processes governing embryo differentiation and development; special emphasis on the major organ systems affected by pediatric disease and on the actions of teratogens.  
**Prerequisite:** BICH 410 or equivalent, or approval of instructor.

VTTP 481 Seminar  
Credits 4. 4 Other Hours.  
Exposure to scientists from a variety of biomedical disciplines through attendance at seminars followed by review and discussion of current scientific work in physiology and related subjects, and subsequent student seminar presentations.  
**Prerequisites:** Junior or senior classification; and approval of instructor.

VTTP 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Course for junior and senior students who desire additional laboratory work in physiology to supplement required courses.  
**Prerequisites:** Junior or senior classification and approval of department head.

VTTP 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of physiology, pharmacology, endocrinology or toxicology. May be repeated for credit.  
**Prerequisite:** Junior or senior classification.

VTTP 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Laboratory and/or field research supervised by a faculty member.  
**Prerequisites:** Junior or senior classification; approval of instructor.

WFSC-Wildlife & Fisheries Sci (WFSC)

WFSC 101 Introduction to Wildlife and Fisheries  
Credits 3. 3 Lecture Hours.  
Introduction to a variety of topics in the wildlife and fisheries discipline to prepare to be successful both in the field and in further studies; case studies will guide through current issues and laboratory concepts will provide hands on experience in methods and skills important in the field of wildlife and fisheries.  
**Prerequisite:** Open only to students with less than 36 hours at Texas A&M University.

WFSC 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in wildlife and fisheries sciences. May be repeated 3 times for credit.  
**Prerequisites:** Freshman or sophomore classification and approval of instructor.

WFSC 300/ENTO 300 Field Studies  
Credits 3. 3 Other Hours.  
Integration of principles of animal and plant ecology with environmental factors to characterize wildlife populations; intensive analysis of specific areas will emphasize either the development of a wildlife management plan or a general vertebrate natural history survey.  
**Prerequisite:** Prior approval of instructor and concurrent enrollment in WFSC 450/ENTO 450 and WFSC 451/ENTO 451.  
**Cross Listing:** ENTO 300/WFSC 300.

WFSC 301 Wildlife and the Changing Environment  
Credits 3. 3 Lecture Hours.  
Using an ecosystem approach, analyzes changes in the North American environment; effects of these changes on wildlife populations; and reviews areas of major, current concern.  
**Prerequisites:** Junior or senior classification; restricted to non-majors.

WFSC 302 Natural History of the Vertebrates  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Introduction to life histories of fishes, amphibians, reptiles, birds and mammals; lecture covers vertebrate groups on a worldwide scale and emphasizes a comparative approach to the study of adaptation to the environment; lecture topics include behavior, reproduction, feeding specializations, evolutionary history, locomotion, hibernation, migration, endangered species, zoogeography and importance to man; laboratory emphasizes the recognition of Texas vertebrates. Designed for both science and non-science majors.  
**Prerequisites:** BIOL 111 and BIOL 112 or BIOL 101 and BIOL 107 or equivalent.

WFSC 303 Fish and Wildlife Laws and Administration  
Credits 3. 3 Lecture Hours.  
Review and analysis of state and federal laws and international treaties and conventions affecting fish and wildlife; their application and administration; organizational structure of state, federal and international agencies; their objectives, policies and practices.  
**Prerequisites:** Grade of C or better in WFSC 101; grade of C or better in RENR 205 or BIOL 357; junior classification or approval of instructor.
WFSC 304 Wildlife and Fisheries Conservation
Credits 3. 3 Lecture Hours.
Ecological principles used to conserve and manage wildlife and fisheries resources at the individual, population and community levels; topics include conservation biology, species interactions, animal-habitat relationships, population dynamics and harvesting, habitat management and restoration and human dimensions of fish and wildlife conservation.
Prerequisites: RENR 205 and junior or senior classification or approval of instructor.

WFSC 311 Ichthyology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the study of fishes, their biology, classification, evolution, distribution, ecology and economic importance.
Prerequisite: WFSC 302 or BIOL 318.

WFSC 314 Down River: Biology of Gulf Coastal Fishes
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Understanding the biological complexity of Gulf coast river systems while gaining hands-on experience in field and museum ichthyological techniques; sampling of the Guadalupe and San Antonio rivers; participation in lectures, museum preparation and archiving specimens at the Biodiversity Research and Teaching Collections (BRTC).
Prerequisites: WFSC 311 with a grade of B or better and approval of instructor.

WFSC 315 Herpetology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Evolutionary ecology of reptiles and amphibians and conservation biology of the major groups; labs concentrate on the global diversity of herps and the herpetofauna of Texas; foundation for students in wildlife science and biology.
Prerequisites: WFSC 302 or approval of instructor; WFSC 302 or BIOL 318.

WFSC 316 Field Herpetology
Credit 1. 3 Lab Hours.
Field work involving collection and preservation of herpetological specimens; natural history, ecological relations. Available for students enrolled in WFSC 315 who would like to have field trips.
Prerequisite: WFSC 315 or registration therein.

WFSC 327/VTPB 301 Wildlife Diseases
Credits 3. 3 Lecture Hours.
Basic mechanisms of diseases as they occur in wildlife populations; interplay of habitat requirements, individual physiological requirements and disease producing mechanisms of varied wildlife species.
Prerequisite: Junior classification or approval of department head.
Cross Listing: VTPB 301/WFSC 327.

WFSC 335 Natural History of the Invertebrates
Credits 4. 3 Lecture Hours. 3 Lab Hours.
A phylogenetic survey of the invertebrate phyla including their taxonomy, morphology, life histories, ecology, ethology and zoogeography. Field trips may be required for which departmental fees may be assessed to cover costs.

WFSC 401 General Mammalogy
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Mammalian biology; evolution, classification, biogeography, reproduction, physiology, ecology, and behavior; focuses on basic concepts necessary for a foundation in both wildlife science and biology.
Prerequisites: WFSC 302 or BIOL 318; junior classification.

WFSC 402 General Ornithology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to study of birds, their structure, classification, geographic distribution, ecological relations and economic status; foundation of wildlife science, also for museum work.
Prerequisites: WFSC 302 or BIOL 318; junior classification.

WFSC 403 Animal Ecology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Concepts of animal ecology which emerge at various levels of organization; the ecosystem, the community, the population and the individual; laboratories emphasis on the quantitative analysis of field data and the simulation of population dynamics.
Prerequisites: Grade of C or better in RENR 205 or approval of instructor; junior classification.

WFSC 404 Aquatic Ecosystems
Credits 3. 3 Lecture Hours.
Inland and coastal zone aquatic ecosystems, lower foodweb structure, functioning and influence on living resources; lakes, rivers, estuaries, open bay systems, factors impacting ecosystem health and fisheries; harmful algal blooms, reduced water inflows, eutrophication and hypoxia formation as they affect foodwebs, recruitment of commercially and recreationally important fisheries.
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 405 Urban Wildlife and Fisheries
Credits 3. 3 Lecture Hours.
Urban wildlife and fisheries trains students to establish and maintain diverse, self-sustaining urban wildlife and fish populations at levels in harmony with ecological, social, and economic values of the human community and to develop optimal levels of public appreciation and use of urban wildlife and fish resources and associated habitats.
Prerequisites: RENR 205; junior or senior classification.

WFSC 406 Wildlife Habitat Management
Credits 3. 3 Lecture Hours.
Designed to acquaint the student with major land use practices on lands that produce wildlife, how these influence wildlife production and alterations or manipulations of habitat used to achieve specific wildlife management goals.
Prerequisites: Grade of C or better in RENR 205 and WFSC 302 or approval of instructor; junior classification.

WFSC 407 Field Wildlife Habitat Management
Credit 1. 2 Lab Hours.
Field and laboratory studies of specific wildlife habitat management practices with special emphasis on those used in Texas; attendance required at four weekend field trips to study wildlife habitat operations.
Prerequisite: Concurrent registration in WFSC 406 required.

WFSC 408 Techniques of Wildlife Management
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Techniques available to directly and indirectly manipulate wild animal populations to achieve balance between socioeconomic and aesthetic values.
Prerequisites: Senior classification or approval of instructor.

WFSC 409 NATURE in the Classroom: Needed Activities To Understand Resource Ecology
Credit 1. 3 Lab Hours.
Integration of natural resources through conservation ecology programs, utilization of research techniques adaptable for classroom use; field trips to community facilities, gaming strategies and computer simulations.
Prerequisites: WFSC 420 or RENR 205 or concurrent enrollment; junior or senior classification.
WFSC 410 Principles of Fisheries Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Basic knowledge from ichthyology, biology of fishes and limnology related to applied aspects of freshwater and marine fishery science. Management techniques applicable to streams, ponds, reservoirs, estuaries and the oceans.
Prerequisites: BIOL 357, or grade of C or better in WFSC 311, WFSC 403, or WFSC 404, or approval of instructor.

WFSC 413 Problem Solving in Wildlife and Fisheries
Credits 4. 2 Lecture Hours. 4 Lab Hours.
Project-based to combine experiences and knowledge from other wildlife and fisheries sciences courses; critical thinking about issues and relevant questions in wildlife and fisheries sciences field; emphasis on completion of course project and answering research or management question.
Prerequisites: Grade of C or better in WFSC 317 and WFSC 304; STAT 301, STAT 302, or STAT 303; senior classification.

WFSC 414 Ecology of Lakes and Rivers
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Biological, physical, chemical and geological characteristics of fresh waters; human impacts, which include influence of industrial, domestic, conservation and restoration activities.
Prerequisites: CHEM 101 and CHEM 222; PHYS 201; junior or senior classification.

WFSC 415/MARB 415 Coastal Marine Biology and Geology of Alaska
Credits 3. 3 Lecture Hours.
Field course conducted in south-central Alaska for two weeks; work at the remote Alice Cove Research Station located in Prince William Sound; conduct research on marine mammals behavior and ecology; exploration of the geology and glaciology.
Prerequisite: BIOL 112.
Cross Listing: MARB 415/WFSC 415.

WFSC 417 Biology of Fishes
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fishes' physiological and morphological adaptations for life in aquatic systems; physiological and behavioral responses of fish to environmental variation. Laboratory emphasizes design, conduct and analysis of virtual experiments featuring 'EcoFish,' a simulation model of fish autecology.
Prerequisites: WFSC 302 or WFSC 311; WFSC 414; or approval of instructor.

WFSC 418 Ecology of the Coastal Zone
Credits 3. 3 Lecture Hours.
Introduction to the ecosystems that comprise the coastal zone with an emphasis on the role of freshwater inflows; open bay systems are the focus of lectures, but fringing habitats are also discussed; human components of the coastal zone are also discussed including industrial, commercial domestic, conservation and restoration issues.
Prerequisite: Junior or senior classification.

WFSC 419 Wildlife Restoration
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Study of the fundamentals of the restoration of animal populations and the resources they require; factors that control the distribution and abundances of animals in relation to restoration; and how restoration plans for wildlife are developed.
Prerequisite: RENR 205 or equivalent; junior or senior classification or approval of instructor; WFSC 406 and WFSC 407 and ESSM 320 preferred.

WFSC 420 Ecology and Society
Credits 3. 3 Lecture Hours.
Study and compare human and natural ecosystems using diversity, interrelations, cycles, and energy as the conceptional organization; central themes are sustainability, stewardship and science.
Prerequisite: Junior or senior classification.

WFSC 422 Ethology
Credits 3. 3 Lecture Hours.
Survey of the control, ontogeny, function and natural selection of behavior in a variety of vertebrate and invertebrate species; interaction between the organism and its environment with regard to the mechanisms and adaptive significance of behavior; evolution of anti-predator, feeding, reproductive and cooperative traits.
Prerequisite: BIOL 112 or equivalent.

WFSC 425 Marine Fisheries
Credits 3. 3 Lecture Hours.
Survey of fisheries for marine vertebrates and invertebrates primarily in the Gulf of Mexico and South Atlantic with special emphasis being directed to their biology, economics and management.

WFSC 427 Disease Management in Fisheries and Aquaculture
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fish and invertebrates of economic importance; factors influencing the maintenance of health for each species group; problems and solutions unique to each phase of aquaculture from breeding to growout; application of routine diagnosis and other management tools.
Prerequisite: Junior classification.

WFSC 428 Wetland Ecosystem Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Ecosystem approach to the ecology and management of wetlands; emphasis on factors controlling wetland structure and function, characteristics of different wetland types, and applied issues of wetland restoration, creation and delineation.
Prerequisite: Junior or senior classification.

WFSC 433 Molecular Ecology in Wildlife and Fisheries
Credits 3. 3 Lecture Hours.
Fundamentals of molecular ecology applied to conservation and management of wildlife and fisheries; presentation and discussion of scientific papers on wildlife and fisheries molecular ecology; topics in conservation, management and aquaculture.
Prerequisites: BIOL 112 or equivalent; junior or senior classification.

WFSC 444 Aquaculture I: Principles and Practices
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Scientific perspectives concerning major principles associated with fish production under controlled conditions; production techniques associated with prominent species produced via aquaculture throughout the world with emphasis on those cultured in the United States.
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 447 Aquaculture II: Aquatic Animal Nutrition, Feeding and Disease Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Review of scientific perspectives on major aspects of nutrition, diet formulation and feeding of aquatic species in aquaculture; major disease-causing organisms encountered in aquaculture and means of disease prevention and control.
Prerequisite: Junior or senior classification or approval of instructor.
WFSC 448 Fish Ecophysiology
Credits 3. 3 Lecture Hours.
Ecological domains and demands placed on physiological performance; physiological mechanisms and control in fishes, interaction of physiological mechanisms with environment, emphasis in adaptive value of physiological traits; analysis of physiology and adaptation with models; process and functional modeling.
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 449 Professional Aspects of Aquatic Ecology
Credits 3. 3 Lecture Hours.
Discipline of aquatic sciences through oral presentation and written documentation; job market expectations, resume preparation, job application, and preparation for and giving an interview.
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 450/ENTO 450 Caribbean Conservation
Credits 2. 6 Lab Hours.
Provide experience in and appreciation for diverse tropical habitats and the problems associated with conserving these habitats; design and conduct individual research projects on topics of their choice with approval from the instructors on project design and feasibility.
Prerequisites: Concurrent enrollment in ENTO 300/WFSC 300 and ENTO 451/WFSC 451; junior or senior classification.
Cross Listing: ENTO 450/WFSC 450.

WFSC 451/ENTO 451 Caribbean Research Seminar
Credit 1. 1 Other Hour.
Document research activities; keep a journal of activities and research methods during study abroad trips.
Prerequisites: Concurrent enrollment in ENTO 300/WFSC 300 and ENTO 451/WFSC 451; junior or senior classification.
Cross Listing: ENTO 450/WFSC 451.

WFSC 454 Amazon Field School
Credits 4. 4 Lecture Hours.
Investigation of social and ecological complexities of biodiversity conservation in tropical ecosystems; biological and social science approaches to evaluate causes, consequences and solutions to biodiversity loss through ecology, culture and governance.
Prerequisites: Junior or senior classification with a minimum GPA of 2.0 and approval of instructor.

WFSC 457 Wildlife Ecotoxicology
Credits 3. 3 Lecture Hours.
Approaches used to identify, evaluate and manage ecological risks of chemicals on aquatic and terrestrial environments; emphasis on methods useful to assess effects of contaminants on ecosystems; testing techniques, site assessment and monitoring procedures, regulatory requirements and field and laboratory techniques.
Prerequisite: Grade of C or better in RENR 205, or CHEM 101, or approval of instructor.

WFSC 462/BIOL 462 Amazon River Tropical Biology
Credits 3. 3 Lecture Hours.
History, ecology, evolutionary-biology, geography and culture of the Amazon River and Rio Negro; exploration of the world's most bio-diverse river during a 10-day expedition from Manaus, Brazil; survey biota, record observations about the ecosystem, select research topics, development of presentations.
Prerequisites: BIOL 107, BIOL 112, BIOL 113, BIOL 357 or RENR 205; or approval of instructor.
Cross Listing: BIOL 462/WFSC 462.

WFSC 481 Seminar
Credit 1. 1 Lecture Hour.
Oral discussion of selected topics from technical literature on recent advances in the field.
Prerequisites: Senior classification in wildlife and fisheries sciences; 6 hours of 300- or 400-level wildlife and fisheries sciences courses. May be repeated for credit.

WFSC 484 Internship
Credits 0 to 9. 0 to 9 Other Hours.
Practical experience working in a professional wildlife or fisheries facility.
Prerequisite: Approval of department head.

WFSC 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Individual study and research on selected problem approved by instructor and academic advisor.
Prerequisites: Junior or senior classification; approval of department head.

WFSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of wildlife and fisheries sciences. May be repeated for credit.
Prerequisite: Approval of department head.

WFSC 491 Research
Credits 0 to 6. 0 to 6 Other Hours.
Laboratory and/or field research supervised by a faculty member in wildlife and fisheries sciences. Registration in multiple sections of this course are possible within a given semester provided the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification; approval of instructor.

WGST - Women's & Gender Studies (WGST)

WGST 200 Introduction to Women's and Gender Studies
Credits 3. 3 Lecture Hours.
Historical and cross-cultural perspectives on women’s roles in culture, the workplace, the family and other socio-political institutions; the social construction of gender; sexuality and racism; social control mechanisms and ideologies.

WGST 207/SOCI 207 Introduction to Gender and Society
Credits 3. 3 Lecture Hours.
Similarities and differences between females and males in a number of cultures throughout the world; sociological analysis of gender in relation to social structure.
Cross Listing: SOCI 207/WGST 207.

WGST 210/PSYC 210 Psychological Aspects of Human Sexuality
Credits 3. 3 Lecture Hours.
Interface between human sexuality, reproductive development and gender roles across the lifespan; theoretical and research literature promotes understanding of hormonal influences, learning processes, cultural differences, sexual response and love and attraction.
Prerequisite: PSYC 107.
WGST 213/SOCI 213 Gender and Health
Credits 3. 3 Lecture Hours.
An examination of social and historical context of health in the U.S., including inequities in health by gender, race, class and gendered issues in health professions.
Cross Listing: SOCI 213/WGST 213.
WGST 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Readings and/or research for specific needs of students majoring or minoring in women's and gender studies.
Prerequisites: WGST 200 and approval of instructor.
WGST 289 Special Topics in...
Credits 1 to 4. 4 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of women's/gender studies. May be repeated for credit.
Prerequisite: Approval of director.
WGST 300/PSYC 300 Psychology of Women
Credits 3. 3 Lecture Hours.
Theoretical and research literature relevant to psychological assumptions about the female personality; challenges to and verification of these assumptions by recent experimental studies.
Prerequisite: PSYC 107.
Cross Listing: PSYC 300/WGST 300.
WGST 303 Psychology of Women of Color
Credits 3. 3 Lecture Hours.
Interdisciplinary theories to study the unique yet intersectional experiences of women from different racial groups, ethnicities, nationalities and cultural backgrounds; scholarly research from the diversity science field; contemporary topics that have developed in a global context; examination of complex issues, which affect women of color across the lifespan.
Prerequisite: Grade of C or better in AFST 201 or PSYC 107 or WGST 200, or approval of instructor.
Cross Listing: AFST 303 and PSYC 303.
WGST 307 Gender and Education
Credits 3. 3 Lecture Hours.
Overview of gender and education; role of feminism and feminist theory; intersections of gender, race, class, ethnicity, and sexuality.
Prerequisite: Junior or senior classification.
WGST 310/SOCI 310 Motherhood in Society
Credits 3. 3 Lecture Hours.
Examines expectations and/or practices relating to motherhood, with consideration of their cultural impact; taught from a social science perspective.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: SOCI 310/WGST 310.
WGST 315/SOCI 315 The Marriage Institution
Credits 3. 3 Lecture Hours.
Courtship, engagement, marriage, family formation, personal adjustment, conflict, financing and child rearing.
Prerequisite: Junior or senior classification.
Cross Listing: SOCI 315/WGST 315.
WGST 316/SOCI 316 Sociology of Gender
Credits 3. 3 Lecture Hours.
Sociological explanations of status differences between men and women; cross-cultural comparisons; gender role socialization, cultural stereotypes, discrimination; gender roles and status in the family, economy, religion, science, other social institutions; deviance, victimization and gender; recent social changes.
Cross Listing: SOCI 316/WGST 316.
WGST 317/POLS 317 Women in Politics
Credits 3. 3 Lecture Hours.
Role of women in the political system; treatment of women in political theory; effect of law on women's status; women as political leaders; current policy issues of concern to women.
Prerequisite: POLS 206.
Cross Listing: POLS 317/WGST 317.
WGST 318/ECON 318 The Economics of Gender and Race
Credits 3. 3 Lecture Hours.
Theories and evidence on gender and race differences in labor market outcomes; labor supply and the role of family formation; the effect of human capital and discrimination on earnings; analysis of government policies; international comparisons.
Prerequisites: ECON 323 with a grade of C or better; junior or senior classification.
Cross Listing: ECON 318/WGST 318.
WGST 320 Feminist Inquiry and Research Methods
Credits 3. 3 Lecture Hours.
Interdisciplinary exploration of feminist research methods and inquiry in the humanities, social sciences and sciences; ethical approaches to research; questions of epistemology; feminist research design.
Prerequisites: WGST 200.
WGST 330 Women in Ancient Greece and Rome
Credits 3. 3 Lecture Hours.
Survey of women in classical Greece and Rome; emphasis on female occupations and family relationships, legal and political status, traditional values, notorious women, how women were viewed and how they viewed themselves.
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 330 and HIST 330.
WGST 332/SOCI 332 Alternative Genders
Credits 3. 3 Lecture Hours.
Examination of theories and case studies involving alternative genders and sexualities, studies in their cultural contexts and including the role of factors such as race, class, ethnicity, age, and physical characteristics.
Prerequisites: 3 credits in SOCI or WGST; junior or senior classification.
Cross Listing: SOCI 332/WGST 332.
WGST 333/ENGL 333 Lesbian, Gay, Bisexual, Transgender and Queer Literatures
Credits 3. 3 Lecture Hours.
Representations of sexuality and gender from classical times to the present, studied in their historical and cultural contexts.
Prerequisites: Junior or senior classification.
Cross Listing: ENGL 333/WGST 333.
WGST 342 The Rhetoric of Gender and Health
Credits 3.3 Lecture Hours.
Study of field of rhetoric of health and medicine with specific attention to the study of gender, including issues in reproduction, expertise and illness; range of methods and methodological approaches within the field.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 342 and COMM 342.

WGST 343/FILM 343 Sex, Gender and Cinema
Credits 3.3 Lecture Hours.
Exploration of a significant topic at the intersection of women's/ gender studies and film, such as cinema and sexuality studies, cinema and women, and cinema and masculinity; may include discussion of production, film content, and/or reception.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: FILM 343/WGST 343.

WGST 367/POLS 367 Women in Government in Comparative Perspective
Credits 3.3 Lecture Hours.
Examination of women's representation in government based on comparison across multiple nation-states; focus on legislative and executive branches of democratic governments.
Prerequisites: POLS 206; junior or senior classification or approval of department head.
Cross Listing: POLS 367/WGST 367.

WGST 374/ENGL 374 Women Writers
Credits 3.3 Lecture Hours.
History of literature by women in English; emphasis on continuity of ideas and on literary contributions; study of a variety of genres with particular attention to the significance of gender in the racial, social, sexual and cultural contexts of women writing in English.
Prerequisite: Junior or senior classification; ENGL-374 also taught at Galveston campus.
Cross Listing: ENGL 374/WGST 374.

WGST 394 Gender and Genre
Credits 3.3 Lecture Hours.
Exploration and analysis of the ways in which a single literary and/or film genre resonates with gendered perspectives and sexual subjectivity.
Prerequisites: Junior or senior classification; WGST 200 or FILM 251/ENGL 251 or ENGL 251/FILM 251.

WGST 401 Feminist Theory
Credits 3.3 Lecture Hours.
Inquiry-based examination of feminist theory from various periods and disciplinary perspectives, with application to societal debates and controversies.
Prerequisites: WGST 200 or approval of instructor; junior or senior classification.

WGST 403 Language and Gender
Credits 3.3 Lecture Hours.
Language and gender from a sociolinguistic perspective; gender in the words and structures of language; gender representation and gendered language use in the media, and a variety of sociocultural contexts; language use in intimate relationships; computer-mediated discourse; language, sexuality, and sexual orientation.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 403 and LING 403.

WGST 404/ANTH 404 Women and Culture
Credits 3.3 Lecture Hours.
Examines women's lives in evolutionary and cross-cultural perspective; women's roles in subsistence, politics, religion and economics in traditional cultures; women's roles in international development; the cultural and social construction of women's biology cross-culturally including circumcision, menstruation, pregnancy, childbirth and motherhood.
Prerequisite: Junior or senior classification; approval of instructor.
Cross Listing: ANTH 404/WGST 404.

WGST 407/COMM 407 Gender, Race and Media
Credits 3.3 Lecture Hours.
The contributions of women and ethnic groups to the evolution of the media; the portrayal of women and ethnic groups in the mass media; issues resulting from the recognition of women and ethnic groups as media audiences.
Prerequisite: Junior or senior classification or approval of instructor.

WGST 409/PHIL 409 Studies in Gender and Philosophy
Credits 3.3 Lecture Hours.
Analysis, from a gender-studies perspective, of a single figure or concept in the history of philosophy. May be repeated 1 time for credit with a different focus.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: PHIL 409/WGST 409.

WGST 410/SOCI 410 Reproduction, Birth and Power
Credits 3.3 Lecture Hours.
Examination of topics related to reproductive practices, experiences and ideologies and of the constructed and contested meanings surrounding womanhood, motherhood, sexuality, reproductive freedom and eugenics.
Prerequisites: SOCI 205; junior or senior classification.
Cross Listing: SOCI 410/WGST 410.

WGST 411/COMM 411 Representations of Motherhood
Credits 3.3 Lecture Hours.
Examination of understandings of motherhood from a humanities perspective and over a variety of cultures and time periods, as reflected in written, media and/or oral texts.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: COMM 411/WGST 411.

WGST 420/COMM 420 Gender and Communication
Credits 3.3 Lecture Hours.
Survey of the role of gender in communication processes; focus on communication differences between men and women in contexts such as the family, school and work organizations; discussion of media influence in gender stereotypes.
Cross Listing: COMM 420/WGST 420.

WGST 421/SOCI 421 Gender & Crime
Credits 3.3 Lecture Hours.
Gender & Crime. Gender disparities in contemporary patterns of crime, victimization and incarceration; key concepts, major theories and empirical research studies around gender and crime.
Prerequisite: Grade of C or better in SOCI 207/WGST 207, SOCI 211, SOCI 304, SOCI 316/WGST 316, WGST 200, WGST 207/SOCI 207, or WGST 316/SOCI 316.
Cross Listing: SOCI 421/WGST 421.
WGST 422/FREN 422 Studies in Gender and French Literature
Credits 3. 3 Lecture Hours.
The role of gender in the production, dissemination, reception and interpretation of literary texts in the French tradition, including continental France as well as the Francophone literatures of West Africa, Canada, and elsewhere; taught in English.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FREN 422/WGST 422.

WGST 424/SOCI 424 Women and Work in Society
Credits 3. 3 Lecture Hours.
Social context of women's work; work patterns, labor force participation, occupational destinations and occupational mobility; alternatives to the conventional division of labor by sex in society.
Cross Listing: SOCI 424/WGST 424.

WGST 428/COMM 428 Women's Rhetoric
Credits 3. 3 Lecture Hours.
Examination of the historical imbrication of masculinity and rhetoric in relation to women's participation in political life, reception of women's rhetoric in the public sphere, and remembrance and representation of women as rhetorical agents throughout history; consideration of women's rhetoric in various cultural arenas.
Prerequisite: Junior or senior classification.
Cross Listing: COMM 428/WGST 428.

WGST 430/MGMT 430 Employment Discrimination Law
Credits 3. 3 Lecture Hours.
Legal issues surrounding employment discrimination, including disparate treatment and impact; intent; affirmative action; sexual harassment; pregnancy, sex, race, religious, salary, disability, age, and ethnic discrimination; policy issues and perspectives to aid human resource specialists and managers.
Prerequisite: Senior classification.
Cross Listing: MGMT 430/WGST 430.

WGST 445 Queer Theory
Credits 3. 3 Lecture Hours.
Examines origins of theories of gender and sexual diversity and their intersections with feminist theories; considers foundational and contemporary texts that address queer theory.
Prerequisites: 6 hours in Women's and Gender Studies; senior classification or approval of instructor.

WGST 452/ITAL 452 Women and Gender in Italy
Credits 3. 3 Lecture Hours.
The historical and cultural dynamics forging the notion of woman and gender in Italian society and cultural production; discussion of cultural works, media and theoretical texts concerning subjectivity and language, body and culture; taught in English.
Prerequisite: ITAL 201 or concurrent enrollment or approval of instructor.
Cross Listing: ITAL 452/WGST 452.

WGST 461/HIST 461 History of American Women
Credits 3. 3 Lecture Hours.
Cultural, political, legal and religious factors that helped shape the role and character of women in American society from colonial times to the present; historical role of women in the development of the nation.
Cross Listing: HIST 461/WGST 461.

WGST 462/POLS 462 Women and the Law
Credits 3. 3 Lecture Hours.
The legal status of American women from the adoption of the Constitution to the present: constitutional developments; the 19th Amendment and the proposed Equal Rights Amendment; employment; family law; reproductive rights; education; sexual equality in context of other claims to equality; law and social norms.
Prerequisite: POLS 206 or approval of department head.
Cross Listing: POLS 462/WGST 462.

WGST 463 Gender in Asia
Credits 3. 3 Lecture Hours.
Gender dynamics in Asia; changes in gender roles; women's movements; women and the economy; women and politics; men's and women's private lives.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ASIA 463 and SOCI 463.

WGST 473/HIST 473 Women's History in the Modern U.S.
Credits 3. 3 Lecture Hours.
History of women in the U.S. from the late nineteenth century to the present; role of intersectionality in defining the experience of modern womanhood; women as activists, workers, consumers, mothers, and feminists; experiences, lives and influence of women of color; examination of contemporary social, political and economic histories.
Prerequisite: Junior or senior classification or approval of instructor; HIST-473 also taught at Galveston campus.
Cross Listing: HIST 473/WGST 473.

WGST 474/ENGL 474 Studies in Women Writers
Credits 3. 3 Lecture Hours.
A different topic each term examining women's writing through historical period, genre, cross-cultural study and/or feminist literary theory. May be repeated for credit.
Prerequisites: 3 credits of literature at the 300-level; junior or senior classification.
Cross Listing: ENGL 474/WGST 474.

WGST 476/HIST 476 Sex and Sexuality in History
Credits 3. 3 Lecture Hours.
Changing ideas about sex and sexuality over time; includes their interaction with ideas about gender, race, class, religion, science, technology, medicine, politics and popular culture; historical and cultural processes creating modern concerns about sex and sexuality.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 476/WGST 476.

WGST 477/HIST 477 Women and Gender in Modern European History
Credits 3. 3 Lecture Hours.
Women in Europe from the 18th century to the present: women's contributions to their societies; realities of their daily lives and their responses; perceptions of women; role of institutions in defining women's roles; significance for women of industrialization, revolution, warfare, scientific discoveries; interaction of class, race and gender.
Cross Listing: HIST 477/WGST 477.

WGST 481 Senior Seminar
Credits 3. 3 Lecture Hours.
Inquiry-based investigation of an issue, problem, or question, using gender or feminism as the organizing principle for analysis; methods and materials of scholarship in the field; includes opportunities for student research.
Prerequisite: WGST 200 and junior or senior classification; or approval of instructor.
WGST 484 Internship in Women's and Gender Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed internship in a public or private organization to provide students with on-the-job training and applied research experience; opportunity to observe first hand issues and problems covered in women's and gender studies courses; designed to enhance and clarify the student's career objectives.
Prerequisites: WGST 200, junior or senior classification, and approval of instructor.

WGST 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Readings and/or research for specific needs of students majoring or minoring in women's and gender studies.
Prerequisites: WGST 200 and approval of instructor.

WGST 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of women's and gender studies. May be repeated for credit.

WGST 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in women's and gender studies. May be taken four times for credit.
Prerequisites: WGST 200, junior or senior classification, and approval of instructor.

ZOOL - Zoology (ZOOD)
ZOOL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of zoology. May be repeated for credit.
Prerequisite: Approval of instructor.

ZOOL 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ZOOL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of zoology. May be repeated once for credit.

ZOOL 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member.
Prerequisites: Junior or senior classification and approval of instructor.
Abanov, Artem G, Associate Professor
Physics & Astronomy
PHD, Texas A&M University, 1998

Abbey, James D, Associate Professor
Information & Operations Mgmt
PHD, The Pennsylvania State University, 2013

Abbot Jr, Elton D, Associate Professor of the Practice
Architecture
PHD, Texas A&M University, 1983

Abdalla, Ahmed A, Associate Professor
Texas A&M University at Qatar
PHD, North Carolina State University, 2001

Abdel Salam, Noha M, Clinical Assistant Professor

Petroleum Engineering
PHD, Texas A&M University, 1987

Barry, Adam, Professor
Health & Kinesiology
PHD, Texas A&M University, 2007

Bartel, Michael, Assistant Professor
International Affairs
PHD, Cornell University, 2017

Bartlett, Leeanna, Instructional Assistant Professor
Public Health Sciences
MED, East Texas State University, 1980

Bashir, Hassan, Associate Professor
Texas A&M University at Qatar
PHD, Texas A&M University, 2008

Baskin, Dean R, Associate Professor
Mathematics
PHD, Stanford University, 2010

Bassichis, William H, Professor
Physics & Astronomy
PHD, Case Western Reserve University, 1963

Bastian, Peter A, Professor of the Practice
Petroleum Engineering
MS, Texas A&M University, 1983

Batista, Paul J, Associate Professor
Health & Kinesiology
JD, Baylor University, 1976

Batteas, James D, Professor
Chemistry
PHD, University of California, Berkeley, 1995

Batteas, James D, Professor
Materials Science & Engr
PHD, University of California, Berkeley, 1995

Battle III, Guy A, Professor
Mathematics
PHD, Duke University, 1977

Baudier, Florent P, Assistant Professor
Mathematics
PHD, Universite De Besancon, 2010
Baumgartner, Lisa M, Associate Professor
Educ Admn & Human Resource Dev
PHD, The University of Georgia, 2000

Bayless, Kayla J, Associate Professor
Molecular & Cellular Medicine
PHD, Texas A&M University, 1999

Baylor, Amber A, Associate Professor
School of Law
LLM, Georgetown University Law Center, 2015
JD, New York University Law School, 2006

Bazan, Daniela Z, Clinical Assistant Professor
College of Pharmacy
PHARMD, University of Texas at Austin, 2011

Bazer, Fuller W, Distinguished Professor
Animal Science
PHD, North Carolina State University, 1969

Bazzi, Hassan, Professor
Materials Science & Engr
PHD, McGill University, 2003

Bazzi, Hassan S, Professor
Texas A&M University at Qatar
PHD, McGill University, 2003

Beard, Regina, Clinical Associate Professor
College of Nursing
EDD, Auburn University, 2004

Beathard, Karen, Senior Lecturer
Nutrition
MS, Texas Woman's University, Denton, 1990

Beaver, Bonnie V, Professor
Vet Small Animal Clinical Sc
DVM, University of Minnesota, 1968

Becker, Aaron C, Clinical Associate Professor
Information & Operations Mgmt
PHD, University of Oklahoma, 2009

Becker, Katrin, Professor
Physics & Astronomy
PHD, University of Bonn, 1994

Becker, Kristin, Lecturer
College of Nursing
MSN, University of Texas Health Science Center at El Paso, 2019

Becker, Mauro R, Research Professor
Geology & Geophysics
PHD, University of Texas - Austin, 1996

Bedford, Diane C, Clinical Associate Professor
Health & Kinesiology
MFA, The Florida State University, 2010
Benden, Mark E, Associate Professor
Industrial & Systems Eng
PHD, Texas A&M University, 2006

Bender, Steven D, Clinical Associate Professor
Oral & Maxillofacial Surgery
DDS, Baylor College of Dentistry, 1986

Benedit, Michael J, Professor
Biology
PHD, Stanford University, 1982

Bengali, Ashfaq A, Professor
Texas A&M University at Qatar
PHD, University of Minnesota, 1992

Benham, James M, Visiting Lecturer
Construction Science
MS, Texas A&M University, 2014

Benjamin, Chandler C, Research Assistant Professor
Mechanical Engineering
PHD, University of Wisconsin - Madison, 2017

Bennett Jr, George K, Senior Professor
Industrial & Systems Eng
PHD, Texas Tech University, 1970

Bennett, Brad S, Clinical Assistant Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2007

Bennett, Gregg R, Professor
Health & Kinesiology
PHD, Auburn University, 1997

Benson, M D, Associate Professor
Biomedical Sciences
PHD, University of Michigan, 2000

Benson, Monica A, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2005

Bento, Pedro M, Assistant Professor
Economics
PHD, University of Toronto, 2013

Benton, Elain, Lecturer
Public Health Sciences
BS, Texas Women's University, 1978

Benzeraga, Amine A, Professor
Aerospace Engineering

Benzeraga, Amine A, Professor
Materials Science & Engr

Beremand, Phillip D, Lab Instructor
Biology
PHD, Indiana University- Bloomington, 1979

Bergbreiter, David E, Professor
Chemistry
PHD, Massachusetts Institute of Technology, 1974

Bergeron, Christine S, Clinical Professor
Health & Kinesiology
PHD, University of Wolverhampton, 2018
MFA, Florida State University, 1998

Berghman, Luc R, Professor
Poultry Science
PHD, University of Leuven, Belgium, 1987

Bergman, Mindy E, Professor
Psychological & Brain Sciences
PHD, University of Illinois at Urbana-Champaign, 2001

Berghthorsson, Ulfar, Associate Professor
Vet Integrative Biosciences
PHD, University of Rochester, 1998

Berkolaiko, Gregory, Professor
Mathematics
PHD, University of Bristol, 1997

Bermudez Ospina, Jose L, Professor
Philosophy & Humanities
PhD, Cambridge University, 1992

Bernal, Julio S, Professor
Entomology
PHD, University of California, Riverside, 1995

Bernard, Jessica A, Assistant Professor
Psychological & Brain Sciences
PHD, University of Michigan, 2012

Bernardo, Joseph, Research Associate Professor
Biology
PHD, Duke University, 1991

Berry, Leonard L, Distinguished Professor
Marketing
PHD, Arizona State University, 1968

Berthot, Patricia A, Instructional Associate Professor
Health & Kinesiology
MED, Stephen F. Austin State University, 1990

Bethel, Ryan D, Senior Lecturer
Chemistry
PHD, Texas A&M University, 2014

Bettati, Riccardo, Professor
Computer Science & Engineering
PHD, University of Illinois, 1994

Betz, Timm L, Associate Professor
Political Science
PHD, University of Michigan, 2015

Beyerlein, Michael M, Professor
Educ Admn & Human Resource Dev
PHD, Colorado State University, 1986
Bhatia, Mukul R, Executive Professor
Geology & Geophysics
PHD, The Australian National University, 1982

Bhattacharya, Anirban, Associate Professor
Statistics
PHD, Duke University, 2012

Bhattacharya, Nandini, Professor
English
PHD, University of Rochester, 1992

Bhattacharya, Raktim, Associate Professor
Aerospace Engineering
PHD, University of Minnesota, 2003

Bhattacharyya, S P, Professor
Electrical & Computer Eng
PHD, Rice University, 1971

Bickham, Troy, Professor
History
PHD, University of Oxford, 2001

Bieber, Susanne C, Assistant Professor
Visualization
PHD, Freie Universitat Berlin, 2012

Bieman, Leonard, Professor
Management
JD, University of Pennsylvania Law School, 1978

Bilof, Katherine, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Missouri, Columbia, 2012

Birdwell, Randall P, Senior Lecturer
Construction Science
BEN, Texas A&M University, 1978

Birely, Anna C, Associate Professor
Civil Engineering
PHD, University of Washington, 2012

Birgisson, Bjorn, Professor
Civil Engineering
PHD, University of Minnesota, 1996

Bishop, Michael P, Professor
Geography
PHD, Indiana State University, 1987

Bissell Jr, Wesley T, Associate Professor
Vet Large Animal Clinical Sc
PHD, Texas A&M University, 2007
DVM, Texas A&M University, 1997

Biswas, Saikat, Instructional Assistant Professor
College of Science
PHD, Florida State University, 2011

Biswas, Saurabh, Associate Professor of the Practice
Biomedical Engineering
PHD, Texas A&M University, 2011

Bitouni, Anetta, Clinical Assistant Professor
Public Health Sciences
DDS, Kapodistrian University of Athens, 2004

Blackmon, Heath L, Assistant Professor
Biology
PHD, University of Texas at Arlington, 2015

Blackwell, James, Lecturer
George Bush School of Govern
PHD, Tufts University, 1984

Blackwell, Ronnie, Adjunct Professor
School of Law
DJ, Texas Wesleyan University School of Law, 2014

Blake, Jamilia J, Professor
Educational Psychology
PHD, University of Georgia, 2007

Blanton, Carlos K, Professor
History
PHD, Rice University, 1999

Blanton, Hart C, Professor
Communication
PHD, Princeton University, 1994

Blasingame, Thomas A, Professor
Petroleum Engineering
PHD, Texas A&M University, 1989

Blasor, Tara N, Senior Lecturer
Accounting
BBA, Texas A&M University, 2007

Blizzard, Gary Edward, Senior Lecturer
Chemical Engineering
MBA, The University of Texas at Austin, 2000

Bloink, Robert, Adjunct Professor
School of Law
LLM, University of Florida College of Law, 1997
JD, Wayne State University Law School, 1995

Bloomfield, Susan A, Professor
Health & Kinesiology
PHD, Ohio State University, 1992

Blue-Mclendon, Alice, Clinical Associate Professor
Vet Physiology & Pharmacology
DVM, Texas A&M University, 1989

Soil & Crop Sciences
PHD, University of Arkansas, 1999
Carstens, Gordon E, Professor
Animal Science
PHD, Colorado State University, 1998

Carter Sowell, Adrienne R, Associate Professor
Psychological & Brain Sciences
PHD, Purdue University, 2010

Carter, Jeanne, Lecturer
Teaching, Learning & Culture
MS, University of North Texas, 2011

Carter, Tamara A, Instructional Associate Professor
Mathematics
PHD, Texas A&M University, 2005

Casado Perez, Vanessa, Associate Professor
School of Law
DJS, New York University, 2014
LLM, University of Chicago Law School, 2009

Case, Raymundo P, Professor of the Practice
Materials Science & Engr
PHD, University of Manchester Institute of Science and Technology, 2002

Casellas Connors, John Patrick, Assistant Professor
Geography
PHD, Arizona State University, 2015

Casola, Claudio, Associate Professor
Ecology and Conservation Biology
PHD, University of Pisa, Italy, 2006

Castaneda-Lopez, Homero, Associate Professor
Materials Science & Engr
PHD, Penn State University, 2001

Castell-Perez, M E, Professor
Biological & Agricultural Eng
PHD, Michigan State University, 1990

Castillo, Alejandro, Associate Professor
Animal Science
PHD, Texas A&M University, 1998

Castillo, Jasen J, Associate Professor
International Affairs
PHD, University of Chicago, 2003

Castillo, Linda G, Professor
Educational Psychology
PHD, University of Utah, 1999

Castillo, Marco, Professor
Economics
PHD, University of Wisconsin - Madison, 2001

Castro Olivo, Sara M, Associate Professor
Educational Psychology
PHD, University of Oregon, 2007

Castro, Juan F, Clinical Assistant Professor
College of Pharmacy
MD, Texas A&M University, 1988

Cath, Adam E, Clinical Associate Professor
Texas A&M University at Qatar
MLS, Victoria University of Wellington, 1997

Caton, Jerald A, Professor
Mechanical Engineering
PHD, Massachusetts Inst of Technology, 1980

Cavdar, Bahar, Assistant Professor
Eng Tech & Ind Distribution
DEN, Georgia Institute of Technology, 2014

Caverlee, James B, Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 2007

Cecchini, Fabiana, Instructional Associate Professor
International Studies
PHD, University of Pennsylvania, 2007

Cervantes, Ekaterina, Lecturer
International Studies
MA, Indiana University, 2017

Chaffin, Morgan K, Professor
Vet Large Animal Clinical Sc
DVM, Iowa State University, 2001

Cerrato, Maddalena A, Instructional Assistant Professor
International Studies
PHD, Italian Institute for Human Sciences, 2013

Chamitoff, Gregory E, Professor of the Practice
Aerospace Engineering
PHD, Massachusetts Institute of Technology, 1992
Chandler, Ronald S, Lecturer
Management
MS, Texas A&M University, 2001
Chang, Jiang, Professor
Institute of Biosciences & Tec
PHD, Texas A&M University, 1999
Chang, Kuang-An, Professor
Civil Engineering
PHD, Cornell University, 1999
Chang, Kuang-An, Professor
Ocean Engineering
PHD, Cornell University, 1999
Chang, Ping, Professor
Oceanography
PHD, Princeton University, 1988
Chang, Yanling, Assistant Professor
Eng Tech & Ind Distribution
PHD, Georgia Institute of Technology, 2015
Chapkin, Robert, University Distinguished Professor
Nutrition
PHD, University of California, Davis, 1986
Chapman, Piers, Research Professor
Oceanography
PHD, University of Wales, UK, 1983
Chappell, Thomas M, Assistant Professor
Plant Pathology & Microbiology
PHD, Duke University, 2010
Charles, Laurie A, Clinical Assistant Professor
College of Nursing
CERT, Office of the Attorney General of Texas, 2016
Charlot, Jean-Baptiste, Lecturer
International Studies
MA, Texas A&M University, 2015
Charoenphol, Phapanin, Research Assistant Professor
Mechanical Engineering
DEN, University of Michigan, 2012
Chaspari, Theodora, Assistant Professor
Computer Science & Engineering
PHD, University of Southern California, 2017
Chawla, Nitya, Assistant Professor
Management
PHD, University of Arizona, 2020
Cheff, Stephen Q, Clinical Assistant Professor
Endodontics
DDS, University of Michigan-Ann Arbor, 1972
Cheibub, Jose A, Professor
Political Science
PHD, University of Chicago, 1994
Chellam, Shankararaman, Professor
Civil Engineering
PHD, Rice University, 1995
Chen, Goong, Professor
Mathematics
PHD, University of Wisconsin - Madison, 1977
Chen, Hamn C, Professor
Civil Engineering
PHD, University of Iowa, 1982
Chen, Hamn C, Professor
Ocean Engineering
PHD, University of Iowa, 1982
Chen, Jianer, Professor
Computer Science & Engineering
PHD, Columbia University, 1987
Chen, Lei-Shih, Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2007
Chen, Willa W, Professor
Statistics
PHD, New York University, 2000
Chen, Yong, Associate Professor
Finance
PHD, Boston College, 2007
Cheng, Yi-Shing L, Professor
Diagnostic Sciences
PHD, Baylor University, 1999
DDS, KAOHSIUNG MEDICAL COLLEGE, 1990
Cheng, Zheng Dong, Professor
Chemical Engineering
PHD, Princeton University, 1999
Cheng, Zheng Dong, Professor
Materials Science & Engr
PHD, Princeton University, 1999
Cheng, Zheng Dong, Professor
Texas A&M University at Qatar
PHD, Princeton University, 1999
Chester, Frederick M, Professor
Geology & Geophysics
PHD, Texas A&M University, 1988
Chester, Judith S, Professor
Geology & Geophysics
PHD, Texas A&M University, 1992
Chew, Boon, Professor
Nutrition
PHD, Purdue University, 1978
Chin, Siu A, Professor
Physics & Astronomy
PHD, Massachusetts Institute of Technology, 1975
Chinn, Timothy D, Professor of the Practice  
Civil Engineering  
BS, Texas A&M University, 1980

Chirayath, Sunil S, Associate Professor  
Nuclear Engineering  
PHD, University of Madras, 2005

Chiu, Weihsueh A, Professor  
Vet Integrative Biosciences  
PHD, Princeton University, 1998

Cho, Jae H, Assistant Professor  
Biochemistry & Biophysics  
PHD, State University of New York at Stony Brook, 2006

Cho, Jun Y, Clinical Associate Professor  
Periodontics  
DDS, Seoul National University, Korea, 1961

Choe, Yoonsuck, Professor  
Computer Science & Engineering  
PHD, University of Texas, 2001

Choi, Kunhee, Associate Professor  
Construction Science  
PHD, University of California at Berkeley, 2008

Choi, Seong G, Associate Professor  
Electrical & Computer Eng  
PHD, University of Illinois, 1994

Choudhury, Mahua, Associate Professor  
College of Pharmacy  
PHARMD, University of Missouri Columbia, 2008

Chroust, David Z, Associate Professor  
TAMU Libraries  
PHD, Texas A&M University, 2009

Chu, Kung-Hui, Professor  
Civil Engineering  
PHD, University of California, Berkeley, 1998

Chubaryan, Tatyana, Clinical Associate Professor  
TAMU Libraries  
PHD, Moscow State University, 1994

Chung, Jin-Sug, Associate Professor Of The Practice  
Ocean Engineering  
PHD, University of Michigan, 1991

Ciccolella, Federica, Professor  
International Studies  
PHD, Columbia University, 2004

Cisneros-Zevallos, Luis A, Professor  
Horticultural Sciences  
PHD, University of California, Davis, 1998

Cizmas, Leslie H, Instructional Assistant Professor  
Environmental & Occptnl Hlth  
PHD, Texas A&M University, 2003

Cizmas, Paul G, Professor  
Aerospace Engineering  
PHD, Duke University, 1995

Claridge, David E, Professor  
Mechanical Engineering  
PHD, Stanford University, 1976

Clark Jr, Norman L, Instructional Associate Professor

PHD, Texas A&M University, 2015

Clark, Heather, Research Assistant Professor  
Hlth Promotion & Comm Hlth Sci  
DrPH, Texas A&M University, 2014

Clark, Robert M, Lecturer  
Teaching, Learning & Culture  
PHD, Texas A&M University, 2010

Clark, William, Professor  
Political Science  
PHD, Rutgers University, 1994

Clark, William B, Professor  
English  
PHD, Louisiana State University and A&M College, 1973

Clayton, Mark J, Professor  
Architecture  
PHD, Stanford University, 1998  
MAR, University of California at Los Angeles, 1987

Clement, Brad M, Professor  
Geology & Geophysics  
PHD, Columbia University, 1985

Clement, Tracy M, Assistant Professor  
Vet Physiology & Pharmacology  
PHD, Washington State University, 2009

Clendenin, Angela G, Instructional Assistant Professor  
Epidemiology & Biostatistics  
PHD, Texas A&M University, 2017

Cline, Daren B, Professor  
Statistics  
PHD, Colorado State University, 1983

Cline, Kayla M, Clinical Assistant Professor  
Accounting  
PHD, Texas A&M University, 2017

Clough, Michael P, Professor  
Teaching, Learning & Culture  
PHD, The University of Iowa, 1994

Clubb Jr, Fred J, Professor  
Biomedical Engineering  
PHD, University of Alabama - Birmingham, 1983  
DVM, Auburn University, 1971
Clubb Jr, Fred J, Clinical Professor
Veterinary Pathobiology
PHD, University of Alabama - Birmingham, 1983
DVM, Auburn University, 1971

Coady, William J, Instructional Associate Professor
Health & Kinesiology
MS, Texas A&M University, 1992

Coates, Craig J, Instructional Professor
Entomology
PHD, Australian National University, 1997

Cobbs, Elizabeth A, Professor
History
PHD, Stanford University, 1988

Cochran, Alan M, Lecturer
Chemical Engineering
PHD, University of Texas at Arlington, 2015

Coffelt, Vanessa Lea, Lecturer
Mathematics
MS, Kansas State University, 2005

Cohen, Daniel, Professor
Accounting
PHD, Northwestern University, 2004

Cohen, Glenn T, Adjunct Assistant Professor
Orthodontics
DMD, University of Florida, 2007

Cohen, Noah D, Professor
Vet Large Animal Clinical Sc
PHD, Johns Hopkins University, 1988
DVM, University of Pennsylvania, 1983

Cohn, Samuel R, Professor
Sociology
PHD, University of Michigan Ann Arbor, 1981

Cohn, William B, Instructional Assistant Professor
Biology
PHD, Texas A&M University, 2000

Coleman Jr, Charles H, Instructional Assistant Professor
Marine and Coastal Environmental Science
MS, University of Houston at Clear Lake, 1986

Coleman, George, Adjunct Professor
School of Law
BLW, Southern Methodist University, 1963

Coleman, Gerard T, Associate Professor of the Practice
Marine Engineering Technology
MS, The George Washington University, 1996

Coleman, Michelle C, Assistant Professor
Vet Large Animal Clinical Sc
DVM, University of Georgia, 2007

Collins, Daniel P, Senior Lecturer
Chemistry
PHD, University of South Carolina, 2012

Collins, Haley C, Lecturer
Animal Science
MS, Sam Houston State University, 2015

Collins, Michael S, Professor
English
PHD, Columbia University, 1999

Collins, Monte K, Adjunct Assistant Professor
Orthodontics
DDS, Baylor College of Dentistry, 1984

Collopy, William F, Lecturer
History
PHD, Texas A&M University, 2011
MLA, University of St. Thomas, 2006

Colwell, Gregory B, Professor
Hlth Promotion & Comm Hlth sci
PHD, Indiana University - Bloomington, 1992

Comech, Andrew, Associate Professor
Mathematics
PHD, Columbia University, 1997

Compton, Mallory, Assistant Professor

PHD, Texas A&M University, 2008

Dongarra, Jack J, Visiting Professor
Computer Science & Engineering
PHD, University of New Mexico, 1980

Donkor, David A, Associate Professor
Performance Studies
PHD, Northwestern University, 2008

Donnell, Cydney C, Executive Professor
Finance
MBA, Southern Methodist University, 1982

Donnell, James, Professor of the Practice
College of Engineering
BS, Texas A&M University, 1982

Donovan, Arthur D, Professor of the Practice
Geology & Geophysics
PHD, Colorado School of Mines, 1985

Donzis, Diego A, Associate Professor
Aerospace Engineering
PHD, Georgia Institute of Technology, 2007

Dooley, Kim E, Professor
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 1995
Dooley, Larry M, Associate Professor  
Educ Admn & Human Resource Dev  
PHD, Texas A&M University, 1989

Dormire, Sharon L, Professor  
College of Nursing  
PHD, University of Florida, 1992

Dorsey, Leroy G, Professor  
Communication  
PHD, Indiana University, 1993

Dostal, Christopher M, Assistant Professor  
Anthropology  
PHD, Texas A&M University, 2017

Dougherty Jr, Edward R, University Distinguished Professor  
Electrical & Computer Eng  
PHD, Rutgers State University of New Jersey, 1974

Dowdy, Diane M, Instructional Assistant Professor  
Hlth Promotion & Comm Hlth Sci  
PHD, Texas A&M University, 1990

Downey, Rachelle M, Visiting Lecturer  
Hlth Promotion & Comm Hlth Sci  
MED, University of Texas of Arlington, 2013

Downing, Nancy, Associate Professor  
College of Nursing  
PHD, The University of Iowa, 2010

Dox, Donnalee, Professor  
Performance Studies  
PHD, University of Minnesota, Twin Cities, 1995

Drake, Stacy, Associate Professor  
College of Nursing  
PHD, Texas Woman’s University, 2014

Drew, Katherine A, Adjunct Professor  
School of Law  
JD, Southern Methodist University, 1977

Dronen, Norman, Professor  
Ecology and Conservation Biology  
PHD, New Mexico State University, 1974

Dror, Olga, Professor  
History  
PHD, Cornell University, 2003

Droste, Lesa, Clinical Assistant Professor  
College of Nursing  
MSN, The University of Texas At Austin, 2009

Dryden, Joseph, Adjunct Professor  
School of Law  
EDD, University of North Texas, 2010  
JD, California Western School of Law, 1990

Duan, Benchun, Professor  
Geology & Geophysics  
PHD, University of California, Riverside, 2006

Dubriwny, Tasha N, Associate Professor  
Communication  
PHD, University of Georgia, 2005

Dudley, Drew, Visiting Lecturer  
Construction Science  
MEN, Texas A&M University, 2012

Duff, Michael James, Visiting Professor  
College of Engineering  
PHD, University of London, Imperial College, 1972

Duffield, Nicholas G, Professor  
Computer Science & Engineering  
PHD, Queen Mary College, Univ. of London, 1987

Duffy III, Thomas J, Adjunct Professor  
School of Law  
JD, Syracuse University, 1973

Dulin, Jennifer N, Assistant Professor  
Biology  
PHD, University of Texas Health Science Center, 2012

Dunaway, Johanna L, Associate Professor  
Communication  
PHD, Rice University, 2006

Dunbar, Bonnie Jeanne, Professor  
Aerospace Engineering  
PHD, University of Houston, 1983

Dunbar, Kim R, Distinguished Professor  
Chemistry  
PHD, Purdue University, 1984

Dunlap, Kathrin A, Instructional Associate Professor  
Animal Science  
PHD, Texas A&M University, 2006

Dunn, Allison L, Assistant Lecturer  
Ag Leadership, Educ & Comm  
PHD, Texas A&M University, 2018

Dunsford, Deborah W, Senior Lecturer  
Ag Leadership, Educ & Comm  
PHD, Texas A&M University, 1993

Duong, Tri, Associate Professor  
Poultry Science  
PHD, North Carolina State University, 2008

Duplessis, Anton R, Clinical Associate Professor  
TAMU Libraries  
MA, Texas A&M University, 2003

Duran Vincent, Orencio, Assistant Professor  
Ocean Engineering  
PHD, University of Stuttgart, 2007
Duran, Robert, Associate Professor
Sociology
PHD, University of Colorado Boulder, 2006

Durko, Angela M, Instructional Associate Professor
Recreation, Park & Tourism Sc
PHD, Texas A&M University, 2014

Dutta, Bhaskar, Professor
Physics & Astronomy
PHD, Oklahoma State University, 1995

Dvorak, Bruce D, Associate Professor
Land Arch & Urban Planning
MLA, University of Illinois at Urbana-Champaign, 1994

Dwivedi, Priyanka, Assistant Professor
Management
PHD, The Pennsylvania State University, 2017

Dworkin, Ira M, Associate Professor
English
PHD, City University of New York, 2003

Dwyer, William G, Lecturer
George Bush School of Govern
JD, Rutgers Law School, 2004

Dye, Richard T, Clinical Professor
Finance
PHD, Texas A&M University, 1993

Dyer, Megan K, Lecturer
Political Science
PHD, Texas A&M University, 2017

Dykema, Kenneth J, Professor
Mathematics
PHD, University of California, Berkeley, 1993

Eades, Erma S, Professor
Vet Large Animal Clinical Sc
PHD, University of Georgia, 1988
DVM, Louisiana State University, 1982

Earhart, Amy E, Associate Professor
English
PHD, Texas A&M University, 1999

Earle, Thomas, Assistant Professor
Liberal Studies
PHD, Rice University, 2017

Early, Timothy, Associate Professor of the Practice
Land Arch & Urban Planning
MS, Texas A&M University, 1991

Easterwood, Leslie A, Clinical Assistant Professor
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 1995

Easwaran, Kenneth K, Associate Professor
Philosophy & Humanities
PHD, University of California Berkeley, 2008

Ebbole, Daniel J, Professor
Plant Pathology & Microbiology
PHD, Purdue University, 1988

Echols, Katherine E, Instructional Associate Professor
Liberal Studies
PHD, University of Houston, 2015

Eckel, Catherine C, University Distinguished Professor
Economics
PHD, University of Virginia, 1983

Eckhause, Melissa, Adjunct Professor
School of Law
JD, University of Detroit, 1998

Eckman, Stacy L, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2001

Eckstein, Gabriel E, Professor
School of Law
JD, American University Washington College of Law, 1995

Economou, Ioannis, Professor
Texas A&M University at Qatar
PHD, Johns Hopkins University, 1993

Edens, John F, Professor
Psychological & Brain Sciences
PHD, Texas A&M University, 1996

Edens, Pamela S, Senior Lecturer
Psychological & Brain Sciences
PHD, Texas A&M University, 1997

Edwardson, Jeffrey C, Senior Lecturer
Economics
PHD, Texas A&M University, 2000

Efendiev, Yalchin R, Professor
Mathematics
PHD, California Institute of Technology, 1999

Ege, Matthew S, Associate Professor
Accounting
PHD, The University of Texas of Austin, 2013

Egenolf, Susan B, Associate Professor
English
PHD, Texas A&M University, 1995

Ehler, Patricia L, Clinical Assistant Professor
College of Nursing
MS, University of Phoenix, 2004

Ehsani, Mehrdad, Professor
Electrical & Computer Eng
PHD, University of Wisconsin - Madison, 1981

Eide, Marian, Professor
English
PHD, University of Pennsylvania, 1994
Eilers, Howard F, Associate Professor
Visualization
MFA, Ohio University, 1964

Eitan, Shoshana, Associate Professor
Psychological & Brain Sciences
PHD, Weizmann Institute of Science, 1997

Eksin, Ceyhun, Assistant Professor
Industrial & Systems Eng
PHD, University of Pennsylvania, 2015

El Borgi, Sami, Professor
Texas A&M University at Qatar
PHD, Cornell University, 1993

El-Halwagi, Mahmoud M, Professor
Chemical Engineering
PHD, University of California, Los Angeles, 1990

Elabd, Yossef A, Professor
Chemical Engineering
PHD, Johns Hopkins University, 2001

Elabd, Yossef A, Professor
Materials Science & Engr
PHD, Johns Hopkins University, 2001

Elbashir, Nimir O, Professor
Texas A&M University at Qatar
PHD, Auburn University, 2004

Elbashir, Nimir O, Professor
Texas A&M University at Qatar
PHD, Auburn University, 2004

Elbert, Chanda D, Associate Professor
Ag Leadership, Educ & Comm
PHD, The Pennsylvania State University, 2000

Elgindi, Ali, Instructional Assistant Professor
Texas A&M University at Qatar
PHD, University of Chicago, 2011

Elliot, John F, Clinical Associate Professor
Health & Kinesiology
PHD, University of Virginia, 1997

Elliot, John F, Professor
Ag Leadership, Educ & Comm
PHD, Ohio State University, 1988

Elliott, Kay E, Adjunct Professor
School of Law
JD, University of Oklahoma, 1964

Elliott, Timothy R, University Distinguished Professor
Educational Psychology
PHD, University of Missouri - Columbia, 1987

Ellis, Debra R, Senior Lecturer
Construction Science
JD, Baylor University, 1993

Ellis, Gary D, Professor
Recreation, Park & Tourism Sc
PHD, North Texas State University, 1983

Ellis, Michael L, Clinical Associate Professor
Oral & Maxillofacial Surgery
DDS, Baylor College of Dentistry, 1985

Ellis, Robert B, Instructional Assistant Professor
Health & Kinesiology
BA, Oklahoma State University, 1964

Ellis, Thomas H, Instructional Assistant Professor
Philosophy & Humanities
MA, Texas A&M University, 2009

Elmageed, Zakaria A, Assistant Professor
College of Pharmacy
PHD, Helwan University, 2004

Elms, Rene D, Associate Professor of the Practice
College of Engineering
PHD, Texas A&M University, 2009

Elsheikh, Aymen E, Instructional Assistant Professor
Texas A&M University at Qatar
PHD, Indiana University-Bloomington, 2012

Elwany, Alaa Mohamed, Assistant Professor
Materials Science & Engr
PHD, Georgia Institute of Technology, 2009

Elwany, Alaa Mohamed H, Assistant Professor
Industrial & Systems Eng
PHD, Georgia Institute of Technology, 2009

Elza, Susan, Visiting Professor
Health & Kinesiology
EDD, Lamar University, Beaumont, 2014

Emre, Side, Associate Professor
History
PHD, University of Chicago, 2009

Engelen, Marielle P, Professor
Health & Kinesiology
PHD, Maastricht University, Netherlands, 2000

England, Peter S, Instructional Associate Professor
Civil Engineering
PHD, Texas Tech University, 2011

Engler, Cady R, Senior Professor
Biological & Agricultural Eng
PHD, University of Waterloo, 1980

Enjeti, Prasad N, Professor
Electrical & Computer Eng
PHD, Concordia University, Montreal, 1984

Entesari, Kamran, Professor
Electrical & Computer Eng
PHD, University of Michigan, 2006

PhD, University of Notre Dame, 2009

Garcia, Tanya, Associate Professor
Statistics
PhD, Texas A&M University, 2011

Gardner, Wilford D, Senior Professor
Oceanography
PhD, Massachusetts Inst of Technology, 1978

Garey, William D, Executive Professor
Finance
MBA, University of Houston - Clear Lake, 1980

Gariazzo, Mariana S, Instructional Assistant Professor
Performance Studies
PhD, University of Texas, 2005

Garney, Whitney R, Assistant Professor
Health & Kinesiology
PhD, Texas A&M University, 2015

Garritano, Carmela, Associate Professor
International Studies
PhD, Michigan State University, 2001

Gary, Jodie C, Assistant Professor
College of Nursing
PhD, University of Texas at Tyler, 2012

Garza, Brent A, Assistant Professor
Accounting
PhD, University of Illinois-Urbana-Champaign, 2017

Garza, Veronica, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2009

Garza, Victor, Clinical Assistant Professor
College of Medicine
MD, Baylor College of Medicine, 2004

Garza-Horne, Julie A, Instructional Assistant Professor
Liberal Studies
MA, University of Houston Clear Lake, 2010

Gaspar, Julian, Clinical Professor
Finance
PhD, Georgetown University, 1981

Gastel, Barbara J, Professor
Vet Integrative Biosciences
MD, Johns Hopkins University, 1978

Gatlin, Delbert, Professor
Ecology and Conservation Biology
PhD, Mississippi State University, 1983

Gatson, Sarah N, Associate Professor
Sociology
PhD, Northwestern University, 1999

Gause III, Francis G, Professor
International Affairs
PhD, Harvard University, 1987

Gautam, Natarajan, Professor
Industrial & Systems Eng
PhD, University of North Carolina at Chapel Hill, 1997

Gaynanova, Irina, Assistant Professor
Statistics
PhD, Cornell University, 2015

Gehringer, Kerri B, Professor
Animal Science
PhD, Texas A&M University, 1994

Geismar, Harry N, Professor
Information & Operations Mgmt
PhD, University of Texas at Dallas, 2003

Materials Science & Engr  
PHD, University of Minnesota, 2001

Grunlan, Jaime C, Professor  
Mechanical Engineering  
PHD, University of Minnesota, 2001
Grunlan, Melissa A, Professor
Biomedical Engineering
PHD, University of South Carolina, 2004

Grunlan, Melissa A, Professor
Materials Science & Engr
PHD, University of South Carolina, 2004

Gu, Guofei, Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 2008

Guajardo, Jonathan, Lecturer
Communication
MA, University of the Incarnate Word, 2014

Guerillot, Dominique R, Professor
Texas A&M University at Qatar
PHD, Universite De Provence, 1982

Guerra Nakamura, Fabiola, Senior Lecturer
Computer Science & Engineering
PHD, Federal University of Minas Gerais, 2010

Guerra Santos, Hernan, Senior Lecturer
Construction Science
MS, Texas A&M University, 2003

Guinn III, James R, Instructional Assistant Professor
Health & Kinesiology
EDD, Abilene Christian University, 2017

Guiora, Amos, Adjunct Professor
School of Law
JD, Case Western Reserve Law School, 1985

Guiseppi Elie, Anthony, Professor
Biomedical Engineering
PHD, Massachusetts Institute of Technology, 1983
DVM, University of the West Indies, Mona, Jamaica, 1979

Gunaseelan, Simi, Instructional Associate Professor
College of Pharmacy
PHD, North-Eastern Hill University, 2002

Guneralp, Burak, Assistant Professor
Geography
PHD, University of Illinois at Urbana-Champaign, 2006

Guneralp, Inci, Associate Professor
Geography
PHD, University of Illinois at Urbana-Champaign, 2007

Gunnels, Emily E, Lecturer
Health & Kinesiology
MS, Texas A&M University, 2005

Guo, Bing, Assistant Professor
Materials Science & Engr
PHD, Tsinghua University, China, 1998

Guo, Bing, Associate Professor
Texas A&M University at Qatar
PHD, Tsinghua University, China, 1998

Guo, Hao, Visiting Assistant Professor
Mathematics
PHD, The University of Adelaide, 2018

Guo, Huiyi, Assistant Professor
Economics
PHD, University of Iowa, 2018

Guo, Shaodong, Associate Professor
Nutrition
PHD, Peking University, Beijing China, 1995

Gursky, Sharon, Professor
Anthropology
PHD, State University of New York at Stony Brook, 1997

Guyton, Sally C, Senior Lecturer
Finance
MBA, University of Texas, 1982

Guzelian, Christopher, Adjunct Professor
School of Law
JD, Stanford University, 2003

Haberl, Jeff, Professor
Architecture
PHD, University of Colorado, 1986

Hachen, James, Professor of the Practice
College of Engineering
BSME, Rensselaer Polytechnic Institute, 1974

Haefeli, Evan P, Associate Professor
History
PHD, Princeton University, 2000

Haglund, John S, Associate Professor
Mechanical Engineering
PHD, Texas A&M University, 2003

Hagstrom Schmidt, Nicole, Lecturer
English
PHD, Texas A&M University, 2019
Hague, Steven S, Professor
Soil & Crop Sciences
PHD, Texas A&M University, 2000

Hailey, Camille E, Clinical Assistant Professor
Management
JD, South Texas College of Law, 1993

Hajimirza, Shima, Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2013

Hajjat, Jumanah, Lecturer
Eng Tech & Ind Distribution
PHD, Texas A&M University, 2018

Hakim, Omar, Professor of the Practice
Sociology
MS, The University of Texas at Austin, 2004

Hala, David, Assistant Professor
Marine Biology
PHD, Brunel University, 2007

Hale, Charles, Senior Lecturer
Eng Tech & Ind Distribution
BBA, Ohio University, 1987

Hale, Trevor Schuyler, Clinical Professor
Information & Operations Mgmt
DEN, Texas A&M University, 1997

Haliburton, James T, Lecturer
Architecture
PHD, Texas A&M University, 2016
MAR, Texas A&M University, 2014

Halket, Jonathan Robert Levin, Assistant Professor
Finance
PHD, New York University, 2009

Hall Jr, Charles R, Professor
Horticultural Sciences
PHD, Mississippi State University, 1988

Hall, Jessica R, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2009

Hall, Malikah A, Instructional Assistant Professor
School of Law
JD, North Carolina Central University School of Law, 2015

Hall, Michael B, Professor
Chemistry
PHD, University of Wisconsin - Madison, 1971

Hallermann, Detlef, Clinical Professor
Finance
PHD, Colorado School of Mines, 1999

Halling, Thomas D, Associate Professor
TAMU Libraries
MLS, University of North Texas, 2008

Ham, Youngjib, Assistant Professor
Construction Science
PHD, University of Illinois at Urbana-Champaign, 2015
MAR, Seoul National University, Korea, 2011

Hambleton, James E, Adjunct Professor
School of Law
JD, George Washington University, 1978

Hamer, Gabriel L, Associate Professor
Entomology
PHD, Michigan State University, 2008

Hamer, Sarah A, Associate Professor
Vet Integrative Biosciences
DVM, Michigan State University, 2011
PHD, Michigan State University, 2010

Hamie, Christine S, Instructional Associate Professor
International Affairs
PHD, University of York, 2007

Hamilton, Daniel Kirk, Professor
Architecture
PHD, Arizona State University, 2017

Hamilton, Peter S, Associate Professor of the Practice
College of Engineering
DEN, The University of Texas at Austin, 1984

Hammady Brho, Mazen, Assistant Professor
Maritime Business Administration
PHD, University of North Texas, 2018

Hammer, Janet E, Clinical Professor
Teaching, Learning & Culture
PHD, University of Texas, 2003

Hammond, Tracy A, Professor
Computer Science & Engineering
PHD, Massachusetts Inst of Technology, 2007

Hamouda, Ayman K, Assistant Professor
College of Pharmacy
PHD, Texas Tech University Health Science Center, 2007

Han, Arum, Professor
Biomedical Engineering
PHD, Georgia Institute of Technology, 2005

Han, Arum, Professor
Electrical & Computer Eng
PHD, Georgia Institute of Technology, 2005

Han, Daikwon, Associate Professor
Epidemiology & Biostatistics
PHD, University of Buffalo, 2003

Han, Gang, Associate Professor
Epidemiology & Biostatistics
PHD, The Ohio State University, 2008

Han, Guichun, Clinical Assistant Professor
Vet Physiology & Pharmacology
PHD, Dalian Medical University, China, 2002
Han, Je C, Distinguished Professor
Mechanical Engineering
PHD, Massachusetts Inst of Technology, 1977

Hancock, Jay P, Assistant Lecturer
Ag Leadership, Educ & Comm
MS, Texas A&M University, 1984

Hand, Michael R, Professor
Philosophy & Humanities
PHD, Florida State University, 1985

Handy, Michael, Senior Lecturer
Eng Tech & Ind Distribution
BS, The University of Oklahoma, 2001

Haney, Adam D, Instructional Assistant Professor
Liberal Studies
MA, Texas A&M University-Commerce, 2014

Hanik, Bruce W, Instructional Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2011

Hanik, Kathleen, Visiting Lecturer
Health & Kinesiology
MFA, Florida State University, 2008

Hanik, Michael G, Instructional Assistant Professor
Health & Kinesiology
MS, Northwestern State University of Louisiana, 1996

Hanin, Boris L, Assistant Professor
Mathematics
PHD, Northwestern University, 2014

Hankins, Rebecca L, Professor
TAMU Libraries
MLS, Louisiana State University, 2000

Hannaford, Dinah R, Associate Professor
International Studies
PHD, Emory University, 2014

Hardin, Paul E, Distinguished Professor
Biology
PHD, Indiana University, 1987

Hardin, Robert G, Assistant Professor
Biological & Agricultural Eng
PHD, Texas A&M University, 2009

Harding, Michael, Lecturer
Accounting
BBA, Texas A&M University, 2019

Hardy, Jaime, Clinical Assistant Professor
College of Nursing
CERT, Angelo State University, 2018

Hardy, Joanne, Clinical Professor
Vet Large Animal Clinical Sc
PHD, The Ohio State University, 1996
DVM, University of Montreal, 1982

Hare, Martha L, Clinical Assistant Professor
College of Nursing
DNP, Texas Tech University Health Science Center, 2010

Haridas, Balakrishna, Professor of the Practice
Biomedical Engineering
PHD, University of Cincinnati, 2001

Hark Jr, John F, Lecturer
Maritime Business Administration
BS, Texas A&M University, 1989

Harlin, Julie F, Associate Professor
Ag Leadership, Educ & Comm
PHD, Oklahoma State University, 1999

Harmel, Robert, Professor
Political Science
PHD, Northwestern University, 1977

Harness, Nathaniel J, Instructional Associate Professor
Agricultural Economics
PHD, Texas Tech University, 2007

Harper, Alicia, Visiting Assistant Professor
Mathematics
PHD, Brown University, 2018

Harrel, Stephen K, Adjunct Professor
Periodontics
DDS, Baylor University College of Dentistry, 1972

Harris IV, T, Executive Professor
Finance

Harris, Harlan R, Associate Professor
Electrical & Computer Eng
PHD, Texas Tech University, 2003

Harris, Harlan R, Associate Professor
Materials Science & Engr
PHD, Texas Tech University, 2003

Harris, James E, Professor of the Practice
Chemical Engineering
PHD, University of Texas, Austin, 1981

Harris, Jason M, Instructional Associate Professor
English
MFA, Bowling Green State University, 2014
PHD, University of Washington, 2001

Harris, Joseph A, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Baylor College of Dentistry, 1972

Harris, Samuel, Visiting Assistant Professor
Mathematics
PHD, University of Waterloo, 2019

Harris, Stefanie, Associate Professor
International Studies
PHD, Emory University, 1999
Harrison, Stephen D, Adjunct Professor
School of Law
JD, The University of Texas at Austin, 1982

Hart, Jeffrey D, Professor
Statistics
PHD, Southern Methodist University, 1981

Hartberg, Yasha M, Lecturer
Vet Integrative Biosciences
PHD, Binghamton University, 2016

Hartl, Darren, Assistant Professor
Materials Science & Engr
PHD, Texas A&M University, 2009

Hartl, Darren J, Assistant Professor
Aerospace Engineering
PHD, Texas A&M University, 2009

Hartnack, Amanda K, Assistant Professor
Vet Large Animal Clinical Sc
DVM, Colorado State University, 2010

Hartnett, Eric J, Associate Professor
TAMU Libraries
MLS, University of North Carolina, 2005

Harvey, Idethia S, Associate Professor
Health & Kinesiology
DrPH, University of Pittsburgh, 2005

Harwell, William R, Assistant Professor of the Practice
Recreation, Park & Tourism Sc
CERT, Duke University, Durham, NC, 1996

Hasan, M M Faruque, Associate Professor
Chemical Engineering
PHD, National University of Singapore, 2010

Hascakir, Berna, Associate Professor
Petroleum Engineering
PHD, Middle East Technical University, 2008

Hasnain, Zohaib, Research Assistant Professor
Mechanical Engineering
PHD, University of Maryland, 2014

Hassan, Ibrahim, Professor
Texas A&M University at Qatar
PHD, Manitoba University, 1995

Hassan, Yassin A, Professor
Mechanical Engineering
PHD, University of Illinois, 1980

Hassan, Yassin A, Professor
Nuclear Engineering
PHD, University of Illinois, 1980

Hatala, Jeffrey J, Instructional Associate Professor
Health Policy & Management
PHD, University of South Carolina School of Public Health, 2013

Hatfield, April L, Associate Professor
History
PHD, Johns Hopkins University, 1997

Hatfield, Lloyd K, Senior Lecturer
Statistics
MBA, University of North Texas, 1980

Havens, Jessica M, Lecturer
Communication
MA, Colgate University, 2012

Hawkins Jr, Harvey E, Professor
Civil Engineering
PHD, Texas A&M University, 1993

Hawkins, Andrew G, Visiting Lecturer
Architecture
MAR, University of Oregon, 1999

Hawkins, Angela K, Lecturer
Biology
PHD, Texas A&M University, 2018

Hawthorne, Melanie C, Professor
International Studies
PHD, University of Michigan Ann Arbor, 1987

Hay, Heather N, Clinical Assistant Professor
College of Pharmacy
PHARMD, The University of Texas at Austin, 2008

Hays, Dirk B, Professor
Soil & Crop Sciences
PHD, University of Calgary, 1997

Haywood Onyemeh, LaQuanda Thelma, Lecturer
TAMU Libraries
MLS, The University of North Carolina Greensboro, 2018

He, Ping, Professor
Biochemistry & Biophysics
PHD, Kansas State University, 2003

He, Welling, Associate Professor
Architecture
PHD, Georgia Institute of Technology, 2005

Head, Michael J, Lecturer
Accounting
BS, University of Missouri - Columbia, 1980

Heaps, Cristine L, Associate Professor
Vet Physiology & Pharmacology
PHD, University of Missouri - Columbia, 1999

Heath, Amy K, Adjunct Assistant Professor
Educational Psychology
PHD, Texas A&M University, 2012

Heatley, Jennifer J, Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1995
Heatly, Kyra, Lecturer
Communication
MA, Texas Tech University, 2019

Heffer Jr, Robert W, Clinical Professor
Psychological & Brain Sciences
PHD, Louisiana State University and A&M College, 1988

Hegde, Rashmi, Adjunct Assistant Professor
Periodontics
DDS, Bangalore University, India, 1999

Heidarzadeh, Anoosheh, Visiting Assistant Professor
Electrical & Computer Eng
PHD, Carleton University, 2012

Heidtke, Jonathan, Professor of the Practice
Health & Kinesiology
BS, Texas A&M University, 1981

Heilman, James L, Professor
Soil & Crop Sciences
PHD, Kansas State University, 1977

Heim, Gregory R, Professor
Information & Operations Mgmt
PHD, University of Minnesota, Twin Cities, 2000

Heinz, Justin A, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Purdue University, 2012

Heinz, Kevin M, Senior Professor
Entomology
PHD, University of California, Riverside, 1989

Heird, James C, Executive Professor
Animal Science
PHD, Texas Tech University, 1978

Helge, Terri L, Professor
School of Law
JD, South Texas College of Law, 2001

Helms, Anjel Marie, Assistant Professor
Entomology
PHD, The Pennsylvania State University, 2015

Hemmer, Philip R, Professor
Electrical & Computer Eng
PHD, Massachusetts Inst of Technology, 1984

Hemmer, Philip R, Professor
Materials Science & Engr
PHD, Massachusetts Inst of Technology, 1984

Hemmig, Christopher, Instructional Assistant Professor
International Studies
PHD, The Ohio State University, 2015

Henderson II, Bryan N, Adjunct Assistant Professor
Oral & Maxillofacial Surgery
DDS, Baylor College of Dentistry, 1987

Henderson, Michelle, Senior Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 2010

Henning, William H, Executive Professor
School of Law
LLM, University of Illinois Champaign-Urbana, 1982
JD, University of Tennessee-Knoxville, 1976

Henrichs, Darren, Instructional Assistant Professor
Oceanography
PHD, Texas A&M University, 2012

Hensley, Douglas A, Senior Professor
Mathematics
PHD, University of Minnesota, 1974

Henson, Bryce, Visiting Assistant Professor
Communication
PHD, University of Illinois, 2016

Henson, Clifford C, Adjunct Professor
School of Law
JD, University of Illinois, 2011

Henthorne, Mary B, Instructional Associate Professor
Health & Kinesiology
CERT, Yogafit Training System, 2018

Hepfer, Bradford F, Assistant Professor
Accounting
DBA, The University of Iowa, 2016

Hepfer, Katie L, Clinical Associate Professor
College of Nursing
DNP, The University of Iowa, 2016

Herbert, Bruce E, Professor
TAMU Libraries
PHD, University of California, Riverside, 1992

Hercot, Philippe, Executive Professor
Finance
MBA, Harvard Graduate School of Business Administration, 1993

Herman, Benjamin, Associate Professor
Teaching, Learning & Culture
PHD, Iowa State University, 2010

Herman, Cheryl L, Clinical Associate Professor
Vet Integrative Biosciences
DVM, University of Saskatchewan, 1987

Herman, James D, Clinical Professor
Vet Physiology & Pharmacology
PHD, Texas A&M University, 1995
DVM, Texas A&M University, 1989

Herman, Jennifer K, Associate Professor
Biochemistry & Biophysics
PHD, Indiana University, 2005
Hernandez Magallanes, Irma Del Consue, Instructional Assistant Professor
Statistics
PHD, University California Berkeley, 2010

Hernandez, Alexander A, Instructional Assistant Professor
Sociology
PHD, Boston College, 2014

Hernandez, Jose J, Assistant Professor
College of Pharmacy
PHD, University of Maryland, 2007

Hernandez, Paul, Associate Professor
Teaching, Learning & Culture
PHD, University of Connecticut, 2011

Hernandez, Sonia, Associate Professor
History
PHD, University of Houston, 2006

Herrera, Luz E, Professor
School of Law
JD, Harvard Law School, 1999

Herring, Andy D, Professor
Animal Science
PHD, Texas A&M University, 1994

Heseltine, Johanna C, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, University of Saskatchewan, 1998

Hester, Yvette C, Instructional Associate Professor
Mathematics
PHD, Texas A&M University, 2000

Hetland, Robert D, Professor
Oceanography
PHD, Florida State University, 1999

Hibbitts, Toby, Lecturer
Ecology and Conservation Biology
PHD, University of the Witwatersrand, 2006

Hicks, Joshua A, Professor
Psychological & Brain Sciences
PHD, University of Missouri - Columbia, 2009

Hidalgo, Kristin T, Adjunct Professor
School of Law
JD, Thomas Cooley Law School, 2004

Highfield, Wesley E, Associate Professor
Marine and Coastal Environmental Science
PHD, Texas A&M University, 2008

Highsmith, Anne L, Clinical Associate Professor
TAMU Libraries
MLS, University of Arizona, 1979

Hilaly, Ahmad K, Professor of the Practice
Chemical Engineering
PHD, Colorado State University, 1992

Hilderbrand, Mary E, Associate Professor of the Practice
Public Service & Administration
PHD, Harvard University, 1992

Hill, Alfred D, Professor
Petroleum Engineering
PHD, University of Texas, 1978

Hill, Rodney C, Professor
Architecture
MAR, University of California - Berkeley, 1969

Hill-Jackson, Valerie L, Clinical Professor
Teaching, Learning & Culture
PHD, St. Joseph's University, 2003

Hillhouse, Andrew E, Research Assistant Professor
Veterinary Pathobiology
PHD, University of Missouri-Columbia, 2010

Hillman, Sara K, Assistant Professor
Texas A&M University at Qatar
PHD, Michigan State University, East Lansing, MI, 2011

Hilty, Christian B, Professor
Chemistry
PHD, Swiss Federal Institute of Technology Zurich, 2004

Hiney, Jill K, Research Assistant Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1996

Hingtgen, Luke, Visiting Lecturer
Texas A&M University at Qatar
CERT, DePaul University, 2017

Hinojosa, Felipe, Associate Professor
History
PHD, University of Houston, 2009

Hinrichs, Katrin, Professor
Vet Physiology & Pharmacology
PHD, University of Pennsylvania, 1988
DVM, University of California, Davis, 1978

Hinze, Erin S, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Texas A&M University Baylor College of Dentistry, 2008

Hipwell, M Cynthia, Professor
Materials Science & Engr
PHD, University of California-Berkeley, 1996

Hipwell, M Cynthia, Professor
Mechanical Engineering
PHD, University of California-Berkeley, 1996

Ho, Jeannette A, Associate Professor
TAMU Libraries
MLS, University of Illinois Urbana, 1999

Hochman, Mona E, Lecturer
Marine Biology
MS, University of Maryland, 2000
Hodge, Courtney, Visiting Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2015

Hodges, Amy M, Instructional Assistant Professor
Texas A&M University at Qatar
PHD, University of Arkansas, 2012

Hodges, Louis, Instructional Associate Professor
Recreation, Park & Tourism Sc
PHD, Texas A&M University, 1971

Hoekstra, Mark L, Professor
Economics
PHD, University of Florida, 2006

Hoffman, Anton G, Clinical Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1992
DVM, Texas A&M University, 1986

Hoffman, Matt F, Clinical Assistant Professor
College of Nursing
DNP, The University of Iowa, 2016

Hoffmann, Heather, Instructional Assistant Professor
Molecular & Cellular Medicine
MD, University of Louisville School of Medicine, 1990

Hogan, Harry A, Associate Professor
Biomedical Engineering
PHD, Texas A&M University, 1984

Hogan, Harry A, Professor
Mechanical Engineering
PHD, Texas A&M University, 1984

Hogler, Joe Louis, Lecturer
George Bush School of Govern
PHD, University of Kent, 2011

Holder, Eugene P, Instructional Associate Professor
College of Pharmacy
PHARMD, The University of Texas at Austin, 1994

Holladay, Sherry J, Professor
Communication
PHD, Purdue University, 1992

Holland, Hubert B, Professor
School of Law
JD, American University Washington College of Law, 1998

Hollenbach, Florian M, Assistant Professor
Political Science
PHD, Duke University, 2015

Holley, Susan P, Clinical Associate Professor
Educ Admn & Human Resource Dev
EDD, Baylor University, 1991

English
PHD, University of Notre Dame, 2017

McCoy, John Robert, Adjunct Professor
School of Law
JD, University of Houston, 1981

McCreedy, Dylan, Assistant Professor
Biology
PHD, Washington University, St. Louis, 2013

McCubbins, Andrew, Assistant Professor
Ag Leadership, Educ & Comm
PHD, Iowa State University, 2016

McDaniel, Stephen W, Professor
Marketing
PHD, University of Arkansas, 1979

McDeavitt, Sean M, Associate Professor
Materials Science & Engr
PHD, Purdue University, 1992

McDeavitt, Sean M, Professor
Nuclear Engineering
PHD, Purdue University, 1992

McDonald, Anthony D, Assistant Professor
Industrial & Systems Eng
PHD, University of Wisconsin - Madison, 2014

McDonald, Brenda K, Assistant Lecturer
Educ Admn & Human Resource Dev
MED, Sam Houston State University, 2008

McDonald, Thomas J, Professor
Environmental & Occptnl Hilth
PHD, Texas A&M University, 1988

McDonald, Wendy, Assistant Lecturer
Educ Admn & Human Resource Dev
MSW, University of Texas at Arlington, 1998

McDougall, Mary P, Associate Professor
Biomedical Engineering
PHD, Texas A&M University, 2004

McEachern, George R, Visiting Professor
Horticultural Sciences
PHD, Texas A&M University, 1973

McElroy, Audrey, Professor
Poultry Science
PHD, Texas A&M University, 1998

McElroy, Ted, Executive Professor
Accounting
MS, Texas A&M University, 1980

McFarland, Kenneth, Clinical Assistant Professor
Management
PHD, Pepperdine University, 2018

McGeachin, Robert B, Associate Professor
TAMU Libraries
PHD, Texas A&M University, 1980

McGee, Russell O, Lecturer
Biological & Agricultural Eng
MEN, Texas A&M University, 1997

McGinn, Larry, Senior Lecturer
Construction Science
MS, Texas A&M University, 2003

McGowan, Anne B, Instructional Professor
Construction Science
MS, Texas A&M University, 1976

McGowan, Annie L, Associate Professor
Accounting
PHD, University of North Texas, 1994

McGrath, Paul A, Assistant Lecturer
Ag Leadership, Educ & Comm
MA, Marist College, 2012
McGuire, Sean T, Associate Professor
Accounting
PHD, University of Georgia, 2008

McGuire, Susan S, Clinical Assistant Professor
Pediatric Dentistry
DDS, Louisiana State University Health Sciences Center at New Orleans, 1986

McInnes, Kevin J, Professor
Soil & Crop Sciences
PHD, Kansas State University, 1985

McInnis, Verity G, Senior Lecturer
History
PHD, Texas A&M University, 2012

McIntosh, William A, Professor
Sociology
PHD, Iowa State University, 1975

McIntyre, David H, Lecturer
Public Service & Administration
PHD, University of Maryland - College Park, 1999

McIntyre, Peter M, Professor
Physics & Astronomy
PHD, University of Chicago, 1973

McKay, Garrett, Assistant Professor
Civil Engineering
PHD, University of Colorado Boulder, 2017

McKee, Susan J, Clinical Assistant Professor
College of Nursing
MSN, University of Texas at Tyler, 2012

McKeown, Debra, Associate Professor
Teaching, Learning & Culture
PHD, Vanderbilt University, 2012

McKim, Billy R, Associate Professor
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 2010

McKinley Jr, William J, Senior Lecturer
Horticultural Sciences
MAG, Texas A&M University, 1983

McKinney, Matthew R, Lecturer
English
PHD, University of Nevada- Reno, 2017

McKinley, Thomas D, Professor
Biology
PHD, University of Georgia, 1983

McLaughlin, James Kevin, Professor Of The Practice
International Affairs
MA, Webster University, 1987

McLaughlin, Timothy D, Associate Professor
Visualization
MS, Texas A&M University, 1994

McManus, Uel J, Professor
Biology
PHD, University of Tennessee, 1964

McLaughan Moudouni, Darcy K, Assistant Professor
Health Policy & Management
PHD, Texas A&M University Health Science Center, 2010

McNamara, Ann M, Associate Professor
Visualization
PHD, University of Bristol, UK, 2000

McNamara, Sarah J, Assistant Professor
History
PHD, University of North Carolina at Chapel Hill, 2016

McNaughten, Dennis Lee, Adjunct Assistant Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 1993

McNeice, Sean T, Assistant Professor Of The Practice
Maritime Transportation
CERT, United States Coast Guard, 2015

McNeill, Elisa H, Clinical Professor
Health & Kinesiology
PHD, Texas A&M University, 2010

McQueen, Vanicha Ruth Favors, Assistant Professor Of The Practice
Marine Engineering Technology
CERT, The United States Coast Guard National Maritime Center, 2013

McShane II, Michael J, Professor
Biomedical Engineering
PHD, Texas A&M University, 1999

McShane II, Michael J, Professor
Materials Science & Engr
PHD, Texas A&M University, 1999

McVay, Duane A, Professor
Petroleum Engineering
PHD, Texas A&M University, 1994

McVay, Matilda W, Instructional Associate Professor
Mechanical Engineering
PHD, Texas A&M University, 1996

McWhirter, David B, Professor
English
PHD, University of Virginia, 1984

McWhorter, Alton G, Clinical Professor
Pediatric Dentistry
DDS, University of Tennessee Medical Units, 1979

Meagher, Mary W, Professor
Psychological & Brain Sciences
PHD, University of North Carolina at Chapel Hill, 1989

Means Coleman, Robin Renee, Professor
Communication
PHD, Bowling Green State University, 1996
Medina Cetina, Zenon, Associate Professor
Civil Engineering
PHD, John Hopkins University, 2007

Medina Cetina, Zenon, Associate Professor
Petroleum Engineering
PHD, John Hopkins University, 2007

Medina Palma, Paolina Del Car, Assistant Professor
Finance
PHD, Northwestern University, 2017

Medina, Raul F, Professor
Entomology
PHD, University of Maryland, College Park, 2005

Medlin, Zackary, Assistant Professor
TAMU Libraries
MLS, Rutgers University, 2018

Medlock, John R, Adjunct Professor
School of Law
JD, Texas Wesleyan University, 2007

Meek, Thomas D, Professor
Biochemistry & Biophysics
PHD, Pennsylvania State University, 1981

Meer, Jonathan, Professor
Economics
PHD, Stanford University, 2009

Mehta, Ranjana K, Associate Professor
Industrial & Systems Eng
PHD, Virginia Tech, 2011

Meigs, Randyl, Adjunct Professor
School of Law
DJ, The University of Texas School of Law, 1985

Meitzen, Michael C, Lecturer
Finance
MER, Texas A&M University, 2001

Melchor, Nyria, Adjunct Professor
School of Law
JD, Harvard University, 1992

Melconian, Daniel G, Professor
Physics & Astronomy
PHD, Simon Fraser University, 2006

Melgoza, Pauline, Associate Professor
TAMU Libraries
MLS, University of North Texas, 2000

Mendoza, Itza, Assistant Professor
Environmental & Occpntl Hlth
PHD, Texas A&M University, 2007

Menet, Jerome, Assistant Professor
Biology
PHD, Louis Pasteur University, 2003

Menetz, George, Adjunct Professor
School of Law
JD, Loyola University, 1996

Menzel, Christopher P, Professor
Philosophy & Humanities
PHD, University of Notre Dame, 1984

Menzies III, Max D, Lecturer
Agricultural Economics
PHD, Texas A&M University, 2017

Mercieca, Jennifer R, Associate Professor
Communication
PHD, University of Illinois at Urbana - Champaign, 2003

Mercier, Richard S, Professor
Civil Engineering
PHD, Massachusetts Inst of Technology, 1985

Merlin, Christine, Associate Professor
Biology
PHD, University Pierre and Marie Curie, 2006

Merrell Jr, William J, Professor
Marine and Coastal Environmental Science
PHD, Texas A&M University, 1971

Mestrovic, Stjepan G, Professor
Sociology
PHD, Syracuse University, 1982

Metters, Richard D, Professor
Information & Operations Mgmt
PHD, University of North Carolina - Chapel Hill, 1993

Meyer, Michelle Annette, Associate Professor
Land Arch & Urban Planning
PHD, Colorado State University, 2013

Michalski, Krzysztof A, Associate Professor
Electrical & Computer Eng
PHD, University of Kentucky, 1981

Michaudel, Quentin, Assistant Professor
Chemistry
PHD, The Scripps Research Institute, 2015

Michaudel, Quentin, Assistant Professor
Materials Science & Engr
PHD, The Scripps Research Institute, 2015

Mier, Nelda, Instructional Associate Professor
Hlth Promotion & Comm Hlth Sci
PHD, University of New Mexico, 2002

Miglietta, Maria P, Associate Professor
Marine Biology
PHD, Duke University, 2005

Miles, Bryant W, Senior Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 1998
Faculty

Miles, Richard B, Professor
Aerospace Engineering
PHD, Stanford University, 1972

Mileski, Joan P, Professor
Maritime Business Administration
PHD, University of Texas at Dallas, 2000

Miller, Brent V, Professor
Geology & Geophysics
PHD, Dalhousie University, Canada, 1997

Miller, Cain, Lecturer
College of Liberal Arts
MA, Southern Methodist University, 2019

Miller, Glen A, Instructional Associate Professor
Philosophy & Humanities
PHD, University of North Texas, 2015

Miller, Gretchen R, Associate Professor
Civil Engineering
PHD, University of California, Berkeley, 2009

Miller, Jeremy R, Lecturer
Communication
PHD, Texas A&M University, 2012

Miller, Michael J, Associate Professor
College of Pharmacy
DrPH, University of Pittsburgh, 2004

Miller, Rhonda K, Professor
Animal Science
PHD, Colorado State University, 1983

Miller, Scott L, Professor
Electrical & Computer Eng
PHD, University of California, San Diego, 1988

Miller, Stephen J, Professor
Hispanic Studies
PHD, The University of Chicago, 1976

Miller, Warren, Professor of the Practice
Nuclear Engineering
PHD, Northwestern University, 1973

Mills, Regina, Assistant Professor
English
PHD, University of Texas, Austin, 2018

Milman, Robert, Clinical Assistant Professor
College of Medicine
MD, Texas A&M University, 1986

Milstien, Susan, Clinical Assistant Professor
Health & Kinesiology
PHD, Widener University, 2006

Miner, Kathi N, Associate Professor
Psychological & Brain Sciences
PHD, University of Michigan, 2004

Ming, Shuang, Visiting Assistant Professor
Mathematics
PHD, University of California Davis, 2019

Mioduszewski, Saskia, Professor
Physics & Astronomy
PHD, University of Tennessee, 1999

Mir, Nordin, Professor
Texas A&M University at Qatar
PHD, University of Rouen, France, 1998

Mirabolfathi, Nader, Research Associate Professor
Physics & Astronomy
PHD, University of Paris XI, 2002

Miranda, Malathi S, Clinical Assistant Professor
Public Health Sciences
DDS, Mangalore University, India, 1995

Miranda, Valerian, Associate Professor
Architecture
PHD, Texas A&M University, 1988
MAR, Texas A&M University, 1984

Mirza, Saadat, Professor of the Practice
College of Engineering
PHD, University of South Hampton, 1983

Misemer, Sarah M, Professor
Hispanic Studies
PHD, University of Kansas, 2001

Misra, Siddharth, Associate Professor
Petroleum Engineering
PHD, University of Texas at Austin, 2015

Mitchell, Alexandra, Lecturer
TAMU Libraries
MS, University of North Carolina at Chapel Hill, 2014

Mitchell, Angela, Assistant Professor
Biology
PHD, University of North Carolina at Chapel Hill, 2013

Mitchell, Stacey A, Clinical Associate Professor
College of Nursing
DNP, University of Tennessee Health Science Center, 2006

Mitchell, Thomas W, Professor
School of Law
LLM, University of Wisconsin - Madison, 1999
JD, Howard University School of Law, 1993

Mittal, Chiraag, Assistant Professor
Marketing
PHD, University of Minnesota, 2016

Miyamoto, Tetsuya, Research Assistant Professor
Molecular & Cellular Medicine
PHD, Nagoya University, 2004
Mize, Britt A, Associate Professor
English
PHD, The University of North Carolina at Chapel Hill, 2003

Mjelde, James W, Professor
Agricultural Economics
PHD, University of Illinois at Urbana - Champaign, 1985

Moberly, Heather K, Professor
TAMU Libraries
MLS, Clarion University of Pennsylvania, 1994

Mobley, Benedict, Associate Professor
Aerospace Engineering
PHD, University of Maryland, 2010

Mochinushi, Yumiko, Instructional Assistant Professor
Psychological & Brain Sciences
MS, Florida Institute of Technology, 2014

Moczygemba, Margarita M, Research Associate Professor
Institute of Biosciences & Tec
PHD, State University of New York at Stony Brook, 1997

Mody, Rustom, Senior Lecturer
Eng Tech & Ind Distribution
MBA, University of Houston, 1986

Moffitt, Cassandra, Clinical Assistant Professor
College of Nursing
MSN, University of Texas-Tyler, 2017

Mohanty, Binayak P, Professor
Biological & Agricultural Eng
PHD, Iowa State University, 1992

Mohiuddin, Mohammad W, Research Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2008

Mohler, Robert R, Senior Lecturer
Marine and Coastal Environmental Science
PHD, Texas A&M University, 1994

Mohseni, Mahdi, Assistant Professor
Finance
PHD, Boston College, 2015

Mohtat, Rabi H, Professor
Biological & Agricultural Eng
PHD, Michigan State University, 1994

Molhusen, Brian E, Executive Professor
Marketing
BBA, Texas A&M University, 1978

Momcilovic, Petar, Associate Professor
Industrial & Systems Eng
PHD, Columbia University, 2003

Montague, Marcia L, Visiting Assistant Professor
Educational Psychology
PHD, Texas A&M University, 2009

Montalvo-Liendo, Nora, Associate Professor
College of Nursing
PHD, The University of Texas Health Science Center at Houston, 2009

Moore Andrew, Lecturer
Marine Engineering Technology
BS, Texas A&M University at Galveston, 2014

Moore, Christopher M, Lecturer
Agricultural Economics
CERT, Texas A&M University, 2016

Moore, Georgianne, Professor
Ecology and Conservation Biology
PHD, Oregon State University, 2004

Moore, Janie M, Assistant Professor
Biological & Agricultural Eng
PHD, Purdue University, 2015

Moore, John Michael, Instructional Assistant Professor
Computer Science & Engineering
PHD, Texas A&M University, 2007

Moore, Kevin M, Executive Professor
Finance
MS, Johns Hopkins University, 2013

Moore, Lori L, Associate Professor
Ag Leadership, Educ & Comm
PHD, University of Florida, 2003

Moore, Melinda S, Professor
Health & Kinesiology
PHD, Ball State University, 1997

Moore, Morgan E, Lecturer
Accounting
MAC, University of Texas at Austin, 2008

Moore, Wendy A, Associate Professor
Sociology
PHD, University of Minnesota, 2005

Mora-Zacarias, Miguel, Professor
Ecology and Conservation Biology
PHD, University of California, Davis, 1990

Moreira, Rosana G, Professor
Biological & Agricultural Eng
PHD, Michigan State University, 1989

Moreira-Tamayo, Oscar, Professor of the Practice
Electrical & Computer Eng
PHD, Texas A&M University, 1996

Moreiras, Alberto, Professor
Hispanic Studies
PHD, University of Georgia, 1987

Morel, Jim E, Professor
Nuclear Engineering
PHD, The University of New Mexico, 1979
Moreno Centeno, Erick, Associate Professor
Industrial & Systems Eng
PHD, University of California, Berkeley, 2010

Moreno, Michael R, Assistant Professor
Biomedical Engineering
PHD, Texas A&M University, 2009

Moreno, Michael R, Associate Professor
Mechanical Engineering
PHD, Texas A&M University, 2009

Morey, Anne M, Associate Professor
English
PHD, University of Texas- Austin, 1998

Morey, Leslie C, Professor
Psychological & Brain Sciences
PHD, University of Florida, 1981

Moridis, George J, Professor
Petroleum Engineering
PHD, Texas A&M University, 1987

Morita, Nobuo, Professor
Petroleum Engineering
PHD, The University of Texas at Austin, 1974

Mormann, Felix, Professor
School of Law
JD, University of Passau, 2010
LLM, University of California Berkeley School of Law, 2008

Morris, Jeffrey M, Associate Professor
Performance Studies
PHD, University of North Texas, 2007

Morris, Theresa M, Professor
Sociology
PHD, Texas A&M University, 2000

Morrissey, Michael A, Professor
Health Policy & Management
PHD, University of Washington, Seattle, 1979

Morrison, Angela D, Associate Professor
School of Law
JD, University of Nevada Las Vegas, 2005

Morrison, Jenny K, Lecturer
George Bush School of Govern
PHD, New York University, 2008

Morrison, Mike, Professor
Rangeland, Wildlife and Fisheries Management
PHD, Oregon State University, 1982

Morriss, Andrew P, Professor
School of Law
PHD, Massachusetts Institute of Technology, 1994
JD, University of Texas at Austin, 1984

Mortari, Daniele, Professor
Aerospace Engineering
PHD, University La Sapienza of Rome, 1980

Mortazavi, Jack B, Assistant Professor
Computer Science & Engineering
PHD, University of California - Los Angeles, 2014

Mosbo Ballestro, Julie A, Clinical Associate Professor
TAMU Libraries
MA, The University of Wisconsin, 2005

Moscarello, Justin M, Assistant Professor
Psychological & Brain Sciences
PHD, University of California, Santa Barbara, 2010

Moser Melanie, Instructional Professor
Foundational Sciences
PHD, University of Houston, 1977

Mostafavidarani, Ali, Associate Professor
Civil Engineering
PHD, Purdue University, 2013

Mouneimne, Roula, Research Professor
Vet Integrative Biosciences
PHD, Lyon I University, 1984

Moyes, Rita J, Instructional Associate Professor
Biology
PHD, Texas A&M University, 1992

Moyna, Maria I, Professor
Hispanic Studies
PHD, University of Florida, 2000

Mu, Ren, Associate Professor
International Affairs
PHD, Michigan State University, 2004

Muckleroy, Martha L, Instructional Professor
Health & Kinesiology
MED, Texas A&M University, 1994

Muellerhinze, Maxine L, Clinical Assistant Professor
College of Nursing
PHD, The University of Texas - Austin, 1988

Mufich, Martin W, Clinical Assistant Professor
College of Nursing
MNU, The University of Texas at Austin, 2015

Muir, Ian W, Clinical Assistant Professor
TAMU Libraries
MLS, Texas Women's University, 2014

Mulcahy, Angela M, Clinical Associate Professor
College of Nursing
PHD, University of Texas -Tyler, 2018

Mulenga, Albert, Professor
Veterinary Pathobiology
PHD, Hokkaido University, 1999

Muliana, Hanifah, Professor
Mechanical Engineering
PHD, Georgia Institute of Technology, 2004

Qaraqe, Khalid A, Professor
Texas A&M University at Qatar
PHD, Texas A&M University, 1997

Qian, Xiaofeng, Assistant Professor
Materials Science & Engr
PHD, Massachusetts Institute of Technology, 2008

Qian, Xiaoning, Associate Professor
Electrical & Computer Eng
PHD, Yale University, 2005

Qian, Yongchang, Research Associate Professor
Vet Integrative Biosciences
PHD, Shanghai Institutes for Biological Sciences, 1990

Qin, Chunlin, Professor
Biomedical Sciences
PHD, Okayama University, 1998
DMD, Harbin Medical University, 1983

Qin, Hongmin, Associate Professor
Biology
PHD, Institute of Microbiology, Chinese Academy of Sciences, 1999

Qiu Lin, Instructional Assistant Professor
Foundational Sciences
PHD, University of Alabama, 2006

Qu, Heng, Assistant Professor
Public Service & Administration
PHD, Indiana University Purdue University Indianapolis, 2016

Quackenbush Ammons, Anne E, Lecturer
Performance Studies
MA, University of Houston, 2010

Quadrifoglio, Luca, Associate Professor
Civil Engineering
PHD, University of Southern California, 2005

Quailes, Natasha, Lecturer
Food Science and Technology
MS, Chapman University, 2014

Quek, Francis K, Professor
Computer Science & Engineering
PHD, University of Michigan, 1990

Quick, Christopher M, Associate Professor
Biomedical Engineering
PHD, Rutgers University, 1999

Quick, Christopher M, Professor
Vet Physiology & Pharmacology
PHD, Rutgers University, 1999

Quigg, Antonietta S, Professor
Marine Biology
PHD, Monash University, 2000

Quinn, Michael D, Associate Professor of the Practice
Computer Science & Engineering
MS, University of Southern California at Los Angeles, 1978

Quinn, Shaun C, Assistant Professor Of The Practice
Maritime Transportation
CERT, United States Coast Guard, 2019

Quintana, Maria E, Associate Professor
Hispanic Studies
PHD, University of California, Berkeley, 1998

Quiram, Barbara J, Professor
Health Policy & Management
PHD, Texas A&M University, 1995
MPA, Texas A&M University, 1991

Rackley, Robin A, Clinical Professor
Teaching, Learning & Culture
PHD, Texas A&M University, 2004
Radcliff, Tiffany A, Professor
Health Policy & Management
PHD, School of Public Health University of Minnesota, 2000

Radovic, Miladin, Professor
Materials Science & Engr
PHD, Drexel University, 2001

Radovic, Miladin, Associate Professor
Mechanical Engineering
PHD, Drexel University, 2001

Radzik, Linda C, Professor
Philosophy & Humanities
PHD, The University of Arizona, 1997

Raftery, Jonathan P, Lecturer
Chemical Engineering
PHD, Texas A&M University, 2017

Raghavan, Shreya, Assistant Professor
Biomedical Engineering
PHD, Virginia Tech-Wake Forest University School of Biomedical Engineering and Sciences, 2014

Ragsdale, Daniel J, Professor of the Practice
Computer Science & Engineering
PHD, Texas A&M University, 2001

Ragucci, Sylvie B, Senior Lecturer
International Studies
PHD, The Pennsylvania State University, 1999

Ragusa, Jean C, Professor
Nuclear Engineering
PHD, Institut National Polytechnique de Grenoble, France, 2002

Rahimian, Mina M, Senior Lecturer
Electrical & Computer Eng
PHD, Texas A&M University, 2011

Rahm Jr, Robert S, Instructional Assistant Professor
Mathematics
PHD, Washington University in St. Louis, 2017

Rahman, Mohammad A, Associate Professor
Texas A&M University at Qatar
PHD, University of Alberta, 2010

Rahman, Shahina, Instructional Assistant Professor
Statistics
PHD, Texas A&M University, 2015

Rahman, Ziyaur, Associate Professor
College of Pharmacy
PHD, Hamdard University, 2005

Rahn, Rhonda N, Clinical Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2014

Raibourn, Delmer D, Adjunct Professor
School of Law
JD, University of Oklahoma School of Law, 1998

Raisor, Cynthia, Lecturer
Bush School of Govt. - Deans
MA, Texas A&M University, 1986

Rajagopal, Kumbakonam, Professor
Biomedical Engineering
PHD, University of Minnesota, 1978

Rajagopal, Kumbakonam, Distinguished Professor
Mechanical Engineering
PHD, University of Minnesota, 1978

Rajan, Nithya, Associate Professor
Soil & Crop Sciences
PHD, Texas Tech University, 2007

Rajendran, Jeyavijayan, Assistant Professor
Electrical & Computer Eng
PHD, New York University, 2015

Rajendran, Praveen, Research Associate Professor
Institute of Biosciences & Tec
PHD, Birla Institute of Technology and Science, 2006

Ramadan, Hadeel M, Instructional Assistant Professor
Visualization
MFA, Virginia Tech, 2014

Ramadoss, Jayanth, Associate Professor
Vet Physiology & Pharmacology
PHD, Texas A&M University, 2008

Ramanathan, Suresh, Professor
Marketing
PHD, New York University, 2002

Ramasubramanian, Srividya, Professor
Communication
PHD, Pennsylvania State University, 2004

Rambo, Lynne H, Professor
School of Law
JD, The University of Georgia, 1987

Rambo-Hernandez, Karen, Associate Professor
Teaching, Learning & Culture
PHD, University of Connecticut, 2011

Ramirez, Diana, Associate Professor
TAMU Libraries
MLS, University of Texas, 1990

Ramirez, Gilbert, Professor
Health Policy & Management
DrPH, University of Texas Health Science Center at Houston, 1986

Ramos Garcimartin, Hector, Lecturer
Educational Psychology
PHD, Texas A&M University, 2015

Ramos, Kenneth, Professor
College of Medicine
MD, University of Louisville Health Sciences Center, 2011
PHD, The University of Texas at Austin, 1983
Ramos, Suzanna J, Lecturer
Educational Psychology
PHD, Texas A&M University, 2015

Ramsey, Heather L, Instructional Associate Professor
Mathematics
MS, Texas A&M University, 2004

Ramsey, W S, Professor
Animal Science
PHD, New Mexico State University, 1996

Rangan, Sudarsan, Clinical Associate Professor
Information & Operations Mgmt
PHD, University of Alabama, 2008

Rangel Posada, Juliana, Associate Professor
Entomology
PHD, Cornell University, 2010

Rankin, Kathleen V, Professor
Public Health Sciences
DDS, Baylor College of Dentistry, 1977

Rantschler James, Instructional Assistant Professor
Foundational Sciences
PHD, University of Alabama, 2003

Rao, Asha, Instructional Assistant Professor
Biology
PHD, Texas A&M University, 2002

Rapp, Anita D, Assistant Professor
Atmospheric Sciences
PHD, Colorado State University, 2004

Rapp, Ralf F, Professor
Physics & Astronomy
PHD, Rheinische Friedrich-Wilhelma University, Bonn, 1996

Rasmussen, Bryan P, Professor
Mechanical Engineering
PHD, University of Illinois, 2005

Rathinam, Sivakumar, Associate Professor
Mechanical Engineering
PHD, University of California, Berkeley, 2007

Rauchwerger, Lawrence, Professor
Computer Science & Engineering
PHD, University of Illinois, 1995

Raudsepp, Terje, Professor
Vet Integrative Biosciences
PHD, Swedish University of Agricultural Sciences, 1999

Rauschel, Frank M, Distinguished Professor
Chemistry
PHD, University of Wisconsin - Madison, 1976

Raven, Sara P, Assistant Professor
Teaching, Learning & Culture
PHD, University of Georgia, 2013

Ray, Korok, Associate Professor
Accounting
PHD, Standard Graduate School of Business, 2004

Raymond, Anne L, Professor
Geology & Geophysics
PHD, University of Chicago, 1983

Raymond, Dwayne F, Instructional Assistant Professor
Philosophy & Humanities
PHD, University of Western Ontario, 2006

Read-Fuller, Andrew M, Clinical Assistant Professor
Oral & Maxillofacial Surgery
MD, UT Southwestern Medical School, 2014
DDS, UCLA, 2011

Rech, Raquel R, Clinical Associate Professor
Veterinary Pathobiology
PHD, Federal University of Santa Maria (UFSM), 2007
DVM, Santa Catarina State University, 1999

Rector, Amy S, Visiting Assistant Professor
Teaching, Learning & Culture
EDD, University of Cincinnati, 2017

Reddy, Anil K, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Columbia University, 1994

Reddy, Indra K, Professor
College of Pharmacy
PHD, University of Florida, 1989

Reddy, Junuthula, Professor
Materials Science & Engr
PHD, University of Alabama at Huntsville, 1974

Reddy, Junuthula N, University Distinguished Professor
Aerospace Engineering
PHD, University of Alabama at Huntsville, 1974

Reddy, Junuthula N, Distinguished Professor
Mechanical Engineering
PHD, University of Alabama at Huntsville, 1974

Reddy, Likith V, Clinical Professor
Oral & Maxillofacial Surgery
MD, University of Texas Southwestern Medical Center, 2000
DDS, Case Western Reserve University, 1995

Reddy, Sanjay M, Professor
Veterinary Pathobiology
PHD, University of Maryland, College Park, 1994
DVM, Andhra Pradesh Agricultural University, India, 1986

Reddy, Vanita D, Associate Professor
English
PHD, University of California, Davis, 2009

Redman, Karen S, Executive Professor
Accounting
BBA, Texas A&M University, 1980
Redwine, Tobin D, Instructional Assistant Professor
Ag Leadership, Educ & Comm
PhD, Texas A&M University, 2014

Reece, Julia S, Assistant Professor
Geology & Geophysics
PhD, University of Texas, 2011

Reece, Robert S, Associate Professor
Geology & Geophysics
PhD, The University of Texas - Austin, 2012

Reed, David W, Professor
Horticultural Sciences
PhD, Cornell University, 1979

Reed, Helen L, Professor
Aerospace Engineering
PhD, Virginia Tech, 1981

Reed, Kayla, Adjunct Assistant Professor
Dental Hygiene
MED, Texas A&M University, 2019

Reese, Roger R, Professor
History
PhD, The University of Texas, 1990

Regan, Annette Karena, Assistant Professor
Epidemiology & Biostatistics
PhD, University of Western Australia, 2016

Regan, Deborah, Clinical Associate Professor
Periodontics
DDS, University of Dublin Trinity College, 1982

Regan, Martin P, Associate Professor
Performance Studies
PhD, University of Hawai‘i at Manoa, 2006

Reger, Roxanne L, Research Assistant Professor
Molecular & Cellular Medicine
MS, Tulane University, 1986

Reid, Russell W, Instructional Associate Professor
Land Arch & Urban Planning
MAR, Texas A&M University, 2001

Reihani, Kamran, Instructional Assistant Professor
Mathematics
PhD, Tarbiat Modares University, 2005

Reilly, Peter R, Associate Professor
School of Law
JD, Harvard Law School, 1993

Reiner, David J, Associate Professor
Institute of Biosciences & Tec
PhD, University of Washington, 1996

Reinhart, Gregory D, Professor
Biochemistry & Biophysics
PhD, University of Wisconsin - Madison, 1979

Ren, Dingding, Lecturer
Land Arch & Urban Planning
MLA, Texas A&M University, 2018

Rene, Antonio A, Associate Professor
Environmental & Occptnl Hlth
PhD, University of Texas School of Public Health, 1990

Rentzepis, Peter M, Professor
Electrical & Computer Eng
PhD, University of Cambridge, 1963

Resch, Robert P, Associate Professor
History
PhD, University of California Davis, 1985

Retnanto, Albertus, Professor of the Practice
Texas A&M University at Qatar
PhD, Texas A&M University, 1998

Retteen, Aaron J, Instructional Assistant Professor
School of Law
JD, Florida State University College of Law, 2015

Reuben, Jayne S, Instructional Associate Professor
Biomedical Sciences
PHARMD, Florida A&M University, 2001

Rey, Danny, Senior Lecturer
Eng Tech & Ind Distribution
BS, Texas A&M University, 1990

Reynolds, Larry J, University Distinguished Professor
English
PhD, Duke University, 1974

Reynolds, Mollie M, Senior Lecturer
Biochemistry & Biophysics
PhD, Texas A&M University, 2010

Rholes, William S, Professor
Psychological & Brain Sciences
PhD, Princeton University, 1978

Riccio, Cynthia A, Professor
Educational Psychology
PhD, University of Georgia, 1993

Rice, Dale, Instructional Associate Professor
Communication
BA, Syracuse University, 1973

Rice, Mitchell F, Professor
Political Science
PhD, Claremont Graduate School, 1976

Rice, Sarah C, Associate Professor
Accounting
PhD, The Ohio State University, 2007
Rich, Elisabeth, Associate Professor
International Studies
PHD, University of Michigan Ann Arbor, 1985

Rich, Lisa A, Instructional Associate Professor
School of Law
JD, American University, 1998

Richard, Jacques C, Senior Lecturer
Aerospace Engineering
PHD, Rensselaer University, 1989

Richard, Jacques C, Senior Lecturer
College of Engineering
PHD, Rensselaer University, 1989

Richards, Amanda, Lecturer
Vet Small Animal Clinical Sc
DVM, Colorado State University, 2016

Richardson, Mary J, Senior Professor
Oceanography
PHD, Massachusetts Institute of Technology, 1980

Ridley, Charles R, Professor
Educational Psychology
PHD, University of Minnesota, 1978

Riechman, Steven E, Associate Professor
Health & Kinesiology
PHD, University of Pittsburgh, 2000

Riegg, Stephen B, Assistant Professor
History
PHD, The University of North Carolina at Chapel Hill, 2016

Riera-Lizarazu, Oscar, Associate Professor
Horticultural Sciences
PHD, University of Minnesota, 1996

Rife, Kimberly G, Lecturer
Teaching, Learning & Culture
MED, Texas A&M University, 2016

Riggs, Eric A, Professor
Geology & Geophysics
PHD, University of California-Riverside, 2000

Riggs, Penny K, Associate Professor
Animal Science
PHD, Texas A&M University, 1996

Righetti, Raffaella, Associate Professor
Electrical & Computer Eng
PHD, University of Houston, 2005

Rijken, Monique G, Research Associate Professor
Vet Integrative Biosciences
PHD, Leiden University, 1997

Riley, Bruce B, Professor
Biology
PHD, University of Wisconsin - Madison, 1990

Riley, David G, Professor
Animal Science
PHD, Texas A&M University, 2000

Rising, Hope Hui, Assistant Professor
Land Arch & Urban Planning
PHD, University of Oregon, 2015
MLA, University of Michigan, 2000

Riskowski, Gerald L, Professor
Biological & Agricultural Eng
PHD, Iowa State University, 1986

Rister, M E, Professor
Agricultural Economics
PHD, Michigan State University, 1981

Ritchey, Philip C, Instructional Assistant Professor
Computer Science & Engineering
PHD, Purdue University, 2015

Ritter, Nicola L, Instructional Assistant Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 2014

Rivera, Gonzalo M, Associate Professor
Veterinary Pathobiology
PHD, Cornell University, 2002
DVM, National University of Rio Cuarto, Argentina, 1988

Rivera, Hector H, Associate Professor
Educational Psychology
PHD, University of California-Santa Cruz, 2001

Rivera, Sheila M, Professor of the Practice
College of Engineering
BS, Texas A&M University, 1983

Roades, Shawn, Instructor
Naval Science
BS, Auburn University, 2014

Roark, Erin B, Associate Professor
Geography
PHD, University of California, Berkeley, 2005

Robbins, Andrew B, Visiting Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2018

Roberts, Andrea R, Assistant Professor
Land Arch & Urban Planning
PHD, University of Texas - Austin, 2016

Roberts, Cynthia G, Clinical Assistant Professor
College of Nursing
MNU, University of Texas - Tyler, 2014

Robertson, John D, Professor
Political Science
PHD, University of Illinois at Urbana - Champaign, 1979

Robertson, Raymond, Professor
International Affairs
PHD, University of Texas at Austin, 1997
Robichau, Robbie, Assistant Professor
Public Service & Administration
PHD, Arizona State University, 2013

Robinson, Elizabeth K, Instructional Professor
English
PHD, Texas A&M University, 1995

Robinson, John R, Professor
Accounting
PHD, University of Michigan, 1981
JD, University of Michigan, 1979

Robinson, Sally A, Professor
English
PHD, University of Washington, 1989

Roblyer, Dwight A, Senior Lecturer
Political Science
PHD, Texas A&M University, 2009

Roblyer, Kathleen A, Clinical Assistant Professor
College of Nursing
DNP, The University of Alabama at Birmingham, 2015

Rodgers, William S, Clinical Professor
Construction Science
JD, Texas Tech University, 1978

Rodiek, Susan D, Associate Professor
Architecture
PHD, Cardiff University, 2004

Rodrigues De Paula Lima, Heitor, Professor of the Practice
Petroleum Engineering
PHD, Texas A&M University, 1998

Rodrigues Hoffmann, Aline, Associate Professor
Veterinary Pathobiology
PHD, Texas A&M University, 2011

Rodriguez, Ignacio J, Distinguished Professor
Ocean Engineering
PHD, Colorado State University, 1967

Roelke, Daniel, Professor
Marine Biology
PHD, Texas A&M University, 1997

Rogachev, Grigory V, Professor
Physics & Astronomy
PHD, National Research Centre, 1999

Rogers Jr, Alton G, Associate Professor of the Practice
Civil Engineering
BS, Texas A&M University, 1976

Rogers, George O, Professor
Land Arch & Urban Planning
PHD, University of Pittsburgh, 1983

Rogers, James R, Associate Professor
Political Science
PHD, The University of Iowa, 1994

Rogers, Julia S, Senior Lecturer
Architecture
PHD, Texas A&M University, 1996

Rogers, Kenita S, Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 1982

Rogers, William, Professor
Ecology and Conservation Biology
PHD, Kansas State University, 1998

Rogers, William J, Lecturer
Chemical Engineering
PHD, Ohio State University, 1976

Rogovskyy, Artem S, Assistant Professor
Veterinary Pathobiology
PHD, Washington State University, 2014
DVM, National Agricultural University, 2001

Rojas, Joseph M, Professor
Computer Science & Engineering
PHD, University of California, Berkeley, 1995

Rojas, Joseph M, Professor
Mathematics
PHD, University of California, Berkeley, 1995

Rold, Michael F, Lecturer
Communication
PHD, Louisiana State University, 2014

Rollins, John W, Lecturer
George Bush School of Govern
JD, American University, 2001

Romano, Juan E, Professor
Vet Large Animal Clinical Sc
PHD, Texas A&M University, 2004
DVM, Universidad del Uruguay, 1985

Rooker, Jay R, Professor
Marine Biology
PHD, The University of Texas - Austin, 1997

Rooney, William L, Professor
Soil & Crop Sciences
PHD, University of Minnesota, 1992

Roque-Sol, Marco A, Lecturer
Mathematics
PHD, Texas A&M University, 2006

Ros, Amanda L, Clinical Associate Professor
TAMU Libraries
MLS, Florida State University, 2006

Rosen, Chelsey L, Clinical Assistant Professor
College of Nursing
MSN, University of Texas at Tyler, 2018

Rosenthal, Adam R, Assistant Professor
International Studies
PHD, Emory University, 2014
Rosenthal, Gil G, Professor
Biology
PHD, University of Texas at Austin, 2000

Ross Jr, Joseph H, Professor
Materials Science & Engr
PHD, University of Illinois at Urbana-Champaign, 1986

Ross Jr, Joseph H, Professor
Physics & Astronomy
PHD, University of Illinois at Urbana-Champaign, 1986

Ross, Andrew L, Professor
International Affairs
PHD, Cornell University, 1984

Ross, Shawna M, Assistant Professor
English
PHD, The Pennsylvania State University, 2011

Ross-Wootton, Ashley D, Assistant Professor
Marine and Coastal Environmental Science
PHD, Texas A&M University, 2010

Rossi, Marco, Assistant Professor
Finance
PHD, Pennsylvania State University, 2010

Rossman, Jeffrey A, Clinical Professor
Periodontics
DDS, University of Minnesota - Twin Cities, 1972

Rosson, Claude, Senior Professor
Agricultural Economics
PHD, Texas A&M University, 1982

Rosyn, Michael P, Professor
Chemistry
PHD, Rice University, 1972

Roth, Augusta D, Associate Professor
Maritime Transportation
DBA, Walden University, 2018

Rouleau, Brian J, Associate Professor
History
PHD, University of Pennsylvania, 2010

Roumell, Elizabeth A, Assistant Professor
 Educ Admn & Human Resource Dev
PHD, University of Wyoming, 2009

Roussel, Allen J, Professor
Vet Large Animal Clinical Sc
DVM, Louisiana State University, 1977

Rowe, Sara M, Lecturer
Communication
MA, Texas A&M University, 2012

Rowell, Eric C, Professor
Mathematics
PHD, University of California, San Diego, 2003

Rowlett, Kristen M, Instructional Associate Professor
School of Law
JD, Louisiana State University Law Center, 2013

Roy Sarkar, Tapasree, Research Assistant Professor
Biology
PHD, Purdue University, 2008

Rozier, James T, Lecturer
English
PHD, University of Mississippi, 2015

Rudd, Leeanne M, Instructional Associate Professor
Texas A&M University at Qatar
PHD, Indiana State University, 2012

Ruest, Louisbruno, Associate Professor
Biomedical Sciences
PHD, McGill University, Montreal, Canada, 2002

Ruimi, Annie, Associate Professor
Texas A&M University at Qatar
PHD, University of California at Santa Barbara, 2005

Rundell, William, Professor
Mathematics
PHD, Glasgow University, 1974

Ruoff, Lynn M, Clinical Professor
Vet Integrative Biosciences
DVM, Colorado State University, 1975

Rupley, William H, Professor
Teaching, Learning & Culture
PHD, University of Illinois at Urbana-Champaign, 1975

Russell Jr, Billy D, Distinguished Professor
Electrical & Computer Eng
PHD, University of Oklahoma, 1975

Russell, David H, Professor
Chemistry
PHD, University of Nebraska - Lincoln, 1978

Russell, Karen E, Professor
Veterinary Pathobiology
PHD, North Carolina State University, 1997
DVM, Virginia Tech, 1990

Russell, Lauren A, Clinical Assistant Professor
Vet Large Animal Clinical Sc
DVM, Atlantic Veterinary College, 2014

Russell, Richard, Lecturer
George Bush School of Govern
PHD, University of Virginia, 1997

Rusyn, Ivan I, Professor
Vet Integrative Biosciences
PHD, University of North Carolina at Chapel Hill, 2000
Rutter, Christine R, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Mississippi State University, 2003

Ruyle, Leslie E, Lecturer
International Affairs
PHD, University of Georgia, 2012

Ryan, James G, Professor
Liberal Studies
PHD, University of Notre Dame, 1981

Ryan, Kathryn J, Instructional Associate Professor
Biology
PHD, Baylor College of Medicine, 1998

Rybkowski, Zofia K, Associate Professor
Construction Science
PHD, University of California - Berkeley, 2009
MAR, Harvard University, 1991

Rye, Chavela M, Senior Lecturer
Biochemistry & Biophysics
PHD, MIT, 2014

Rye, Hays S, Associate Professor
Biochemistry & Biophysics
PHD, University of California-Berkeley, 1995

Ryoo, Boong Y, Associate Professor
Construction Science
PHD, University of Wisconsin - Madison, 1995

SIMMS, MICHELLE L, Lecturer
College of Liberal Arts
MFA, Regent University, 2015
PHD, Texas A&M University, 2011

Sabat, Isaac E, Assistant Professor
Psychological & Brain Sciences
PHD, George Mason University, 2016

Saber, Mohamed, Lecturer
Chemistry
PHD, Texas A&M University, 2013

Sabey, Tyler, Assistant Professor
Management
PHD, University of Georgia, 2020

Sacchettini, James C, Professor
Biochemistry & Biophysics
PHD, Washington University in St. Louis, 1987

Sachs, Matthew S, Professor
Biology
PHD, Massachusetts Institute of Technology, 1986

Sad, Reza, Associate Professor
Texas A&M University at Qatar
PHD, University of Utah, 2002

Safe, Stephen H, Distinguished Professor
Vet Physiology & Pharmacology
PHD, University of Oxford, 1966

Safonov, Alexei N, Professor
Physics & Astronomy
PHD, University of Florida, 2001

Sagapuram, Dina K, Assistant Professor
Industrial & Systems Eng
PHD, Purdue University, 2013

Sagapuram, Dinakar, Assistant Professor
Materials Science & Engr
PHD, Purdue University, 2013

Sakamoto, Arthur, Professor
Sociology
PHD, University of Wisconsin - Madison, 1988

Sakhaei Far, Maryam S, Assistant Professor
Civil Engineering
PHD, North Carolina State University, 2011

Salaga, Steven, Clinical Assistant Professor
Health & Kinesiology
PHD, University of Michigan, 2012

Salama, Ghada H, Instructional Associate Professor
Texas A&M University at Qatar
PHD, Cairo University, 2001

Salin, Victoria S, Professor
Agricultural Economics
PHD, Purdue University, 1996

Sampson, Sarah N, Clinical Assistant Professor
Vet Large Animal Clinical Sc
PHD, Washington State University, 2008
DVM, Washington State University, 1999

Samuel, Nephy G, Clinical Assistant Professor
College of Pharmacy
PHARMD, Texas A&M Irma Lerma Rangel College of Pharmacy, 2014

San Pedro, Joanna Maria N, Lecturer
Chemistry
PHD, Johns Hopkins University, 2014

Sanandres, Luis A, Professor
Mechanical Engineering
PHD, Texas A&M University, 1985

Sanchez Castillo, Marcelo Javier, Professor
Civil Engineering
PHD, Universidad Politecnica de Catalunya (UPC), Barcelona, Spain, 2004

Sanchez-Sinencio, Edgar, University Distinguished Professor
Electrical & Computer Eng
PHD, University of Illinois, 1973

Sanders, James O, Professor
Animal Science
PHD, Texas A&M University, 1977

Sanders, Joan T, Senior Lecturer
Accounting
MS, Texas A&M University, 1990
Sandlin, Judy R, Clinical Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 1993

Sandlin, Michael E, Clinical Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 1992

Sang, Huiyan, Professor
Statistics
PHD, Duke University, 2008

Sanger, Neil, Lecturer
Atmospheric Sciences
PHD, Naval Postgraduate School, CA, 2014

Sansom, Garrett T, Research Assistant Professor
Environmental & Occptnl Hlth
DrPH, Texas A&M University, 2016

Sansom, Roger B, Associate Professor
Philosophy & Humanities
PHD, University of North Carolina at Chapel Hill, 2002

Santana, Emilce, Visiting Assistant Professor
Sociology
PHD, Princeton University, 2019

Santander, Patricio J, Senior Lecturer
Chemistry
PHD, Texas A&M University, 1987

Santos, Adolfo, Professor
Political Science
PHD, University of Houston, 1998

Santos, Rose Anna, Adjunct Assistant Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 2013

Santschi, Peter H, Professor
Marine and Coastal Environmental Science
PHD, Universitat Bern, 1975

Saravanan, Ramalingam, Professor
Atmospheric Sciences
PHD, Princeton University, 1990

Sare, Laura A, Professor
TAMU Libraries
MLS, University of Illinois, 2003

Saric, William S, Distinguished Professor
Aerospace Engineering
PHD, Illinois Institute of Technology, 1968

Sarin, Vivek, Associate Professor
Computer Science & Engineering
PHD, University of Illinois, 1997

Saripalli, Srikanth, Professor
Mechanical Engineering
PHD, University of Southern California, 2007

Sarker, Nripendra, Senior Lecturer
Eng Tech & Ind Distribution
DEN, Texas A&M University, 1993

Sasangohar, Farzan, Assistant Professor
Industrial & Systems Eng
PHD, University of Toronto, 2015

Saslow, Wayne M, Professor
Physics & Astronomy
PHD, University of California - Irvine, 1968

Satterfield, Michael C, Associate Professor
Animal Science
PHD, Texas A&M University, 2008

Saunders, Ashley B, Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2001

Saunders, William B, Associate Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2005
DVM, Texas A&M University, 2001

Savari, Serap A, Associate Professor
Electrical & Computer Eng
PHD, Massachusetts Inst of Technology, 1996

Savell, Jeffrey W, University Distinguished Professor
Animal Science
PHD, Texas A&M University, 1978

Scallan, Elizabeth M, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Ross University School of Veterinary Medicine, 2007

Scarfuto, Jessica C, Lecturer
Civil Engineering
MS, Texas A&M University, 2014

Schade, Gunnar W, Associate Professor
Atmospheric Sciences
PHD, Johannes Gutenberg Universitat, Germany, 1997

Schaefer, Amber J, Instructional Assistant Professor
Chemistry
PHD, Rice University, 2007

Schaefer, Scott D, Professor
Computer Science & Engineering
PHD, Rice University, 2006

Schakel, David J, Instructional Assistant Professor
Health & Kinesiology
MA, Ball State University, 1978

Schartl, Manfred, Visiting Professor
Biology
PHD, University of Gießen, 1980

Schechter, David S, Professor
Petroleum Engineering
PHD, University of Bristol, 1989

Vet Physiology & Pharmacology
PHD, Texas A&M University, 1997

Stewart, Zachary D, Assistant Professor
Architecture
PHD, Columbia University, 2015

Stickney, Mark J, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1997

Stiles, Misty, Lecturer
Teaching, Learning & Culture
MED, Texas State University, 2003
Stiller, Peter F, Professor
Mathematics
PHD, Princeton University, 1977

Stillisano, Jacqueline G, Lecturer
Teaching, Learning & Culture
EDD, Ball State University, 2004

Stoinescu, Livia, Instructional Associate Professor
Visualization
PHD, Queen's University, 2010

Stoessel, Achim, Associate Professor
Oceanography
PHD, Universitat Hamburg, 1990

Stokes, Charity, Assistant Professor
TAMU Libraries
MLS, University of North Texas, 1997

Stoleru, Radu, Professor
Computer Science & Engineering
PHD, University of Virginia, 2007

Stough, Laura M, Professor
Educational Psychology
PHD, University of Texas, 1993

Stover, Patrick, Professor
Biochemistry & Biophysics
PHD, Virginia Commonwealth University, 1990

Straight, Paul D, Associate Professor
Biochemistry & Biophysics
PHD, University of Colorado, 2000

Stranges, Anthony N, Associate Professor
History
PHD, University of Wisconsin - Madison, 1977

Straube, Emil J, Professor
Mathematics
PHD, Swiss Federal Institute of Technology Zurich, 1983

Straw, Chase, Assistant Professor
Soil & Crop Sciences
PHD, University of Georgia, 2017

Strawser, Jerry R, Professor
Accounting
PHD, Texas A&M University, 1985

Strawser, Robert H, Professor
Accounting
DBA, University of Maryland, 1969

Street Jr, Richard L, Professor
Communication
PHD, The University of Texas at Austin, 1980

Street, Nancy A, Instructional Professor
Communication
MA, University of Texas, 1980

Strganac, Thomas W, Professor
Aerospace Engineering
PHD, Virginia Tech, 1987

Strickland, Jack, Adjunct Professor
School of Law
JD, The University of Texas School of Law, 1971

Strigari, Louis E, Associate Professor
Physics & Astronomy
PHD, Ohio State University, 2005

Stringfellow, Joan E, Instructional Associate Professor
School of Law
MLS, University of North Texas, 2002

Strong Jr, Robert L, Associate Professor
Ag Leadership, Educ & Comm
PHD, University of Florida, 2010

Strong, Jennifer R, Associate Professor
Ag Leadership, Educ & Comm
PHD, Oklahoma State University, 2007

Strong, Jennifer R, Associate Professor
Recreation, Park & Tourism Sc
PHD, University of Florida, 2000

Strong, Jennifer R, Associate Professor
Aerospace Engineering
PHD, University of Texas - Austin, 1986

Struminger, Rhonda, Assistant Professor of the Practice
Ecology and Conservation Biology
PHD, Texas A&M University, 2013

Stuber, Sarah, Assistant Professor
Accounting
PHD, Michigan State University, 2019

Stucki, Kenzie, Lecturer
College of Nursing
MSN, Western Governors University, 2018

Su, Hung-Jue, Professor
Materials Science & Engr
PHD, University of Michigan - Ann Arbor, 1988

Su, Hung-Jue, Professor
Mechanical Engineering
PHD, University of Michigan - Ann Arbor, 1988

Subashchandrabose, Sargununathan, Assistant Professor
Veterinary Pathobiology
PHD, Michigan State University, 2011
BVSc, Madras Veterinary College Tamil Nadu Veterinary and Animal Sciences University, 2005

Subbarao, Suhasini T, Professor
Statistics
PHD, University of Bristol, 2001
Subramanian, Rahul, Lecturer
Ocean Engineering
PHD, University of Michigan, 2012

Suchodolski, Jan, Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2005

Sudderth, Bonnie, Adjunct Professor
School of Law
JD, The University of Texas School of Law, 1985

Sudduth, Albert S, Adjunct Professor
School of Law
JD, Catholic University of America, 1989

Sueda, Shinjiro, Assistant Professor
Computer Science & Engineering
PHD, University of British Columbia, 2010

Suen Ching-Yun, Professor
Foundational Sciences
PHD, University of Houston, 1983

Suermann, Patrick C, Associate Professor
Construction Science
PHD, University of Florida, 2009

Suess Raeisinafchi, Courtney, Assistant Professor
Recreation, Park & Tourism Sc
PHD, University of Nevada, Las Vegas, 2014

Suh, Chii-Der, Associate Professor
Mechanical Engineering
PHD, Texas A&M University, 1997

Suh, Sang Jin, Associate Professor
Biomedical Sciences
PHD, University of Wisconsin, Madison, WI., 1994

Sukhishvili, Svetlana A, Professor
Materials Science & Engr
PHD, Lomonosov Moscow State University, 1989

Sullenger, Paula A, Associate Professor
TAMU Libraries
MLS, University of North Carolina at Chapel Hill, 1992

Sullins, Donna, Instructional Assistant Professor
Recreation, Park & Tourism Sc
EDD, University of Georgia, 2016

Sullivan Jr, Harry W, Executive Professor
School of Law
JD, Louisiana State Law School, 1976

Sullivan, Ronald D, Lecturer
Public Service & Administration
JD, University of Kansas, 2014

Sullivan, Seth C, Lecturer
College of Engineering
MBA, University of Texas San Antonio, 2011

Sullivan, Thomas D, Assistant Professor
TAMU Libraries
MLS, Queens College, 2010

Sumpter, Randall S, Associate Professor
Communication
PHD, University of Texas, 1996

Sun, Deqiang, Assistant Professor
Institute of Biosciences & Tec
PHD, Texas A&M University, 2009

Sun, Qing, Assistant Professor
Chemical Engineering
PHD, University of Delaware, 2010

Sun, Yuefeng, Professor
Geology & Geophysics
PHD, Columbia University, 1994

Sun, Yuefeng, Professor
Petroleum Engineering
PHD, Columbia University, 1994

Sun, Yuxiang, Associate Professor
Nutrition
PHD, University of Manitoba, 2000

Suntzeff, Nicholas B, University Distinguished Professor
Physics & Astronomy
PHD, University of California - Santa Cruz, 1980

Sutherland, Susan D, Lecturer
Visualization
MA, UNIVERSITY OF WISCONSIN - MADISON, 1994

Suva, Larry J, Professor
Vet Physiology & Pharmacology
PHD, The University of Melbourne, 1992

Suzuki, Kazuko, Associate Professor
Sociology
PHD, Princeton University, 2003

Svoboda, Kathy K, Regents Professor
Biomedical Sciences
PHD, University of Nebraska Medical Center, 1982

Sweany, Noelle W, Clinical Professor
Educational Psychology
PHD, University of Texas at Austin, 1999

Sweet, Kristi, Associate Professor
Philosophy & Humanities
PHD, Loyola University, Chicago, 2006

Sweetman, John A, Professor
Ocean Engineering
PHD, Stanford University, 2001

Swim Jr, Keith D, Clinical Associate Professor
Management
JD, Texas Tech University, 1980

Materials Science & Engr  
PHD, Duke University, 2017

Tucker-Drob, Robin D, Associate Professor  
Mathematics  
PHD, California Institute of Technology, 2013

Tuhkanen, Mikko J, Professor  
English  
PHD, University at Buffalo, 2005

Tunnell, John C, Adjunct Assistant Professor  
Periodontics  
DDS, Baylor College of Dentistry, 2016

Tuo, Rui, Assistant Professor  
Industrial & Systems Eng  
PHD, Chinese Academy of Sciences, 2013

Turnbow, Sonia L, Clinical Assistant Professor  
College of Nursing  
MNU, The University of Texas at El Paso, 1995

Turner, Kenneth E, Lab Instructor  
Veterinary Pathobiology  
DVM, University of Pennsylvania, 1992

Tyagi, Aakash, Professor of the Practice  
Computer Science & Engineering  
PHD, University of Louisiana, 1993

Tyler Jr, John E, Senior Lecturer  
Electrical & Computer Eng  
MS, University of Central Texas, 1979

Tzortzakis, Stylianos, Professor  
Texas A&M University at Qatar  
PHD, Ecole Polytechnique, France, 2001

Ugaz, Ana G, Associate Professor  
TAMU Libraries  
MLS, Dominican University, 1999

Ugaz, Victor M, Professor  
Biomedical Engineering  
PHD, Northwestern University, 1999

Umorin, Mikhail P, Instructional Assistant Professor  
Biomedical Sciences  
PHD, Baylor University, 2006

Unterman, Katherine R, Associate Professor  
History  
PHD, Yale University, 2011

Ura, Joseph, Associate Professor  
Texas A&M University at Qatar  
PHD, University of North Carolina Chapel Hill, 2006

Ura, Joseph D, Professor  
Political Science  
PHD, University of North Carolina Chapel Hill, 2006

Ureta, Manuelita, Associate Professor  
Economics  
PHD, UCLA, 1987

Utterback, Virginia A, Associate Professor  
College of Nursing  
PHD, Texas Tech University, 2010

Vaaler, Alyson S, Assistant Professor  
TAMU Libraries  
MLS, University of Wisconsin, 2013

Vadali, Sharada, Senior Lecturer  
Eng Tech & Ind Distribution  
PHD, Texas A&M University, 1996

Vadali, Srinivas R, Professor  
Aerospace Engineering  
PHD, Virginia Tech, 1983

Vaddiraju, Sreram, Associate Professor  
Chemical Engineering  
PHD, University of Louisville, 2006

Vaddiraju, Sreram, Associate Professor  
Materials Science & Engr  
PHD, University of Louisville, 2006

Vaghetto, Rodolfo, Research Assistant Professor  
Nuclear Engineering  
PHD, Texas A&M University, 2013

Vahdat Zad, Vahid, Visiting Lecturer  
Architecture  
PHD, Texas A&M University, 2014

Vaid, Jyotsna, Professor  
Psychological & Brain Sciences  
PHD, McGill University, 1982

Valant, John R, Adjunct Assistant Professor  
Orthodontics  
DDS, Loyola University, Chicago, 1979

Valasek, John L, Professor  
Aerospace Engineering  
PHD, University of Kansas, 1995

Valdez Flores, Ciriaco, Professor of the Practice  
Industrial & Systems Eng  
PHD, Texas A&M University, 1987

Vales, Maria Isabel, Associate Professor  
Horticultural Sciences  
PHD, University of Vigo, Spain, 1996

Vallone, Jessica M, Clinical Assistant Professor  
Vet Large Animal Clinical Sc  
DVM, Mississippi State University, 2012

Vallone, Lucien V, Clinical Assistant Professor  
Vet Small Animal Clinical Sc  
DVM, Mississippi State University, 2011
Van De Logt, Martinus J, Associate Professor
Texas A&M University at Qatar
PHD, Oklahoma State University, 2002

Van Hengstum, Peter J, Associate Professor
Marine and Coastal Environmental Science
PHD, Dalhousie University, Canada, 2011

Van Zandt, Shannon S, Professor
Land Arch & Urban Planning
PHD, University of North Carolina at Chapel Hill, 2004

Van, Suzanne M, Clinical Assistant Professor
College of Nursing
MNU, University of Texas at El Paso, 2014

Vanalstyne, John A, Executive Professor
College of Business
MS, Department of the Army, 1976

Vanduinkerken, Wyoma R, Professor
TAMU Libraries
MLS, University of Illinois, 2000

Vanegas, Jorge A, Professor
Architecture
PHD, Stanford University, 1988

Varadarajan, Poondi, Distinguished Professor
Marketing
PHD, University of Massachusetts Amherst, 1979

Vargas, Sylvia, Clinical Assistant Professor
College of Nursing
MNU, Texas A&M University Corpus Christi, 2013

Varghese, Adel, Instructional Associate Professor
Economics
PHD, University of Pennsylvania, 1996

Vargo, Edward L, Professor
Entomology
PHD, University of Georgia, Athens, 1986

Varner, Dickson D, Professor
Vet Large Animal Clinical Sc
DVM, University of Missouri, 1978

Varner, Gary E, Professor
Philosophy & Humanities
PHD, University of Wisconsin - madison, 1988

Vasilakis, Apostolos, Instructional Associate Professor
English
PHD, Emory University, 2004

Vassar, William, Adjunct Professor
School of Law
JD, University of Oklahoma School of Law, 2002

Vaught, David J, Professor
History
PHD, University of California, Davis, 1997

Vazquez, Jose A, Senior Lecturer
Industrial & Systems Eng
MA, University of Iowa, 1986

Vechan, Ryan J, Assistant Professor of the Practice
Maritime Transportation
JD, University of Houston, 2014

Vechot, Luc N, Associate Professor
Texas A&M University at Qatar
PHD, Ecole Nationale Superieure des Mines de Saint Etienne, France, 2007

Vedenov, Dmitry, Associate Professor
Agricultural Economics
PHD, Ohio State University, 2001

Vedlitz, Arnold, Professor
Public Service & Administration
PHD, University of Houston, 1975

Vela, Carmen G, Clinical Assistant Professor
College of Nursing
DNP, American Sentinel University, 2018

Veldman, Joseph, Assistant Professor
Ecology and Conservation Biology
PHD, University of Florida, 2010

Veldman, Robin, Assistant Professor
College of Liberal Arts
PHD, University of Florida, 2018

Velez, Rodrigo A, Associate Professor
Economics
PHD, University of Rochester, 2009

Vemulapalli, Ramesh, Professor
Veterinary Pathobiology
PHD, University of Maryland, 1996
BVSc, Andhra Pradesh Agricultural University, India, 1986

Vemulapalli, Tracy H, Clinical Associate Professor
Veterinary Pathobiology
DVM, Virginia-Maryland Regional College of Veterinary Medicine, 1998

Venkatraj, Vijayanagaram S, Clinical Associate Professor
Vet Integrative Biosciences
PHD, New York University, 1992

Ventura, Emanuele, Visiting Assistant Professor
Mathematics
PHD, Aalto University, 2017

Verduzco Jr, Rene A, Clinical Assistant Professor
College of Pharmacy
PHARMD, The University of Texas Health Science Center at Houston, 2011

Verhoef, Aart, Assistant Professor
Soil & Crop Sciences
PHD, Ludwig-Maximilians-Universität München, 2007

Versaw, Wayne K, Professor
Biology
PHD, University of Wisconsin - Madison, 1995
Vess, Matthew K, Associate Professor  
Psychological & Brain Sciences  
PHD, University of Missouri, 2010

Vestal, Evan D, Senior Lecturer  
Eng Tech & Ind Distribution  
MBA, Sam Houston State University, 1998

Vidakovic, Branišlav, Professor  
Statistics  
PHD, Purdue University, 1992

Vieira-De-Castro, Luis, Professor  
Anthropology  
PHD, Texas A&M University, 2001

Vilaros, Teresa M, Professor  
Hispanic Studies  
PHD, University of Georgia, 1989

Villalobos, Jose R, Associate Professor  
Hispanic Studies  
PHD, University of California Irvine, 1998

Villareal, Samuel S, Senior Lecturer  
Electrical & Computer Eng  
PHD, Texas A&M University, 1999

Vina, Stephen R, Adjunct Professor  
School of Law  
JD, Texas Wesleyan University School of Law, 2001

Vinayak, Fnu, Assistant Professor  
Mechanical Engineering  
PHD, Purdue University, 2016

Viruru, Radhika, Clinical Professor  
Teaching, Learning & Culture  
PHD, Texas A&M University, 1998

Viser, Victor J, Instructional Associate Professor  
Liberal Studies  
PHD, Temple University, 1995

Vishnubhat, Saurabh, Associate Professor  
School of Law  
JD, University of New Hampshire School of Law, 2010  
LLM, University of New Hampshire School of Law, 2010

Voelker, Gary, Professor  
Ecology and Conservation Biology  
PHD, University of Washington, 1998

Voges Gariepy, Andra-Kay, Clinical Professor  
Vet Large Animal Clinical Sc  
DVM, Texas A&M University, 1991

Volcic, Jurij, Visiting Assistant Professor  
Mathematics  
PHD, University of Auckland, 2018

Von Conten, William, Adjunct Professor  
Petroleum Engineering  
BS, Texas A&M University, 1988

Von Vacano, Diego A, Professor  
Political Science  
PHD, Princeton University, 2003

Voneiff, George W, Professor of the Practice  
Petroleum Engineering  
MS, Texas A&M University, 1992

Vorobets, Mariya, Instructional Assistant Professor  
Mathematics  
PHD, Lviv National University, 2004

Vorobets, Yaroslav, Associate Professor  
Mathematics  
PHD, Moscow Lomonosov State University, 1998

Vu, Mary T, Clinical Assistant Professor  
Dental Hygiene  
MS, Texas A&M University Baylor College of Dentistry, 2013

Waas, Jack R, Senior Lecturer  
Chemistry  
PHD, University of Michigan, 1997

Waer, Richard, Associate Professor of the Practice  
Nuclear Engineering  
BS, The University of Arizona, 1989

Wagner, Lisa, Lecturer  
College of Nursing  
MPH, University of Texas Health Science Center at Houston, 2018

Waite, Lucy J, Instructional Associate Professor  
Health & Kinesiology  
CERT, Athletics and Fitness Associations of America, 2019

Walewski, John A, Associate Professor of the Practice  
Civil Engineering  
PHD, University of Texas, 2005

Walichowski, Miranda F, Clinical Associate Professor  
Educational Psychology  
PHD, Texas A&M University, 2009

Walker, Duncan M, Professor  
Computer Science & Engineering  
PHD, Carnegie Mellon University, 1986

Wallace, David Shane, Lecturer  
Liberal Studies  
PHD, Louisiana State University, 2011
Wallace, James P, Lecturer
Eng Tech & Ind Distribution
MS, Texas A&M University, 1993

Wallace, William D, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2009

Wallis, Cara J, Associate Professor
Communication
PHD, University of Southern California, 2008

Walsh, Alexandra, Assistant Professor
Biomedical Engineering
PHD, Vanderbilt University, 2015

Walsh, Jonelle L, Assistant Professor
Physics & Astronomy
PHD, University of California, Irvine, 2011

Walsh, Michael, Associate Professor of the Practice
Mechanical Engineering
MFA, University of Southern California, 2001

Waltemyer, David S, Clinical Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2006

Walther, David R, Assistant Lecturer
Ag Leadership, Educ & Comm
MS, Texas Tech University, 2011

Waltz, Micah J, Lecturer
Vet Integrative Biosciences
MS, West Virginia University, 2014

Walzem, Rosemary L, Professor
Poultry Science
PHD, University of California, Davis, 1987

Wang, Dechun, Professor
Accounting
PHD, University of Missouri - Columbia, 2004

Wang, Fen, Professor
Institute of Biosciences & Tec
PHD, Clarkson University, 1994

Wang, Fengming, Clinical Assistant Professor
Endodontics
PHD, West China College of Stomatology, 2006

Wang, Jia, Professor
Educ Admn & Human Resource Dev
PHD, University of Georgia, 2004

Wang, Jun, Assistant Professor
Recreation, Park & Tourism Sc
PHD, Colorado State University, 2013

Wang, Jyhwen, Professor
Eng Tech & Ind Distribution
PHD, Northwestern University, 1991

Wang, Lifan, Professor
Physics & Astronomy
PHD, University of Science and Technology of China, 1993

Wang, Ping, Associate Professor
Maritime Business Administration
PHD, The Ohio State University, 2007

Wang, Qian, Associate Professor
Biomedical Sciences
PHD, Chinese Academy of Sciences, 1998

Wang, Shiren, Associate Professor
Industrial & Systems Eng
PHD, Florida State University, 2006

Wang, Suojin, Professor
Statistics
PHD, University of Texas at Austin, 1988

Wang, Tiandong, Assistant Professor
Statistics
PHD, Cornell University, 2019

Wang, Xiaofang, Associate Professor
Biomedical Sciences
DDS, Fourth Military Medical University, China, 2003

Wang, Xiubin B, Professor
Civil Engineering
PHD, University of California, Irvine, 2001

Wang, Xuan, Instructional Assistant Professor
College of Science
PHD, Texas A&M University, 2016

Wang, Ya, Associate Professor
Mechanical Engineering
PHD, Virginia Tech, 2012

Wang, Yen J, Instructional Assistant Professor
Industrial & Systems Eng
DEN, Northwestern University, 1991

Ward Ober, Elizabeth S, Research Professor
Molecular & Cellular Medicine
PHD, University of Cambridge, 1985
Ward, Joseph D, Professor
Mathematics
PHD, Indiana University, 1973

Ward, Ronald G, Senior Lecturer
Computer Science & Engineering
PHD, Texas A&M University, 1973

Ward, Sherry D, Instructional Assistant Professor
Texas A&M University at Qatar
MS, The School for International Training, 1998

Warden, Robert R, Professor
Architecture
MAR, Texas A&M University, 1986

Ware, Michael L, Adjunct Professor
School of Law
JD, University of Houston Law Center, 1983

Waren, Warren P, Instructional Associate Professor
Sociology
PHD, Texas A&M University, 2008

Weare Jr, William H, Assistant Professor
TAMU Libraries
MLS, University of Iowa, 2004

Webb, Debra, Lecturer
Agricultural Economics
MS, Texas A&M University, 1986

Waters, Michael R, University Distinguished Professor
Anthropology
PHD, The University of Arizona, 1980

Waterworth, Leonard D, Executive Professor
Maritime Business Administration
MS, US Army War College, 2000

Watkins, Jeffrey P, Professor
Vet Large Animal Clinical Sc
DVM, Kansas State University, 1980

Watson, Karan L, Senior Professor
Electrical & Computer Eng
PHD, Texas Tech University, 1982

Watson, Nancy T, Clinical Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 1998

Watson, Wesley, Lecturer
Ecology and Conservation Biology
PHD, Texas A&M University, 1999

Watts, Ashlee E, Associate Professor
Vet Large Animal Clinical Sc
DVM, Colorado State University, 2003

Watts, John, Associate Professor
TAMU Libraries
MLS, Indiana University, 2009

Watzak, Bree C, Clinical Associate Professor
College of Pharmacy
PHD, University of Houston College of Pharmacy, 2008

Waxman, Hersholt C, Professor
Teaching, Learning & Culture
PHD, University of Illinois at Chicago, 1982

Weary, Katherine T, Assistant Professor of the Practice
International Affairs
MA, The George Washington University, 2005

Weaver, Andy, Lecturer
Accounting
MS, Texas A&M University, 1987

Weaver, Constance D, Professor
Accounting
PHD, Arizona State University, 1997

Family Educational Rights and Privacy Act

Texas A&M University informs students annually of the Family Educational Rights and Privacy Act. This Act, with which the University intends to comply fully, is intended to protect the privacy of education records, to establish the rights of students to inspect and review their education records and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family Policy Compliance Office of the Department of Education in Washington, D.C. concerning alleged failures by the University to comply with the Act.

The Family Educational Rights and Privacy Act (FERPA) is a federal law that provides minimum standards for the management of student education records for universities receiving funds made available under any federal program administered by the U.S. Commissioner of Education. The Act provides, among other things, that an institution will maintain the confidentiality of student education records, and students will have the right to inspect their own education records.

This Policy is designed to meet FERPA provisions. Texas A&M University is committed to the good faith implementation of this Policy. Questions may be emailed to ferpa@tamu.edu.

If a student, the parent of a student, or any other individual has a complaint that an official of the University is violating FERPA, and the complaint cannot be satisfactorily resolved within the University, that complaint that an official of the University is violating FERPA, and the complaint cannot be satisfactorily resolved within the University, that complaint to the Family Policy Compliance Office of the Department of Education in Washington, D.C. concerning alleged failures by the University to comply with the Act.

There is a right to inspect and review, with certain limited exceptions, the right to receive explanations and interpretations of the records and to obtain copies of the records when such are needed to allow the student to effectively exercise his/her right of inspection and review. Conduct files maintained by the Student Conduct Office will be administered under its rules.

The right to inspect and review, with certain limited exceptions, the student’s educational records, including the right to receive explanations and interpretations of the records and to obtain copies of the records when such are needed to allow the student to effectively exercise his/her right of inspection and review. Conduct files maintained by the Student Conduct Office will be administered under its rules.

1. The right to inspect and review, with certain limited exceptions, the student’s educational records, including the right to receive explanations and interpretations of the records and to obtain copies of the records when such are needed to allow the student to effectively exercise his/her right of inspection and review. Conduct files maintained by the Student Conduct Office will be administered under its rules.

2. Consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

One exception which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person or entity: (a) employed by the university or the university system in an administrative, supervisory, academic or research, or support staff position; (b) serving on a university governing body or duly authorized panel or committee; or (c) employed by or under contract to the university to perform a special task, function, or service for the university.

A school official has a legitimate educational interest if the information requested is necessary for that official to (a) perform appropriate tasks that are specified in his/her position description or in the performance of regularly assigned duties by a lawful supervisor; (b)
fulfill the terms of a contractual agreement; (c) perform a task related to a student’s education; (d) perform a task related to the discipline of a student; or (e) provide a service or benefit relating to the student or student's family, such as health care, counseling, financial aid, job placement, or former student-related activities.

Disclosure to a school official having a legitimate educational interest does not constitute university authorization to transmit, share, or disclose any or all information received to third parties unless such disclosure is permitted or required by law.

3. the right to correct a student's education records when the records are inaccurate, misleading or otherwise in violation of FERPA;

4. the right to report violations of FERPA to the Department of Education;

5. the right to be informed about FERPA rights.

All the rights and protections given students under FERPA belong to the student. However, information in student records may be provided to parents/legal guardians without the written consent of the student if the eligible student is a financial dependent of his or her parents/legal guardians as defined under Section 152 of the Internal Revenue Code of 1954.

**Records Not Available for Information and Review**

Students shall have access to all education records concerning them maintained by the University with the exception of the following:

1. A personal record kept by a university faculty or staff member which meets the following tests:
   a. It is in the personal possession of the individual who made it.
   b. Information contained in it has never been revealed or made available to any other person except the maker's temporary substitute.

2. An employment record which is used in relation to a student's employment by the University, except where an individual in attendance at the University is employed as a result of his or her status as a student.

3. Records relating to a student which are created or maintained by a physician, psychiatrist, psychologist or other recognized professional or para-professional acting in his or her professional or para-professional capacity or assisting in that capacity which are used in connection with the provision of treatment to a student and are not disclosed to anyone other than the individuals providing the treatment.

4. Financial records and statements of a student's parents.

5. Confidential letters and statements of recommendation which were placed in the education records of a student prior to January 1, 1975.

6. Confidential letters and statements of recommendation which were placed in the education records of a student on or after January 1, 1975, if the student has waived his or her right to inspect and review the letters or statements.

7. Records concerning admissions to an academic component of the University which the student has never attended.

Any questions concerning FERPA should be directed to the Office of the Registrar.

---

**Hazing Law Summary (Education Code)**

Education Code § 51.936 requirement to publish a summary of Education Code Ch. 37, subchapter F. Hazing in the University Catalog

The following is a summary of Chapter 37, subchapter F. (§§ 37.151-157) of the Texas Education Code, which prohibits hazing in Texas public or private high schools. Texas Education Code §51.936 applies Ch. 37's prohibition on hazing to institutions of higher education. This summary of Chapter 37 is provided as required by § 51.936(d).

**Summary**

Hazing is a criminal violation under Texas law. A person may be found guilty of criminal conduct for haz ing, encouraging hazing, permitting hazing, or having knowledge of the planning of hazing incidents and failure to report in writing his/her knowledge to the Dean of Students.

Both failing to report hazing and hazing that does not result in serious bodily injury are Class B misdemeanors. Hazing that results in serious bodily injury is a Class A misdemeanor. Hazing resulting in a death is a state jail felony. An organization found guilty of hazing may be fined $5,000 to $10,000 or, for incidents causing personal injury or property damage, an amount double the loss or expenses incurred because of the hazing incident. It is not a defense to prosecution that the person hazed consented to the hazing activity.

Any person reporting a specific hazing incident to the Dean of Students or other appropriate institutional official is immune from civil and criminal liability unless the report is in bad faith or malicious.

The state law does not limit or affect an educational institution's right to enforce its own penalties against hazing.

The Education Code defines hazing as "any intentional, knowing, or reckless act occurring on or off the campus of an educational institution, by one person or acting with others, directed against a student for the purpose of pledging, being initiated into, affiliating with, holding office in, or maintaining membership in an organization." The statute contains a list of conduct which constitutes hazing.

In order to report suspected incidents of hazing, contact the Office of the Dean of Student Life or the police department at your respective campus.

International Agreements

To promote the internationalization of the University and create significant global opportunities for our students and faculty, Texas A&M has active, formal agreements with foreign institutions as well as Reciprocal Educational Exchange Programs (REEP). For information regarding international partnerships, visit the Global Partnership Services (http://globalsupport.tamu.edu/) website, call Public Partnership & Outreach at 979.862.6700, or email globalsupport@tamu.edu. For updated information on global engagement or to search a real-time database for active agreements, please visit globalsupport.tamu.edu (http://globalsupport.tamu.edu/).

In compliance with federal law, the following information is maintained and available for Texas A&M University and its separate campuses through the Clery Annual Reports webpage on the Texas A&M University Office of Risk, Ethics, and Compliance website. The Texas A&M University Annual Security Reports and Annual Fire Safety Reports are available and include information on campus safety and security policies and statistics. Examples of policies include: reporting crimes and emergencies, descriptions of campus law enforcement, health and safety notifications, crime awareness and prevention, security of campus facilities and residence halls, alcohol and drug policies, policies and programs to prevent sexual assault and other crimes, related disciplinary procedures, and fire safety systems and policies for on-campus student housing facilities.

The Annual Security Reports and Annual Fire Safety Reports can be found at: https://urc.tamu.edu/clery-act/clery-annual-reports/ (http://urc.tamu.edu/clery-act/clery-annual-reports/).

For a paper copy of the reports, please contact the respective campus as indicated in the following: https://urc.tamu.edu/media/519551/notification_security_fire_reports.pdf (http://urc.tamu.edu/media/519551/notification_security_fire_reports.pdf).

**Notification for Students Pursuing an Occupational License**

Please be advised that Texas A&M offers many programs that lead to an occupational license as defined under Texas Occupations Code 58.001. Licensing authorities may have guidelines concerning prior criminal convictions that would make an individual ineligible for issuance of a given license. Applicants are encouraged to review all eligibility requirements related to degrees resulting in a license. Note the following:
• An individual who has been convicted of an offense may be ineligible for issuance of an occupational license.
• Licensing authorities must establish and make available guidelines explaining why a particular offense is considered a basis for ineligibility for a particular license and other criterion that may affect the decision to grant or withhold a license.
• Local or county licensing authorities may establish additional guidelines related to criminal history. Applicants should contact their local or county licensing authority for more information.
• An individual has the right to request a criminal history evaluation letter regarding their eligibility for a license issued under Texas Occupations Code 53.102.
• Questions related to eligibility requirements should be directed to the individual licensing authorities.

Oak Ridge Associated Universities (ORAU)

Oak Ridge Associated Universities

Since 1950, students and faculty of Texas A&M University and its branch campuses have benefited from membership in Oak Ridge Associated Universities (ORAU). ORAU provides innovative scientific and technical solutions to advance national priorities in science, education, security, and health. Through specialized teams of experts, unique laboratory capabilities, and a consortium of more than 100 PhD-granting universities, ORAU works with federal, state, local, and commercial organizations to advance national priorities and serve the public interest.

ORAU operates the Oak Ridge Institute for Science and Education (ORISE), a Department of Energy (DOE) asset that is dedicated to enabling critical scientific research and health initiatives of the department and its laboratory system by providing world class expertise in science, technology, engineering, and math (STEM) workforce development; scientific and technical reviews; and the evaluation of radiation exposure and environmental contamination. For more than 30 years, ORISE has provided technical assistance to the DOE Human Subjects Protection Program, and most recently, played an integral role in the successful Association for the Accreditation of Human Research Protection Programs (AAHRPP) accreditation. ORISE administers a broad range of internships, fellowships, and research experiences available primarily to those pursuing STEM disciplines. Programs are offered at DOE national laboratories and other federal agencies with research facilities located across the country as well as some locations outside the United States.

ORAU actively works with its member universities to connect their expertise with government and private sector organizations and to create meaningful partnerships for innovation in scientific research and education. ORAU’s research footprint includes working with their university consortium members through the ORAU-Directed Research and Development (ODRD) program and administering short-term research experiences at national laboratories and other federal research facilities across the country. The ODRD program provides a path for funding innovative research-based approaches/solutions that fall within the intersection of ORAU’s core capabilities and its member universities research interests.

For more information about ORAU and its programs, visit www.orau.org (http://www.orau.org/) or contact:

Jack Baldauf

Senior Associate Vice President for Research
ORAU Councilor for Texas A&M University
(979) 845-8585

Rules and Regulations for Determining Residence Status

Determination of Residency for Tuition Purposes

In accordance with Texas Higher Education Coordinating Board Rules and pursuant to Texas Education Code, a student’s status as a resident, nonresident, or international (foreign) student for tuition purposes will be determined in the Office of Admissions prior to enrollment. Students must be prepared to pay tuition and other required fees by specified due dates.

Students with a status of permanent resident of the United States are not automatically eligible as a Texas state resident for tuition purposes.

Students who have knowledge of an error in their residency status for tuition purposes are responsible for notifying the Office of the Registrar and may be required to submit the Core Residency Questions form, which is available for download on the Office of the Registrar (http://registrar.tamu.edu) website in order to amend their status.

Questions should be directed to the Residency Officer at (979) 845-1085 or email residency@tamu.edu. Complete rules and regulations are available on the Texas Higher Education Coordinating Board website.

Texas Common Course Numbering System

The Texas Common Course Numbering System (TCCNS) has been designed for the purpose of aiding students in the transfer of general academic courses between colleges and universities throughout Texas. Common courses are freshman and sophomore academic credit courses that have been identified as common by institutions that are members of the common course numbering system. The system ensures that if the student takes the courses the receiving institution designates as common, then the courses will be accepted in transfer and the credit will be treated as if the courses had actually been taken on the receiving institution's campus.

The table below lists the courses Texas A&M has identified as common and their TCCNS equivalents. Before using this table students should be sure that the institution they attend employs the TCCNS.

This table is revised quarterly in January, March, June, and September. The most recent version may be obtained from the Office of Admissions or you may visit the Transfer Course Equivalency website (https://compassxe-ssb.tamu.edu/HCA/ssb/transferCourseEquivalency/#!/).

Nuclear Engineering - BS ....................................................................... 470
Nuclear Engineering - Minor .................................................................. 472
NUEN - Nuclear Engineering (NUEN) .................................................. 1095
NURS - Nursing (NURS) ..................................................................... 1097
Nursing - BSN, RN to BSN Track ........................................................... 668
Nursing - BSN, Second Degree BSN Track ......................................... 669
Nursing - BSN, Traditional BSN ............................................................ 670
Nutrition .................................................................................................. 192
Nutrition - BS, Didactic Program in Dietetics Track ............................... 193
Nutrition - BS, General Nutrition Track ................................................. 194
Nutrition - BS, Molecular and Experimental Track ................................ 196
NVSC - Naval Science (NVSC) .............................................................. 1100
O
Oak Ridge Associated Universities (ORAU) ........................................... 1305
Occupational Health and Safety - Minor ........................................... 678
Ocean Engineering ................................................................. 472
Ocean Engineering - BS ......................................................... 474
Oceanography ................................................................. 520
Oceanography - BS, Marine Ecosystem Science and Health Track .... 521
Oceanography - BS, Ocean Climate Track .................................. 522
Oceanography - BS, Ocean Observing Science and Technology Track .. 523
Oceanography - BS/MOST, Marine Ecosystem Science and Health Track 3+2 Program ......................................................... 524
Oceanography - BS/MOST, Ocean Climate Track 3+2 Program ........ 526
Oceanography - BS/MOST, Ocean Observing Science and Technology Track 3+2 Program ......................................................... 527
Oceanography - Minor ........................................................... 528
OCEN - Ocean Engineering (OCEN) ......................................... 1101
OCNG - Oceanography (OCNG) ........................................... 1104
OCRE Ocean & Coastal Resources (OCRE) ................................ 1105
Orientation ................................................................. 83

P
Park and Natural Resource Management - Minor ......................... 221
Parks and Conservation - Certificate .......................................... 224
PERF - Performance Studies (PERF) ...................................... 1105
Performance Studies ............................................................. 623
Performance Studies - BA ..................................................... 624
Performance Studies - Minor .................................................. 626
PETE - Petroleum Engineering (PETE) .................................... 1107
Petroleum Engineering .......................................................... 475
Petroleum Engineering - BS .................................................. 477
Petroleum Engineering - BS .................................................. 867
Petroleum Engineering - Minor ............................................. 479
Petroleum Engineering Program ........................................... 867
Petroleum Ventures - Certificate ............................................ 479
