3. Graduates will understand the importance of life-long learning to adapt to new technologies, tools, and methodologies with the ability to respond to a changing world.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering,
biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

</table>

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.
4. BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

5. For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

Program Requirements

The mission of the Computing program at Texas A&M University is to prepare intellectual, professional, and ethical graduates, capable of meeting the diverse and changing challenges in the field of computing.

Total Program Hours 126
Computing - BA

The Bachelor of Arts degree with a major in Computing provides students with the opportunity to obtain computing knowledge and skills to be coupled with their non-computing interests in a wide variety of areas such as liberal arts, science, education, business, data science, robotics, etc. The degree allows students to build up strong computational fundamentals that are custom-fit to domains of interest that require such skills. The degree program is designed to provide flexibility in the choice of courses, both in computing and in the students’ field of interest, so that students, after graduation, can have a broader range of career options, both in industry and in academia, reflecting the increasing demand for interdisciplinary talent where computing plays a major role.

Program Mission

Total Semester Credit Hours 95

Spring
CSCE 482 Senior Capstone Design 3 3
University Core Curriculum (p. 25) 1 6
Computer science elective (p. 946) 3 3
Concentration area elective 8 3
Semester Credit Hours 15

Total Semester Credit Hours 25

If the student takes ENGR 217/PHYS 217 and PHYS 207, the 3 hours of PHYS 207 go towards the science requirement along with 1 hour of ENGR 217/PHYS 217. The other hour of ENGR 217/PHYS 217 can be used as general elective.

See advisor for list of acceptable science courses.

The concentration area should be chosen only after consultation with a departmental advisor who will help the student arrange a program appropriate to his or her plans following graduation. Students should file a degree plan before taking minor courses to ensure their use in the degree plan.

Computer science electives are to be selected from tracks. See advisor for list of acceptable course choices.

All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the CSCE advising office.

Computer Science - Minor

The minor in Computer Science provides the student with an introduction to the fundamentals of this area of study. The minor, available to students in all majors (except for CPSC, COMP, CECN, and CEEN), focuses on developing a basic foundation in computing, including components of programming, data structures and algorithm analysis, and computer architecture. The minor is administered by the Department of Computer Science and Engineering. Eligible students must submit an application in order to be considered for and allowed to pursue a minor in Computer Science.

### Fourth Year

**Fall**

- University Core Curriculum (p. 25) | 3
- Concentration elective | 3
- Concentration elective | 3
- Prescribed elective | 3

**Spring**

- CSCE 482 Senior Capstone Design | 3
- University Core Curriculum (p. 25) | 3
- Concentration elective | 3
- Concentration elective | 3
- Prescribed elective | 3

**Total Semester Credit Hours** 120

1. All CSCE courses (excluding the prescribed electives) require a grade of C or better.
2. Of the 30 hours shown as University Core Curriculum electives, 9 must be from life and physical sciences, 3 from creative arts, 3 from language, philosophy and culture, 3 from social and behavioral sciences, 6 from American history and 6 from government/political science. The required 3 hours of International and Cultural diversity and 3 hours of Cultural Discourse may be met by courses also satisfying the creative arts, language, philosophy and culture, social and behavioral sciences and American history requirements if they are also on the approved list of International and Cultural diversity (p. 47) and Cultural Discourse (p. 46).
3. To be selected in consultation of with major advisor.
4. Select from CSCE 310, CSCE 400#470 (p. 946), CSCE 489.

**Game Design and Development - Minor**

The Minor in Game Design and Development is offered in cooperation with the Department of Visualization. Enrollment in the minor is managed through the Department of Visualization. The minor offers students the opportunity to develop the knowledge and skills associated with the aesthetic and technical aspects of game creation. The minor provides a foundation in the principles of game design and software development. Students develop core competencies, collaborate on the design and development of game projects, and engage in authentic, situated creative problem-solving to broaden their horizons as interdisciplinary team members.

**Requirements:** In order to earn a Minor in Game Design and Development, students must meet and adhere to the following requirements and guidelines:

- Minimum GPA of 3.2 for admittance into the minor.
- A grade of C or better for all courses used towards the minor.

Department of Electrical and Computer Engineering

Almost any technology that distinguishes the 20th and 21st centuries from previous history has the imprint of electrical and computer engineering - electric power, radio, television, radar, satellite communication, global positioning system, medical diagnostic and procedure systems, sophisticated domestic appliances, cell phones, computers and sophisticated sensors and control systems used in underwater, space exploration and national security. Electrical and computer engineering has advanced national and global prosperity through research, development and application of electrical and computer technologies and sciences for the benefit of humanity, and has helped create the global village. By choosing electrical or computer engineering our graduates embark on an exciting and productive career with endless opportunities and help in shaping a better future for mankind.

The curriculum is designed to prepare the undergraduate for work in the highly diverse electrical and computer engineering profession. A solid foundation in physics, chemistry and mathematics is used to support courses in the fundamentals of electrical and computer engineering. The use of computers is integrated throughout the curriculum, and basic studies in circuits, electronics, electromagnetic fields and digital logic lead to a flexible program of electives in the junior and senior year. Electives may be chosen from the broad fields of analog and mixed-signal electronics, biomedical imaging, sensing and genomic signal processing, computer engineering and systems, device science and nanotechnology, electric power systems and power electronics, electromagnetics and microwaves, and information science and systems. Laboratory work is structured to first familiarize the student with the basic concepts and then to apply these concepts to solve engineering problems.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Mission
Activities of the Electrical and Computer Engineering Department including research, teaching, and professional and community service revolve around the fourfold mission of the department:

• To create new knowledge and challenge young minds by participation in the process of discovery and invention
• To educate electrical and computer engineers with a solid background of fundamentals, stretching their imagination
• To prepare graduates for an exciting future
• To serve the society through research, education and outreach activities

Undergraduate education plays a major part in helping the department to achieve its mission. The Electrical and Computer Engineering programs are accredited by the Engineering Accreditation Commission of ABET, www.abet.org. More information on these efforts can be found at the Department of Electrical and Computer Engineering (http://engineering.tamu.edu/electrical/) website by clicking on the link for ABET Accreditation.

**Majors**

- Bachelor of Science in Computer Engineering, Electrical Engineering Track (p. 428)
- Bachelor of Science in Electrical Engineering (p. 430)

**Minors**

- Electrical Engineering Minor (p. 431)

**Computer Engineering - BS, Electrical Engineering Track**

The Department of Electrical and Computer Engineering at Texas A&M University offers a Bachelor of Science degree option to its undergraduate students desiring to major in Computer Engineering.

The curriculum is designed to cover the engineering aspects of both hardware and software—a total computer systems perspective. All computer engineering students take courses in the following areas: electrical circuits, electronics, digital circuits, computer architecture ranging from microcomputers to mainframes, interfacing, programming languages ranging from assembler to high level, data structures, analysis of algorithms, operating systems, software engineering and microcomputer systems. A solid foundation in the basic sciences of physics, chemistry and mathematics is used to support these courses.

There are two distinct tracks in this curriculum, the Electrical Engineering Track and the Computer Science Track, both culminating in the same Computer Engineering degree. The tracks are substantially similar, each providing a broad coverage of the computer engineering discipline, but each has a slightly different emphasis. Note that students in either track can take courses from the other as electives, or they can use their electives to further specialize within their own track. Although students are required to select a track immediately upon entering the Computer Engineering program, it is usually possible to change tracks as late as the junior year.

The Electrical Engineering track of the Computer Engineering degree places stronger emphasis on digital Very Large Scale Integrated (VLSI) circuits and systems, microprocessor interfacing and system design, computer system architecture, hardware-software interaction and embedded systems. The track is primarily administered by the Department of Electrical and Computer Engineering and is designed to encompass nearly all of the core material of the Electrical Engineering degree, but provides much more depth in computing. Students studying Computer Engineering can readily apply their knowledge to the design of digital circuits and software in various areas, including cell phones, computers, computer networks, computer vision, pattern recognition and embedded systems.

The bachelor's degree program in computer engineering has been accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org (http://www.abet.org/). With ABET accreditation, students, parents, employers and the society we serve can be confident that a program meets the quality standards that produce graduates prepared to enter a global workforce.

**Mission Statement**

This mission of the Computer Engineering Program is threefold;

- The Computer Engineering program provides students with an education that ensures an excellent understanding of hardware and software systems and the necessary system design and development skills, and that fosters professional curiosity and imagination that drives them throughout their career.
- The program will stimulate and challenge the students with an exceptional, highly motivated faculty that shares its knowledge and excitement about computer engineering, well designed undergraduate and graduate curricula, research opportunities at all levels and a first-class educational infrastructure.
- The program strives to produce graduates who are well prepared to excel in industry, academia and government, and who will take on leadership roles in shaping the technological landscape of the future.

**Program Educational Objectives**

1. Graduates who choose to pursue a career in industry or government will become productive and valuable computer engineers.
2. Graduates who choose to pursue advanced degrees will be able to gain admission and succeed in top graduate programs.
3. In keeping with the legacy of an Aggie engineer, graduates will be successful in attaining positions of leadership in their professional careers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120.

Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

¹ A grade of C or better is required.
² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.
⁴ BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.
⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

⁶ Students intending to specialize in Communications are encouraged to take ECEN 303.
⁷ See advising office for a listing of approved electives.
All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the ECEN advising office.

**Total Program Hours 128**

**Electrical Engineering - BS**

The Department of Electrical and Computer Engineering at Texas A&M University offers a Bachelor of Science degree option to its undergraduate students desiring to major in Electrical Engineering.

Electrical engineers design, develop, test and supervise the manufacture of sophisticated electrical and electronic systems such as: cell phones, iPods, digital TVs, medical imaging, smart appliances, automobiles and advanced satellite systems. Many electrical engineers also work in areas closely related to computers. Areas of specialization include analog and mixed-signal electronics; biomedical imaging, sensing and genomic signal processing; computer engineering and systems; device science and nanotechnology; energy and power; electromagnetics and microwaves; and information science and systems.

The bachelor’s degree program in electrical engineering has been accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org/). With ABET accreditation, students, parents, employers and the society we serve can be confident that a program meets the quality standards that produce graduates prepared to enter a global workforce.

**Program Educational Objectives**

The educational objectives of the Electrical Engineering program are to produce graduates whose expected accomplishments within two to five years of graduation are:

1. Graduates who choose to pursue a career in industry or government will become productive and valuable engineers.
2. Graduates who choose to pursue advanced degrees will be able to gain admission to graduate programs and succeed in top graduate programs.
3. In keeping with the legacy of an Aggie Engineer, graduates will be successful in attaining positions of leadership in their professional careers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department. The full bachelors program is offered on College Station and Qatar campuses. All electrical engineering undergraduate coursework is offered on both campuses.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120.

Students pursing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Electrical Engineering - Minor

The Department of Electrical and Computer Engineering offers a minor to students who are interested in electrical engineering applications related to circuits, signals and systems, electronics, instrumentation, and digital systems. Students interested in the Electrical Engineering minor should contact the undergraduate advising office of the Electrical and Computer Engineering Department for further information.

Requirements: In order to earn a Minor in Electrical Engineering, students must meet and adhere to the following requirements and guidelines:

- A grade of C or better for all courses used towards the minor.
- A minimum cumulative 2.75 GPA to enter the minor.
- Complete the courses listed for the selected Electrical Engineering minor track.

Total Semester Credit Hours 18

1 Select course from ECEN 300-499 (p. 959) except ECEN 314, ECEN 325, and ECEN 485.

Students must make a grade of ‘C’ or better in all courses.

Further Requirements: A minimum grade point average of 2.75 is required for entering the minor. Prerequisite coursework includes the calculus sequence, MATH 308, and PHYS 208 or equivalents. Students majoring in Computer Engineering will not be permitted to minor in Electrical Engineering since the coursework prescribed for the minor is required coursework for the Computer Engineering degree.

Department of Engineering Technology and Industrial Distribution

The Department of Engineering Technology and Industrial Distribution offers four baccalaureate degree programs in electronics systems engineering technology, industrial distribution, manufacturing and
mechanical engineering technology, and multidisciplinary engineering technology. While these degrees are distinct, they share several common features including a sound foundation of mathematics and basic sciences, a strong core of technical courses, and an emphasis on written and oral communications. The curricula emphasize the latest state-of-the-art technologies, innovation and entrepreneurship. Finally, all four degrees are designed to prepare students for careers in industry with strong opportunities for advancement. Because these programs are highly applied and have a focus on project-based learning and experiential education, most of the department’s courses have hands-on laboratories that allow students to put theory to practice.

The mission of the Department of Engineering Technology and Industrial Distribution is to:

- maintain nationally recognized programs in engineering technology and industrial distribution
- focus on educating highly-qualified students with hands-on skills, providing them with experiences in advanced integration of both conventional and emerging technologies, a unique understanding of management and business practices, and an entrepreneurial point of view
- provide leadership within the COE and university in interdisciplinary applied research, to include the development and deployment of new technology
- promote and develop long term partnerships with industry and government that foster enhancements and interactions in education, research, and professional development

Electronic Systems Engineering Technology (ESET)

Electronic Systems Engineering Technology (ESET) prepares graduates for careers in electronic product and system development across a diverse range of industries that include the information/communication technologies, computer, power, oil & gas, automotive, medical and quality of life sectors.

The Electronic Systems Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org/(http://www.abet.org/). For more information about the Electronic Systems Engineering Technology program including the mission and program educational objectives, please see the program requirements (p. 439).

Graduates are awarded the Bachelor of Science in Electronic Systems Engineering Technology.

Industrial Distribution (IDIS)

Industrial Distribution (IDIS) prepares graduates for sales engineering, technical sales, supply chain management, operations management, sales management and other managerial positions. Industry segments include: automation solutions; building materials; chemical and petrochemical; electrical; electronics and semiconductors; fluid power; heating and air conditioning, mechanical power; plumbing; safety equipment; welding; oil and gas; defense; material handling; healthcare; automotive; heavy equipment; packaging; and logistics. The day-to-day challenges faced by the industrial distributor or the manufacturer’s representative require the person to be a professional with many capabilities. For more information about the Industrial Distribution program, please see the program requirements (p. 437).

Graduates are awarded the Bachelor of Science in Industrial Distribution.

Manufacturing and Mechanical Engineering Technology (MMET)

Manufacturing and Mechanical Engineering Technology (MMET) prepares students for dynamic careers in a wide range of industries ranging from oil and gas, to aerospace, and food and beverage. These careers involve design, manufacturing, maintenance, and sometimes sales. Graduates are versatile and effective in diverse areas that require understanding of the dependencies among material properties, product design, costs, manufacturing systems, and process technologies.

The Manufacturing and Mechanical Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org/(http://www.abet.org/). For more information about the Manufacturing and Mechanical Engineering Technology program including the mission and program educational objectives, please see the program requirements (p. 439).

Graduates are awarded the Bachelor of Science in Manufacturing and Mechanical Engineering Technology.

Multidisciplinary Engineering Technology (MXET)

Multidisciplinary Engineering Technology (MXET) combines core concepts from the electronics and mechanical engineering technology disciplines and provides students with a strong background in embedded systems, electronic system design, instrumentation, controls, statics, dynamics, thermodynamics, mechanical system design, and project management. The curriculum is then augmented through a 29-hour technical focus area. The Mechatronics and STEM Education focus areas are currently available and additional focus areas will be identified and created. The Mechatronics focus prepares graduates for diverse careers in aerospace, automotive, oil and gas, medical and communications industries where entry-level employees require a broad-based education in system-level design, development, documentation and delivery of new and innovative products. The STEM Education focus prepares graduates to teach math, science, and/or engineering at the secondary education level.

For more information about the Multidisciplinary Engineering Technology program including the mission and program educational objectives, please see the program requirements here (p. 442) and here (p. 444).

Graduates are awarded the Bachelor of Science in Multidisciplinary Engineering Technology.

Department Academic Policies

The Department of Engineering Technology and Industrial Distribution (ETID) imposes academic requirements in addition to those imposed by the University (Texas A&M University Student Rules) and college. For complete details concerning these and other academic policies, students should contact the ETID Undergraduate Advising Office and are referred to the ETID (http://engineering.tamu.edu/etid/) website.

A student must complete all prerequisites for a course with a grade of C or better by the start of the semester in which the student plans to enroll in the course. A student is responsible for checking the prerequisites for each course to ensure the prerequisite requirements have been satisfied. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. A student who is told to drop a course and is still enrolled by the deadline set each semester may be administratively dropped by the department. If a student is administratively dropped from a course, the student is responsible for
all financial obligations associated with the drop. An administrative drop may adversely impact (including, but not limited to): health insurance benefits, financial aid, athletic eligibility, INS status, veterans’ benefits, and eligibility to participate in extracurricular activities.

The department encourages students to participate in industrial internships or the Cooperative Education Program to acquire practical experience to complement their engineering technology education.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

The Electronic Systems Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in electronics product development, test, system integration, and engineering research.

**ESET Program Educational Objectives**

The Electronic Systems Engineering Technology Program at Texas A&M University has as its primary educational objectives to produce graduates who, after three to five years:

- possess the technical skills to be productive, innovative, and have successful careers in regional, state, national and/or global electronic product and system development industries.
- demonstrate increasing levels of leadership, teamwork, and ability to communicate technical information to technical and non-technical stakeholders during their careers.
- exhibit a commitment to professional ethics in their careers.
- display a desire for a life time of further challenges and learning, and flexibility to adapt to a fast-changing environment in engineering industries.

A continuous cycle of assessment and program improvement is used to ensure that these objectives are being met. Through interactions with industry and academic partners, the Electronic Systems Engineering Technology program continues to offer a state-of-the-art curriculum that produces successful graduates.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary

---

**Majors**

- Bachelor of Science in Electronic Systems Engineering Technology (p. 435)
- Bachelor of Science in Industrial Distribution (p. 437)
- Bachelor of Science in Manufacturing and Mechanical Engineering Technology (p. 439)
- Bachelor of Science in Multidisciplinary Engineering Technology, Electro Marine Engineering Technology Track (p. 440)
- Bachelor of Science in Multidisciplinary Engineering Technology, Mechatronics Track (p. 442)
- Bachelor of Science in Multidisciplinary Engineering Technology, STEM Education Track (p. 444)

**Minors**

- Embedded Systems Integration Minor (p. 446)

**Electronic Systems Engineering Technology - BS**

Electronic Systems Engineering Technology (ESET) prepares graduates for careers in electronic product and system development across a diverse range of industries that include the medical, computer, power, automotive, oil & gas, information/communication technologies and quality of life sectors. While graduates of the program receive a rigorous technical education and take engineering and technology positions within industry, they are also well prepared for positions in technical sales and project management. The ESET curriculum is based on a strong underpinning of engineering math and science courses followed by a core technical sequence. This core includes analog and digital electronics, embedded systems design, software development using C and assembly language, wired/wireless communications, electronics test, statistical tools for engineers, instrumentation and control systems. Throughout their curriculum, students work on multiple open-ended projects to design, implement, test, and evaluate hardware and software systems. One of the most unique aspects of the Electronic Systems Engineering Technology program is that almost every technical course provides a hands-on laboratory experience using facilities equipped with state-of-the-art computer systems, test equipment, and industry-standard computer-aided design and analysis packages. The technical curriculum is augmented with coursework in written and oral communications, product/system development, device/system testing and technical project management. A team-based industry-sponsored capstone design sequence provides a challenging opportunity to apply technical, managerial, and communications skills to solving a real-world problem.

The Electronic Systems Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org/.
engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/ CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

4 BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.
5 For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.
Mission
Industrial Distribution has as its mission to:

- Prepare graduates for sales engineering, sales management, supply chain operations and logistics management mid-management positions with wholesale distributors, who purchase, warehouse, sell, distribute and service a wide variety of products, and with manufacturers who sell through distributors,

- Conduct applied research and develop new best practices in industrial distribution, logistics, and supply chain management that mutually benefit the university and its industrial, governmental, and academic collaborators,
- Provide service and leadership in the promotion and advancement of the department, the university and the industrial distribution profession.

Program Educational Objectives
The Industrial Distribution Program at Texas A&M has as its program educational objectives to produce graduates who, after three to five years:

- Demonstrate the technical and managerial skills to have successful careers in designing, integrating and implementation of technical sales, operations and customer service management systems in industrial distribution and supply chain management related industries.
- Exhibit a commitment to professional ethics in their professional career.
- Demonstrate increasing levels of leadership and responsibility during their careers.
- Display a desire for life-long learning and sustainable productivity in a dynamic work environment.

Program Requirements

1. Students in Industrial Distribution satisfy the 3 hour social and behavioral sciences by taking ECON 202 as a required course. Instead, IDIS students must take a 3 hour course from the Language, Philosophy and Culture list. They may also use this course to satisfy one of their ICD courses.
2. See a departmental advisor for a list of acceptable directed electives and technical electives.
3. All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the ETID advising office.

The curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.
Total Program Hours 126
Manufacturing and Mechanical Engineering Technology - BS

Manufacturing and Mechanical Engineering technology (MMET) prepares students for dynamic careers in industry. Graduates are versatile and effective in diverse areas that require understanding of the dependencies among material properties, product design, costs, manufacturing systems, and process technologies. The student views manufacturing from an enterprise and system perspective, recognizing the importance of customer and supplier interactions. To meet these diverse needs, this degree program provides a foundation of mathematics, science, and specialized technical courses, as well as preparation in oral and written communication. The three main areas of concentration are product design, manufacturing systems integration and automation, and quality assessment. Studies in these areas are supported by a solid foundation in materials and manufacturing processes.

The Manufacturing and Mechanical Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org/.

Program Mission
The mission of the Manufacturing and Mechanical Engineering Technology program at Texas A&M University is to provide a high-quality, application-oriented education producing professionals who can effectively contribute to leadership, the advancement of manufacturing and mechanical engineering technology, and improved performance of industrial endeavors. The educational mission is complemented by applied research and the development of new interdisciplinary technology that mutually benefits the university and its industrial, governmental, and academic collaborators. The people in the program are committed to providing service and leadership in the promotion and advancement of the University and the profession.

Program Educational Objectives
The MMET program prepares students who after a few years after graduation:

• Demonstrate manufacturing and mechanical technical knowledge, problem solving skills, and implementation skills for careers in design, installation, operations, technical sales, or service functions in industry;
• Demonstrate increasing level of leadership and responsibility;
• Exhibit both immediate and sustainable productivity in a dynamic work environment.

Program Requirements
The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). Multidisciplinary Engineering Technology (MXET) prepares students for careers requiring an understanding of technical problems and systems that combine principles from two or more engineering technology disciplines. The degree is designed to be flexible, giving the student a strong background in electronic and mechanical systems, which is then augmented with a 29-hour focus area. Graduates of the program receive a rigorous technical education and typically take engineering and technology positions appropriate to their focus area of study. The MXET curriculum is based on a strong underpinning of engineering math and science courses followed by a core technical sequence. This core includes mechanical, electronic and embedded systems/software fundamentals, principles and design concepts. Throughout their curriculum, students work on multiple open-ended projects to design, implement, test, and evaluate mechanical and electronic hardware and software systems. One of the most unique aspects of the Multidisciplinary Engineering Technology program is that most technical courses provide a hands-on laboratory experience using state-of-the-art equipment and industry-standard design and analysis software. The technical curriculum is augmented with courses in written/oral communications and technical project management. A team-based industry-sponsored capstone design sequence provides a challenging opportunity to apply technical, managerial, and communications skills to solve a real-world problem.

MXET Program Mission

The Multidisciplinary Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in mechanical, electronic,
control, computer and communication systems, as well as engineering
design and development.

MXET Program Educational Objectives

The program educational objectives of the BS MXET degree program are
to produce graduates who, within two to five years after graduation, will:

- Possess and demonstrate technical knowledge of the design,
  manufacture, sales, and service of complex systems that span
  multiple engineering technology disciplines.
- Demonstrate an increasing level of leadership and responsibility.
- Exhibit productivity in a dynamic work environment through a
  commitment to lifelong learning.
- Exhibit a commitment to professional ethics in their professional
careers.

A continuous cycle of assessment and program improvement is used
to ensure that these objectives are being met. Through interactions
with industry and academic partners, the Multidisciplinary Engineering
Technology program offers a state-of-the-art curriculum that produces
successful graduates.

MXET Tracks

The MXET program has a common core of courses and 29 additional
credit hours that allow students to gain further experience with the focus
area of choice. Currently, there are three focus areas, each represents
a track of the MXET program. These tracks are mechatronics, STEM
education, and electro marine engineering technology. The MXET
program is offered at three distinct locations: College Station, Galveston,
and McAllen.

Electro Marine Engineering Technology Track

The Electro Marine Engineering Technology track has an emphasis
in marine mechatronics, a multidisciplinary field that includes a
combination of electrical, mechanical, communications, control, and
marine engineering technology topics. Students interested in wireless
communications, automation, instrumentation and/or robotics will
gain hands-on experience with a focus on marine electronic systems.
Additionally, students graduating with this degree and possessing a
license will be well prepared to become an electronic technology officer
(ETO). In the near future, at least one ETO will be required on each sailing
vessel.

This program is approved to be offered at the Texas A&M University at
Galveston campus.

Program Requirements

The freshman year is identical for degrees in aerospace engineering,
arboricultural engineering, civil engineering, computer engineering,
computer science, electrical engineering, electronic systems engineering
technology, environmental engineering, industrial distribution, industrial
engineering, interdisciplinary engineering, manufacturing and mechanical
engineering technology, mechanical engineering, multidisciplinary
engineering technology, nuclear engineering, ocean engineering, and
petroleum engineering (Note: not all programs listed are offered in
Qatar). The freshman year is slightly different for chemical engineering,
biochemical engineering and materials science and engineering degrees
in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120.
Students pursuing degrees in biological and agricultural engineering
should refer to the specific curriculum for this major. It is recognized that
many students will change the sequence and number of courses taken in
any semester. Deviations from the prescribed course sequence, however,
should be made with care to ensure that prerequisites for all courses are
met.

| Semester Credit Hours | 15-16 |

Total Semester Credit Hours 31-32

1 A grade of C or better is required.
2 Entering students will be given a math placement exam. Test results
will be used in selecting the appropriate starting course which may
be at a higher or lower level.
3 Of the 21 hours shown as University Core Curriculum electives, 3
must be from creative arts, 3 from social and behavioral sciences
(see IDIS curriculum for more information), 3 from language,
philosophy and culture (see CVEN, EVEN and PETE curriculum for
more information), 6 from American history and 6 from government/
political science. The required 3 hours of international and cultural
diversity and 3 hours of cultural discourse may be met by courses
satisfying the creative arts, social and behavioral sciences, language,
philosophy and cultural, and American history requirements if they
are also on the approved list of international and cultural diversity
(p. 47) courses and cultural discourse (p. 46) courses.
4 BMEN, CHEN and MSEN require 8 hours of freshman chemistry,
which may be satisfied by CHEM 119 or CHEM 107/CHEM 117
and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus
CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN,
CHEN and MSEN should take CHEM 120 second semester freshman
year. CHEM 120 will substitute for CHEM 107/CHEM 117.
Multidisciplinary Engineering Technology - BS, Mechatronics Track

**Total Program Hours 127**

Multidisciplinary Engineering Technology (MXET) prepares students for careers requiring an understanding of technical problems and systems that combine principles from two or more engineering technology disciplines. The degree is designed to be flexible, giving the student a strong background in electronic and mechanical systems, which is then augmented with a 29-hour focus area. Graduates of the program receive a rigorous technical education and typically take engineering and technology positions appropriate to their focus area of study. The MXET curriculum is based on a strong underpinning of engineering math and science courses followed by a core technical sequence. This core includes mechanical, electronic and embedded systems/software fundamentals, principles and design concepts. Throughout their curriculum, students work on multiple open-ended projects to design, implement, test, and evaluate mechanical and electronic hardware and software systems. One of the most unique aspects of the Multidisciplinary Engineering Technology program is that most technical courses provide a hands-on laboratory experience using state-of-the-art equipment and industry-standard design and analysis software. The technical curriculum is augmented with courses in written/oral communications and technical project management. A team-based industry-sponsored capstone design sequence provides a challenging opportunity to apply technical, managerial, and communications skills to solve a real-world problem.

**MXET Program Mission**

The Multidisciplinary Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in mechanical, electronic, control, computer and communication systems, as well as engineering design and development.

**MXET Program Educational Objectives**

6. Meets the 29 hour Mechatronics focus area requirements.
7. See a departmental advisor for a list of approved electives.
8. All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the ETID advising office.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.
The program educational objectives of the BS MXET degree program are to produce graduates who, within two to five years after graduation, will:

- Possess and demonstrate technical knowledge of the design, manufacture, sales, and service of complex systems that span multiple engineering technology disciplines.
- Demonstrate an increasing level of leadership and responsibility.
- Exhibit productivity in a dynamic work environment through a commitment to lifelong learning.
- Exhibit a commitment to professional ethics in their professional careers.

**MXET Tracks**

The MXET program has a common core of courses and 29 additional credit hours that allow students to gain further experience with the focus area of choice. Currently, there are three focus areas, each represents a track of the MXET program. These tracks are mechatronics, STEM education, and electro marine engineering technology. The MXET program is offered at three distinct locations: College Station, Galveston, and McAllen.

**STEM Education Track**

The STEM education track has been established through a partnership with the College of Education and Human Development and includes twenty-nine credit hours of coursework in education. These courses, including a semester-long practicum, specifically prepare graduates to teach at the secondary education level. Graduates from this program will be qualified to take the State of Texas math, physical science, and engineering teaching certification exam.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/ CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. Students must make a grade of 'C' or better in all courses.

Total Program Hours 127

Embedded Systems Integration - Minor

Our cars, cell phones, health care devices, every-day appliances and physical devices that are connected to form the internet-of-things (IoT) operate based on small “computers” that sense the environment, make decisions, communicate, and control operations; essentially making our devices “smart.” These ‘computers’ or embedded processors/microcontrollers are a fundamental component in most modern products and systems and are used across a wide range of industries that include medical, oil/gas, process control, automotive, communications, and quality of life.

The Embedded Systems Integration minor offered by the Department of Engineering Technology and Industrial Distribution teaches students about embedded systems hardware and software development and how these systems are used in modern products. The minor requires five courses (18 hours) and is available to not only engineering students but also students outside the College of Engineering who are interested in studying technology and understanding the devices that power our lives.

Students interested in an Embedded Systems Integration minor should see an advisor in Engineering Technology and Industrial Distribution for more information.

Meet the 29 hour STEM Education focus area requirements.
See a departmental advisor for a list of approved electives.
The 6 hours of technical electives will be satisfied by taking ESET 329 and ESET 333. All other options must be approved in advance by the MXET program coordinator.
All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the ETID advising office.
Department of Industrial and Systems Engineering

Industrial and systems engineering is an engineering discipline devoted to the design, installation, improvement and control of integrated systems of people, materials, and facilities in a wide range of organizations that produce goods or render services. Like other engineering fields, industrial engineering is concerned with solving problems through the application of specialized knowledge in mathematics and science, as well as the principles of engineering. Two major distinctions of our discipline, among the engineering disciplines, is the unique focus of industrial and systems engineering on human factors and the quantification and systematic removal of uncertainty from production systems. Industrial and systems engineering has five major focus areas: advanced manufacturing, operations research, data sciences and machine learning, health and human systems, and systems engineering.

An important characteristic of industrial and systems engineering is its systems approach to integrate the basic resources of production and service systems and other relevant resources, such as information and energy, in such a way as to create a smooth, efficient and competitive operation within an enterprise. Industrial and systems engineers are needed in virtually all types of enterprises, ranging from industries such as manufacturing, distribution, logistics, transportation, and construction; service sectors such as health care, telecommunications, retail, banking, and engineering consulting to government agencies, military, and non-profit organizations.

The mission of the Industrial and Systems Engineering program is to serve the state, nation, and global community by educating industrial engineering students to be well founded in engineering fundamentals and to have the knowledge and skills required to design, develop, improve, implement and control sophisticated production and service systems in an environment characterized by complex technical and social challenges. Throughout this educational process, students will be instilled with the highest standards of professional and ethical behavior. It is the intent of the undergraduate industrial engineering program to equip its graduates to achieve the following accomplishments a few years after graduation:

1. Graduates will be successful in improving operations by solving complex industrial and systems engineering problems.
2. Graduates will demonstrate professional leadership.
3. Graduates will be instilled with the motivation and ability to accomplish professional life-long learning.

The undergraduate program in Industrial Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Industrial and Systems Engineering students may participate in the Undergraduate Minor Program offered by Texas A&M. This program is usually comprised of 15 to 18 hours, some of which may be substituted as technical electives. The most common minors are math, business and economics. The department also has a Fast Track Program for academically qualified students who want to take selected graduate courses and receive both graduate and undergraduate credit by meeting specific requirements. The department encourages students to participate in industrial internships or the Cooperative Education Program to acquire practical experience to complement their industrial engineering education. Internships are generally encouraged during the summer months only. Students who participate in the Co-op program during three academic semesters may count the three credit hours as a technical elective in their curriculum.

Graduate degrees including the Master of Science (MS), Master of Engineering (M.Eng.), and Doctor of Philosophy (PhD) are also offered by the department in addition to the Bachelor of Science in Industrial Engineering. For graduate degree information, please see the Texas A&M University Graduate Catalog.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Industrial Engineering - BS

Industrial and systems engineering is a discipline devoted to the design, installation, improvement and control of integrated systems of people, materials, and facilities across a wide range of organizations that produce goods or render services. Like other engineering fields, industrial and systems engineering is concerned with solving problems through the application of specialized knowledge in mathematics and science, as well as the principles of engineering. Two major distinctions of our discipline, among the engineering disciplines, is the unique focus of industrial and systems engineering on human factors and the quantification and systematic removal of uncertainty from production systems. Industrial and systems engineering has five major focus areas: advanced manufacturing, operations research, data sciences and machine learning, health and human systems, and systems engineering.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

```
First Year
Fall
CHEM 107 General Chemistry for Engineering Students 1,4 3
CHEM 117 General Chemistry for Engineering Students Laboratory 1,4 1
ENGL 103 or ENGL 104 Introduction to Rhetoric or Composition 1 3
ENGR 102 Engineering Lab I - Computation 1 2
MATH 151 Engineering Mathematics I 1,2 4
University Core Curriculum (p. 25) 3 3
Total Semester Credit Hours 16

Spring
ENGR 216/PHYS 216 Experimental Physics and Engineering Lab II - Mechanics 1 2
MATH 152 Engineering Mathematics II 1 4
PHYS 206 Newtonian Mechanics for Engineering and Science 1 3
University Core Curriculum (p. 25) 3 3
Select one of the following: 3-4
CHEM 120 Fundamentals of Chemistry II 4
University Core Curriculum (p. 25) 3,5 3
Total Semester Credit Hours 15-16
Total Semester Credit Hours 31-32
```

1 A grade of C or better is required.
2 Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3 Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.
BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

4 For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

The Bachelor of Science degree in Industrial Engineering requires a grade of C or better for required industrial engineering (ISEN) courses. If a course is repeated, only the most recent grade is used in fulfilling this requirement.

Total Program Hours 128

Industrial Engineering - 5-Year Bachelor of Science/Master of Public Health in Occupational Safety and Health

The National Science Foundation (NSF) Engineering Research Center (ERC) on Precise Advanced Technologies and Health Systems for Underserved Populations (PATHS-UP), has a goal of addressing the grand challenge of overcoming the human and economic burden of diabetes and heart disease in underserved communities. The proposed combined program, BS in Industrial Engineering and MPH in Occupational Safety & Health, helps satisfy the need for engineers with formal education in health to bolster the quality of life to the public in underserved areas. In particular, our engineers will be immersed in the practical health related issues prevalent in these areas and help engineer technologies that can overcome the barriers usually faced by point-of-care devices. A second goal of the PATHS-UP program is to recruit and educate a diverse group of scientists and engineers who will lead the future in developing
enabling technologies to improve health in underserved communities. This combined program is targeted at accomplishing this second goal, thus enabling the first.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is identical for degrees in aerospace engineering, computer engineering, and mechanical engineering technology. However, students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

### Notes

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.
4. BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEN 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEN 117.
5. For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

### Third Year

**Fall**  
- ISEN 320 Operations Research I \(^1\)  
- ISEN 330 Human Systems Interaction \(^1\)  
- MATH 308 Differential Equations  
- MSEN 222/MEEN 222 Materials Science  
- Select one of the following:  
  - PHEO 678 Principles of Thermodynamics  
  - ECEN 215 Principles of Electrical Engineering  
  - ISEN 399 Professional Development  
- Semester Credit Hours 15

**Spring**  
- ISEN 340 Operations Research II \(^1\)  
- ISEN 350 Quality Engineering \(^1\)  
- ISEN 355 System Simulation \(^1\)  
- ISEN 370 Production Systems Engineering \(^1\)  
- High Impact Experience \(^7\)  
- ISEN 399 Professional Development  
- University Core Curriculum (p. 25) \(^6\)  
- Semester Credit Hours 18

### Fourth Year

**Fall**  
- PHEO 618 Occupational Safety  
- SOPH 601 Thinking in Populations: The Public Health Mindset  
- SOPH 602 Investigation and Control: Acute Public Health Events  
- SOPH 603 Assessment and Intervention: Wicked Problems in Public Health  
- Technical elective  
- Semester Credit Hours 17

**Spring**  
- ISEN 460 Capstone Senior Design \(^1\)  
- PHEO 640 Industrial Hygiene  
- PHEO 678 Occupational Biomechanics \(^6\)  
- SOPH 604 Framing and Persuasion: Public Health in the Public Sphere  
- University Core Curriculum (p. 25) \(^3\)  
- Semester Credit Hours 13

**Summer**  
- SOPH 684 Practicum  
- University Core Curriculum (p. 25)  
- Semester Credit Hours 3

**Fifth Year**

**Fall**  
- ISEN 630 Human Operator in Complex Systems  
- or ISEN 631 or Cognitive Systems Engineering  
- PHEO 630 Environmental/Occupational Diseases  
- PHEO 682 Industrial and System Safety  
- PHEB 602 Biostatistics I  
- Semester Credit Hours 12

---

6. Courses taken for credit in both the undergraduate and graduate degree for a combined total of 12 hours: PHEO 618, PHEO 640, PHEO 678, PHEO 679.

7. All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the INEN advising office.

8. ISEN/PHEO electives are approved by the BS/MPH program director and graduate advisor.

The program includes a total of 170 hours which up to 12 hours may be applied toward both the Bachelor of Science in Industrial Engineering and the Master of Public Health in Occupational Safety and Health.

### Total Program Hours 170

**Industrial Engineering - 5-year Bachelor of Science/Master of Science in Finance**

Industrial and systems engineering has a long-standing history and unique place among engineering majors as the academic discipline responsible for the economic viability of productive systems across industries. Industrial engineers are keenly aware of the goals and objectives of the enterprise. Additionally, industrial engineers receive a core curriculum in the rigorous underpinnings requisite for the quantification of uncertainty and the mitigation of financial risk to the enterprise. This 3+2 degree ensures that the successful graduate from the Mays School of Business, department of finance, has a solid background in both the stochastic processes used to characterize and model the uncertainty coupled with the financial acumen requisite to ensure the economic viability of the enterprise. Students of the industrial and systems engineering program will take advantage of a series of internships and practicums that expose the undergraduate to various facets of financial stability and instability in industry. This program will produce a select and skilled group of industrial leaders that will take their place in the industrial world ensuring the viability of productive organizations around the globe.

### Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in
Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

For BS-PTE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 210, ENGR 210, or COMM 205) and/or 3 hours to UCC elective.

Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.
Industrial Engineering - Minor

The program includes a total of 164 hours which up to 9 hours may be applied toward both the Bachelor of Science in Industrial Engineering and the Master of Science in Finance.

**Total Program Hours 164**

### Industrial Engineering - Minor

The minor in Industrial and Systems Engineering provides students with the knowledge, skills, and experience related to several of the core areas of ISEN including: operations research, data analytics, human systems design, and production system engineering. Quantification of uncertainty, mathematical modeling, decision making, and process design are skills endemic to ISEN. The electives reflect the diverse nature of the discipline and are aligned with the needs of industry. Industrial and systems engineering, based on the latest Bureau of Labor Statistics numbers, stands as the second largest engineering discipline in the U.S. Industrial and systems engineers are employed across the nearly 450 industry types as identified in the Standard Industrial Classification system. Industrial and systems engineering is focused on the economic viability of productive organizations within those industries. This minor provides the student with a highly marketable knowledge base and skillset that is in high demand in today's global economy.

Total Semester Credit Hours 15

Students must make a grade of 'C' or better in all courses.

### Data Center Operations Engineering - Certificate

With the rapid acceleration of technology through innovation on a global basis, industries recognize the need for young engineers who possess base line knowledge in areas of data system management and an understanding of the system level of complex data center processing systems. In both government and industry there is a growing need for undergraduate engineering students that possess the requisite knowledge and skill sets pertaining to complex data systems management and this certificate program includes a set of courses to assure students develop this knowledge and skill set. Completion of this certificate requires completion of the following educational outcomes:

1. to know and apply principles of engineering management
2. to understand principles of systems level engineering and their application to specific data center system operations
3. to be able to go beyond understanding concepts and demonstrate appropriate usage of systems engineering principles in a design context

For additional information, contact the Data Center Operations Engineering Certificate coordinator or Engineering Academic and Student Affairs, EABB, (979) 845-7200.

Department of Materials Science and Engineering

The Department of Materials Science and Engineering is jointly operated by the College of Engineering and College of Science.

The department offers Bachelor of Science, Master of Engineering, Master of Science and Doctor of Philosophy degrees. This multidisciplinary department includes faculty members from several disciplines, including aerospace engineering, biology, biomedical engineering, chemical engineering, chemistry, electrical engineering, mechanical engineering, nuclear engineering and physics. Many of today's most pressing scientific problems stem from the limitations of materials currently available, and this department is at the forefront of new knowledge and discovery at Texas A&M University.

What is Materials Science and Engineering?

Materials science and engineering involves the characterization of the physical and chemical properties of solid materials—metals and alloys, ceramics, magnetic materials, polymers, optical materials, semiconductors, superconductors, and composites—for the purpose of using, changing, or enhancing inherent properties to create or improve end products. Materials science and engineering involves examining how the microstructure (crystalline or amorphous) of a material can be changed to influence the strength, electrical conductivity, optical, or magnetic properties of a material. This field is inherently multidisciplinary, encompassing mechanical, chemical, biomedical, civil, electrical, and aerospace engineering; physics; and chemistry.

Materials science comprises the study of materials from the macro to the atomic scale—from highway building materials to carbon nanotubes—but, independent of scale, the study of materials is concerned fundamentally with the effect of structure and chemistry on the properties of materials. Materials have historically been so important that different eras of civilization were named according to the materials from which tools were fabricated; for example, the Stone Age, the Bronze Age, and the Iron Age. The development of the semiconductor spawned the modern era of information technology often called the Silicon Age. Advances in
Materials science might make this new millennium the Biomaterials/Nanomaterials/Optical Materials Age.

**What do Materials Scientists and Engineers do?**

In industry, materials scientists and engineers work with natural or synthetic materials and, most often, with combinations of materials, to improve existing products or to develop novel products. For instance, at Intel, the developer of the processing chip used in most PCs, materials scientists optimize the materials used in chip packaging, balancing differing coefficients of thermal expansion, head dissipation, brittleness and compliance, and cost for optimum performance and economic feasibility.

Other materials scientists are on the forefront of the revolution in biotechnology, developing materials for the components of artificial joints, heart valves, and other replacement body parts. Smart materials show a tremendous potential in medical and dental applications, such as compressible stents that reform to their intended shape upon contact with body heat once inserted into an artery, ceramic cement for bone repair, or shape-memory alloys to correct misplaced teeth or spine curvature. (Smart materials have one or more properties that can be dramatically altered, such as multiviscosity oil, with a viscosity that varies with temperature.)

Related research involves developing smaller and more reliable components, such as ferromagnetic activators acting as tiny machines in military and other applications. In aerospace engineering, materials scientists are developing airframe and fuselage materials with high strength-to-weight ratios, as well as developing smart materials into integrated sensors and actuators for reconfigurable wings and other adaptive structures.

For more information, visit the Department of Materials Science and Engineering ([http://engineering.tamu.edu/materials/](http://engineering.tamu.edu/materials/)) website.

Materials Science and Engineering - BS

Materials Science and Engineering is an interdisciplinary field centered on understanding the physical properties of matter and designing materials with specific properties to serve a desired function. Materials scientists study the connections between the synthesis and processing of a material, its underlying structure and its resulting properties. Materials engineers develop materials and manufacturing techniques and integrate these materials into commercial products.

Program Highlights

1. Flexibility to engage in one or more of several defined concentration areas, or with guidance of a faculty mentor, create a custom concentration area.

2. Opportunities to participate in internships with industry partners or research in academic labs.

3. Integration of laboratory experience with computational simulation.

4. Preparation for employment as a professional engineer across a range of industries including energy, biomedical, semiconductor, and defense sectors.

The curriculum builds on a strong foundation in chemistry, physics and mathematics to explore the fundamental concepts and techniques critical to the field of materials science and engineering. Students have the flexibility to explore interdisciplinary studies or to focus in greater depth on one or more areas of concentration in the allotted nine hours of technical electives and nine hours of free electives.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Total Semester Credit Hours: 31-32

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.
4. BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.
5. For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGR 210, or COMM 205) and/or 3 hours to UCC elective.
Materials Science and Engineering - Minor

The Department of Materials Science and Engineering minor (http://engineering.tamu.edu/materials/academics/degrees/undergraduate/minor/) degree program is designed to provide a strong materials science educational program for undergraduate science and engineering majors and to integrate a materials focus into their undergraduate training. It is intended for students who are interested in broadening their understanding of materials processing and structure–property relationships to complement their major degree. Students will have the flexibility to select relevant coursework in order to customize this program of study to best suit the particular student’s intended area of focus through consultation with an MSEN faculty advisor.

The minor program in materials science and engineering consists of a minimum of five (5) three-hour courses for a total of 15 credit hours, with up to 6 credit hours in materials courses within their major. All students are required to have completed a prerequisite, such as MSEN 222/MEEN 222—Materials Science (or an equivalent course)—prior to applying for the minor. One (1), three-hour course (3 credit hours) is selected from one of two core MSEN courses. The remaining four courses (12 credit hours) are selected from upper-level materials focused technical electives. With the permission of the MSEN faculty advisor, students may substitute up to two technical electives with courses from their major department with a primary focus on materials science and engineering. Completion of the minor will be recorded on the student’s university transcript.

For more information, visit the Department of Materials Science and Engineering website (http://engineering.tamu.edu/materials/).

---

1. This is a writing intensive course.
2. Select from any MSEN 300-499 (p. 1085) course not used elsewhere. Students may use up to 3 hours each of MSEN 491, MSEN 485, and MSEN 484.
3. Select in consultation with advisor from MSEN 300-499 (p. 1085); AERO 300-499 (p. 873); BAEN 300-499 (p. 912); BMEN 300-499 (p. 923); CHEN 300-499 (p. 932); CVEN 300-499 (p. 950); CSCE 110, CSCE 300-499 (p. 946); ECEN 300-499 (p. 959); ENGR 300-499 (p. 976); ISEN 300-499 (p. 1032); MEEN 221, MSEN 300-499 (p. 1071); NUC 300-499 (p. 1095); BIL 300-499 (p. 919); CHEM 220, CHEM 227, CHEM 228, CHEM 300-499 (p. 929); MATH 300-499 (p. 1066); PHYS 222, PHYS 300-499 (p. 1115); STAT 211, STAT 212, STAT 300-499 (p. 1154); MGST 309, MKTG 409, FINC 409. All non-MSEN specialty electives must be approved by the Undergraduate Advising Office, on the basis of satisfying one or more of the MSEN BSE program outcomes (e.g., integrating scientific and engineering principles across disciplines).
Corrosion Science and Engineering - Certificate

The Certificate in Corrosion Science and Engineering requires completion of five courses (15 credit hours) and was designed in response to industry demand and the national need in strategic sectors, such as infrastructure renewal, energy (extraction, conversion and transportation), utilities (in particular water), transportation, production and manufacturing.

The curriculum incorporates:

1. cross-disciplinary components on materials science and engineering, thermodynamics, kinetics, and electrochemistry;
2. interdisciplinary, integrative courses on the forms of corrosion, the electrochemical and degradation processes in extreme environments, and the control and mitigation strategies to prevent these processes in specific environments; and
3. elective courses related to different engineering disciplines and applications as well as professional internships in industry and national laboratories.

The goals of the corrosion science and engineering certificate program are to train the next generation of scientists and engineers:

1. who will serve as a trained, advanced workforce for industry, academia, and government agencies with a basic understanding of environmental degradation assets required to optimize asset life cycle, production efficiency, and worker safety;
2. are familiar with the technological and computational tools and methods for corrosion and material degradation evaluation, inspection, detection, and prevention;
3. have interdisciplinary collaborative experience in materials preservation and degradation, with individuals from different science and engineering disciplines;
4. contribute to interdisciplinary efforts while developing a comprehensive understanding of the potentials and limitations of corrosion science and engineering; and
5. acquire skills necessary to thrive in their chosen career path.

Students must make a grade of C or better in all courses.

Student must achieve an overall GPA of 2.5 in approved minor courses.
The objectives of the Mechanical Engineering program are to produce graduates who will:

- have successful careers, and become leaders, in industry and the public sector;
- appropriately apply acquired knowledge, work well with other people, effectively communicate ideas and technical information, and continue to learn and improve; and
- successfully pursue advanced studies, if they so choose, opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

Mechanical engineers should possess a thorough understanding of engineering science as well as analytical and practical skills in one of many basic mechanical engineering specialties. The mechanical engineering curriculum at Texas A&M requires students to develop and apply logical thinking, innovative approaches, and ethical standards as a prerequisite for professional competence. The curriculum consists of basic theory courses complemented by laboratory experiences in dynamic systems and controls, design, experimentation, fluid mechanics, heat transfer, manufacturing, and materials. Elective courses are offered in numerous areas including air conditioning, automotive engineering, computer-aided design, control systems, corrosion, energy conversion, internal combustion engines, manufacturing, materials, mechanical design, polymers, mechatronics, metallurgy, power generation, robotics, stress analysis, fluid mechanics, turbomachinery, and others. The selection of elective courses is dictated by the interests and goals of the student, working with departmental advisors and within the curriculum guidelines.

Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor. The mechanical engineering program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department. The full bachelor's program is offered on College Station and Qatar campuses. All mechanical engineering undergraduate coursework is offered on both campuses, whereas some coursework is offered synchronously via distance learning.

Mechanical Engineering - BS

Mechanical engineering is a highly diversified profession. The mechanical engineer designs machines, devices, various products and control systems, and works with the generation, conversion, transmission, and utilization of mechanical and thermal power. Assignments often include analysis and synthesis of mechanical, thermal, and fluid systems. Mechanical engineers are also responsible for characterization, specification, and analysis of materials used in design and manufacturing. Manufacturing systems, robotics, electromechanical devices, and control systems are also the purview of the mechanical engineer. Graduates in mechanical engineering are among the most versatile engineers and enjoy professional employment in industry, government, consulting, and research organizations. The undergraduate program in Mechanical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The work of mechanical engineers varies from general engineering to numerous, narrow specialties, as required by the wide variety of employers. A general list, though not in any way exhaustive, of the areas of professional employment opportunities available to mechanical engineers includes: design, construction, controls, materials specification and evaluation, analysis of thermal systems, fluid and solid mechanics, manufacturing, plant engineering, research and development, and technical sales. Many mechanical engineers are promoted to management and administrative positions as well.

The mission of the Department of Mechanical Engineering is to serve the students of Texas A&M University, the State of Texas, and the nation by:

- providing quality education that is well-grounded in the fundamental principles of engineering, fostering innovation and preparing students for leadership positions and successful careers in industry, government, and academia;
- advancing the knowledge base of mechanical engineering to support the competitiveness of existing industry and to spawn new economic development in Texas and the nation through active involvement in basic and applied research in a global context; and
- successfully pursue life-long learning and advanced study opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The objectives of the Mechanical Engineering program are to produce graduates who will:

- have successful careers, and become leaders, in industry and the public sector;
- appropriately apply acquired knowledge, work well with other people, effectively communicate ideas and technical information, and continue to learn and improve; and
- successfully pursue advanced studies, if they so choose, opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

Mechanical engineers should possess a thorough understanding of engineering science as well as analytical and practical skills in one of many basic mechanical engineering specialties. The mechanical engineering curriculum at Texas A&M requires students to develop and apply logical thinking, innovative approaches, and ethical standards as a prerequisite for professional competence. The curriculum consists of basic theory courses complemented by laboratory experiences in dynamic systems and controls, design, experimentation, fluid mechanics, heat transfer, manufacturing, and materials. Elective courses are offered in numerous areas including air conditioning, automotive engineering, computer-aided design, control systems, corrosion, energy conversion, internal combustion engines, manufacturing, materials, mechanical design, polymers, mechatronics, metallurgy, power generation, robotics, stress analysis, fluid mechanics, turbomachinery, and others. The selection of elective courses is dictated by the interests and goals of the student, working with departmental advisors and within the curriculum guidelines.

Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor. The mechanical engineering program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120.

Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

---

1. A grade of C or better is required.

2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

3. Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.

4. BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/ CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/ CHEM 117.

5. For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

Total Program Hours 128
Analysis, Design and Management of Energy Conversion Systems - Minor

The objectives of the Mechanical Engineering (MEEN) minor in Analysis, Design and Management of Energy Conversion Systems are to expand the working knowledge of mechanical engineering principles to broader engineering activities and to provide non-MEEN students with a specialized aspect of mechanical engineering to enhance their skillset and capabilities within their discipline-specific field. Candidates for a Mechanical Engineering minor must be high-achieving in their own discipline. Students may apply for the minor as early as their fourth semester of college but before their seventh semester of college.

Department of Nuclear Engineering

Nuclear Engineering

Nuclear engineering deals with the application and utilization of nuclear processes and radiations. The use of nuclear energy for the production of electrical power is a mature industry. Nuclear engineers work on all aspects of the nuclear fuel cycle and for many different types of employers such as government and private labs, regulatory agencies, reactor vendors, utilities and architect engineers. In addition, nuclear energy for space applications is a rapidly expanding field. Radionuclide technology in industry and medicine requires a large number of well-trained radiological health engineers. To supply qualified engineers, the Department of Nuclear Engineering offers curricula leading to the Bachelor of Science degree in Nuclear Engineering and is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The missions of the Department of Nuclear Engineering are:

- to produce high-quality graduates from the undergraduate through the doctoral levels to help meet the technical manpower needs of our state, region, nation, and the international community;
- to conduct research, including collaboration with research in related fields, to advance the state of knowledge in these disciplines in support of the needs of society; and
- to perform service in these disciplines for many constituencies including our College and University, industry, government and national laboratories, professional organizations, and the public.

In fulfilling these missions, the objective of the undergraduate program is to prepare students for success in their professional endeavors following the baccalaureate degree. These endeavors may include direct employment in the private or public sectors, graduate studies in engineering or science, professional studies in medicine, business, law or public administration, service in the military, or entrepreneurial activities. To achieve this purpose, four principal educational objectives are identified. Graduates of our Bachelor of Science program in Nuclear Engineering:

1. will work on the challenges of maintenance, improvement, innovation, education, and research in nuclear power and industrial utilization of nuclear radiation and radionuclides. In this work, they will fulfill independent assignments, engage in collaborations, and manage the work of others with effective communications characterizing all phases of their responsibilities;
2. will conduct their professional activities with full recognition of the choices and challenges implicit to their work, to its ethical dimensions, and to their implications for matters beyond their immediate tasks;
3. will take the local, global, historical, social, economic, and political settings into account in both their domestic and international endeavors; and
4. will recognize and utilize both the accumulated body of results from prior work and the continuing evolution of science and technology as essential resources for the effective conduct of their work.

The nuclear engineering baccalaureate degree programs stress engineering science fundamentals and mathematics. However, considerable numbers of elective hours are available in the curriculum to permit students to broaden their educations as desired.

Most of the facilities used in the MS and PhD programs are also used in the undergraduate degree programs. These facilities make the Department of Nuclear Engineering one of the best equipped in the United States. Texas A&M is now the only University in the United States with two nuclear reactors on its campus.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Nuclear Engineering - BS

The Bachelor of Science in Nuclear Engineering degree program aims to educate and prepare future nuclear engineering professionals, researchers and leaders in the fields of nuclear science and nuclear technologies, including nuclear reactor design/operation/simulation/maintenance, nuclear energy production, radiation detection, radiological health technologies, computational method developments, nuclear materials, nuclear security and nuclear policies. The program is built upon a solid foundation and training from physics, mathematics and mechanical engineering. The program integrates fundamentals, applications and hands-on practices in nuclear-specific topics. Upon graduation, students are ready for jobs in academic fields, national laboratories, industry and professional schools. Students can expect to be instilled with the highest standards of professional and ethical behavior, and prepared to meet the complex challenges associated with nuclear science and engineering.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). Nuclear Engineering - Minor

The nuclear engineering minor program will provide students with a complementary understanding of nuclear engineering principles that will introduce them to concepts of nuclear reactor theory, isotope detection, reactor analysis, and an approach to nuclear engineering experiments. The minor is ideal for those wanting to further expand their knowledge in a complex discipline, or for those that seek a basic understanding of nuclear engineering principles for work within industry.

Radiological Health Engineering - Minor

The Department of Nuclear Engineering offers a minor in Radiological Health Engineering. Expanding and emerging nuclear applications have created a strong demand for specialists in radiological health engineering. Well-educated individuals are, and will be, required in all aspects of the nuclear power industry from mining all the way to disposal of wastes from spent fuel. There are needs for radiological health specialists in government, hospitals, educational institutions and private industry. This program at Texas A&M is designed to give students a broad background so they will be able to assume positions in any area of the nuclear industry.

Department of Ocean Engineering

Ocean Engineering

Ocean engineering is the application of basic engineering principles to the analysis, design, construction, and management of systems that operate in the ocean environment or near shore. Typical ocean engineering application areas include: beach protection and nourishment, coastal structures and erosion, wave and current structure interaction, development of ocean energy resources, instrumentation for coastal and offshore measurements, marine dredging and dredged material placement, ocean mining, offshore petroleum recovery, offshore structures and vessels, marine hydrodynamics, maritime risers, moored and towed systems, numerical and physical modeling, ports and harbors, remotely operated and autonomous underwater vehicles, renewable ocean energy systems, search and salvage, suspended and dissolved constituent transport, subsea pipelines and cables, seafloor pipeline and umbilical layouts, flow assurance, submersible vehicles, sustainable and resilient ocean systems, and underwater acoustics. Employment opportunities exist with private industry, defense contractors, consulting firms, and government agencies. Ocean engineering students are encouraged to pursue summer internships and study abroad program and may participate in the University cooperative education program. The undergraduate program in ocean engineering in the Department of Ocean Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The mission of the Ocean Engineering Program is to conduct research, serve the public, and educate students in a broad program of instruction encompassing traditional and emerging areas of ocean engineering. Graduates are prepared for entering engineering practice, continuing onto graduate study, life-long learning and professional development. Students develop a sense of professionalism and an appreciation for the obligations of a professional engineer. The Program offers ocean engineering continuing education activities for the people and marine industry of the state, nation and international community. The Program serves the public and engineering profession in Texas and the nation through participation of faculty and students in public and professional activities. Applied and fundamental research is conducted that contributes to the better understanding of ocean engineering and supports student educational development.
The program educational objectives of the Ocean Engineering Program are:

1. Graduates contribute to the ocean engineering profession and society.
2. Graduates gain employment in ocean engineering and related engineering fields with private and government organizations.
3. Graduates advance to positions of increased responsibility and develop professionally through training, technical conferences, and continuing education activities.
4. Some graduates become professional engineers and members of ocean engineering related professional societies.
5. Some graduates pursue graduate studies in ocean engineering and related fields and receive post baccalaureate degrees.

The Department of Ocean Engineering is a two-campus department with campuses located in College Station and Galveston, Texas. The laboratory facilities accessible to the Department of Ocean Engineering are among the most comprehensive in the nation for testing offshore, underwater, and coastal systems. The College Station facilities are located in the Offshore Technology Research Center, Zachry Engineering Education Complex, and the Haynes Engineering Building. These facilities include a large deep water wave basin, a wave channel, fluid dynamics laboratory equipment, and data acquisition systems. The facilities in Galveston include naval architecture, fluid dynamics, and geotechnical experimental equipment, and two wave channels. The Galveston campus also provides access to the Gulf of Mexico through the use of small boats and research vessels that are available for education and research. Additional information is available on the Department of Ocean Engineering website: http://engineering.tamu.edu/ocean (http://engineering.tamu.edu/ocean/).

Before commencing course work in the major, students must be admitted to the major or have the approval of the department head.

### Majors

- Bachelor of Science in Ocean Engineering (p. 474)

### Ocean Engineering - BS

The BS in Ocean Engineering degree emphasizes breadth across the various fields of ocean engineering field. Students take courses in all major sub-disciplines of ocean engineering with advanced electives allowing for deeper learning in focus areas. The degree is appropriate for any discipline of ocean engineering, with particular relevance for those interested in coastal works, off-shore energy (Oil & Gas and renewables), naval architecture, underwater robotics, and for those planning on further specialization in graduate studies. This degree program is offered on College Station and Galveston campuses.

For more information please see https://engineering.tamu.edu/ocean/index.html (https://engineering.tamu.edu/ocean/)

### Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.
4. BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.
5. For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

Harold Vance Department of Petroleum Engineering

Petroleum Engineering is concerned primarily with the safe and economic extraction of oil, gas, and other natural resources from the earth. Oil and gas is produced through the design, drilling and operation of wells and well systems, and the integrated management of the underground reservoirs in which the resources are found.

The mission of the Petroleum Engineering Department is to create, preserve, integrate, transfer and apply petroleum engineering knowledge and to enhance the human capability of its practitioners. The Petroleum Engineering Program has two educational objectives:

- graduates will have the technical depth and breadth to be successful professionals early in their careers; and
- graduates will have the broad technical knowledge and soft skills needed to rise to positions of professional leadership.

In essence, the goal of the Petroleum Engineering curriculum is to provide a modern engineering education with proper balance between fundamentals and practice, and to graduate engineers capable of being productive contributors immediately who are also prepared for life-long learning. The curriculum includes study of:

- design and analysis of well systems and procedures for drilling and completing wells;
- characterization and evaluation of subsurface geological formations and their resources;
- design and analysis of systems for producing, injecting and handling fluids;
- application of reservoir engineering principles and practices for optimizing resource development and management; and
use of project economics and resource valuation methods for design and decision making under conditions of risk and uncertainty.

There is a heavy emphasis on mathematics, computer applications, communication skills and interdisciplinary problem solving. As a result, Aggie petroleum engineers are in high demand in the industry, and their starting salaries are consistently among the top in the University and the nation.

The department is well known for its curriculum, facilities and faculty, and its undergraduate program was recognized as one of the top petroleum engineering programs in the United States. The faculty comprises more than 39 professors and lecturers, many of them widely known and globally involved in the petroleum industry. Two (2) of the faculty are members of the prestigious National Academy of Engineering, and 20 are Distinguished Members of the Society of Petroleum Engineers. The Bachelor of Science program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Students must work as interns within the Energy Industry. A minimum of one internship, six weeks of approved experience, is required for graduation. The department also participates in the Cooperative Education Program.

In addition to the Bachelor of Science degree in Petroleum Engineering, the department also offers both masters and doctoral degrees, including Master of Science, Master of Engineering, and Doctor of Philosophy (see the Texas A&M University Graduate and Professional Catalog).

The department offers a combined program designed to help students complete both a Bachelor's degree and a Master's degree within 5 years. For more information, please contact the advising office.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Petroleum Engineering - Minor

The Harold Vance Department of Petroleum Engineering offers a minor to students within the College of Engineering who are interested in a better understanding of petroleum engineering. Students pursuing the minor will take courses covering different component areas within petroleum engineering, such as drilling and production. Eligible students must submit an application in order to be considered for a minor in Petroleum Engineering.

Additional Requirements:

Minimum of 3.0 GPA with at least 30 hours of Texas A&M resident credit is required to enter the minor.

A grade of C or better is required in minor courses.

Energy Engineering - Certificate

The mission of the Energy Engineering Certificate program is to prepare graduates of the College of Engineering to face world energy supply and demand challenges, and to be effective in ensuring a sustainable energy future. To earn the Energy Engineering Certificate, a student must complete a minimum of 13 semester credit hours which includes one required course and three additional courses to be selected from a specified list. An overall GPA of 3.0 must be achieved to be awarded the certificate. Completion of the certificate will be recorded on the student’s University transcript.

For additional information, contact the Energy Engineering Certificate coordinator (https://engineering.tamu.edu/academics/certificates/energy.html).

Petroleum Ventures - Certificate

The Petroleum Ventures Certificate Program (PVP) sets Aggie petroleum engineers apart by giving them unparalleled exposure to business concepts, entrepreneurship, industry leaders and case-based learning opportunities where they work together with business students to solve problems and study real world energy companies. This interdisciplinary environment prepares them for leadership and expanded technical roles within the industry. The program is set up in collaboration with the Finance Department of the Mays Business School. PVP certificate holders are viewed as students who are committed to working hard to
further their education and to better prepare themselves for integrated roles in the industry.

The Petroleum Ventures Certificate Program (PVP) impacts the following student groups:

- Undergraduate petroleum engineering and finance students who have a desire to work in Energy Finance, Petroleum Investment Management, or have a goal of senior management of an oil and gas company and/or a goal of one day creating and managing their own energy company.
- Petroleum engineers and finance undergraduate students who are seeking specialized training.

General Statement
Planet Earth is our home. Humans live on land which occupies only 29 percent of Earth’s surface. The remainder is covered by ocean. An envelope of air surrounds Earth. These realms—the lithosphere, hydrosphere, and atmosphere—form the environment for life on this planet. The study of these realms and their interactions with the biosphere and human systems, comprises the Geosciences—Atmospheric Sciences, Geography, Geology and Geophysics, and Oceanography.

The College of Geosciences is home to four academic departments in these disciplines and interdisciplinary academic offerings in Environmental Programs and Water Management and Hydrological Sciences. To sustain human society into the future will depend on the innovation and application of discovery in the geosciences. The interdisciplinarity of our field is essential to solving today’s grand challenges—understanding global climate change, maintaining air and water quality, and producing adequate energy and food supplies for all people.

Geography studies humans and their interactions with the environment from a spatial perspective using a range of methods and geospatial technologies. As an interdisciplinary field, it synthesizes knowledge from the other geosciences as well as from the social and biological sciences. Geology and Geophysics deals with the processes and forces acting at the surface and within Earth: with the materials of Earth, its forms and structures, the history of its development and the evolution of life on its surface and in its waters, and the physics of solid Earth. This includes the measurement and understanding of its internal structure, physical properties, and plate motions and their effect on continents and ocean basins. It also includes the detection of natural resources through remote sensing. Atmospheric Sciences includes studies of weather/meteorology, climate and climate change, and air quality through the disciplines of atmospheric dynamics, atmospheric physics, and atmospheric chemistry. Oceanography is the study of the marine environment and its inhabitants. The distribution and nature of marine life, the development of ocean basins, the chemistry of ocean waters, and the dynamics of water masses are the major elements of Oceanography.

Atmospheric Sciences, Geography, Geology and Geophysics, and Oceanography offer BS, MS, and PhD degrees; a BA is also available in Geology. The College offers two interdisciplinary BS degrees through Environmental Programs: a BS in Environmental Studies and a BS in Environmental Geosciences. In addition, Geography offers a BS in Geographic Information Science and Technology and two University Studies BS degrees (concentrations in Geography and Geographic Information Science and Technology). The College offers an online Master of Geosciences degree with specialized tracks in Geographic Information Science and Technology, Petroleum Data Management, and ocean data science, in addition to hosting a graduate program leading to an MS and PhD in Water Management and Hydrological Sciences.

College of Geosciences faculty members participate in research on a broad front of both basic and applied subjects. The College is the Science Operator for the International Ocean Discovery Program (http://iodp.tamu.edu/), which is the largest geosciences research program in the world and explores the structure and history of sediments and crust beneath the sea floor. The College also hosts the Texas Sea Grant program. Other coordinated research programs in the College include the Geochemical and Environmental Research Group, the Center for Tectonophysics, the Berg-Hughes Center for Petroleum and Sedimentary Systems, the Center for Atmospheric Chemistry and the Environment and the Texas Center for Climate Studies. Field work takes both faculty and students around the world to learn about the wide range of environments and processes affecting Earth and its inhabitants. Consequently, faculty bring to their classes the excitement of discovery, state-of-the-art scientific equipment, a knowledge of useful applications to human problems, and good working relations with industry and governments, all of which can help the undergraduate prepare for a rewarding career.

Career opportunities for graduates in the Geosciences are evolving dynamically—in industry, business, education, and government at all levels. Geosciences professionals apply highly desirable and marketable skills in several areas: research essential to understanding an increasingly unpredictable Earth; search for sustainable energy, mineral, and water resources; prediction and mitigation of natural hazards; deployment of geospatial techniques in numerous domains; informing wise environmental policy development and decision-making; and teaching in high schools, colleges, and universities.

Double Major
Students in the College of Geosciences may elect to have two major fields of study within the College, or they may elect to have a major in the College of Geosciences in conjunction with a major in another college provided that both majors lead to the same baccalaureate degree; that is, both must lead to a BA or to a BS. Approval is required by the Associate Dean for Academic Affairs in the College of Geosciences, the current major department, and the proposed major department. Additional permissions may be required if a student elects a double major in two different colleges. Students seeking to double major must have a 3.0 overall GPA and a 3.0 in the current major at the time of application. Students pursuing a double major must:

1. satisfy all University and College requirements;
2. successfully complete departmental requirements in each major, if both majors are in the College of Geosciences; and
3. in cases where one major is in the College of Geosciences and the other is in another college, the student must successfully meet the major field of study requirements for each area as determined by each college.

Minors
Students may choose to complete a minor in the College of Geosciences. All minors will require not less than 15 hours and not more than 18 hours in the discipline; at least 6 hours must be upper-division courses in the discipline. Each student choosing to complete a minor must contact the department offering the minor to determine if specific courses are required.
Change of Major and Transfer Students

Change of Major students are welcomed in the College of Geosciences. Students seeking entry from another major must be in good academic standing, meet approval of the Associate Dean and have shown interest in their new intended major by taking at least one course in the subject. To begin the Change of Major process, students should first contact the academic advisor in the department to which they wish to change. If the student meets minimum criteria, he or she will be referred to the Associate Dean for approval and processing.

Students are welcomed to transfer into the College of Geosciences from other universities and community colleges. Overall, the College of Geosciences requires a prospective student to have completed, or be in progress of completing, a minimum of 24 hours from a list of courses specific to each major outlined on page 56 of this catalog with a cumulative minimum GPA of 2.5. The College of Geosciences is also participating in the Program for Transfer Admission as well as the Program for System Admission in cooperation with Prairie View A&M University, Tarleton State University, Texas A&M International University, Texas A&M University-Commerce, Texas A&M University—Corpus Christi, Texas A&M University—Kingsville, West Texas A&M University and Texas A&M University–Texarkana.

Teacher Certification

The need for highly qualified teachers is high in the state of Texas. Students in the College of Geosciences are encouraged to consider pursuing a career in teaching. A number of pathways to certification are available. Interested students should consult with their advisors early in their programs and consult options outlined on the certification website. The college collaborates with the College of Science and the College of Education and Human Development on the aggieTEACH Program (http://aggieteach.tamu.edu) and in the University Studies degree program in secondary science teaching. Students in Geography may obtain composite social studies certification with a specialty in Geography through the Secondary Post-Baccalaureate Certification Program (8-12) or alternative certification options.

University Honors Programs

The College of Geosciences participates in the University Honors Programs, which is described in detail at Honors and Undergraduate Research (p. 115).

International and Cultural Diversity Requirement

Texas A&M University requires its students to meet an International and Cultural Diversity requirement as part of the Graduation requirements. Meeting this requirement will require the careful selection of courses. The student is directed to Requirements for a Baccalaureate Degree (p. 31) section of this catalog for detailed information regarding this requirement and is also encouraged to seek the advice of the student's academic advisor.

Curricula — College of Geosciences

Environmental Geosciences
Environmental Studies
Geographic Information Science and Technology
Geography
Geology
Geophysics
Meteorology
Oceanography
University Studies—Geography
University Studies—GIST

Majors

College of Geosciences

- Bachelor of Science in Environmental Geoscience (p. 483)
- Bachelor of Science in Environmental Geoscience and Master of Ocean Science and Technology, 5-Year Degree Program (p. 487)
- Bachelor of Science in Environmental Studies (p. 488)

Atmospheric Sciences

- Bachelor of Science in Meteorology (p. 493)
- Bachelor of Science in Meteorology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 495)

Geography

- Bachelor of Science in Geographic Information Science and Technology, Computation, Design and Analysis Track (p. 498)
- Bachelor of Science in Geographic Information Science and Technology, Earth Systems and Analysis Track (p. 499)
- Bachelor of Science in Geographic Information Science and Technology, Human Systems and Society Track (p. 502)
- Bachelor of Science in Geography (p. 504)
- Bachelor of Science in University Studies, Geographic Information Science and Technology Concentration (p. 505)
- Bachelor of Science in University Studies, Geography Concentration (p. 506)

Geology and Geophysics

- Bachelor of Arts in Geology (p. 510)
- Bachelor of Arts in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 511)
- Bachelor of Science in Geology (p. 513)
- Bachelor of Science in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 514)
- Bachelor of Science in Geology and Master of Science in Geology, 5-Year Degree Program (p. 516)
- Bachelor of Science in Geophysics (p. 517)
- Bachelor of Science in Geophysics and Master of Science in Geophysics, 5-Year Degree Program (p. 518)

Oceanography

- Bachelor of Science in Oceanography, Marine Ecosystem Science and Health Track (p. 521)
- Bachelor of Science in Oceanography, Marine Ecosystem Science and Health Track and Master of Ocean Science and Technology, 5-Year Degree Program (p. 524)
- Bachelor of Science in Oceanography, Ocean Climate Track (p. 522)
- Bachelor of Science in Oceanography, Ocean Climate Track and Master of Ocean Science and Technology, 5-Year Degree Program
- Bachelor of Science in Oceanography, Ocean Observing Science and Technology Track (p. 523)
Minors

College of Geosciences
- Climate Change Minor (p. 491)
- Earth Sciences Minor (p. 491)
- Environmental Geosciences Minor (p. 492)

Department of Atmospheric Sciences
- Meteorology Minor (p. 496)

Department of Geography
- Geographic Information Science and Technology Minor (p. 508)
- Geography Minor (p. 508)

Department of Geology and Geophysics
- Geology Minor (p. 519)
- Geophysics Minor (p. 520)

Department of Oceanography
- Oceanography Minor (p. 528)

Masters

College of Geosciences
- Master of Geoscience in Geoscience (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/interdepartmental-degree-programs/mgsc/)

Department of Atmospheric Sciences
- Master of Science in Atmospheric Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/atmospheric-sciences/ms/)

Department of Geography
- Master of Science in Geography (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geography/ms/)

Department of Geology and Geophysics
- Master of Science in Geology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geology-geophysics/geology-ms/)
- Master of Science in Geophysics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geology-geophysics/geophysics-ms/)

Department of Oceanography
- Master of Ocean Science and Technology in Ocean Science and Technology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/oceanography/most/)
- Master of Science in Oceanography (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/oceanography/ms/)

Doctoral

Department of Atmospheric Sciences
- Doctor of Philosophy in Atmospheric Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/atmospheric-sciences/phd/)

Department of Geography
- Doctor of Philosophy in Geography (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geography/phd/)

Department of Geology and Geophysics
- Doctor of Philosophy in Geology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geology-geophysics/geology-phd/)
- Doctor of Philosophy in Geophysics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geology-geophysics/geophysics-phd/)

Department of Oceanography
- Doctor of Philosophy in Oceanography (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/oceanography/phd/)

Environmental Geoscience - BS

The increasing demands that population growth and affluence put on the natural resources and the Earth's environment require greater numbers of trained professionals and informed citizens. The BS degree in Environmental Geosciences embraces all the disciplines of geosciences to give the student a rigorous interdisciplinary education including issues associated with environmental policy. The degree trains students for employment by industry, environmental and engineering consulting firms, non-governmental organizations, and governmental regulatory agencies, among other entities. Students focus coursework in a particular environmental theme: coastal and marine environments, water, human impact on the environment, climate change, or biosphere.

Total Semester Credit Hours \( 120 \)

1 Freshmen entering the program take a first year seminar, GEOS 101. The choice is not restricted. Students transferring or changing majors into the program, who have not taken GEOS 101, are required to take GEOS 481 in their junior or senior year.

2 The graduation requirements include three hours of international and cultural diversity courses and three hours of cultural discourse courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

3 Choose one introductory College of Geosciences course in the first semester and an additional one in the second semester of the sophomore year. Seek guidance from the academic advisor for Environmental Programs in Geosciences (ENVP) or your faculty mentor.

4 PHYS 206 & PHYS 226 is recommended for the Coastal and Marine Environment Theme.

5 STAT 211 is recommended for the Coastal and Marine Environment Theme.

6 Choose 18 hours of theme courses in your junior and senior years in consultation with your academic advisor or faculty mentor from the list below.

7 GEOS 484 can be taken for up to 6 credits and will normally be used as an adjustment to theme electives, but depending on the content of the internship credit, it can be applied as an adjustment to your technical electives or policy electives. Seek guidance from the ENVP academic advisor.

8 Other courses which match the Environmental Programs' technical electives definition will be allowed by adjustment. Guidance about technical electives (including the definition used by the Environmental Programs in Geosciences) can be found on the programs' website. Seek guidance about choices from the ENVP academic advisor or faculty mentor.

9 GEOG 390 is a required technical elective.
Seek guidance about choices from the ENVP academic advisor or faculty mentor.

Two courses in the degree plan must be writing intensive courses designated by the Environmental Programs in the schedule of classes. Also, international and cultural diversity electives (3 hours) and cultural discourse electives (3 hours) must be incorporated into the degree.

Environmental Geoscience - 5-Year Bachelor of Science/Master of Ocean Science and Technology

The combined program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing the Bachelor of Science (B.S.) degree in the Environmental Geosciences program and the Master of Ocean Science and Technology degree in 5 years. There will be two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.S. coursework (120 undergraduate credit hours including 6 dual credit graduate hours) and Master of Ocean Science and Technology coursework (36 credit hours including the 6 dual credit graduate hours) to complete the required credit hours for each degree without diminishing scope or quality of work within 5 years.

Application and Eligibility:

- Applications to the combined program will be submitted by June 15 after the completion of the student's junior year. Applications submitted after that time will be evaluated on a case by case basis. GRE scores are not required for admission to the program.
- Applicants must have a minimum undergraduate GPA of 3.25. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPA on all graduate coursework.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the combined program must finish the entire 150 credit hours to obtain both the Bachelor's and Master's degrees. Students will graduate at the completion of the 5th year of the combined program coursework (150 credit hours) with both Bachelor's and Master's degrees.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 90 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the combined program will complete the 120-hour Bachelor’s degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

### Environmental Studies - BS

The increasing demands that population growth and affluence put on Earth’s natural resources and environment require greater numbers of trained professionals and informed citizens. The Bachelor of Science degree in Environmental Studies blends an interdisciplinary understanding of Earth’s surface processes and environmental problems, along with the policy and decision-making components of human interactions with the environment. The degree is designed to educate students about the scientific, human-dimension and policy aspects of environmental issues facing our state and nation as they work in regulatory agencies, industry, and non-governmental organizations to resolve problems. Students focus upper division coursework in one of five environmental themes: 1) urban environment, 2) occupational health and safety, 3) environmental regulation and compliance, 4) Geographic Information Science and Technology (GIST), and 5) global environment.

- GEOS 470: Data Analysis Methods in Geosciences 4
- PHYS 207: Electricity and Magnetism for Engineering and Communication Sciences 4
- Creative Arts (p. 29) 2 3
- Environmental Policy elective 3 3
- Semester Credit Hours 17

### Fourth Year

#### Fall
- GEOG 390: Principles of Geographic Information Systems 4 7
- GEOS 405: Environmental Geosciences 3
- OCNG 604: Ocean Observing Systems 4, 6 3
- OCNG 608: Physical Oceanography 4, 5, 6 3
- OCNG 603: Communicating Ocean Science 3
- Semester Credit Hours 16

#### Spring
- OCNG 657: Data Methods and Graphical Representation in Oceanography 5 3
- Fundamentals of Ocean Science Course 6
- Select two of the following: 5
  - OCNG 620: Biological Oceanography
  - OCNG 630: Geological Oceanography
  - OCNG 640: Chemical Oceanography
- Coastal and Marine Environments theme elective 3, 4 3
- Technical elective 3 5
- Semester Credit Hours 17

### Fifth Year

#### Fall
- Advanced specialized OCNG graduate course 3
- Advanced specialized OCNG graduate course 3
- Advanced specialized OCNG graduate course 3
- Semester Credit Hours 9

### Total Semester Credit Hours
- 150

1. Freshmen entering the program take a first year seminar, GEOS 101. The choice is not restricted. Students transferring or changing majors into the program, who have not taken GEOS 101, are required to take GEOS 481 in their junior or senior year.
2. The graduation requirements include three hours of international and cultural diversity (p. 47) courses and three hours of cultural discourse (p. 46) courses.
3. Select in consultation with advisor.
4. If students use nine credits of allowed OCNG courses (e.g., OCNG 350, OCNG 451, OCNG 485) as Coastal and Marine Environments theme electives, they will receive an OCNG minor with their BS in ENGS degree. If one of the Introductory Geoscience course and associated labs listed in Year Two is OCNG 251 with OCNG 252, then only two credits (6 credits) of the theme electives needs to be from OCNG to still get the minor.
5. Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 440/OCNG 640; GEOS 470/OCNG 655).
6. These two graduate courses will be taken for dual undergraduate/graduate credit and may contribute to a minor or technical elective.
7. Fulfills a technical elective.

Two courses in the degree plan must be writing intensive courses designated by the Environmental Programs in the schedule of classes. Also, international and cultural diversity electives (3 hours) and cultural discourse (3 hours) must be incorporated into the degree.

Any of the required courses may be taken during the summer sessions to diminish the heavy semester loads during Years 2 and 3.

The program includes a total of 156 hours with 6 hours being applied toward both the Bachelor of Science in Environmental Geosciences and the Master of Ocean Science and Technology.

Semester Credit Hours: 12

Total Semester Credit Hours: 120

1. Choose one introductory College of Geosciences course in the first semester and an additional one in the second semester of the freshman year.
2. It is recommended to select a course that also fulfills an international and cultural diversity (p. 47) and/or cultural discourse (p. 46) requirement. The graduation requirements include three hours of international and cultural diversity courses and three hours of cultural discourse courses.
3. Choose one Life and Physical Science Elective in the first semester and an additional one in the second semester of the sophomore year.
4. Choose 15 hours of courses in your chosen environmental theme from the list below.
5. Other courses which match the Environmental Programs' technical electives definition will be allowed by adjustment. Seek guidance regarding potential adjustments from the ENVP academic advisor.
6. KINE 199, MATH 102, MATH 150, and lower level AERS (p. 876), MLSC (p. 1081), NVSC (p. 1100), and SOMS (p. 1146) courses cannot be used as general electives.

Two courses in the degree plan must be writing intensive courses designated by the Environmental Programs in the schedule of classes.

Also, international and cultural diversity electives (3 hours) and cultural discourse (3 hours) must be incorporated into the degree.

Climate Change - Minor

Climate change is one of the most pressing issues of our time. It will impact every aspect of our lives, and unless our economies take aggressive action to reduce emissions, today’s students will live through climate change unprecedented in modern human history. The minor in climate change aims to provide an overview of how the climate system works from an earth systems sciences perspective and how humans and the environment interact within it. The Climate Change minor draws on multiple courses exploring the science of climate change as well as the multitude of impacts ranging from farming and food production, water availability, ocean acidification to the potential of sustainable energy to replace fossil fuels, as well as the policy decisions governments are making. Students learn about climate change and how to understand and forecast its potential impacts from varied disciplinary and interdisciplinary perspectives, while getting a firm grounding in the basic physical, ecological and social sciences.

Total Semester Credit Hours 16

Students choosing to complete a minor in Climate Change must meet the following requirements:

- A minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.
- Take a minimum of 16 hours of coursework, of which 3 hours of GEOS 210 Climate Change are required.
- The remaining 13 hours must include at least 3 hours of 400-level coursework and another 3 hours of upper-level (300- or 400-level) coursework from the list.
- Students with majors in the College of Geosciences must select only courses outside of their home department.
- ENGS students may not select this minor.

Earth Sciences - Minor

The minor in Earth Sciences encompasses a broad interdisciplinary scientific study of the origin and evolution of the Earth system and its life forms. This branch of science explores the physical and chemical processes of the Earth focusing on the interactions across the four main branches of study, the lithosphere, the hydrosphere (fresh water and the oceans), the atmosphere, and the biosphere. The Earth Sciences minor embraces a wide range of topics including, earth-surface processes, the behavior of oceans and atmosphere, geologic disasters, sustainable energy, remote sensing of the Earth, and the impact of humans on the environment. The minor exposes students to Earth system processes and problems, environmental problems, and training in problem-solving skills.

Environmental Geosciences - Minor

The minor in Environmental Geosciences embraces all geosciences disciplines to give the student a rigorous interdisciplinary education including issues associated with environmental policy. Coursework centers on atmospheric sciences and air quality, resources and the environment, oceanography and marine pollution, environmental geology, and climate change. The minor prepares students for careers in industry, environmental and engineering consulting firms, non-governmental organizations, and governmental regulatory agencies, among other entities.

Program Requirements

Some of the courses have prerequisites so make sure to check the catalog before enrolling in the course.

Department of Atmospheric Sciences

Atmospheric sciences is an interdisciplinary field encompassing the physics and chemistry of the atmosphere, along with its interaction with the Earth's surface and oceans. Scientists in this field use their knowledge to improve weather forecasts, model cloud and precipitation processes, understand the climate system, observe the atmosphere with radar and satellites, and probe atmospheric chemistry and air quality. The study of this field is based on principles from physics, chemistry and mathematics, and well prepared students will have a solid grounding in all three disciplines.

Students in the Department of Atmospheric Sciences benefit from relatively small classes and low student-to-teacher ratios. Many opportunities are available for participating in faculty-led research programs, including national and international field campaigns, often culminating in presentations at national conferences.

Faculty

Bowman, Kenneth P. Professor
Atmospheric Sciences
PhD, Princeton University, 1984
Brooks, Sarah D, Professor
Atmospheric Sciences
PhD, University of Colorado, 2002

Conlee, Don T, Instructional Professor
Atmospheric Sciences

Atmospheric Sciences
PhD, Massachusetts Institute of Technology, 1994

**Majors**

- Bachelor of Science in Meteorology (p. 493)
- Bachelor of Science in Meteorology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 495)

**Minors**

- Meteorology Minor (p. 496)

**Facilities**

The Department of Atmospheric Sciences occupies the upper floors of the 15-story Oceanography and Meteorology Building. The Doppler weather radar on the roof of the building is a campus landmark and is used for both research and teaching. The department also operates a mobile Doppler radar for use in research projects. The department has four state-of-the-art chemistry labs, in which phenomena from ozone to aerosols are studied, as well as facilities for modeling the chemical environment. A continuous, comprehensive stream of meteorological data is received from ground stations, balloons, aircraft, radars, and satellites around the world. Two well-equipped computer labs are regularly upgraded to provide state-of-the-art educational equipment.

**Meteorology - BS**

The Department of Atmospheric Sciences offers the Bachelor of Science degree in Meteorology. The undergraduate curriculum in meteorology emphasizes weather and weather forecasting, but also includes courses in climatology, atmospheric chemistry, cloud physics and remote sensing of the atmosphere with radar and satellites. As the curriculum makes clear, the study of these subjects relies on a foundation of physics, chemistry and mathematics. Meteorology also has connections to oceanography and other geosciences disciplines, which may be taken as elective courses.

Students who receive BS degrees in Meteorology often obtain employment with the National Weather Service, private meteorological consulting and weather forecasting companies, air quality consulting firms, airlines, TV stations, energy trading companies, universities, state governments, agricultural firms and computer-related industries. Some students choose to enter the military services as weather officers. Positions in teaching and research normally require a graduate degree.
Students interested in cooperative educational arrangements and internships should contact the department’s academic advisor for information.

In the curriculum presented, students are advised to note the prerequisites for the courses in ATMO, which often depend on courses in mathematics, physics or chemistry.

**Total Semester Credit Hours**

1 | A grade of C or better is required.

2 | General electives may not include CAEN 101-499; CAEX 101-499; DEVS 101-499; ENG 103; KINE 198-199 (p. 1041); MATH 102, MATH 141-142 (p. 1066), MATH 150-152 (p. 1066), MATH 171-172 (p. 1066), MATH 221, MATH 251, MATH 253; PHYS 101, PHYS 201-202 (p. 1115), PHYS 218-219 (p. 1115); AERS 100-499 (p. 876); MLSC 100-499 (p. 1081); NVSC 100-499 (p. 1100); SOMS 100-499 (p. 1146).

3 | MLSC, NVSC and AERS courses can be used as general electives if a minor is completed in Military Science. See an academic advisor for more information.

4 | All students enter as Lower Level Meterology (METL) until completion of ATMO 335 and ATMO 336 and the associated prerequisite courses. Once students have completed these courses, their major will be changed to Upper Level Meterology (METR), and they will be eligible to take upper-level electives. This change should occur following Fall of the junior year.
Select in consultation with faculty academic advisor. Select from ATMO 281, 300-499 (except ATMO 321); GEOG 400-499; GEOS 400-499; MATH 311, 400-499; OCNG 400-499. Up to 3 hours may be ATMO 484-Broadcast Internship and up to 6 hours may be ATMO 484-NWS Internship. SCSC 301; BESC 403; BIOL 111; CHEM 227, CHEM 237; ESSM 308, ESSM 309. Only 6 hours of 484 and 491 courses may apply towards this requirement.

Meteorology - 5-Year Bachelor of Science/Master of Ocean Science and Technology

The combined program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing both the Bachelor of Science degree in the Department of Atmospheric Sciences Meteorology Program and the Master of Ocean Science and Technology degree in 5 years. There will be two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.S. coursework (120 undergraduate credit hours, including 6 dual credit graduate hours) and Master of Ocean Science and Technology coursework (36 credit hours, including the 6 dual credit graduate hours) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

Application and Eligibility

- Applications to the combined program will be submitted by June 15 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis. GRE scores are not required for admission to the program.
- Applicants must have a minimum undergraduate GPA of 3.25. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPA on all graduate coursework.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the combined program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. Students will graduate at the completion of the 5th year in the combined program coursework (150 credit hours) with both Bachelor’s and Master’s degrees.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 90 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the combined program will complete the 120-hour Bachelor’s degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

Total Semester Credit Hours 150

A grade of C or better is required.
2 General electives may not include CAEN 101-499; CAEX 101-499; DEVS 101-499; ENGL 103; KINE 198-199 (p. 1041); MATH 102, MATH 131, MATH 141-142 (p. 1066), MATH 150-152 (p. 1066), MATH 171-172 (p. 1066), MATH 221, MATH 251, MATH 253; PHYS 101, PHYS 201-202 (p. 1115), PHYS 208, PHYS 218-219 (p. 1115); AERS 100-499 (p. 876); MLSC 100-499 (p. 1081); NVSC 100-499 (p. 1100); SOMS 100-499. (p. 1146)
3 GEOS 101 recommended.
4 Students must complete 6 credit hours of American history and 6 credit hours of government/political science.
5 MLSC, NVSC and AERS courses can be used as general electives if a minor is completed in Military Science. See an academic advisor for more information.
6 All students enter as Lower Level Meteorology (METL) until completion of ATMO 335 and ATMO 336 and the associated prerequisite courses. Once students have completed these courses, their major will be changed to Upper Level Meteorology (METR), and they will be eligible to take upper-level electives. This change should occur following Fall of the junior year.
7 Select in consultation with faculty academic advisor. Select from ATMO 281, 300-499 (except ATMO 321); GEOG 400-499; GEOS 400-499; MATH 311, MATH 400-499; OCNG 400-499. Up to 3 hours may be ATMO 484-Broadcast Internship and up to 6 hours may be ATMO 484-NWS Internship. SCSC 301; BESC 403; BIOL 111; CHEM 227, CHEM 237, ESSM 308, ESSM 309. Only 6 hours of 484 and 491 courses may apply towards this requirement.
8 If students use nine credits of allowed OCNG courses (e.g. OCNG 251, OCNG 252, OCNG 350, OCNG 451, OCNG 485) as technical electives and general electives, they will receive an OCNG minor with their BS in METR degree.
9 Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 440/OCNG 640).
10 Two graduate courses will be taken for dual undergraduate/graduate credit and will contribute to the technical electives.

The program includes a total of 156 hours with 6 hours being applied toward both the Bachelor of Science in Meteorology and the Master of Ocean Science and Technology.

Meteorology - Minor

The minor in Meteorology begins with a broad survey of the atmospheric sciences and associated weather analysis, followed by a more detailed introduction to at least one subdiscipline of the atmospheric sciences, such as atmospheric chemistry, dynamics, computer applications, or severe weather. The minor also introduces students to related Earth systems topics, such as oceanography, Earth-surface processes, or atmosphere-biosphere interactions. Students interested in pursuing the minor are encouraged to meet with the department's academic advisor to identify appropriate courses.

- GEOS 300 to 499 (p. 1008)

Total Semester Credit Hours 16

Must maintain a minimum GPR of 2.000 in order to pursue this minor.

At least 9 hours of ATMO courses are required and a minimum of 3 hours at the 400 level.

**Department of Geography**

Geography is the study of the relationships between people and their environment, relationships that vary from place to place over the Earth. Geography students assess those factors responsible for the variable and changing character of Earth’s systems, which over time have been transformed into human habitat. Geography integrates physical science, social science, and the humanities. The Department requires that students understand both the physical and human components, and develop the spatial analytical skills to study these systems.

Physical geography emphasizes a systematic and interdisciplinary approach to the study of landforms, climate, soils, and vegetation. Human geography seeks to describe and explain the spatial patterns of human activities on Earth. These range from economic activities such as the distribution of retail sales and industrial production to cultural landscapes, which often have strong historical roots. Geographic Information Science (GIS), quantitative methods, and remote sensing provide geographers with the analytical techniques to study spatial phenomena.

growth in geospatial technology-related degrees are projected by the U.S. Department of Labor. Students have employment opportunities with the following corporate and government entities:

- Government agencies (federal, state, county, and city): management and planning of urban infrastructure, inventory and assessment of natural resources including agriculture, forestry, and water resources.
- Energy industry: assessing biofuel production and identifying locations suitable for renewable energy resources and mineral exploration.
- Health science industry: determine hotspots of health events and explore causes.
- Military and intelligence community: numerous opportunities exist in military branches and agencies such as the Central Intelligence Agency, National Security Agency, and other intelligence organizations.
- Commercial industries: business analytics and marketing, as spatial information can be used to target marketing campaigns, and suitable site assessment to locate companies.
- Geospatial industries: software development, geotechnical engineering, and technology development.

Students select courses with the assistance of the academic advisor in an individualized advising system.

1 Department requires that you take two in the same discipline to meet this requirement.
3 Track electives comprise 6 hours of focused coursework. The track and specific courses within the track are to be chosen in consultation with the advisor and/or faculty mentor.

Two courses in the degree plan must be Writing Intensive courses designated by the department in the schedule of classes. Also, International and Cultural Diversity Elective (3 hours) and Cultural Discourse (3 hours) must be incorporated into the degree.

Geographic Information Science and Technology - BS, Earth Systems Analysis Track

The BS degree in Geographic Information Science and Technology (GIST) requires coursework in either the Computation, Design, and Analysis (CDA) track, Earth Systems Analysis (ESA) track, or the Human Systems and Society (HSS) track.

The Earth Systems and Analysis (ESA) track is designed to attract students interested in applying GIST to physical geography. It applies

geospatial technologies to the study of the Geosciences and assessing the Earth's natural resources by providing students with a foundation in biogeography, climate, geomorphology, soil science, geology, ecosystem science, as well as a strong grounding in GIST.

Students will receive a rigorous and modern-day education and training in GIST with application knowledge in physical and human geography. Employers require problem solvers, not button pushers, to address problems in various application domains. The B.S. in GIST is designed to:

- Provide modern-day exposure to the rapidly changing field of GIST
- Balance education and training with a focus on competency
- Provide application and problem-solving experiences
- Support student activities and research
- Provide students with professional experience
- Produce high-quality geographers with strong GIST knowledge and skills

Geospatial technology graduates are in extremely high demand and, according to the U.S. Department of Labor, are one of the highest growth areas in the federal government, particularly in homeland security activities, as well as in energy, software and engineering firms, biomedical and biohazard research, among many others. A 35% annual rate of growth in geospatial technology-related degrees are projected by the U.S. Department of Labor. Students have employment opportunities with the following corporate and government entities:

- Government agencies (federal, state, county, and city): management and planning of urban infrastructure, inventory and assessment of natural resources including agriculture, forestry, and water resources.
- Energy industry: assessing biofuel production and identifying locations suitable for renewable energy resources and mineral exploration.
- Health science industry: determine hotspots of health events and explore causes.
- Military and intelligence community: numerous opportunities exist in military branches and agencies such as the Central Intelligence Agency, National Security Agency, and other intelligence organizations.
- Commercial industries: business analytics and marketing, as spatial information can be used to target marketing campaigns, and suitable site assessment to locate companies.
- Geospatial industries: software development, geotechnical engineering, and technology development.

Students select courses with the assistance of the academic advisor in an individualized advising system.

growth in geospatial technology-related degrees are projected by the U.S. and biohazard research, among many others. A 35% annual rate of activities, as well as in energy, software and engineering firms, biomedical areas in the federal government, particularly in homeland security according to the U.S. Department of Labor, are one of the highest growth problems in various application domains. The BS in GIST is designed to: 

Employers require problem solvers, not button pushers, to address in GIST with application knowledge in physical and human geography. Students will receive a rigorous and modern-day education and training provides students a solid grounding in GIST. 

The Human Systems and Society (HSS) track is designed to attract students interested in applying GIST to human geography. It emphasizes social sciences, human-environment relationships, and the planning and management of human resources and urban environments, as well as provides students a solid grounding in GIST.

Students will receive a rigorous and modern-day education and training in GIST with application knowledge in physical and human geography. Employers require problem solvers, not button pushers, to address problems in various application domains. The BS in GIST is designed to:

• Provide modern-day exposure to the rapidly changing field of GIST
• Balance education and training with a focus on competency
• Provide application and problem-solving experiences
• Support student activities and research
• Provide students with professional experience
• Produce high-quality geographers with strong GIST knowledge and skills

Geospatial technology graduates are in extremely high demand and, according to the U.S. Department of Labor, are one of the highest growth areas in the federal government, particularly in homeland security activities, as well as in energy, software and engineering firms, biomedical and biohazard research, among many others. A 35% annual rate of growth in geospatial technology-related degrees are projected by the U.S.

Department of Labor. Students have employment opportunities with the following corporate and government entities:

• Government agencies (Federal, state, county, and city): management and planning of urban infrastructure, inventory and assessment of natural resources including agriculture, forestry, and water resources.
• Energy industry: assessing biofuel production and identifying locations suitable for renewable energy resources and mineral exploration.
• Health science industry: determine hotspots of health events and explore causes.
• Military and intelligence community: numerous opportunities exist in military branches and agencies such as the Central Intelligence Agency, National Security Agency, and other intelligence organizations.
• Commercial industries: business analytics and marketing, as spatial information can be used to target marketing campaigns, and suitable site assessment to locate companies.
• Geospatial industries: software development, geotechnical engineering, and technology development.

Two courses in the degree plan must be Writing Intensive courses designated by the department in the schedule of classes. Also, International and Cultural Diversity Elective (2 hours) and Cultural Discourse (3 hours) must be incorporated into the degree.

Geographic Information Science and Technology - BS, Human Systems and Society Track

The BS degree in Geographic Information Science and Technology (GIST) requires coursework in either the Computation, Design, and Analysis (CDA) track, Earth Systems Analysis (ESA) track, or the Human Systems and Society (HSS) track.

The Human Systems and Society (HSS) track is designed to attract students interested in applying GIST to human geography. It emphasizes social sciences, human-environment relationships, and the planning and management of human resources and urban environments, as well as provides students a solid grounding in GIST.

Students select courses with the assistance of the academic advisor in an individualized advising system.

1 8 hours required. Department requires that you take two in the same discipline to meet this requirement.
2 Track electives comprise 6 hours of focused coursework. The track and specific courses within the track are to be chosen in consultation with the advisor and/or faculty mentor.
3 19 hours required. To be selected from the following or chosen in consultation with an advisor.

1. 8 hours required. Department requires that you take two in the same discipline to meet this requirement.
2. Track electives comprise 6 hours of focused coursework. The track and specific courses within the track are to be chosen in consultation with the advisor and/or faculty mentor.

19:20 hours required. To be selected from the following or chosen in consultation with Advisor.

Two courses in the degree plan must be Writing Intensive courses designated by the department in the schedule of classes. Also, International and Cultural Diversity Elective (3 hours) and Cultural Discourse (3 hours) must be incorporated into the degree.

**Geography - BS**

A student seeking a Bachelor of Science degree in Geography is expected to complete a minimum curriculum of 48 hours, with 42 of those hours in Geography including 9 hours chosen from any upper-level course in Human Geography, Geography of the Natural Environment, Human-Environment Interactions, or Geographic Information Science and Technology. Geography courses may include field trips outside scheduled class hours, including study abroad experiences.

Geography graduates apply their knowledge and analytical skills for jobs applying locational and environmental analysis for rewarding careers in education, business, or industry, local, state, and federal agencies, as well as nonprofit organizations. Advanced degrees provide greater career opportunities.

For students interested in a career in education, the Department of Geography works closely with the Department of Teaching, Learning, and Culture. Geography is part of a Social Studies composite degree program that prepares students to teach at middle and high school levels.

4 Courses to be selected in consultation with advisor. Select any courses from 100-499 not used elsewhere. (Except AERS 100-499 (p. 876); ASCC 100-499 (p. 908); ENGL 103, KINE 198, KINE 199; MATH 102-104, 131, 141-142, 150-151, 166, 171 (p. 1066); MLSC 100-499 (p. 1081); NVSC 100-499 (p. 1100); SOMS 100-499 (p. 1146); STAT 211, STAT 302, STAT 303.;)  
5 Choose from any 300 or 400-level geography course.

**University Studies - BS, Geographic Information Science and Technology Concentration**

The broad objective of the academic discipline of Geography is to understand and improve the human environment: Earth. Understanding Earth requires a consideration of both natural and social processes, hence Geography is by nature interdisciplinary. Human-Environment interactions are of particular interest in Geography. The area of concentration in Geographic Information Science and Technology offers students a broad perspective of Earth as a human habitat, while permitting them to complete two supporting minors in other disciplines. The area of concentration is flexible in that numerous courses are included to permit a student to build a course of study in geography that is tailored to his or her interests. Ideally, the minors would be in related fields to build depth and breadth around themes that the student wishes to emphasize.

Total Semester Credit Hours 120

1. Geographic Information Science and Technology (GIST): minimum of 15 credits in the discipline at 300-400 level.
2. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.
3. Students must meet with the department’s advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).
4. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.

**Geography - Minor**

Geography explores the relationships between people and their environment, which vary from place to place over the Earth. Geographers compare and quantify the drivers of the variable and changing character of Earth’s systems, which have been transformed into human habitat and are thus being changed by humans. Geography coursework for the minor integrates physical sciences, social sciences, and the humanities.

**General Requirements**

1. Geographic Information Science and Technology (GIST): minimum of 15 credits in the discipline at 300-400 level.
2. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.
3. Students must meet with the department’s advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).
4. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.

**Geographic Information Science and Technology - Minor**

Geographic Information Science and Technology (GIST) is used to solve problems associated with land administration, environment and natural resource management, planning and population studies, as well as traditional surveying and mapping applications. GIST uses GIS, remote sensing, and global positioning mapping to collect, analyze, and display spatial information.

GEOG 420  Geography of Terrorism
GEOG 435  Principles of Plant Geography
GEOG 440  History and Nature of Geography
GEOG 450  Field Geography
GEOG 489  Special Topics in...

Total Semester Credit Hours  16

The selection of courses must be made in agreement with the geography department advisor for minor programs.

Minimum GPA of 2.000 must be maintained in the minor coursework. 6 hours must be upper division courses, 3 of which must be at the 400-level.

General Requirements
1. Geography Minor: minimum of 16 credits in the discipline with at least 6 hours in upper-division courses, 3 hours of which must be at the 400 level.
2. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.
3. Students must meet with the department’s advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).
4. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.

Department of Geology and Geophysics

Geology
The field of geology includes the scientific study of all aspects of the solid Earth and the fluids within it, including the fundamental processes that shape it and the stewardship of its resources that benefits society. The undergraduate curricula in geology foster critical thinking, and the application of scientific skills to the study of Earth materials (rocks, minerals, fossils, structures, landforms and subsurface fluids) and geologic processes. Courses provide a broad background in geology, emphasize knowledge transfer from other sciences to geologic problems and emphasize hands-on application of knowledge through laboratories and field trips and promote application to practical problems in petroleum exploration, environmental management and civil engineering.

The Department of Geology and Geophysics offers two undergraduate programs in geology, the Bachelor of Arts and the Bachelor of Science. The BS program is appropriate for students seeking careers as geologists or preparing for graduate school in geology, whereas the BA program is designed for students wishing to combine geology with other disciplines. Details of the two programs are given below.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPA in all technical courses (geology, geophysics, chemistry, math and physics).

Geophysics
Geophysics includes all areas of scientific inquiry that deal with the physical state of Earth and other planets and the dynamic processes that act on and within planetary bodies. The Bachelor of Science in Geophysics is for students who wish to combine a proficiency in mathematics with an interest in Earth. The objective of this program is to develop a physically-motivated approach to the study of Earth phenomena, with an emphasis on collection and analysis of geophysical data for probing and imaging the Earth’s interior. Graduates will be well-prepared for careers in the energy and environmental industries, and for advanced study at top-ranked graduate programs.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPA in all technical courses (geology, geophysics, chemistry, math and physics).

Minors in Geology and Geophysics
The Department of Geology and Geophysics offers minors in two separate programs: Geology, Geophysics. Minors provide opportunities for broadening a student’s background and tailoring the curriculum to specific career goals. A minor in Geology or Geophysics may be especially beneficial to students majoring in fields that deal directly or indirectly with geological processes, such as agriculture, anthropology, archaeology, architecture, business, education, engineering, and soil science, to name a few.

Faculty
Bapst, David W, Instructional Assistant Professor  
Geology & Geophysics  
PHD, University of Chicago, 2013

Becker, Mauro R, Research Professor

- Bachelor of Arts in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 511)
- Bachelor of Science in Geology (p. 513)
- Bachelor of Science in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 514)
- Bachelor of Science in Geology and Master of Science in Geology, 5-Year Degree Program (p. 516)
- Bachelor of Science in Geophysics (p. 517)
- Bachelor of Science in Geophysics and Master of Science in Geophysics, 5-Year Degree Program (p. 518)

**Minors**

- Geology Minor (p. 519)
- Geophysics Minor (p. 520)

**Geology - BA**

The Bachelor of Arts in Geology provides a foundation in geology for students who are not planning a career as a geologist. This program provides a basis for science-related careers, such as environmental law, pre-college teaching, science journalism, and resource management and marketing. Graduates will supplement their curriculum in geology with a minor designed around their career goals. The minor requires a minimum
of 15 credit hours in one discipline, to be chosen in consultation with an advisor.

Because the BA program has less rigorous mathematics and physics requirements and less comprehensive geology requirements, the BS is considered the appropriate option for students considering graduate study in geology.

Total Semester Credit Hours 120

1. Fifteen hours of electives must be selected in a minor. Electives must be chosen in consultation with advisor.
2. Any 300- or 400-level geology or geophysics course not already required.
3. Any science, math, engineering or social science course that augments the degree with the approval of the advisor.
4. Three hours must be selected from courses that also satisfy the International and Cultural Diversity (p. 47) requirement and three hours must be selected from courses that also satisfy the Cultural Discourse (p. 46) requirement.
5. General electives may not include STLC 100-499; SLCX 100-499; DEVS 100-499; ENGL 100-499; KINE 198, KINE 199; MATH 102, MATH 142, MATH 150, MATH 151, MATH 168, MATH 171; AERS 100-499 (p. 876); MLSC 100-499 (p. 1081); NVSC 100-499 (p. 1100); SOMS 100-499 (p. 1146).

Geology - 5-Year Bachelor of Arts/Master of Ocean Science and Technology

The program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient 5-year combined program at Texas A&M, completing either the Bachelor of Science (B.S.) or Bachelor of Arts (B.A.) degree (in the Department of Geology and Geophysics) and the non-thesis Master of Ocean Science and Technology (in the
Department of Oceanography). There will be two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.A./B.S. coursework (120 undergraduate credit hours including 6 dual credit graduate hours) and Master of Ocean Science and Technology coursework (36 credit hours including the 6 dual credit graduate hours) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

Application and Eligibility:

- Applications to the combined program will be submitted by June 15 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis. GRE scores are not required for admission to the program.
- Applicants must have a minimum undergraduate GPA of 3.25. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPA on all graduate coursework.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the combined program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. Students will graduate at the completion of the 5th year in the combined program coursework (150 credit hours) with both Bachelor’s and Master’s degrees.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 90 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the combined program will complete the 120-hour Bachelor’s degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

Planning a research or university teaching career should pursue a PhD degree. Particular selections of electives can be used to refine the degree.

Some of society's most pressing problems, including groundwater contamination and remediation, water resources, and geologic hazards such as landslides, flooding and subsidence are addressed in the field of environmental geology. Environmental geologists typically find careers with environmental and engineering consulting companies and other industrial corporations, governmental agencies or academia. Students are well-prepared for the Association of State Boards of Geology (ASBOG) Fundamentals of Geology exam, which is required for appointment as a Professional Geologist or Geoscientist in many states. Specific elective classes recommended include CVEN 365, GEOG 331, GEOS 390, GEOL 410, GEOL 420, GEOL 440, GEOS 410 and approved classes in other departments including Soil Science, Chemistry, Physics and Civil Engineering.

Many geologists go on to employment in the field of petroleum exploration and extraction. Some of the required geology classes prepare students for this field. Additional recommended classes including GEOL 404, PETE 311, PETE 321, PETE 324 and PETE 402. Qualified students (GPA of 3.0 or higher with dean's permission) may also take related graduate courses during the senior year. Such classes include GEOL 619, GEOL 622, GEOL 623, GEOL 624, GEOL 668, and GEOP 629. These classes prepare students for graduate study, as well as provide training for those who may be interested in service jobs in the oil and gas industry between their undergraduate and graduate education.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPA in all technical courses (geology, geophysics, chemistry, math and physics). Some courses require field trips. Students must pay expenses incurred on such trips.

### Program Requirements

#### Geology - BS

The BS in Geology is considered the preparatory degree for careers in geological science. Graduates typically go on to careers in the energy and environmental industries, and advanced study at top-ranked graduate programs. The first two years of the BS program in Geology provide students with the basics of geology and the supporting fields of chemistry, physics and mathematics. The junior and senior years involve more advanced study in the field of geology and the opportunity to concentrate study in specific disciplines through the selection of technical electives. The Geology and Geophysics Department offers summer field camp (GEOL 350) in the Western US, in which students apply their geologic knowledge to collecting data and solving real problems during a four-week field season. Seniors will participate in a group research capstone course (GEOL 450), in which they work in teams with a faculty advisor to solve a current problem and communicate their findings and experience. Students also have opportunities to become involved in individual research problems with faculty members and can receive course credit for this activity through GEOL 291 and GEOL 491.

The BS is the appropriate degree for students intending to pursue graduate study in geology. Students desiring employment in the petroleum industry are encouraged to pursue an MS degree. Students planning a research or university teaching career should pursue a PhD degree. Particular selections of electives can be used to refine the degree.

Some of society's most pressing problems, including groundwater contamination and remediation, water resources, and geologic hazards such as landslides, flooding and subsidence are addressed in the field of environmental geology. Environmental geologists typically find careers with environmental and engineering consulting companies and other industrial corporations, governmental agencies or academia. **Total Semester Credit Hours**

1. The Graduation requirements include a requirement for three hours of International and Cultural Diversity (p. 47) courses and three hours of Cultural Discourse (p. 47) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.
2. Any science, math or engineering course that augments the degree with the approval of the advisor.

Geology - 5-Year Bachelor of Science/Master of Ocean Science and Technology

The program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient 5-year combined program at Texas A&M, completing either the Bachelor of Science (BS) or Bachelor of Arts (BA) degree (in the Department of Geology and Geophysics) and the non-thesis Master of Ocean Science and Technology (in the Department of Oceanography). There will be two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required BA/BS coursework (120 undergraduate credit hours including 6 dual credit graduate hours) and Master of Ocean Science and Technology coursework (36 credit hours including the 6 dual credit graduate hours) to complete the required credit hours for each degree without diminishing scope or quality of work within 5 years.

**Application and Eligibility:**

- Applications to the combined program will be submitted by June 15 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis. Once admitted to the program, students must maintain a minimum 3.0 GPA on all graduate coursework.
- Applicants must have a minimum undergraduate GPA of 3.25. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPA on all graduate coursework.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the combined program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. Students will graduate at the completion of the 5th year in the combined program coursework (150 credit hours) with both Bachelor’s and Master’s degrees.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 90 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the combined program will complete the 120-hour Bachelor’s degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

Advanced specialized OCNG graduate courses $^6$

Semester Credit Hours: 9

Total Semester Credit Hours: 150

---

1. Any of the required courses may be taken during the Summer Sessions to diminish the heavy semester loads during Years Two and Three.
2. A second W course is required. GEOL 312 is offered as a W option when taught by Dr. Julie Newman, and other GEOL electives also fulfill the W requirement (including GEOL 491 when arranged with the permission of the instructor).
3. Students must complete 6 credit hours of American history and 6 credit hours of government/political science.
4. Select in consultation with advisor.
5. Two graduate courses will be taken for dual undergraduate/graduate credit.
Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 410/OCNG 608, OCNG 440/OCNG 640).

Geology - 5-Year Bachelor of Science/Master of Science in Geology

The combined program in Geology is a 5-year path leading to a Bachelor of Science (BS) and a thesis option Master of Science (MS) in Geology. This program is designed to quickly prepare exceptional students who would like to either enter into the job market with an advanced degree or apply to PhD programs. Because the MS degree requires a thesis, it is highly recommended that interested students become involved in research project early in the undergraduate career. Areas of opportunity for research at both the undergraduate and MS levels include groundwater flow and use, paleontology and paleoecology, stratigraphy, structural geology, tectonophysics, petrology, geomorphology, environmental geology and geochemistry.

There are 150 total credit hours in the two degrees: 120 at the undergraduate level and 32 at the graduate level, including two hours of dual credit.

Application and Eligibility

- Students may apply for entrance to the graduate program when they reach 90 hours applied to their degree program, normally in the spring of their junior year.
- Applicants to this program are not required to submit GRE, but they must submit two letters of advocacy from faculty members, one of whom is willing to serve as the MS thesis advisor.
- Students admitted into the combined program must finish the entire 150 credit hours to obtain both the Bachelor's and Master's degrees. These students will be conferred with two degrees once they complete all requirements.
- Students not accepted into the combined program will complete the 120 hour Bachelor's degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

Geophysicists contribute to the field of environmental science by studying physical processes in the Earth's crust and atmosphere. Students must pay expenses incurred on such trips. Some courses in geophysics require field trips.

2.0 or better GPA in all technical courses (geology, geophysics, chemistry, mathematics). Courses during the junior and senior years emphasize theory with electives that focus on subsurface structures and processes and industry techniques. These students will be prepared for graduate study, as well as service jobs in the oil and gas industry between their undergraduate and graduate education. Additional recommended classes include GEOL 410, GEOL 420 and GEOL 440.

Many geophysicists find eventual employment in the petroleum industry, in which reflection seismology is the primary subsurface exploration tool. Students aiming for this field will supplement their background in seismic theory with electives that focus on subsurface structures and processes and industry techniques. These students will be prepared for graduate study, as well as service jobs in the oil and gas industry between their undergraduate and graduate education. Additional recommended classes include GEOL 306, GEOL 404 and PETE 311. Qualified students may also take related graduate courses during the senior year, including GEOP 629, GEOP 631 and GEOP 620. Students interested in seismic theory may take additional math classes, such as MATH 417, MATH 407 and MATH 414.

Geophysics - BS

Graduates with a BS in Geophysics go on to careers in the energy and environmental industries, and advanced study at top-ranked graduate programs. The first two years are similar to the BS in Geology, providing students with the fundamentals of geology, chemistry, physics, and mathematics. Courses during the junior and senior years emphasize knowledge transfer from the fields of math and physics to techniques and problems in both theoretical and applied geophysics. Technical electives allow students to focus on specific career objectives. Students are also encouraged to become involved in research problems with faculty members and can receive course credit for this activity through GEOP 291 and GEOP 491.

While graduates from the Geophysics program will have employment opportunities in industry, the rigor of this degree is designed to prepare students for advanced study. The MS degree is generally considered to be the preferred entry degree for professionals in the petroleum industry. Students interested in teaching in a university or research in an academic, government or industrial laboratory should seek the PhD.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPA in all technical courses (geology, geophysics, chemistry, math and physics). Some courses in geophysics require field trips. Students must pay expenses incurred on such trips.

Geophysicists contribute to the field of environmental science by working on traditional and emerging methods used for hydrogeological, structural and stratigraphic characterization of the uppermost 100 meters, with applications to shallow resource and groundwater assessment and the solution of environmental and engineering problems. Environmental geophysicists typically work as independent environmental consultants or with industrial corporation or government agencies. Other recommended classes include GEOL 410, GEOL 420 and GEOL 440.

The program includes a total of 152 or 156 hours which up to 2 or 6 hours may be applied toward both the Bachelor of Science in Geology and the Master of Science in Geology.
## Geophysics - 5-Year Bachelor of Science/Master of Science in Geophysics

The combined program in Geophysics is a 5-year path leading to a Bachelor of Science (BS) and a thesis option Master of Science (MS) in Geophysics. This program is designed to quickly prepare exceptional students who would like to either enter into the job market with an advanced degree or apply to PhD programs. Because the MS degree requires a thesis, it is highly recommended that interested students become involved in research project early in the undergraduate career. Areas of opportunity for research at both the undergraduate and MS levels include earthquake mechanisms and seismic wave propagation, theoretical and experimental studies of deformation of rocks and soft sediment, petrophysics and reservoir physics, marine studies of the structure of the oceanic crust and continental margins, near surface applied geophysics and archaeological geophysics.

There are 150 total credit hours in the two degrees: 120 at the undergraduate level and 32 at the graduate level, including two hours of dual credit.

### Application and Eligibility

- Students may apply for entrance to the graduate program when they reach 90 hours applied to their degree program, normally in the spring of their junior year.
- Applicants to this program are not required to submit GRE, but they must submit two letters of advocacy from faculty members, one of whom is willing to serve as the MS thesis advisor.
- Students admitted into the combined program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. These students will be conferred with two degrees once they complete all requirements.
- Students not accepted into the combined program will complete the 120 hour Bachelor’s degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

1 The Graduation requirements include a requirement for three hours of International and Cultural Diversity courses and three hours of Cultural Discourse courses. A course satisfying a Core category, a college/departmental requirement, or a free elective can be used to satisfy this requirement. See academic advisor.
2 Any science, math or engineering course that augments the degree with the approval of the advisor. At least four credits should be GEOL 491 Research.
3 Any Geophysics course, GEOP 1xx-GEOP 6xx
4 The MS degree is either Non-Thesis Option (36 total hours, with 6 hours double-counting with the undergraduate Technical Electives) or Thesis Option (32 hours, with 2 hours double-counting with Technical Electives). Graduate courses may be in Geology, Geophysics or a supporting math or science area, chosen with approval of the student's advisory committee. Students in the Thesis Option may include up to 8 hours of Research courses.

The program includes a total of 152 or 156 hours which up to 2 or 6 hours may be applied toward both the Bachelor of Science in Geophysics and the Master of Science in Geophysics.

Geology - Minor

A minor in Geology requires 15 hours of Geology or Geophysics courses, and may be especially beneficial to students majoring in fields that deal directly or indirectly with geological processes. These include agriculture, anthropology, archaeology, architecture, business, education, engineering, and soil science, to name a few.

Technical electives

Select from the following:
GEOL 100-499 (p. 1005) 2
GEOP 100-499 (p. 1008)

Total Semester Credit Hours 15
A minor in Geophysics requires 15 hours of Geology or Geophysics courses, with a minimum of 9 hours in Geophysics. The minor in geophysics may be especially useful to those in related technical fields who wish to apply their skills to problems in Earth science, such as mathematics, physics, and to those whose careers naturally intersect with the physics of earth materials, such as petroleum and civil engineering.

Program Requirements
1. Minimum of 15 credit hours in Geology or Geophysics.
2. Minimum of 6 credits must be taken in residence at either Texas A&M in College Station or Texas A&M in Galveston.
3. Minimum of 9 credit hours in Geophysics.
4. Maximum of 4 credits may be from selected courses in Geography or Oceanography, with approval of advisor. Any substitutions must be approved by the department head.
5. Minimum of 6 credits at the 300-400 level.
6. Minimum of 2.0 cumulative GPA for all courses in the minor.

Department of Oceanography

Studies in Oceanography
Oceanography is an interdisciplinary science that focuses on the oceans, their contents and their boundaries. Degree programs include BS in Oceanography, MS (thesis option) in Oceanography, PhD in Oceanography and a Master of Ocean Science and Technology (MOST) a non-thesis professional degree. In addition, qualified undergraduate students may participate in a 15-credit minor in Oceanography.

The BS in Oceanography provides students with an interdisciplinary education and training in one of three areas of ocean science: Ocean Observing Systems and Technology (OOST), Ocean Climate (OC) and Marine Ecosystem Science and Health (MESH). All students will gain skill in handling, evaluating and analyzing large datasets.

The Department of Oceanography also has a combined 5-year Bachelor's/ MOST Program in conjunction with Environmental Geosciences, Atmospheric Sciences and Geology. These combined programs offer motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing a Bachelor's degree in one of these majors: Environmental Geosciences (B.S.), Meteorology (B.S.), Geology (B.S. or B.A.) and the Master of Ocean Science and Technology degree in 5 years. There are only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program enables these motivated students to coordinate the required B.S coursework (114 undergraduate credit hours plus 6 dual credit graduate courses) and MOST coursework (36 credit hours including the 6 dual credit graduate courses) to complete the required credit hours for each degree without diminishing scope or quality of work within 5 years.

Minors

- Oceanography Minor (p. 528)

Oceanography - BS, Marine Ecosystem Science and Health Track

This track in Oceanography provides students with an interdisciplinary education and training in Marine Ecosystem Science and Health (MESH). Compared to the other OCNG BS tracks, the MESH track provides more emphasis in biology and chemistry as applied to ocean systems. All students will gain skill in handling, evaluating and analyzing large datasets.

The BS in Oceanography curriculum: 1) Provides students with an interdisciplinary understanding of the oceans and the processes affecting them for use in careers in marine science or other related fields; 2) Provides students with the skills to retrieve, evaluate, and analyze large oceanographic datasets such as those generated from long term oceanographic studies and observing systems; and 3) Emphasizes critical thinking and problem solving skills.

Students planning on attending graduate school are encouraged to also complete a minor in a STEM field. Many graduates will obtain jobs in a variety of fields including marine technical support, energy and transportation industries, insurance industries, hazard mitigation, marine operations, homeland security, oil spill response, etc.

Oceanography - BS, Ocean Climate Track

This track in Oceanography provides students with an interdisciplinary education and training in Ocean Climate (OC). Compared to the other OCNG BS tracks, the OC track provides more emphasis in advanced math skills that can be applied to understanding ocean climate interactions. All students will gain skill in handling, evaluating and analyzing large datasets.

The BS in Oceanography curriculum: 1) Provides students with an interdisciplinary understanding of the oceans and the processes affecting them for use in careers in marine science or other related fields; 2) Provides students with the skills to retrieve, evaluate, and analyze large oceanographic datasets such as those generated from long term oceanographic studies and observing systems; and 3) Emphasizes critical thinking and problem solving skills.

### Oceanography - BS, Ocean Observing Science and Technology Track

This track in Oceanography provides students with an interdisciplinary education and training in Ocean Observing Science and Technology (OOST). Compared to the other OCNG BS tracks, the OOST track provides more emphasis in statistics and ocean observing systems. All students will gain skill in handling, evaluating and analyzing large datasets.

The BS in Oceanography curriculum: 1) Provides students with an interdisciplinary understanding of the oceans and the processes affecting them for use in careers in marine science or other related fields; 2) Provides students with the skills to retrieve, evaluate, and analyze large oceanographic datasets such as those generated from long term oceanographic studies and observing systems; and 3) Emphasizes critical thinking and problem solving skills.

Students planning on attending graduate school are encouraged to also complete a minor in a STEM field. Many graduates will obtain jobs in a variety of fields including marine technical support, energy and transportation industries, insurance industries, hazard mitigation, marine operations, homeland security, oil spill response, etc.
Oceanography - BS, Marine Ecosystem Science and Health Track - 5-Year Bachelor of Science/Master of Ocean Science and Technology

The Department of Oceanography offers a 5-year (3+2) combined degree program that allows a Bachelor of Science in Oceanography major with a track in Marine Ecosystem Science and Health to enter the Master of Ocean Science and Technology at the start of their senior year (typically year four) at Texas A&M University. This enables students to receive their Oceanography undergraduate degree (BS) and a Master of Ocean Science and Technology (MOS) graduate degree in five years. For additional information, please visit https://ocean.tamu.edu/.

</table>

1. A grade of C or better is required.
2. Select from ATMO 363; BIOL 213, BIOL 214, BIOL 351; CHEM 315, CHEM 362, CHEM 383, CHEM 415; GENE 302; OCNG 350, OCNG 425, OCNG 453, OCNG 456, OCNG 469.
3. Select from OCNG 400-499 (p. 1104), ATMO 201, ATMO 203, ATMO 251, ATM 300-499 (p. 910); BIOL 213, BIOL 214, BIOL 300-399 (p. 919); BICH 300-499 (p. 916); CHEM 300-499 (p. 929); CVEN 221; GENE 300-499 (p. 999); GEOG 442/GEOS 442, GEOG 361, GEOG 370/MARS 370, GEOG 390; GEOS 442/GEOS 442, GEOS 444; MATH 251; MATH 300-499 (p. 1066); PHYS 221; PHYS 300-499 (p. 1115); OCEN 300-499 (p. 1101); STAT 212, STAT 400-499 (p. 1154).
4. Applied toward both the Bachelor of Science in Oceanography and the Master of Ocean Science and Technology.

Any of the required courses may be taken during the Summer Sessions to diminish the heavy semester loads during Years 2 and 3.

Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (OCNG 440/OCNG 640; GEOS 470/OCNG 655)

The program includes a total of 156 hours with 6 hours being applied toward both the Bachelor of Science in Oceanography and the Master of Ocean Science and Technology.
The Department of Oceanography offers a 5-year (3+2) combined degree program that allows a Bachelor of Science in Oceanography major with a track in Ocean Climate to enter the Master of Ocean Science and Technology at the start of their senior year (typically year four) at Texas A&M University. This enables students to receive their Oceanography undergraduate degree (BS) and a Master of Ocean Science and Technology (MOS) graduate degree in five years. ### Oceanography - Minor

Oceanography is an interdisciplinary science that focuses on the oceans, their contents and their boundaries. Degree programs are offered at the graduate level, leading to the Master of Science and the Doctor of Philosophy degrees in oceanography. In addition, various undergraduate courses are offered, and qualified undergraduate students may participate in a 15-credit minor in Oceanography. A minor consists of at least 15 hours from any of the undergraduate OCNG courses. At least 6 hours must be upper division courses in the minor.

1 At least 6 hours must be upper division courses.

### University Studies Programs

The College of Geosciences offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration of 26 hours and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

### Majors

- Bachelor of Science in University Studies, Geographic Information Science and Technology Concentration (p. 505)
- Bachelor of Science in University Studies, Geography Concentration (p. 506)

### University Studies - BS, Geographic Information Science and Technology Concentration

The broad objective of the academic discipline of Geography is to understand and improve the human environment: Earth. Understanding Earth requires a consideration of both natural and social processes, hence Geography is by nature interdisciplinary. Human-Environment interactions are of particular interest in Geography. The area of concentration in Geographic Information Science and Technology offers students a broad perspective of Earth as a human habitat, while permitting them to complete two supporting minors in other disciplines. The area of concentration is flexible in that numerous courses are included to permit a student to build a course of study in geography that
is tailored to his or her interests. Ideally, the minors would be in related fields to build depth and breadth around themes that the student wishes to emphasize.

Total Semester Credit Hours | 120

1 Department requires that you take 8 hours of Life & Physical Sciences in the same discipline to meet this requirement.

2 A graduation requirement includes 3 hours of International and Cultural Diversity (p. 47) course and 3 hours of Cultural Discourse (p. 46). A course satisfying a University Core category, a college/department requirement, or a general elective may be used to satisfy this requirement.

**University Studies - BS, Geography Concentration**

The broad objective of the academic discipline of Geography is to understand and improve the human environment: Earth. Understanding Earth requires a consideration of both natural and social processes, hence Geography is by nature interdisciplinary. Human-Environment interactions are of particular interest in Geography. The area of concentration in Geography offers students a broad perspective of Earth as a human habitat, while permitting them to complete two supporting minors in other disciplines. The area of concentration is flexible in that numerous courses are included to permit a student to build a course of study in Geography that is tailored to his or her interests. Ideally, the minors would be in related fields to build depth and breadth around themes that the student wishes to emphasize.

1  GEOG 301 and GEOG 305 cannot be used in combination to meet this requirement.
2  Department requires that you take 8 hours Life & Physical Sciences in the same discipline to meet this requirement.
3  Any 100-499 course not used elsewhere.

Two courses that meet the writing requirement are required.

A graduation requirement includes 3 hours of international and cultural diversity (p. 47) course and 3 hours of cultural discourse (p. 46). A course satisfying a University Core category, a college/department requirement, or a free elective may be used to satisfy this requirement.
COLLEGE OF LIBERAL ARTS

Administrative Officers
Dean - Pamela R. Matthews, Ph.D.
Associate Dean - Violet Johnson, Ph.D.
Associate Dean - Steven M. Oberhelman, Ph.D.
Associate Dean - Maria C. Escobar-Lemmon, Ph.D.
Associate Dean - Leroy Dorsey, Ph.D.
Associate Dean - Paul Wellman, Ph.D.
Assistant Dean - Kristine Brisco

General Statement
The College of Liberal Arts offers students an opportunity to explore the intellectual achievements of humankind through a disciplined and responsible study of issues that have been of enduring importance to people. Thus, courses in liberal arts help students develop a sensitivity to the questions and values that confront them in their daily lives. At the same time, skills are built which can be put to use in solving complex problems. One of the program's principal objectives is to achieve the hallmark of an educated person: a fundamental knowledge of the forces that have shaped and continue to direct our cultural identity.

The purpose of the undergraduate program in the College of Liberal Arts is to foster independent, critical thinking by offering students a broad education. To achieve this, the college supports the aims of the University Core Curriculum, which requires all students to engage in specific studies intended to promote an awareness of their heritage, their culture, and their environment. Students who choose to major in one of the Liberal Arts disciplines will complete a curriculum designed to promote this breadth of understanding while providing a focus through concentration in one specific area of study.

The first two years of undergraduate study in the College of Liberal Arts introduce students to the full range of arts, humanities, science, mathematics and social science areas that are established in the University Core Curriculum. During the last two years, students concentrate on their major and minor fields of study and complete their program with appropriate elective hours. Throughout the program, skills in critical thinking, problem-solving, collaboration, and communication are developed, strengthened and polished.

Many graduates with bachelor's degrees in liberal arts continue their study at the graduate level in an academic discipline or in a profession such as medicine or law. The majority go directly into the job market. Studies have shown that liberal arts graduates are very successful in a variety of activities in commerce, business, or public service because the knowledge and skills sets in critical thinking, communication, writing, problem-solving, and analytical thinking they have developed are valuable in today's world. Many businesses actively recruit liberal arts majors. Whether as a foundation for further study or as a broad education preparatory to positions in business, industry, and the public domain, a liberal arts degree has intrinsic worth and enduring value in providing knowledge for life.

General Degree Requirements
Degree requirements for Liberal Arts majors are organized into:

1. General Requirements, including University Core Curriculum requirements and College of Liberal Arts requirements
2. Requirements of the Major Field of Study
3. Requirements of the Minor Field of Study (if appropriate)
4. Electives

A minimum of 120 acceptable hours of coursework is required for the baccalaureate degree. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University.

General Requirements
The areas listed below include University Core Curriculum requirements and College of Liberal Arts requirements. The completion of requisite hours in these areas will thus satisfy both University Core Curriculum and college requirements.

Total Semester Credit Hours  

1 Students must demonstrate the ability to express themselves in acceptable written English. The College requirement is satisfied if a student earns a grade of C or better in ENGL 203. Students who do not meet this standard must repeat the course prior to completing 60 hours and earn a grade of C or better or must immediately arrange with the director of the writing laboratory to be certified as competent in writing.  

2 ENGL 203 will count toward the Communication requirement or the Literature in English requirement, but will not count toward both requirements.  

3 Students must take a foreign language placement test if they:  
   - intend to enroll for the first time in a college Spanish, French, German, Russian, Arabic, Chinese, Japanese, Classical Greek, Italian, or Latin course and  
   - have knowledge of the language acquired in any way  

The placement test serves as a basis for credit by examination. Placement tests are offered throughout the calendar year by the Department of Hispanic Studies for Spanish and by the Department of International Studies for all other languages. Students who have taken the Advanced Placement (AP) test or the Reading Achievement test in their foreign language of choice may substitute the test results for the placement exam.  

4 No course used to fulfill this requirement may fulfill any other college or University requirement except in the minor field of study.  

5 Minimum of 3 and maximum of 6 semester credit hours in Creative Arts.  

6 Courses in military, air or naval science may not be substituted for University requirement except in the minor field of study.  

7 The list of approved courses is available in the degree audit for each major.

Prescribed courses by major department 6
Total Semester Credit Hours 74

1 Students must demonstrate the ability to express themselves in acceptable written English. The College requirement is satisfied if a student earns a grade of C or better in ENGL 203. Students who do not meet this standard must repeat the course prior to completing 60 hours and earn a grade of C or better or must immediately arrange with the director of the writing laboratory to be certified as competent in writing.

2 ENGL 203 will count toward the Communication requirement or the Literature in English requirement, but will not count toward both requirements.

3 Two years of high school foreign language may be used to satisfy this requirement unless specified by major.

4 No course used to fulfill this requirement may fulfill any other college or university requirement except in the minor field of study.

5 Minimum of 3 and maximum of 6 semester credit hours in Creative Arts.

6 Courses in military, air or naval science may not be substituted for required courses.

7 The list of approved courses is available in the degree audit for each major.

Major Field of Study
Each department sets its own requirements for the major, including no fewer than 27 hours of coursework and no more than 33 hours. At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M. A grade of C or higher is required in a course to be counted toward the major.

Minor Field of Study
Completion of a minor is not a requirement of the College of Liberal Arts; however, individual departments may require their majors to have a minor. Students should consult with an advisor in their major department to determine if a minor is required. The minor program comprises 15–18 hours with a minimum of 6 hours in residence at the 300- to 400-level. Minor programs are recognized on the official transcript after graduation, but not on the diploma. A grade of C or higher is required if a course is to be counted toward the minor field. Each student who is required to complete a minor, or who chooses to do so, should contact the department that offers the minor to determine which specific courses are mandated. No student may have more than two minors. The student’s home department is responsible for advising after the student receives signed approval from the department, program, or college granting the minor program.

Electives
To enhance the traditionally broad background of the liberal arts graduate, undergraduate students are allowed to include in their degree program a minimum of 9 semester hours of free elective courses. These courses may be chosen from any field within the University. (See section on “Requirements for a Baccalaureate Degree” in this catalog.) All other elective hours must be selected with the approval of the student’s advisor and dean.

- ASCC 289 and ASCC 101 may only be taken on an S/U basis.
- Lower level (100 and 200 level) military science coursework (AERS, MLSC, NVSC) does not apply to degree requirements in the College of Liberal Arts.
- No more than 14 semester credit hours combined of KINE 199 and upper-level Military Science or SOMS courses may be used as electives.
- Any undergraduate student may take up to four semester credit hours of KINE 199 on an S/U basis.
- In the College of Liberal Arts, students who have less than a 2.0 GPR and who enroll in KINE 199 must enroll in the course on an S/U basis.

Combined Degree Plan, Double Degree and Double Major
Students may pursue a program to qualify for two bachelor’s degrees, either a Bachelor of Arts and a Bachelor of Science degree from different departments, or two Bachelor of Arts or two Bachelor of Science degrees,
with the second degree from another college. Alternatively, instead of a major and a minor field, students in the College of Liberal Arts may elect to have two Liberal Arts major fields of study. Both majors may be within the college, or one major may be outside the college, provided both majors lead to the same baccalaureate degree. It is critical for any student wishing to pursue a double degree or double major to see her adviser early because there is a time limit on declaration (see below).

Students who are enrolled in a University Studies degree are not eligible for a double major or a double degree.

Students must declare the double degree no later than the semester in which they will complete 90 hours. Students must have and maintain at least a 3.0 GPA cumulative and in the majors (or the minimum departmental GPA requirement in the major, whichever is higher), with at least a 3.0 GPA in at least 9 hours in the second field of study at the time of declaration. Before declaring the double degree, students should consult with the appropriate advisors to formulate the combined degree plan. The following requirements must be met: the student must

1. satisfy all University and college requirements
2. complete all required courses in each major, if both majors are in the College of Liberal Arts (i.e., take all courses that are specifically listed in each regular degree program)
3. in cases where one major is in the College of Liberal Arts and the other major is in another college, the student shall take in his or her liberal arts major field of study the same number of credit hours required of regular majors in that field and also satisfy whatever conditions are set by the other college for its major field

Candidates for a double bachelor's degree must have been in residence at least two academic years and must complete all essential work of the second curriculum not covered in the first. To qualify for the double degree, the student must complete a minimum of 30 semester credit hours more than the higher number of semester credit hours required for either degree.

Curricular Options

International and Intercultural Experiences

The International and Cultural Diversity requirement encourages all students to learn about attitudes and cultures different from their own. All students are required to select from a list of approved courses that foster greater awareness of our interdependent and diverse world.

Students also may select, as free electives, courses which address cultural diversity issues in the United States. Courses in this area encourage students to focus on issues of race, ethnicity and gender and to develop a broader understanding of the diverse cultures and traditions in the United States.

Further opportunity to increase international and national intercultural awareness can be accomplished through study abroad and internship programs. More information on these programs is available from the college's study abroad programs manager, who is housed in the Undergraduate Programs Office of the College of Liberal Arts.

Liberal Arts Honors Program

The College of Liberal Arts encourages qualified majors to participate in its Honors Program, which is designed for academically talented high school graduates who have distinguished secondary school records (top 10%) and high scores on achievement tests (1250 SAT or 28 ACT). Students may also become Honors eligible once they establish a Texas A&M GPA of at least 3.5.

Students accepted into the program take courses that foster an interdisciplinary outlook characteristic of the Liberal Arts and that synthesize knowledge from other courses. Participants work in small classes with some of the most distinguished faculty at Texas A&M University. Students develop their own interests and have the option to write an honors thesis under the direct supervision of a professor with whom they have chosen to work. For information about Texas A&M Honors Program and Fellows Program (i.e., the senior thesis), see the Honors and Undergraduate Research (http://honors.tamu.edu) website. Individual departments may have their own Honors program for their majors.

Interdisciplinary Minors

Interdisciplinary minors are offered in Africana Studies, Asian Studies, Comparative Cultural Studies, Film Studies, Hispanic Studies for Community Engagement, Journalism Studies, Latino/a Mexican American Studies, Religious Studies, and Women's and Gender Studies. Specific course requirements and options are available from each interdisciplinary program director.

Cooperative Education Program

Cooperative education enables students to gain practical work experience and a salary while completing academic requirements. During the four-year academic program, co-op students complete two to four periods of work away from campus, gaining experience through on-the-job training and thus improving their opportunities for future employment.

An advisor in the cooperative education office provides additional information about this program.

Government Service (MPA Programs)

Most graduate programs in public administration recommend a broad background of knowledge and skills in the following areas: the political, social, economic and legal context of administration; analytical tools; individual, group and organizational dynamics; policy analysis; administrative/management processes; and arts and science foundation skills. Students are best prepared for an MPA program if their undergraduate programs are multidisciplinary in nature, drawing upon political science, economics, the behavioral sciences, the quantitative sciences, and administrative and managerial sciences.

Law

Most law school admissions committees require a student to have a baccalaureate degree, or equivalent, as well as an acceptable score on the Law School Admissions Test (LSAT). In general, law schools prefer that a student seek a diverse college education rather than one which is narrowly specialized. They favor thorough learning in some broad cultural field of a student's choice, such as history, economics, political science, philosophy, mathematics, science, literature, or the classics. Admissions committees rarely favor concentration in specialized, technical curricula unless such study is adequately supplemented by advanced work in the social sciences and humanities. The Law School Admissions Test Council and the Council of the Section on Legal Education and Admissions of the American Bar Association both advise against the taking of satisfactory/unsatisfactory courses by students intending to go to law school.

The college now offers a University Studies degree with a concentration in pre-law (B.A. in Society, Ethics and Law). Advising for pre-law students regardless of major, including application forms for taking the Law School
Admissions Test, may be obtained from the Office of Professional School Advising.

**Medicine**

Advising for all pre-health students, including medical and dental students, may be obtained from the Office of Professional School Advising. Students are urged to stop by the office to pick up information on professional schools and talk with an advisor very early in their collegiate career.

**Teacher Certification**

Students majoring in one of the departments of the College of Liberal Arts and working toward a teaching certificate must meet the minimum requirements described in the College of Education and Human Development section under secondary teacher certification. Because many certification requirements are determined by the State of Texas and thus are subject to periodic change, students working toward certification should maintain frequent contact with advisors in the College of Education and Human Development.

**Theology**

The American Association of Theological Schools recommends that students planning to enter a theological seminary include in their undergraduate curriculum the following subjects.

- English (6 semesters)
- History (3 semesters)
- Philosophy (3 semesters)
- Natural science (2 semesters)
- Social science (6 semesters)
- Foreign language (4 semesters): Latin, German or French
- Religion (3 semesters).

Courses taught at Texas A&M in religion include:

Women's and Gender Studies - BA

Women's and Gender Studies is a flexible interdisciplinary program devoted to the critical analysis of gender and the pursuit of knowledge about women throughout history and around the world. Combining the methods and insights of traditional liberal arts disciplines with the special insights of scholarship on women's and gender studies, our courses yield fresh perspectives on the nature of gender as it intersects with race, ethnicity, class, religion, and nation, and encourage students to look beyond their own culture and era in examining gender's role in shaping society. Through interdisciplinary breadth and an emphasis on critical thinking, women's and gender studies prepares students to employ critical learning in their private lives as well as in public roles as citizens and members of a diverse and complex workforce.

Majors in Women's and Gender Studies receive training in both humanities and social sciences approaches and are required to complete coursework that focuses on material beyond dominant U.S. culture. Core courses in Women's and Gender Studies have both theoretical and applied focuses; upper-division core courses in Women's and Gender Studies emphasize writing and research skills. Students enrolled in the BA are directed to complete several humanities-focused courses in Women's and Gender Studies, while also selecting their coursework in social sciences or humanities for their electives within their major.

Because gender has far-reaching influence on daily life, world culture, and public policy, this major equips students to enter a wide range of fields. As a liberal arts degree, women's and gender studies is attractive to employers looking for recruits trained in critical thinking, organizational skills, reading, writing, and presenting in a wide range of subject areas. Expertise in women's and gender issues is increasingly important to businesses, governmental agencies, and other organizations dealing with matters such as sexual harassment, flex-time, parental leave, and pay equity, just as specialists in women's and gender studies find opportunities in education, law, health care, social work, counseling, media, public policy, and a wide range of other fields.

Women's and Gender Studies - BS

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

33 hours of WGST coursework required for the BA degree.

A minimum 2.0 GPR and a minimum grade of C for a course to count in the major. Completion of distribution requirements in the major as outlined.

At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M.

College and University Requirements

Students must complete a minimum of 36 hours of 300- or 400-level course work at Texas A&M University.

Women's and Gender Studies - BS

Women's and Gender Studies is a flexible interdisciplinary program devoted to the critical analysis of gender and the pursuit of knowledge about women throughout history and around the world. Combining the methods and insights of traditional liberal arts disciplines with the special insights of scholarship on women's and gender studies, our courses yield fresh perspectives on the nature of gender as it intersects with race, ethnicity, class, religion, and nation, and encourage students to look beyond their own culture and era in examining gender's role in shaping society. Through interdisciplinary breadth and an emphasis on critical thinking, women's and gender studies prepares students to employ critical learning in their private lives as well as in public roles as citizens and members of a diverse and complex workforce.

Majors in Women's and Gender Studies receive training in both humanities and social sciences approaches and are required to complete course work that focuses on material beyond dominant U.S. culture. Core courses in Women's and Gender Studies have both theoretical and applied focuses; upper-division core courses in Women's and Gender Studies emphasize writing and research skills. Students enrolled in the BS are directed to complete several science and social science-focused courses in Women's and Gender Studies, while also selecting their coursework in social sciences or humanities for their electives within their major. Students in the WGST BS also complete numerous science courses in their degree, allowing them to compare traditional perspectives with feminist critiques of science.

Because gender has far-reaching influence on daily life, world culture, and public policy, this major equips students to enter a wide range of fields. As a liberal arts degree, women's and gender studies is attractive to employers looking for recruits trained in critical thinking, organizational skills, reading, writing, and presenting in a wide range of subject areas. Expertise in women's and gender issues is increasingly important to businesses, governmental agencies, and other organizations dealing with matters such as sexual harassment, flextime, parental leave, and pay equity. The BS in Women's and Gender Studies is particularly useful for students interested in science-oriented fields such as health and medicine, environmental studies, urban planning, food security, or data science, and also excellent preparation for engaging in public policy, law, and education in science fields.

---

1. A minimum grade of C is required.
2. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.
4. Select from WGST 100-499 (p. 1173).
5. Any 100-499 not used elsewhere.
6. WGST course may not be used to fulfill this requirement.

College and University Requirements

Students must complete a minimum of 36 hours of 300- or 400-level course work at Texas A&M University.

Africana Studies - Minor

The interdisciplinary minor in Africana Studies provides students with a unique opportunity to think critically about the cultural, historical, and social contributions and experiences of people from Africa and of African descent across ethnic, regional, and national boundaries. Africana Studies courses are a comingling of traditional approaches to the field and cutting edge scholarship that challenges stereotypical portrayals of blacks the world over.

Because the Africana Studies minor is interdisciplinary, students can draw on courses from across the College of Liberal Arts. Students also complete core classes in the Africana Studies discipline. The interdisciplinary nature of the program provides students opportunities to understand Africana Studies through different lenses, including art,
Comparative Cultural Studies International - Minor

The minor in Comparative Cultural Studies – International focuses on how culture and politics affect societies across the world. The program's strong interdisciplinary approach in the humanities and social sciences gives students the skills and competencies they need to address complex and critical global issues. The minor provides students with tools to better understand diverse cultural perspectives around the world. The comparative and transnational focus encourages students to learn about other cultures and social systems, to reflect back on their own societies, and to discover how they want to position themselves as globally engaged citizens.

The courses recommended for the minor examine such issues as racial and gender politics; media, power, and politics; nationalism, ethnicity, and ethnic conflict; literature, film, performance, and politics; globalization, international development, and community mobilization; human trafficking; global public health; and diaspora, migration, and displacement. The coursework gives students the opportunity to gain expertise in areas or peoples outside of the United States and allows them to develop comparative and international perspectives valued by public and private employers. It is critical for contemporary students to understand the impact of politics and policies on people's lives and global social injustice, inequality, and conflict.

The minor will assist students who are seeking a wide variety of jobs, ranging from U.S. government positions to social and popular media, to private business ventures, cultural organizations, and non-profit organizations. It is also beneficial for students who are pursuing a wide range of graduate and professional degrees, including law, education, non-profit administration, public policy, public health, communication, cultural studies, environmental studies, media studies, anthropology, social work, and business.

Comparative Cultural Studies U.S. - Minor

The minor in Comparative Cultural Studies U.S. focuses on how culture and politics affect American society. The program’s strong interdisciplinary approach in the humanities and social sciences gives students the skills and competencies they need to address complex and critical national problems and issues. The minor provides students with tools to better understand diverse cultures within the United States. The United States is one of the most culturally diverse countries in the world. Nearly every region of the world has influenced American culture: first, the English, then the cultures of Native Americans, Latin Americans, Africans and Asians.

The courses recommended for the minor examine such issues as racial and gender politics; media, power, and politics; language; religion and religious practices; literature, film, performance; politics; food; and sports. The coursework gives students the opportunity to understand the various cultural groups which compose the kaleidoscope that is America.

The minor will assist students who are seeking a wide variety of jobs, ranging from U.S. government positions to social and popular media, to private business ventures, cultural organizations, and non-profit organizations. It is also beneficial for students who are pursuing a wide range of graduate and professional degrees, including law, education, non-profit administration, public policy, public health, communication, cultural studies, environmental studies, media studies, anthropology, social work, and business.

Film Studies - Minor

The Interdisciplinary Minor in Film Studies prepares undergraduate students to think and write critically about film and media from multiple perspectives. The minor offers courses in the history, criticism, and theory of film and media, and provides opportunities to pursue analyses of the aesthetic, cultural, economic, technological, and international dimensions of film. The foundational courses, FILM 251/ENGL 251 and FILM 299, set the stage for advanced courses in Film. A major goal of the program is to connect the student's major field of study with an understanding of film's cultural and social significance. Drawing from the expertise of affiliated faculty across the College of Liberal Arts, the minor can be tailored to the student's interests.

The minor in Film Studies supports student development for any career field because it provides opportunities for students to obtain skills that are critical to success in today's workplaces: critical thinking, problem solving, oral and visual communication, writing, research, cultural understanding, and global perspectives. The Film Studies minor builds foundational skills for student success, leadership in the workplace, future graduate studies, and becoming an informed citizen.

## Global Culture and Society - Minor

The minor in Global Culture and Society is awarded to students who study abroad at one of the official Texas A&M study centers: Santa Chiara (Italy), Santa Clara (Mexico), or Soltis Center (Costa Rica). All the requirements for the minor must be completed during a fall or spring semester when 15 credit hours are available for student enrollment at one of the centers. Please reference the program requirements tab to view the required courses for this minor.

</tbody>
</table>

¹ Portfolio in global culture and society may be completed either during the long semester abroad or upon return to College Station.

² Must be taken in a single fall or spring semester at a TAMU-affiliated facility such as Santa Chiara or Soltis Center.

Students must make a grade of 'C' or better in all courses.

## Latino/a and Mexican-American Studies - Minor

The Latino/a and Mexican American Studies minor (or LMAS) at Texas A&M University encourages students across the university to investigate the experiences and contributions of Latino/as in the United States and abroad. Students minoring in LMAS will receive instruction from interdisciplinary faculty across the College of Liberal Arts and the University. LMAS courses draw on disciplines including, but not limited to, the areas of History, Sociology, English, Anthropology, Psychology, Communications, Political Science, Geography, Education, and Hispanic Studies. The courses provide students with broad knowledge about Latino/as frequently omitted from the common curriculum and centered in the experiences of Latino/as.

The LMAS minor addresses topics such as race, ethnicity, gender, politics, religion, education, labor, immigration, and civil rights, among others. These topics include both historical and contemporary perspectives and draw on a variety of approaches, including literature, history, individual and interpersonal experiences, performance, policy analysis, and psychological research.

The LMAS minor complements any degree and future career by providing students with a strong foundation in key workplace skills: critical thinking, perspective taking, social and personal responsibility, communication, research, writing, and cultural understanding.

Additionally, the LMAS minor prepares students to address societal changes that will occur as the state of Texas becomes a majority-minority state and continues to navigate its southern border. The LMAS minor prepares students to address some of the most crucial societal issues today: health policy, justice and law reform, civil rights, and labor and immigration practices.

¹ Must be taken in a single fall or spring semester at a TAMU-affiliated facility such as Santa Chiara or Soltis Center.

² Students must make a grade of 'C' or better in all courses.
**Religious Studies - Minor**

The interdisciplinary Religious Studies minor at Texas A&M University encourages students to explore the many ways people experience and articulate the sacred. The Religious Studies minor offers students the opportunity to better understand how religion addresses core concerns about human existence across cultures.

Students who minor in Religious Studies select from a range of courses that match their interests and goals from a variety of disciplines in the College of Liberal Arts. Students have the opportunity to study specific religious traditions, to approach religion through the study of rituals, symbols, and literature, and to approach religion as a human phenomenon situated in culture and history. Topics of study include the history of religious traditions, religion in contemporary life, religion in the arts and literature, and many other topics. Students gain perspective on the complexity of religious thought and practices in world cultures.

The Religious Studies minor emphasizes a number of skills that are important to success in the workplace and as a citizen of the world: critical thinking, problem solving, cultural understanding, and written, oral, and visual communication. The ability to understand the significance of religion at individual, interpersonal, social, and cultural levels can serve students on nearly every career path, even those that do not focus on religion. The skills that students learn through the study of religion as a human endeavor provides an intellectual foundation for any future career.

| | *Select up to five of the following:* 2
| RELS 200-499 (p. 1129) | | 15

Total Semester Credit Hours 15

1 Up to six semester credit hours may be in approved languages, including: ARAB 201, ARAB 202, ARAB 301, ARAB 302; CLAS 211, CLAS 221, CLAS 222, CLAS 311, CLAS 312, CLAS 313, CLAS 321, CLAS 322

Students must make a grade of C or better in all courses.

At least 9 semester credit hours must be 300-400 level courses.

**Women's and Gender Studies - Minor**

Women's and Gender Studies is a flexible interdisciplinary program devoted to the critical analysis of gender and the pursuit of knowledge about women throughout history and around the world. Combining the methods and insights of traditional liberal arts disciplines with the special insights of scholarship on women's and gender studies, our courses yield fresh perspectives on the nature of gender as it intersects with race, ethnicity, class, religion, and nation, and encourage students to look beyond their own culture and era in examining gender's role in shaping society. Through interdisciplinary breadth and an emphasis on critical thinking, women's and gender studies prepares students to employ critical learning in their private lives as well as in public roles as citizens and members of a diverse and complex workforce.

Minors in women's and gender studies receive training in both humanities and social sciences approaches and are required to complete coursework that focuses on material beyond dominant U.S. culture; core courses have both theoretical and applied focuses.

Because gender has far-reaching influence on daily life, world culture, and public policy, this minor supports students in a wide range of fields. As a liberal arts degree, women's and gender studies is attractive to employers looking for recruits trained in critical thinking, organizational skills, reading, writing, and presenting in a wide range of subject areas. Expertise in women's and gender issues is increasingly important to businesses, governmental agencies, and other organizations dealing with matters such as sexual harassment, flex-time, parental leave, and pay equity, just as specialists in women's and gender studies find opportunities in education, law, health care, social work, counseling, media, public policy, and a wide range of other fields.

**Total Semester Credit Hours**  

9

**Co-Curricular Component**

Minimum of 10 hours participation in diversity related co-curricular activities, which will consist of at least 20 hours of involvement in an approved project. Students will also be able to perceive and articulate any given event from a multicultural, diverse environment.

**Service Learning Component**

Consists of 20 hours of involvement in an approved project.

**Capstone Retreat**

Students must complete a minimum of twelve hours to include nine hours of diversity related courses from the College of Liberal Arts plus an additional three hours chosen in consultation with the certificate advisers. The additional three hours could consist of a research project, internship, directed study or other option, including a regular approved course. Students will be provided with a sample list of courses and advice about the most appropriate choices for their long term goals. Certificate advisers may approve additional courses not on the sample list to count toward the completion of this requirement. The core courses required for this certificate may also count toward other degree requirements.

**Department of Anthropology**

Anthropology is the study of what it means to be human in the broadest sense, through an examination of culture and society (sociocultural and linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Students develop an appreciation of the value of physical and cultural differences at the local, national and global levels, and learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds.

The aim of the anthropology major is to provide a background in behavioral studies for students who desire a broad education in either the biological or the social sciences. Anthropology majors can obtain research experience in science and the humanities through ethnographic or biological research, or archaeology field schools. Most undergraduates in Anthropology at TAMU select this major because of the opportunity it affords them to acquire a sound liberal education.

The curriculum is ideal for students who want to pursue professional careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for employment opportunities or careers in: secondary or higher education; medicine; law; museum and foundation settings; the local, state and federal government (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research
institutions; and nontraditional opportunities emerging in business and management.

**Anthropology - BA**

Anthropology majors pursuing the general anthropology track receive foundations in the archaeology, biological anthropology and cultural anthropology subfields of anthropology as well as options to pursue upper-level courses in each of the subfields.

Anthropology is the study of what it means to be human in the broadest sense, through an examination of culture and society (sociocultural and linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Students develop an appreciation of the value of physical and cultural differences at the local, national and global levels, and learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds.
The aim of the anthropology major is to provide a background in behavioral studies for students who desire a broad education in either the biological or the social sciences. Anthropology majors can obtain research experience in science and the humanities through ethnographic or biological research, or archaeological field schools. Most undergraduates in Anthropology at TAMU select this major because of the opportunity it affords them to acquire a sound liberal education.

The curriculum is ideal for students who want to pursue professional careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for employment opportunities or careers in: secondary or higher education; medicine; law; museum and foundation settings; the local, state and federal government (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research institutions; and nontraditional opportunities emerging in business and management.

Total Semester Credit Hours 120

¹ Must make a grade of C or better.
² Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.
³ No anthropology course will satisfy this requirement.
⁴ Select from ANTH 302, ANTH 308, ANTH 313, ANTH 316, ANTH 317/RELS 317, ANTH 318, ANTH 323, ANTH 330, ANTH 350, ANTH 351, ANTH 353/CLAS 353, ANTH 354/CLAS 354, ANTH 360, ANTH 401, ANTH 402, ANTH 417/CLAS 417, ANTH 418, ANTH 419, ANTH 444/CLAS 444, ANTH 446, ANTH 447, ANTH 461, ANTH 485, ANTH 489.
Required prerequisite for STAT 302 or STAT 303

Select from ANTH 312, ANTH 405, ANTH 423, ANTH 424, ANTH 425, ANTH 426, ANTH 427, ANTH 485, ANTH 489.

Select from ANTH 300, ANTH 301, ANTH 324/MUSC 324, ANTH 335, ANTH 340/RELS 340, ANTH 370, ANTH 403/RELS 403, ANTH 404/WGST 404, ANTH 419, ANTH 424, ANTH 430, ANTH 434, ANTH 440, ANTH 445, ANTH 485, ANTH 489.

Select from ANTH 200-499 (p. 896). Up to 6 hours may be selected for ANTH 200-299 (p. 896), 3 to 9 hours required from ANTH 300-499 (p. 896).

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Writing Courses

All students in each track are required to take two courses with the writing attribute, also known as “W-courses”, from the department. Substitutions with W-courses from other departments are not allowed. Please see the academic advisor for the most current list of Anthropology W-courses.

Minor Requirements

Anthropology majors may select a minor field of study from departments or divisions within or outside the College of Liberal Arts or in a particular area of interest (as with interdisciplinary minors or career opportunity minors). The minor will consist of 15-18 hours of coursework, at least 6 of which must be at the upper-division level. A grade of C or higher is required if a course is to count in the minor. A minor should be declared before the student has completed 90 credit hours.

College and University Requirements

Other courses may qualify for this category. Students should consult the approved lists of courses available through the academic advisor in the Department of Anthropology or in the Undergraduate Student Services Office in the College of Liberal Arts. The following list incorporates University Core Curriculum requirements. No course can be counted in more than one category. To promote the opportunity for anthropology majors to acquire a broad educational experience, anthropology students must satisfy their University requirements for language, philosophy and culture, social and behavioral sciences, and the sciences with courses other than those offered by anthropology.

Students must complete a minimum of 36 hours of 300- or 400-level coursework at Texas A&M University.

Anthropology - BA, Archaeology Track

Students who elect to pursue the archaeology track take the foundation courses but also have the opportunity to take multiple upper-level courses which focus on specific topics in archaeology. In addition, majors receive a broad yet rigorous liberal arts education.

Anthropology is the study of what it means to be human in the broadest sense, through an examination of culture and society (sociocultural and linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Students develop an appreciation of the value of physical and cultural differences at the local, national and global levels, and learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds.

The aim of the anthropology major is to provide a background in behavioral studies for students who desire a broad education in either the biological or the social sciences. Anthropology majors can obtain research experience in science and the humanities through ethnographic or biological research, or archaeology field schools. Most undergraduates in Anthropology at Texas A&M select this major because of the opportunity it affords them to acquire a sound liberal education.

The curriculum is ideal for students who want to pursue professional careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for employment opportunities or careers in: secondary or higher education; medicine; law; museum and foundation settings; the local, state and federal government (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research institutions; and nontraditional opportunities emerging in business and management.

Total Semester Credit Hours 120

1 Must make a grade of C or better.
2 Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.
3 No anthropology course will satisfy this requirement.
4 Math prerequisites for STAT 302 or STAT 303.
6 Select from ANTH 300-499 (p. 896).

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Writing Courses
All students in each track are required to take two courses with the writing attribute, also known as "W-courses", from the department. Substitutions with W-courses from other departments are not allowed. Please see the academic advisor for the most current list of Anthropology W-courses.

Minor Requirements
Anthropology majors may select a minor field of study from departments or divisions within or outside the College of Liberal Arts or in a particular area of interest (as with interdisciplinary minors or career opportunity minors). The minor will consist of 15-18 hours of coursework, at least 6 of which must be at the upper-division level. A grade of C or higher is required if a course is to count in the minor. A minor should be declared before the student has completed 90 credit hours.

College and University Requirements
Other courses may qualify for this category. Students should consult the approved lists of courses available through the academic advisor in the Department of Anthropology or in the Undergraduate Student Services Office in the College of Liberal Arts. The following list incorporates University Core Curriculum requirements. No course can be counted in more than one category. To promote the opportunity for anthropology majors to acquire a broad educational experience, anthropology students must satisfy their University requirements for language, philosophy and culture, social and behavioral sciences, and the sciences with courses other than those offered by anthropology.

Students must complete a minimum of 36 hours of 300- or 400-level coursework at Texas A&M University.

Anthropology - BS
Anthropology is the study of what it means to be human in the broadest sense, through an examination of culture and society (sociocultural and linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Students develop an

Appreciation of the value of physical and cultural differences at the local, national and global levels, and learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds.

The aim of the anthropology major is to provide a background in behavioral studies for students who desire a broad education in either the biological or the social sciences. Anthropology majors can obtain research experience in science and the humanities through ethnographic or biological research, or archaeology field schools. Most undergraduates in Anthropology at TAMU select this major because of the opportunity it affords them to acquire a sound liberal education.

The curriculum is ideal for students who want to pursue professional careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for employment opportunities or careers in: secondary or higher education; medicine; law; museum and foundation settings; the local, state and federal government (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research institutions; and nontraditional opportunities emerging in business and management.
and many of the natural sciences. Anthropology minors learn about complements majors within all of the social sciences, humanities, sociocultural, biological, and archaeological anthropology. It The anthropology minor introduces students to the subfields coursework at Texas A&M University.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Writing Courses
All students are required to take two courses with the writing attribute, also known as “W-courses”, from the department. Substitutions with W-courses from other departments are not allowed. Please see the academic advisor for the most current list of Anthropology W-courses.

Minor Requirements
Anthropology majors have the option of selecting a minor field of study from departments or divisions within or outside the College of Liberal Arts or in a particular area of interest (as with interdisciplinary minors or career opportunity minors). Minors typically consist of 15-18 hours or coursework, at least 6 of which must be at the upper-division level. A minor should be declared before the student has completed 90 credit hours.

College and University Requirements
Other courses may qualify for this category. Students should consult the approved lists of courses available through the academic advisor in the Department of Anthropology or in the Undergraduate Student Services Office in the College of Liberal Arts. The following list incorporates University Core Curriculum requirements. No course can be counted in more than one category, with the exception of courses used for the international and cultural diversity (p. 47) or the cultural discourse (p. 46) requirement. To promote the opportunity for anthropology majors to acquire a broad educational experience, anthropology students must satisfy their University requirements for language, philosophy and culture, social and behavioral sciences, and the sciences with courses other than those offered by anthropology.

Students must complete a minimum of 36 hours of 300- or 400-level coursework at Texas A&M University.

Anthropology - Minor
The anthropology minor introduces students to the subfields of sociocultural, biological, and archaeological anthropology. It complements majors within all of the social sciences, humanities, and many of the natural sciences. Anthropology minors learn about issues relating to the human condition within a holistic, comparative and evolutionary context. They will develop the skills of scientific inquiry and will also learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds, in fields such as education, law, medicine, government and non-government organizations, and nontraditional opportunities emerging in business and management.

The minor consists of 15 hours of coursework in anthropology, 6 of which must be at the 300-400 level and taken in residence.

communication media, sports communication, entertainment and related areas of business, industry, government, and non-profit organizations.

**Degree requirements**: depending on the path chosen may include the study of rhetorical and communication theories, media theories, media history, media industries, media writing, the study of communication research methods, and the use of those theories, research methods and skills in a variety of communication and media contexts. Such contexts include health communication, intercultural communication, interpersonal communication, mass media and new communication technologies, journalism, organizational communication, political rhetoric, religious communication, sports communication and others. Students use their communication and media skills to become leaders in all areas of business, social and political life.

**Career options abound**: While some students choose advanced degrees in communication, law, business, or religion, many go straight into the work world to pursue careers in a vast array of areas. Typical choices include positions in strategic communication, public relations, marketing, advertising, promotions and sales, training and human resources, social media, journalism, digital communication, leadership and management, health fields related to communication, organizations and public policy, entertainment and related areas of business, industry, government, and non-profit organizations.

**Honors Program**
The Department of Communication offers courses in many areas of the discipline: Health Communication, Media Studies, Organizational Communication, Rhetoric and Public Affairs, Journalism, Leadership and Civic Dialogue, Communication and Diversity, Social Media, Strategic Communication and Digital Communication, Media Literacy with significant focus in Intercultural and International communication across each area.

**Certificates**
The Department of Communication offers six certificates. While these certificates are optional, they permit a student to focus studies in one of six areas. The certificate is also noted on the student’s transcript. The certificates in Communication and Global Media, in Communication Leadership and Conflict Management, Communication and Digital Communication, Media Literacy with significant focus in Intercultural and International communication across each area.
Leadership and Conflict Management, in Health Communication and in Communication, Diversity and Social Justice are open to students in the Department of Communication and in any major across the University. The certificates in Strategic Communication and in Social Media are offered to students majoring in Communication, Telecommunication Media Studies or University Studies-Journalism Studies only.

Communication - BA
Students who want to transform the world through communication choose the Bachelor of Arts in Communication as a major. The Bachelor of Arts in Communication teaches how to influence and persuade others through the use of language, visual images and other media. This is a major that affords a broad based, Liberal Arts education that draws from coursework from across the College of Liberal Arts, and from across the Texas A&M University. In the Communication major, we pursue coursework giving students a background in the processes and theories of communication as well as in the marketable skills that are so valuable in the working world.

Coursework for incoming Freshmen begins with a dedicated first semester experience which introduces them to the breadth of the field of Communication and of Media while also involving them in small groups and acquainting them with Texas A&M University, our resources and our opportunities. We also welcome Transfer students, meeting them where they are and integrating them into the Communication family. All Communication majors take a core of required courses that establish a firm foundation in the field and then select additional coursework that suits their interests and needs. Students who wish to focus their studies further, may choose to earn a certificate in Health Communication, Strategic Communication, Leadership and Conflict Management, Global Media, Social Media, or Diversity and Social Justice.

With over a thousand students in the major, there is not one particular career path that they all choose. Many go into careers in public relations, advertising, sales, promotions and marketing. Others work in leadership positions in corporations, or in political, religious or social non-profits. Still others work in tactics of communication such as spokespersons, event managers, market influencers, graphic designers or digital specialists. Other popular options are careers in sports, social media, international business, and health.

All B.A. COMM students choose a minor. A minor area of study fits within the 120 hours required for the degree and helps to further define and focus the student’s interests. When making a choice of majors, remember that one can major in Communication and minor in a related area or in a widely divergent area.

### Semester Credit Hours 15

### Total Semester Credit Hours 120

---

1. First semester, first time in college students must take COMM 101 and COMM 291.
2. Minimum grade of C required.
3. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.
4. ENGL 203 will count toward the Communication requirement or the Literature directed elective requirement, but not both.
5. COMM course may not be used to fulfill this requirement.
Minor to be selected from among approved university minors. Consult with advisor regarding how to declare desired minor. Courses fulfilling core curriculum requirements may apply to the minor and therefore some of these courses may become electives. Minors will range between 15 and 18 hours.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Included in graduation requirements are the following stipulations:

1. A minimum of 2.0 GPR
2. Minimum grade of C in each course applied to the major
3. Minimum of 12 hours of upper-level COMM coursework at Texas A&M

### Teaching Certification

Students desiring certification to teach communication in secondary schools of Texas may either major in communication (College of Liberal Arts) or in another field, but in either case, they must include the following courses in their degree plans:

<table>

Additional education courses are required. More complete information on the requirements for teacher certification may be found in the College of Education and Human Development section under secondary teacher certification.

### Communication - BS

The Bachelor of Science in Communication harnesses the power of collaborative communication to solve problems through the very essence of this degree, communication intervention. Communication intervention is the skill of collaborating with others effectively to modify outcomes, conditions and processes while also preventing harm with the goal of transforming system functioning. It draws from a transdisciplinary Liberal Arts and STEM knowledge base. It is a critical key to analyzing and addressing 21st century challenges. We address problem-solving by integrating the critical thinking and perspective taking skills embraced by the Liberal Arts with the analytical and quantitative proficiencies of STEM (science, technology, engineering and math.) The Bachelor of Science in Communication provides a marketable set of skills aimed toward communication intervention in areas such as business, health communication, media, politics, non-profits and social issues. In addition to core curriculum required by the University and the State of Texas, Bachelor of Science students will take foundation coursework in the social scientific study of communication and intervention, communication technology, communication research methods, acquisition, analysis and visualization of data, team facilitation and collaboration, and the design, implementation and assessment of communication interventions.

The field of communication is supremely diverse and varied as are the careers pursued by our majors. We address both the science and art of communication in human interactions. Embracing cutting-edge applications, communication specialists are found selling products and promoting initiatives, engaging in public relations, advertising, marketing strategies, digitizing messages, launching and sustaining new media entrepreneurial ventures, facilitating the relationship of doctors and patients, mounting health campaigns and measuring their effects, working on political campaigns, mobilizing the vote, analyzing the ROI of social media initiatives, leading interactions to heal public discord, managing and leading organizations, disseminating concepts, and describing, interpreting and evaluating a wide range of communication phenomena.

The BS is contrasted with the BA in the following ways. First, within the major coursework, the courses central to the degree are social scientific in nature. Second, instead of a foreign language requirement, BS students pursue a set of quantitative courses which includes statistics, computer applications and two research methods courses. Third, instead of a required minor, BS students are required to select and complete a certificate from the Department of Communication. The certificate will provide context and expertise for the communication intervention science focus. Currently, students may choose from a focus in Social Media, Strategic Communication, Leadership and Conflict Management, Global Media, Health Communication or Diversity and Social Justice.

Similar to the Bachelor of Arts in Communication, coursework for incoming Freshmen begins with a dedicated first semester experience which introduces them to the breadth of the field of Communication and of Media while also involving them in small groups and acquainting them with Texas A&M University, our resources and our opportunities. We also welcome Transfer students, meeting them where they are and integrating them into the Communication family. All Communication majors take a specified core of required courses that establishes a firm foundation in the field and then select additional coursework that suits their interests and needs.

1. First semester, first time in college students must take COMM 101 and COMM 291. Do NOT take SPCH 1311 elsewhere to fulfill this requirement.
2. Must make a grade of C or better.
3. MATH 140 is a prerequisite for MATH 142, choose MATH 140 if you plan to take MATH 142.
4. Except COMM 100-499
5. Both MATH classes must be complete prior to enrolling in COMM 308.
6. Certificate to be selected from among approved Department of Communication Certificate. Consult with advisor regarding how to declare desired Certificate. Courses fulfilling other requirements may apply to the Certificate and therefore some of these courses may become general electives.

W-Class. See the list of approved writing intensive courses at writingcenter.tamu.edu.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

### Telecommunication Media Studies - BA

The Department of Communication offers two degrees in Telecommunication Media Studies (TCMS). The Bachelor of Arts in Telecommunication Media Studies is similar in structure to the Bachelor of Arts in Communication. The BA in TCMS features a broad, liberal arts approach to media topics supported by coursework from across the College of Liberal Arts and beyond. The BA in TCMS requires study in Communication Technology skills, Technology and Communication, Media History and Media Theory and then branches out to permit choices among a number of TCMS electives. The BS in TCMS, however, takes a quantitative focus to the study of media and requires study in Communication Technology skills, Technology and Communication, Media Theory, Media Law, Media Law or Money Power and Communication, Media Audiences and Media Industries. With this many specified courses, the
student has a more structured approach to studying media and thereby slightly fewer options for selection among TCMS electives. Both BA and BS students seem to find the path they take to lead to satisfying outcomes!

The Telecommunication Media Studies major provides students with tools for understanding the media and their roles in social life theoretically, historically and critically. The degree allows students to choose a broadly based communication and media studies major or a more specialized study of telecommunication and quantitative systems. Students can choose Communication courses that address media industries, law and policy, technology and society, media audiences, processes, and effects, and the theory, history, and criticism of media, culture, and communication.

A degree in Telecommunication Media Studies is useful in a broad variety of careers, including media and telecommunication industries, as well as media-related positions in business, government, non-profit organizations, and higher education. The curriculum is designed to educate citizens for a productive future in a changing world. Our students may become broadcasters, producers, film makers, digital media specialists, industry leaders, government regulators, spokespeople, politicians, writers, artists, activists, and informed citizens.

Both the BA students and the BS students will select a minor. They have the option to select a certificate in Global Media, Health Communication, Leadership & Conflict Management, Social Media, Strategic Communication or our new certificate in Communication, Diversity and Social Justice.

The BA and BS are both available. The BA is a more flexible, liberal arts media-oriented degree.

Courses in their degree plans:

Students desiring certification to teach communication in secondary education courses must take 21 credit hours of the required program core courses and an additional 3 hours of Berdiev, C. H. (2007). Theories of Communication. 3

At least 12 credits must be taken in residence at Texas A&M University.

Students take 21 credit hours of the required program core courses and 12 credit hours of telecommunication elective courses for a total of 33 credit hours. At least 12 credits must be at the upper-division level. At least 12 credits must be taken in residence at Texas A&M University. Minimum grade of C in each course. No more than 3 credit hours of COMM 484; no more than 6 credit hours of COMM 485.

Teaching Certification

Students desiring certification to teach communication in secondary schools of Texas may either major in communication (College of Liberal Arts) or in another field, but in either case, they must include the following courses in their degree plans:

<table>

Total Semester Credit Hours 120

1. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

2. First semester, first-time college students must take COMM 101 and COMM 291.

3. Select four of the following: COMM 101 to 499 (p. 937); CSCE 110, CSCE 206; ENGL 251/FILM 251; FILM 251/ENGL 251; ISTM 250, ISTM 310, ISTM 315, ISTM 325, ISTM 425, JOUR 102, JOUR 301/COMM 307; POLS 302/COMM 302, POLS 313; TCMG 274; WGST 407/COMM 407.

4. ENGL 203 will count toward the Communication requirement or the Literature directed elective requirement, but not both.

5. COMM course may not be used to fulfill this requirement.

6. Minor to be selected from among approved university minors. Consult with advisor regarding how to declare desired minor. Courses fulfilling core curriculum requirements may apply to the minor and therefore some of these courses may become electives. Minors will range between 15 and 18 hours.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Students take 21 credit hours of the required program core courses and 12 credit hours of telecommunication elective courses for a total of 33 credit hours. At least 12 credits must be at the upper-division level. At least 12 credits must be taken in residence at Texas A&M University. Minimum grade of C in each course. No more than 3 credit hours of COMM 484; no more than 6 credit hours of COMM 485.

1. COMM course may not be used to fulfill this requirement.
2. First semester, first time in college students must take COMM 101 and COMM 291.
3. Select three of the following: COMM 100 to 499 (p. 937) (except COMM 203, COMM 243, CSCE 110, CSCE 206; ISTM 250, ISTM 310, ISTM 315, ISTM 325, ISTM 425; JOUR 102, JOUR 301/COMM 307; MGMT 209, MGMT 309; TCMG 274; WGST 407/COMM 407.
4. ENGL 203 will count toward the Communication requirement or the Literature directed elective requirement, but not both.
Minor to be selected from among approved university minors. Consult with advisor regarding how to declare desired minor. Courses fulfilling core curriculum requirements may apply to the minor and therefore some of these courses may become electives. Minors will range between 15 and 18 hours.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Students take 24 credit hours of the required program core courses and 9-10 credit hours of telecommunication media studies elective courses for a total of 33 credit hours. At least 12 credits must be at the upper-division level. At least 12 credits must be taken in residence at Texas A&M University. Minimum grade of C in each course. No more than 3 credit hours of COMM 484; no more than 6 credit hours of COMM 485.

Teaching Certification

Students desiring certification to teach communication in secondary schools of Texas may either major in communication (College of Liberal Arts) or in another field, but in either case, they must include the following courses in their degree plans:

Total Semester Credit Hours 27

Additional education courses are required. More complete information on the requirements for teacher certification may be found in the College of Education and Human Development section under secondary teacher certification.

University Studies - BA, Journalism Studies Concentration

University Studies - Journalism in the Department of Communication represents an interdisciplinary approach to journalism education, with an emphasis on writing-intensive courses that support the critical thinking skills required of journalists in the 21st century. In addition to the concentration in journalism through the University Studies degree, students in the program are required to complete two minors, substantially broadening the interdisciplinary aspects of journalism education. Students who choose a minor in Communication, for example, may also choose to complete a certificate in one of six areas: Global Media, Social Media, Strategic Communication, Health Communication, Leadership and Conflict Management or Diversity and Social Justice.

Students with a degree in University Studies - Journalism will be prepared for a successful life and career in several ways. The coursework emphasizes critical thinking skills—a necessary component in the changing world of journalism that relies on writing for different types of media with frequent updates and differing audiences. They are exposed to experiential learning through classes that require students to report and write on deadline and by the requirement for an internship in the field. They develop and enhance strong writing skills by taking up to four writing-intensive courses. The very nature of journalism—constantly reporting and evaluating new information while examining new topics—prepares them to be thoughtful consumers of information and encourages them to engage in learning throughout their lifetimes.

Students in University Studies - Journalism may work in political journalism, arts and entertainment journalism, sport journalism, magazine journalism, literary nonfiction or multimedia journalism, to name a few.

A student enrolled in the University Studies concentration of Journalism may not pursue a double major or a double degree.

**Communication - Minor**

The Department of Communication offers a minor in Communication, along with a minor in Journalism, and majors in Communication, Telecommunication Media Studies as well as University Studies-Journalism Studies. The minor in Communication incorporates a course in communication skills with a choice of one of two courses central to the study of communication and then rounded out with a choice of three courses from among the rich array of offerings. Skills courses range from public speaking, interviewing or argumentation and debate to difficult dialogues or communication technology skills, to note only a few. The central courses afford the opportunity to examine, in COMM 301, Rhetoric in Western Thought, how language is used to influence and persuade OR to learn, in COMM 305, Theories of Communication, how communication behavior can be described and predicted in a variety of contexts. The remaining nine hours may be chosen from among courses that run the gamut from Sports Communication or Social Media to Health Communication, Media Culture and Identity, Money Power and Communication, Popular Culture, Critical Race Discourse to Persuasion, Leadership and Conflict Management, Interpersonal, Intercultural, or International Communication. There are over 75 courses from which to choose. This 15-hour minor is open to all majors.

**Total Semester Credit Hours** 15

Students must earn a grade of C or better in each course.

---

**Journalism - Minor**

The Department of Communication offers a minor in Journalism, as well as a major in University Studies-Journalism Studies. The minor in Journalism provides a background in reporting, from interviewing to
on-line records searches, and in writing, from deadline news stories to longer analytical and feature pieces. Video production for the web is an integral part of news writing in our program, along with the opportunity for specialized, advanced writing classes in political reporting, literary nonfiction, sports reporting, arts and entertainment journalism, magazine writing, and a new course in multimedia journalism. The required journalism internship affords students another means to acquire writing and production experience, as well as a great resume entry. Students also can obtain in-depth experience in the field of new media.

Communication, Diversity and Social Justice - Certificate

The Communication, Diversity, and Social Justice Certificate, offered through the Department of Communication, gives students in-depth understanding of how communication intersects with issues of diversity and prepares students for a lifetime of successful communication practices in our diverse world. The certificate is grounded in a larger concern with social justice issues, with coursework emphasizing issues of power, privilege, and difference. Students will work in the classroom to understand and gain experience with difficult dialogues, issues of race, gender and inclusivity. They will also participate in the community projects of their choosing to gain experience in real world social justice events and practices.

Communication and Global Media - Certificate

The Communication and Global Media Certificate (CGMC), is offered by the Department of Communication, and is designed to provide students with an understanding of a communication perspective on the impact of media in a global context. Global media examines the flow of information and culture in political, religious and social contexts and across industries. From the development of new media and digital technologies to the influence that media plays in the development of policies, laws and changes to the everyday lives of the people involved, global media studies the messages that influence unseen audiences around the world. Global media careers include international journalism, social justice reform, international trade and commerce, and worldwide travel. The CGMC prepares students for understanding the growth and impact of communication and global media in a variety of similar contexts. An international internship, study abroad or internship in an international concern is required. Specific certificate requirements are available in the Office of Undergraduate Advising of the Department of Communication. Details are also available on the Department of Communication website.

Program Requirements

The CGMC requires designated courses and completion of a global internship or approved experience. Students must earn a grade of B or better in each course used to meet the requirements. Students who pursue the CGMC must complete all requirements prior to graduation.

The Communication Leadership and Conflict Management Certificate (CLCM), offered by the Department of Communication, is designed to develop communication leadership competence in interpersonal/group collaborative spheres and social/political arenas, to facilitate communication one on one in interpersonal interactions, across private and public boundaries and to mediate conflict in such diverse groups as families, work teams, political and religious groups and those engaged in geopolitical discord. Each CLCM certificate holder will be certified in basic mediation by the State of Texas. The CLCM certificate prepares students for understanding the growth and impact of communication leadership and of conflict management, especially within the context of communication, and will serve undergraduate students as well as they pursue diverse career options. Specific certificate requirements are available in the Office of Undergraduate Advising of the Department of Communication. Details are also available on the Department of Communication website (http://comm.tamu.edu/).

### Program Requirements

Students must earn a grade of "B" or better in each course used to meet the requirements. Students who pursue the CLCM must complete all requirements prior to graduation.

### Social Media - Certificate

Social media was once the plaything of teenagers, a means of entertainment, and employed solely for leisure activities. As commercial, non-profit, political, religious, and social entities began to use social media for profit and influence, these same digital natives were employed to manage it. Social media, however, is now ubiquitous. People from all walks of life use social media. These commercial and social entities need well-qualified social media users to take on the massive field of

### Health Communication - Certificate

Careers in Health and in Communication are growing much faster than average according to the Office of Occupational Outlook, Bureau of Labor Statistics. Health communication skills are increasingly valuable in careers related to health and medicine, as well as the media, public relations, and strategic communication. Health communication skills are applicable for a variety of health and medical career tasks including provider-patient consultations; the formative research, design, implementation, and assessment of public health communication campaigns; the development of strategic communication initiatives for health organizations and related products and services; as well as leadership in public and private sector health agendas. Health messaging reaches diverse audiences and includes the use of advocacy to influence policy, as well as mediating and shaping public conversations on health issues both face-to-face and via traditional and new media in local and global arenas. Health communication skills are important for profit, nonprofit, and governmental organizations. This certificate provides a course of study and experience for students interested in health campaigns, other forms of mediated health communication, and health policy, as well as for students interested in communication in healthcare organizations and provider-patient relationships. Specific certificate requirements are available in the Undergraduate Studies Office of the Department of Communication. Details are also available on the Department of Communication (http://communication.tamu.edu/) website.

### Program Requirements

Students must earn a grade of "B" or better in each course used to meet the requirements. Students who pursue the HCC must complete all requirements prior to graduation.

Strategic Communication - Certificate

Strategic communication is the process that supports public relations, promotions, public information, marketing, corporate communication, public affairs and advertising. Strategic communication is creation of the plan as well as the tools or tactics used to implement that plan effectively. The value of effective strategic communication is acknowledged by both profit and nonprofit corporations and by governmental agencies. The effect of strategic communication failures on the bottom line, on employee and stakeholder satisfaction, and on the efficient use of resources, is well documented. Gathering and interpreting appropriate information, audience analysis, as well as harnessing the power of accurate language in message crafting, are further noted as key strategic communication functions. Tactics available for implementing strategic communication are expanding exponentially as digital communication and new media evolve. Mastery of the integration of these tactics in strategic plans augment the effectiveness of internal and public issues management while mitigating corporate frustration, offensive messages, and overspending. Although effective strategic communication is critical to organizational success, many companies and agencies continue to need support and assistance in this arena. The U.S. Department of Labor Occupational Outlook Handbook notes that careers in various strategic communication areas are growing "faster than average" to "much faster than average." The Certificate in Strategic Communication will prepare Communication majors, Telecommunication Media Studies majors, and University Studies-Journalism Studies majors to plan and execute communication strategically and to coordinate the integration of appropriate tactics to enhance commerce, government, and to further political, religious and social goals, as they lead us into the future. Specific certificate requirements are available in the Undergraduate Studies Office of the Department of Communication. Details are also available on the Department of Communication (http://communication.tamu.edu) website.

Program Requirements

Students must earn a grade of "B" or better in each course used to meet the requirements. Students who pursue the SCC must complete all requirements prior to graduation.

Department of Economics

The study of economics helps students develop a framework for understanding of how individuals, organizations and societies make choices and how those choices interact to determine the allocation of an economy's limited resources among alternative competing uses. Economists study how these choices are made in a variety of environments and consider how the outcomes vary under alternative forms of economic organization. Economists evaluate the outcomes of an economic system on a scorecard that includes several different criteria such as efficiency, equity, and stability.

The fundamental goal of our curriculum is to introduce students to the economic way of thinking—a particular way of asking questions and analyzing problems. We offer a core set of courses that teach the fundamental theoretical tools of economics, and a set of elective courses that demonstrate how economists apply these tools to study a wide variety of real-world economic issues. A key takeaway for students is a working knowledge of a useful and coherent structural approach to examining current public policy issues and an ability to identify the inherent tradeoffs involved in developing solutions to major social problems.

The economic style of thinking, when combined with training in the required tools of quantitative and qualitative analysis, provides students with a skill set that will serve them well in a wide array of post-graduate pursuits. The banking and financial sectors regularly hire undergraduate economics majors as do management consulting firms. A number of private corporations employ economists to prepare forecasts of future movements in firm costs and profits. Government agencies—local, state,
national, international- hire economics majors for positions as budget analysts or government program evaluators. The study of economics also provides sound preparation for graduate school, either a Masters or PhD degree in economics or a professional degree in business, law, or public policy.

Majors
• Bachelor of Arts in Economics (p. 571)
• Bachelor of Arts in Economics and Master of International Affairs, 5-Year Degree Program (p. 572)
• Bachelor of Arts in Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 574)
• Bachelor of Science in Economics (p. 575)
• Bachelor of Science in Economics and Master of International Affairs, 5-Year Degree Program (p. 576)
• Bachelor of Science in Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 578)
• Bachelor of Science in Economics and Master of Science in Economics, 5-Year Degree Program (p. 579)

Minors
• Economics Minor (p. 580)

Certificates
• Business Economics Certificate (p. 581)
• Quantitative Economics Methods (p. 581)

Economics - BA
The Bachelor of Arts degree program in Economics offers a strong liberal arts curriculum aimed at enhancing students’ analytical skills and applications to better understand human behavior. The degree plan is designed to allow opportunities for applied exploration of economic principles and theory through research, internship, and study abroad while focusing on quantitative skills and the development of rational thought and critical thinking. In addition to requiring four semesters of a college-level foreign language, the Bachelor of Arts degree plan encompasses a broad spectrum of coursework from throughout the College of Liberal Arts and Texas A&M University. By allowing for flexibility in courses that can be taken within the core curriculum, as well as for general electives, students can achieve a well-rounded education that can help with their future educational and professional goals.

To build a solid base of understanding, students take foundational courses in microeconomics, macroeconomics and mathematics, then refine those skills in statistics and intermediate economic theory classes. In upper-level courses these reasoning abilities are applied to specific situations, with a particular focus on understanding social problems from an economics perspective.

Students who graduate with a Bachelor of Arts degree in Economics have a wide spectrum of career fields to choose from. Many students pursue careers in business, law, government and public policy professions, nonprofit organizations and more.

Econometrics coursework. A grade of C or higher is required for all Economics and Econometrics courses. No more than 36 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for all Economics and Econometrics coursework.

### Economics - 5-Year Bachelor of Arts/Master of International Affairs

The combined program between the Department of Economics and The Bush School of Government and Public Service allows undergraduate Economics students to enter the Master of International Affairs Program, with a focus in International Economics and Development, at the beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to international economic development along with skills in diplomacy, research, and development of a global perspective.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School's MIA program. Students will double-count 9 hours of Bush School courses toward the undergraduate major coursework area and up to 9 hours toward general electives in the Bachelor of Arts in Economics. At the completion of the combined degree, students are prepared for a wide variety of post-graduate opportunities including: employment in global commerce, government, government contracting, national security, and transfer pricing.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students upon completing 102 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.

---

1. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

2. ECON 323 is a pre-requisite for most ECON electives.

3. ECON 100-499 (p. 965) and ECMT 100-499 (p. 964) may not be used to fulfill this requirement.

4. Select from ECMT 463, ECMT 475; ECON 301-499 (p. 965).

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

No more than 36 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for all Economics and Econometrics coursework.

5 Courses can count towards the economics elective on the BA degree plan.
6 Courses can count towards the general elective on the BA degree plan.
7 BUSH graduate advisor will assist with BUSH/INTA course selection for chosen track in graduate program.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

No more than 36 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for all Economics and Econometrics coursework.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Arts in Economics and the Master of International Affairs.

Students can double-count up to 9 hours of Bush School courses toward the undergraduate major coursework area and up to 9 hours toward general electives in the Bachelor of Arts in Economics.

**Economic Electives**

In addition to the electives for the BA in ECON, the following courses may be selected for the ECON-MIA program: BUSH 632, BUSH 635; INTA 608, INTA 616, INTA 625; INTA 630, INTA 632.

See the MIA program in the Graduate and Professional Catalog for the MIA requirements.
Economics - 5-Year Bachelor of Arts/Master of Public Service Administration

The combined program between the Department of Economics and The Bush School of Government and Public Service allows undergraduate Economics students to enter the Master of Public Service Program, with a focus in Public Policy Analysis, at the beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to public policy and management along with skills in leadership and research methods.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School’s MPSA program. Students will double-count 9 hours of Bush School courses toward the undergraduate major coursework area and up to 9 hours toward general electives in the Bachelor of Arts degree in Economics. At the completion of the combined degree, students are prepared for a wide variety of post-graduate opportunities including: employment in local, state or federal government, non-profit organizations, or government contracting.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students upon completing 102 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.

Economics - BS

The Bachelor of Science degree in Economics offers a strong liberal arts curriculum aimed at enhancing students’ analytical skills and applications to better understand human behavior. The degree plan is designed to allow opportunities for applied exploration of economic principles and theory through research, internship, and study abroad while focusing on quantitative skills and the development of rational thought and critical thinking. In addition to building skills in social science research and data analysis, the Bachelor of Science degree plan encompasses a broad spectrum of coursework from throughout the College of Liberal Arts and Texas A&M University. By allowing for flexibility in courses that can be taken within the core curriculum, as well as for general electives, students can achieve a well-rounded education that can help with their future educational and professional goals.

To build a solid base of understanding, students take foundational courses in microeconomics, macroeconomics and mathematics, then refine those skills in statistics and intermediate economic theory classes. In upper-level courses, these reasoning abilities are applied to specific situations with a particular focus on understanding social problems from an economics perspective.

Students who graduate with a Bachelor of Science degree in Economics have a wide spectrum of career fields to choose from. Many students will pursue careers in business, law, finance, the nonprofit sector, and government, public policy and political professions.

Economic Electives

In addition to the electives for the BA in ECON, the following courses may be selected for the ECON-MPSA program: BUSH 632, BUSH 635; PSAA 621, PSAA 622, PSAA 638, PSAA 640.

See the MPSA program in the Graduate and Professional Catalog for the MPSA requirements.

1. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.
2. ECON 323 is a prerequisite for most ECON electives.
3. Select from ECMT 463, ECMT 475; ECON 301-499 (p. 965).
4. ECON 100-ECON 499 and ECMT 100-ECMT 499 (p. 964) may not be used to fulfill this requirement.
5. Courses can count towards the general elective on the BA degree plan.
6. Courses can count towards the economics elective on the BA degree plan.
7. BUSH graduate advisor will assist with BUSH/PSAA course selection for chosen track in graduate program.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

No more than 36 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for all Economics and Econometrics coursework.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Arts in Economics and the Master of Public Service Administration.

Students can double-count up to 9 hours of Bush School courses toward the undergraduate major coursework area and up to 9 hours toward general electives in the Bachelor of Arts degree in Economics.

The Department of Economics offers a 5-year combined degree program that provides the opportunity to earn a Bachelor of Science in Economics and a Master of Science in Economics with a concentration in either Financial Economics or Financial Econometrics. Students will double count six hours of masters-level coursework toward the undergraduate degree and complete both the undergraduate degree and the 32 credit hour thesis option or 36 credit hour non-thesis option Master’s degree in five years.

Students interested in this program will apply during the spring or fall semester of their junior year and, if admitted, begin taking masters-level courses in the final two semesters of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students upon completing 102 credit hours, typically in the following semester. These credit hours, predominantly taken synchronously at Texas A&M University, must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and the university for an undergraduate degree.

---

1. ECON 323 is a pre-requisite for most ECON electives.
2. Student must complete ECMT 461 or equivalent STAT course (Pre-approved by an advisor) prior to ECMT 463.
3. Select from ECMT 475, ECON 301-499 (p. 965).
4. ECON 100-499 (p. 965) and ECMT 100-499 (p. 964) may not be used to fulfill this requirement.
5. Courses can count towards the general elective on the BS degree plan.
6. Courses can count towards the economics elective on the BS degree plan.
7. BUSH graduate advisor will assist with BUSH/INTA course selection for chosen track in graduate program.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.
The study of economics provides a rigorous structure for decision-making, whether on academic topics or day-to-day activities such as how
to divide roommate expenses or how to allocate time between study and recreation. Economics teaches students how to think rationally about problems, a skill that is essential in any profession.

A minor in economics provides knowledge and information that will make a student a better-informed consumer and participant in the world economy. It also provides a basis for a better understanding of world events.

Select two courses from the following:

- ECON 300 to 499 (p. 965)

Total Semester Credit Hours 15

Students must make a grade of C or better in all courses.

Business Economics - Certificate

The Business Economics Certificate (BEC) is an innovative program designed to prepare students for successful careers in a rapidly changing economic environment. The certificate combines a foundation in Economics in the College of Liberal Arts with a business minor in the Mays College of Business, integrating the practical skills taught in business courses with the analytical tools of economics.

Prescribed electives

Select two of the following: 3,4

- ECON 315 Sports Economics
- ECON 420 Law and Economics
- ECON 425 The Organization of Industry
- ECON 426 Economics of Antitrust and Regulation
- ECON 433 Energy Markets and Policy
- ECON 445 Financial Economics
- ECON 449 Economics of Decision-Making Strategy

Total Semester Credit Hours 12

1. Student must complete ECMT 461 or equivalent STAT course (pre-approved by an advisor) prior to ECMT 463.
2. ECMT 461 and ECMT 463 are prerequisites for this course.
3. ECMT 475 and the required six hours of electives may also be used to satisfy the Economics electives requirement.
4. ECON 323 is a pre-requisite for all 400-level ECON courses.

Students pursing this certificate must also complete a minor in Business Administration (BUAD) (p. 267).

Quantitative Economic Methods - Certificate

The Quantitative Economic Methods certificate program prepares students for entry into an economics Ph.D. program or highly quantitatively-oriented occupation such as economic consulting and research. Students select from a set of courses in the Statistics and Mathematics departments to broaden their understanding of the fundamental basis of advanced economics. In addition, students are required to take several intensive economics courses focused on mathematical and statistical topics. Students interested in this certificate are also strongly encouraged to participate in undergraduate research activities in the Department of Economics.

- MATH 221 Several Variable Calculus
- MATH 300 Foundations of Mathematics
- MATH 304 Linear Algebra
- MATH 323 Linear Algebra
- MATH 409 Advanced Calculus I
- STAT 414 Mathematical Statistics I
- STAT 415 Mathematical Statistics II

Total Semester Credit Hours 18

1. ECMT 461 and ECMT 463 are prerequisites for this course.
2. Completion of MATH 151 and higher is suggested when enrolling in this course.
3. All MATH and STAT courses listed require a minimum of MATH 151 and MATH 152.

Department of English

Contemporary English studies – like the English language itself – has a global reach. Our curriculum is shaped by the flow of English-speaking people and cultural production in English across both time and space, combining historical, linguistic and cultural analysis with creative work in literature, film, and emerging media. The varied interests of our faculty and students include creative writing, rhetoric and discourse studies, gender and women's studies, film studies, digital humanities, health humanities, science fiction, and the full range of literatures and varieties of English, including African American, the African Diaspora, Latinx, Asian American, Native American, and South Asian studies.

Through these wide and rich areas of inquiry, we impart key skills – thinking critically, analyzing complex texts and contexts, communicating persuasively, and appreciating the aesthetic and cultural value of literary
and multimedia texts – that prepare our students for success in the workplace and in life.

The English major and minor offer flexibility by enabling students to pursue their own interests while acquiring important analytic and writing skills and discovering the riches of literature. The education English students receive prepares them for careers in technical writing, editing and publishing, government services, public relations, teaching, and many other professions.

We encourage English students to pursue research opportunities, to perform and publish their creative work, and to seek internships to build on what they are learning and to prepare for their future careers. We make a positive impact at home and abroad through our internationally recognized faculty and through the success of our students in academia, industry, and the professions.

Teacher Certification Programs in English

Teacher Certification in English Language Arts/Reading - OPTION II (Secondary)

Students desiring certification by Option II to teach English language arts and reading in the secondary schools of Texas should consult an undergraduate English advisor as early as possible. Requirements include 27 semester hours in literature, language, reading, and rhetoric and composition (an optional 24-30 hours in a second teaching field is possible); and professional education courses.

Degree and Certification Program for Middle School in English Language Arts/Reading

The Department of English offers a degree and certification program in English language arts/reading for prospective middle-school teachers. This program requires 36 hours of literature, linguistics, composition and rhetoric and 15 hours of reading along with an 18-hour professional education component.

All students seeking certification should consult an undergraduate English advisor for additional information.

Professional Writing Certificate

The Professional Writing Certificate gives students 18 hours of intensive training in a broad range of communication skills. Students who achieve a grade of B or better in all 18 hours of coursework will receive a certificate signifying their successful completion of this training. Students should allow at least a year and a half to complete the courses, some of which are offered only once a year. Transfer courses, independent studies and credit by exam cannot be counted toward the 18 hours. Required courses include ENGL 210, ENGL 320, and ENGL 355. With the help of the Professional Writing Certificate Advisor, the student must also select three additional courses in rhetoric, communication or a related field.

Minors

• English Minor (p. 589)

English - BA

The Department of English is dedicated to the study of literatures and cultures of those parts of the world in which English is a primary language. Our curriculum is shaped by the flow of English-speaking people and cultural production in English across both time and space, combining historical, linguistic and cultural analysis with creative work in literature, film, and emerging media. The varied interests of our faculty and students include creative writing, rhetoric and discourse studies, gender and women's studies, film studies, digital humanities, health humanities, science fiction, and the full range of literatures and varieties of English, including African American, the African Diaspora, Latinx, Asian American, Native American, and South Asian studies.

The B.A. in English allows students to develop their own areas of expertise through concentrations in areas such as literature, composition and rhetoric, creative writing, science fiction and fantasy studies, and film. Students who major in English learn how to communicate effectively and persuasively; develop writing skills (including in technical and business writing, and/or creative writing); learn textual analysis and effective research methods; and strengthen their critical thinking skills. This degree prepares students for a variety of careers including education, law, technical writing, publishing, entertainment, management, marketing and advertising, counseling and medicine.

1. Must make grade of C or better.
2. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.
3. Middle School Certificate seekers should consult an undergraduate English advisor for required courses.
4. At least 3 hours must be in MATH. Three hours may be PHIL 240.
5. Select from ENGL 100-499 (p. 970), LING 200-499 (p. 1048).
6. Up to 12 hours of ENGL 300-499 (p. 970) courses may be used.

Up to 51 credits in English can be applied to the degree; at least 21 credits must be in literature. A grade of C or higher is required for a course to be counted in the major. For residency, a student must have at least 12 hours in 300- or 400-level English classes from Texas A&M University.

**College and University Requirements**

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.
The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Other courses may qualify for the following categories. All courses are to be selected with the approval of the student’s academic advisor. The courses incorporate University Core Curriculum (p. 25) requirements. No course can be counted in more than one category, except as allowed in the minor field of study and the International and Cultural Diversity (p. 47) and Cultural Discourse (p. 46) graduation requirements. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University, with at least 12 of those hours being in the major.

**Minor Field of Study**

English majors are advised, but not required, to select a minor field of study. Students who elect to complete a minor should contact the department or program that offers the minor to determine the requirements for that minor. A grade of C or higher is required for a course to be counted in the minor field. A minor field must be declared before the student has completed 75 credit hours.

**English - BA, Middle School Teacher Certification**

The Department of English offers a degree and certification program in English language arts/reading for prospective middle-school teachers. This program requires 36 hours of major coursework in English, and 33 hours of supporting specialized coursework in specific areas of educational planning and teaching. This certification is a field-based program that requires students spend extensive time in middle schools. Students in the degree program specialize in teaching-specific subjects, cultivate excellent communication skills, and develop an understanding of the social and intellectual development of children.

All students seeking certification should consult an undergraduate English advisor for additional information.

1. Minimum grade of C required.
2. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.
3. At least 3 hours must be in MATH. Three hours may be PHIL 240.
4. Select from ENGL 100-499 (p. 970), LING 200-499 (p. 1048).

Up to 36 credits in English can be applied to the degree; at least 21 credits must be in literature. A grade of C or higher is required for a course to be counted in the major. For residency, a student must have at least 12 hours in 300- or 400-level English classes from Texas A&M University.

**College and University Requirements**

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Other courses may qualify for the following categories. All courses are to be selected with the approval of the student’s academic advisor. The following lists incorporate University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the minor field of study and the International and Cultural Diversity (p. 47) and Cultural Discourse (p. 46) graduation requirements. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University, with at least 12 of those hours being in the major.

**English - 5-Year Bachelor of Arts/Master of Arts in English**

The Department of English offers a five-year combined degree program that provides the opportunity to earn a Bachelor of Arts in English and a Master of Arts in English.

In this program, the undergraduate degree requirements are slightly modified to require more theory and methods courses in an effort to prepare students for the more rigorous masters-level coursework. Students will double count six hours of masters-level
coursework toward the undergraduate degree and complete both the undergraduate degree and the 36-hour Masters degree in five years.

At the completion of the degree, students are well-prepared to apply for doctoral programs in English and related humanities, positions teaching composition, and editorial and other writing-centered employment.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students upon completing 96 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in English, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.

5. Select from ENGL 100-499 (p. 970), LING 200-499 (p. 1048).
6. Course can count towards the English elective on the BA degree plan.
7. Select from ENGL 608, ENGL 610/LING 610, ENGL 613, ENGL 618, ENGL 634, ENGL 650, ENGL 654/COMM 654, ENGL 655/COMM 655, and ENGL 671. Each course can only be taken once for credit.
8. Select from ENGL 600-699 (http://catalog.tamu.edu/graduate/course-descriptions/engl/) (excluding ENGL 691), LING 600-699 (http://catalog.tamu.edu/graduate/course-descriptions/ling/). See graduate advisor.

A grade of C or higher is required for a course to be counted in the major.

For residency, a student must have at least 12 hours in 300- or 400-level English classes from Texas A&M University.

The program includes a total of 156 hours, of which up to 6 hours of graduate-level coursework may be applied toward both the Bachelor of Arts in English and the Master of Arts in English (non-thesis).

### College and University Requirements

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Other courses may qualify for the following categories. All courses are to be selected with the approval of the student’s academic advisor. The courses incorporate University Core Curriculum (p. 25) requirements. No course can be counted in more than one category, except as allowed in the minor field of study and the International and Cultural Diversity (p. 47) and Cultural Discourse (p. 46) graduation requirements. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University, with at least 12 of those hours being in the major.

### English - Minor

The minor in English is offered by the Department of English and is open to all students. Students with a minor in English cultivate expertise in different literary forms, traditions, and approaches. Students have the opportunity to take courses in creative writing, rhetoric, science fiction and fantasy, African-American and Latinx literatures, gender and sexuality studies, and digital humanities. An English minor teaches students to communicate clearly and effectively, learn how to critically read and examine complex texts, build effective arguments, and recognize other points of view. These broadly applicable skills support and enhance the academic development of students who want to attend law or medical
school, work in marketing or advertising, teach at a variety of levels, or work in STEM fields. Whatever their post-graduation plans, the written communication and analytical skills of English minors are essential for thriving in all endeavors.

The minor consists of 18 hours of coursework in English, 6 hours of which must be at the 300-400 level, and 3 hours of which must be at the 400-level.

A grade of C or higher is required for a course to be counted in the minor field of study.

Department of Hispanic Studies

At a time when worldwide globalization includes the demographically and culturally significant Hispanicization of Texas, along with other areas of the United States, the study of the Spanish language and Hispanic cultures is important to achieve an understanding of the world in which we live. The mission of the Department of Hispanic Studies is to create and disseminate knowledge about the cultures and languages of the Hispanic world. Our research agenda includes Hispanic contemporary and period literature, film and performance, photography, iconography and digital humanities, cultural studies, gender and diaspora studies, and the history, presence and acquisition of the Spanish language in the United States. The department offers a Bachelor of Arts in Spanish, a Minor in Spanish, and a Minor in Hispanic Studies for Community Engagement. The development of Spanish language proficiency is at the core of all these programs.

The Department of Hispanic Studies is recognized for its excellent teaching and personalized attention to student needs. The department offers a full range of courses for undergraduates, including language instruction and content courses in literature, culture, professional Spanish, and linguistics. A major in Spanish can show future employers and/or graduate schools that a student has achieved a high level of linguistic ability and understanding of Hispanic cultures. The undergraduate major is designed to help students develop their oral and written language skills as they learn more about Hispanic cultures through literature, cultural studies, and linguistics. This kind of study is valuable for those who plan to go into international careers or to work with Hispanic populations in the United States. A Spanish major is useful in careers such as banking, advertising, marketing, journalism, health services, government, social welfare, and public administration, and it is excellent preparation for professional school in medicine, law, and business. Teaching certification is available to Spanish majors through the College of Education and Human Development.

The department insists on a high level of language competence as the basis for other intellectual growth in the discipline, and thus requires a minimum 10-week experience abroad. To help facilitate the fulfillment of this requirement, the department sponsors summer study abroad programs for credit in a variety of locations, such as Costa Rica, Chile, Ecuador, Mexico, and Spain. Semester and year-long study abroad programs, reciprocal exchanges, and internships are also available and encouraged.

The Department of Hispanic Studies recommends that Spanish language students, especially heritage language learners of Spanish and Advanced Placement (AP) students, take a healthy mixture of coursework related, on the one hand, to achieving University-level linguistic competence in the language; and coursework related to the Hispanic or Latino cultural experience on the other. To this end, students select from courses on language, grammar, and culture in spoken and written Spanish and electives that broaden the Hispanic/Latino knowledge base taught in English. A prudent and timely selection of courses can allow the student to apply coursework taken in the pursuit of bilingual/biculturalism to satisfy some requirements on the student’s degree plan. Many of the suggested courses will apply in the Core Curriculum, for example, in areas such as Humanities and Social Sciences. Discussions with a departmental advisor can help students to focus on the best possible fit of coursework with their interests and degree plan.

HISP and SPAN Courses

Reflective of its dual mission of striving to provide students with opportunities for cultural and linguistic competence, the Department of Hispanic Studies offers courses under two different rubrics, HISP and SPAN. HISP (p. 1013) courses cover a variety of topics pertinent to Hispanic cultures, such as food, film, literature in translation, music and visual culture, as well as social, political, and linguistic issues; they are offered in English. SPAN (p. 1147) courses are conducted in Spanish, and while they also deal with cultural topics ranging from literature to visual culture, they emphasize aspects of language and linguistic development.

Required Foreign Language Placement Test

Students who intend to enroll for the first time in a college foreign language course, who have previous knowledge of the language, however acquired, and who have no college credit in the language MUST take a placement test to determine the appropriate course for their level of ability. The foreign language placement test also serves as a basis for the credit by examination.

Students who take the Advanced Placement (AP) test or other acceptable tests that grant college-level credit in Spanish do not have to take the required foreign language placement test, as the results of these tests may be used for placement. They are encouraged to do so nonetheless. Heritage learners, or those who have acquired any level of Spanish outside of a formal academic setting, are also expected to take the exam to guarantee correct placement, even when AP test results are available.

The Spanish Placement Test (https://hisp.tamu.edu/undergraduate-program/placement-test/) is administered by the Department of Hispanic Studies on the Pre-Conference Day of the New Student Conferences. The test is also offered twice per week during the fall and spring semesters. Students who do not take the placement test on the Pre-Conference Day will not be able to register for a foreign language course during their first semester.

International students whose native language is not English are exempt from satisfying the university foreign language requirement. These students may not register for the beginning and intermediate level courses in their native language (course numbers 101, 102, 201, and 202) which are used to fulfill the foreign language requirement.

Majors

• Bachelor of Arts in Spanish (p. 591)

Minors

• Hispanic Studies for Community Engagement Minor (p. 593)
• Spanish Minor (p. 594)

Spanish - BA

A Spanish major provides students with language skills that translate into a practical tool for use in our increasingly bilingual landscape, whether this be Texas, the American Southwest, one of the many areas in the U.S. with large Spanish-speaking populations, or beyond our borders where over 500 million Spanish speakers reside. Above the practical aspect of the major, students of Spanish acquire a rich view of the world. Focusing on analytical and critical thinking, as well as cultural awareness, our students are prepared for graduate studies in Spanish and professional schools (medicine, law, business), and for professions in fields such as education, business, human resources, research, government, social service, tourism, journalism, and translation. To enhance their career options, Spanish majors are encouraged to seek out a complementary minor or second major/degree, to create even more opportunities after graduation. Similarly, students can also complete an internship that will provide practical hands-on experience.

The Spanish major consists of 33 hours of major coursework plus 38 hours of general supporting electives. The 33 hours are divided into 6 lower division hours (Spanish 201 or 221; 202 or 203 or 222) plus 27 hours that are equally distributed among Spanish language or linguistics (9 hours), Spanish literature or culture (9 hours), and approved related electives (9 hours). At least 9 of these 27 hours must be in 400-level Spanish courses. The 38 hours of general supporting electives can come from any of the university's offerings and may be taken as a minor or part of a second major. To underscore the focus on cultural awareness and to support the achievement of increased linguistic proficiency, our major requires a minimum 10-week experience abroad in a Spanish-speaking country. This experience abroad can be in a formal academic setting, through an internship or other comparable environment. For cases where an experience abroad is not possible, a student may petition that an internship or service-learning project be used instead.

1  SPAN 200-499 (p. 1147) may not be used as general electives.
2  Select from the following: SPAN 301, SPAN 302 or SPAN 304, SPAN 303, SPAN 306, SPAN 307, SPAN 350, SPAN 352, SPAN 452, SPAN 462.
3  Select from the following: SPAN 311, SPAN 312, SPAN 320, SPAN 331, SPAN 332, SPAN 341, SPAN 342, SPAN 410, SPAN 411, SPAN 412, SPAN 413, SPAN 421, SPAN 445, SPAN 450, SPAN 460, SPAN 461.
4  Select from SPAN 100-499 (p. 1147), HISP 100-499 (p. 1013); HISP-related courses (see HISP-Related Interdisciplinary Courses table).

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

33 hours required. Spanish majors are required to complete a credit-bearing 10-week minimum semester-long study or experience abroad in a Spanish-speaking country. Study abroad options include University-sponsored, reciprocal, affiliated, and independent programs. Selection of location and type of experience abroad should be made in consultation with departmental advisors. For students who are unable to study abroad, an internship may be used instead. This option is available with prior approval by the Spanish advisor.

### Hispanic Studies for Community Engagement - Minor

The minor in Hispanic Studies for Community Engagement offers students the opportunity to combine advanced Spanish language skills and Hispanic cultural knowledge with a service-learning experience. This minor complements degrees from other disciplines as it can incorporate courses taught in English that address multiple themes from throughout the Hispanic world. Coursework for this minor consists of 18 hours: 6 hours of 300- to 400-level Spanish courses; 9 hours of relevant courses in Anthropology, English, Hispanic Studies, History, Philosophy, Political Science, or Sociology; and 3 credit hours of service-learning experience with an organization or institution whose primary focus is providing services to Hispanic or Spanish-speaking communities. Of the total required hours, at least 9 must be taken in residence at Texas A&M.
Spanish - Minor

The Spanish minor allows students with other majors to work on their linguistic skills while they gain Hispanic cultural competency. A great way to complement coursework in many other majors, including those in science, health, and business, this minor focuses on language-based coursework that will serve as an asset upon entering the job market after graduation. The minor requires 18 hours of course work beyond 100-level Spanish courses including Spanish 201; 202 or 203. The remaining 12 hours may be selected from the many 300- and 400-level courses offered every semester. Of the total required hours, at least 9 must be taken in residence at Texas A&M.

At least 9 of these 18 hours must be taken at Texas A&M. A grade of C or higher is required for a course to be counted in the minor field. A minor must be declared before the student has completed 75 credit hours.

Department of History

Welcome to the History Department!

The Department of History, through its dual functions of research and teaching, seeks to broaden and deepen our understanding of the past and prepare students to engage with the increasingly complex, globalizing present. Upon earning a BA in History, students will be able to apply critical thinking skills to, and to communicate verbally and in written format about, contemporary events. Our undergraduate students also develop the skills necessary for quality research, the assessment of conflicting evidence, and the practice of effective writing, argumentation, and advocacy. As a result, they will become more informed global citizens as well as more proficient in the abilities that most employers continue to value above all others. The faculty teach over one hundred undergraduate courses on peoples, ideas, and cultures from around the world and across the ages, and are devoted to developing students’ ability to understand how studying history can help solve some of today's most pressing problems. The department also offers several different study-abroad programs meant to further enhance students' familiarity with the world’s diverse cultures and increase their foreign language competency.

The Department of History at Texas A&M offers the B.A., M.A., and Ph.D. A major in history affords students both a broad education and valuable practical skills. By acquiring familiarity with people in diverse times, places, and circumstances, students of history develop a sophisticated human empathy which is the key to good scholarship and good citizenship alike. Teaching is, of course, one important career path for history majors. But many students rely upon a major in history as preparation for a career in a variety of different government agencies, law and law enforcement, the military, intelligence analysis, foreign service, tech, business, public administration and relations, non-profit work, parks
and recreation, archival and library resources, advertising, and religious leadership. History, in other words, stands as the departure point for an array of jobs in any number of different fields.

History - BA

Students who wish to major in History do so because they understand that the problems of the present are fundamentally rooted in the choices made by past peoples. History majors, therefore, do not memorize names and dates. Instead, they are detectives, busily scrutinizing and actively interpreting the historical record for a deeper understanding as to why the world looks as it does and how our society might be improved. And in doing so, history majors acquire a number of practical skills that many different employers look for in job candidates. Our majors become experts in both written and oral self-expression, argumentation, and advocacy. In addition, history majors acquire the skills necessary to conduct thorough research, assess evidence, and effectively present one’s findings. It is no wonder, then, that our majors go on to succeed in the fields of education, law, law enforcement, public service, consulting, and business, among many other careers. In today’s global economy, there is persistent demand for job candidates familiar with diverse cultures and points of view. History majors, who take courses specializing in countries and regions around the world, are ideally positioned to succeed in such a job market. This is particularly true of majors who take advantage of our department’s numerous opportunities for study abroad and foreign language instruction.

In the History major, students take courses specializing in many different cultures and time periods. This array of classes helps to familiarize students with human diversity while imparting the marketable skills that make our graduates competitive in any number of career fields.

Teacher Certification

Some history majors may wish to pursue a career in education at the elementary, middle-, or high-school levels. The History Department is proud to welcome and help train the future teachers of both Texas and the nation. Students wishing to meet certification requirements to teach history or social studies in the secondary schools of Texas should contact the College of Education and Human Development for more complete information about the certification options available at Texas A&M University. To be eligible for these options, students must also consult with, and have approval of, their field advisor in the Department of History.

General elective 3 3

Semester Credit Hours 13
Total Semester Credit Hours 120

1 Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.
2 At least 12 hours at the 300- and 400-level. At least 3 hours of pre-modern history and at least 3 hours from three of the five lists (United States; Europe; Latin America and Caribbean; Africa, Asia and the Middle East; Thematic).
3 Students may use an additional 12 hours of HIST 300-499 (p. 1014) for this requirement.
4 Writing-intensive course.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Students should plan a program of study in consultation with one of the department’s undergraduate advisors.

A minimum of 33 hours in history may be applied to the degree. Students must take not less than 15 credit hours at upper level for history residency requirement. A grade of C or higher is required for a course to be counted in the major field. A student must complete not less than 18 hours of coursework in history at Texas A&M University.

**Minor Field of Study**

All history majors are encouraged to select a minor field of study from departments or divisions within or outside of the College of Liberal Arts or in a particular area of interest (as in the case of interdisciplinary minors or career opportunity minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. A grade of C or higher is required for a course to be counted in the minor field. Interdisciplinary minors (p. 539) such as Women’s and Gender Studies, Africana Studies, Classical Studies, Religious Studies, Film Studies, Latina/o and Mexican American Studies, and Business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on “Minor Field of Study” under the general requirements (p. 532) of the College of Liberal Arts.

**History - Minor**

A minor is also offered by the Department of History. All majors are welcome as History minors. History is, in fact, the ideal complement to virtually any course of study at Texas A&M. Students in the sciences and engineering, for example, would greatly benefit by using a History minor to help sharpen their writing and critical thinking skills. Employers consistently cite an inability to write and reason as their chief complaints about prospective hires. History minors receive valuable training in precisely those things. Other students interested in graduate or professional programs such as law school or social work also stand to benefit from a historical perspective on the issues and problems that matter to our nation and world today. A minor in History therefore helps to
broaden one's education and enhance a student's competitiveness on the job market.

The Minor in History requires a minimum of 15 hours of coursework. To add a History Minor, a student must make a request through their Major Advisor.

The Department of International Studies

https://liberalarts.tamu.edu/ints (https://liberalarts.tamu.edu/ints/)

The Department of International Studies is dedicated to fostering cultural understanding and global engagement through the discovery, dissemination, and translation of knowledge, using diverse approaches from the humanities, social sciences, and language studies. The department is at the forefront of university efforts to prepare students for a globally interconnected future and to educate global citizens and future leaders.

The department offers diverse curricula that immerse students in the social, political, economic, and cultural implications of globalization. The BA in International Studies combines a linguistic and cultural proficiency with a flexible set of tracks and a mandatory abroad experience. In addition, the department offers Modern Language BA degree options in French, German, and Russian, as well as a BA in Classics. Students can minor in Arabic, Chinese, Classical Studies, French, German, Italian, Japanese, and Russian. We also offer minors in Comparative Cultural Studies and Asian Studies. Our programs give students a combination of measurable language proficiency and a global perspective that will serve both their professional and personal ambitions.

Required Foreign Language Placement Test. Incoming students who intend to enroll for the first time in any language course at Texas A&M University, who have previous knowledge, however acquired, of the language in which they plan to enroll, and who have no college credit in the language, must take the departmental placement examination to determine the appropriate course for their level of ability. The placement test also serves as a basis for credit by examination. The placement examination will be administered by the Department of International Studies during freshman conferences along with other credit by exam tests. The test will also be offered during Fall and Spring semesters. Students who take the Advanced Placement (AP) test or other acceptable tests which grant college-level credit in their foreign language of choice do not have to take the required departmental placement test. In this case, the AP and Achievement test results may be used for placement.

International students whose native language is not English are exempted from satisfying the University foreign language requirement. These students are not allowed to register in those courses in their native language that are used to fulfill that requirement.

Majors

• Bachelor of Arts in Classics, Classical Civilization Track (p. 600)
• Bachelor of Arts in Classics, Language and Literature Track (p. 601)
• Bachelor of Arts in International Studies, Global Cultural Studies Track (p. 602)
• Bachelor of Arts in International Studies, International Commerce Track (p. 604)
• Bachelor of Arts in International Studies, International Communication and Media Track (p. 606)
• Bachelor of Arts in International Studies, International Environmental Studies Track (p. 607)
• Bachelor of Arts in International Studies, International Geographic Information Systems Track (p. 609)
• Bachelor of Arts in International Studies, International Politics and Diplomacy Track (p. 611)
• Bachelor of Arts in International Studies and Master of International Affairs, 5-Year Degree Program (p. 613)
• Bachelor of Arts in Modern Languages, French Option (p. 615)
• Bachelor of Arts in Modern Languages, German Option (p. 616)
• Bachelor of Arts in Modern Language, Russian Option (p. 618)

Minors

• Arabic Studies Minor (p. 619)
• Asian Studies Minor (p. 620)
• Chinese Minor (p. 621)
• Classical Studies Minor (p. 621)
• French Minor (p. 621)
• German Minor (p. 622)
• Italian Minor (p. 622)
• Japanese Minor (p. 622)
• Russian Minor (p. 623)

Certificates

• Proficiency in Arabic Certificate (p. 623)
Classics - BA, Classical Civilization Track

The BA in Classics is designed to give students a thorough grounding in the culture, history, literature, and intellectual accomplishments of Ancient Greece and Rome from the Bronze Age to the dawn of the Middle Ages.

Studying the history and literature of these civilizations will not only help students to develop skills in close reading, writing, and critical thinking, but will also help them to see how fundamental concepts of Western Civilization such as rationalism and democracy first arose in Classical Antiquity.

The Classical Civilization track focuses on the history, beliefs, and material culture of ancient Greek and Roman civilization. It consists of 4 hours of foundational courses and 27 hours of electives, which include courses in archaeology, ancient history, and philosophy. Students can fulfill the foreign language requirement by studying a classical or modern language.

A major in Classics signals a commitment to serious intellectual inquiry and is an excellent basis for careers in law, business, consulting, public service, and teaching. Those intending to pursue careers in medicine or finance will also find that a major in Classics can be easily combined with undergraduate courses required for those fields.

1. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

2. At least 3 hours must be in MATH. Three hours may be PHIL 240.

3. Select from ANTH 300-499 (p. 896); ARCH 430, ARCH 434; ARTS 335; CLAS 220, CLAS 230-499 (p. 935); HIST 300-499 (p. 1014).

4. Select from any 100-499 courses not used elsewhere, except CLAS 300-499 (p. 935).

5. Select from ANTH 316, ANTH 317/RELS 317; CLAS 220, CLAS 230-499 (p. 935); PHIL 410, PHIL 411.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement.
The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

**Minor Field of Study.** All Classics majors are strongly encouraged to select 15-18 hours in a minor field of study. Students must earn a 'C' or better in all minor coursework.

Courses cross-listed with other programs cannot be used under different prefixes to fulfill more than one requirement.

**Classics - BA, Language and Literature Track**

The BA in Classics is designed to give students a thorough grounding in the culture, history, literature, and intellectual accomplishments of Ancient Greece and Rome from the Bronze Age to the dawn of the Middle Ages.

Studying the history and literature of these civilizations will not only help students to develop skills in close reading, writing, and critical thinking, but will also help them to see how fundamental concepts of Western Civilization such as rationalism and democracy first arose in Classical Antiquity.

The Literature and Language track has a traditional focus on Latin and Greek philology (students choose either Latin or Greek to specialize in, but are encouraged to take both) and is intended to enable students to read and enjoy the great texts of Classical Antiquity (Homer, Herodotus, Thucydidès, Livy, Tacitus, the New Testament, etc.) in the original languages. Students take 18 hours of language (Greek or Latin) at the 200-300 levels, 4 hours of foundational courses, and 9 hours of electives.

A major in Classics signals a commitment to serious intellectual enquiry and is an excellent basis for careers in law, business, consulting, public service, and teaching. Those intending to pursue careers in medicine or finance will also find that a major in Classics can be easily combined with undergraduate courses required for those fields.

1 Select Greek language sequence or Latin language sequence sequence for a total of 18 hours. Greek: Take CLAS 102, CLAS 211, CLAS 312, 9 hours from CLAS 310 to 319 (p. 935). Latin: Take CLAS 122, CLAS 221, CLAS 222, 9 hours from CLAS 320 to 329 (p. 935).
2 At least 3 hours must be in MATH. Three hours may be PHIL 240.
International Studies - BA, Global Cultural Studies Track

The BA in International Studies (INTS) is an interdisciplinary degree that combines linguistic and regional expertise, with specialization in a subfield specific to the track.

Global Cultural Studies Track

The Global Cultural Studies track offers students both a fundamental theoretical background in cultural studies as well as a broad array of courses in international cultural production and criticism. This humanities based program provides students with a rich understanding of artistic expression in a global setting.

Principle objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

Minor Field of Study. All Classics majors are strongly encouraged to select 15-18 hours in a minor field of study. Students must earn a ‘C’ or better in all minor coursework.

Courses cross-listed with other programs cannot be used under different prefixes to fulfill more than one requirement.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

1 Students completing a Bachelor of Arts in the College of Liberal Arts are required to complete 14 hours of a foreign language (p. 532) through the intermediate level. Students in International Studies are required to complete an additional 6 hours of a foreign language through the advanced level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See the Foreign Language paragraph.

2 At least 3 hours must be in MATH. Three hours may be PHIL 240.

3 The course will be used to track student's completion of the International Experience Requirement (see paragraph below).

4 Choose courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.

5 Select from AFST 325, AFST 326; ARAB 400-499 (p. 900); ARTS 349, ARCH 430, ARCH 434; CHIN 400-499 (p. 934); CLAS 415/ FILM 415, CLAS 418; COMM 335, COMM 340, COMM 365/JOUR 365, EURO 300-499 (p. 989); FREN 400-499 (p. 998); GEOG 311; FILM 398/AFST 398; GERM 400-499 (p. 1010); HIST 421; INTS 215/FILM 215, INTS 301, INTS 484; ITAL 400-499 (p. 1037); MUSC 324/ANTH 324; PERF 301, PERF 325; PHIL 330, PHIL 331/RELS 331, PHIL 371, PSYC 346; RUSS 400-499 (p. 1136); WGST 404/ANTH 404. Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Foreign Language
Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

International Experience Requirements
The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the
International Studies - BA, International Commerce Track

The BA in International Studies (INTS) is an interdisciplinary degree that combines linguistic and regional expertise, with specialization in a sub-field specific to the track.

International Commerce Track

The International Commerce track combines a basic set of courses in business practice with a broader set of courses in international economic and social theory. Student choose their coursework from a list that spans at least four colleges of the university. It provides students with a well-developed understanding of the interconnectedness of global commercial systems.

Principle objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

### Foreign Language

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

### International Experience Requirements

The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. **Any international experience that does not meet these criteria will not count toward the degree.**

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
  - Must be taken outside of the student's country of origin.
- Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity and Cultural Discourse Graduation requirement.
International Studies - BA, International Communication and Media Track

The BA in International Studies (INTS) is an interdisciplinary degree that combines linguistic and regional expertise, with specialization in a sub-field specific to the track.

International Communication and Media Track

This track offers a discreet set of courses that provide students with a strong background in how media function in a global setting. As one of the largest sectors of the American and global economy, communication and media occupy a major role in our private and professional lives. Moreover, this sector of the economy often functions transnationally in a relatively seamless fashion.

Principle objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

Exam results may fulfill a maximum of 14 semester credit hours. Students entering International Studies take a placement exam to meet the Foreign Language requirement, or a free elective can be used to satisfy this requirement. Graduation requirements include 3 hours of General elective, General elective, International communication and media, and International communication and media. 3 hours must be at the 300- or 400-level.

Students placed in 201 will take 201 and 6 semester credit hours at the 300- or 400-level. Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level. Students placed in 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

International Experience Requirements
The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
  - Must be taken outside of the student’s country of origin.
  - Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity Graduation and Cultural Discourse requirement.

International Studies - BA, Environmental Studies Track
The BA in International Studies (INTS) is an interdisciplinary degree that combines linguistic and regional expertise, with specialization in a subfield specific to the track.

International Environmental Studies Track
Globalization and rapid industrialization have brought about a set of environmental concerns that defy national boundaries. Students will work through a fascinating array of coursework chosen among the Colleges of Geoscience, Science, AgriLife, and Liberal Arts. Ultimately students will have a firm grasp of the myriad environmental issues that arise from our global interconnectedness.
Principle objectives
1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum
The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

1 Students completing a Bachelor of Arts in the College of Liberal Arts are required to complete 14 hours of a foreign language (p. 532) through the intermediate level. Students in International Studies are required to complete an additional 6 hours of a foreign language through the advanced level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See the Foreign Language paragraph.
At least 3 hours must be in MATH. Three hours may be PHIL 240.

Select six (6) courses from at least two departments. Not all courses will be offered every semester. See academic advisor. Select from AGEC 105, AGEC 350, AGEC 414, AGEC 452; AGLS 101; ATMO 201; BESC 201; BIOL 357, GEGO 201, GEGO 202, GEGO 203, GEGO 304, GEGO 311, GEGO 324, GEGO 330, GEGO 401, GEGO 430; GEOL 101, GEOL 420; GEOS 210, GEOS 410, INTS 301, INTS 484; NFSC 201; OCNG 251; PHIL 314; POLS 347; RENR 205, RENR 375; SOCI 206, SOCI 328.

The course will be used to track student’s completion of the International Experience Requirement (see paragraph below).

Select courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Foreign Language

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

International Experience Requirements

The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
- Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
- A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.

- Must be taken outside of the student’s country of origin.
- Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity and Cultural Discourse Graduation requirement.

International Studies - BA, International Geographic Information Systems Track

The BA in International Studies (INTS) is an interdisciplinary degree that combines linguistic and regional expertise, with specialization in a sub-field specific to the track.

International Geographic Information Systems Track

The International GIS track immerses students in the workings of spatially distributed information that is used in the environmental, transportation, defense, and many other sectors of the economy. Students will develop skills in spatial analysis and advanced applications of GIS technologies.

Principle objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

---

1. Students completing a Bachelor of Arts in the College of Liberal Arts are required to complete 14 hours of a foreign language (p. 532) through the intermediate level. Students in International Studies are required to complete a total of 6 hours of a foreign language through the advanced level. If you choose to enroll in a language you have studied previously without receiving college credit, you must take a placement test. See the Foreign Language section.

2. At least 3 hours must be in MATH. Three hours may be PHIL 240.

3. Select from ATMO 201; GEOG 203, GEOG 205; GEOL 101; GEOS 210; OCNG 251.

4. The course will be used to track student's completion of the International Experience Requirement (see paragraph below).

5. Select courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.

6. Select from GEOG 320, GEOG 323, GEOG 324, GEOG 325, GEOG 327.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement.
International Studies - BA, International Politics and Diplomacy Track

The BA in International Studies (INTS) is an interdisciplinary degree that combines linguistic and regional expertise, with specialization in a subfield specific to the track.

International Politics and Diplomacy Track

This track offers students a fundamental understanding of foreign relations. Students learn about the workings of governments and civil societies in a global framework. From this program students gain a sound understanding of how governments communicate and cooperate in regional, continental, and global settings.

Principle objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student's foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

¹ Required for the major.
² Required for the minor.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity and Cultural Discourse Graduation requirement.

Foreign Language

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201, 202 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

International Experience Requirements

The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
  - Must be taken outside of the student's country of origin.
  - Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

### Foreign Language

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
• Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

International Experience Requirements (INTS 300)
The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree.

• Must be at least one long semester or one 10-week summer approved experience.
• Must be taken after completion of 100- and 200-level language requirement and INTS 201.
• Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
• Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  • An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  • Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  • Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  • A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
• Must be taken outside of the student’s country of origin.
• Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity and Cultural Discourse Graduation requirement.

International Studies - 5-Year Bachelor of Arts and Master of International Affairs
The International Studies department, in conjunction with the Bush School of Government and Public Service, offers a combined degree program that allows International Studies majors to enter the Bush School at the beginning of their fourth year at Texas A&M. This opportunity enables students to receive their International Studies undergraduate degree and a Master of International Affairs (MIA) degree in five years.

The partnership between International Studies and the Bush School is especially attractive because all graduates from the Bush School’s Masters Program must have proficiency in a foreign language and are encouraged to spend a semester abroad; International Studies majors will have completed this requirement prior to entering the Bush School graduate program.

Students admitted to the five-year degree program will have completed 102 hours of the 120 hours of coursework required to receive their bachelor’s degree. These courses must include all of the specific prerequisites for a Bachelor of Arts degree in International Studies (within the Politics and Diplomacy emphasis track), as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree. Students will be required to complete the same two year, 48 hour curriculum as other students admitted to the Bush School’s MPSA program.

For information about the 5-year combined degree program, contact the Bush School (http://bush.tamu.edu/).

¹ Must be at least one long semester or one 10-week summer approved experience.
² Must be taken after completion of 100- and 200-level language requirement and INTS 201.
³ Must be an immersion experience in the foreign culture and language, which can be satisfied by:

- An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
- Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
- Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
- A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.

- Must be taken outside of the student’s country of origin.
- Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity and Cultural Discourse Graduation requirement.

---

1. Students completing a Bachelor of Arts in the College of Liberal Arts are required to complete 14 hours of a foreign language (p. 532) through the intermediate level. Students in International Studies are required to complete an additional 6 hours of a foreign language through the advanced level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See the Foreign Language paragraph.

2. At least 3 hours must be in MATH. Three hours may be PHIL 240.

3. Select two (2) courses from at least two departments. Not all courses will be offered every semester. See academic advisor. Select from COMM 354, COMM 443; GEOG 401, GEOG 420; ECON 203, ECON 320, ECON 330; HIST 343, HIST 444, HIST 462, HIST 463, HIST 464; INTS 251, INTS 301, INTS 321, INTS 484; POLS 229, POLS 231, POLS 322, POLS 323, POLS 324, POLS 325, POLS 326, POLS 328, POLS 338, POLS 347, POLS 349, POLS 350, POLS 358, POLS 362, POLS 364, POLS 365, POLS 366, POLS 367/WGST 367, POLS 368, POLS 412, POLS 413, POLS 415, POLS 423, POLS 424, POLS 429, POLS 432, POLS 447, POLS 454, POLS 475; SOCI 203, SOCI 337, SOCI 412, SOCI 423.

4. The course will be used to track student's completion of the International Experience Requirement (see paragraph below).

5. Select courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.

6. Double counted course. See advisor.

7. George Bush School course that could double count as BA-INTS International Politics and Diplomacy.

8. George Bush School course that will only count towards the graduate level program.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Arts in International Studies and the Master of International Affairs.

### Foreign Language

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
• Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.

• Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

**International Experience Requirements**
The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree. International Experience must be completed prior to admission into the 5-year Degree Program.

• Must be at least one long semester or one 10-week summer approved experience.

• Must be taken after completion of 100- and 200-level language requirement and INTS 201.

• Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.

• Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
  - Must be taken outside of the student's country of origin.
  - Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity and Cultural Discourse graduation requirement.

**Modern Languages - BA, French Option**
The BA in Modern Languages (MODL) supports and advances students' international and global competencies. Students can choose to major in French, German, or Russian. Courses are designed to offer students extended study of the languages, literatures, social histories, and cultures of these language communities.

The careful combination of foreign language skills with other curricula enhances preparation for careers in industry, government, academia and the non-profit sectors. Teaching certification is available to majors through the College of Education and Human Development.

In addition to classes at the College Station campus, the department offers summer study abroad programs for credit. Departmental faculty and advising staff also work closely with students to match their interests with semester and full-year programs abroad.

Students will be required to complete, by coursework or placement test, all 100- and 200-level courses in sequence. Once a student has received credit for a higher-level language course, the student is no longer eligible to receive credit for prerequisite courses.

Results may fulfill a maximum of 14 semester credit hours.

Students entering Modern Languages - French take a placement exam to determine the level of and number of required French courses. Exam results may fulfill a maximum of 14 semester credit hours.

Students placing out of 101, 102, 201 and 202 will take 27 semester credit hours at the 300- or 400-level.

Minor Field of Study

All Modern Language majors must select a minor field of study from departments or divisions within or outside of the College of Liberal Arts or in a particular area of interest (as in the case of interdisciplinary minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. No more than 9 credit hours may be at the 100-299 level. Interdisciplinary minors such as women’s and gender studies, classical studies, religious studies, and business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on ‘Minor Field of Study’ under the general requirements of the College of Liberal Arts. In general, the careful combination of foreign language skills with other major curricula enhances preparation for careers in business, industry and government. Teaching certification is available to majors through the College of Education and Human Development. Consult the College of Education and Human Development section under secondary teacher certification for additional information.

Any departmental major must earn a C or better in all major and minor coursework.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. The lists incorporate University Core Curriculum requirements. No course can be counted in more than one category.

Modern Languages - BA, German Option

The BA in Modern Languages (MODL) supports and advances students’ international and global competencies. Students can choose to major in French, German, or Russian. Courses are designed to offer students extended study of the languages, literatures, social histories, and cultures of these language communities.

The careful combination of foreign language skills with other curricula enhances preparation for careers in industry, government, academia and the non-profit sectors. Teaching certification is available to majors through the College of Education and Human Development.

In addition to classes at the College Station campus, the department offers summer study abroad programs for credit. Departmental faculty and advising staff also work closely with students to match their interests with semester and full-year programs abroad.

Students will be required to complete, by coursework or placement test, all 100- and 200-level courses in sequence. Once a student has received credit for a higher-level language course, the student is no longer eligible to receive credit for prerequisite courses.

If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See the Foreign Language paragraph.
3 Two-semester or one-semester sequence of Intermediate German is required. Select from GERM 201 & GERM 202, GERM 221 & GERM 222, GERM 204
4 See the Minor Field of Study paragraph.
5 See the Study Abroad Requirement paragraph.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Foreign Language Requirement

Students entering Modern Languages - German take a placement exam to determine the level of and number of required German courses. Exam results may fulfill a maximum of 14 semester credit hours.

• Students placed in 101 will take 101, 102, 201 and 202 and 27 semester credit hours at the 300- or 400-level.
• Students placed in 102 will take 102, 201 and 202 and 27 semester credit hours at the 300- or 400-level.
• Students placed in 201 will take 201 and 202 and 27 semester credit hours at the 300- or 400-level.
• Students placed in 202 will take 202 and 27 semester credit hours at the 300- or 400-level.
• Students placing out of 101, 102, 201 and 202 will take 27 semester credit hours at the 300- or 400-level.

Minor Field of Study
All Modern Language majors must select a minor field of study from departments or divisions within or outside of the College of Liberal Arts or in a particular area of interest (as in the case of interdisciplinary minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. No more than 9 credit hours may be at the 100-299 level. Interdisciplinary minors such as women’s and gender studies, classical studies, religious studies, and business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on ‘Minor Field of Study’ under the general requirements of the College of Liberal Arts. In general, the careful combination of foreign language skills with other major curricula enhances preparation for careers in business, industry and government. Teaching certification is available to majors through the College of Education and Human Development. Consult the College of Education and Human Development section under secondary teacher certification for additional information.

Study Abroad Requirement
All German majors are required to study for one semester or summer in a German-speaking country approved by the department.

Any departmental major must earn a C or better in all major and minor coursework.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. The lists incorporate University Core Curriculum requirements. No course can be counted in more than one category.

Modern Languages - BA, Russian Option
The BA in Modern Languages (MODL) supports and advances students’ international and global competencies. Students can choose to major in French, German, or Russian. Courses are designed to offer students extended study of the languages, literatures, social histories, and cultures of these language communities.

The careful combination of foreign language skills with other curricula enhances preparation for careers in industry, government, academia and the non-profit sectors. Teaching certification is available to majors through the College of Education and Human Development.

In addition to classes at the College Station campus, the department offers summer study abroad programs for credit. Departmental faculty and advising staff also work closely with students to match their interests with semester and full-year programs abroad.

Students will be required to complete, by coursework or placement test, all 100- and 200-level courses in sequence. Once a student has received credit for a higher-level language course, the student is no longer eligible to receive credit for prerequisite courses.

**Minor Field of Study**

All Modern Language majors must select a minor field of study from departments or divisions within or outside of the College of Liberal Arts or in a particular area of interest (as in the case of interdisciplinary minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. No more than 9 credit hours may be at the 100-299 level. Interdisciplinary minors such as women’s and gender studies, classical studies, religious studies, and business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on ‘Minor Field of Study’ under the general requirements of the College of Liberal Arts. In general, the careful combination of foreign language skills with other major curricula enhances preparation for careers in business, industry and government. Teaching certification is available to majors through the College of Education and Human Development. Consult the College of Education and Human Development section under secondary teacher certification for additional information.

Any departmental major must earn a ‘C’ or better in all major and minor coursework.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. The lists incorporate University Core Curriculum requirements. No course can be counted in more than one category.

**Arabic Studies - Minor**

The minor in Arabic Studies is an academic program open to all students in the university. The minor is interdisciplinary in nature and combines courses in Arabic language and culture with electives in Arabic studies, as well as a capstone project. The minor is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add an international dimension to their intellectual profile. In addition, Arabic Studies faculty offer study abroad programs in order to enrich student learning experiences and cultural knowledge while helping students attain higher proficiency in the language.

Students must complete ARAB 101 and ARAB 102 before they may declare a minor in Arabic Studies.

---

### Foreign Language

Students entering Modern Languages - Russian take a placement exam to determine the level of and number of required French courses. Exam results may fulfill a maximum of 14 semester credit hours.

**Students must earn a “C” or better in all minor coursework.**

## Capstone Project

A capstone project that is completed in an approved upper-division Arabic Studies course is required of all students pursuing a minor in Arabic Studies during their final year of the program. It consists of a substantial research paper (15–20 pages) on an original topic and is conducted under the direction of a faculty member with the approval of the departmental advisors. Through the capstone course and project, students get a chance to integrate their classroom knowledge about the Arab world and use their study-abroad experiences and internships in an Arabic-speaking country, if any, to address an issue of interest to them. Issues that students can choose to address could be of linguistic, cultural, historical, religious, or political nature, among others. Upon its completion, and in coordination with the departmental advisors, the final project will be presented orally to Arabic classes in order to maximize its benefits.

## Asian Studies - Minor

The minor in Asian Studies is an academic program open to all students in the university. The minor is interdisciplinary in nature and includes Asian Studies courses in the humanities and the social sciences, as well as a capstone project. The minor is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add an international dimension to their intellectual profile.
Please see the departmental advisors for electives and curricular offerings.

**Chinese - Minor**

The minor in Chinese is an academic program open to all students in the university. The minor is interdisciplinary in nature and combines courses in Chinese language and culture with electives in Chinese studies, as well as a capstone project. The minor is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add an international dimension to their intellectual profile. In addition, Chinese studies faculty offer study abroad programs in order to enrich student learning experiences and cultural knowledge while helping students attain higher proficiency in the language.

Students must earn a 'C' or better in all minor coursework.

**Capstone Project**

The capstone project allows students to integrate knowledge and skills about topics pertaining to Chinese language, culture, history, geography, etc. that they have gained through their coursework, including any study abroad experience in China. Students will consult with the faculty in Chinese and meet regularly with a faculty advisor to complete an independent research project about a topic of their interest pertaining to China.

**Classical Studies - Minor**

The Minor in Classical Studies is an academic program open to all students in the university. The minor is interdisciplinary in nature and combines courses in Greek or Latin language with electives in multiple disciplines. The focus on the history, beliefs, and material culture of ancient Greek and Roman civilization helps students to see how fundamental concepts of Western Civilization first arose in Classical Antiquity, and is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences.

Total Semester Credit Hours 18

\footnote{1} Other elective courses may be chosen in consultation with the departmental advisors.

Students must make a grade of C or better in all minor coursework.

Capstone Project

A capstone project completed in an approved upper-division Japanese course is required of all students pursuing a minor in Japanese during their final year of the program. The capstone project allows students to integrate knowledge and skills about topics pertaining to Japanese language, culture, history, geography, etc. that they gained through their previous classes, study abroad experience in Japan, or personal readings. Students will consult and regularly meet with an advisor to complete a reading/writing assignment about a topic of their interest pertaining to Japan.

Italian - Minor

The Minor in Italian is an academic program open to all students in the university. The minor combines courses in Italian language and culture, and is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add an international dimension to their intellectual profile. In addition, Italian studies faculty offer study abroad programs in order to enrich student learning experiences and cultural knowledge while helping students attain higher proficiency in the language.

Total Semester Credit Hours 18

Students must earn a 'C' or better in all minor coursework.

Proficiency in Arabic - Certificate

The Certificate of Proficiency in Arabic is a certificate for students studying Arabic at Texas A&M who are aspiring to reach an advanced level of proficiency in the language. The Certificate is open to undergraduate students from any college and any major.

In addition to maintaining a minimum passing grade in all required courses, students pursuing the Certificate are required to take the Oral Proficiency Interview (OPI) test. Students must demonstrate a minimum of Advanced Low (AL) on the OPI in order to receive the Certificate of Proficiency in Arabic.

- The Oral Proficiency Interview (OPI) is a language test developed by the American Council for the Teaching of Foreign Languages (ACTFL) and consists of a 30-40-minute interview. It is designed to assess how well a person speaks a language independently, regardless of how, where, why and for how long they have studied it.

In order to be awarded the Certificate of Proficiency in Arabic, students must take the Oral Proficiency Interview (OPI) test and be rated a ranking of at least 'Advanced Low.'

Department of Performance Studies

In the Department of Performance Studies at Texas A&M University, students use performance to understand and change the world. Performance Studies is an inquiry-based humanities field that examines relationships between performance and culture. We study performance on an expanded field. Performance Studies investigates traditional art forms such as music, theatre, and dance as well as a range of cultural expressions such as ritual, festivals, games and sports, parades, storytelling, dress, social arts, and mass media. Performance studies is a research discipline in which performance is at once the object we research, a frame we use to see the world, and a unique set of artistic practices we use to generate new answers to fundamental questions facing humankind.

Our programs provide flexible and interdisciplinary approaches to the study and practice of performance. The Department’s vibrant faculty works on varied performances in a wide range of cultural contexts. We bring our expertise to bear on the study of music and sound, theater, performance art, politics, dance and movement, gender and sexuality, technology, race, and religion.

Students in the Department study art making, theory, and history, and use performance as a method of inquiry. Through performance, students engage creatively with the world around them in an ongoing process of investigation and meaning-making. In the course of their work in the Performance Studies BA, students will develop a perspective on artistic practice that crosses genres; the ability to think independently, work collaboratively, and solve problems creatively; and a commitment to the performing arts as socially engaged practice.

The BA in Performance Studies provides a foundation for careers that combine skills and knowledge gained in the study, practice, and critical analysis of performance. In the 21st century, this describes many paths a Performance Studies graduate may take. In performance studies our goal is to make scholars and artists with a keen sense of how to use performance to advance their goals and solve problems. To this end, we train our students to be creative leaders in whatever field they choose.

A background in Performance Studies provides an unparalleled foundation for those looking to make their way as artists and performers; for those seeking careers in business, public service, law, medicine, advocacy, journalism, and so on; and for those who plan to continue on to graduate study in the humanities.

Minors

- Performance Studies Minor (p. 626)

Performance Studies - BA

The BA in Performance Studies offers an interdisciplinary, liberal arts approach to the study of performance. Our BA provides a foundation in critical reflection, analysis, and creative practice from which students can launch a variety of careers. In their core Performance Studies courses, BA Students are immersed in performance theory, learn the craft of creating live performance, and cultivate essential research and writing skills to be successful citizens, scholars, and artists in the 21st century.

Four Pillars of the BA in Performance Studies

Performance as Research

In Performance Studies, we embrace the fact that live, embodied performance provides a unique way to know and understand the world. We value and champion such repertoires of knowledge alongside the many other ways of knowing represented in institutions of higher education. Students in our BA program use performance as method for conducting research. In every Performance Studies class, students perform: they stage plays and concerts, conduct ethnographic research, make films and podcasts, or present their scholarship to varied audiences. They do this to embrace the fact that a musician, an actor, a dancer, or performer of any stripe knows the world differently by virtue of their performance practice. We train our BA students to translate that knowledge into a format which can be shared widely and effectively.

Intercultural Performance Practices

We live in a globalized world and prepare our students to be global leaders. We privilege performance as a location of intercultural encounter. We bring artists from around the world to campus to work with our students, and we equip our students with the tools they need to be responsible global citizens.

Performance and Technology

We emphasize the intersection of performance and technology. We equip students both to take advantage of technological advances in their creative and professional lives, and to recognize the risks and rewards technology can provide to our communities. Students study the latest developments in digital music-making, virtual reality filmmaking, acoustic surveillance, and so on. Our Performance and Technology pillar prepares students for life in the 21st century.

Performing Communities

We value the use of performance to create and circulate knowledge for and within our communities. Students in our BA program can take classes that study arts administration and work with non-profit organizations, that investigate performance in public institutions as varied as the City Council and the United Nations, and that focus on performance practices in museums, journalism, and so on. We foster the development of informed and responsible citizens who use performance to serve their communities and the wider world.

**Total Semester Credit Hours:** 120

1. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

2. Select from any 100-499 course not used elsewhere, up to 12 hours of courses from MUSC 300-499 (p. 1087), THAR 300-499 (p. 1158), or PERF 300-499 (p. 1105) may be applied.

4. Select from PERF 450, PERF 451, PERF 452, PERF 453, PERF 454, PERF 460, PERF 461.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

## General Degree Requirements:

Minimum 2.0 GPA overall and a minimum 2.0 GPA in major coursework.

A grade of C or higher is required in all coursework within the major.

18 hours of major coursework completed at Texas A&M.

Complete 36 hours of upper division (300-400 level) hours in residence, 12 hours of which must be completed in major coursework.
Complete two PERF courses formally designated as writing or communication intensive. At least one course must be completed with the writing intensive designation.

Performance Studies - Minor

The minor in Performance Studies offers students the opportunity to engage the methods of performance studies and the practice of performance to enhance their other studies. In Performance Studies, we study performance on an expanded field: we investigate traditional art forms such as music, theatre, and dance, as well as a range of cultural expressions including ritual, festivals, games and sports, parades, storytelling, dress, social arts, technology, and mass media. Our courses combine scholarship and creative practice, research and performance. Performance Studies developed through a variety of interdisciplinary encounters: between theatre and anthropology, between music and philosophy, and so on. Minors in Performance Studies take up this same charge in their own courses of study, adding a performance perspective to their other academic inquiries, creative practices, and personal development.

Department of Philosophy and Humanities

The Greek philosopher Socrates once said that the unexamined life is not worth living. For more than 2,000 years, philosophy has been the source of the most intensely reflective, influential and argued versions of that examination. The concerns of philosophy range from the arts, the methods and foundations of the sciences, politics, education, and religion to the complex questions relating to the meaning of reality, truth, values and the significance of human history. The study of philosophy is an essential dimension of a well-educated person.

Philosophy seeks to establish standards of evidence, provide rational methods of resolving conflicts, and create techniques for evaluating ideas and arguments. Philosophy develops the capacity to see the world from the perspectives of other individuals and other cultures; it enhances one's ability to perceive the relationships among the various fields of study; and it deepens one's sense of the meaning and variety of human experience.

Toward these ends the program in philosophy at Texas A&M is structured to provide students with the skills necessary to appreciate more fully the central concerns of human existence and develop abilities in problem-solving, communication, persuasion, writing, and critical thinking.

Students, along with parents and friends, often assume that the only undergraduates who major in philosophy are those who intend to pursue graduate degrees in philosophy, theology and law. The breadth of skills developed, however, makes the study of philosophy appropriate for students entering professional fields such as medicine, business and education, and for those preparing for graduate work in the humanities or the social sciences.

It should be stressed that the non-academic value of a field of study must not be viewed mainly in terms of its contribution to obtaining one's first job after graduation. Students are understandably preoccupied with getting their first job, but even from a narrow vocational point of view it would be short-sighted to concentrate on that at the expense of developing potential for success and advancement once hired. Factors leading to initial employment are not necessarily those that lead to promotions or beyond a first position. This is so because the needs of many employers alter with changes in social and economic patterns. It is therefore crucial to see beyond the specifics of a job description.

As this suggests, there are people trained in philosophy in just about every field. They have gone into not only such professions as teaching, medicine, and law, but also into computer science, management, publishing, sales, government service, criminal justice, public relations, and other fields.

Philosophy - BA

Curiosity matters! Philosophers and those who are philosophically minded have long asked key questions, evaluated possibilities and arrived at those answers that have shaped and reshaped who we are, how we do things, and how we understand the world in which we live. The study of philosophy is not the study of antiquated views. It is not the study and use of a single method. The study of philosophy transforms intellectual curiosity into a potent, flexible set of skills by inculcating the ability to identify unstated assumptions, to take a critical attitude towards the information that others accept, and to evaluate and articulate the reasons that compel us to do and believe things. Philosophy is what college is all about: delving deeply into subjects that matter to you, while cultivating skills that will carry you the rest of your life.

Educational economists, such as G. Duncan, remind us that jobs that pay well are increasingly requiring employees to be able to solve unexpected problems as team members. In a world that is typified by unpredictable and complex professions, professionals who can cross intellectual boundaries and make connections between previously discrete domains of knowledge are primed to resolve unexpected problems; they are primed to succeed. While there is no single path to success, there is a set of skills that can help solve unexpected problems. Creativity researchers have identified two key factors: breadth of learning and an aptitude for broad conceptual thinking. You cannot combine what you don't know and you cannot combine if you have not cultivated an ability to move freely among conceptual categories. Philosophy is among the best intellectual activities for cultivating creative, critical thinking. Indeed, philosophy students typically score among the top in entrance exams for graduate school (GRE), and professional schools for law (LSAT) and business (GMAT) within national rankings.

The Department of Philosophy supports breadth of learning and broad conceptual thinking while offering a degree program with maximum flexibility. At its core are a limited number of requirements including three courses in the history of philosophy. These courses enable students to step outside of their own world-view and learn how to understand and critique unfamiliar perspectives. Students also take a course in formal logic in fulfillment of one of their core math requirements. Formal logic requires that students use one of the highest forms of reasoning in the taxonomy of learning: creative thinking. There is no algorithm for constructing a formal proof. Students who study formal logic learn a system, and use that system to create their own proofs.

In addition to history and logic, students are free to select among a range of courses that allow them to better understand the limits of knowledge, the limits of scientific thinking, the theories behind our legal and political system, the foundations of ethics, and more. In addition to traditional course work, high-achieving students in philosophy can undertake a sustained research project in the form of an honor’s thesis, serve as Editor for our undergraduate journal, or complete internships either within the department or in other professional settings.

Students pursuing the BA in Philosophy have the option of pursuing early admission to Texas A&M’s School of Law. Under this plan, students
can complete both degrees in 6 years rather than 7 by double-counting 18 hours of first-year law classes towards both degrees. Participation requires formal application to and admission by the School of Law during year 3. Admission is fully at the discretion of the School of Law. Careful planning is key, so interested students should work closely with an advisor from their first semester of study.

Total Semester Credit Hours: 120

1. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.
2. Philosophy courses can not be used to meet this requirement.
3. In consultation with an advisor select from PHIL 100-499 (p. 1110). At least four of the courses must be 300-400 level.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department
Students must make a grade of 'C' or better in all courses.

30 credits minimum. A grade of C or higher is required for a course to be counted in the major field.

**Philosophy - Minor**

Curiosity matters! Philosophers and those who are philosophically minded have long asked key questions, evaluated possibilities and arrived at those answers that have shaped and reshaped who we are, how we do things, and how we understand the world in which we live. The study of philosophy is not the study of antiquated views. It is not the study and use of a single method. The study of philosophy transforms intellectual curiosity into a potent, flexible set of skills by inculcating the ability to identify unstated assumptions, to take a critical attitude towards the information that others accept, and to evaluate and articulate the reasons that compel us to do and believe things. Philosophy is what college is all about: delving deeply into subjects that matter to you, while cultivating skills that will carry you the rest of your life.

Educational economists, such as G. Duncan, remind us that jobs that pay well are increasingly requiring employees to be able to solve unexpected problems as team members. In a world that is typified by unpredictable and complex professions, professionals who can cross intellectual boundaries and make connections between previously discrete domains of knowledge are primed to resolve unexpected problems; they are primed to succeed. While there is no single path to success, there is a set of skills that can help solve unexpected problems. Creativity researchers have identified two key factors: breadth of learning and an aptitude for broad conceptual thinking. You cannot combine what you don't know and you cannot combine if you have not cultivated an ability to move freely among conceptual categories. Philosophy is among the best intellectual activities for cultivating creative, critical thinking.

Students may earn a minor in Philosophy by taking 15 credit hours, of which 6 may be earned at the 100-200 level. This allows students maximum flexibility in choosing among our diverse set of courses. Students pursuing the minor are free to sample from the great breadth of philosophical topics (from philosophy of science to philosophy of art) or to dive deep on particular topics of interest (such as ethics, logic and metaphysics, or the history of philosophical thought).

Students must make a grade of 'C' or better in all courses.

**Philosophy Pre-Law - Certificate**

The Department of Philosophy offers a Pre-law Certificate that is primarily guided by the published recommendations of the American Bar Association (A.B.A.). The A.B.A encourages prospective law students to pursue classes that cultivate a set of skills that will enhance the study of law. To this end, Philosophy's Pre-law Certification requires that students take classes that typically cultivate the A.B.A's recommended skill set:

1. Problem Solving involves "courses and other experiences that will engage [students] in critical thinking about important issues, challenge ... beliefs and improve ... tolerance for uncertainty and criticism.”
2. Critical Reading involves "close reading and critical analysis of complex textual material.
3. Writing and Editing involves "preparing original pieces of substantial length and revising written work in response to constructive criticism. [...] Language is the most important tool of a lawyer, and lawyers must learn how to express themselves clearly and concisely."
4. Oral Communication and Listening involves "the ability to speak clearly and persuasively... and excellent listening skills."
5. Research involves "undertaking a project that requires significant library research and the analysis of large amounts of information obtained from that research."

The Certification requires students to take 12 hours of classes, including courses in communication, logic, and political and legal philosophy. Students pursuing the certificate must enroll through an advisor before completing 105 credit hours. As they complete the certificate, students must enroll in 0 credit hours of PHIL 491. The only requirement for this section of PHIL 491 is the submission of a philosophical writing sample, which may be a piece of writing previously submitted for PHIL 332 or PHIL 334.

1 Must earn a grade of C or higher.  
2 Must be taken after or concurrent with the completion of the other credit hours for the certificate. Students must submit a philosophical writing sample, which may be a piece of writing previously submitted for PHIL 332 or PHIL 334.  
3 Students must sign up for the certificate through an advisor before completing 105 credit hours.
Department of Political Science

Political science is a social science that investigates collective decision-making. It is concerned with governments, individuals’ attitudes and choices, and the interactions between governing institutions and mass behavior. Among other things, political science addresses power, authority, influence, identity, ethics, law, liberty, justice, wealth, and violence.

The study of political science introduces students to a powerful set of analytical tools for understanding interactions within and among groups of people. These include systematic knowledge of recurring patterns and problems in political life and methods for collecting and analyzing data and other forms of evidence. Studying political science also cultivates critical thinking and effective communication and prepares students for active citizenship, professional success, and lifelong learning.

Undergraduate Courses

The Department of Political Science offers courses in all facets of the discipline: American Politics, International Relations, Comparative Politics, Political Theory, Political Methodology, Public Administration and Policy, and Race and Ethnic Politics.

American Politics

American politics involves the study of the institutions of national government, law, mass political behavior, elections, political communication and media, interest groups, political parties, state and local governments, urban politics, and identity in politics in the United States.

International Relations

International relations involve the study of relations between the governments of the world. Courses are offered in world politics, American foreign relations, and national security policy.

Comparative Politics

This area of political science allows students to develop an in-depth understanding of foreign governments and politics. Courses are offered in European governments, Latin American governments, Asian governments, Russia and the former Soviet states, and in the politics of inequality and globalization.

Political Theory

The study of political theory provides students with an understanding of the fundamental relationships between governments and people. Courses range from the study of Greek antiquity to contemporary political ideologies.

Public Administration and Policy

This area of political science encompasses the study of public administration and the role of public policy in American politics. Study in this area will provide the student with the opportunity to understand the fundamentals of administration within a political environment. Courses are offered in bureaucracy and administration, state and local finance, urban administration, and government and the economy.

Political Methodology

These courses introduce students to scientific research design, statistical analysis, and game theory.

Race and Ethnic Politics

These courses provide the student with an in-depth understanding of the role of diversity in politics.

5-Year Combined Degree Programs

The Political Science Department offers a combined degree program in conjunction with the Bush School of Government and Public Service. This program enables students to receive either a B.A. or B.S. in political science and a Master of Public Service and Administration (MPSA) degree in five years.

The Political Science Department also offers a joint degree program in conjunction with the University of Essex. This program enables students to receive either a B.A. or B.S. in political science and a Master of Arts or a Master of Science in Political Science in four and a half years.

Honors Program

The Department of Political Science participates actively in the University honors program. Honors courses are available in all areas of political science. In addition, students may graduate with honors distinction in political science. Honor students also are offered individual instruction under POLS 497. Students interested in the Department’s Honors Program should contact the Political Science Undergraduate Programs Office.

Teacher Certification

Students desiring certification to teach civics or government in secondary schools in Texas must meet special additional requirements. More complete information on requirements for teacher certification may be found in the College of Education and Human Development section under secondary certification.

- Bachelor of Arts in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 633)
- Bachelor of Science in Political Science (p. 634)
- Bachelor of Science in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 636)

Political Science - BA

The Bachelor of Arts degree program in Political Science offers a strong liberal arts curriculum aimed at enhancing students’ understanding of foreign and domestic politics, along with essential training in social science research methods, strengthening their critical thinking abilities, and enhancing students’ written, verbal, and visual communications skills. In addition to requiring four semesters of a college level foreign language, the Bachelor of Arts degree plan encompasses a broad spectrum of coursework from throughout the College of Liberal Arts and Texas A&M University. By allowing for flexibility in courses that can be taken within the core curriculum, as well as for general electives, students can achieve a well-rounded education that can help with their future educational and professional goals.

Within their major area of study, students will be able to further their education in American political institutions and political behavior; international relations; comparative politics; political theory; research methodology; public policy and administration; and race and ethnic politics.

Students who graduate with a degree in Political Science have a wide spectrum of career fields to choose from. Many students will pursue careers in government, law, secondary education, higher education, business, non-profits, journalism and more.

beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to public policy and management along with skills in leadership and research methods.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School’s MPSA program. Students will double-count up to 9 hours of Bush School coursework towards the undergraduate major coursework and up to 9 hours towards general electives in the Bachelor of Arts degree in Political Science. At the completion of the program, students are prepared for a wide variety of post-graduate opportunities including: employment in local, state or federal government, non-profit organizations, or government contracting.

Students interested in this program will apply during the spring semester of their junior year and, if admitted, begin taking masters-level courses in the fall semester of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students upon completing 102 credit hours, typically in the third semester of the program. Prior to being reclassified, a student must have completed all requirements for their bachelor’s degree in Political Science.

---

1. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. Select in consultation with an academic advisor.
2. At least 3 hours must be in MATH except MATH 102, MATH 150, MATH 167, STAT 201. Three hours may be PHIL 240.
3. POLS 100-499 (p. 1118) cannot be used to fulfill this requirement.
4. Students must complete this course before taking more than 6 hours of 300- or 400-level courses in Political Science.
5. Select from POLS 100-499 (p. 1118) (except POLS 200, POLS 206, POLS 207, POLS 209, POLS 308, POLS 309).
6. Course counted towards the general electives of the BA program.
7. Course counted towards the Political Science electives of the BA program.
8. BUSH school graduate advisor will assist with BUSH/PSAA course selection for chosen track in the graduate program.

No more than 36 credits in political science may be applied to the degree. A grade of C or better is required for a course to be counted in the major field.

Other courses may qualify for the college and university requirements. Student should consult the approved list of courses in the Undergraduate Student Services Office in the College of Liberal Arts. No course can be counted in more than one category.

Students are reclassified as degree seeking master’s students typically in the second year of the graduate portion of this program.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Arts in Political Science and the Master of Public Service Administration.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

---

### Political Science - BS

The Bachelor of Science degree program in Political Science offers a strong liberal arts curriculum aimed at enhancing students’ understanding of foreign and domestic politics, along with essential training in social science research methods, strengthening their critical thinking abilities, and enhancing students’ written, verbal, and visual communications skills. In addition to building skills in social science research and data analysis, the Bachelor of Science degree plan encompasses a broad spectrum of coursework from throughout the College of Liberal Arts and Texas A&M University. By allowing for flexibility in courses that can be taken within the core curriculum, as well
as for general electives, students can achieve a well-rounded education that can help with their future educational and professional goals.

Within their major area of study, students will be able to further their education in American political institutions and political behavior; international relations; comparative politics; political theory; research methodology; public policy and administration; and race and ethnic politics. Students in the Bachelor of Science degree program will also be required to take a semester of game theoretic methods and a semester of polimetrics.

Students who graduate with a degree in Political Science have a wide spectrum of career fields to choose from. Many students will pursue careers in government, law, secondary education, higher education, business, non-profits, journalism and more.

* Total Semester Credit Hours: 120

1. Select from any University Core Mathematics course except MATH 150, MATH 167, STAT 201.
2. POLS 100-499 (p. 1118) cannot fulfill this requirement.
3. Students must complete this course before taking more than 6 hours of 300- or 400-level courses in Political Science.
4. Select from POLS 100-499 (p. 1118) (except POLS 200, POLS 206, POLS 207, POLS 209, POLS 308, POLS 309).

A grade of C or better is required for a course to be counted in the major field.

Other courses may qualify for the college and university requirements. Student should consult with academic advisor for additional options.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.
Political Science - 5-Year Bachelor of Science/Master of Public Service Administration

The combined degree program between the Department of Political Science and The Bush School of Government and Public Service allows undergraduate Political Science students to enter the Master of Public Service Program, with a focus in Public Policy Analysis, at the beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to public policy and management along with skills in leadership and research methods.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School's MPSA program. Students will double-count up to 9 hours of Bush School coursework towards the undergraduate major coursework and up to 9 hours towards general electives in the Bachelor of Arts degree in Political Science. At the completion of the program, students are prepared for a wide variety of post-graduate opportunities including: employment in local, state or federal government, non-profit organizations, or government contracting.

Students interested in this program will apply during the spring semester of their junior year and, if admitted, begin taking masters-level courses in the fall semester of their senior year with an undergraduate classification. Students are reclassified as degree seeking master's students upon completing 102 credit hours, typically in the third semester of their junior year and, if admitted, begin taking masters-level coursework in the fall semester of their senior year. Prior to being reclassified, a student must have completed all requirements for their bachelor's degree in Political Science.

| Semester Credit Hours | 12 |
The curriculum leading to a degree in psychology provides students with an understanding of human behavior and the ability to use scientific methods to answer questions about human behavior. Students are prepared to enter a variety of graduate and professional programs in psychology and related fields (such as law, medical school), as well as to enter entry-level employment in a number of fields (such as business, human resources).

BA/BS Degrees: Students majoring in psychology may earn either the Bachelor of Arts or Bachelor of Science degree. The psychology course requirements for the two degrees are identical; they differ with respect to the requirements in other disciplines. For example, the BA degree requires courses in a foreign language and extra humanities hours, whereas the BS degree requires additional hours in the physical and biological sciences. The two degrees are offered to allow students to complete their non-psychology course of study in fields of greatest interest to them. Thus, students who have stronger interests in the natural and life sciences should pursue the BS degree, whereas those with stronger interests in foreign language and the humanities should pursue the BA degree.

Both degrees provide students with the necessary curriculum requirements to pursue graduate study in psychology in most institutions, as well as other professional fields such as law. Students planning to apply to medical school or other physical health professional programs are advised to select the BS degree program.

Honors: Students who qualify for the University Honors Program should contact the Department of Psychological and Brain Sciences about the department’s own honors program which places an emphasis on small classes and independent research experience.

Minors: A non-psychology minor is optional for psychology majors. If chosen, a minor must consist of 15–18 credit hours, no more than 9 of which may be lower division and must be declared before the student completes 90 credit hours. No more than 6 hours from the minor may be used to fulfill other Core requirements. A grade of C or higher is required if a course is to be counted in the major or minor field. A psychology minor is available for non-psychology majors (see below). For more information about Psychology undergraduate programs, please visit the Department of Psychological and Brain Sciences website.

### Faculty

Alexander-Packard, Gerianne, Professor
Psychological & Brain Sciences
PHD, McGill University, 1991

Anderson, Brian A, Associate Professor
Psychological & Brain Sciences
PHD, John Hopkins University, 2014

Arthur Jr, Winfred E, Professor
Psychological & Brain Sciences
PHD, The University of Akron, 1988

Atoba, Olabisi, Instructional Assistant Professor
Psychological & Brain Sciences
PHD, Texas A&M University, 2017

Bergman, Mindy E, Professor
Psychological & Brain Sciences
PHD, University of Illinois at Urbana-Champaign, 2001
Bernard, Jessica A, Assistant Professor  
Psychological & Brain Sciences  
PHD, University of Michigan, 2012

Bolanos, Carlos A, Associate Professor  
Psychological & Brain Sciences  
PHD, Northeastern University, 2000

Bolger Jr, Patrick A, Instructional Assistant Professor  
Psychological & Brain Sciences  
PHD, University of Arizona, 2005

Brooker, Rebecca J, Associate Professor  
Psychological & Brain Sciences  
PHD, Pennsylvania State University, 2011

Burte, Heather, Research Assistant Professor  
Psychological & Brain Sciences  
PHD, University of California-Santa Barbara, 2014

Carter Sowell, Adrienne R, Associate Professor  
Psychological & Brain Sciences  
PHD, Purdue University, 2010

Dawson Mathur, Vani A, Assistant Professor  
Psychological & Brain Sciences  
PHD, Northwestern University, 2012

Edens, John F, Professor  
Psychological & Brain Sciences  
PHD, Texas A&M University, 1996

Edens, Pamela S, Senior Lecturer  
Psychological & Brain Sciences  
PHD, Texas A&M University, 1997

Eitan, Shoshana, Associate Professor  
Psychological & Brain Sciences  
PHD, Weizmann Institute of Science, 1997

Fields, Sherecce A, Associate Professor  
Psychological & Brain Sciences  
PHD, University of South Florida, 2008

Grau, James W, Professor  
Psychological & Brain Sciences  
PHD, University of Pennsylvania, 1985

Heffer Jr, Robert W, Clinical Professor  
Psychological & Brain Sciences  
PHD, Louisiana State University and A&M College, 1988

Hicks, Joshua A, Professor  
Psychological & Brain Sciences  
PHD, University of Missouri - Columbia, 2009

Hull, Rachel G, Lecturer  
Psychological & Brain Sciences  
PHD, Texas A&M University, 2003

Jackson, Cheryl, Lecturer  
Psychological & Brain Sciences  
PHD, Kansas State University, 2007

Lench, Heather C, Professor  
Psychological & Brain Sciences  
PHD, University of California Irvine, 2007

Leunes, Arnold D, Senior Professor  
Psychological & Brain Sciences  
PHD, North Texas State College, 1969

MacNamara, Annmarie E, Assistant Professor  
Psychological & Brain Sciences  
PHD, Stony Brook University, 2013

Magyar, Melissa, Lecturer  
Psychological & Brain Sciences  
PHD, Texas A&M University, 2014

Maren, Stephen A, University Distinguished Professor  
Psychological & Brain Sciences  
PHD, University of Southern California, 1993

Meagher, Mary W, Professor  
Psychological & Brain Sciences  
PHD, University of North Carolina at Chapel Hill, 1989

Miner, Kathi N, Associate Professor  
Psychological & Brain Sciences  
PHD, University of Michigan, 2004

Mochinushi, Yumiko, Instructional Assistant Professor  
Psychological & Brain Sciences  
MS, Florida Institute of Technology, 2014

Morey, Leslie C, Professor  
Psychological & Brain Sciences  
PHD, University of Florida, 1981

Moscarello, Justin M, Assistant Professor  
Psychological & Brain Sciences  
PHD, University of California, Santa Barbara, 2010

Nagaya, Naomi, Research Assistant Professor  
Psychological & Brain Sciences  
PHD, University of Southern California, 1993

Orr, Joseph M, Assistant Professor  
Psychological & Brain Sciences  
PHD, University of Michigan, 2011

Osborne, Laura, Lecturer  
Psychological & Brain Sciences  
MS, Texas A&M University, 2015

Packard, Mark G, Professor  
Psychological & Brain Sciences  
PHD, McGill University, 1991

Payne, Stephanie C, Professor  
Psychological & Brain Sciences  
PHD, George Mason University, 2000

Rholes, William S, Professor  
Psychological & Brain Sciences  
PHD, Princeton University, 1978
Sabat, Isaac E, Assistant Professor
Psychological & Brain Sciences
PHD, George Mason University, 2016

Schlegel, Rebecca J, Professor
Psychological & Brain Sciences
PHD, University of Missouri - Columbia, 2009

Schmeichel, Brandon J, Professor
Psychological & Brain Sciences
PHD, Florida State University, 2005

Schumacher, Jay S, Lecturer
Psychological & Brain Sciences
PHD, Texas A&M University, 1999

Smallman, Rachel E, Associate Professor
Psychological & Brain Sciences
PHD, University of Illinois-Urbana Champaign, 2010

Smith, Rachel J, Assistant Professor
Psychological & Brain Sciences
PHD, University of Pennsylvania, 2008

Smith, Steven M, Professor
Psychological & Brain Sciences
PHD, University of Wisconsin - Madison, 1979

Snyder, Douglas K, Professor
Psychological & Brain Sciences
PHD, University of North Carolina at Chapel Hill, 1978

Thurston, Idia, Associate Professor
Psychological & Brain Sciences
PHD, University of South Florida, 2010

Vaid, Jyotsna, Professor
Psychological & Brain Sciences
PHD, McGill University, 1982

Vess, Matthew K, Associate Professor
Psychological & Brain Sciences
PHD, University of Missouri, 2010

Wellman, Paul J, Professor
Psychological & Brain Sciences
PHD, Iowa State University, 1980

Worthy, Darrell A, Associate Professor
Psychological & Brain Sciences
PHD, University of Texas, 2010

Yamauchi, Takashi, Associate Professor
Psychological & Brain Sciences
PHD, Columbia University, 1997

Minors

- Psychology Minor (p. 644)

Certificates

- Applied Behavioral Health Certificate (p. 644)
- Healthy Development Certificate (p. 644)
- Psychology of Diversity Certificate (p. 645)
- Work and Organizations Certificate (p. 645)

Neuroscience - BS, Behavioral and Cognitive Neuroscience Tracks

Neuroscience is the study of the nervous system and its impact on behavior and cognitive functions. This interdisciplinary field integrates several disciplines, including psychology, psychiatry, biology, chemistry, and physics. Because the study is interdisciplinary, the Neuroscience major involves multiple units, including the Department of Psychological & Brain Sciences, the Department of Biology, and the College of Veterinary Medicine and Biomedical Sciences in collaboration with the Department of Neuroscience and Experimental Therapeutics (NExT) in the College of Medicine in offering this degree, as well as the Texas A&M Institute for Neuroscience (TAMIN). The concentration of this degree that focuses on Behavioral and Cognitive Neuroscience is housed within the Department of Psychological & Brain Sciences.

Students will develop competency in foundational coursework in the life and physical sciences, including biology, chemistry, and physics. Based on their individual career aspirations and interests, students will complete coursework in neuroscience that involves psychological and biological processes, as well as translational issues relevant to medical science and/or pharmacology, neural engineering, and biochemistry. Nationwide, there is increasing interest in neuroscience programs and training. In part, this interest is driven by changes in the employment market that focus on technical and medical support jobs. Students completing a BS in Neuroscience will be well prepared for graduate study, as well as to enter entry-level healthcare and technical occupations.

1. Must make a grade of C or better.
2. A minor field of study may fulfill this requirement, but a minor is not required. Only one KINE 199 allowed.
4. Select from BICH 410; BIOL 213, BIOL 413; CHEM 227, CHEM 237, CHEM 228, CHEM 238, NRSC 300-499 (p. 1093); PSYC 471, PSYC 475, PSYC 484, PSYC 485, PSYC 491.

**Psychology - BA**

All psychology majors receive a rigorous program of undergraduate education and training that encourages critical thinking, lifelong learning, and the analysis and integration of information about individuals and groups of people. The curriculum leading to a degree in psychology provides students with an understanding of human behavior and the ability to use scientific methods to answer questions about human behavior.

Students majoring in psychology may earn either the Bachelor of Arts or Bachelor of Science degree. The psychology course requirements for the two degrees are identical; they differ with respect to the requirements in other disciplines. For example, the BA degree requires courses in a foreign language and extra humanities hours, whereas the BS degree requires additional hours in the physical and biological sciences.

Students interested in studying human behavior, with a humanities-oriented supporting curriculum, pursue a Bachelor of Arts degree. The BA can successfully prepare students interested in graduate and professional programs that stress a humanities background (e.g., counseling, social work, management, law), as well as students interested in employment in business or applied psychology.

Students interested in studying human behavior, requires additional hours in the physical and biological sciences. Foreign language and extra humanities hours, whereas the BS degree in other disciplines. For example, the BA degree requires courses in a field. A student must complete a minimum of 36 hours of 300- and 400-level courses at Texas A&M.

A grade of C or higher is required if a course is to be counted in the major field. A student must complete a minimum of 36 hours of 300- and 400-level courses at Texas A&M.

No course can be counted in more than one category.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

**Psychology - BS**

All psychology majors receive a rigorous program of undergraduate education and training that encourages critical thinking, lifelong learning, and the analysis and integration of information about individuals and groups of people. The curriculum leading to a degree in psychology provides students with an understanding of human behavior and the ability to use scientific methods to answer questions about human behavior.

Students majoring in psychology may earn either the Bachelor of Arts or Bachelor of Science degree. The psychology course requirements for the two degrees are identical; they differ with respect to the requirements in other disciplines. For example, the BA degree requires courses in a foreign language and extra humanities hours, whereas the BS degree requires additional hours in the physical and biological sciences.

Students interested in studying human behavior, with a science-oriented supporting curriculum, pursue a Bachelor of Science degree. The BS can successfully prepare students interested in further study in a science-oriented psychology graduate program (such as neuroscience) or medical school, or other health-related graduate and professional programs (e.g., pharmacy, physical therapy), as well as students interested in entry-level positions in business or applied psychology.

**Total Semester Credit Hours: 120**
Psychology - Minor

A minor in Psychology can be a valuable supplement to education in almost any field. Students select from a variety of courses that enhance understanding of animal or human behavior, the skills to intervene to change behavior and to create environments that support healthy behavior, and critical thinking skills related to asking and answering questions about human behavior. This knowledge prepares students to pursue a variety of careers where interacting with people is a central job component.

A Psychology minor is available for non-psychology majors. The minor must be declared before the student has completed 90 credit hours.

</tbody>
</table>

1 Only 3 total hours from PSYC 484, PSYC 485 and PSYC 491 can count toward the minor.
2 Registration in PSYC 301 and PSYC 302 is limited to PSYC majors only.

At least 9 semester credit hours of PYSC courses above the 200-level must be taken at Texas A&M.

Students must make a grade of 'C' or better in all courses.

Applied Behavioral Health - Certificate

The Department of Psychological and Brain Sciences offers embedded certificates as part of the major. The certificates are considered embedded because they require no additional coursework—beyond specific courses in the major itself—to earn the certificate. All certificates require 15 credits (5 courses). The certificates are designed to (a) bring greater depth and structure to the major, (b) provide students with guidance as to courses that build on each other, and (c) ultimately increase the employability of our students.

The required courses in this certificate reflect foundational component areas of psychology that focus on (a) human growth and development, both physically and psychologically and (b) positive and negative mental health, with an emphasis on mental health and developmental disorders. The prescribed electives include courses that focus on a variety of aspects of health and well-being and five of the six courses include practical applications of psychology, including the deployment and interpretation of psychological tests, therapeutic techniques, creation and monitoring of plans for personal growth and change, and the creation and application of reward systems.

Total Semester Credit Hours 15

Students must earn an average grade of ‘B’ or better across certificate courses.

Healthy Development - Certificate

The Department of Psychological and Brain Sciences offers embedded certificates as part of the major. The certificates are considered embedded because they require no additional coursework—beyond specific courses in the major itself—to earn the certificate. All certificates require 15 credits (5 courses). The certificates are designed to (a) bring greater depth and structure to the major, (b) provide students with guidance as to courses that build on each other, and (c) ultimately increase the employability of our students.

The required courses in this certificate reflect foundational component areas of psychology that focus on (a) human growth and development, both physically and psychologically and (b) interpersonal behaviors and intrapersonal processes that affect our understanding of and relationships with others. The prescribed electives fall into two sets. The first set focuses on healthy and atypical development at different life stages, including adolescence, old age, and childhood. The second is a skills-based set of courses through which successful students will develop skills in healthy adjustment, behavioral modification, or therapeutic techniques.

The certificates are designed to (a) bring greater depth and structure to the major, (b) provide students with guidance as to courses that build on each other, and (c) ultimately increase the employability of our students.

The required courses in this certificate reflect foundational component areas of psychology that focus on (a) interpersonal behaviors and intrapersonal processes that affect our understanding of and relationships with others and (b) human cognitive processes that people use to understand information and categorize people and objects. The prescribed electives include courses that focus on a variety of aspects of diversity. These courses focus on the experiences of understudied and/or underrepresented persons and the psychological processes associated with their interpersonal treatment from others.

### Department of Sociology

The Department of Sociology supports a diverse community of faculty, staff and students working together to research and address real world social issues and problems. Faculty offer courses in race and ethnicity, social class, gender, popular culture, social psychology, organizations, community, environment, criminology, religion, global sociology, medical sociology, demography, and gerontology, among others. Some courses include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. To further complement our courses in these and other areas of sociology, students have opportunities to work one-on-one with professors engaged in sociological research. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses.

Sociological training prepares students for graduate school and/or employment in a variety of occupations. Employers increasingly look for job candidates to have the critical thinking, writing, and research skills students will develop in our program. Sociology coursework provides students with the ability to live and work effectively in a diverse and global society by better understanding social diversity, cultural trends, inequalities, organizational behavior, and community and world events. Sociology provides an excellent background for students wishing to enter into the helping professions like social services, ministry, nursing, teaching, and law enforcement, and it provides an outstanding foundation.
for law, marketing, human resources, journalism, government, business management, and entrepreneurialism.

**Majors**
- Bachelor of Arts in Sociology (p. 647)  
- Bachelor of Arts in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 649)  
- Bachelor of Science in Sociology (p. 650)  
- Bachelor of Science in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 652)

**Minors**
- Sociology Minor (p. 654)

**Sociology - BA**
A Bachelor of Arts in Sociology provides a solid foundation in the knowledge and skills needed to address real-world social issues and problems, while allowing students to explore a wide range of social topics and issues. Some courses include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses. To further complement our courses, students accepted into our honors program have opportunities to work one-on-one with professors engaged in sociological research.

The BA provides an excellent background for students aspiring to attend graduate school or enter a career in nonprofit community services or social work, health care and nursing, law or law enforcement, education, public policy, organizational management and entrepreneurialism, marketing, human resources, and/or journalism.

** Marketable Skills Achieved with a BA in Sociology include:**
- Being aware of other’s beliefs and behaviors and understanding why they believe and behave as they do
- The ability to address real-world problems and issues by developing realistic and equitable solutions
- Identifying complex problems and ideas and reviewing related information to analyze, develop and evaluate options, and implement solutions
- Communicating effectively in writing and speech as appropriate for the needs of the audience
- Developing and utilizing visual aids, graphs, tables and charts
- Giving full attention to what other people are saying, taking time to understand the points being made, asking questions as appropriate, and not interrupting at inappropriate times
- Monitoring/Assessing performance of yourself, other individuals, or organizations to make improvements or take corrective action
- Managing one's own time and the time of others
- Data analysis and interpretation
- Identifying the underlying patterns and principles of qualitative and quantitative information and explaining what that information means and how it can be used
- Bringing others together and trying to reconcile differences
- Establishing trust and ensuring input from all members of a group
- Working together to produce a shared product

Minor Field of Study
Sociology majors are not required to select a minor field of study. If chosen, the minor must consist of 15-18 hours, with no more than 9 hours taken at a 100- or 200-level. No more than six hours from the minor may be used to fulfill other requirements. A grade of C or higher is required if a course is to be counted in the minor field.

Teacher Certification
Non-Sociology Majors To Teach Sociology
Students desiring certification to teach sociology in Texas secondary schools must complete a social studies composite with a sociology emphasis and required education courses:

MPSA graduates leave the Bush School ready to make a difference, organizations, and the School’s Public Service Leadership Program. With high-level public leaders, real-world consulting projects, student skills both inside and outside the classroom through interaction ample opportunities to engage in public service and to develop leadership, policy analysis, and research methods.

The MPSA program is fully accredited by the Network of Schools of Public Policy, Affairs, and Administration. The curriculum provides effective and ethically in a time when public servants face new and students the tools and knowledge they will need in order to perform develop principled leaders for the public and nonprofit sectors, providing.

The Master of Public Service and Administration (MPSA) program effectively and ethically in a time when public servants face new and students the tools and knowledge they will need in order to perform.

To be considered for the 5-year combined degree program, Sociology students must have a minimum 3.25 GPA and have completed 102 of the 120 hours of course work required to receive a bachelor's degree. These courses must include all of the specific prerequisites for a Bachelor of Arts degree in Sociology, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree. Interested students are encouraged to contact an academic advisor for more information.

A Bachelor of Arts in Sociology provides a solid foundation in the knowledge and skills needed to address real-world social issues and problems, while allowing students to explore a wide range of social topics and issues. Some courses include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses. To further complement our courses, students accepted into our honors program have opportunities to work one-on-one with professors engaged in sociological research.

The Master of Public Service and Administration (MPSA) program develops principled leaders for the public and nonprofit sectors, providing students the tools and knowledge they will need in order to perform effectively and ethically in a time when public servants face new and increased challenges.

The MPSA program is fully accredited by the Network of Schools of Public Policy, Affairs, and Administration. The curriculum provides students with general knowledge and analytical skills in management, leadership, policy analysis, and research methods. MPSA students have ample opportunities to engage in public service and to develop leadership skills both inside and outside the classroom through interaction with high-level public leaders, real-world consulting projects, student organizations, and the School's Public Service Leadership Program. MPSA graduates leave the Bush School ready to make a difference,

whether they choose to work in government, non-profit organizations, or the private sector.

## Program Requirements

### Sociology - 5-Year Bachelor of Arts/Master of Public Service Administration

The Department of Sociology and the Bush School of Government and Public Service offer a 5-year (3+2) combined degree program that allows Sociology majors to enter the Bush School at the start of their senior year (typically year four) at Texas A&M University. This enables students to receive their Sociology undergraduate degree (BA) and a Master of Public Service and Administration (MPSA) graduate degree in five years.

To be considered for the 5-year combined degree program, Sociology students must have a minimum 3.25 GPA and have completed 102 of the 120 hours of course work required to receive a bachelor's degree. These courses must include all of the specific prerequisites for a Bachelor of Arts degree in Sociology, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree. Interested students are encouraged to contact an academic advisor for more information.

A Bachelor of Arts in Sociology provides a solid foundation in the knowledge and skills needed to address real-world social issues and problems, while allowing students to explore a wide range of social topics and issues. Some courses include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses. To further complement our courses, students accepted into our honors program have opportunities to work one-on-one with professors engaged in sociological research.

The Master of Public Service and Administration (MPSA) program develops principled leaders for the public and nonprofit sectors, providing students the tools and knowledge they will need in order to perform effectively and ethically in a time when public servants face new and increased challenges.

The MPSA program is fully accredited by the Network of Schools of Public Policy, Affairs, and Administration. The curriculum provides students with general knowledge and analytical skills in management, leadership, policy analysis, and research methods. MPSA students have ample opportunities to engage in public service and to develop leadership skills both inside and outside the classroom through interaction with high-level public leaders, real-world consulting projects, student organizations, and the School's Public Service Leadership Program. MPSA graduates leave the Bush School ready to make a difference,

whether they choose to work in government, non-profit organizations, or the private sector.

Total Semester Credit Hours 150

1 A grade of C or better is required.
2 Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.
3 Select from SOCI 100-499 (p. 1142), SOCI 608.
4 Any 100-499 level course may be taken. No more than 3 hours of SOCI 484 may be used toward fulfilling this requirement.
5 SOCI courses do not count toward fulfilling this requirement.

Course applies toward both degrees.
7 See Bush School advisor for course selection information.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

No more than 33 hours in sociology may be applied to the major.

Other courses may qualify. Consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or from departmental advisors. No more than one course may be counted in more than one category.

Please note that university requirements specify that all students must take at least two courses in their major that are designated as fulfilling a writing requirement (W). See the section on general requirements for baccalaureate degrees for more information.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Arts in Sociology and the Master of Public Service Administration.

See the MPSA program in the Graduate and Professional Catalog for the MPSA requirements.

Minor Field of Study

Sociology majors are not required to select a minor field of study. If chosen, the minor must consist of 15-18 hours, with no more than 9 hours taken at a 100- or 200-level. No more than six hours from the minor may be used to fulfill other requirements. A grade of C or higher is required if a course is to be counted in the minor field.

Sociology - BS

A Bachelor of Science in Sociology provides a solid foundation in the knowledge and skills needed to address real-world social issues and problems, while allowing students to explore a wide range of social topics and issues. Some courses include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses. To further complement our courses, students accepted into our honors program have opportunities to work one-on-one with professors engaged in sociological research.

The BS provides an excellent background for students aspiring to attend graduate school or enter a career in nonprofit community services or social work, health care and nursing, law or law enforcement, education, public policy, organizational management and entrepreneurialism, marketing, human resources, and/or journalism.

Marketable Skills Achieved with a BS in Sociology include:

- Being aware of other's beliefs and behaviors and understanding why they believe and behave as they do
• The ability to address real-world problems and issues by developing realistic and equitable solutions
• Identifying complex problems and ideas and reviewing related information to analyze, develop and evaluate options, and implement solutions
• Communicating effectively in writing and speech as appropriate for the needs of the audience
• Developing and utilizing visual aids, graphs, tables and charts
• Giving full attention to what other people are saying, taking time to understand the points being made, asking questions as appropriate, and not interrupting at inappropriate times
• Monitoring/Assessing performance of yourself, other individuals, or organizations to make improvements or take corrective action
• Managing one's own time and the time of others
• Data analysis and interpretation
• Identifying the underlying patterns and principles of qualitative and quantitative information and explaining what that information means and how it can be used
• Bringing others together and trying to reconcile differences
• Establishing trust and ensuring input from all members of a group
• Working together to produce a shared product

</tr>
<tr>
<td>History (p. 1014)</td>
<td></td>
<td>18</td>
</tr>
</tbody>
</table>

Total Semester Credit Hours 76

Sociology Majors To Teach Sociology
Sociology majors desiring certification must include the following among their sociology courses and required education courses:

1 A grade of C or better is required.
2 Select from SOCI 100-499 (p. 1142), SOCI 608.
Sociology - Minor

A minor in Sociology can be a valuable complement to a degree in almost any field of study. Students select from a variety of courses to enhance the ability to live and work effectively in a diverse and global society by better understanding social diversity, cultural trends, inequalities, organizational behavior, and community and world events.

A Sociology minor will provide graduates with skills in applying knowledge to address real world problems through the development of realistic and equitable solutions, thinking critically about complex problems and ideas, engaging in communication processes with diverse audiences, practicing responsibility for one’s own and others’ performance to improve processes and make improvements, analyzing data to identify patterns and explain the meaning and application of data, and collaborating with others.

Sociology provides an excellent background for students wishing to enter into helping professions like social services, ministry, nursing, teaching, and law enforcement; it also provides an outstanding foundation for law, marketing, human resources, journalism, government, business management, and entrepreneurship.

Program Requirements

More complete information on requests for teacher certification may be found in the College of Education and Human Development section under secondary certification.

Education Courses

More complete information on requests for teacher certification may be found in the College of Education and Human Development section under secondary certification.

Students must make a grade of C or better in all courses. At least 9 hours must be at the 300- or 400-level.

University Studies Programs

The College of Liberal Arts offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration and two minors of 15-18 hours each. At least one minor must be outside the college. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Some University Studies degree tracks have both a B.S. and a B.A. option. The B.S. degree differs from the B.A. in being more focused on problem solving and analysis of data in examining major social and cultural issues. The B.S. degree therefore requires more courses in science and encourages statistics and mathematics, as opposed to the foreign language requirement of the B.A. version of the degree.

A student enrolled in the University Studies concentration of Race, Gender, Ethnicity may not pursue a double major or a double degree.

No student in any Liberal Arts University Studies concentration may pursue a double major or a double degree.

Majors

- Bachelor of Arts in University Studies, Journalism Studies Concentration (p. 565)
- Bachelor of Arts in University Studies, Race, Gender, Ethnicity Concentration (p. 565)
- Bachelor of Arts in University Studies, Religious Thought, Practices and Cultures Concentration (p. 656)
- Bachelor of Arts in University Studies, Society, Ethics and Law Concentration (p. 657)
- Bachelor of Science in University Studies, Health Humanities Concentration (p. 659)
- Bachelor of Science in University Studies, Liberal Arts Concentration (p. 660)
- Bachelor of Science in University Studies, Race, Gender, Ethnicity Concentration (p. 661)
University Studies - BA, Race, Gender, Ethnicity Concentration

This area of concentration is purposefully designed to require that students complete an individualized body of coursework that educates them in interdisciplinary knowledge. Four inquiry-rich, research-based courses; an introduction to each discipline; and a capstone senior seminar provides students with introductory and concluding courses in the methodologies appropriate to interdisciplinary studies in the Race, Gender, Ethnicity Concentration. Other courses in the core are drawn from areas such as Africana Studies, Latino/a and Mexican-American Studies, and Women’s and Gender Studies.

In the addition to a core of courses focused on race and ethnicity and gender, each student must complete two minors for the degree. It is expected that at least one minor will be from outside the College of Liberal Arts.

A student enrolled in the University Studies concentration of Race, Gender, Ethnicity may not pursue a double major or a double degree.

1 Students must complete Intermediate level foreign language coursework to complete degree requirements, however students will be required to complete or successfully place out of beginning level language courses prior to intermediate course enrollment. Students can apply the first eight hours (beginning 1 and 2) of foreign language courses as eight hours of general electives in their degree program.

Students must complete 48 hours of general electives of which 30-36 hours should be used to satisfy the requirements for two university approved minors. Minors will range between 15 and 18 hours. One minor must be chosen from outside of the College of Liberal Arts. Consult with advisor regarding how to declare desired minor.

Select from AFST 201, AFST 302, AFST 481; ANTH 205, ANTH 301; CLAS 330; COMM 425/AFST 425, COMM 431; ENGL 204/AFST 204, ENGL 329/AFST 329, ENGL 333/WGST 333, ENGL 338, ENGL 339/AFST 339, ENGL 362/HISP 362, ENGL 374/WGST 374, ENGL 393/AFST 393, ENGL 403, ENGL 474/WGST 474; FILM 394; HIST 258, HIST 300/AFST 300, HIST 301/AFST 301, HIST 304, HIST 305, HIST 307, HIST 319, HIST 330, HIST 345/AFST 345; HIST 346/AFST 346, HIST 401, HIST 461/WGST 461, HIST 473/WGST 473, HIST 476/WGST 476, HIST 477/WGST 477; PERF 326; PHIL 252/AFST 252, PHIL 283, PHIL 352/AFST 352, PHIL 353/AFST 353, PHIL 409/WGST 409, PHIL 464/RELS 464; SPAN 412; WGST 330, WGST 394.

100-499 courses not used elsewhere.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

University Studies - BA, Religious Thought, Practices and Cultures Concentration

The University Studies concentration in Religious Thought, Practices, and Culture gives students a knowledge base for analyzing how religious beliefs and practices work in a global context. Students develop the mental flexibility to see the world from multiple points of view and also learn to recognize how religion shapes social organizations, political actions, and individual behavior. The study of religion requires critical distance, analytical skills, and the mental flexibility to see the world from multiple points of view.

The concentration in Religious Thought, Culture, and Practices sits at the intersection of multiple disciplines. Any minor, in or outside the College of Liberal Arts, is thus likely to contribute to a concentration in religion. For example: a minor in biology offers a research path into the neuroscience of religious experience; a minor in psychology contributes a secular view of how religious belief affects people's behavior; a minor in anthropology shows the ways religion shapes cultural identity; a minor in history applies methods for analyzing how religious traditions evolve and change; a minor in mathematics could allow students to model changes in the global distribution of religious traditions; a minor in political science provides methods for analyzing the interplay between religion and politics.

A University Studies concentration is the ideal curricular model for allowing students to focus on the complexities of religious thought and practice in the modern world while supporting that focus with minors than enhance their knowledge base and lead toward careers.

No student enrolled in the University Studies concentration in Religious Thought, Practices and Cultures may pursue a double major or a double degree.

1. Complete 14 hours of a foreign language (p. 532) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

3. Students must complete 34 hours of general electives of which 30-34 hours should be used to satisfy the requirements for two university approved minors. Minors will range between 15 and 18 hours. It is recommended one minor only require 15 hours or a minor which utilizes courses within the university core curriculum. One minor must be chosen from outside of the College of Liberal Arts. Consult with advisor regarding how to declare desired minor.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

### University Studies - BA, Society, Ethics and Law Concentration

Society, Ethics, and Law (S.E.A.L.) is a university degree that has been designed for students who are interested in pursuing law school, or developing a highly transferable skill set that is useful to non-profits and businesses alike. To this end, S.E.A.L.’s curriculum is primarily guided by the published recommendations of the American Bar Association (A.B.A.). While the A.B.A. does not recommend nor require any particular major, it does encourage prospective law students to i) pursue opportunities (courses and experiences) that cultivate a specific set of skills; ii) obtain experiences that "can help [them] hit the ground running when [they] become a lawyer; and iii) develop "a broad understanding of history, including the various factors (social, political, economic, and cultural) that have influenced the development of our society in the United State."¹

The requirements for this University Studies degree reflect the A.B.A.’s recommendation. Under the broad themes of Society, Ethics and Law, the degree requires classes that contribute to a broad understanding of philosophy, politics, economics and history. Specifically, S.E.A.L. requires that students complete 24 hours of major requirements, a minor in Philosophy, and a second minor outside of the Liberal Arts. In addition to obtaining a broad understanding of society, ethics and law, the degree requires that students pursue experiences and opportunities that typically cultivate the A.B.A.’s recommended skill set:

1. **Problem Solving** involves "courses and other experiences that will engage [students] in critical thinking about important issues, challenge ... beliefs and improve ... tolerance for uncertainty and criticism."¹
2. **Critical Reading** involves "close reading and critical analysis of complex textual material."¹
3. **Writing and Editing** involves "preparing original pieces of substantial length and revising written work in response to constructive criticism. [...] Language is the most important tool of a lawyer, and lawyers must learn how to express themselves clearly and concisely."¹
4. **Oral Communication and Listening** involves "the ability to speak clearly and persuasively... and excellent listening skills."¹
5. **Research** involves "undertaking a project that requires significant library research and the analysis of large amounts of information obtained from that research."¹

The study of philosophy lends itself to the development of the five recommended skills. To this end, the required minor in Philosophy provides an opportunity to cultivate these skills.

Students are strongly advised to take philosophy courses over and above the minimum requirements for a minor, including independent studies and honors research courses.

University Studies - BS, Health Humanities Concentration

Health Humanities is a growing, cross-disciplinary field that studies the lived experience of health and illness. Health Humanities is based on the idea that our experience of health and illness is never only biological or 'cultural,' but always both. This concentration is relevant for students interested in interdisciplinary scholarship, especially the interface between biosciences and the arts and humanities. Students must take an introductory course and capstone senior seminar, as well as selecting two courses each from the Humanities, Social Sciences and Sciences related to the interdisciplinary study of health.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.
The University Studies Degree format provides students flexibility to create individualized degree plans at Texas A&M. The format also provides additional opportunities for study in the College of Liberal Arts when there is restricted admission to specific departments. The University Studies in Liberal Arts (USLA) is a unique degree plan that consists of a foundational knowledge of Liberal Arts as a discipline, advanced work in social sciences and humanities, and two minors uniquely chosen by each student.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

**University Studies - BS, Liberal Arts Concentration**

The 21-credit-hour concentration is uniquely administered by the college, rather than by a department, and includes coursework drawn from all twelve college departments and five interdisciplinary programs. The degree, although B.S., requires a year of college-level foreign language and an additional 12 hours of communication, literature, and social science.

Students of USLA will be able to form their own program of study to acquire a broad interdisciplinary knowledge of the field of Liberal Arts. They will take courses in both the social sciences and the humanities, and receive the skills sets of a Liberal Arts degree: appreciation of different lifestyles and points of view; balanced knowledge of the social sciences and humanities; analytical, problem-solving skills; independent thinking but the ability to work in groups on collaborative projects; flexibility and adaptability; effective oral and written communication; the ability to interact with people at different levels.

A University Studies concentration in Liberal Arts is the ideal curricular model for allowing students to focus on the complexities of national and global problems, acquisition of skills needed for lifelong learning, such as critical thinking, communication, and the value of teamwork in problem solving. The core courses (upper-level courses in social science and humanities) and the additional requirements of foreign language, writing, and critical thinking, along with individualized minors, will position students on the many different career paths available in today's job markets for Liberal Arts graduates with their enhanced skills sets.

A student enrolled in the University Studies concentration of Liberal Arts may not pursue a double major or a double degree.

Total Semester Credit Hours 120

1 Must make a grade of C or better.
2 Complete two consecutive semesters of the same foreign language.
3 Students must complete 37 hours of general electives of which 30-36 hours should be used to satisfy the requirements for two university approved minors. One minor must be chosen from outside of the College of Liberal Arts. Minors must be declared in consultation with the major advisor.
4 Select from 300- or 400-level courses with a prefix of AFST (p. 877), ARAB (p. 900), ASIA (p. 908), CHIN (p. 934), CLAS (p. 935), ENGL (p. 970), FILM (p. 991), FREN (p. 998), GERM (p. 1010), HISP (p. 1013), HIST (p. 1014), HUMA (p. 1027), INTS (p. 1030), ITAL (p. 1037), JAPN (p. 1038), JOUR (p. 1039), LBAR (p. 1047), LING (p. 1048), LMAS (p. 1048), MODL (p. 1084), MUSC (p. 1087), PERF (p. 1105), PHIL (p. 1110), RELS (p. 1129), RUSS (p. 1136), SPAN (p. 1147), THAR (p. 1158).
5 Select from 300- or 400-level courses with prefix of ANTH (p. 896), COMM (p. 937), ECMT (p. 964), ECON (p. 965), POLS (p. 1118), PSYC (p. 1125), SOCI (p. 1142), WGST (p. 1173).
6 100-499 courses not used elsewhere.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

University Studies - BS, Race, Gender, Ethnicity Concentration

This area of concentration is purposefully designed to require that students complete an individualized body of coursework that educates them in interdisciplinary knowledge. Four inquiry-rich, research-based courses; an introduction to each discipline; and one a capstone senior seminar provide students with introductory and concluding courses in the methodologies appropriate to interdisciplinary studies in the Race, Gender, Ethnicity Concentration. Other courses in the core are drawn from areas such as Africana Studies, Latino/a and Mexican-American Studies, and Women's and Gender Studies.

The BS degree differs from the BA in being more focused on problem solving and analysis of data in examining major social and cultural issues. The BS degree therefore requires more courses in science and encourages statistics and mathematics, as opposed to the foreign language requirement of the BA version of the degree.

In the addition to a core of courses focused on race and ethnicity and gender, each student must complete two minors for the degree. It is expected that two minors are required for the degree, and at least one minor will must be from outside the College of Liberal Arts.

A student enrolled in the University Studies concentration of Race, Gender, Ethnicity may not pursue a double major or a double degree.

Semester Credit Hours 15

Total Semester Credit Hours 120

1. One course on federal government and one course on state/local government will fulfill this requirement. Completing four semesters of upper-level ROTC may be substituted for 3 semester hours of the six hours required.

3. Students must complete 48 hours of general electives of which 30-36 hours should be used to satisfy the requirements for two university approved minors. Minors will range between 15 and 18 hours. One minor must be chosen from outside of the College of Liberal Arts. Consult with advisor regarding how to declare desired minor.

6. Select from ATMO 100-499 (p. 910); BIOL 100-499 (p. 919); CHEM 100-499 (p. 929); CPSC 100-499; GEOG 100-499 (p. 1005); GEOG 100-499 (p. 1008); MATH 131-499 (p. 1066); OCNG 100-499 (p. 1104); PHYS 100-499 (p. 1115); STAT 201-499 (p. 1154).

7. 100-499 courses not used elsewhere.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46)
courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.
COLLEGE OF NURSING

Administrative Officers

Dean - Nancy Fahrenwald, Ph.D., R.N., PHNA-BC, FAAN
Associate Dean for Academic Affairs - Debra Matthews, Ph.D., R.N.
Assistant Dean for Student Affairs - Todd Stricherz, M.S.
Associate Dean for Finance and Administration - Shirley Davidson, M.B.A.
Associate Dean for Research - Jane Bolin, Ph.D., J.D., R.N.
Associate Dean for Clinical and Outreach Affairs - Cindy Weston, D.N.P., R.N., CSN-CC, FNP-BC
Assistant Dean for Undergraduate Nursing Education - Sharon Dormire, Ph.D., R.N.,
Assistant Dean for Graduate Nursing Education - Matthew Sorenson, Ph.D., APRN, ANP-C, FAAN
Assistant Dean for Distant Site Round Rock - Virginia Ann Utterback, Ph.D., R.N., CNE

General Statement

The four-year Bachelor of Science in Nursing (BSN) degree provides the educational and experiential base for entry-level professional nursing practice and provides the platform on which to build a career through graduate-level study for roles such as advanced practice registered nurse (nurse practitioner, nurse midwives, clinical nurse specialist, nurse anesthetist), as well as a career in nursing administration, research, and nursing education.

Much of the emphasis in healthcare today is shifting toward preventive care and the promotion of health. As the healthcare industry turns away from the hospital as the center of the operation, nurses are being asked to take on broader and more diverse roles working in clinics, outpatient facilities, community centers, schools, and even places of business. The education of today’s nurses, therefore, transcends the traditional areas, such as chemistry and anatomy, to enable a deeper understanding of health promotion, disease prevention, screening, genetic counseling, and immunization. BSN education provides nurses with an understanding of how health problems may have a social cause, often referred to as the social determinants of health, such as poverty and environmental contamination, as well as provide insight into human psychology, behavior, cultural mores, and values.

The transformation of today’s healthcare system offers unlimited opportunities for nurses as care in urban and rural settings becomes more accessible. According to the U.S. Bureau of Labor Statistics, employment of RNs will grow faster than the average for all occupations through 2026, due largely to growing demand in settings such as hospitals, community health centers, home care, and long-term care. The increased complexity of health problems and increased management of health problems out of the hospitals require highly educated and well-prepared nurses at the baccalaureate and graduate levels. It is an exciting era in nursing, one that holds exceptional promise for nurses with a baccalaureate nursing degree.

History

Texas A&M College of Nursing received approval from the Texas Board of Nursing on July 17, 2008, and admitted its first class on July 21, 2008. The college has grown to approximately 450 nursing students enrolled at two campuses: Bryan and Round Rock as well as having many students enrolled in distance education programs. The college also has a resident recruiting presence in Lufkin and McAllen serving residents in East and South Texas for both undergraduate and graduate nursing students.

Texas A&M College of Nursing graduates are among the best-prepared baccalaureate and masters nurses in the nation, and they are highly sought after by prospective employers. The first-time National Council Licensure Examination for Registered Nurses® (NCLEX-RN) pass rates for BSN graduates have ranked 10 percentage points higher than both the Texas and national average for the past ten years. The percent of BSN graduates employed within the first month following graduation is consistently high compared to state and national averages.

The college received the National League of Nursing’s prestigious designation as a Center of Excellence in Nursing Education initially in 2016. The distinction recognizes schools of nursing that have achieved outstanding innovations, commitment, and sustainability.

College of Nursing Programs

Program: Baccalaureate degree in nursing
Length: 12 to 23 months
General Admissions Requirements: Prerequisite coursework varies by program
Application Deadline: Varies depending on program of study
Start Term: Varies depending on program of study
Specialization, Program of Study: BSN Traditional Track, BSN Second Degree Track, RN to BSN Track
Degree: BSN.

Baccalaureate Degree in Nursing

The College of Nursing (CON) offers three tracks that lead to the Bachelor of Science in Nursing (BSN) degree. The Traditional BSN and the accelerated Second-Degree BSN options are two-year upper-division nursing degree programs. Prior to entry to the CON, students in these options must complete prerequisite courses in the humanities and biological, physical and behavioral sciences to provide a foundation for the nursing major. Both of these pre-licensure options prepare graduates to take the National Council Licensure Examination (NCLEX-RN) in order to be licensed for practice as a registered nurse. The third option is the RN to BSN (RN-BSN) track for nurses with an associate’s degree in nursing seeking to complete the bachelor’s degree. Students in the College of Nursing are governed by the regulations and policies that apply to all students at TAMU. In addition, students are governed by requirements of the College of Nursing, professional standards and standards of the assigned clinical agencies. These include but are not limited to health requirements, immunizations, background checks, and drug screens. The requirements are presented in detail in the College of Nursing Undergraduate Student Handbook.

Accreditation by the Commission on Collegiate Nursing Education (CCNE)

The Commission on Collegiate Nursing Education is an autonomous accrediting agency, contributing to the improvement of the public’s health. A specialized/professional accrediting agency, CCNE ensures the
quality and integrity of baccalaureate and graduate nursing programs and of post-baccalaureate nurse residency programs. The baccalaureate and master's degree programs in nursing at Texas A&M University College of Nursing are accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org), 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

**Good Academic Standing**

Good academic standing is defined as having a minimum grade point average of a 2.0 (on a 4.0 scale), maintaining a minimum grade of C in all courses, and non-probationary status. Students must be in good academic standing in order to progress in the program. Grades of D, F, or U are not acceptable in nursing courses. Students who receive a grade of D, F or U in any course in any given semester will be automatically placed on probation and notified in writing of probation status. The student will remain on probation until the course is repeated with a C or better. The course can only be taken through the Texas A&M College of Nursing. A second attempt in a course cannot be 'Q' dropped. The grade earned on the second attempt will stand. Students who earn a grade of D or F upon repetition of a nursing course or have two nursing course failures are ineligible to continue enrollment in the College.

Students must complete the program to which they enrolled in three (3) consecutive years or six (6) long semesters. Exceptions for extenuating circumstances (i.e. serious illness, pregnancy, etc.) will be considered. In addition to obtaining grades of C or above in all nursing courses, students must demonstrate their ability to deliver safe care to patients at all times. Failure to provide safe patient care may result in immediate withdrawal from the course and, potentially, dismissal from the College of Nursing.

**Academic Dismissal**

Students will not be permitted to continue in the nursing program or apply for readmission if they:

1. receive a grade of D or F in more than one course,
2. receive any combination of grades of D or F on two attempts of the same course,
3. receive notice of dismissal from the program by the Assistant Dean for Academic Affairs or the Assistant Dean for Student Affairs for failure to adhere to College of Nursing policy.

**Nursing Professional Code of Ethics**

Students in nursing and other health professions curricula are held to standards of conduct that both differ from and exceed those usually expected of university students. Each student enrolled in the College of Nursing is expected to uphold the professional code of ethics established for and by the nursing profession. The nurse recognizes that his/her first obligation is to the patient’s welfare.

Any situation that threatens patient safety, exhibits a lack of moral character, demonstrates a lack of professionalism or good judgment, and/or proves harmful to the hospital or college environment is a violation of College/Hospital policy and may result in immediate termination from the program.

**Compliance Requirements for Clinical Courses**

Students must provide documentation confirming completion of compliance requirements prior to participating in clinical nursing courses.

Information on requirements is provided upon admission and during New Student Orientation.

**Locations**

The Bryan/College Station campus serves as the headquarters of the Texas A&M Health Science Center College of Nursing. The 200-acre campus is located along State Highway 47 approximately three miles west of the main campus of Texas A&M University. The College of Nursing campus in Round Rock, Texas, provides a state-of-the-art 134,000-square-foot structure with classrooms, a simulation center, library, study lounge, student services and faculty offices. Additionally, the College of Nursing has two advising locations: Lufkin and McAllen, Texas.

**Majors**

**College of Nursing**
- Bachelor of Science in Nursing, RN to BSN Track (p. 668)
- Bachelor of Science in Nursing, Second Degree BSN Track (p. 669)
- Bachelor of Science in Nursing, Traditional BSN (p. 670)

**Masters**

**College of Nursing**
- Master of Science in Nursing in Family Nurse Practitioner (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/nursing/msn-family-practitioner/)
Nursing - BSN, RN to BSN Track

The RN to BSN track is an opportunity for registered nurses who hold an associate's degree in nursing from an accredited college or will have an A.D.N. degree conferred prior to the entry date. Applicants must hold a current, unencumbered Registered Nurse license. Students may complete the 30 credit hour upper division course of study as either a full-time or a part-time student. The course instruction is delivered online allowing students to balance career, family and other responsibilities along with advancing their education. Students may choose to complete the curriculum in 3 semesters (1-year option), in 4 semesters (1 1/2-year option) or in 5 semesters (2-year option). Applicants who completed their Associate Degree in Nursing through an LVN to RN or Paramedic to RN bridge program must have earned a minimum of 35 transferable credits in their program in order to apply. This program is approved for delivery via asynchronous distance education technology, with some required visits to Bryan, TX.

Entry to the RN to BSN (Bachelor of Science in Nursing) Program

Admission to the College of Nursing is competitive. The student must have a minimum grade of C in each prerequisite course within only two attempts. It is strongly recommended that applicants have a minimum cumulative grade point average of 3.0 (on a 4.0 scale). All applicants are expected to complete prerequisite coursework and Texas A&M core curriculum coursework prior to the first class day.

Admissions decisions are based on:
1. the strength of the student's academic background;
2. the personal statement/essay;
3. one professional reference from either a professor or the student's current supervisor;
4. the student’s experiences and attributes, to include community service, leadership, honors and awards and work experience;
5. academic history of repeats, withdraws or failures.

1 Core Curriculum courses are listed on the University Core Curriculum (p. 25) page. For additional information, please reference http://core.tamu.edu. STAT 201 is recommended to fulfill 3 hours of Mathematics, but is not required.

2 Indicates Nursing Science course.

3 These courses may be taken at a community college, but must be completed by the first day at the College of Nursing. Students may elect to place these courses anywhere in their schedule, thought it is encouraged that these be completed over the summer.

4 Texas common courses BIOL 2401 and 2402 taken at any Texas accredited public institution will meet the requirement for BIOL 319 and BIOL 320.

Nursing - BSN, Second Degree BSN Track

The second degree (post baccalaureate) track is for students who already hold a bachelor’s degree in another field of study. Acceptance into this track requires successful completion of prerequisite coursework prior to beginning upper division courses. All students will be required to complete core curriculum requirements if these were not met in the previous degree program. Contact the Office of Student Affairs for more information. This program is offered in Bryan, TX.

Students with a previous bachelor's degree may apply to the traditional BSN track and must follow the same requirements as noted above. If they met a core curriculum at another Texas public institution in their previous degree, it will be accepted for entry into the College of Nursing.

Upper Level Entry to the Second Degree Bachelor of Science in Nursing

Admission decisions are based on:
1. the strength of the student’s academic background;
2. HESI A2 score;
3. the personal statement;
4. the student’s experiences and attributes, to include community service, leadership, work experience and activities in health care; and
5. academic history of repeats, withdraws or failures.

Total Semester Credit Hours

| Total Semester Credit Hours | 120 |

1. Core Curriculum courses are listed on the University Core Curriculum (p. 25) page. For additional information, please reference http://core.tamu.edu. STAT 201 is recommended to fulfill 3 hours of Mathematics, but is not required.
2. Indicates Nursing Science course.
3. These courses may be taken at a community college, but must be completed by the first day at the College of Nursing. Students may elect to place these courses anywhere in their schedule, thought it is encouraged that these be completed over the summer.
4. Texas common courses BIOL 2401 and 2402 taken at any Texas accredited public institution will meet the requirement for BIOL 319 and BIOL 320.

Nursing - BSN, Traditional BSN

The traditional BSN track requires the successful completion of prerequisite coursework prior to beginning upper division courses. Academic advisors will be able to advise students regarding equivalencies to common course numbers. Information is also available regarding courses at www.tccns.org (http://www.tccns.org) and through the Texas A&M Transfer Course Equivalency (https://compassxe-ssb.tamu.edu/HCA/ssb/transferCourseEquivalency/#!/inst) webpage. This program is offered in Round Rock, TX and Bryan, TX.

Upper Level Entry to the Traditional Bachelor of Science in Nursing

Admission to the College of Nursing upper-level entry program is competitive. The student must have a minimum grade of C in each prerequisite course and a recommended minimum cumulative grade point average of 3.0 (on a 4.0 scale). Students admitted to the program usually exceed this minimum requirement significantly, with higher grade point averages in all university courses, in core curriculum courses and in the science courses. Applicants are required to complete the HESI Admissions Assessment A2 exam and achieve a minimum score of 75% in each required section. Admission requirements include the application, HESI score, personal statement, and transcript(s) from all colleges or universities attended. Admission decisions are based on:

1. the strength of the student’s academic background;
2. the HESI A2 score;
3. the personal statement;
4. the student’s attributes and experiences, to include community service, leadership, work experience and activities in health care; and
5. academic history of repeats, withdraws or failures.

Internal Transfer Applicants

An Internal Transfer Applicant is a current Texas A&M University undergraduate in a non-nursing major who meets specific requirements to apply to the upper division course sequence in Nursing. Meeting requirements does not guarantee admission, but allows a student the opportunity to apply for entry to the nursing program.

Students must submit the application no later than the published deadline in the term in which they are applying. Note: All academic information included on the application must be posted to and appear in a student’s official record at Texas A&M.

External Transfer Applicants

A limited number of External Transfer Applicants from colleges and universities outside of Texas A&M University will be admitted.

Students participating in Program for Transfer Admission (PTA) must follow the external transfer process found here (http://nursing.tamhs.edu/traditional/external.html).

- Associate Dean for Research - Tiffany A. Radcliff, Ph.D.
- Assistant Dean for Undergraduate Studies - Donald J. Curtis, Jr., Ph.D.
- Assistant Dean for Finance and Administration - John O’Neill, M.B.A.
- Assistant Dean for Student Affairs - Erin Schneider, M.P.H.
- Assistant Dean for Accountability - Eric Wilson, Ph.D.

General Statement

Founded in 1998 as the first public health school in the nation with a focus on rural and underserved communities, the School of Public Health developed into a nationally ranked, fully accredited public health academic, research, and service program.

Offering classes at the College Station campus as well as other Texas locations through distance education, the school provides a bachelor's program and graduate level programs including two master's degrees (Master of Public Health and Master of Health Administration) in several public health disciplines: epidemiology, biostatistics, environmental health, occupational safety and health, health administration, policy and management, and health promotion and community health sciences. The school also offers a Doctor of Public Health with concentrations in epidemiology, environmental health, and health promotion and community health sciences, and a Doctor of Philosophy in health services research.

The school provides an excellent forum for tomorrow’s public health leaders to engage in a learning environment that builds on a wide array of research strengths and scholarly inquiry of a stellar faculty (seven of whom have received the prestigious designations of Regents Professors and one Distinguished Professor). Further, the research and practice links established by the faculty provide an extensive diversity of opportunities for students to work closely with professionals in applied public health settings.

Providing a forum for future public health leaders, the school builds an array of research strengths and practice skills for rural and urban settings.

History

The School of Public Health is the first of its kind in the nation. The Texas Legislature established the school in 1995 as part of a rural health initiative to better address rural health needs in the state. After receiving degree-granting authority for the Master of Public Health degree in April 1998 from the Texas Higher Education Coordinating Board, the School of Rural Public Health welcomed its inaugural class in September 1998.

In 2014, the School of Public Health welcomed its first students into the brand-new Bachelor of Science in Public Health program, the first program of its kind in the state affiliated with a fully accredited School of Public Health. With a mission to serve the public health needs of the entire state, the undergraduate program is based on a philosophy of health promotion and disease prevention to improve the quality of life of individuals, families, and communities in the State of Texas and beyond.

Graduates of the BSPH program will be able to assess factors influencing health in populations as well as plan, design, implement and successfully manage effective healthcare programs and interventions as well as be well-positioned for careers in medicine, nursing, and other allied health professions.

Public Health - BS

Public Health professionals with a Bachelor of Science in Public Health (BSPH) are prepared to:

- understand the history, ethics, and traditions of the field of public health.
- value the scope and nature of problems and challenges addressed by the field of public health.
- appreciate the breadth, depth, and variety of intellectual and practical skills employed in the field of public health.
- appreciate the variety of communication methods and cultural competence required in the field of public health.

The BSPH program is based on a philosophy of health promotion and disease prevention, to improve the quality of life of individuals, families and communities. The BSPH discipline focuses on four areas:

1. the multiple determinants of health, including biological, environmental, sociocultural, health service, and economic factors,
2. identification of scientific data, tools of informatics, and other information for identifying indicators of health status and health disparities and assessing the well-being of a community,
3. addressing major local, national, and global health challenges, and
4. designing public health approaches and interventions that improve health outcomes, population health and well-being.

The Bachelor of Science in Public Health degree program is more than a means to produce ready public health practitioners. It can complement or enrich a traditional biology-based pre-health degree plan for students intending professional education in medicine, nursing, allied health or other health professions. Notably the program establishes a specific entry-level baccalaureate degree in the Public Health academic pathway which, until recently, had started with a master's degree.

This program is approved to be offered at the Texas A&M Higher Education Center in McAllen, Texas.

**Semester Credit Hours**: 15

**Total Semester Credit Hours**: 120

1 Chosen in consultation with BSPH academic advisor.

2 BSPH Directed Electives: courses that constitute the major are those offered by the School of Public Health and those approved for public health studies electives. Additional courses may be available. Students must check with their academic advisor.

Approval of degree plan does not guarantee access to courses. Students must satisfy prerequisites, and some course (writing intensive classes included) are available to majors only. It is the responsibility of the student to ascertain whether there are any restrictions or prerequisites for courses in their degree plan.
Public Health - 5-year Bachelor of Science/Master of Public Health in Epidemiology

The School of Public Health offers a 5-year degree program including a Bachelor of Science and a Master of Public Health in Epidemiology.

The 3+2 Bachelor of Science in Public Health/Masters in Public Health in Epidemiology degree program is more than a means to produce next-level Epidemiologists. It will deliver a graduate who can not only immediately impact the field of Epidemiology, but also deliver someone with a well-rounded understanding of the role that Epidemiology and Public Health play in medicine, nursing, allied health or other health professions.

The undergraduate component of the 3+2 program is based on a philosophy of health promotion and disease prevention, to improve the quality of life of individuals, families and communities. The graduate MPH component is a non-thesis degree program with culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and complete a rigorous capstone class.

Program Requirements

The following is a suggested schedule that includes the required courses for the combined BS/MPH in Public Health-Epidemiology. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Minimum of 6 hours at 300 to 400 level.

Students must have completed at least 45 hours, have a minimum TAMU GPA of 2.5 or higher, and a completed minor form filed in the Public Health Studies advising office to pursue this program.
Occupational Health and Safety - Minor

The Occupational Safety and Health minor consists of 15 hrs of selected upper-level Public Health coursework. Students are encouraged to select courses in consultation with a Public Health Studies Academic Advisor.

Students applying for an OCSH minor must have a 2.0 or better overall GPA and meet with a PHLT advisor to declare the minor. Students are required to meet a minimum cumulative GPA of 2.0 or better in their minor coursework. Proper classification is required for the course level taken and any minor course prerequisites must be met.

Students with a minor in Occupational Safety and Health minor are prepared to recognize factors that make a workplace unsafe and learn how to reduce risks for everyone.

Requirements to declare Occupational Safety & Health minor:

Must have a 2.0 TAMU GPA

Total Semester Credit Hours 15

Minimum 15 hours required.
Minimum of 6 hours at 300- to 400-level.
Minimum 2.0 TAMU GPA and a completed minor form filed in the Public Health Studies advising office.

Public Health Studies - Minor

The Public Health Studies minor consists of 15 hrs of selected upper-level Public Health coursework. Students are encouraged to select courses in consultation with a Public Health Studies Academic Advisor.

Students applying for a PHLT minor must have a 2.0 or better overall GPA and meet with a PHLT advisor to declare the minor. Students are required to meet a minimum cumulative GPA of 2.0 or better in their minor coursework. Proper classification is required for the course level taken and any minor course prerequisites must be met.

Students with a minor in Public Health are prepared to: Understand factors influencing health in individuals, communities and populations; Contribute to society as citizens armed with the knowledge and skills to promote the common good; Promote healthier lifestyles and environments; and Contribute to the implementation of programs and interventions.

Requirements to declare PHLT minor:

Must have a 2.0 TAMU GPA
College of Science

Administrative Officers

Dean - Valen E. Johnson, Ph.D.
Executive Associate Dean - Mark J. Zoran, Ph.D.
Associate Dean for Assessment - Suojin Wang, Ph.D.
Associate Dean for External Relations - Marlan O. Scully, Ph.D.
Associate Dean for International Programs - Gil Rosenthal, PhD
Associate Dean for Research - James Batteas, Ph.D.
Associate Dean for Undergraduate Programs - Lucas Macri, Ph.D.
Assistant Dean for Diversity and College Climate - Derya Akleman, Ph.D.

General Statement

Nature, its origins and its evolution, its strengths and its frailties, its order and its perceived disarray, constitutes the realm of study classified as science. Scientists search for interconnecting relationships and traits of order to understand the nature of our universe. Each new discovery provides additional knowledge and frequently enables the solution of previously perplexing questions. Often technology is able to transform scientific discovery into applications which are beneficial to our everyday living. Technology would be impoverished were it not for the new knowledge continually being sought by scientists. At the same time, science could not progress without the advances in instrumentation and techniques generated by technology. Thus, a symbiotic relationship exists between science and technology, a relationship which permeates the courses and programs in the college.

The departments of the College of Science are organized to respond to the needs of students for both general and specialized education in science in offering the Bachelor of Science and the Bachelor of Arts degrees in Biology, Chemistry, Mathematics, Physics, and University Studies. The former degree permits heavy emphasis in selected subject matter and closely allied fields, whereas the latter degree is designed for the student who desires a more broadly based education while still specializing in one of the sciences. Additionally, the college offers a Bachelor of Science degree in Applied Mathematical Science and Statistics.

For this reason, many students select a degree program in science to complete their prerequisite courses for professional study programs. The early admissions option to professional schools of dentistry or medicine in the biology degree programs provides the opportunity for a student to receive a degree in biology if they are successful in gaining admission to a professional study program in medicine or dentistry prior to completion of a regular four-year degree program. To receive the degree, they must complete all requirements under this program and successfully complete their first year of medical or dental school.

In addition to the Departments of Biology, Chemistry, Mathematics, Physics and Astronomy, and Statistics, the College of Science includes the Cyclotron Institute, a research institute that emphasizes fundamental studies of nuclear science in which both undergraduate and graduate students participate. The College of Science offers MS and PhD programs in various departments.

General Degree Requirements

Degree requirements for science majors are organized into:

1. general requirements, including University Core Curriculum requirements and College of Science requirements;
2. requirements of the major field of study;
3. requirements of the minor field of study for those students completing a BA degree; and
4. electives.

With the exception of physical activity and general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

Students are responsible for selecting the courses in their degree plan and assuring they abide by Texas A&M University Student Rules in meeting all degree requirements. Each department has advisors who should be consulted in developing degree programs.

General Requirements

General requirements include those which are required in every degree program at the University. Please refer to these requirements defined in the University Core Curriculum and graduation requirements in foreign language sections of this catalog. Special guidelines should be noted in the following categories:

American History

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>U.S. history course ¹</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>U.S. history course ¹</td>
<td>3</td>

</tr>
</thead>
<tbody>
<tr>
<td>POLS 206</td>
<td>American National Government</td>
<td>3</td>
</tr>
<tr>
<td>POLS 207</td>
<td>State and Local Government</td>
<td>3</td>
</tr>
<tr>
<td><strong>Total Semester Credit Hours</strong></td>
<td><strong>6</strong></td>
<td></td>
</tr>
</tbody>
</table>

Three hours in political science may be substituted by successfully completing the required four semesters of upper-level ROTC curriculum.

International and Cultural Diversity Requirements

The International and Cultural Diversity portion of the Graduation requirements may be fulfilled by 6 hours from the approved list of courses (see the International and Cultural Diversity requirements (p. 47) page). These courses may be in addition to University Core Curriculum requirements, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements.
Major Field of Study
Each department sets its own requirements for the major. At least 12 semester hours in the major must be completed in advanced courses (300- or 400-level) in residence at Texas A&M.

Minor Field of Study
The BA degree requires a minor field of study or an area of emphasis for students pursuing teacher certification. A minor requires 15–18 semester hours in one discipline. Six of these hours must be advanced (300- or 400-level) courses. Students must contact the department offering the minor to determine course requirements. Students pursuing a BS degree may select an optional minor. Contact the department offering the minor to determine course requirements. Students must declare a minor no later than the date on which they apply for graduation.

Electives
Electives should be chosen to enhance the student's degree program and/or complete professional school prerequisites if not contained in required courses in the degree plan. Elective courses must be above the minimum level required in other areas of the degree program. For example, MATH 102 is not acceptable because it is below the minimum requirement of calculus. Also, introductory courses to another field of study such as BIMS 101 and AGLS 101 will not count toward degree requirements. Lower-level ROTC courses are not acceptable as electives. Please consult an advisor when selecting electives.

Curricular Options

Honors Program
The College of Science participates in the University Honors Program designed to offer the superior student special opportunities for academic work of a range and depth appropriate to his or her capabilities and greater intellectual interests. For further information, refer to the section regarding the University Honors Program (p. 115).

Cooperative Education Program
Cooperative education enables students to gain practical work experience and a salary while completing academic requirements. During the four-year academic program, co-op students complete two to four periods of work away from campus, gaining experience through on-the-job training and thus improving their opportunities for future employment. The Cooperative Education Office provides additional information about this program.

Minor Field of Study
Each department in the College of Science offers a minor. Students interested in pursuing a minor in a field in the College should contact the department offering the minor.

Summer Internships
A number of programs are available throughout the country which offer summer employment to students interested in specific fields of study and training. Each departmental advisor has information pertaining to these programs.

Combined Bachelor's and Master's Degrees
The Department of Mathematics provides the opportunity for ambitious and talented students to earn a bachelor's and a master's degree within a five year period. Eligible students earn graduate credit during their undergraduate study which allows them to complete this option.

Interested students should contact the Mathematics Department if interested in this program.

Preparation for Professional Studies
Students interested in gaining admission to professional study programs in the health professions may do so through any course of study. Prerequisite course requirements may be completed as part of a regular degree program or through electives. Advising for students preparing for health profession careers is available, regardless of major, through Professional School Advising, 209 Koldus, (979) 847-8938.

Medicine and Dentistry
Curricula in biology, chemistry, mathematics and physics within the College of Science readily accommodate the required courses needed for admission to professional studies in medicine and dentistry. Admission to medical and dental schools typically require the following prerequisites:

<table>
<thead>

Early Admission Program
The College of Science offers two methods of awarding a baccalaureate degree to students who gain admission to professional school prior to completion of their degree. The Baccalaureate Degree Option for Students Granted Early Admission to Medical/Professional Programs is available to all students regardless of their major.
Most students complete a four-year program prior to acceptance to professional school and thus it is advised a degree program leading to a standard baccalaureate degree be selected.

**Veterinary Medicine**

Please refer to the Admission Requirements—Professional Curriculum listed in the College of Veterinary Medicine and Biomedical Sciences.

**Other Allied Health Programs**

There are many allied health fields students may prepare for through degree programs in the College of Science. Prerequisite requirements for admission should be completed as part of a degree granting program.

**Teacher Certification**

The Secondary Teaching Certificate may be obtained in conjunction with a major in the College of Science. Requirements for teacher certification may be found at the aggieteach.tamu.edu/ website.

**Curricula in University Studies**

The College of Science has five different University Studies degree tracks. A University Studies Degree generally consists of a concentration of 21-24 hours and two minors of 15-18 hours each. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed in a college outside of the College of Science. The student’s diploma will list Bachelor of Science in University Studies. The student’s area of concentration and the two minors will be indicated on the student’s transcript.

Students must meet with an academic advisor to discuss their plans, grade requirements and receive an application packet. Additional information about the degree tracks may be found at https://science.tamu.edu/degrees/university-studies/.

**Majors**

**College of Science**

- Bachelor of Science in University Studies, Arts and Sciences Concentration (p. 751)
- Bachelor of Science in University Studies, BioInformatics Concentration (p. 752)
- Bachelor of Science in University Studies, Mathematics for Business Concentration (p. 753)
- Bachelor of Science in University Studies, Mathematics for Pre-Professionals Concentration (p. 753)
- Bachelor of Science in University Studies, Mathematics for Teaching Concentration (p. 754)
- Bachelor of Science in University Studies, Science for Secondary Teaching Concentration (p. 755)

**Department of Biology**

- Bachelor of Arts in Biology (p. 688)
- Bachelor of Science in Biology (p. 689)
- Bachelor of Science in Microbiology (p. 690)
- Bachelor of Science in Molecular and Cell Biology (p. 692)
- Bachelor of Science in Neuroscience, Molecular and Cellular Neuroscience Track (p. 693)
- Bachelor of Science in Zoology (p. 694)

**Department of Chemistry**

- Bachelor of Arts in Chemistry (p. 700)
- Bachelor of Arts in Chemistry, Biological Chemistry or Medical, Dental, Pharmacy School Track (p. 702)
- Bachelor of Arts in Chemistry, Chemical Education Track (p. 703)
- Bachelor of Arts in Chemistry, Environmental Chemistry Track (p. 705)
- Bachelor of Science in Chemistry (p. 707)
- Bachelor of Science in Chemistry, Biological Chemistry Track (p. 709)
- Bachelor of Science in Chemistry, Environmental Chemistry Track (p. 710)
- Bachelor of Science in Chemistry, Materials Chemistry Track (p. 712)

**Department of Mathematics**

- Bachelor of Arts in Mathematics (p. 730)
- Bachelor of Arts in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 732)
- Bachelor of Science in Mathematics (p. 733)
- Bachelor of Science in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 735)
- Bachelor of Science in Applied Mathematical Sciences, Actuarial Science Emphasis (p. 718)
- Bachelor of Science in Applied Mathematical Sciences, Biological Science Emphasis (p. 720)
- Bachelor of Science in Applied Mathematical Sciences, Computational Science Emphasis (p. 721)
- Bachelor of Science in Applied Mathematical Sciences, Cryptography Emphasis (p. 722)
- Bachelor of Science in Applied Mathematical Sciences, Economics Emphasis (p. 724)
- Bachelor of Science in Applied Mathematical Sciences, Math Emphasis (p. 725)
- Bachelor of Science in Applied Mathematical Sciences, Statistics Emphasis (p. 727)
- Bachelor of Science in Applied Mathematical Sciences and Master of Science in Mathematics, 5-Year Degree Program (p. 728)

**Department of Physics and Astronomy**

- Bachelor of Arts in Physics (p. 740)
- Bachelor of Science in Physics (p. 741)
- Bachelor of Science in Physics, Astrophysics Track (p. 742)
- Bachelor of Science in Physics, Business Track (p. 743)
- Bachelor of Science in Physics, Computational Science Track (p. 744)

**Department of Statistics**

- Bachelor of Science in Statistics (p. 748)
- Bachelor of Science in Statistics and Master of Science in Statistics, 5-Year Degree Program (p. 749)
Minors

Department of Biology
- Bioinformatics Minor (p. 696)
- Biology Minor (p. 696)
- Pre-Medicine Minor (p. 696)

Department of Chemistry
- Chemistry Minor (p. 713)

Department Mathematics
- Mathematics Minor (p. 737)

Department of Physics
- Astrophysics Minor (p. 745)
- Physics Minor (p. 746)

Department of Statistics
- Statistics Minor (p. 750)

Masters

Department of Biology
- Master of Science in Biology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/biology/ms/)
- Master of Science in Ecology and Evolutionary Biology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/biology/ecology-and-evolutionary-biology/ms/)
- Master of Science in Microbiology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/biology/microbiology/ms/)

Department of Chemistry
- Master of Science in Chemistry (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/chemistry/ms/)

Department of Mathematics
- Master of Science in Mathematics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/mathematics/ms/)
- Master of Science in Quantitative Finance (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/mathematics/quantitative-finance/ms/)

Department of Physics and Astronomy
- Master of Science in Astronomy (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/physics-astronomy/astronomy/ms/)
- Master of Science in Physics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/physics-astronomy/physics/ms/)

Department of Statistics
- Master of Science in Statistics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/statistics/ms/)

Doctoral

Department of Biology
- Doctor of Philosophy in Biology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/biology/phd/)
- Doctor of Philosophy in Microbiology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/biology/microbiology/phd/)

Department of Chemistry
- Doctor of Philosophy in Chemistry (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/chemistry/phd/)

Department of Mathematics
- Doctor of Philosophy in Mathematics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/mathematics/phd/)

Department of Physics and Astronomy
- Doctor of Philosophy in Astronomy (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/physics-astronomy/astronomy/phd/)

Department of Statistics
- Doctor of Philosophy in Statistics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/statistics/phd/)

Department of Biology

No one really knows what the world will be like 50 years from now, but it is certain that biologists will be at the forefront of science attempting to find solutions to many of the world’s problems and to find answers to intriguing questions about animals, plants and microbes at the molecular, cellular, organismal and ecosystem levels. Biologists will be concerned with pollution of the environment, cause and cure of disease, population control, recurring food shortages, preservation of species and many other aspects resulting from the impact of technological changes on life forms. Those who are astounded by the array of living things on the earth and who seek challenging, creative work should consider a career in biology or in a biology-related field. The Department of Biology offers five distinct four-year curricula which lead to the baccalaureate degree. These are the Bachelor of Arts in Biology, Bachelor of Science in Biology, Bachelor of Science in Molecular and Cell Biology, Bachelor of Science in Microbiology and Bachelor of Science in Zoology. The curricula are designed to maximize postbaccalaureate opportunities in:

1. professional schools of medicine, veterinary medicine and dentistry;
2. allied health schools of physical and occupational therapy, physician assistant programs, optometry, pharmacy, and nursing;
3. graduate education leading to teaching and research careers in universities, in industry or in state or national agencies;
4. teaching at junior high or high school levels and
5. jobs in biotechnology, research laboratories, pharmaceutical companies and field biology.

The Department of Biology degree plans will enable students to complete all entrance requirements for graduate and professional schools as well as medical technology, pharmacy, optometry, nursing, physical therapy, and other paramedical and health support fields.

**Advising**

Because some careers in biology require advanced and/or specialized training, it is essential to take advantage of advising opportunities. In the Department of Biology, there are professional advisors in the Biology Undergraduate Programs Office. The advisor may be consulted prior to each registration period and as the student needs. Questions regarding registration, degree checks, transfer of courses, advanced placements and other academic matters are handled in the Office of Undergraduate Programs. Students with special interests in graduate study should consult the graduate advisor. Information concerning entrance to professional schools of medicine, dentistry and other health related fields is available from the Office of Professional School Advising.

**Requirements for all Baccalaureate Degrees in the Department of Biology**

Each student seeking a baccalaureate degree in the Department of Biology is required to master a common body of knowledge in science. In addition, the student must take courses essential to a liberal education. Students will note that the first two years of all curricula offered by the Department of Biology are similar. Electives must include a 3 hour international and cultural diversity elective and a 3 hour cultural discourse elective required for graduation. Students must also take at least two writing-intensive courses in biology. Other requirements for graduation are listed in the Texas A&M University Student Rules and this catalog.

Students in the Department of Biology must make a grade of C or better in BIOL 111 and BIOL 112. Additionally, students may have only one D in courses within the major used to satisfy required or directed electives for a given degree plan. It is required that the freshman and sophomore level biology, chemistry and math courses be completed before the start of the 5th full semester and before enrollment in any junior or senior level science.

**Common Body of Knowledge**

To assure that students have sufficient prerequisite training for advanced courses, Biology majors must complete a series of courses comprising a Common Body of Knowledge (CBK) prior to their junior year (5th full semester) and enrollment in upper level BIOL courses. A Biology student will be admitted into upper level Biology classes when he or she has met the following criteria:

Completion of a set of CBK courses (37-38 hours) before the student's 5th full semester to include:

<table>

Total Semester Credit Hours: 37-38

A student must be in good academic standing with an overall grade point average of at least 2.0 or better overall and in the major.

**Process**

Students will be audited by the department to monitor progress of the CBK. Students failing to complete the CBK within the first four full semesters (two full semesters for Transfer Students) at Texas A&M University may be blocked and forced to change majors or be required to meet with an academic advisor to see if they can be successful in the major. Students registering for upper-level Biology classes without completing the CBK, or without approval of the Undergraduate Advising Office, will be dropped from the roster.

**Transfer Students**

1. Transfer from within Texas A&M University: The Biology Department will accept changes of major from other departments at Texas A&M upon completion of AT LEAST one semester of an applicable BIOL course taken at Texas A&M and AT LEAST one semester of an applicable CHEM course taken at Texas A&M, with a minimum 2.5 grade point average overall for courses taken at Texas A&M, a 2.5 grade point average in BIOL courses taken at Texas A&M, and a 2.5 or better grade point average in CHEM courses taken at Texas A&M. Students still must complete the CBK before being admitted to upper level BIOL courses.

2. Transfer students from other institutions to Biology must have completed the following:
   a. A minimum of 24 accredited college hours including prescribed coursework
   b. Prescribed coursework:
      i. Eight hours of General Biology (TAMU BIOL 111 and BIOL 112 or Texas Common Course Numbers BIOL 1406 and 1407) with B's or better, and
      ii. Eight hours of General Chemistry (TAMU CHEM 119 and CHEM 120 or Texas Common Course Numbers CHEM 1411 and CHEM 1412) with B's or better, and
      iii. Four hours of Calculus (TAMU MATH 147 or MATH 151 or MATH 171 and four hours of Calculus II (TAMU MATH 148 or MATH 152 or MATH 172 or three hours of Statistics in TAMU MATH 150) and four hours of Calculus II (TAMU MATH 2413 and MATH 2414 or MATH 1342) with C's or better
   c. A minimum cumulative grade point average of a 3.0
d. A minimum Biology and Chemistry grade point average of a 3.0 in each 
e. Please refer to admissions.tamu.edu

Biology Honors Program

The Biology Department Honors Program is open to highly talented and motivated students pursuing a major in any of our degree plans. Honors students will be part of a vibrant community within the department with enriched learning experiences in both the classroom and biology research laboratories.

Honors Requirements: Students wishing to graduate with honors distinctions in either Biology (BIOL), Microbiology (MBIO), Zoology (ZOOL), or Molecular and Cellular Biology (BMCB) must earn 21 credits in Honors courses and meet the following minimum honors requirements in addition to those listed in the degree plan:

- 4 credits BIOL 111H or BIOL 112H*
- 3 credits BIOL 213H or BIOL 214H
- 3 credits at 300/400 BIOL honors or honors contract; any 600 BIOL; not to include BIOL 485H, BIOL 491H, or BIOL 495H
- 6 credits BIOL 491H
- 2 credits BIOL 495H
- 3 credits any honors course outside the College of Science

* This requirement may be waived with a score of 5 on the Biology AP exam, a score of 6 on the IB exam, or by taking an additional honors biology course at the 300 or 400 level.

Grade requirements at time of graduation:

- cumulative Texas A&M University GPA of 3.5 or higher
- cumulative honors GPA of 3.25 or higher
- no grade lower than a B in courses counting toward honors. If a student earns less than a B in an honors course, they will still receive University credit. However, they will need to take a different course to fulfill the honors requirement.
- no F*, given in cases of academic dishonesty, on the transcript

Honors recognition: All honors courses will be denoted as honors on students’ official transcripts. Furthermore, students completing the honors program will have the departmental Biology honors distinction as well as any earned university or college distinction noted on the official transcript.

Admission to the Honors Program in Biology

Incoming Freshmen: Incoming freshmen applicants should indicate their interest in the departmental honors program though the ApplyTexas site and by choosing the ‘Apply to any Honors Program’ after August 1. Qualified applicants will be contacted by the department with further information on joining Biology Honors. Current qualifications for freshman admission are detailed on the Biology Honors website (https://www.bio.tamu.edu/wordpress/index.php/biology-honors-program/).

Students who have already completed their application and now wish to apply to the Biology Honors Program can use the ‘Apply to any Honors Program’ link at the Texas A&M Honors program site (http://honorsprograms.tamu.edu/Home/) or contact biohonors@bio.tamu.edu.

Current or transfer students: Current or transfer students with a cumulative GPA of 3.5 or better can apply for admission to the Biology Honors Program by writing a short (less than 300 word) email to the department’s Honors Director. When applying students should keep in mind that they will need to fulfill all honors requirements. Please send email to: biohonors@bio.tamu.edu.

Remaining in the program

In order to remain in the Biology Honors program, students must maintain a cumulative GPA at Texas A&M of 3.5 and honors GPA of 3.25. Students falling below these standards will be placed on probation for the next semester. Students unable to meet these standards for a second semester may be dismissed from the Biology Honors Program.

Contact us

Please direct any questions to biohonors@bio.tamu.edu or the Biology Undergraduate Advising office.

Human Biology Track

This unofficial track is for students interested in pursuing professional schools including medical, dental and allied health programs (e.g., nursing, occupational therapy, optometry, pharmacy, physical therapy and physician assistant). The focus of the science courses on human biology will better prepare these students for their chosen fields. Suggested courses include:

</table>
Students should consult their academic advisor about the courses that best fit their career interests.

**Education Track**
This is for students wishing to acquire state certification to teach at the secondary level upon graduation. Students should seek advice from the advisors within their department and from the College of Education and Human Development, as well as from the advisor in charge of their teaching option. The intention is to make the best possible use of social science, humanity, free and directed electives in the Bachelor of Arts in Biology, thereby condensing as many of the certification requirements as possible into the degree plan and allowing the student to obtain a minor in Applied Learning in Science, Technology, Engineering and Mathematics (STEM). Courses should include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>INST 210</td>
<td>Understanding Special Populations</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
</tbody>
</table>

**Biology Electives**
Upper-level BIOL courses, including two writing intensive courses (p. 919)

**Free Electives**
RDNG 372 Reading and Writing across the Middle Grades Curriculum or RDNG 465 or Reading in the Middle and Secondary Grades

TEFB 322 Teaching and Schooling in Modern Society

TEFB 324 Teaching Skills II

TEFB 406 Science in the Middle and Secondary School

Student teaching

Total Semester Credit Hours 32

**Marine Biology Track**
This unofficial track is for students desiring a more rigorous and in-depth foundation in biological courses that apply to marine environments and ecosystems. This suggested plan is ideal for students who intend to pursue graduate studies in marine biology or serve as field biologists at national seashores or sanctuaries. Suggested courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 335</td>
<td>Invertebrate Zoology</td>
<td>4</td>

<td>Marine Biology</td>
<td>4</td>
</tr>
<tr>
<td>Related ZOOL research or field experience (p. 1177)</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

**Free Electives**
OCNG 251 Oceanography or OCNG 42 or Biological Oceanography

WFSC 311 Ichthyology

Total Semester Credit Hours 20-21

Students should consult their academic advisor about the courses that best fit their career interests.

**Ecology/Environmental Track**
This unofficial track is particularly designed for students interested in environmental consulting, environmental protection and ecosystem evaluation. This suggested plan can be adapted to focus on particular areas or populations within an ecosystem. Suggested courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 210</td>
<td>Technical and Business Writing</td>
<td>3</td>
</tr>

**Biology Electives**
Select one of the following: 3-4

- BIOL 335 Invertebrate Zoology
- BIOL 357 Ecology
- BIOL 358 Ecology Laboratory
- BIOL 440 Marine Biology
- BIOL 462/ WFSC 462 Amazon River Tropical Biology
- WFSC 462
- BIOL 467 Integrative Animal Behavior

**Free Electives**
CHEM 315 Fundamentals of Quantitative Analysis and Quantitative Analysis Laboratory

ENTO 201 General Entomology

MEPS 313 Introduction to Plant Physiology

Select one of the following: 3-4

- PLPA 301 Plant Pathology & PLPA 303 and Plant Pathology Laboratory
- WFSC 311 Ichthyology
- WFSC 401 General Mammalogy
- WFSC 402 General Ornithology

Total Semester Credit Hours 20-21

Students should consult their academic advisor about the courses that best fit their career interests.

**Liberal Education Requirements of the University, College or State**

Majors

• Bachelor of Arts in Biology (p. 688)
• Bachelor of Science in Biology (p. 689)
• Bachelor of Science in Microbiology (p. 690)
• Bachelor of Science in Molecular and Cell Biology (p. 692)
• Bachelor of Science in Zoology (p. 694)

Minors

• Bioinformatics Minor (p. 696)
• Biology Minor (p. 696)
• Pre-Medicine Minor (p. 696)

Biology - BA

The BA degree in Biology, through the availability of a large number of electives, gives students maximum flexibility in earning a biology degree. The 15-18 hour minor requirement, including 6 hours of advanced courses in a discipline other than biology, provides students with the opportunity to include significant coursework in areas such as foreign language, business, education, or social sciences. The BA program is recommended for students with broad educational objectives or who intend to pursue further education in areas such as allied health professions, professional schools, or teaching certification.

1. Grade of C or better required.
2. Must be completed by start of 5th full semester.
3. Students may not use MATH 142 to satisfy this requirement.
4. Students seeking teacher certification must take HIST 105 and HIST 106. Other students may choose HIST 105 and HIST 106 or any 6 hours of American history courses (3 hours may be in Texas history).
5. Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

The following are CBK courses and must be completed prior to the start of 5th full semester: BIOL 111, BIOL 112, BIOL 213, BIOL 214, CHEM 119, CHEM 120, CHEM 227 & CHEM 237, CHEM 228 & CHEM 238, MATH 147, MATH 148 or STAT 201.

### Biology - BS

The BS degree in Biology is designed for students to obtain a comprehensive, solid foundation in the major branches of Biology. The degree provides the opportunity for extensive study across the breadth of biological disciplines, ranging from molecular and cellular biology to ecology and evolution. This degree plan is recommended for students preparing for graduate programs in biological sciences or any professional programs in health and medical sciences such as medical, dental or veterinary schools.

### Total Program Hours 120

6. Select from any 100-499 course not used elsewhere. (Except AGLS 101; ASCC 101, ASCC 102, ASCC 289; BIMS 101; BIOL 101, BIOL 107, BIOL 113, BIOL 206, CHEM 106, CHEM 116; MATH 102, MATH 142; WFSC 101.) Only one KINE 199 may be used as a general elective.

7. Two courses in the major must be designated as writing intensive.
Students seeking teacher certification must take HIST 105 and HIST 106. Other students may choose HIST 105 and HIST 106 or any 6 hours of American history courses (3 hours may be in Texas history).

Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

The following are CBK courses and must be completed prior to the start of 5th full semester: BIOL 111, BIOL 112, BIOL 213, BIOL 214, CHEM 119, CHEM 120, CHEM 227 & CHEM 237, CHEM 228 & CHEM 238, MATH 147, MATH 148 or STAT 201.

### Total Program Hours 120

**Microbiology - BS**

The degree program in Microbiology is designed to provide a comprehensive education in the biology of microorganisms. A graduate of this program will have a thorough grounding in the classical areas of microbial physiology and biochemistry, microbial genetics, and developing areas like the molecular biology of microorganisms. The curriculum provides excellent training toward a career in any one of many areas of industrial microbiology and public health services. It is also an ideal preparation for advanced study or professional school in medicine, dentistry and other related fields, especially medical technology and biotechnology.

Molecular and Cell Biology - BS

Students who select Molecular and Cell Biology as their major will receive a strong background in the cellular and molecular aspects of biology with particular emphasis on eukaryotes. The major provides an excellent foundation for a career in biotechnology, genetic engineering, MD/PhD programs or basic biological research.

Neuroscience - BS, Molecular and Cellular Neuroscience Track

Neuroscience is the study of the nervous system and its impact on
behavior and cognitive functions. This interdisciplinary field integrates
several areas of study, including biology, chemistry, physics, biochemistry,
psychology, and medicine. The core courses for this degree include
a foundation in the life sciences, and a foundational sequence in
neuroscience that will prepare students for more advanced NRSC
courses. The Neuroscience degree track administered by the Department
of Biology (NRSC-MCB) focuses on the biological basis of neurological
processes at the molecular and cellular level. Students completing
the NRSC-MCB degree will be well prepared for jobs in medical and
biotechnology fields, and they will be competitive for admission to
medical or graduate school.

The Zoology degree program is designed to expose students to all aspects of the study of animals. Following foundation courses on the principles of vertebrate and invertebrate zoology, students may select from a broad range of classes in animal biology, ranging from cellular and developmental biology, physiology, and anatomy to ecology and evolution. Graduates enter into advanced studies in zoology, specialized zoological fields in agriculture and renewable resources, or such professional fields as medicine, veterinary medicine, dentistry and other health-related areas.

6 Select from any 100-499 course not used elsewhere. (Except AGLS 101; ASCC 101, ASCC 102, ASCC 289; BIMS 101; BIOL 101, BIOL 107, BIOL 113, BIOL 206; CHEM 106, CHEM 116; MATH 102, MATH 142; WFSC 101.) Only one KINE 199 may be used as a general elective.

7 Select from directed elective list below.

8 Two courses in the major must be designated as writing intensive.
Bioinformatics - Minor

In the early 21st century we have gained the ability to decipher and manipulate the genetic information of organisms. We have also seen dramatic advances in imaging technologies from the macro to nano scales (Satellites/UAVs, hyper-spectral imaging, GPS, MRI, confocal and two photon microscopy, x-ray crystallography, etc.). Concomitant with, and underlying these advances, has been a revolution in information technology in which we have seen ever accelerating computational processing speeds and ever more massive data sets. These changes are driving a fundamental transformation of the biological sciences. In order to provide our students with the educational foundation they need to not just flourish, but to lead in this dramatically altered environment, we are offering a minor in the area of Bioinformatics to provide effective training at the interface of biological applications and computational tools. While students will be trained using the most advanced tools and applications available, the minor will focus on core concepts and approaches, to provide a durable skill set that can be applied to new tools and applications that will inevitably develop. The core curriculum of the minor will cover the essentials of effective computation, as well as the handling, exploration and utilization of large data sets.

</tbody>
</table>

Minimum of 16 hours required. Minimum of 6 hours at the 300- to 400-level. Must make a grad of ‘C’ or better in all required Bioinformatics minor courses. Students must complete at least one course in each of the five categories. If a course in statistics in not already required for a student’s major, then STAT 211, STAT 301, STAT 302 or STAT 303 is strongly recommended. Independent research experiences through 491 courses is encouraged.

Biology - Minor

A minor in Biology should represent coursework taken in the discipline beyond courses that might be used to satisfy core curriculum science requirements (8 credits). Therefore, though BIOL 111 and BIOL 112 are prerequisites to all of the listed courses, they are not considered part of the minor program. Some coursework will require organic chemistry and C’s or better are required in each course completed for the minor. The coursework listed represents various sub-disciplines within the field of Biology and would give the student an overall knowledge base fitting a minor in Biology.

Program Requirements

Students must have a C average in all courses taken for a minor in Biology. BIOL 484, BIOL 491 and BIOL 485 credits will not be allowed to count for the minor, nor used in the Biology GPA calculation.

Pre-Medicine - Minor

This minor is designed for students intending to apply to medical or dental school and who are pursuing a major that does not include the required prerequisite courses in their degree plan. Students majoring in BIMS or pursuing any degree from the Department of Biology are not eligible to pursue this minor.

- BIOL 388 Principles of Animal Physiology

Total Semester Credit Hours 17

¹ If PHYS 207 is selected, 1 hour should be added from PHYS 217/ENGR 217 or PHYS 227.

Department of Chemistry

An understanding of chemistry is critical to an understanding of life and its associated activities. Chemistry and chemical principles profoundly influence the way we live, communicate, and interact with one another, so it is little wonder that a strong background in chemistry provides a solid foundation for a variety of careers of major importance in the twenty-first century. Chemistry is uniquely positioned at the crossroad between the biological and physical sciences. By exploiting their understanding of both realms, chemists and other professionals with strong backgrounds in chemistry have made, and continue to make, major contributions to improve the human condition. Major technological and biological discoveries almost always depend on a fundamental understanding of chemistry and the pursuit of these discoveries, as a way to improve the world in which we live, drives those who seek to be a part of the process.

The Department of Chemistry offers coursework and research in all the major areas of chemistry, organized into programs leading to the degrees of Bachelor of Arts and Bachelor of Science. Both degree programs are suitable as terminal degree programs as well as for preparation for more advanced study in chemistry and related areas or as preparation for many professional programs in a variety of career fields. The BS program is more rigorous with respect to required mathematics and chemistry courses. It is particularly appropriate for those students who plan a career in the chemical industry or who intend to pursue advanced degrees in chemistry, biochemistry, chemical physics or forensics. An attractive number of free electives in this degree program allows students to take courses in interdisciplinary focus areas. The BA program offers the greatest degree of flexibility for students who see chemistry as a springboard into a related career field such as medicine, pharmacy, law, science writing, teaching or business for example. Chemistry majors are counseled by PhD chemistry faculty advisors fully familiar with the many options available in the chemistry and other departments, so as to optimize each student’s program of study to meet individual needs. The Department of Chemistry (http://chem.tamu.edu) website provides additional information about the degree plans, advising, and career opportunities for chemistry majors.

Although students may choose a variety of electives and/or minors in either the BA or BS degree programs, the following chemistry tracks have been developed to guide students in choosing electives.

Chemistry Tracks

In addition to the traditional BS degree (which allows for optional minors) and the traditional BA degree (minor required), the Department of Chemistry offers six tracks to guide students in their selection of electives for particular career paths in biological chemistry, environmental chemistry, materials chemistry, chemical education, medicine, dentistry and pharmacy. A traditional minor requires that all minor courses must be taken from the same department and approved by the department granting the minor. These tracks provide the student an opportunity to replace a traditional minor with a broad spectrum of elective courses focused, not in a single department, but in an area of emphasis. A list of the recommended elective courses for each track may be obtained from the Office of the Undergraduate Advisor in Room 104 Chemistry Building or from the Department of Chemistry (http://chem.tamu.edu) website.

Cooperative Education Program in Chemistry

Under suitable circumstances, chemistry majors may participate in a cooperative education program in which the student alternates periods of attendance at the University with periods of employment in industry. This year-round cooperative program of college study and industrial experience is educationally enriching and meaningful, and also has the benefit of providing substantial financial assistance to the student without unduly prolonging the completion of the BS or BA degree program.

Faculty

Altemose, Alicia, Lecturer
Chemistry
PHD, Penn State University, 2020

Banerjee, Sarbajit, Professor
Chemistry
PHD, State University of New York at Stony Brook, 2004

Barondeau, David P, Associate Professor

- Bachelor of Science in Chemistry, Environmental Chemistry Track (p. 710)
- Bachelor of Science in Chemistry, Materials Chemistry Track (p. 712)

**Minors**

- Minor in Chemistry (p. 713)
Chemistry - BA

The Bachelor of Arts program, through the availability of a generous number of electives, gives the student a firm and broadly-based foundation in chemistry, with the option of pursuing other educational objectives involving specialization in at least one other field in depth. This objective is accomplished by means of the BA program flexibility and by the inclusion of a minor area of study in another discipline. Additional elective hours allow further diversification.

The BA degree offers somewhat more flexibility than the BS program, in terms of tailoring a program of study that combines chemistry with an interest in subject areas such as biochemistry, biology, business, computer science, education, forensics, medicine or physics. Although the BA program may in any specific case turn out to be a somewhat less technical curriculum, it meets the needs of many students who plan to use chemistry as a springboard to a career in chemical sales, marketing, law, technical writing, teaching at a pre-college level, science journalism, etc., to name only a few possibilities.

A BA degree in Chemistry coupled with a minor in Biology, or completion of a biological chemistry track, is excellent preparation for a variety of careers in the health-related disciplines. In particular, a BA degree in Chemistry is excellent and proven preparation for medical and dental schools, and affords the superior student the opportunity to maintain flexibility for a broad spectrum of medical or dental careers.

Although not required for the BA program, abundant research opportunities are available to students. The BA program also permits and encourages non-technical elective courses.

1. Choose a section designated for chemistry majors.
2. Students may substitute any 6 hours of American history courses approved by the University Core Curriculum to fulfill this requirement, but no more than 3 hours may be in Texas history. Students seeking teacher certification must take HIST 105 and HIST 106.
These electives must include 12 hours which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum. In addition, 3 hours of courses must be in the area of international and cultural diversity and 3 hours must be in the area of cultural discourse. These may be in addition to the previous 12 hours of University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Additional elective hours must be used to complete a required minor approved by the granting department or students must satisfy the requirements of one of the approved chemistry track programs. BA chemistry majors may take CHEM 485 or CHEM 491 as elective courses. The total hours of CHEM 485 and CHEM 491 taken on a graded (A-F) basis may not exceed 9. Additional hours of these courses may be taken on an S/U basis. A maximum of 6 hours of these courses may be included on the degree plan. Electives should be chosen in consultation with the chemistry advisor, and should be selected to meet the residency requirement (36 hours at 300-400-level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.

Chemistry - BA, Biological Chemistry or Medical, Dental, Pharmacy School Track

Many students planning to enter medical, dental, or pharmacy school prefer a bachelor of arts degree that contains a large number of elective courses that may be used to satisfy pre-professional school requirements. With that in mind, this track provides an effective way to use some of the available free electives in the BA chemistry program to satisfy the pre-professional requirements for these programs. Courses in anatomy, biochemistry, biology, genetics, and microbiology are included. Additional free electives, of which there will be many, may be used to strengthen the student’s program of study in a manner decided by the student and the academic advisor.

### Chemistry - BA, Chemical Education Track

The Chemical Education Track provides the student an opportunity to obtain secondary teacher certification in addition to completion of the requirements for a degree in chemistry. Many students who plan to become high school chemistry teachers or to pursue a master's degree in chemical education will find this track attractive. Students must complete the requirements for secondary teacher certification as defined by the College of Education and Human Development (consultation with the College of Education and Human Development is required).

Chemistry - BA, Environmental Chemistry Track

This Environmental Chemistry Track contains a very large number of elective courses and provides even greater opportunity for students to select electives which provide for a career focus in environmental chemistry. The large number of electives makes it possible for students to combine interests in environmental issues with other interests such as business, law, and politics. Electives may be chosen from recommended courses in atmospheric sciences, bioenvironmental science, biology, geology, geosciences, microbiology and oceanography.

Students may wish to choose electives suggested in the biological or environmental chemistry tracks. This degree program satisfies fully the accreditation requirements of the American Chemical Society. This is a designated C- or W-course. These electives must include 12 hours which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum. In addition, 3 hours of courses must be in the area of International and Cultural Diversity and 3 hours must be in the area of Cultural Discourse. These may be in addition to the previous 12 hours of University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Additional elective hours must be used to complete a required minor approved by the granting department or students must satisfy the requirements of one of the approved chemistry track programs. BA chemistry majors may take CHEM 485 or CHEM 491 as elective courses. The total hours of CHEM 485 and CHEM 491 taken on a graded (A-F) basis may not exceed 9. Additional hours of these courses may be taken on an S/U basis. A maximum of 6 hours of these courses may be included on the degree plan. Electives should be chosen in consultation with the chemistry advisor, and should be selected to meet the residency requirement (36 hours at 300-400-level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.

### Chemistry - BS

The BS program in Chemistry is arranged so that a student obtains a comprehensive, solid foundation in all of the major branches of chemistry, combined with a suitable measure of individual flexibility. The latter objective is met in part by a strong emphasis on involving the undergraduate BS chemistry major in exciting, innovative, state-of-the-art research programs. Most students in the BS program become involved in research during their junior year and continue this until graduation. Students frequently receive research scholarships and fellowships, which include opportunities for summer research programs. It is not uncommon for an undergraduate chemistry major to be a coauthor of scientific publications in major research journals before graduation.

Undergraduate chemistry research activities involve substantial use of modern scientific equipment, including major instrumentation. The student involved in this activity also gains considerable insight into the profession by means of substantial individual contact with chemistry department faculty.

The BS degree in Chemistry is the appropriate program for students planning advanced degree programs in chemistry, biochemistry, forensics, chemical physics and other fields. Students planning careers in chemical industry should also choose the BS degree in Chemistry. Students may wish to choose electives suggested in the biological or environmental chemistry tracks. This degree program satisfies fully the accreditation requirements of the American Chemical Society.

- **BICH 411** Comprehensive Biochemistry II 3
- **BICH 440** Biochemistry I 3
- **BICH 441** Biochemistry II 3
- **PHYS 309** Modern Physics 3

Select two of the following: 5
- Communication (p. 26)
- Creative arts (p. 29)
- Cultural discourse (p. 46)
- International and cultural diversity (p. 47)
- Language, philosophy and culture (p. 27)
- Social and behavioral sciences (p. 30)

| Total Semester Credit Hours | 120 |

---

1. Select a section designated for chemistry majors.
2. Students may substitute any 6 hours of American history courses approved by the University Core Curriculum to fulfill this requirement, but no more than 3 hours may be in Texas history. Students seeking teacher certification must take HIST 105 and HIST 106.
3. This is a designated C- or W-course.
4. Must be selected in consultation with an advisor.
5. These electives must include 12 hours of courses which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum (p. 25). In addition, 3 hours of courses must be in the area of International and Cultural Diversity (p. 47) and 3 hours must be in the area of Cultural Discourse (p. 46). These may be in addition to the previous 12 hours of University Core Curriculum (p. 25) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Electives should be chosen in consultation with the chemistry advisor. Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement (36 hours at 300-400 level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.
The total hours of CHEM 485 and CHEM 491 taken by BS chemistry majors on a graded (A–F) basis may not exceed 15. Additional hours of these courses may be taken on a satisfactory/unsatisfactory basis.

Students wishing to complete an American Chemical Society certified degree program must take at least one semester of biochemistry (i.e., BICH 410 or BICH 440).

Chemistry - BS, Biological-Chemistry Track

The biological chemistry track has been designed for students interested in pursuing graduate study in biological chemistry, biochemistry, pharmacology or related fields or a career in the pharmaceutical industry. Students who wish to enter an MD/PhD program or medical, dental or pharmacy school will, in most cases, need to take an additional advanced biology course beyond those recommended for this track and should check the admission requirements for these programs with the Office of Professional School Advising. Courses in biology, biochemistry, genetics and statistics are recommended as electives.

Chemistry - BS, Environmental Chemistry Track

Chemistry plays a major role in most environmental issues and this track recommends electives in a broad spectrum of courses designed to prepare students to address environmental problems from a variety of perspectives. Electives may be chosen from recommended courses in atmospheric sciences, bioenvironmental science, biology, geography, geology, microbiology and oceanography.

| Semester Credit Hours | 15 |

| Semester Credit Hours | 120 |

1. Select a section designated for chemistry majors.
2. Students may substitute any 6 hours of American history courses approved by the University Core Curriculum (p. 25) to fulfill this requirement, but no more than 3 hours may be in Texas history.
3. Students seeking teacher certification must take HIST 105 and HIST 106.
4. This is a designated C- or W-course.
5. Must be selected in consultation with an advisor.
These electives must include 12 hours of courses which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum (p. 25). In addition, 3 hours of courses must be in the area of International and Cultural Diversity (p. 47) and 3 hours must be in the area of Cultural Discourse (p. 46). These may be in addition to the previous 12 hours of University Core Curriculum (p. 25) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Electives should be chosen in consultation with the chemistry advisor. Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement (36 hours at 300-400 level must be taken at TAMU). Electives recommended in the various track programs should be considered.

The total hours of CHEM 485 and CHEM 491 taken by BS chemistry majors on a graded (A–F) basis may not exceed 15. Additional hours of these courses may be taken on a satisfactory/unsatisfactory basis.

Students wishing to complete an American Chemical Society certified degree program must take at least one semester of biochemistry (i.e., BICH 410 or BICH 440).

## Chemistry - BS, Materials Chemistry Track

The Department of Chemistry offers a Bachelor of Science in Chemistry with a Materials Chemistry Track. In materials chemistry, molecular-level understanding drives the design, synthesis, and characterization of materials with interesting and useful properties. Insight into catalytic, electronic, optical, or structural characteristics of substances allows them to be tailored for different applications. This track includes a breadth of coverage in both hard and soft materials and prepares students for further study in materials chemistry or employment in a variety of industries.

¹ Students may take this course in the fall or spring semester.
² Students must complete at least 12 semester credit hours of these courses.
³ Students must complete at least 6 semester credit hours of this course.
⁴ Students must complete at least 15 semester credit hours of these courses.
⁵ Students must complete at least 9 semester credit hours of this course.

---

The course PHYS 226 is included in the list of courses that can be taken for the Materials Chemistry Track. This course provides an introduction to the physics of motion laboratory for the sciences, covering concepts such as Newtonian mechanics, electricity, and magnetism. It is an essential component of the Materials Chemistry Track, as it helps students understand the physical principles underlying the behavior of materials. The course requires 1 semester credit hour and is typically taken in the fall semester of the second year of study.

---

Additionally, the course PHYS 207 is included in the list of courses that can be taken for the Materials Chemistry Track. This course provides an introduction to the physics of motion laboratory for the sciences, covering concepts such as Newtonian mechanics, electricity, and magnetism. It is an essential component of the Materials Chemistry Track, as it helps students understand the physical principles underlying the behavior of materials. The course requires 3 semester credit hours and is typically taken in the fall semester of the first year of study.

Total Semester Credit Hours 120

---

1. Select a section designated for chemistry majors.
2. Students may substitute any 6 hours of American history courses approved by the University Core Curriculum (p. 25) to fulfill this requirement, but no more than 3 hours may be in Texas history. Students seeking teacher certification must take HIST 105 and HIST 106.
3. This is a designated C- or W-course.
4. In consultation with an advisor, choose 12 hours from among CHEM 220; CHEM 462; CHEM 470; MEEN 222/MSEN 222 OR BMEN 343, MEEN 458
5. Must be selected in consultation with an advisor.
6. These electives must include 12 hours of courses which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum (p. 25). (See page 17). In addition, 3 hours of courses must be in the area of International and Cultural Diversity (p. 47) and 3 must be in the area of Cultural Discourse (p. 46). These may be in addition to the previous 12 hours of University Core Curriculum (p. 25) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Electives should be chosen in consultation with the chemistry advisor. Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement (36 hours at 300-400 level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.
7. The total hours of CHEM 485 and CHEM 491 taken by BS chemistry majors on a graded (A–F) basis may not exceed 15. Additional hours of these courses may be taken on a satisfactory/unsatisfactory basis.
8. Students wishing to complete an American Chemical Society certified degree program must take at least one semester of biochemistry (i.e., BICH 410 or BICH 440).

## Chemistry - Minor

Students seeking a minor in chemistry must complete the Declaration of Minor in Chemistry form and have it approved by the undergraduate advisor in chemistry (Room 104 Chemistry) and their academic advisor. A minor in Chemistry should represent course work taken in the discipline beyond courses that might be used to satisfy core curriculum science requirements (8 credits). Therefore, though CHEM 119 or CHEM 107/CHEM 117 and CHEM 120 are prerequisites to all of the listed courses, they are not considered part of the minor program. The course work listed (17-20 credits) represents various sub-disciplines within the field of Chemistry and would give the student an overall knowledge base fitting a Minor in Chemistry. This is consistent with the statement on minors published by the American Chemical Society.

## Program Requirements

The student will choose five lecture courses (14-15 credits) and three laboratory courses (3-5 credits) from categories A.-E. below. The student must take at least one course from four of the five categories. Students must have a C average in all courses taken for a minor in Chemistry. CHEM 491 and CHEM 485 credits will not be allowed to count for the minor nor used in the Chemistry GPA calculation. Substitution of courses without the CHEM prefix will not be allowed.

1. Students may not count both CHEM 315 and CHEM 316.
2. Students may only count one from CHEM 310, CHEM 322, or CHEM 327.

Department of Mathematics

The Department of Mathematics offers curricula which lead to the following undergraduate degrees: Bachelor of Science in Applied Mathematical Sciences, Bachelor of Arts in Mathematics and Bachelor of Science in Mathematics. A combined baccalaureate/graduate degree program is also offered.

The curriculum for the BS in Applied Mathematical Sciences includes courses in economics, industrial engineering, statistics, computer science and mathematics. A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to modern technological industries and/or modern financial markets. On the other hand, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate programs. Advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

With carefully chosen electives in education, any one of the above three degree plans can lead to teacher certification. Students interested in teacher certification may find the BA degree plan the most suitable since this degree plan offers the greatest flexibility for the inclusion of teacher certification courses.

**Minors**

- Mathematics Minor (p. 737)

**Applied Mathematical Sciences - BS, Actuarial Science Emphasis**

The curriculum in the Bachelor of Science in Applied Mathematical Sciences with an Actuarial Science emphasis explores the application of analytical problem solving tools to challenges in the financial and insurance industries. Students in the Actuarial Science emphasis investigate techniques in applied and pure mathematics and pursue electives in economics and finance that demonstrate how mathematics can be used to model financial concerns in the insurance and related industries.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to modern financial markets. Coursework in the Actuarial emphasis prepares students to take actuarial exams necessary for employment in the actuarial industry. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools. A minor in business or economics is well suited to students in this program. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

</table>

Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107, CHEM 117. The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHM 117, GEO 101/GEOL 102, OCNG 251/OCNG 252.

3 MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

3 Select from any 100-499 course not used elsewhere, except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; ISEN 101; KINE 199; LAND 101; MATH 102-148, MATH 151-166 (p. 1066), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; PSYC 301; STAT 201, STAT 301 - 303 (p. 1154); WFSC 101).

Of the 18 hours shown as University Core Curriculum (p. 25), 3 must be from language, philosophy and culture, 3 from creative arts, 6 from American history, 6 from Government/Political Science.

4 MATH 411 should be taken the semester after taking MATH 221.

5 Except CSCE 222/ECEN 222, CSCE 285, CSCE 289, CSCE 291.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.
Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D’s in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity course (p. 47) s and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Applied Mathematical Sciences - BS, Biological Science Emphasis

The curriculum in the Bachelor of Science in Applied Mathematical Sciences with a Biological Sciences emphasis explores the application of analytical problem solving tools to problems in biology, medicine, and the environment. Students in the Biological Sciences emphasis investigate techniques in applied and pure mathematics and pursue electives in biology and other sciences that demonstrate how mathematics models phenomena in the life sciences.

A student completing this program is prepared for a career in applications of mathematics to the life sciences. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate school or medical school, including Ph.D. programs in Applied Mathematics or Mathematics. A minor in biology is well suited to students in this program. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

Total Semester Credit Hours 120

1. Of the 18 hours shown as University Core Curriculum (p. 25), 3 must be from language, philosophy and culture, 3 from creative arts, 6 from American history, 6 from Government/Political Science.
2. Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117. The remaining 4 hours may be selected from: ASTR 111, ATM 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.
3. MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172. MATH 200 is also highly recommended for math majors co-enrolled in MATH 151, MATH 152, MATH 171 or MATH 172.
4. Select from any 100-499 course not used elsewhere, (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; ISEN 101; KINE 199; LAND 101; MATH 102-148, MATH 151-166 (p. 1066), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205, PSYC 301; STAT 201, STAT 301-303 (p. 1154); WFSC 101).
5. MATH 433 is only offered in Spring semesters.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity course (p. 47) and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

**Applied Mathematical Sciences - BS, Economics Emphasis**

The curriculum in the Bachelor of Science in Applied Mathematical Sciences with an Economics emphasis explores the application of analytical problem solving tools to challenges in business and financial industries. Students in the Economics emphasis investigate techniques in applied and pure mathematics and pursue electives in economics and finance that demonstrate how mathematics can be used to model economic and financial concerns.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to modern financial markets. coursework in the Economics emphasis prepares students to take actuarial exams necessary for employment in the actuarial industry. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools, including Ph.D. programs in Applied Mathematics or Mathematics. A minor in business or economics is well suited to students in this program. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

The department will allow at most two D’s in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity course (p. 47)s and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/ department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

## Applied Mathematical Sciences - BS, Statistics Emphasis

The curriculum in the Bachelor of Science in Applied Mathematical Sciences with a Statistics emphasis explores the application of analytical problem solving tools to concrete problems in the statistical analysis of data. Students in the Statistics emphasis investigate a broad array of techniques in applied and pure mathematics and pursue electives in statistics that demonstrate how mathematics is central to acquiring information from the analysis of data sets.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries or government. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools, including Ph.D. programs in Applied Mathematics or Mathematics. A minor in computer science or statistics is well suited to students in this program. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

The combined program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor's degree and a master's degree within a period of five years after entering Texas A&M. The curriculum in the Bachelor of Science in Applied Mathematical Sciences 5-year program explores the application of analytical problem solving tools to concrete problems in technology and business. Students in this program investigate a broad array of techniques in applied and pure mathematics and pursue electives in related fields, such as computer science and statistics, that demonstrate how mathematics models challenges we face every day.

Among the various advantages of the combined program, upon its completion a student will be in an exceptionally strong position to enter:

- The professional industrial job marketplace;
- A career in secondary education;
- A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

Select from any 100-499 course not used elsewhere, (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; ISEN 101; KINE 199; LAND 101; MATH 102-148, 151-166 (p. 1066), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119; PHYS 201, PHYS 202, PHYS 205; PSYC 301; STAT 201, STAT 301 - 303 (p. 1154); WFS 101).

Of the 18 hours shown as University Core Curriculum (p. 25), 3 must be from language, philosophy and culture, 3 from creative arts, 6 from American history, 6 from Government/Political Science.

Except CSCE 222/ECEN 222, CSCE 285, CSCE 289, CSCE 291.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity course (p. 47)s and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.
The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student’s individual degree plan.

General elective 3
Semester Credit Hours 5
Total Semester Credit Hours 14

Fifth Year
Fall
Graduate Degree 6
Semester Credit Hours 36
Total Semester Credit Hours 36

1. Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117. The remaining 4 hours may be selected from: ASTR 111, ATM 201/ATM 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.

2. MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

3. Select from any 100-499 course not used elsewhere (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; ISEN 101; KINE 199; LAND 101; MATH 102-148, MATH 151-166 (p. 1066), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; PSYC 301; STAT 201, STAT 301 - 303 (p. 1154); WFS 101).

4. Of the 18 hours shown as University Core Curriculum (p. 25), 3 must be from language, philosophy and culture, 3 from creative arts, 6 from American history, 6 from Government/Political Science.

6. This 6 hours will be applied towards both BS and MS degrees in Mathematics.

7. The overall program hours (156 hours) includes 36 hours for a non-thesis option or 32 hours for a thesis option (up to six of which are MATH 691). Up to six hours of graduate courses may double count. MATH 601 is prohibited for all graduate degree plans. Except for the MS teaching track, no distance class may be used on the degree plan nor may MATH 696 appear. For the MS teaching track, students must take four distance courses: MATH 629, MATH 645, MATH 646 and MATH 696. All five tracks require at least 24 credit hours of mathematics of which at most six may be undergraduate. Depending on the MS track, courses outside of mathematics may be required or optional. For additional information, reference https://www.math.tamu.edu/graduate/masters (https://www.math.tamu.edu/graduate/master/) and select the track of interest.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151 / MATH 171, MATH 152 / MATH 172, MATH 221 / MATH 251 / MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity course (p. 47)'s and 3 hours of Cultural Discourse (p. 46). A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

**Mathematics - BA**

The curriculum in the Bachelor of Arts in Mathematics affords students to undertake a traditional liberal arts education in mathematics. Students in this program investigate a broad array of techniques in mathematics and pursue electives in related fields that demonstrate how mathematics is fundamental to the world at large. The degree is well suited for students interested in pursuing mathematics and some other area, and a minor field of study is required for this degree.

A student completing this program is prepared to enter the professional work force, or with appropriately chosen electives, to pursue professional degrees in various fields, including education, law, and medicine. Students in this degree can also pursue teaching certification programs. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

Total Semester Credit Hours 120

1 Of the 21 hours shown as University Core Curriculum (p. 25), 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from Government/Political Science.

2 Select 4 hours from: ASTR 111, BIOL 111, BIOL 112,
CHEM 119, CHEM 120, CHEM 107/CHM 117,
PHYS 207/PHYS 227. The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112,
CHEM 119, CHEM 120, CHEM 107/CHM 117, GEOL 101/GEOL 102,
OCNG 251/OCNG 252, PHYS 207/PHYS 227.

3 MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

4 Select from any 100-499 course not used elsewhere, (except
ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119;
BMEN 101; ISEN 101; KINE 199; LAND 101; MATH 102 - 148, MATH 151 - 166 (p. 1066), MATH 304, MATH 309, MATH 311, MATH 365,
MATH 366, MATH 367, MATH 375, MATH 376; PHYS 109/ASTR 109,
PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; PSYC 301;
STAT 201, STAT 301, STAT 302, STAT 303; WFSC 101).

5 A 15-18-hour minor field of study should be selected in conference with a departmental advisor.

6 Nine of the 12 hours of math elective courses are to be from any 400- or 600-level MATH, excluding MATH 401 and MATH 601
The last three hours can be from any 400- or 600-level MATH (excluding MATH 401 or MATH 601), STAT 335 - STAT 482 (p. 1154),
CSCE 210 - CSCE 470 (p. 946) (excluding CSCE 222/ECEN 222,
CSCE 285, CSCE 289, CSCE 291), or ISEN 320 - ISEN 430, (p. 1032)
excluding any 485 course in any department without permission of a departmental advisor. Students seeking secondary certification
must take MATH 403, MATH 467, and either MATH 415 or MATH 433.
Students who plan to attend graduate school are encouraged to take MATH 416, MATH 447 and at least one 600-level course.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437, or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172,
MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308,
this course must be immediately retaken and a grade of C or better earned. The department will allow at most two Ds in upper-level (325-499)
courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47), and 3 hours of Cultural Discourse (p. 46). A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.
Mathematics - 5-Year Bachelor of Arts/Master of Science in Mathematics

The combined degree program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor’s degree and a master’s degree within a period of five years after entering Texas A&M. The curriculum in the Bachelor of Arts in Mathematics 5-year combined program affords students to undertake a traditional liberal arts education in mathematics. Students in this program investigate a broad array of techniques in mathematics and pursue electives in related fields that demonstrate how mathematics is fundamental to the world at large. The degree is well suited for students interested in pursuing mathematics and some other area, and a minor field of study is required for this degree.

Among the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

- The professional industrial job marketplace;
- A career in secondary education;
- A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student’s individual degree plan.

1 Of the 21 hours shown as University Core Curriculum (p. 25), 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from Government/Political Science.

2 Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, PHYS 207/PHYS 227. The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252, PHYS 207/PHYS 227.

3 MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

4 Select from any 100-499 course not used elsewhere, (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; ISEN 101; KINE 199; LAND 101; MATH 102-148, 151-166 (p. 1066), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; PSYC 301; STAT 201, STAT 301 - 303 (p. 1154); WFSC 101).

5 A 15-18 hour minor field of study should be chosen in conference with a departmental advisor.

6 Except CSCE 222/ECEN 222, CSCE 285, CSCE 289, CSCE 291.

7 This 6 hours will be applied towards both BA and MS degrees in Mathematics.

8 The overall program hours (156 hours) includes 36 hours for a non-thesis option or 32 hours for a thesis option (up to six of which are MATH 691). Up to six hours of graduate courses may double count. MATH 601 is prohibited for all graduate degree plans. Except for the MS teaching track, no distance class may be used on the degree plan nor may MATH 696 appear. For the MS teaching track, students must take four distance courses: MATH 629, MATH 645, MATH 646 and MATH 696. All five tracks require at least 24 credit hours of mathematics of which at most six may be undergraduate. Depending on the MS track, courses outside of mathematics may be required or optional. For additional information, reference https://www.math.tamu.edu/graduate/masters/ and select the track of interest.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two Ds in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Mathematics - BS

The curriculum in the Bachelor of Science in Mathematics explores mathematical problems and their interplay with science and engineering. Students in this program investigate a broad array of techniques in pure mathematics and pursue electives in science and related fields that demonstrate the crucial underpinnings of mathematics in our understanding of information, science, and technology.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries or modern financial markets. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools, including Ph.D. programs in Mathematics. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

**Total Semester Credit Hours**: 120

---

1. Of the 21 hours shown as University Core Curriculum (p. 25), 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from Government/Political Science.
2. Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117. The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCGN 251/OCGN 252.
3. MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.
4. Select from any 100-499 course not used elsewhere, (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; ISEN 101; KINE 199; LAND 101; MATH 102-148, MATH 151 - 166 (p. 1066), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376, PHYS101-125,PHYS 201, PHYS 202, PHYS 205; PSYC 301; STAT 201, STAT 301-303 (p. 1154), WFSC 101).
Six (6) hours must be selected from BICH 401-489 (p. 916); BIOL 200-470 (p. 919); CHEM 222-474 (p. 929); CSCE 206, CSCE 221, CSCE 411, CSCE 421/STAT 421; GENE 301-452 (p. 999); OCNG 251-252, 404-420 (p. 1104); PHYS 221, 302-305, 307-314, 324-428 (p. 1115); STAT 211, STAT 212, STAT 335/CSCE 320, STAT 408. Four (4) hours must be selected from ASTR 111; BICH 401-489 (p. 916); BIOL 111, BIOL 112, BIOL 200-470, 318-438 (p. 919); CHEM 119, CHEM 120, CHEM 222-474 (p. 929); CSCE 110, CSCE 111, CSCE 121, CSCE 206, CSCE 221; GENE 301-452 (p. 999); OCNG 251, OCNG 252, OCNG 404-420 (p. 1104); PHYS 221, 302-305, 307-314, 324-428 (p. 1115).

Twelve hours must be selected from MATH 407-499 (p. 1066) or any 600-level MATH (excluding MATH 601). Students are required to take at least one of the following: MATH 427, MATH 431, MATH 436, MATH 439. Students are encouraged to take MATH 412, MATH 414, MATH 442, or MATH 470. Students who plan to attend graduate school are encouraged to take MATH 447 and at least one 600-level course. Departmental permission is required to take MATH 485 or MATH 491, or to enroll in a 600-level MATH course.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D’s in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned. Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Mathematics - 5-Year Bachelor of Science/Master of Science in Mathematics

The combined degree program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor’s degree and a master’s degree within a period of five years after entering Texas A&M. The curriculum in the Bachelor of Science in Mathematics 5-year combined program explores mathematical problems and their interplay with science and engineering. Students in this program investigate a broad array of techniques in pure mathematics and pursue electives in science and related fields that demonstrate the crucial underpinnings of mathematics in our understanding of information, science, and technology.

Among the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

- The professional industrial job marketplace;
- A career in secondary education;
- A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student’s individual degree plan.

</tr>
<tr>
<td>MATH 400-499 (p. 1066) 2, 3</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total Semester Credit Hours 16

1 Only one of MATH 221, MATH 251, or MATH 253 can be taken to satisfy the minor, due to the course content.
2 Only one of MATH 304, MATH 309, MATH 311 or MATH 323 can be taken to satisfy the minor, due to the course content.
3 All 300-400 level MATH courses MUST be taken at Texas A&M University. No transfer work will be accepted.

Students must make a grade of C or better in all courses.

MATH 142, MATH 168, MATH 365, MATH 366, MATH 367, MATH 396, MATH 403, MATH 419, and MATH 485 may not be used to satisfy the requirements. MATH 485 will receive approval only under exceptional circumstances.

Department of Physics and Astronomy

Physics seeks to understand the fundamental workings of nature, from the constituents of matter deep within the nuclei of atoms, to the most distant galaxies of our expanding universe, to everyday phenomena of emergent complexity, self-organization and chaos. The resulting basic physical knowledge provides a firm foundation for innovations and is often the driving force of advanced technology. Computers, global positioning systems (GPS), the internet, lasers, magnetic resonance imaging (MRI) and other medical diagnostic tools, and space flight, along with many others, were all made possible by key advances in physics.

Physicists have a curiosity that thrives on the challenge of solving problems. Consistent with this, the physics program at Texas A&M strives to teach analytical thinking and quantitative problem-solving skills. This enables students to work productively in physics, in areas closely related to physics, and in a wide variety of areas outside of physics proper. Physicists can be found in almost any discipline that requires complex problem-solving skills. Some engage in cutting-edge research to increase our basic knowledge of the universe. Some apply new-found knowledge to make practical advances in the fields of computer science, medical science and engineering. Still others use their knowledge to advocate, advise, inform, instruct and administrate as lawyers, consultants, journalists/writers, teachers and managers.

Mathematics - Minor

The Minor in Mathematics program enables non-mathematics majors to complete a course of study that highlights fundamental techniques and applications of mathematics. The mathematics minor begins with Calculus II (MATH 148, MATH 152, or MATH 172) and involves middle-level and upper-level coursework in mathematics, aimed at a broad view of topics.

Students wishing to earn a minor in mathematics do not need to visit the Mathematics Department to do so. They should see their advisor, and inform them of their intention to earn a minor in mathematics, and to have that information entered into COMPASS.

The department also wants to point out to students who are majoring in engineering or one of the sciences that it might not take more than another 18 to 24 hours to obtain a double major in mathematics. If that is of interest to you, contact the Mathematics Undergraduate Program Office.
The Department of Physics and Astronomy offers two undergraduate degree programs, a Bachelor of Arts and a Bachelor of Science, as well as minors in Astrophysics and Physics. The Bachelor of Science degree includes tracks in Astrophysics, Business, and Computational Science in addition to a no-track option. The Department of Physics and Astronomy also offers Master of Science degrees in Astronomy and Physics, and Doctor of Philosophy degrees in Applied Physics, Astronomy and Physics.

The faculty members of the department carry out theoretical and experimental research in the areas of astronomy and astrophysics, atomic, molecular and optical physics, computational physics, cosmology, high-energy and elementary particle physics, condensed matter physics and materials science, nuclear physics, quantum optics, and physics education. During the course of their undergraduate experience at Texas A&M, Physics majors have the opportunity to work with faculty in all of these areas.

Faculty

Abanov, Artem G, Associate Professor
Physics & Astronomy
PHD, Texas A&M University, 1998

Agnolet, Glenn, Professor
Physics & Astronomy
PHD, Cornell University, 1983

Akimov, Alexey, Assistant Professor
Physics & Astronomy
PHD, Moscow Institute of Technology, 2003

Allen, Roland E, Professor
Physics & Astronomy
PHD, University of Texas at Austin, 1969

Bassichis, William H, Professor
Physics & Astronomy
PHD, Case Western Reserve University, 1963

Becker, Katrin, Professor
Physics & Astronomy
PHD, University of Bonn, 1994

Becker, Melanie, Professor
Physics & Astronomy
PHD, University of Bonn, Germany, 1994

Belyanin, Alexey A, Professor
Physics & Astronomy
PHD, Institute of Applied Physics Russian Academy of Sciences, 1995

Chin, Siu A, Professor
Physics & Astronomy
PHD, Massachusetts Institute of Technology, 1975

Depoy, Darren L, Professor
Physics & Astronomy
PHD, University of Hawaii at Manoa, 1987

Dutta, Bhaskar, Professor
Physics & Astronomy
PHD, Oklahoma State University, 1995

Erukhimova, Tatiana L, Instructional Professor
Physics & Astronomy
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1999

Eusebi, Ricardo, Professor
Physics & Astronomy
PHD, University of Rochester, 2006

Finkelstein, Alexander, Professor
Physics & Astronomy
PHD, Landau Institute for Theoretical Physics, 1972

Ford, Albert L, Professor
Physics & Astronomy
PHD, University of Texas at Austin, 1972

Fries, Rainer J, Professor
Physics & Astronomy
PHD, University of Regensburg, Germany, 2001

Fry, Edward S, Distinguished Professor
Physics & Astronomy
PHD, University of Michigan, 1969

Gagliardi, Carl A, Professor
Physics & Astronomy
PHD, Princeton University, 1982

Holt, Jeremy W, Assistant Professor
Physics & Astronomy
PHD, Stony Brook University, 2008

Kamon, Teruki, Professor
Physics & Astronomy
PHD, University of Tsukuba, 1986

Katzgraber, Helmut G, Professor
Physics & Astronomy
PHD, University of California-Santa Cruz, 2001

Kennicutt, Robert Charles, Professor
Physics & Astronomy
PHD, University of Washington, 1978

Khmelenko, Vladimir, Research Professor
Physics & Astronomy
PHD, Institute of Chemical Physics, 1984

Ko, Che-Ming, University Distinguished Professor
Physics & Astronomy
PHD, State University of New York at Stony Brook, 1973

Kocharovskaya, Olga A, Distinguished Professor
Physics & Astronomy
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1986

Kocharovsky, Vitaly V, Professor
Physics & Astronomy
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1986

Krisiciunas, Kevin L, Instructional Associate Professor
Physics & Astronomy
PHD, University of Washington, 2000
Lee, David M, University Distinguished Professor
Physics & Astronomy
PHD, Yale University, 1959

Lyukysutov, Igor F, Professor
Physics & Astronomy

Macri, Lucas M, Professor
Physics & Astronomy
PHD, Harvard University, 2001

Mahapatra, Rupak K, Professor
Physics & Astronomy
PHD, University of Minnesota, 2000

Marshall, Jennifer L, Assistant Professor
Physics & Astronomy
PHD, Ohio State University, 2006

McIntyre, Peter M, Professor
Physics & Astronomy
PHD, University of Chicago, 1973

Melconian, Daniel G, Professor
Physics & Astronomy
PHD, Simon Fraser University, 2006

Mioduszewski, Saskia, Professor
Physics & Astronomy
PHD, University of Tennessee, 1999

Mirabolfathi, Nader, Research Associate Professor
Physics & Astronomy
PHD, University of Paris XI, 2002

Naugle, Donald G, Professor
Physics & Astronomy
PHD, Texas A&M University, 1965

Nodurft, Dawson, Instructional Assistant Professor
Physics & Astronomy
PHD, Texas A&M University, 2019

Papovich, Casey J, Professor
Physics & Astronomy
PHD, Johns Hopkins University, 2002

Pokrovsky, Valery, Distinguished Professor
Physics & Astronomy
PHD, Tomsk State University, 1957

Pope, Christopher N, Distinguished Professor
Physics & Astronomy
PHD, University of Cambridge, 1980

Rapp, Ralf F, Professor
Physics & Astronomy
PHD, Rheinische Friedrich-Wilhelma University, Bonn, 1996

Rogachev, Grigory V, Professor
Physics & Astronomy
PHD, National Research Centre, 1999

Ross Jr, Joseph H, Professor
Physics & Astronomy
PHD, University of Illinois at Urbana-Champaign, 1986

Safonov, Alexei N, Professor
Physics & Astronomy
PHD, University of Florida, 2001

Saslow, Wayne M, Professor
Physics & Astronomy
PHD, University of California - Irvine, 1968

Schuessler, Hans A, Professor
Physics & Astronomy
PHD, Universitat Heidelberg, 1964

Scully, Marlan O, Distinguished Professor
Physics & Astronomy
PHD, Yale University, 1966

Sezgin, Ergin, Professor
Physics & Astronomy
PHD, State University of New York at Stony Brook, 1980

Sokolov, Alexei V, Professor
Physics & Astronomy
PHD, Stanford University, 2001

Strigari, Louis E, Associate Professor
Physics & Astronomy
PHD, Ohio State University, 2005

Suntzeff, Nicholas B, University Distinguished Professor
Physics & Astronomy
PHD, University of California - Santa Cruz, 1980

Teizer, Winfried, Professor
Physics & Astronomy
PHD, University of Massachusetts - Amherst, 1998

Toback, David, Professor
Physics & Astronomy
PHD, University of Chicago, 1997

Tribble, Robert E, Senior Professor
Physics & Astronomy
PHD, Princeton University, 1973

Walsh, Jonelle L, Assistant Professor
Physics & Astronomy
PHD, University of California, Irvine, 2011

Wang, Lifan, Professor
Physics & Astronomy
PHD, University of Science and Technology of China, 1993

Webb, Robert C, Professor
Physics & Astronomy
PHD, Princeton University, 1972

Weimer, Michael B, Professor
Physics & Astronomy
PHD, California Institute of Technology, 1986
Majors

- Bachelor of Arts in Physics (p. 740)
- Bachelor of Science in Physics (p. 741)
- Bachelor of Science in Physics, Astrophysics Track (p. 742)
- Bachelor of Science in Physics, Business Track (p. 743)
- Bachelor of Science in Physics, Computational Science Track (p. 744)

Minors

- Astrophysics Minor (p. 745)
- Physics Minor (p. 746)

Physics - BA

The Bachelor of Arts curriculum provides the student with a firm foundation in physics and with the flexibility to choose from a large number of elective courses, thus permitting the student to explore other interests. Some of these elective courses are chosen to satisfy the requirements of a minor field of study. The student can, therefore, customize his or her program of study in preparation for a career in any science-related or science-required field, from intellectual property law and science reporting to physics teaching. Although not required for the BA program, students have the opportunity to become directly involved in any of the active research programs in the Department of Physics and Astronomy.

Creative arts (p. 29)  
1  
General electives  
1  
Semester Credit Hours 15  
Total Semester Credit Hours 120  

1 A physics major must complete the foundation courses (PHYS 101, PHYS 206/PHYS 226, PHYS 207/PHYS 227, PHYS 221, PHYS 309, PHYS 331, CHEM 107/CHEM 117, MATH 171, MATH 172, MATH 221, MATH 308) with a grade of C or better and have a 2.0 cumulative GPR before taking non-foundation upper-level physics courses.  
2 Any course in this category from the approved University Core Curriculum list of courses.  
3 A minor is required and, along with other free electives, should be chosen in consultation with the student’s advisor. Three hours must be in the area of International and Cultural Diversity (p. 47), and three hours must be in the area of Cultural Discourse (p. 46). These may be in addition to other University Core Curriculum courses, or if a course in this category satisfies another area of the Core, it can be used to meet both requirements. Electives may be selected from any 100-499 course not used elsewhere, except ENGL 103, MATH 100-148, MATH 165-166, MATH 365, MATH 366 (p. 1066); PHYS 201, PHYS 202.  
4 Any approved Communication course, except THAR 407.  
5 PHYS 327 is an approved W course. PHYS 328 is an approved C course.  
6 To register for PHYS 401 a student must be able to program in a high level language.  
7 Any upper-division course within the College of Science, College of Geosciences or College of Engineering (except 485/491).  

Physics - BS  
The Bachelor of Science curriculum is more rigorous in its physics and mathematics course requirements than the Bachelor of Arts. Currently it has a no track option and three track options. The BS in Physics (no track) is designed primarily for students who wish to pursue an advanced degree in physics or employment as a professional physicist in an industrial setting. The department also offers tracks in Astrophysics, Business, and Computational Science for those who plan to seek an employment or advanced degrees in these fields. Each track results in the BS in Physics degree and has the same core physics courses and the same total number of hours. Because physics forms the basis of many other sciences such as astronomy, chemistry, material science, oceanography, nano-engineering and geophysics, the BS program is excellent preparation for advanced degrees in these fields. In addition, physicists are increasingly applying their talents to molecular biology, biochemistry and medicine. An important part of the BS program is student participation in experimental or theoretical research guided by faculty.

Physics - BS, Astrophysics Track

The BS-PHYS, Astrophysics track will provide you with a solid foundation in basic physics combined with knowledge of fascinating astrophysical objects and phenomena. It will prepare you for graduate studies in Astronomy, Astrophysics, and related fields. You will also learn quantitative problem-solving skills, experimental research skills, and expertise in computer simulations that are highly valued in any field and any industry.

A Physics major must complete the foundation courses (PHYS 101, PHYS 206/PHYS 226, PHYS 207/PHYS 227, PHYS 221, PHYS 309, PHYS 331, CHEM 107/CHEM 117, MATH 171, MATH 172, MATH 221, MATH 308) with a grade of C or better and have a 2.0 cumulative GPR before taking non-foundation upper-level Physics courses.

Any course in this category from the approved University Core Curriculum list of courses.

Any approved Communication course, except THAR 407.

PHYS 327 is an approved W course. PHYS 328 is an approved C course.

A combination of PHYS 291, PHYS 491, ASTR 291 and ASTR 491 must equal 4 hours. Students with a U1 or U2 classification should take PHYS 291/ASTR 291. Students with a U3 or U4 classification should take PHYS 491/ASTR 491.

Select from ASTR 314, PHYS 414/PHYS 416, PHYS 489, MATH 460, or any graduate offering in PHYS or ASTR.

To register for PHYS 401 a student must be able to program in a high level language.

Any upper-division course within the College of Science, College of Geosciences or College of Engineering (except 485/491).

Electives should be chosen in consultation with the student's academic advisor. Three hours must be in the area of International and Cultural Diversity, and three hours must be in the area of Cultural Discourse. These may be in addition to other University Core Curriculum courses, or, if a course in this category satisfies another area of the Core, it can be used to meet both requirements.

Electives may be selected from any 100-499 course not used elsewhere, except ENGL 103, MATH 100-148, 165-166, 365-366 (http://catalog.tamu.edu/linkurl:/undergraduate/course-descriptions/math/); PHYS 201, PHYS 202.

A student must be able to program in a high level language.

To register for any industry.

**Total Semester Credit Hours**: 120

1. A Physics major must complete the foundation courses (PHYS 101, PHYS 206/PHYS 226, PHYS 207/PHYS 227, PHYS 221, PHYS 309, PHYS 331, CHEM 107/CHEM 117, MATH 171, MATH 172, MATH 221, MATH 308) with a grade of C or better and have a 2.0 cumulative GPR before taking non-foundation upper-level Physics courses.

2. Any course in this category from the approved University Core Curriculum list of courses.

3. Any approved Communication course, except THAR 407.

4. PHYS 327 is an approved W course. PHYS 328 is an approved C course.

5. A combination of ASTR 291 and ASTR 491 must equal 3 hours. Students with a U1 or U2 classification should take ASTR 291. Students with a U3 or U4 classification should take ASTR 491.

6. Electives should be chosen in consultation with the student’s advisor. Three hours must be in the area of International and Cultural Diversity, and three hours must be in the area of Cultural Discourse. These may be in addition to other University Core Curriculum courses, or, if a course in this category satisfies another area of the Core, it can be used to meet both requirements. Electives may be selected from any 100-499 course not used elsewhere, except ENGL 103; MATH 100-148, 165-166, 365-366 (http://catalog.tamu.edulinkurl:/undergraduate/course-descriptions/math/); PHYS 201, PHYS 202.

7. Any upper-division course within the College of Science, College of Geoscience or College of Engineering (except 485/491).

---

### Physics - BS, Business Track

The BS-PHYS, Business Track will help you develop analytical thinking and quantitative problem-solving skills, while providing you with solid knowledge of business disciplines. These qualities are in increasingly high demand at the job market. If you enjoy studying physics and at the same time aspire to become a future business leader in our technology-dominated world, this track is for you.

### Physics - BS, Computational Science Track

Physics and other sciences increasingly rely on advanced computer simulations and data analysis to develop realistic mathematical models of complex phenomena or process huge amounts of data coming from particle accelerators and astronomical surveys. The BS-PHYS, Computational Science track will provide you with the skills to pursue advanced studies in this area or directly enter the workforce in virtually any industry, as the demand for experts with advanced computer skills will only grow with time.

2. Any course in this category from the approved University Core Curriculum list of courses.

3. PHYS 327 is an approved W course. PHYS 328 is an approved C course.

4. Any approved Communication course, except THAR 407.
A physics major must complete the foundation courses (PHYS 101, PHYS 102, PHYS 206/PHYS 226, PHYS 207/PHYS 227, PHYS 221, PHYS 309, PHYS 331, CHEM 107/CHEM 117, MATH 171, MATH 172, MATH 221, MATH 308) with a grade of C or better and have a 2.0 cumulative GPR before taking non-foundation upper-level physics courses.

Any course in this category from the approved University Core Curriculum list of courses.

Any approved Communication course, except THAR 407.

PHYS 327 is an approved W course. PHYS 328 is an approved C course.

Electives should be chosen in consultation with the student's advisor. Three hours must be in the area of International and Cultural Diversity, and three hours must be in the area of Cultural Discourse. These may be in addition to other University Core Curriculum courses, or, if a course in this category satisfies another area of the Core, it can be used to meet both requirements. Electives may be selected from any 100-499 course not used elsewhere, except ENGL 103; MATH 100-148, 165-166, 365-366 (http://catalog.tamu.edulinkurl:/undergraduate/course-descriptions/math/); PHYS 201, PHYS 202.

To register for PHYS 401 a student must be able to program in a high level language.

Any upper-division course within the College of Science, College of Geosciences or College of Engineering (except 485/491).

Astrophysics - Minor

Astrophysics encompasses physical law at the largest scales; from planets in the Solar System and planets around other stars to the evolution of galaxies and the stars that populate them, massive black holes in the center of galaxies, and the origin, growth, and ultimate fate of the Universe. Astrophysics unifies discoveries from many sciences including physics, chemistry, and biology using techniques in statistics, data mining, and applied mathematics.

The minor in Astrophysics helps to prepare students for entry into the competitive science, technology, engineering, and mathematics (STEM) workplace. Students develop technical skills and problem-solving experiences that expand the tools used in the modern, high-technology world. The minor is intended for anyone interested in the mathematical basis of astronomy and is especially relevant for engineering and physics students who will need a basic understanding of the physics of the Universe in their future careers. It is also suitable for students who intend to pursue careers in areas that may benefit from a technical knowledge of astronomy such as science writing, scientific journalism, or science teaching in schools.

Please view the Program Requirements tab above for more information.

To declare a minor in Astrophysics, please contact an advisor in the Department of Physics and Astronomy.

Physics - Minor

A minor in Physics is designed for those who have a strong interest in Physics, but don’t want to make it a profession. It includes a set of classes that will give you a firm foundation in Physics and the ability to pursue a more in-depth study in one of the Physics areas of your choice. The minor in Physics will develop analytical thinking and quantitative problem-solving skills that you can apply in any field. It will also give you the basic knowledge to make informed decisions, advise, instruct, or administrate in our modern science- and technology-dominated world.

To declare a Physics minor, please contact an academic advisor in the Department of Physics and Astronomy.

Program Requirements

Students who wish to complete a minor in physics must satisfy the following requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 206 &amp; PHYS 226</td>
<td>Newtonian Mechanics for Engineering and Science and Physics of Motion Laboratory for the Sciences ¹</td>

<td>17</td>
</tr>
</tbody>
</table>

¹ All Engineering majors will take ENGR 216/PHYS 216 and ENGR 217/PHYS 217 in place of PHYS 226 and PHYS 227.

² Select from PHYS 300-499 (p. 1115) (except PHYS 485 or PHYS 491), or ASTR 314, in consultation with an advisor in the Department of Physics and Astronomy.

Students must make a grade of C or better in all courses.

Department of Statistics

The science of statistics deals with the collection and summarization of data, design of experiments and surveys, measurement of the magnitude of variation in both experimental and survey data, estimation of population parameters with measures of their accuracy and precision, tests of hypotheses about populations and studies of the relationships between two or more variables. While the ideal of science is to achieve a systematic interrelationship of facts, scientific methods must be a pursuit of this ideal by experimentation, observation and logical arguments from various accepted postulates. Thus, the science of statistics is a set of scientific principles and methodologies that are useful in reaching conclusions about populations and processes when the available information is both limited and variable. Hence, statistical principles are useful in all the sciences, both physical and social. Many practical applications of statistics are found in a wide variety of fields, including biology, education, social sciences, engineering, business, government and agriculture.

The Department of Statistics offers training in statistics leading to degrees of Bachelor of Science, Master of Science and Doctor of Philosophy.

Statistics - BS

Statistics is the science of collecting and analyzing data for the purpose of making decisions in the presence of uncertainty. Data are ubiquitous in the modern day and age, and statisticians are in high demand. Multidisciplinary application areas vary widely and include health and medicine, business, engineering, physical sciences, environmental studies, and government. The curriculum in statistics provides instruction in all necessary areas, including a foundation in mathematics and probability, strategies for designing studies and collecting data, the visualization and analysis of data using popular software such as R, SAS and Python, and the process of using sample data to draw conclusions about a population. Depending on the electives selected, a student completing this program will be prepared to enter employment as a statistical analyst or to continue to graduate school in statistics or a related field.

Program Requirements

The following is a suggested schedule that includes the required courses for the BS in Statistics. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Total Semester Credit Hours 120
Two lower-level science courses are to be selected from ASTR 111; BIOL 111; BIOL 112; CHEM 119; CHEM 120; PHYS 206/PHYS 226; PHYS 207/PHYS 227. A third science course (p. 26) is to be selected from any course satisfying the life and physical sciences requirement for the University Core Curriculum.

Select 8 hours from CSCE 110, CSCE 111, CSCE 121, or CSCE 206.

Select 3 hours from COMM 203, COMM 205, or COMM 243, which fulfills the communication (p. 26) requirement for the University Core Curriculum (p. 25).

Three elective hours must be chosen from the approved University Core Curriculum list for language, philosophy and culture (p. 27), three elective hours must be chosen from the approved University Core Curriculum list for creative arts (p. 29), and three elective hours must be chosen from the approved University Core Curriculum list for social and behavior sciences (p. 30). In addition, 3 hours must be in the area of cultural discourse (p. 46), and 3 hours of courses must be in the area of international and cultural diversity (p. 47). These may be in addition to University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements.

Students must take at least one course from the following courses: MATH 300, MATH 302, MATH 308, MATH 409, MATH 410, MATH 417 or MATH 437, MATH 442, MATH 446, MATH 447, MATH 469, MATH 470, ISEN 320, ISEN 340, ISEN 355. The student must take a total of at least 12 hours of mathematics and statistics elective courses.

Students must take 12 hours in an outside specialization area upon approval by a departmental advisor. At least 6 hours must be upper level hours.

Students must take at least two courses from the following courses: STAT 407, STAT 436, STAT 438, STAT 445, STAT 446, STAT 459, STAT 485, STAT 489, STAT 491, ISEN 350. The student must take a total of at least 12 hours of mathematics and statistics elective courses.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 304/MATH 323, STAT 211, or STAT 212, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D’s in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Statistics - 5-Year Bachelor of Science/Master of Science in Statistics

Well-trained statisticians are in high demand in various application areas including health and medicine, business, engineering, physical sciences, environmental studies, and government. The combined degree program enables ambitious and academically talented statistics majors at Texas A&M University to earn both a bachelor’s degree and a master’s degree within a period of five years after entering Texas A&M as a freshman. Depending on the electives selected, a student completing the combined program will be prepared to enter:

- Employment as a statistical analyst or as a data scientist;
- The professional job marketplace for quantitatively trained professionals;
- A career in secondary education;
- A doctoral program in statistics, biostatistics, or in a related discipline, at Texas A&M or another university.

Program Requirements

The Fast Track program enables a Statistics major to earn both a bachelor’s degree (120 undergraduate credit hours including 6 dual credit graduate hours) and a master’s degree (36 credit hours including the 6 dual credit graduate hours) in Statistics within a period of five years after entering Texas A&M. Students can complete the required credit hours for each degree without diminishing scope or quality of work. The scheduling of the graduate level courses is flexible since many of the MS electives are offered during the summer. A student completing this program will be prepared for employment as a senior statistical analyst or to continue to a Ph.D. program in statistics or a related field.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students after completing 96 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Statistics, as well as the courses required by the College of Science and by Texas A&M University for an undergraduate degree.

The following is a suggested schedule that includes the required courses for the combined BS/MS in Statistics. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

**Spring**

Graduate coursework 8 18

Semester Credit Hours 18

Total Semester Credit Hours 156

---

1. Two lower-level science courses are to be selected from ASTR 111; BIOL 111; BIOL 112; CHEM 119; CHEM 120; PHYS 207/PHYS 227; PHYS 206/PHYS 226. A third science course (p. 26) is to be selected from any course satisfying the life and physical sciences requirement for the University Core Curriculum.

2. Select 8 hours from CSCE 110, CSCE 111, CSCE 121, or CSCE 206.

3. Select 3 hours from COMM 203, COMM 205, or COMM 243, which fulfills the communication (p. 26) requirement for the University Core Curriculum (p. 25).

4. Three elective hours must be chosen from the approved University Core Curriculum list for language, philosophy and culture (p. 27), three elective hours must be chosen from the approved University Core Curriculum list for creative arts (p. 29), and three elective hours must be chosen from the approved University Core Curriculum list for social and behavior sciences (p. 30). In addition, 3 hours must be in the area of cultural discourse (CD) and 3 hours of courses must be in the area of international and cultural diversity (p. 47) (ICD). These may be in addition to University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements.

5. The student must take a total of at least 6 hours of mathematics and statistics elective courses. Students must take at least one course from the following list of mathematics courses: MATH 300, MATH 302, MATH 308, MATH 409, MATH 410, MATH 417 or MATH 437, MATH 442, MATH 446, MATH 447, MATH 469, ISEN 320, ISEN 350, ISEN 355. The second elective course can be selected from the previously listed mathematics courses or from the remaining approved University Core Curriculum courses.

6. Students must take 12 hours in an outside specialization area upon approval by a departmental advisor. At least 6 hours must be upper level hours.

7. Students must take STAT 641 and STAT 642. These 6 hours will be used towards both the BS and MS degree in Statistics.

8. The overall program hours (156 hours) includes 36 hours for a non-thesis option or 32 hours for a thesis option (up to six of which are STAT 691). STAT 641 and STAT 642 may double count toward both degrees. The remaining graduate hours must be taken from 600 level STAT courses not including STAT 601, STAT 651, STAT 652, or STAT 658. Students are required to take one semester hour of STAT 681 and two semester hours of STAT 684. For additional information concerning this and other requirements of the master’s program including the Master's diagnostic examination, refer to https://www.stat.tamu.edu/ms-statistics/ (https://www.stat.tamu.edu/ms-statistics/).

Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. STAT 404/STAT 604, STAT 408/STAT 608, STAT 407/STAT 607, STAT 626, STAT 436/STAT 636, STAT 438/STAT 638, STAT 445/STAT 645, STAT 446/STAT 646, STAT 459/STAT 659).

*If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 304/MATH 323, STAT 211, or STAT 212, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

---

**Statistics - Minor**

Statistics is the science of collecting and analyzing data for the purpose of making decisions in the presence of uncertainty. Multidisciplinary application areas vary widely and include health and medicine, business,
engineering, physical sciences, environmental studies, and government. The statistics minor provides training in theoretical, applied and computational statistics with a two-semester sequence in statistical methods (STAT 211/STAT 212) and a broad selection of upper-level elective classes. Depending on the electives selected, a student completing this program will be prepared to conduct statistical analysis in their professional work or to continue graduate study in fields involving statistical analysis.

For additional information, see the Department of Statistics website (http://www.stat.tamu.edu).

Total Semester Credit Hours 15

1 STAT 485 or STAT 489 must be approved by the Statistics Department.

**Additional Requirements:**

Students must make a grade of C or better in all courses.

Substitutions for the minor must be approved by the Statistics Department.

**University Studies Programs**

The College of Science offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

**Majors**

- Bachelor of Science in University Studies, Arts and Sciences Concentration (p. 751)
- Bachelor of Science in University Studies, BioInformatics Concentration (p. 752)
- Bachelor of Science in University Studies, Mathematics for Business Concentration (p. 753)
- Bachelor of Science in University Studies, Mathematics for Pre-Professionals Concentration (p. 753)
- Bachelor of Science in University Studies, Mathematics for Teaching Concentration (p. 754)
- Bachelor of Science in University Studies, Science for Secondary Teaching Concentration (p. 755)

**University Studies - BS, Arts and Sciences Concentration**

The Bachelor of Science in University Studies, Arts and Sciences area of concentration, enables students to craft a personalized interdisciplinary program of study that provides a solid foundation, advanced knowledge and perspective on complex issues pertaining to both Liberal Arts and Sciences.

Students will be able to acquire communication, critical thinking, and problem-solving skills that are critical for lifelong learning and for a broad variety of career paths in today's complex job market. The area of concentration in this degree plan gives complete flexibility to design a course of study, as long as classes are selected from 300- or 400-level offerings from one of our Departments. Two minors are required; one from the College of Liberal Arts and one from the College of Science. Lastly, one full year of a foreign language is part of the program.

This program is approved to be offered at the Texas A&M Higher Education Center in McAllen, Texas.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

**University Studies - BS, BioInformatics Concentration**

The Bachelor of Science in University Studies, BioInformatics area of concentration aims to provide a solid foundation in Biology along with a foundation in Informatics for students who wish to focus on the interface between the two disciplines. Graduates of this program could find employment in biotech/biomedical companies or research institutes, or could pursue advanced degrees in this area.

University Studies - BS, Mathematics for Teaching Concentration

The BS in University Studies, Mathematics for Teaching area of concentration consists of courses that are designed to give students desiring a secondary-school teaching credential a solid foundation in mathematics. In particular, the courses chosen encompass the mathematical areas tested by the State of Texas and TExES secondary mathematics examination. These are the courses currently required for the secondary mathematics teaching field at Texas A&M University.

Total Semester Credit Hours 120
Program Requirements

1 Must make a grade of C or better.
2 Completion of four semesters of upper-level ROTC may be substituted for three hours of the requirement.
3 Select from any 100-499 course not used elsewhere, (except
ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; ISEN 101; KINE 199; LAND 101; MATH 102-148, MATH 151-166 (p. 1066), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205, PSYC 301; STAT 201, STAT 301 - 303 (p. 1154); WFSC 101).

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 47) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

University Studies - BS, Science for Secondary Teaching Concentration

The BS in University Studies, Science for Secondary Teaching area of concentration consists of courses that give students desiring secondary-school teaching credentials a solid foundation in life, earth and physical sciences. In particular, the courses chosen encompass the science composite areas test by the State of Texas and TExES. These are the courses currently required for the science composite certificate.

COLLEGE OF VETERINARY MEDICINE AND BIOMEDICAL SCIENCES

Administrative Officers
Dean - Eleanor M. Green, B.S., D.V.M.
Executive Associate Dean - Kenita S. Rogers, M.S., D.V.M.
Associate Dean for Research and Graduate Studies - Robert Burghardt M.S., Ph.D.
Assistant Dean for Graduate Studies - Michael Criscitiello, M.S., Ph.D.
Associate Dean for Undergraduate Education - Elizabeth Crouch, Ph.D.
Assistant Dean for Finance and Administration - Belinda S. Hale, M.B.A.
Associate Dean of Global One Health - Gerald Parker, M.S., D.V.M., Ph.D.

General Statement
The College of Veterinary Medicine and Biomedical Sciences consists of five academic departments: Veterinary Integrative Biosciences, Veterinary Large Animal Clinical Sciences, Veterinary Pathobiology, Veterinary Physiology and Pharmacology, and Veterinary Small Animal Clinical Sciences. Each department is administered by a department head, who is responsible to the Dean of Veterinary Medicine and Biomedical Sciences for all programs assigned or developed in the department, including teaching, research, extension and service.

A Veterinary Medical Teaching Hospital and Field Service Clinic are operated within the College to provide clinical laboratories for the veterinary medical educational program.

An extensive research program in animal health and disease is conducted by the faculty and staff of the college, and a substantial number of the teaching faculty members are engaged in research.

A veterinary extension program carries research information to veterinarians, animal owners, and others in the state and nation with the least possible delay. The faculty makes research information available to the students in the classroom and laboratories in a timely manner.

The typical land-grant institutional mandate of teaching, research, patient care and service provides the organizational framework necessary to meet the dynamics in the ever-changing field of veterinary medicine.

Graduate programs leading to the Master of Science (Non-Thesis and Thesis Options) and Doctor of Philosophy degrees are available through a College of Veterinary Medicine and Biomedical Sciences umbrella Graduate Program focused in four training tracks (Biomedical Genomics and Bioinformatics, Diagnostics and Therapeutics, Infection, Immunity and Epidemiology, and Physiology and Developmental Biology). The Department of Veterinary Integrative Biosciences offers a Science and Technology Journalism MS program and a Veterinary Epidemiology and Public Health MS program. Clinical specialty training programs are also available to provide effective training in the areas of professional specialization. The Interdisciplinary Faculty of Toxicology, a MS and PhD granting program composed of faculty from five colleges, is administratively housed in the College of Veterinary Medicine and Biomedical Sciences.

Majors
College of Veterinary Medicine and Biomedical Sciences

- Bachelor of Science in Biomedical Sciences (p. 757)
- Bachelor of Science in Neuroscience, Translational and Preclinical Neuroscience Track (p. 760)
- Bachelor of Science in University Studies, Biomedical Sciences Concentration (p. 771)

Minors
College of Veterinary Medicine and Biomedical Sciences

- Biomedical Sciences Minor (p. 761)

Certificates
College of Veterinary Medicine and Biomedical Sciences

- International Certificate in Cultural Competency and Communications in Spanish (p. 762)

Masters
College of Veterinary Medicine and Biomedical Sciences

- Master of Science in Biomedical Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/interdepartmental/biomedical-sciences-ms/)
- Master of Science in Science and Technology Journalism (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/interdepartmental/science-technology-journalism-ms/)

Department of Veterinary Physiology and Pharmacology

- Biomedical Research and Development Certificate (p. 770)

Department of Veterinary Integrative Biosciences

- Master of Science in Veterinary Public Health - Epidemiology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/veterinary-integrative-biosciences/veterinary-public-health-epidemiology-ms/)
Doctoral
College of Veterinary Medicine and Biomedical Sciences
• Doctor of Philosophy in Biomedical Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/interdepartmental/biomedical-sciences-phd/)

Professional
College of Veterinary Medicine and Biomedical Sciences
• Doctor of Veterinary Medicine in Veterinary Medicine (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/interdepartmental/dvm/)

Biomedical Sciences - BS
Admission
1. A Biomedical Sciences (BIMS) major will be admitted into the upper-level courses according to the following criteria:
   a. Completion of a set of Common Body of Knowledge (CBK) courses (35 hours to include BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 227/CHEM 237, CHEM 228/CHEM 238, PHYS 201, PHYS 202 and MATH 142*) with a grade of C or better in each course taken at Texas A&M. Any CBK course transferred in from a community college must have a minimum grade of a B.
      Normally, for admission to BIMS upper-level courses, a student may have attempted a CBK course no more than twice.
   b. A minimum of 55 completed semester hours with a cumulative resident Grade Point Average (GPA) of 2.5 or better.
      Process: Each student upon completing 55–65 semester credit hours must have a degree audit to verify upper-level eligibility.

2. The Biomedical Sciences Program will continue to accept changes of major into BIMS according to current Texas A&M University policy, but restrict changes of major into the upper-level courses (BIMS) according to the criteria listed in item 1. Students in other majors requesting a change of major to the BIMS program must also fulfill the criteria in item 1. In addition, the dean must verify availability of resources necessary to insure the student’s full-time enrollment in required upper-level courses prior to admission to upper-level status. If such courses are not available, the student will be denied admission to Biomedical Sciences.

3. To enter BIMS upper-level courses, transfer students must have:
   a. A minimum GPA of 3.0 in CBK courses with a grade of B or better in each completed course if taken at a 2-year college. A grade of C is accepted from a 4-year college.
   b. Transfer students admitted under another major and wishing to change into BIMS must complete one semester of graded coursework at Texas A&M University with a cumulative resident GPA of 2.5 and must fulfill the criteria in item 1.
   c. Texas A&M change of majors must have at least 55 semester credit hours with a minimum cumulative GPA of 3.0.

4. Students seeking readmission will be considered on a case-by-case basis, according to current catalog policy. No quotas will be placed on readmission; however, the decision to readmit will be dependent on resource availability and University policy.

5. Any BIMS student admitted to upper-level courses who then falls below the cumulative 2.5 GPA requirement will not be considered in good academic standing in their major and will be placed on college probation. Students who achieve less than a cumulative TAMU GPA of 1.0 in any semester are not eligible for college probation or grade warning status. All Biomedical Sciences majors must follow established probation rules for the Biomedical Sciences Program.

6. The Dean, Director or Department Head will reserve the right to waive CBK or GPA requirements within the criteria established in Texas A&M University Student Rules.

7. No courses other than BIMS 481, BIMS 484, VIBS 310, VIBS 311, or research/directed studies credits can be taken S/U to be used in the degree plan.

8. BIMS probation is determined at the end of the Spring semester. Students not meeting acceptable GPA requirements (cumulative 2.5 BIMS majors with 55 or more hours or cumulative 2.0 area of concentration (USVM), BIMS majors with less than 55 hours) will be required to attend Texas A&M University that summer and repeat courses as needed to raise their GPA. Students who achieve less than a cumulative TAMU GPA of 1.0 in any semester (BIMS or USVM) are not eligible for college probation or grade warning status.

9. Students may only attempt CVM courses a total of three (3) times.

*Calculus course options include: MATH 142, MATH 147, MATH 151, MATH 171.

Applied Science Option
Biomedical Sciences is a broad field of applied biology that is directed toward understanding health and disease. This major is a 120 hour, traditional-delivery, degree offered on both the College Station campus and at the Texas A&M Higher Education Center in McAllen, TX. Our mission is to educate students who will create a healthier future for humans and animals through the medical professions, biomedical innovation and discovery, global service and outreach. The curriculum is designed to provide a strong four-year education that emphasizes versatility of the graduate in the biological and medical sciences. A highly effective counseling program assists the students with the development of an individualized approach and course package that orients and prepares the students for entry into the medical, allied health field or graduate program of their choice. Such an approach enhances their educational experiences, improves their placement in professional and graduate programs, and facilitates their entry into the biomedical science job market.

Biomedical Sciences graduates enter professional programs in human medicine, veterinary medicine, dentistry, osteopathy, podiatry, optometry, and pharmacy. Some become medical technologists, physician assistants, nurses, and laboratory and research technicians. Others pursue radiation technology, hospital administration, and a wide variety of health-related fields. Many Biomedical Sciences students continue their education in graduate schools and specialize in various biology- and medicine-related disciplines. Other graduates are employed by clinical practices, industrial companies, government agencies, private foundations, public schools, colleges and certain aspects of business. Positions are available in pharmaceutical and drug marketing, research equipment manufacture and sales, food safety, biomedical research, disease control, zoonoses and epidemiology, laboratory animal care, zoo and aquatic animal supervision, health-related inspection and regulatory work. The BS in Biomedical Sciences is also awarded to students who
complete the three year Early Admission Option to Professional Schools and one year of professional school.

**Total Semester Credit Hours**

1. Select from courses that meet the mathematics core requirements except PHIL 240, MATH 167.
2. Check with your BIMS academic advisor to select the correct courses.
3. HIST 105 and HIST 106 are recommended, however students may choose from other American History core courses.
4. Must be chosen in consultation with BIMS academic advisor.

In satisfying the required 30 hours of BIMS directed electives and free electives, all 285/291/485/484/491 courses may not exceed 9 credit hours and all 289/489 courses may not exceed 9 credit hours. BIMS 484 may not exceed 6 credit hours total. A 289/489 course used as a free elective may not exceed 3 hours.

**Directed Electives**

BIMS directed electives are courses that constitute the major offered by the College of Veterinary Medicine and Biomedical Sciences and those approved for biomedical science electives. A student may choose 27 semester credits from the following partial list of courses:

<table>

Neuroscience - BS, Translational and Preclinical Neuroscience Track

Neuroscience is the study of the nervous system and its impact on behavior and cognitive functions. This interdisciplinary field integrates several disciplines, including psychology, psychiatry, biology, chemistry, physics, and medicine. It is the interdisciplinary nature of neuroscience that requires the participation of multiple units, including the Department of Biology, the Department of Psychological and Brain Sciences, and the College of Veterinary Medicine and Biomedical Sciences in collaboration with Neuroscience and Experimental Therapeutics (NEXT) in offering this degree, as well as the Texas A&M Institute for Neuroscience. Students completing the 120 hour BS in Neuroscience (College Station campus), with an emphasis in Translational and Preclinical Studies, will be well prepared for graduate study, as well as to enter entry-level healthcare and technical occupations. The core courses for this degree will include a foundation in the life sciences, and a foundational sequence in neuroscience that will prepare students for more advanced courses. For the concentration of the degree administered by the College of Veterinary Medicine and Biomedical Sciences, in collaboration with the Department of Neuroscience and Experimental Therapeutics in the College of Medicine, students will complete courses focused on biomedical, translational, and preclinical neuroscience.

</table>
The graduation requirements include a requirement for 3 hours of international and cultural diversity courses and 3 hours of cultural discourse courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

Graduation requirements require 2 courses with the Writing Intensive (UWRT), or 1 course with the Writing Intensive (UWRT) and 1 course with the Oral Communication (UCRT) attribute. These courses are designed to be TPC concentration electives (ex. VIBS 408, VIBS 443, VIBS 447) and should be chosen in consultation with an academic advisor. Writing/Communication intensive courses must be taken in the student’s major to count towards graduation.

### Biomedical Sciences - Minor

The Biomedical Sciences minor consists of 15 hrs of selected coursework related to and directed toward understanding health and disease. Students are encouraged to select courses in consultation with a BIMS Academic Advisor.

Students applying for a BIMS minor must have a 2.0 or better overall GPA and meet with a BIMS advisor to declare the minor. Students are required to meet a minimum cumulative GPA of 2.0 or better in their minor coursework. Proper classification is required for the course level taken and any minor course prerequisites must be met.

The Biomedical Sciences program cannot guarantee the availability of courses required to meet the minor requirements. Successful completion of the minor will be certified by a degree audit in Howdy during the semester of the student’s graduation. The minor will be recognized after graduation on the student’s transcript, but not on the student’s diploma.

**Requirements to declare BIMS minor:**

- Must have a 2.0 TAMU GPA
- Must be declared before 75 hours are completed

### Program Requirements

A selection from among the following courses will constitute a minor field of study. The following 15 hours of course work are required. Proper classification must be met for the course level being taken.

</tr>
<tr>
<td>SPAN 300/SPAN 400 level course of the student’s choice ²</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>3 credit hours of area studies from an approved course list ³</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Minimum of 2 credit hours in a medical communications Area ⁴</td>
<td>2</td>
<td></td>
</tr>
<tr>
<td>BIMS 485 ⁵</td>
<td>2</td>
<td></td>
</tr>
<tr>
<td>An international experience approved by the Biomedical Sciences Program ⁶</td>
<td>2</td>
<td></td>
</tr>
<tr>
<td><strong>Total Semester Credit Hours</strong></td>
<td><strong>16</strong></td>
<td></td>
</tr>
</tbody>
</table>

¹ SPAN 221 and SPAN 222 are acceptable substitutions, when taken abroad, for SPAN 201 and SPAN 202.

² Prerequisites apply.

³ The certificate was designed with the student’s required Texas A&M Core Curriculum (p. 25) in mind. Many of the courses on the approved list will count as a language, philosophy and culture, creative arts, or social and behavioral sciences. It is up to the student to compare the two lists and to work with their academic advisor to choose courses appropriate to their degree plan.

⁴ It is suggested that students enroll in this course after the completion of at least SPAN 201 or equivalent. For course options, see academic advisor.

⁵ This course is a specific section of 485 that requires shadowing in the biomedical environment while using the Spanish language.

⁶ This requirement may be satisfied by an approved study abroad program.

---

**International Certificate in Cultural Competency and Communications in Spanish**

Students who complete this certificate will be functionally bilingual and able to perform linguistically in a culturally sensitive manner within the biomedical environment. A required study abroad will allow students to gain experiential knowledge, expanding their cultural sensitivities and functionality in a foreign environment. Because of limited resources, the program will have a cap on the number of students admitted. All courses in the program must be completed with a grade of C or better. The certificate will be awarded upon completion of a BS degree in Biomedical Sciences.

Katju, Vaishali, Professor
Vet Integrative Biosciences
PHD, Indiana University, 2004

Kim, Sun J, Research Assistant Professor
Vet Integrative Biosciences
PHD, Sogang University, 2006

Klemm, William R, Senior Professor
Vet Integrative Biosciences
PHD, University of Notre Dame, 1963
DVM, Auburn University, 1958

Kneese, Dana A, Clinical Assistant Professor
Vet Integrative Biosciences
DVM, Texas A&M University, 2013
PHD, Texas A&M University, 2009

Ko, Gladys Y, Associate Professor
Vet Integrative Biosciences
PHD, Kent State University, 1996

Ko, Michael L, Research Assistant Professor
Vet Integrative Biosciences
PHD, Kent State University, 1997

Kornegay, Joe N, Professor
Vet Integrative Biosciences
PHD, University of Georgia, 1982

Langford, Candice L, Research Assistant Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 2006

Li, Jianrong, Professor
Vet Integrative Biosciences
PHD, University of Hawaii at Manoa, 1997

Li, Qinglei, Associate Professor
Vet Integrative Biosciences
PHD, Harbin Medical University, 2001

Lyczak, Kristin C, Clinical Assistant Professor
Vet Integrative Biosciences
DVM, Colorado State University, 2003

Mouneimne, Roula, Research Professor
Vet Integrative Biosciences
PHD, Lyon I University, 1984

Murphy, William J, Professor
Vet Integrative Biosciences
PHD, The University of Tulsa, 1997

Ndeffo Mbah, Martial Loth, Assistant Professor
Vet Integrative Biosciences
PHD, University of Cambridge, UK, 2010

Nghiem, Peter P, Assistant Professor
Vet Integrative Biosciences
PHD, George Washington University, 2014
DVM, Texas A&M University, 2008

Norman, Keri N, Assistant Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 2010

Phillips, Timothy D, University Distinguished Professor
Vet Integrative Biosciences
PHD, University of Southern Mississippi, 1975

Pine, Michelle D, Clinical Associate Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 2002
DVM, University of Missouri-Columbia, 1991

Porter, Weston W, Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1997

Qian, Yongchang, Research Associate Professor
Vet Integrative Biosciences
PHD, Shanghai Institutes for Biological Sciences, 1990

Raudsepp, Terje, Professor
Vet Integrative Biosciences
PHD, Swedish University of Agricultural Sciences, 1999

Rijnkels, Monique G, Research Associate Professor
Vet Integrative Biosciences
PHD, Leiden University, 1997

Ritter, Nicola L, Instructional Assistant Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 2014

Ruoff, Lynn M, Clinical Professor
Vet Integrative Biosciences
DVM, Colorado State University, 1975

Rusyn, Ivan I, Professor
Vet Integrative Biosciences
PHD, University of North Carolina at Chapel Hill, 2000

Seo, Heewon, Research Assistant Professor
Vet Integrative Biosciences
PHD, Yonsei University, 2012

Shi, Liheng, Research Assistant Professor
Vet Integrative Biosciences
PHD, Osaka University, 2001

Skow, Loren C, Senior Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1976
Tayce, Jordan D, Instructional Associate Professor  
Vet Integrative Biosciences  
DVM, Texas A&M University, 2008

Taylor, Robert J, Research Professor  
Vet Integrative Biosciences  
PHD, Texas A&M University, 1987

Tiffany-Castiglion, E, Professor  
Vet Integrative Biosciences  
PHD, University of Texas Medical Branch at Galveston, 1979

Venkatraj, Vijayanagaram S, Clinical Associate Professor  
Vet Integrative Biosciences  
PHD, New York University, 1992

Waltz, Micah J, Lecturer  
Vet Integrative Biosciences  
MS, West Virginia University, 2014

Welsh, Christabel Jane, Professor  
Vet Integrative Biosciences  
PHD, London University, 1981

Yeoman, Michelle S, Lecturer  
Vet Integrative Biosciences  
MS, Texas A&M University, 2013

Vet Physiology & Pharmacology
PHD, Rutgers University, 1999
Biomedical Research and Development - Certificate

The Biomedical Research Certificate, offered by the Department of Veterinary Physiology and Pharmacology, will provide students the opportunity to gain advanced training in biomedical research. Students in the Certificate Program will gain a broader understanding of the creation, evaluation, and dissemination of new knowledge while performing publishable original biomedical research within a research-intensive community. The Biomedical Research Certificate program requires a minimum of 18-credit hours in designated courses, each of which includes engagement in inquiry-based research. Specific certificate requirements are available in the Biomedical Sciences Office and the Department of Veterinary Physiology and Pharmacology (http://vetmed.tamu.edu/vtpp/).

Total Semester Credit Hours 18

1 Two (three hour) courses are required for six hours total.

University Studies Programs

The University Studies major allows students to choose an area of concentration and two minors to constitute the 120 hours of the degree. University Studies in the College of Veterinary Medicine & Biomedical Sciences (USVM), is a B.S. degree with an area of concentration in veterinary medicine and biomedical sciences. The area of concentration emphasizes applied biology in the context of the veterinary and human medical field, highlighting one health concepts: the interrelatedness of human, animal and environmental health and factors affecting each. Students considering USVM as a major should note that all students are required to complete prerequisite coursework including biology, fundamentals of chemistry and organic chemistry with lab (1 semester), prior to completing the area of concentration coursework. Minors must be chosen from an approved list and Biology or Biomedical Sciences cannot be chosen as minors to couple with this concentration. This major does not admit first-time college students. Students can apply to change their curriculum according to approved university steps and in consultation with an academic advisor from the college. Students must maintain a minimum overall GPA of 2.0 and meet all requirements and prerequisite coursework for the declared area of concentration and two minors. The minors will be recognized after graduation on the student’s transcript, but not on the student’s diploma. This course of study is offered on the College Station campus.

Majors

- Bachelor of Science in University Studies, Biomedical Sciences Concentration (p. 771)
University Studies - BS, Biomedical Sciences Concentration

The University Studies major allows students to choose an area of concentration and two minors to constitute the 120 hours of the degree. University Studies in the College of Veterinary Medicine and Biomedical Sciences (USVM), is a B.S. degree with an area of concentration in veterinary medicine and biomedical sciences. The area of concentration emphasizes applied biology in the context of the veterinary and human medical field, highlighting one health concepts: the interrelatedness of human, animal and environmental health and factors affecting each. Students considering USVM as a major should note that all students are required to complete prerequisite coursework including biology, fundamentals of chemistry and organic chemistry with lab (1 semester), prior to completing the area of concentration coursework. Minors must be chosen from an approved list and Biology or Biomedical Sciences cannot be chosen as minors to couple with this concentration. This major does not admit first time college students. Students can apply to change their curriculum according to approved university steps and in consultation with an academic advisor from the college. Students must maintain a minimum overall GPA of 2.0 and meet all requirements and prerequisite coursework for the declared area of concentration and two minors. | Total Semester Credit Hours | 120 |

1 Except MATH 167, PHIL 240.  
2 Completion of four semesters of upper-level ROTC may be substituted for 3 hours of American history and 3 hours of political science.

Up to 9 course hours may be selected from BIMS 484, BIMS 485; BIMS 491; VIBS 285, VIBS 485, VLCS 485; VSCS 485; VTPB 285, VTPB 485, VTPP 285, VTPP 291, VTPP 485, VTPP 491. No more than 6 hours of BIMS 484 may be used. Restriction to be enforce by the BIMS advising office.

Used to satisfy the two minor requirements.

Select any 100-499 course not used elsewhere.

All students are required to complete 3 hours of International and Cultural Diversity (p. 47) credit (ICD) and 3 hours of Cultural Discourse (p. 46) (CD) credits. Select in consultation with academic advisor.
The School of Military Sciences is composed of three departments: Aerospace Studies, Military Science and Naval Science.

All courses offered by the School of Military Sciences are accredited by the University. However, the credit granted for degree plans varies by college and often by department. For precise information, consult the associate dean or department head.

The University’s commitment to providing highly skilled and disciplined leaders to the Armed Forces requires all students enrolled in ROTC programs at Texas A&M to be members of the Corps of Cadets.

Students not enrolled in an ROTC program may be permitted to take ROTC courses as electives with the advance approval of the professor of military science, the professor of aerospace studies, or the professor of naval science, as appropriate, and the concurrence of the head of the School of Military Sciences.

State law permits the substitution of 3 hours of history and 3 hours of political science for a student in the program of an approved senior ROTC unit. With the approval of the dean of the appropriate college, students successfully completing their required four semesters of upper-level ROTC curriculum will be deemed to have completed the equivalent of POLS 206 or POLS 207 plus HIST 105 or HIST 106 (or another appropriate course) for a total of 6 hours. Students pursuing teacher certification are not allowed to substitute ROTC credits for this requirement.

Undergraduate Studies’ units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

Military Studies - Minor

The School of Military Sciences offers a minor in Military Studies. This minor is available to all Texas A&M students but is not required for ROTC or Corps of Cadets participation. Students should consult with an advisor in their major department to determine minor requirements. All students desiring to enroll in the Military Studies minor should contact the Assistant Commandant for Academics and International Programs in Room 211 of the Buzbee Leadership Learning Center, (979) 458-2829.

Program Requirements

The Military Studies minor requires 18 hours. Nine hours must be completed in approved upper-level Aerospace Studies, Military Science, or Naval Science courses with an additional 9 hours from approved university courses with a military-related focus. A minimum of 12 hours must be at the 300-400 level. A grade of C or higher is required if a course is to be counted towards the minor field. Minor programs are recognized on the transcripts after graduation, but not on the diploma. The student’s college and/or major department determines the number of minor programs a student may seek and shall be responsible for advising after the student receives signed approval from the Assistant Commandant for Academics and International Programs.

Leadership Study and Development - Certificate

In alignment with the mission and values of Texas A&M University and the Corps of Cadets, the Hollingsworth Center for Ethical Leadership (HCEL) offers a comprehensive collection of programs in character and leadership development. HCEL programs enhance participants’ capacities to be value-adding leaders in both the public and private sectors of the global workforce. Although initially designed for cadets not pursuing a military commission, HCEL programs are now available to all cadets and other Texas A&M University undergraduate students. Participating students hone their leadership skills through a rigorous progression of academic leadership courses, application of leadership experiences within the Corps and broader Texas A&M community, and the creation of a personal Individual Leadership Development Plan. Additional emphasis is given to the intentional development of career readiness competencies of critical thinking, teamwork, professionalism, oral/written communication, career management, digital technology, leadership, and global/intercultural fluency. The science and art of leadership, along with the career readiness competencies, can be learned, developed, and improved. The four-class system in the Corps of Cadets offers an excellent framework for progressive advancement in these areas. The HCEL capitalizes on that framework by creating ongoing opportunities for participants to discover and synthesize personal meaning from their academic and extracurricular experiences, both inside and outside the classroom.

Minimum of 6 hours of School of Military Sciences courses (NVSC, AERS, and MLSC) must be at the 400 level.
The Air Force ROTC (AFROTC) program at Texas A&M University is the largest AFROTC program in the United States and is designed to prepare selected students to be commissioned officers in the United States Air Force. The institutional phase of AFROTC, called aerospace studies, is divided into two parts. The first two years constitute the General Military Course and the second two years constitute the Professional Officer Course. Details on courses offered are set forth in the alphabetical departmental listing. Concurrent enrollment in more than one aerospace studies course requires the approval of the department head, also known as the Professor of Aerospace Studies.

The General Military Course consists of the 100- and 200-level courses. These courses focus on the structure and missions of Air Force organizations; officership and professionalism; and, include an introduction to communicative skills. The General Military Course prepares the cadet, as a candidate, for the Professional Officer Course (POC). Cadets in the General Military Course attend one hour of class plus two hours of leadership lab per week.

Students apply for enrollment in the Professional Officer Course during their sophomore year. Enrollment in the Professional Officer Course at the beginning of the junior year is limited to students of high moral character who are academically qualified, physically fit, possess the necessary interest and aptitude, and have demonstrated leadership potential.

Before entry into the Professional Officer Course, cadets must attend AFROTC Field Training during the summer months typically between the sophomore and junior academic years. The major areas of study in the Field Training program include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, physical fitness training, and a culminating field training exercise. Those who complete Field Training are enlisted in the Air Force Reserve and enter the POC.

The purpose of the Professional Officer Course is to develop skills and attitudes vital to a career as a professional Air Force officer. A degree is a prerequisite for an Air Force commission. Cadets attend class three hours a week and leadership lab two hours per week during each semester of the Professional Officer Course.

If a student is selected for and enrolled in the Professional Officer Course, he or she must sign a contract with the government in which he or she agrees to enlist in the Air Force Reserve, complete the course and, upon graduation, accept a commission as an officer in the United States Air Force. He or she also must agree to serve on active duty for not less than four years after being commissioned. Persons selected for flight training must serve ten years of active duty following completion of pilot training. During their two years in the Professional Officer Course, cadets are eligible to receive monthly subsistence pay, plus added monetary incentives.

Leadership training is continuous during the student's life as an AFROTC cadet. One way this is accomplished is through Leadership Laboratory. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop each student's leadership potential. Leadership Laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, Air Force career opportunities, and expectations of an Air Force junior officer. Students develop their leadership in a practical, supervised laboratory, which typically includes field trips to Air Force installations.

Students enrolled in the four-year program may apply and compete for two- or three-year AFROTC College Scholarships. The AFROTC In-College Scholarship Program is a highly competitive program aimed primarily at college freshmen and sophomores in any major. If selected for an AFROTC scholarship, the student will receive tuition payment, textbook allowance and monthly subsistence allowance.

Upon completion of the Professional Officer Course and graduation from the University, students are commissioned as Second Lieutenants in the United States Air Force. All instructors are active duty officers assigned to the University by the United States Air Force. Information about the Air Force ROTC program may be obtained by contacting the Detachment, or visiting the Air Force ROTC (http://afrotc.tamu.edu) website.

### Military Science

#### Overview

The Army ROTC (AROTC) program at Texas A&M is the oldest on campus. AROTC cadets are proud contributors to the heritage of the "Fightin’ Texas Aggies." AROTC members are leaders in a wide variety of university activities including Student Government, campus athletics, the Fightin’ Texas Aggie Band Ross Volunteer Company, Rudder’s Rangers and Parsons Mounted Calvary. The Army ROTC Ranger Challenge Team is a perennial contender at both Regional and National levels, finishing in the top five at the Sandhurst competition hosted by the US Military Academy in consecutive years.

The Army offers a diverse career field to match a student’s education and interests, with virtually no restrictions on the major field of study or discipline with the exception of General Studies. The AROTC student may enter career fields such as engineering, military intelligence, communications, finance, personnel administration, medical services, transportation, aviation, law enforcement, artillery, armor or infantry. Engineering students are eligible to participate in the University’s chapter of the Society of American Military Engineers. Additional opportunities after commissioning are service in one of the U.S. Ranger Battalions and the Special Operations Community. Highly qualified applicants may compete to take part in the delayed entry program while pursuing medical or law degrees and selected cadets may attend specialty military training including Airborne, Air Assault, Cold Weather Operations Course, Combat Diver Qualification Course and Basic Mountaineering.
Curriculum

AROTC classes are unique in the college curriculum in offering both classroom instruction and hands-on leadership development opportunities. AROTC is divided into two parts: The Basic and Advanced Courses. The Basic Course is taken during freshman and sophomore years. Coursework covers the areas of military customs, leadership fundamentals, fire team maneuver, map reading, marksmanship and land navigation. Students develop and refine their leadership by participating in weekly tactical leadership labs and field training exercises. Corps of Cadets provide basic uniform issue and lessons are delivered electronically. There is NO military commitment for participation in the Basic Course. When applicable, AROTC provides additional uniforms.

In addition, any student participating in AROTC may attend Basic Camp at Fort Knox, Kentucky during the summer after their freshman or sophomore year. Basic Camp provides an immersive experience in basic Soldier skills and may replace any 100 and/or 200-level ROTC class for transferring students.

The Advanced Course is taken in the final two years of college and includes participation in Advanced Camp during the summer after the junior or senior year. Advanced Course instruction emphasizes advanced leadership development, organization ethics, critical thinking and problem solving, administration, and military law. Summer Advanced Camp at Fort Knox, Kentucky enables cadets to implement, in a field environment, the principles and theories acquired in the classroom. Those cadets taking the Advanced Course with a commissioning contract will incur a military obligation to serve either in the Active Duty Army, Army Reserves, or Army National Guard upon graduation.

Stipends

All cadets in the AROTC program and who have entered into a commissioning contract receive a subsistence allowance of $420 per month. AROTC cadets are encouraged to take courses in strategic languages. Through the Army’s Culture and Language Incentives Program, students can earn up to $300 per credit hour for completing classes in qualifying languages. In addition, AROTC sponsors the Cultural Understanding and Language Proficiency Program that affords students the opportunity to participate in month long immersion programs in over 40 countries.

Qualified students who join the Army National Guard or Army Reserve, may participate in the Simultaneous Membership Program (SMP) in which they earn approximately $250 per month. The total dollar amount for SMP cadets can reach $750 per month during their junior and senior years in ROTC. Tuition assistance, which pays between 75-100% of tuition costs, is available through the US Army Reserves and Texas National Guard.

Qualified veterans may enroll directly into the ROTC Advanced Course. Veterans in the Advanced Program receive a tiered subsistence allowance of up to $500 per month in addition to their veterans’ benefits.

Scholarships

The AROTC Scholarship program awards four-year and three-year advance designee scholarships on a competitive basis to students entering ROTC as college freshmen. Two-year, three-year, and 3.5 year scholarships also are available for college students already enrolled in ROTC. These scholarships pay the cost of tuition and required fees or room and board. Also included is a flat rate textbook allowance for the duration of the award. In all, a four-year scholarship can be worth over $58,000 at Texas A&M. Additional scholarship opportunities are available specifically for students participating in Science, Technology, Engineering, and Math majors that pay the same benefits as four and three-year ROTC scholarships.

The U.S. Army Health Profession Scholarship Program offers a unique opportunity for financial support to cadets who desire to continue their education beyond their undergraduate work by enrolling in a program leading to a professional degree in medicine, dentistry or veterinary medicine.

Contact

Texas A&M’s staff, having served multiple combat and operational deployments overseas, are dedicated to developing academically superior and physically fit commissioned officers recognized as outstanding leaders of character for the U.S. Army Officer Corps. For more information on Army ROTC programs, contact the Military Science Department at (979) 845-2814.

Naval Science

Mission

The Naval ROTC Unit at Texas A&M University provides qualified young men and women the opportunity to learn the mission of the Naval Services and pursue a commission as an officer in the United States Navy or United States Marine Corps. The Naval ROTC Unit operates as the Department of Naval Science at Texas A&M and is one of the largest Naval ROTC Units in the United States. Graduates from our program can be found serving around the world. Officers commissioned as Ensigns in the United States Navy have the option, based on physical and aptitude qualification, to serve in the Aviation (Pilot or Naval Flight Officer), Surface Warfare (Conventional or Nuclear), Nuclear Submarine, or Special Warfare (SEAL or Explosive Ordnance Disposal) communities. Officers commissioned as Second Lieutenants in the United States Marine Corps can serve in one of more than 36 military operational specialties in three categories including Aviation (Pilot or Naval Flight Officer), Combat Arms (Infantry, Artillery, Armor, Assault Amphibians, Combat Engineers, etc.), or Combat Service Support (Logistics, Supply, Data Processing, Finance, etc.).

Naval ROTC students may participate fully in all aspects of university life. This includes serving in positions with Student Government or the Memorial Student Center, belonging to campus clubs and service organizations, or participating in religious, social, professional or personal interest organizations. The NROTC Unit also sponsors and advises special units within the Corps of Cadets; SEAL Platoon and RECON Company.

Scholarships

The Naval ROTC program provides numerous scholarship opportunities for qualified individuals who are seeking a commission upon graduation as an officer in either the United States Navy or United States Marine Corps. The four-year Naval ROTC scholarship program is a nationally competitive program. High school students seeking a four-year Navy or Marine Corps Option Naval ROTC scholarship may apply as early as the spring of their junior year in high school, and should apply no later than December of their senior year in high school. College freshmen with less than 30 college credit hours may also apply for the 4-year Naval ROTC scholarship during the fall of their freshman year. If awarded the scholarship, it would come into effect during the fall of their sophomore year. The Naval ROTC scholarship pays for all tuition, most university fees, some uniform fees, and provides the student with a monthly stipend.
Students who choose to join the Naval ROTC, but do not intend to pursue a commission into the Navy or Marine Corps are considered Naval Science Students. They are required to take a Naval Science (NVSC) class and attend specified Leadership Laboratories. They are not required to do physical fitness with the NROTC or be advised by a military advisor.

Leadership

All Scholarship and College Program (Basic and Advanced Standing) NROTC students are also members of the Texas A&M Midshipman Battalion, an organization providing distinct training and leadership opportunities for students pursuing Navy and Marine Corps commissions. This training is accomplished through the NROTC’s Leadership Laboratory. Associated with each Naval Science class and conducted every Tuesday afternoon, Leadership Laboratory is a combination of classroom study and practical hands-on application that exposes the students to many facets of the Navy and Marine Corps and provides them the opportunity to develop their leadership skills.

Academic Requirements

Academic requirements vary by program, but all freshmen and sophomore Naval ROTC students must take a Naval Science (NVSC) class each fall and spring semester. These courses provide a basic understanding of the Navy and Marine Corps organization and mission; address the concepts of leadership, ethics, and management; and provide a basic understanding of the history of American sea power and the evolution of warfare throughout the ages. All Scholarship and College Program (Advanced Standing) students continue to take Naval Science courses during their junior and senior year. These courses cover additional topics such as navigation, weapons systems, amphibious warfare and leadership and ethics for the junior officer. All students on scholarship or College Program (Advanced Standing) can choose from any major offered by Texas A&M. Students who are recipients of the NROTC scholarship Navy option, must also complete two courses of calculus and two courses of physics, regardless of major.

Summer Cruise

Scholarship students receive four to six weeks of additional training every summer with operational Navy and Marine Corps units around the world. Between the freshman and sophomore years, students receive orientation training with naval aviation, surface combatant, submarine and Marine Corps units. Between the sophomore and junior years, Navy Option students experience the life of enlisted sailors aboard ships and submarines and Marine Option students experience the life of enlisted marines with Marine units in the field. For the final training session between the junior and senior years, all Scholarship and College Program (Advanced Standing) students receive service-specific training in final preparation for commissioning. Navy Option students are assigned to aviation units, surface combatants or submarines depending upon their qualifications and desires and receive hands-on training working closely with qualified junior officers. Marine Option students attend Officer Candidate School at Quantico, VA where they are screened, trained and evaluated in an intense, competitive environment alongside other Marine Option students from around the country. Students participating in summer cruises are provided government travel, medical and dental care, commissary and exchange privileges, and are paid for the duration of the training.

Commissioning

Upon graduation, qualified Naval ROTC Navy and Marine Option Scholarship students receive commissions as Ensigns in the United States Navy or as Second Lieutenants in the United States Marine Corps and serve a minimum of four years of active duty. Qualified Naval ROTC College Program (Advanced Standing) Navy Option students receive commissions as Ensigns in the United States Navy and serve a minimum of three years of active duty. Qualified Naval ROTC College Program (Advanced Standing) Marine Option students receive commissions as Second Lieutenants in the United States Marine Corps and serve a minimum of three and a half years of active duty. Those Navy Option graduates who are academically qualified and accepted to graduate school in certain disciplines may apply for active duty deferments to complete their postgraduate education.

NROTC Staff

The staff of the Naval Science Department is dedicated to producing officers of the highest quality for the United States Navy and United States Marine Corps. All instructors are active duty Navy or Marine Corps officers and senior enlisted personnel assigned to the University by the United States Navy or United States Marine Corps. In addition, they work with the Corps of Cadets and act as military advisors to the Companies/Outfits within the Naval regiments. This group of highly trained professionals places specific emphasis on the academic and professional development of every student assigned. Additional information about the Naval ROTC program at Texas A&M University can be obtained by calling the Department at (979) 845-1775, or by visiting the Texas A&M Naval ROTC website.
TEXAS A&M UNIVERSITY AT GALVESTON

General Statement

Texas A&M University at Galveston, a branch campus of Texas A&M University, offers ocean-oriented academic degrees, research, continuing education, and public service in marine science, engineering, business, transportation and liberal arts. Degrees are awarded from Texas A&M University. Ocean voyages, sailing in Galveston Bay, beachfront experiments and independent study complement the rigorous classroom experience at Texas A&M University at Galveston. In addition to its academic programs, the campus houses the Texas A&M Maritime Academy, which offers training programs leading to officer licensing in the U.S. Merchant Marine.

Texas A&M University at Galveston is located near the mouth of Galveston Bay with close access to the Gulf of Mexico. Most instructional programs are taught at the 130-acre Mitchell Campus on Pelican Island (with housing for 1,400+ students). The training ship serves as a floating classroom, laboratory and dormitory for annual sea term training of the U.S. Maritime Service cadets. During the regular school year, the ship is berthed at Pelican Island and provides valuable dockside laboratory facilities for instruction in the practical aspects of the maritime curricula.

Courses of Study

Texas A&M University at Galveston provides undergraduate degree programs in Marine Biology (MARB), Marine Sciences (MARS), Marine Engineering Technology (MARR), Marine Transportation (MART), Marine Fisheries (MARF), Maritime Business Administration (MARA), Maritime Studies (MAST), Coastal Environmental Science and Society, and University Studies (USGA) (with concentrations in Oceans and One Health, Marine Environmental Law and Policy, and Tourism and Coastal Community Development). A 5-year program is offered to allow Coastal Environmental Science and Society majors to complete the Master of Marine Resources Management (MARM) degree, combining their senior year of the undergraduate program with the first year of MARM. A similar 5-year program is offered to allow Maritime Business Administration majors to complete the Master of Maritime Business Administration and Logistics (MMAL) in addition to the bachelor’s degree program in a total of 5 years. All students complete the University Core Curriculum requirements set by Texas A&M University to ensure a broad-based education.

Texas A&M University at Galveston is fully accredited as a branch campus of Texas A&M University by the Southern Association of Colleges and Schools Commission on Colleges. Marine Engineering Technology is accredited by the Engineering Technology Accreditation Commission of ABET and the license option programs of the Texas A&M Maritime Academy including are certified by the U.S. Coast Guard.

U.S. Maritime Service Corps of Cadets

Texas A&M University at Galveston houses the Texas A&M Maritime Academy, one of six state maritime academies in the U.S., preparing graduates for licensing as officers in the American Merchant Marine. This program provides an opportunity for students to learn how to operate and maintain an ocean-going vessel. In addition to classroom and field training during the regular school year, students will sail aboard a training vessel or appropriate commercial placement during three sea terms to gain practical experience in seafarership, navigation and operations. At the conclusion of the program, cadets test to become licensed as officers in the U.S. Merchant Marine and may seek employment in the field of marine transportation as a licensed Third Mate or Third Assistant Engineer. Please see the tab title Texas A&M Maritime Academy.

The NROTC Program offers men and women an opportunity to qualify for a commission in the Navy while attending Texas A&M University at Galveston. All NROTC students are required to participate in the Texas A&M Maritime Academy Corps of Cadets. Any student may join the NROTC Program either as a National Scholarship winner or as a non-subsidized college program student. Applications for National Scholarships can be obtained through a Navy recruiting office before the submission deadline of January 30 of the year for which the student is applying.

Mission Statement

Texas A&M University at Galveston is a special-purpose institution of higher education for undergraduate and graduate instruction in marine and maritime studies in science, engineering and business and for research and public service related to the general field of marine resources. The institution is under the management and control of the Board of Regents of The Texas A&M University System, with degrees offered under the name and authority of Texas A&M University at College Station.

Research Programs

Faculty, post-doctoral fellows, research staff, and students are actively involved in research throughout the world. Research is conducted under the direction of more than 50 faculty members with funding from federal, state, private and university sources including the National Science Foundation, National Oceanic and Atmospheric Administration, National Aeronautics and Space Administration, Department of the Interior, National Institutes of Health, Department of Energy, Environmental Protection Agency, Texas General Land Office, Texas Commission on Environmental Quality, Texas Parks and Wildlife Department, CONACYT, Consortium for Ocean Leadership, Texas Institute of Oceanography and Research Development Fund. Externally funded research expenditures were over $4.1 million. Total research expenditures were over $5.6 million. Research encompasses both the basic and applied aspects of fields such as marine biology, oceanography, coastal/ocean engineering, marine geology, marine policy and management, environmental studies, conservation, business, admiralty law and coastal zone management. Research is focused largely in the areas of coastal and beach processes (e.g., physical profiling of coastal regions and erosion processes and control), marine life studies (e.g., marine mammal, fish, shellfish, algae and sea turtle biology and ecology), bay and estuary ecosystems (e.g., wetlands management and toxic contaminant analysis), geochemical cycling in marine/aquatic/atmospheric systems and offshore/deep water environments. Many of the faculty researchers hold dual graduate appointments in Texas A&M University at Galveston and/or Texas A&M University departments. Approximately 40 M.S. and
Ph.D. graduate students from the Texas A&M University departments of Wildlife and Fisheries Sciences, Ocean Engineering, Civil and Environmental Engineering, Biology, and Anthropology are conducting their research under a Texas A&M University at Galveston faculty member. Undergraduate students have many opportunities to participate in research, such as the Texas Institute of Oceanography Undergraduate Student Research Program, working as student workers and technicians on funded research programs, taking independent study classes or participating in the Undergraduate Research Scholars Program. Undergraduate students may work in the laboratory and at field sites throughout the world, participate in research cruises, present results at local, national and international meetings, and serve as authors on publications.

Administrative Officers

Col. Michael E. Fossum, USAFR (Ret.) - Chief Operating Officer, Texas A&M University at Galveston; Vice President, Texas A&M University; Superintendent, Texas A&M Maritime Academy

Dr. Patrick Louchouarn - Executive Associate Vice President for Academic Affairs and Chief Academic Officer, Texas A&M University at Galveston; Associate Provost, Texas A&M University

Dr. Donna C. Lang - Associate Vice President for Academic Operations

Ms. Susan Hernandez Lee - Associate Vice President for Finance and Compliance Officer

Mr. Grant W. Shallenberger - Associate Vice President for Administration and Auxiliary Services

Dr. Todd Sutherland - Associate Vice President for Student Affairs

Dr. Antonietta S. Quigg - Senior Associate Vice President for Research and Graduate Studies

**General Information**

**General Information for Texas A&M University at Galveston Students**

**General Academics Major**

The General Academics major at Texas A&M University at Galveston is to be utilized by continuing students who are not able to immediately enter their major of choice. A student must have completed at least one semester at TAMUG prior to entering the General Academics major. Entry into the major is not guaranteed; interested students must complete the General Academics Change of Major Application by the designated deadline and undergo review. A later deadline will be set for students who are suspended from their current major, but not from the campus. Review criteria for entry to the major will include the student’s ability to meet the minimum requirements to enter into their intended major in one to two semester(s), as well as review of any previous academic or honor code issues. Students admitted to the General Academics major have one (1) semester to work toward entry to their major of choice; an extension of one additional semester will be considered on a case-by-case basis.

For additional information, visit tamug.edu/slc/gacd (http://www.tamug.edu/slc/gacd/) or contact the Seibel Learning Center at (409) 741-4343.

**Academic Deficiency**

Any GPA below 2.0 at Texas A&M University at Galveston is considered academically deficient; this applies to term GPA, major GPA, and cumulative GPA. At the conclusion of each academic term, all students with a deficient GPA will be reviewed. Depending on the severity of their case, and extenuating circumstances when relevant, the student will be placed into one of the following categories:

- **Probation One** – Students placed on Probation One are able to fully continue within their program, but must show consistent progress towards regaining good standing. Failure to show consistent academic progress, per terms set by the academic department, could result in the student being moved to another deficiency category.
- **Probation Two** – Students placed on Probation Two are able to fully continue within their academic program, but must meet additional probationary terms as well as showing consistent progress towards regaining good standing. These terms include full completion of the Academic Coaching and Success program, as well as remediation as deemed appropriate by the academic department. Failure to meet the full terms of probation and/or to show consistent academic progress, per terms set by the academic department, could result in the student being moved to another deficiency category.
- **Departmental Suspension** – Students placed on Departmental Suspension will not be able to continue within their academic program. Any classes that student has registered for will be dropped, and they will not be able to register for additional classes until they have successfully applied and been accepted into a new major. Admission to another major is not guaranteed.
- **Campus Suspension** – Students placed on Campus Suspension will not be able to continue at Texas A&M University at Galveston for a
minimum of one (1) full semester. During that time, the student is required to develop an action plan addressing the specific issues causing their academic difficulty. After the semester suspension concludes, the student is eligible to reapply to the campus; readmission is not guaranteed.

- University Suspension — Students placed on University Suspension will not be able to continue at Texas A&M University for a minimum of 12 months. Following the completion of the 12-month suspension, the student may apply for readmission; readmission is not guaranteed.

For additional information, contact the Seibel Learning Center at (409) 741-4343.

</table>
Applicants may apply for admission to any program on the Galveston campus at a separate application from Texas A&M University at College Station.

Admission into Texas A&M University at Galveston (TAMUG) requires an additional application. Acceptance to an academic program by the Office of Admissions does not constitute admission to the TAMMA and U.S. Maritime Service License Option Program. Full information regarding TAMMA application and required documents is located at http://www.tamug.edu/corps/apply.html.

To obtain an information packet or schedule a campus visit, call toll free at 1-87-SEAAGGIE, write Office of Admissions, Texas A&M University at Galveston, P. O. Box 1675, Galveston, TX 77553-1675, or visit http://www.tamug.edu/admissions (http://www.tamug.edu/admissions/).

### Admission Statement and Policy on Individuals with Disabling Conditions

Texas A&M University at Galveston has a strong institutional commitment to the principle of diversity in all areas. In that spirit, admission to Texas A&M University and any of its sponsored programs is open to all qualified individuals. Texas A&M does not discriminate on the basis of an individual’s disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended in its admissions, accessibility, treatment and employment policies and procedures in effect for 2020 admission.

Admission to the Texas A&M Maritime Academy (TAMMA) requires an additional application. Acceptance to an academic program by the Office of Admissions does not constitute admission to the TAMMA and U.S. Maritime Service License Option Program. Full information regarding TAMMA application and required documents is located at http://www.tamug.edu/corps/apply.html.

To obtain an information packet or schedule a campus visit, call toll free at 1-87-SEAAGGIE, write Office of Admissions, Texas A&M University at Galveston, P. O. Box 1675, Galveston, TX 77553-1675, or visit http://www.tamug.edu/admissions (http://www.tamug.edu/admissions/).

### Applying for Admission

Both Texas resident and non-resident students can apply for undergraduate admission to any Texas Public University for freshman, transfer and international admission by using the ApplyTexas Application. You may access the appropriate application from the ApplyTexas application website www.applytexas.org (http://www.applytexas.org/).

The application for Spring 2021, the application deadline is December 1, 2020. While they are the best guide available, admission criteria are subject to change. The TAMU Galveston website (www.tamug.edu (http://www.tamug.edu)) contains the admission policies and procedures in effect for 2020 admission.

### Admission Deadlines

- The application for Freshman admission will be available July 1, 2019. The application deadline for domestic freshman is March 1, 2020, with all supporting documents submitted by March 15, 2020 to be considered for admission.
- The application for Transfer admission will be available July 1, 2019. The application deadline is June 30, 2020.
- The application for an International Freshman student is due:
  - To apply for Fall 2020, the application deadline is December 1, 2019.

  - To apply for Fall 2020, the application deadline is December 1, 2019.
  - To apply for Spring 2021, the application is available from April 1, 2019 to August 1, 2019.
• The application for an International Transfer student is due:
  • To apply for Fall 2020, the application deadline is December 1, 2019.
  • To apply for Spring 2020, the application is available from April 1, 2019, and the deadline is August 1, 2019.
• The application for Readmission will be available July 1, 2019 for Fall 2020. The application deadline for readmission is June 30, 2020.
• The application for Post Baccalaureate admission will be available July 1, 2019. The application deadline is May 30, 2020.
• The application for Non-degree Seeking admission will be available July 1, 2019. The application deadline is June 30, 2020.

Required Immunizations
• Texas Education Code (TEC) 51.9192 requires all entering students (under the age of 22) to provide evidence of vaccination against bacterial meningitis received within the last 5 years or a signed affidavit declining the vaccine at least 10 days prior to the start of classes for any given semester. Learn more about bacterial meningitis at http://www.tamug.edu/admissions/BacterialMeningitis.html.

Guidelines for Requesting Application Fee Waivers:
Fee waivers are not available for international students.

Freshman Waivers
Applicants who qualify for federally funded free/reduced lunch programs may qualify for a fee waiver. Students must certify their eligibility on the application. Please see our admissions website, http://www.tamug.edu/admissions (http://admissions.tamu.edu/freshman/apply/admissions (http://catalog.tamu.edu/undergraduate/galveston/general-information/www.tamug.edu/admissions/), for additional information relating to fee waivers.

Transfer or Readmit Waivers
To request a fee waiver, please provide your Student Aid Report (SAR), which you will find within your current FAFSA or a copy of an award letter from your current institution. Check the fee waiver box on the application will not satisfy the fee waiver requirement. The documents can be uploaded through the Applicant Information System (AIS) portal, faxed to (409) 740-4731 or provided by U.S. mail.

All fee waiver request documents may be mailed to the following address:
Texas A&M University at Galveston
Office of Admissions
P. O. Box 1675
Galveston, TX 77553-1675

Information concerning credit by examination may be obtained from the Seibel Learning Center Staff, (409) 741-4343. For information regarding current procedures for accepting credit, please visit the Seibel Learning Center (http://www.tamug.edu/slsc) website.

Gateway Program
The Galveston Gateway Program helps incoming students become fully prepared for their academic program. Students will be selected for the Gateway Program during initial review of their application for admission to the University; any student offered provisional admission through the Gateway Program is required to satisfactorily complete the program in order to gain full admission to the University.

Galveston Gateway students begin at TAMUG for the Summer II term and complete preparatory coursework, some of which will apply towards their major. At the conclusion of the Summer term, students who have met the terms of the program will continue as full students in good standing for the Fall term. Students who do not meet the terms of the program will be reviewed for possible continuation on probation or full suspension.

For additional information, contact the Seibel Learning Center at (409) 741-4343.

Entry to a Major – College of Engineering
Freshmen in General Engineering, Engineering at Galveston, or Engineering Academy programs have a common first year engineering curriculum to allow time for students to learn about the 17 engineering degree granting majors. It is recognized that in most cases students are not made aware of all of our engineering majors while in high school. Students are introduced to the different engineering majors in the first year engineering courses. Students are encouraged to leverage additional resources, including the career center, faculty, as well as advisors to get career advice. Students must complete the following courses in at least two semesters before applying to an engineering major: two engineering courses, two math courses, and two science courses in the freshman year engineering curriculum. Exceptions will be made as needed for students entering with credit for the required courses. The entry-to-a-major process is designed for students to take ownership of their future to identify at least three majors that are a good match for their career goals and academic performance. The entry-to-a-major process is designed to place students in the highest rank major possible based upon capacity and student performance. Students are encouraged to be in a major as early as possible. Students in the General Engineering and Engineering at Galveston programs must be in a major by the end of the third semester in engineering. Students in the Engineering Academy program must be in a major by the end of the fourth semester in engineering.

Transfer students are admitted directly to a degree granting major through the admissions process.

Tuition and Fees
Tuition and Fees for Texas A&M University at Galveston

Payment of Tuition and Fees (p. 787)
One Time Only Fees (p. 787)
Housing and Meal Plans (p. 788)
Tuition and Fees: Texas Resident and Non-Texas Resident (Both undergraduate and graduate) (p. 788)
Tuition and Fees: Texas A&M Maritime Academy Cadets (p. 788)

S (p. 788)ea Term
Other Expenses (p. 788)
Students Dropped for Non-Payment (p. 788)
Payment of Tuition and Fees

Students must meet all financial obligations to the University by their due dates to avoid late penalties, regardless of timing of payment assistance (scholarships, loans, tuition assistance, etc). Failure to pay amounts owed may result in cancellation of the student’s registration and their being barred from future enrollment and receiving official transcripts. Students who wish to pay fees in installments can select the option on the My Finances tab at their Howdy portal at https://howdy.tamu.edu/cp/home/displaylogin (https://howdy.tamu.edu/cp/home/displaylogin/).

- Payments to Student Business Services may be in the form of cashier's check, personal check, debit card or money order payable to Texas A&M University at Galveston (or TAMUG). All checks and money orders are accepted subject to final payment. Debit cards are also accepted in person. Cash is not accepted at the Cashier's booth.
- Discover, Mastercard and American Express credit cards and E-checks are accepted for tuition and fee payments over the website at the Howdy Portal/ My Finance Tab. Convenience fees of 2.25% will be charged for online credit card transactions, with a minimum $3 charge. Visa credit cards cannot be used for payment.

No tuition and fee statements will be mailed. Notices of amounts owed should be obtained through the Howdy Portal/ My Finance Tab at https://howdy.tamu.edu/cp/home/displaylogin (https://howdy.tamu.edu/cp/home/displaylogin/). An email will be sent to a student's University email address (email.tamu.edu) when the tuition and fee statement is available to view online. Students must use their Howdy NetID and password to log into these two programs.

Students who plan to pay their bill in full by the due date will receive notification through their University email address that the fee statement is available to view online and when tuition is due and payable.

Students may choose to pay tuition and fees in installments. Students on the installment plan will receive notification through their University email account that the fee statement is available to view online and when each installment payment is due and payable. In addition, students will be notified through this medium when any changes have occurred to their tuition and fee statement and if and when they have a refund available. All financial aid or loans must be accepted before being applied toward the student's account.

Late Payment Penalty

There are severe penalties for failure to pay student account balances and installments by their specified due dates. If a payment is delinquent when a semester ends, the student will be blocked and may not receive credit for academic work performed. Students will not be readmitted to the University until all past due balances, including late charges, are paid. A late fee of $25 will be assessed for each payment not received on or before it is due. If a student is removed from the rolls of the University or is withdrawn for failure to pay amounts owed the University, a reinstatement fee of $200 will be assessed in addition to any other late fees or penalties already incurred and must be paid before the student will be reinstated. Current due dates can be found at the Student Business Services website.

Late Registration Fees

Students who register on or after the first day of classes are assessed a late registration fee of $100. Students who register after the official census date (12th class day for fall and spring, 4th day for summer) are assessed a late registration fee of $200. Students who add classes after the official census date are assessed a late fee of $50. Note: Penalties, late registration and late add fees also apply to students who are required to re-enroll because their registrations were cancelled for nonpayment. Registrations are subject to cancellation and/or financial penalties if sufficient payment is not received before 5:00 p.m. on the semester due date.

Use of Collection agencies and Credit Bureau

If amounts become past due, the University reserves the right to report the account to the Credit Bureau. This will also initiate internal collection efforts and could cause the University to employ an outside collection agency to collect the debt. If any collection efforts must be made, the student will be required to reimburse the University for the fees of any collection agency, which may be based on a percentage at a maximum of 30% of the debt, and all costs and expenses, including reasonable attorney’s fees the University incurs in such collection efforts.

Cancelling Registration

Once students have registered for classes, they must select one course of action from the following to remain in good standing with the University:

- pay all amounts due by the specified due date.
- use the online registration to drop all classes prior to the first day of classes.
- initiate the withdrawal process online in Howdy to begin the process to withdraw from the University after the first day of classes.

Following this procedure is especially important for students who have been awarded scholarships or financial aid since the aid may automatically pay tuition and fees and cause the registration to be held even though the student has decided not to attend. Failure to request cancellation of an unwanted registration may result in grades of F or I in all courses for the semester. The student will be required to reimburse the University for scholarships and other financial aid applied to his or her account and will be held responsible for paying all fees for the semester, regardless of whether he or she attended classes.

Cancellation for Nonpayment of Tuition and Fees

The University reserves the right to cancel registrations not paid by their due date, or the official census date for a semester or summer term, to comply with state laws requiring payment of tuition and fees, to free the classroom spaces for other students, and to ensure the most efficient use of university resources.

One Time Only Fees

**Housing and Meal Plans**

With limited exception, all undergraduate students enrolled in more than nine credit hours are required to reside in campus housing (if available) and are required to purchase a meal plan. Information concerning a request to live off-campus can be obtained at [http://www.tamug.edu/cll/PoliciesProcedures.html](http://www.tamug.edu/cll/PoliciesProcedures.html) (http://www.tamug.edu/reslife/Housing/Campus%20Housing%20Requirement.html). Any student living off campus at the beginning of the semester who adds enough hours to require living on campus must pay for room and board for the entire semester. Residence hall fees are included in the fee schedules at [http://www.tamug.edu/cll/HousingOptions.html#Pricing](http://www.tamug.edu/cll/HousingOptions.html#Pricing) (http://www.tamug.edu/reslife/Housing/HallSpecifics.html). In certain cases, single room housing is offered. The fee for that room is the normal rate plus 50%.

Upon admission to the University, students who will be living on campus must submit a $75 housing application fee to reserve their spot in the residence halls. A waiver for the housing application may be submitted. To do so, the student should submit the housing application with an attached letter stating reasons for the waiver request. In order to be considered, the student must have a FAFSA submitted to TAMUG. The waiver request can be emailed to reslife@tamug.edu or mailed to TAMUG Residence Life, P.O. Box 1675, Galveston, TX, 77553-1675.

Students requesting to change meal plans during the semester will have 20 days from the first class day to make any changes and the cost of those changes will adhere to the University’s refund schedule. Requests for changes to a meal plan after the 20 day period will not be permitted. All changes must be made through the Dining Services Office at (409) 740-4508.

Meal Plan Fees:
- For On Campus: [https://new.dineoncampus.com/tamug/for-on-campus](https://new.dineoncampus.com/tamug/for-on-campus)
- For Off Campus: [https://new.dineoncampus.com/tamug/for-off-campus](https://new.dineoncampus.com/tamug/for-off-campus)

**Tuition and Fees: Texas Resident and Non-Texas Resident (Both undergraduate and graduate)**

Tuition and fees can be found at [http://tuition.tamu.edu/galveston](http://tuition.tamu.edu/galveston). The student will need to know his/her chosen tuition plan for determination of his/her tuition and fees.

**Tuition and Fees: Texas A&M Maritime Academy Cadets**

Cadets enrolled in MARB-LO, MARS-LO, MART or MARR-LO curricula pay a special tuition rate regardless of their state residency status (in-state or out-of-state). License Option students who are residents of the state of Texas will pay instate tuition plus $12.50 per semester credit hour. License Option Students from states other than Texas will pay the instate variable plan plus $12.50 per semester hour plus a Differential Tuition of $300.00 per semester hour.

Tuition and fees can be found at [http://tuition.tamu.edu/galveston](http://tuition.tamu.edu/galveston). The Cadet’s cohort will determination the applicable Tuition and Fees. NROTC Midshipmen, Drill and Ceremonies Cadets or International Cadets are not eligible for this special License Option tuition and must pay normal Texas Resident or Non-Resident as applicable.

**Summer Sea Term**

Cadets in the License Option Program must achieve the minimum sea service aboard ships required by the U.S. Coast Guard within four (4) years. In order to obtain federal financial aid, students must enroll in a minimum of six semester credit hours during the summer term. Cadets may meet this requirement by completing two additional semester credit hours by distance or by completing an additional course on campus.

Either of these options will result in additional tuition expenses.

The Summer Sea Term expense for training aboard the Texas A&M Maritime Academy assigned training ship or a designated alternate ship includes tuition and fees plus a sea term (cruise) fee. There could be additional travel expenses to and from the ports plus lodging in addition to the cost of the sea term which is estimated to be between $11,500 to $12,500. The Summer Sea Term meal plan expense includes state and city tax of 8.25%.

**Other Expenses**

This may include uniforms with an initial outlay of $1,500, special training such as Fire Fighting School and incidentals.

Students who are dismissed or withdraw from a license-option degree plan after the semester begins will have fees adjusted to the appropriate resident or nonresident rate retroactive to the beginning of the semester.

License-option Cadets who are granted a leave of absence for the summer and who enroll in the onshore summer program at the Mitchell Campus instead of the summer sea term will pay license-option fees as appropriate for that period.

License-option Cadets must complete all required sea service within four (4) years.

**Emergency Tuition and Fee Loans**

Emergency tuition and fees loans are available to help students get through the crunch at fee payment time. Students can borrow up to the amount of their tuition and fees for a maximum term of 90 days in the Fall and Spring semester and 30 days in the Summer semester. The loan proceeds are applied directly to the student’s account to cover current due charges. Students that anticipate their financial aid or some other third party payment may be delayed are encouraged to pursue an emergency tuition and fees loan so they will not get dropped from their classes or incur additional fees. Students may apply for this loan at the Howdy Portal/ My Finance Tab.

Short term loans are also available to pay optional fees, such as residence hall fees, meal plans, parking, etc. They can be repaid within 12 months. To qualify you must be registered for 6 hours in the fall or spring semester and 3 hours in the summer term and be clear of all past due loans and blocks. To obtain short term loans, students should consult with Student Business Services, located in the Main Building Suite 104 or at 409-740-4434.

**Returned Payments**

If a check or ACH payment accepted by Student Business Services, the bookstore or any other campus department is returned unpaid by the bank on which it is drawn, a penalty of $30 will be assessed. The...
returned check or ACH payment and the penalty fee must be paid with cashier’s check, money order or credit card online. If not redeemed, the student may be dropped from the University. Student accounts will be blocked for future registration and transcripts. The student is eligible for reinstatement after payment of penalties, a $50 reinstatement fee and redemption of the check or ACH payment. If Student Business Services receives three returned checks or ACH payments from one student, the University will no longer accept this payment type for the student.

Fees
Please note that not all fees listed below are relevant to all students.

Application Fee
Students who submit an application for undergraduate studies pay a $75 fee. Students who submit an application for graduate studies pay a $50 fee. International students pay a $90 application fee.

Career Center Fee
This $35 fee is required of students in the semester they register for on-campus interviews to support full-time and internship placement services. This fee is optional if the student desires to access career services through Texas A&M University in College Station.

Commercial Cruise Fee
A fee of $1200 will be charged for all license option students sailing on a commercial cruise.

Distance Education Fee
$46 per semester credit hour is assessed to students taking courses using distance education resources.

Field Trip Fees
A field trip fee ranging from $15 to $5,740 may be charged for courses that include field trips.

Diploma/Graduation Fee
A non-refundable fee of $47.50 per degree sought is assessed the semester a student applies for graduation. This must be paid within the first 15 class days of the student’s final semester. Late payment of the Graduation Fee will result in a $50 late charge.

International Student Service Fee
International students who are not sponsored are assessed a $85 fee each semester to defray administrative support costs.

Independent Study Abroad Fee
In the event that a student is planning to Study Abroad, this fee of $100 is to cover services provided by the TAMU Study Abroad Office.

International Student Health Insurance
International students (students who are not U.S. Citizens or Lawful Permanent Residents of the United States) enrolled at Texas A&M are required to have health insurance. International students will be automatically enrolled in and charged for the System Student Health Insurance Plan (SSHIP) unless they apply for and are granted a waiver. Individually purchased plans from vendors other than the Texas A&M University System provider will not be eligible for a waiver of automatic enrollment in the SSHIP. This is to ensure that medical treatment will be available in the event of injury or illness during enrollment at the University. This requirement includes students enrolled in extensive English language programs. Full-time English Language Institute (ELI) students should contact ELI for information. All other international students can receive more detailed information about this requirement by visiting http://admissions.tamu.edu/international/iss/ (http://admissions.tamu.edu/international/iss/). Specific questions may be directed to International Student Services by emailing ISS@tamu.edu.

General Property Deposit
A deposit of $100 is required of every student to ensure the institution against losses, damages, and breakage for which the student is responsible, or to be used to offset in part amounts owed by the student to the institution. General deposits are returned to students, less any such amounts owed to the institution, within a reasonable period after the date of the student’s withdrawal or graduation from the institution, not to exceed 180 days. The deposit retention period provides the University sufficient time to identify all amounts owed and to determine if the student intends to enroll in the semester or summer session immediately following the student’s withdrawal or graduation or, if the student withdraws or graduates in the spring semester, in the next fall semester. If a student leaves the University without graduating or officially withdrawing, they must submit a written request to Student Business Services to receive a refund of their deposit. Deposits for students that do not graduate, withdraw or otherwise request a refund remain on file for four years. Those deposits are forfeited to the University’s General Deposit Scholarship Fund, after deducting any amounts owed the University.

Health Services Fee
This fee is required of all students enrolled in Galveston-based classes at the rate of $44.50 for each regular semester, $44.50 for the summer training cruise, and $22.25 per five-week summer term. This fee will finance health services provided by a local clinic in Galveston, and medical services on the summer training cruise.

Housing Application Fee
An application fee of $75 is required as part of a completed housing application. Exact stipulations and details regarding the use and return of that deposit are listed within the contract signed with the application. A waiver for the housing application fee may be submitted. To do so, the student should submit the housing application with an attached letter stating reasons for the waiver request. In order to be considered, the student must have a current FAFSA on file with Financial Aid. The waiver request can be emailed to reslife@tamug.edu or mailed to TAMUG Residence Life, P.O. Box 1675, Galveston, TX, 77553-1675.

Identification Card Maintenance Fee
All students must have an identification card. This card is used in registration procedures, collection of fees, for dining hall privileges, etc. If the card is lost or stolen, a reissuing fee will apply.

Installment Plan Fee
If a student chooses to use the installment plan for payment of tuition and fees, there is a $15.00 nonrefundable charge for Fall and Spring Semesters. There is no no charge for the installment plan in the summer semester.

Laboratory Fees
A laboratory fee ranging from $8 to $30 is charged for each laboratory course each semester.
MMAL (Master of Maritime Administration and Logistics) and MMRM (Master of Marine Resources Management)

Program Fee
This fee is required of all graduate students enrolled in the MMAL and MMRM program and assessed at $750.00 for instate residents and $1500 for non-residential per semester. The MMAL and MMRM program fee will be utilized to provide program administration and departmental operating costs in order to sustain a quality graduate program, as well as to provide for innovative growth.

Mail Service Fee
Limited availability exists for students residing in non-university owned or operated housing to rent a campus mailbox. The fee is $20 per semester and $20 per ten week summer term. Inquiries should be directed to the Bookstore (409-740-4488). Students have mail services included as part of the University's room charge if they are residing in university owned housing.

Cadet Drug Test Fee
The Cadet Drug Test Fee is $30 per semester and is required for all License-Option Cadets.

New Student Conference Fee - Graduate
The Graduate New Student Conference fee is required of all new graduate students enrolling in the fall or spring semesters and selected summer terms at the rate of $50 per student. This fee supports the provision of advanced materials to accepted students and the activities and food during the orientation.

New Student Conference Fee - Undergraduate
The New Student Conference fee is required of all new freshmen students at the rate of $225. New transfer students enrolling in fall or spring semesters and selected summer terms will be charged $153 per student. This fee supports the provision of advanced materials to accepted students, the presentation of new student conferences (including some meals) and student activities.

Parking Permit
All students parking an automobile or motorcycle on the campus pay a fee of $200 for the academic year (Fall, Spring, Summer). By request, prorated refunds can be issued for terms not used. Parking rates are subject to change each fiscal year.

Recreational Sports Fee
This mandatory $105 fee assessed for the fall and spring terms and $52.50 for each 5-week summer term will provide building maintenance and programming support for recreational sports facilities.

Student Center Complex Fee
The mandatory Student Center Complex Fee is required for all students at the rate of $100 per spring or fall semester or $50 for the five-week summer term. This fee will be used for the operation, maintenance, programming improvement and purchase of equipment for the student center complex and for the acquisition and construction of additions to the complex.

Supplementary Fee for Courses Attempted More than Twice
A course that is repeated by a student more than twice at a public institution of higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students, or charge a supplementary fee to the student who is repeating the course. Texas A&M has chosen to assess a supplementary fee to those students repeating a course more than twice. A student attempting certain courses more than twice at Texas A&M University will be subject to a supplementary fee of $125 per semester credit hour ($375 for a 3 hour course) for the repeated course, in addition to tuition and required fees associated with the course. The general criteria for determining which courses are subject to the supplementary fee are:

- A course is subject to the fee if a student has completed it twice at Texas A&M University with a grade of A, B, C, D, F, F* (academic dishonesty), S (satisfactory), U (unsatisfactory), I (incomplete), Q (authorized drop after the add/drop period), F# (Freshmen Grade Exclusion) or X (no grade submitted).
- Courses identified by the University as repeatable for credit are not subject to the fee. A schedule of repeated courses can be found at admissions.tamu.edu/registrar/general/threepeat.aspx.
- Courses dropped with no record (NR), no grade (NG) and withdrawals (W) are not counted as repeated courses.

Students will be notified at the time they register for a course that it has been taken twice at Texas A&M University and is subject to the supplementary fee.

Testing Administrative Fee
A $50 per test fee will be used to pay for personnel to proctor credit-by-exams and TSI tests and to pay shipping costs to send tests to testing centers.

Texas A&M Maritime Academy Orientation Week Fee
The Texas A&M Maritime Academy Orientation Week (O-Week) Fee is $43 and covers equipment and supplies needed during the Corps of Cadets O-Week. Meals for O-Week are a separate charge and will be added to the semester bill following O-Week.

University Advancement Fee
The variable University Advancement Fee is a required fee charged to all Texas A&M University students. The Advancement fee funds services such as advising, technology, library and administrative services such as ID services, utilities, access to discounted software and many services provided through Student Services.

University Authorized Tuition
This variable fee is assessed to compensate for occupancy, services, use and/or availability of all or any of the property, buildings, structures, activities, operations and other facilities of the campus.

Other Expenses
Textbooks and Supplies: The cost of textbooks and supplies will vary with the quality of items purchased and with the course of study pursued. Students can expect to pay about $800 for each fall and spring semester. Expenses for the summer term should amount to approximately one-half of the above estimates.

License Option Cadet Expenses: License-option Cadets must purchase uniforms with initial outfitting estimated at $1,500. Other items such as caps, belt buckles, and name tags may be required to be purchased from the TAMUG Bookstore.
A Sports Pass which will allow a student to attend Texas A&M University home games may also be purchased at registration. Refunds are not allowed for individual games or games missed.

The University operates a bookstore which supplies textbooks, stationery, drawing instruments, toiletries and other supplies. All merchandise is sold at retail prices prevailing in the area. Major credit cards are accepted in the bookstore.

**Student Fiscal Appeals**

If a student finds themselves in an issue related to the application of University Student Fiscal Policy, such as excess hours, please access the information under http://fms-galveston.tamu.edu/sbs-galveston/student-fiscal-appeal-process for an explanation of the Student Fiscal Appeal Process and an application for appeal.

**Scholarships**

For entering students, including freshman, transfer, and domestic graduate students, all scholarships are awarded based on information from the ApplyTexas application for admissions, including information collected in the Scholarship section of the application. If any awards require additional information, those students that are deemed qualified based on the ApplyTexas will be notified. The priority deadline for incoming student scholarships is December 1\(^{st}\). The final deadline for the Freshman Terry Scholarship is January 24\(^{th}\). The deadline for the Levy Fellowship is January 1\(^{st}\).

For continuing students, the University Scholarship Application (http://financialaid.tamu.edu/uwideapp/) is used for awarding institutional scholarships. In order to receive a scholarship from Texas A&M University at Galveston for the upcoming school year, a student must complete the University Scholarship Application online by February 1\(^{st}\). Award recipients are primarily selected by a committee of faculty and staff from across the university who utilize this application and any other necessary supplemental information. In some cases, the selection is made directly by the donor of the scholarship funds.

To view scholarships available, visit http://www.tamug.edu/Scholarships (http://www.tamug.edu/finaid/Scholarships/). For additional information, contact the Scholarship Office at scholarships@tamug.edu or 409-740-4414.

Student Incentive Program (SIP) (p. 793)
Additional LO Requirements (p. 794)

The Texas A&M Maritime Academy (TAMMA), formed in 1962, is a specialized, maritime education and training program within Texas A&M University at Galveston (TAMUG) where Academy Cadets complete a rigorous academic program with a regimented lifestyle. The Maritime Academy educates and trains professional U.S. Coast Guard-credentialed mariners, Navy Reserve Officer Training Corps (ROTC), as well as Drill and Ceremony cadets who carry on the maritime and military traditions of our campus while they pursue other career goals serving the needs of the State, the Nation and the global marketplace.

**Admission to the Texas A&M Maritime Academy**

Applicants to the Texas A&M Maritime Academy (TAMMA) must apply to the university and to TAMMA. Admission to the TAMU Galveston Campus does not guarantee admission to the TAMMA. In addition to the common application, (Applytexas.org) prospective students must submit an application to the TAMMA to one of the three programs embedded into the Corps of Cadets. Each individual programs has additional admissions requirements. Refer to the License Option, NROTC, and Drill & Ceremony program requirements found on the TAMMA website [3]. Due to program and professional requirements established in Federal law (46 CFR Part 310) by the U.S. Coast Guard (USCG) and the Maritime Administration (MARAD), the application for admission to TAMMA requires additional application elements detailed below.

- Evidence of the ability to meet the most current medical and physical standards established by USCG regulations. Applicants must apply to the USCG for a medical certificate. The medical and physical evaluation process includes a vision test, hearing test, general medical exam, and demonstration of physical ability [1]. License Option (LO) Cadets must demonstrate ability to meet USCG medical and physical standards within nine (9) months of enrollment. LO Cadets must continue to meet the USCG medical and physical standards throughout enrollment in an LO program. LO Cadets who fail to demonstrate ability to meet most current USCG medical and physical standards will be transferred out of the LO programs.
until the individual is able to meet the most current USCG medical and physical standards. Additional programs such as D&C and NROTC admission requirements can be found on the TAMMA website application page [3].

- Evidence that the Cadet or Midshipman is not a user of dangerous drugs. According to Federal regulations [2], TAMMA maintains a program for testing individuals for evidence of dangerous drug use. During O-Week, TAMMA will test entering freshmen and Cadets transferring into TAMMA for evidence of the use of dangerous drugs. In addition, TAMMA conducts random tests throughout the academic year. Any Cadet who tests positive for the use of dangerous drugs or refuses to be tested will be immediately suspended from the Corps and all LO courses and activities for a period of at least one (1) calendar year, depending upon the outcome of a Return-to-Duty process prescribed and monitored by the USCG. There is no guarantee that a Cadet who is suspended will be permitted to re-enroll in a LO program.
- A criminal background check.

Prospective Cadets may download a TAMMA application through the TAMMA website [3] for a complete detailed list of all admissions requirements.

License Option Graduation Requirements

TAMMA’s Cadets may receive diplomas from Texas A&M University only after 1) successfully completing the courses of study in their academic degree plans, 2) successfully completing required sea service 3) passing a comprehensive professional examination administered by the USCG, and 4) demonstrating knowledge, understanding, and proficiency competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW). The following degree plans offer a License Option:

- BS Marine Biology
- BS Marine Sciences
- BS Marine Engineering Technology
- BS Marine Transportation
- Any Graduate Program offered by TAMUG

All students enrolled in the Marine Transportation program are required to be in the LO program.

Cadets who select an LO degree plan must be motivated, honorable, and willing to experience the rigor and discipline of the regimental structure of the Corps of Cadets for the duration of their enrollment in the program.

License Option Requirements

In addition to the degree requirements contained in the Texas A&M at Galveston Students Rules and the University catalog, LO Cadets must complete the requirements to achieve a Merchant Mariner Credential (MMC)[4] issued by the USCG. The requirements for the MMC are determined by International conventions, Federal law and regulations, and policies established by the USCG and the Maritime Administration (MARAD). The requirements for an MMC are subject to change according to developments at the International Maritime Organization, Congressional action, the Federal rule-making process, and consultations between the USCG, MARAD, and the Maritime Academies.

The international convention with the most direct impact on TAMMA and the requirements for an MMC is the International Convention on Standards for Training, Certification and Watchkeeping for Seafarers (STCW Convention). The main purpose of the STCW Convention is to establish international agreement on training and education standards to promote safety of life and property at sea and the protection of the marine environment.

The STCW Convention establishes endorsements that LO Cadets must achieve in order to graduate and serve aboard commercial vessels in international trade. “Deck Cadets” must achieve the STCW international endorsement as Officer In Charge of a Navigation Watch (OICNW). “Engine Cadets” must achieve the STCW international endorsement as Officer In Charge of an Engineering Watch (OICEW).

LO Cadets must also pass each course required for the desired STCW Convention international endorsement with at least a C and demonstrate each of the required competencies contained in each course. Attendance in LO courses is mandatory.

LO Cadets, regardless of age, prior experience as a mariner, or prior military service must maintain membership in the Corps and complete all of the requirements of the LO program. The minimum period of training is three (3) years or six (6) full semesters as a full-time student. All License Option Cadets and NROTC must participate in the Corps of Cadets until graduation. Applicants who desire to transfer into TAMMA from other State or Federal Maritime Academies are encouraged to inquire regarding current policy and provide documentation regarding prior coursework, sea service, and conduct records from other Academies.

LO Cadets are required to attend all classes in each course required for the desired STCW Convention international endorsement. These courses are identified in the Texas A&M University Catalog. Unexcused absences are not permitted. All sea service must be achieved according to TAMMA’s USCG-approved License Option programs.

Sea Service Requirements

Under Federal law all LO Cadets are required to complete 360 days of sea service. Cadets may achieve the required sea service through a combination of TAMMA-approved assignments aboard training vessels, commercial ships, military vessels, USCG-approved courses that employ simulators, watches aboard TAMMA’s training vessel, and maintenance work. Cadets assigned to approved training vessels receive 1.5 days of sea service for each 1 day assigned. Cadets assigned to commercial or government vessels receive 1 day of sea service for each 1 day assigned. All assignments must be approved by the Superintendent or delegate.

Corps of Cadets

The Corps of Cadets (Corps) focuses on leadership development and provides Cadets and Midshipmen enrolled in the Navy Reserve Officer Training Corps program (NROTC) a disciplined environment designed to prepare its members to become successful Merchant Marine or military officers.

Members of the Corps are required to attend formations, drills (including parades at College Station), stand announced and unannounced personnel and room inspections, participate in physical fitness activities, and perform other duties required by the Corps Operations Manual and Sea Term manual (LO cadets).

TAMMA’s Superintendent is responsible for TAMMA’s administration and the operations of the Corps of Cadets. The Corps of Cadets includes

1) License Option Cadets (LO Cadets) who are studying and training to fulfill the professional requirements to become Merchant Marine Officers through TAMMA’s USCG-approved training program. These Cadets
enroll in TAMMA’s License Option (LO) programs and must maintain membership in good standing in the Corps.

2) Midshipmen who meet the qualifications for acceptance into TAMUG’s NROTC program. Midshipmen seek commissions in the U.S. Navy upon graduation. Midshipmen integrate fully into the Corps, and must complete all degree requirements as well as courses required by the Navy.

Students may join the NROTC program as National Four-Year Scholarship Winners or as non-subsidized college program applicants. Interested prospective Midshipmen may obtain information on the National Four-Year Scholarship program through any Navy recruiting office. The application deadline is January 15 of the year of admission. All NROTC scholarships cover the costs of tuition, fees, and uniforms. All scholarship junior and senior-level Midshipmen receive a monthly allowance and are paid for summer training periods.

3) Drill and Ceremony (D&C) Cadets who desire the structure, rigor, leadership training, and camaraderie of membership in the Corps. D&C Cadets are full members of the Corps, must purchase all required uniforms, perform drills, stand formation, and participate in personal and room inspections. Drill and Ceremony cadets do not participate in summer sea term courses aboard the training ship. Each D&C Cadet will receive a certificate indicating voluntarily participation and membership in the TAMUG Corps of Cadets.

Corps members are encouraged to participate in on-campus sports, clubs and educational activities and may compete for places on the Hearn Honor Guard, the Drill Team, the Sea Aggie Band, and the Flag Color Guard.

Members of the Corps are generally required to live on campus in the state-of-the-art Texas A&M Maritime Academy Hall.

Standards of Conduct
In addition to the Texas A&M University at Galveston Student Rules and the Texas A&M University Rules the Corps operates according to rules and standards contained in the Corps Operations Manual and the Cadet Instructions Manual[5]. Among other things, these publications establish mandatory uniform regulations, standards of dress, grooming, and discipline.

The Corps’ conduct and discipline system, administered by the Commandant, is a method for assessing the aptitude and motivation of each corps member for becoming a mariner or military officer.

Corps members who violate the Corps’ standards of conduct receive demerits and Cadets that consistently violate the Corps’ standards of conduct may be suspended or dismissed from the Corps. Cadets enrolled in any of the LO programs must maintain membership in good standing in the Corps. LO Cadets who are dismissed or suspended from the Corps but who are permitted to remain at TAMUG may not enroll in LO courses and will be removed from the Corps housing. Cadets who are not Texas residents, will be required to pay out-of-state tuition costs retroactively to the beginning of the term.

The Corps includes a special unit called “Victor Company”. Victor Company is veterans of the U.S. Armed Services or individuals who are married and/or with dependents or over the age of 25 when first enrolled in TAMMA. The Victor Company Cadet Commander reports directly to the Commandant and Victor Company members follow all Corps regulations including watches and practical training aboard TAMMA’s training vessel. Cadets in Victor Company are permitted to live off campus.

The Corps also includes International Cadets. With approval, international Cadets may pursue the LO education and training required to become Merchant Marine Officers and earn a degree from Texas A&M University. However, International Cadets are subject to U.S. immigration laws and may not take the USCG license exams. Instead, international Cadets receive a certificate of completion of their respective degree plans.

TAMMA will provide each Cadet accepted into the Corps a list of required uniform items along with procedures for purchasing uniforms. Entering Cadets should order uniforms as soon as they learn they have been accepted into the Corps.

TAMMA will issue uniforms during Orientation Week prior to the start of the Fall Semester.

Orientation Week
Prior to the beginning of the Fall semester, all freshman and transfer students entering TAMMA, NROTC, or D&C must attend Orientation Week (O-Week).

Under the guidance of the Commandant, members of the Corps of Cadets’ leadership team plan and execute O-Week to introduce each new member to the Corps’ routines and traditions. Cadets also learn military bearing and customs, basic seamanship, engineering, and nautical science skills. O-Week training includes, military formations, marching to class and meals, team-building exercises, hands-on seamanship training, and other training to enable new members to hit the decks running when the entire Corps returns from training sea terms and/or assignments at sea.

Student Incentive Program (SIP)
LO Cadets may qualify for financial support through MARAD’s Student Incentive Program (SIP).[6] LO Cadets who receive financial support through SIP participate in the Navy Strategic Sealift Midshipman program (SSO) program and receive a commission as Ensign, USNR upon graduation and may apply for active duty service with the Navy following graduation.

In order to qualify for the financial support under SIP, LO Cadets must:
1. Pass a Navy physical examination and maintain Navy medical standards,
2. Pass semi-annual Navy Physical Readiness Tests,
3. Maintain a minimum GPA of 2.5 (4.0 system),
4. Be under the age of 27 by graduation. Waivers are available for prior service students.

Upon graduation, LO Cadets who accept financial support through SIP must:
1. Complete the course of instruction at TAMMA,
2. Within three (3) months of completion of the TAMMA course of study, achieve a merchant mariner license with appropriate national and international endorsements for service aboard vessels in domestic and international voyages with unlimited endorsements,
3. For at least six (6) years maintain a valid 1) merchant mariner license with appropriate national and international endorsements for service aboard vessels in domestic and international voyages with unlimited endorsements, 2) transportation worker identification credential, and 3) USCG medical certificate.

4. Apply for and accept, if tendered, an appointment as a commissioned officer in the Navy Reserve including the Strategic Sealift Officer Program, the USCG Reserve, or any other reserve component of the Armed Forces of the United States for at least eight (8) years.

5. Serve the foreign and domestic commerce and the national defense for at least three (3) years after graduation.

LO Cadets with interest in the SIP are encouraged to speak with TAMMA and NROTC staff about the details of applying and the obligations following graduation.

Additional LO Requirements

In addition to minimum requirements associated with courses within USCG-approved program of study and training for international STCW Endorsements, Cadets are required to obtain several training endorsements required by the USCG. Some of these include, but are not limited to Basic Safety Training, Basic and Advanced Firefighting, Radar and Automated Radar Plotting Aids, Global Marine Distress System (GMDSS), and Bridge Resource Management.

LO Cadets are also required to apply for and maintain a valid Transportation Workers Identification Credential (TWIC), and a current Passport. TAMMA will assist each Cadet in obtaining the required endorsements and documents. However, it is each Cadet’s responsibility to maintain a current portfolio of all required documentation. A complete list of these requirements and costs will be available during New Student Conferences.

[4] 46 CFR §10.107(b) defines Merchant Mariner Credential as combining the individual merchant mariner’s document, license, and the STCW endorsement into a single mariners qualification document, certificate of identification, and certificate of service.

[6] Cadets enrolled in TAMMA’s License Option (LO) program may apply for Student Incentive Payments (SIP) provided by the Department of Transportation’s Maritime Administration. Title 46 USC 51509-51511 describes the details of the SIP. Cadets are encouraged to seek guidance from TAMMA staff regarding SIP.

Campus Dining

With limited exceptions, all students are required to live in campus housing, if campus housing is available, and purchase a meal plan. Students residing in campus housing and classified as U1 on the first class day must select one of the Block 240 or Block 200 meal plans. Students residing on campus and classified as U2 or above on the first class day must select one of the Block 240, Block 200 or Block 160 meal plans.

All Dining Plans are loaded onto the Student ID card to make access and use easy.

Fees for the selected meal plan will be added to your Texas A&M University student fee, and are separate from housing fees. Any plan purchases or additions made after the ninth week of class cannot be charged to the student’s account and must be paid via credit card. This date is subject to change, so please check with Dining Services when needing to purchase or add to your plan.

Dining Plans include 2 parts: First, “Meals,” which can be used at the all-you-care-to-eat dining hall (Captain’s Landing located in the Student Center). “Meals” can also be used in Sbisa Dining Hall in College Station when a student travels to College Station for activities (football games, visits with friends, etc.). The second part of the dining plan consists of

Services

Services for Texas A&M University at Galveston Students

Campus Dining (p. 794)
“Dining Dollars.” These declining balance dollars can be spent like cash or a debit card, and are accepted at all dining locations. Each purchase is automatically deducted from the account.

Dining Dollars roll over from fall to spring with the purchase of a spring dining plan. “Meals” do not roll from one semester to another.

Dining Dollars are only accepted on campus, assuring parents and guardians that this money is spent only on food and beverages.

Applicable sales tax will be added at checkout.

Students requesting to downgrade their meal plans during the semester will have 20 days from the first class day to make any changes and the cost of those changes will adhere to the University’s refund schedule. Downgrades can only be made if the student is not already on the minimum required plan. In order to add or upgrade a meal plan, please do so by 7 weeks from the start of the semester. All changes must be made through the Dining Services Office at (409) 740-4508.

Campus Recreation
The Campus Recreation Department commits to Aggies learning for a lifetime by providing safe and inclusive programs promoting wellness of mind, body, and spirit while developing marketable skills which enrich the education of our students and the campus community.

The Intramural Sports program offers the campus community the opportunity to compete in a variety of Men's, Women's, and/or Co-Rec leagues or tournaments. Intramural sports are open to all currently enrolled students as well as TAMUG faculty and staff. There are no registration fees charged for participation. Instructions on how to sign-up for an intramural sport can be found within the Intramural Sports tab.

The Club Sports program provides students with the chance to focus on a particular sport or recreational activity, and in many cases compete in or pursue that activity at a higher level.

The Outdoor Program grants students, faculty, and staff the opportunity to participate in outdoor pursuits such as surfing, camping, rock climbing, stand-up paddleboarding, and kayaking.

Additionally, the Campus Recreation Department oversees aquatic facility operations at the campus outdoor pool including open swim hours, hiring of lifeguards, and facility rentals.

The Fitness program allows students, faculty, and staff to participate in group exercise classes, personal training sessions, and fitness orientations.

The Student Wellness program creates educational opportunities for students around the 8 dimensions on the wellness wheel - Spiritual, Physical, Intellectual, Emotional, Environmental, Social, Financial, and Occupational.

Career Services
Career Services can offer a variety of services for students in every stage of the career planning process, from your freshman year through graduation. These services include:

- Web based job and internship postings
- Resume and cover letter assistance
- Interview preparation and mock interviews
- On-campus interviews and employer presentations
- Specialized workshops for employment research, job and graduate school searches.
- Job search and networking tips
- Email distribution list for job and internship postings.
- Career counseling
- Two annual career fairs, one in Fall and another in the Spring

Counseling Services
The Office of Student Counseling provides services to undergraduate and graduate students at Texas A&M University at Galveston. The Office is staffed by licensed counselors and the services rendered to students are free, voluntary, and confidential. The Office staff is dedicated to assisting students in their pursuit of personal and academic growth, to helping students gain a better understanding and appreciation of themselves, and to supporting students as they make important decisions about their lives.

What is counseling?
Counseling, most simply stated, is an interaction between a person who is struggling in some way and in need of help, and another person who is trained in helping people find solutions for their struggles. The reasons for coming are many, and the counseling strategies employed also vary from counselor to counselor. The one constant is that the counselor focuses all energies on trying to help the student. It doesn't always work, but our student evaluation forms suggest that most students who seek counseling believe that it has been helpful to them. And if you feel uncertain about whether counseling is for you, we encourage you to make an initial appointment and discuss any reservations you might have with one of our counselors. There is no obligation to continue.

Course Support
Deeper understanding, extra practice at applied theory, and intellectual skill building differentiate students who attend Course Support Sessions from those who don’t. Peer Consultants guide learning in foundational courses such as Chemistry, Math, Physics as well as disciplines including Accounting, Economics, Engineering, Marine Transportation, and Statistics. Course Consultants are successful students whom made an A in the course and are endorsed by faculty; they facilitate sessions in one-on-one and small group settings guiding students through homework problems and difficult course concepts using example problems. Groups of five to seven students work together in small blocks of time throughout the week.

www.tamug.edu/tutoring (http://www.tamug.edu/tutoring/)
Disability Services
The Counseling and Career Services office provides services to students with documented disabilities. The office offers information on disabilities, campus services, and related resources. Persons with disabilities are encouraged to apply for services early and to request a meeting to discuss their individual needs prior to registration. Accommodations provided to students are based on individual need. Information regarding disabilities can be obtained through the Counseling and Career Services, P.O. Box 1675, Galveston, TX 77553-1675, call 409-740-4736.

Diversity
Consistent with the core values of Texas A&M University the mission of the Office of Student Diversity Initiatives at Texas A&M at Galveston (TAMUG) is to provide programs and services that encourages members of our community to gain a deeper understanding, awareness, and appreciation for their own culture, as well as embracing the dignity of all cultures from our global society. Goals of diversity include creating an inclusive community of respect that positively encourages and attracts diverse populations to join and contribute to the university community as a student, faculty, and/or staff member.

Our vision is to be a model of inclusion and cultural competency that empowers holistic student development, transformational learning through inter-cultural dialogue, and collaborative networks that advocate for social justice in a diverse university community. To fulfill the vision, we offer programs and services that:

- Advocates and supports students and cultural groups in their identities.
- Collaborates with campus and community entities to ensure a positive university climate that advocates for justice, access, equity, and transformative learning for all students, with special focus on underserved students.
- Provides student support by building relationships of commitment and trust.
- Provides opportunities for students to develop as leaders by fostering a community of respect and building cross-cultural relationships.
- Provides diversity education and programs that allow dialogue and intersecting discussions regarding age, citizenship, disability/ability, education, ethnicity, gender, gender identity/expression, geographical location, language, military experience, political views, race, religion, sexual orientation, socioeconomic status, and/or thought to aid with developing students’ understanding of themselves and other cultures.

It is our mission to serve ALL students, but recognize the need to be especially attentive to the needs of those identifying themselves as African American/Black, Asian/Asian American, Hispanic/Latino(a), LGBT, Native American/American Indian, Multi-Racial, and/or Student Veterans.

Financial Aid & Scholarships
The mission of Scholarships & Financial Aid is to provide students with information and financial resources to attend Texas A&M University at Galveston as well as supporting programs that promote higher education and developmental opportunities. As a part of this promise, we strive to give financial solutions to students at all income levels and with different academic, merit, and leadership qualifications.

Need-based financial aid is designed for students who have financial need, as defined by the Free Application for Federal Student Aid (FAFSA) or other applicable application, in order to assist students in paying college expenses. All financial aid depends on student enrollment and making Satisfactory Academic Progress (SAP), as defined by Scholarships and Financial Aid or the specific aid program.

Financial Aid
Financial aid is available in two forms: Gift Aid and Self-Help.

Gift Aid
- Grants (Federal, State, Institutional)
- Scholarships
- Texas Application for State Financial Aid (TASFA)

Self-Help
- Loans (Federal, State, Institutional, Alternative)
- Student Employment (Work Study, Part-time Employment, Internships, Assistantships)
- Non-resident Tuition Waivers

Texas A&M University’s packaging philosophy for need-based financial aid is to provide the greatest amount of gift aid to those students with the highest need and to keep loan debt to a minimum. Financial aid is awarded on a first-come, first-served basis with a priority date before the fall semester for which the student is seeking aid.

To apply for financial aid, a student must submit a Free Application for Federal Student Aid (FAFSA). The FAFSA becomes available on October 1 each year for the next academic year. Students are encouraged to submit their FAFSA online at https://studentaid.gov/h/apply-for-aid/fafsa (https://studentaid.gov/h/apply-for-aid/fafsa/) by the state priority deadline of January 15. Students who do not meet the citizenship eligibility requirements to complete the FAFSA may be eligible to submit the Texas Application for State Financial Aid (TASFA). Only students who have been accepted to the University, have a FAFSA or TASFA on file, and have turned in all requested items to Scholarships & Financial Aid will be sent a financial aid offer. Financial aid offers for incoming Fall semester students are made early in the prior Spring semester. Award offers for incoming Spring semester students are made late in the prior Fall semester. Financial aid offers to continuing students for the upcoming academic year are made after Spring semester grades have posted. Summer financial aid is offered to students with a FAFSA or TASFA on file who enroll at least half-time in summer at Texas A&M.

Financial aid offers are made based on full-time enrollment in the Fall and Spring semesters. Cost of attendance and awards will be adjusted for students who are enrolled less than full-time at Texas A&M University. Students may only receive federal financial aid for eligible courses that count toward the student’s degree. State and institutional aid are not subject to the same rules. However, the cost of attendance for students will be reduced for courses that are not counting to the program of study, which can result in a lower amount of state and institutional aid a student could receive.

Student questions may be sent to:

Grants

The Federal Pell Grant is available to undergraduate students who have not received a bachelor’s degree and who have financial need based on the FAFSA.

The Federal Supplemental Educational Opportunity Grant (FSEOG) and the Texas Public Education Grant (TPEG) are available to students who show financial need based on their financial aid application and when funds are available. These funds are awarded on a first-come, first-served basis.

The Towards EXcellence, Access and Success (TEXAS) grant is available to eligible Texas residents who have a set level of financial need according to the FAFSA/TASFA and have met the program rules; it is also subject to funds availability and eligibility guidelines as defined by the Texas Higher Education Coordinating Board.

Additionally, Texas A&M University provides institutional grant aid to eligible students to assist with educational expenses. Student grants are subject to fund availability and may be single-year or multi-year awards.

The Federal/Texas College Work Study Programs

Federal and state programs provide part-time employment for U.S. citizens, permanent residents, and eligible non-citizens, within fund limitations, who have an established financial need and desire on-campus employment.

To qualify for the Federal/Texas College Work Study Programs, a student must have submitted a financial aid application, have financial need, be eligible to work in the United States, be enrolled at least half-time or accepted for enrollment, and be making Satisfactory Academic Progress.

All Work Study students are paid minimum wage or higher, work an average of 20 hours per week, and are not eligible for paid holidays, retirement, vacation, nor sick leave.

Loan Programs

The Federal Direct Loan programs are available to students who have submitted a FAFSA. Students will be notified of their eligibility for Direct Loans through a financial aid offer.

Students and parents seeking the Parent Loan for Undergraduate Students (PLUS) may obtain information from the financial aid website. This program requires the FAFSA to be on file with Scholarships & Financial Aid.

Short-term loans are available to provide assistance to students who experience temporary financial difficulties with educationally related expenses. Funding for this program is provided by The Association of Former Students, the Class of 1926, and other University resources. This program is not intended to provide long-term assistance or to replace other assistance available through Scholarships & Financial Aid. Students must be degree-seeking and enrolled at least half-time to be eligible for short-term loans.

The Emergency Tuition and Required Fees loan program is available to help students pay their tuition and required fees. The loan is applied directly to the student’s tuition and fee account.

Please refer to our website for detailed information on all of these programs.

Changes in Status that Impact Financial Assistance

Dropping or Q-dropping a course affects a student's enrollment status. In turn, enrollment status may impact certain funding sources. The following describes these impacts.

- Enrollment Status – A student’s enrollment status continues to be adjusted throughout the semester when a student drops or Q-drops a course. Please visit or speak with Scholarships & Financial Aid to determine if dropping a course will have an impact on your financial aid.
- Health Insurance – In the past, students often needed to maintain full-time enrollment to continue to be covered under their parents’ health insurance policy. With the implementation of the Affordable Care Act (ACA), that is no longer required. A dependent can now be covered under their parents’ insurance plan until the age of 26 regardless of their enrollment status as a student.
- Financial Aid & Scholarships – Scholarships & Financial Aid will check enrollment status on two occasions – when a student’s aid is released to their billing account and on 12th class day of a Fall or Spring semester. A student’s aid amount can be adjusted if the student’s enrollment status changes between the time funds are disbursed to the billing account and the 12th class day. However, after the 12th class day, enrollment status is not a factor for aid that has already disbursed and instead any changes in enrollment status will be reviewed through financial aid’s Satisfactory Academic Progress standards for subsequent semesters. If aid has not been disbursed prior to the 12th class day, then the enrollment status on the date the aid is disbursed is what matters. In the Summer semester, enrollment status is officially checked on the 5th class day of the Summer session(s) in which the student is enrolled.
- Student Loan Repayment – Students must maintain at least half-time enrollment throughout the semester for student loans to remain in an in-school deferred status. Dropping below half-time enrollment will trigger student loans to enter any applicable grace period, with repayment required after the grace period has elapsed. Changes in enrollment status from full-time to half-time have no consequence on student loans. Half-time enrollment for a graduate student is defined as 5 hours and for an undergraduate student it is defined at 6 hours.

Scholarships

Incoming Freshmen Scholarship Programs

- Achievement Scholarships are available to incoming freshmen who attended and graduated from targeted high schools in the State of Texas. Awards are based on academic achievement, leadership ability, and extracurricular participation. For priority consideration, students must complete and submit the ApplyTexas (http://www.applytexas.org/) freshmen scholarship application no later than December 1 of their senior year of high school.
- Scholarships are available to incoming freshmen who achieve a minimum 1300 Old SAT composite score (critical reading + math, with respective scores of 600 in each), 1360 New SAT composite
Continuing Student Scholarships

- The University Scholarship Application is available to students with at least one semester completed at Texas A&M. Awards range in value from $500 to $1,500 and are available to undergraduate, graduate, and professional students currently enrolled at Texas A&M. Some awards are limited to certain fields of study and to individuals who have attained a necessary academic classification, while others are unrestricted. Awards are made to outstanding students based on a combination of academic achievement, campus/community involvement, campus leadership roles, and, for some scholarships, financial need. Students are encouraged to complete the application beginning in October via the scholarships website (https://scholarships.tamu.edu/). The deadline for submitting applications is February 1, prior to the academic year for which the student will be awarded.

Transfer Student Scholarships

- Aggie Transfer Student scholarships are designed to recognize outstanding students who will be transferring to Texas A&M University at Galveston. Scholarships are awarded based on a combination of academic achievement, extracurricular activities, campus involvement at their current institution, leadership, major and, in some instances, financial need. These award amounts can range from $500 to $1,500 and the application is available to students through the ApplyTexas (http://www.applytexas.org/) application.

Scholarship Recipients and Non-Resident Tuition Waivers

- The Competitive Scholarship waiver, authorized under Texas Education Code 54.213a, is an optional waiver that institutions can implement. An eligible non-resident student who holds a competitive academic scholarship of a specified minimum dollar amount for the academic year or summer for which the student is enrolled may be eligible to pay the fees and charges required of Texas residents without regard to the length of time the student has resided in Texas. The student must have competed with other students, including Texas residents, for the scholarship and the scholarship must be awarded by a Texas A&M University college or departmental scholarship committee or university representative. An outside donor may be consulted for input by the college or departmental unit; however, outside donor(s) may not make the final selection of the student recipient for a scholarship.

- Effective Fall 2017, undergraduate students must be awarded and maintain competitive scholarships of at least $4,000 per academic year in order to qualify for this waiver. All graduate students, all professional students, and current undergraduate students with existing and continuing scholarship awards, may continue to receive this waiver at the previous $1,000 threshold.

- More information is available at http://scholarships.tamu.edu/Non-Resident-Tuition-Waiver (http://scholarships.tamu.edu/Non-Resident-Tuition-Waiver/)

For additional information on scholarships, please visit https://scholarships.tamu.edu/ or email scholarships@tamu.edu.

Health Services

Texas A&M University at Galveston contracts with the University of Texas Medical Branch (UTMB) Family Medicine clinic for health services for enrolled undergraduate students. Under the contract, office visits to the doctor are free of charge. Medications, inoculations, x-rays, physicals, and other services provided at the clinic may be covered under students’ private insurance or at the student’s expense. Hospitalization and emergency room visits are full-charge at the student’s expense.

Group Insurance: Since there are numerous health needs and costs, which are not provided or paid for by Student Health Service, students are strongly encouraged to maintain medical insurance. A group plan is available to all students in the Texas A&M University System. Information about this program will be distributed during new student orientation and are available from the student counseling office. Students and parents should give careful consideration prior to dropping any current health insurance.

Emergency Medical Transport: Please note that if an ambulance or other emergency transport is called, it is the responsibility of the student to cover any cost incurred, it is not the liability of the University.

Texas A&M University at Galveston Campus Honors Program

Texas A&M University at Galveston Honors Program believes in and promotes student success by motivating and challenging students to expand their education to a deeper, more enriched, and intellectually stimulating level.

Students in the Galveston Honors Program are encouraged to design an individualized Honors plan of study that could include independent study, research, or a thesis based on the individual student’s academic, personal, and professional goals.

Honors Program Eligibility

Invitation into the Galveston Honors Program is open to:

Incoming freshmen with a minimum score of 1250 on the SAT or 28 on the ACT and in the top 10 percent of their graduating high school class, as well as National Merit Finalists, National Achievement Finalists, or National Hispanic Scholars, are automatically admitted into the Texas A&M University at Galveston Honors Program. Incoming students entering Galveston Honors are required to participate in the Honor Experience their 1st semester (Fall) to maintain Honors status.

Continuing students with a cumulative Grade Point Average (GPA) of 3.5 or higher at Texas A&M University will receive an invitation to join Honors Program at the end of each successful semester until they have reached over 90 credit hours. A 3.5 cumulative GPA is required to remain eligible for participation in the Honors Program.

Honors Program Requirements
The following minimum requirements must be competed for students to receive an Honors designation on their official transcript:

1. A minimum of 18 Honors credits.
2. No more than 6 Honors credit hours can come from the Texas Common Core of Curriculum or Common Body of Knowledge.
3. At least 9 Honors credit hours must come from the student's major or minor requirements, can include research, independent study, and/or internships (that are university/department sponsored)
4. Student must take 3 one credit hour Honors seminars.

To make progress toward the Honors distinction, Texas A&M University at Galveston Campus students must:

1. Maintain a Texas A&M University GPA of 3.5 and accumulative Honors GPA of at least 3.25.
2. Receive advising toward Galveston Honors distinction each semester.
3. Fulfill annual co-curricular participation and service requirements, including at least two Honors Program events each semester.

In the event an Honors student fails to meet any of these requirements, a probationary semester is granted. Continued failure to meet these requirements results in dismissal from the Honors Program.

Honors Program Core Coursework

The following three Honors Seminars are required:

GALV 101 (Connections): Exploration of connections between academic disciplines, including science and the humanities; proposes and engages with “big questions,” such as what it means to be human.
GALV 201 (Research Methods): Interdisciplinary research methods and research practices with an emphasis on writing for and presenting to different audiences.
GALV 401 (Service Learning): Experiential learning opportunity in which students apply the objectives of the course to engage with and reflect upon meaningful community service to better understand civic responsibility.

Housing

The Office of Campus Living & Learning coordinates on-campus housing in modern student residence halls. Rooms are double and single occupancy and furnished with beds, desks, chairs, wardrobes or closets, and dressers. Students are expected to furnish pillows, blankets, shower curtains, linens, and cleaning supplies.

Students not enrolled in the Texas A&M Maritime Academy (TAMMA) are required to live on campus until the first Fall semester that they turn the age of 21 (one must be 21 prior to the start of the Fall term to qualify). Exceptions may be granted for special circumstances that are listed below.

Permission to live off-campus is typically granted if one of the following circumstances are met:

- The student is married and living with their spouse in the local Galveston area.
- The student is a single parent/guardian and their child resides with them at their local Galveston area residence.
- The student is a veteran of the U.S. Armed Forces (copy of DD-214; not active duty for training only).
- The student will live with a parent/guardian in the Galveston area. (A typed verification letter will be required)
- The student will enroll in 9 credit hours or less for the semester.
- The student has an approved medical accommodation through the Office of Disability Services.

On-campus housing is required for all Cadets enrolled in TAMMA who are under the age of 25 unless they have been granted Victor company status through the Corps of Cadets.

Any student who believes they qualify to live off campus must apply for permission to seek off-campus housing. Approximately 60 percent of the undergraduate students are housed on campus, and returning students are given priority in granting permission to live off campus. Campus residents accepting housing in the fall semester are required to sign a Fall and Spring Semester contract and are not permitted to move off campus for the spring semester. An on-line application for campus housing, which is separate from the application for admission to the University, is available from the Office of Campus Living & Learning website at www.tamug.edu/CLL (http://www.tamug.edu/reslife/). Rooms are assigned in accordance with the date on which the housing application and room deposit are received in Financial Management Services.

Upon admission to the University, students who will be living on campus must submit an application containing a housing agreement and one-time, non-refundable housing application fee to be eligible to receive a Residence Hall Assignment. A waiver for the $75 non-refundable application fee may be submitted. To do so, the student should submit the housing application with an attached letter stating reasons for the waiver request. In order to be considered, the student must have a FAFSA submitted to TAMUG. The waiver request can be emailed to reslife@tamug.edu or mailed to TAMUG Campus Living & Learning, P.O. Box 1675, Galveston, TX, 77553-1675.

It is recommended that housing applications be submitted early. In the event that on-campus housing is not available, information concerning off-campus housing will be provided upon request. Since TAMMA Cadets are required to live on campus, Cadets will be able to pursue a license option only if campus housing is available for them.

Housing Costs

The cost of housing for each semester will vary based on the residence hall and room style a student resides in. Visit https://www.tamug.edu/cll/HousingOptions.html#Pricing for current costs.

International Student Services

The Office of Student Diversity Initiatives serves as the liaison with the International Student Services Office at Texas A&M University in College Station. Personal counseling, financial planning, liaison with embassies and consulates, legal referrals, academic referrals, immigration matters, orientation programs, and advisement to groups, are among the services offered in collaboration with the Office of Counseling Services, Financial Aid, and International Student Services in College Station, TX.

For more information regarding International Student Services, contact the Office of Student Diversity Initiatives, P.O. Box 1675, Galveston, TX 77553-1675 or call 409-740-4582.

Learning Commons

The Learning Commons is a vital part of student academic support, success, and lifelong learning by developing strong curricular partnerships with faculty and tailoring a variety of programs...
and resources for all students. Our programs provide a modern learning experience for all students, contribute to a dynamic scholarly environment, deliver high impact learning opportunities, and foster engagement with research methods and materials. Academic support programs employ over 100 students annually in leadership, teaching, and mentoring roles. These opportunities develop professional and marketable skills through experiences as peer consultants and make students competitive for jobs after graduation.

www.tamug.edu/learningcommons (http://www.tamug.edu/learningcommons/)

Library
The Jack K. Williams Library and Commons hosts student-centered services and an electronic, print, and archival collection devoted to Marine and Maritime subjects in conjunction with students’ courses; a computer lab for resource discovery; equipment checkout; and individual, small group, and large group study spaces. The Library supports learning with research instruction, technology, information discovery, and reading/writing skills.

Collection Services and the Research Commons promotes student success by connecting Sea Aggies with information resources in and beyond the Jack K. Williams Library’s academic work and acquires books, articles, and more from libraries around the world. In addition, The Research Commons helps students and faculty acquire information literacy and promotes inquiry and critical thinking.

The Learning Commons is a vital part of student academic support and success. The Learning Commons provides a modern learning experience for all students, contributes to a dynamic student learning community, provides high impact learning opportunities and fosters lifelong learning in students. The Learning Commons impacts student success through a variety of programs and resources including the Writing Lab, Studio, Course Tutoring and Supplemental Instruction.

The Teaching Commons, another division of The Commons, provides faculty with teaching and instruction tools to creatively engage students in learning.

In addition, the Commons supports the Honors Program and Undergraduate Research Services.

Jack K. Williams Library (http://www.tamug.edu/library/)

Learning Commons (http://www.tamug.edu/learningcommons/)

Parking
Vehicles parked on the Galveston campus are required to display a valid parking permit, except for those parked in designated visitor’s spaces. When not purchased for the full year, the annual cost of permit is prorated. For more information or to purchase a faculty, staff or student permit, visit http://www.tamug.edu/police/parking/.

Registration and Academic Status
The Texas A&M University at Galveston follows the same guidelines and definitions as the College Station Campus. Registration for the fall and spring semesters is accomplished at several times. During the fall and spring semesters (in November and April), a preregistration period is held for currently enrolled and readmitted students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New Student Conferences serve as an opportunity for new undergraduate students to register. Further information concerning registration may be obtained from the Office of the Registrar. The schedule of classes is available online.

Seibel Learning Center
The mission of the Seibel Learning Center (SLC) is to contribute to the academic success of all undergraduate students at Texas A&M University at Galveston by providing them the information and support needed to become skillful, self-directed learners. Its aim is to guide students through the integration of curricular, co-curricular, and personal choices into a purposeful academic journey. Vital aspects of this effort include advising students on how to navigate an ever-evolving learning environment, coaching students on effective learning behaviors, connecting students to high impact opportunities, and providing individualized solutions to ease student transitions.

Specific SLC programs include Academic Advising (for all first year students as well as General Academics majors), the Academic Coaching and Success Program, academic compliance and testing oversight, FIRST Program, Galveston Gateway, BEYOND Program, and the General Academics major. For additional information, please visit tamug.edu/slc (http://www.tamug.edu/slc/).

Student Activities
It is easy to get involved at Texas A&M University at Galveston, and there are many good reasons to get involved.

As would be expected, student life at TAMUG is often centered around the ocean. Many clubs and sports often involve water, but we have numerous active student organizations including many professional organizations that cover a wide variety of interests. The only question is which organization, or organizations, are right for you?

We follow Aggie traditions such as Yell Practice, Muster, Silver Taps, SALT Camp (Sea Aggies Learning Traditions), The Big Event and the famous Aggie Ring. Students may also get involved with the Student Government Association, the Nautilus (newspaper), or Sea Spray (literary magazine).

As you can see, there are numerous opportunities to enrich your college career by practicing the six core values of Texas A&M University: Excellence, Integrity, Leadership, Loyalty, Respect, and Selfless Service.

Student Affairs
The Division of Student Affairs, Suite 101 in the Seibel Student Services Center, is responsible for the social, moral, and intellectual development of Texas A&M University at Galveston students through their involvement in student organizations, leadership activities, recreational sports, and other co-curricular and extracurricular activities. Student Affairs also oversees Housing, Judicial Services, student diversity initiatives, counseling and career services, and the residence life programs as well as advises student organizations about program planning, university rules, risk management and the function of organizations to students throughout their college career. Furthermore, they allocate funding for eligible student organizations and aid in campus wide events such as Aggie Muster, Maritime Ball, Family Weekend, and Springfest. In addition to providing students an avenue to participate in several club activities, Student Affairs is also responsible for dispersing football tickets and ordering the highly honored Aggie Ring.
The Division of Student Affairs encourages all students to take advantage of the many opportunities available through ‘the other education’ activity programs.

### The Studio

The Studio aims to target communication and presentation needs for all students, staff, and faculty exploring visual and audio communication mediums. Services include equipment checkout, dedicated audio room, individual and group editing stations, lightboard, green screen, interview station, presentation station, lighting, audio mixing boards, and microphones. The Studio encourages discovery of visual mediums by hosting Adobe Creative Suite software along with additional audio, video, graphic, and storyboarding software. Projects are supported by Video and Speech Consultants who assist in the creation and use of media for students and faculty and development of public speaking skills.

www.tamug.edu/hypermedia (http://www.tamug.edu/hypermedia/)

### Supplemental Instruction (SI)

Supplemental Instructors design fun and collaborative study sessions based on course topics to reinforce challenging concepts and strengthen understanding. SI support is offered for historically difficult courses usually in the first year. These guided group study sessions are taught by successful students whom made an A in the course and are endorsed by faculty. SI Leaders partner with faculty to design active learning sessions and prepare students for exams; These sessions as taught three times weekly at diverse times for broad access to all students. Regular attendance throughout the semester helps students stay on track or get ahead, build confidence through critical thinking and problem solving, and meet other students and form study groups.

http://www.tamug.edu/supplementalinstruction (http://www.tamug.edu/supplementalinstruction/)

### Undergraduate Research

Undergraduate Research Services promotes student success by providing high-impact educational experiences and challenges motivated students in all academic disciplines to pursue an enriched, intellectually-stimulating curriculum. The Undergraduate Research programs bring together outstanding students and faculty to build a community of knowledge-producers, life-long learners, nationally-recognized scholars, and world citizens. Research opportunities are open to all undergraduates and is a collaborative effort between undergraduate students, graduate students, and faculty using an inquiry-based approach to generate new knowledge.

Being involved in undergraduate research allows students to participate in a scholarly community of students with common interests, to learn more about their future professional field, and to develop a close working relationship with acclaimed faculty. Research experiences make students more competitive for scholarships, internships, jobs, international opportunities, and admission to top graduate and professional programs. Perhaps most importantly, engaging in undergraduate research allows students to experience the excitement of working collaboratively to create new knowledge, solve cutting-edge problems, work collaboratively, and communicate more effectively—life skills that are increasingly valued in our world.

Visit www.tamug.edu/undergraduate research (http://www.tamug.edu/undergraduate research/) for more information or to apply.

### Undergraduate Research Scholars

The Undergraduate Research Scholars (URS) program seeks to provide eligible undergraduates with a graduate student experience by allowing them to participate in research and communicate their findings as principal authors to the University’s scholarly community.

Undergraduates who participate in the Undergraduate Research Scholars (URS) program will ultimately:

- Produce a written undergraduate thesis to be published in the Undergraduate Research Scholars Capstone Collection in the Texas A&M OAKTrust Repository (http://oaktrust.library.tamu.edu/handle/1969.1/3367/)
- Make a public presentation
- Gain knowledge that didn’t come from a classroom
- Improve their chances for acceptance into graduate or professional schools, fellowships, and grants
- Gain a better understanding of graduate school
- Network with students and faculty

To apply for the Undergraduate Research Scholars (URS) program, students must:

- Be actively involved in an independent undergraduate research project throughout both the fall and spring semesters under the mentorship of a Texas A&M faculty member throughout
- Have completed at least 60 credit hours (junior status) of undergraduate course work
- Have at least 24 credit hours at Texas A&M University
- Have and maintain a cumulative GPA of at least 3.0
- Be expecting to graduate May 2018 or later

### Aggies Commit to Excellence Scholar (ACES)

The Aggies Commit to Excellence Scholar (ACES) program will fund up to 10 undergraduates from all majors to engage in high impact learning and research experiences under the mentorship of TAMUG faculty. The purpose of ACES is to empower all students and encourage underserved student populations to engage in research, as well as offer professional and leadership skills development to foster their interest and aptitude towards pursuing a graduate degree.

ACES students will receive a stipend per semester and renewal from the Fall to Spring semester will depend on successful recommendation of the faculty sponsor and demonstration of appropriate progress. Recipients will present project results at the TAMUG Student Research Symposium and/or other profession conference. A maximum of one student application per faculty member will be considered. Selection of students will be based on meeting the eligibility criteria, the quality of the narrative, and letter of support from the Faculty Sponsor.

Visit www.tamug.edu/undergraduate research (http://www.tamug.edu/undergraduate research/) for more information or to apply.
Louis Stokes Alliance for Minority Participation (LSAMP)

Texas A&M University System Louis Stokes Alliance for Minority Participation, funded by the National Science Foundation, is part of a national initiative to increase the number of underrepresented minority students successfully completing high quality degree programs in Science, Technology, Engineering and Mathematics (STEM) disciplines and to encourage students to matriculate into graduate programs.

LSAMP awardees will receive a research and personal scholarship to cover research related expenses or travel to a conference. Each student will be expected to participate a minimum of 180 research hours split between the Fall and Spring semesters to present their research results at the TAMUG Student Research Symposium and LSAMP Symposium, and/or other professional conference. A maximum of one student application per faculty member will be considered (under exceptional circumstances such as a collaborative project or a limited number of Faculty Sponsors, more than one student per professor may be considered). Selection of students will be based on meeting the eligibility criteria, the quality of the narrative, and letters of support from the Faculty Sponsor.

Undergraduate Research Ambassador

The Undergraduate Research Ambassadors work to inspire broader engagement in undergraduate research by educating and serving the Texas A&M University at Galveston community. Ambassadors represent LAUNCH at research, recruiting, and outreach events.

To be eligible, the student must:

• Have at least one semester of faculty-mentored undergraduate research experience
• Have at least 60 credit hours (24 hours at TAMUG) and maintain a GPA of 3.0 or higher
• Possess outstanding oral communication skills and describe your undergraduate research to a general audience
• Be willing to serve as a source of information on how to get involved in research
• Provide a letter of support from a Texas A&M faculty mentor

Upon acceptance to program UGR students will be expected to:

• Participate in an all-day orientation and training
• Attend Ambassador meetings
• Participate in at least 10 hours of activities per semester
• Review, interview, and train the incoming class of Ambassadors

University Police

The University Police are responsible for the protection of persons and property of Texas A&M University, and for the enforcement of the laws of the State of Texas and the rules and regulations of Texas A&M University. University police are commissioned peace officers involved in regular foot and vehicle patrol of campus, late-night security escorts, crime prevention programs for the campus community, and criminal investigations for the recovery of property and apprehension of criminals. Officers also provide regular security checks of buildings and property on campus. All members of the campus community are requested to cooperate with University police officers.

Writing Support

Students can meet with peer writing consultants in face-to-face sessions, targeted workshops for course assignments, group visits, and through web conferencing. By making an appointment through TutorTrac in the Howdy portal, students can ask questions about research and organizing/brainstorming or request a review for revision, editing, formatting, citations, and references. The service is available during any stage of the writing life-cycle and for any written or verbal project. Writing Consultants teach strategies & techniques to improve writing for academic growth, career success, and lifelong learning.

www.tam.edu/writing (http://www.tam.edu/writing/)

Facilities

Texas A&M University at Galveston

Facilities

Classrooms, laboratories and meeting spaces are housed within 23 major buildings on the Mitchell Campus on Pelican Island. The Ocean and Coastal Studies building is the largest and best-equipped marine research facility on the Gulf of Mexico. The Jack K. Williams Library and Learning Commons contains over 60,000 books, museum exhibit space, archives and special collections, group study rooms, a classroom, computer lab, collections services workspace, a media lab, writing center and tutoring spaces. The training ship provides additional classroom, meeting and training space during the school year, and an additional fleet of small boats serve as floating classrooms and research stations. Other buildings include five residence halls, the Aggie Special Events Center (ASEC), the James McCloy Arena and the Mary Moody Northen Student Center, which includes our primary dining facility. The Texas A&M University Galveston Campus has telecommunications systems established to communicate statewide within The Texas A&M University System universities and agencies. The Galveston campus has direct access to the Texas A&M University computer network in College Station via remote job entry connect lines.

Housing applications are available from Texas A&M University Galveston Office of Campus Living and Learning website http://www.tamug.edu/cll/ and must be completed online with the one-time application fee. Applications can be cancelled or withdrawn by calling the Campus Living and Learning office, 409-740-4445, or emailing reslife@tamug.edu.

Policies

Texas A&M University at Galveston

Policies

University Statement for Individuals with Disabilities (p. 803)

University Statement on Harassment and Discrimination (p. 803)

Aggie Honor Code (p. 804)

University Student Rules (p. 804)

Fishing Rules (p. 804)
University Statement for Individuals with Disabilities

Texas A&M University (TAMU) is committed to maintaining an accessible campus community and providing reasonable accommodations to qualified students, faculty, staff and visitors, including making its web sites accessible and usable. TAMU does not discriminate on the basis of an individual's disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended.

Students are protected from discrimination regarding access to and participation in TAMU’s programs and activities. TAMU provides academic adjustments and auxiliary aids to accommodate needs of students with disabilities, as defined under the law, who are otherwise qualified to meet the institution's academic requirements.

Students with disabilities who would like to request accommodations may contact the following:

- TAMU, Texas A&M Health’s (TAMH) College of Nursing, Irma Lerma Rangel College of Pharmacy College Station, College of Medicine, and School of Public Health should contact Disability Resources (979) 845-1637 or disability@tamu.edu.
- TAMH College of Dentistry should contact the Office of Academic Affairs (214) 828-8978 or bramsey@tamu.edu to request accommodations.
- TAMU School of Law should contact the Office of Student Affairs at (979) 845-4815 or anyofthefollowing
- TAMUQ should contact the ADA Coordinator at (979) 845-8115 or any of the following campus contacts:
  - TAMU, TAMU School of Law, and TAMH locations should contact the ADA Coordinator at (979) 845-8115 or ADA.Coordinator@tamu.edu.
  - TAMUG should contact the ADA Coordinator at (409) 770-4503 or boyerj@tamu.edu.
  - TAMUG should contact Miguel Trevino at +974-4423-0317 or miguel.trevino@qatar.tamu.edu.

For more information about disability accommodations, see TAMU Student Rule 46, Disability Accommodations in Academic Programs (http://student-rules.tamu.edu/rule46/) or TAMUG Student Rule 46, Disability Accommodations in Academic Programs (http://www.tamu.edu/studentrules/Student_Grievance_Procedures/46_Disability_Accommodations.html).

University Statement on Harassment and Discrimination

Texas A&M University is committed to providing a safe and non-discriminatory learning, living, and working environment for all members of the University community. The University provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation, or gender identity. Texas A&M University will promptly investigate and resolve all complaints of discrimination, harassment (including sexual harassment), and related retaliation in accordance with applicable federal and state laws and University rules and standard administrative procedures.

The University’s response to allegations of discrimination, harassment, and related retaliation will be 1) prompt and equitable; 2) intended to prevent the recurrence of any discrimination, harassment or retaliation; and 3) intended to remedy its discriminatory effects, as appropriate. A substantiated allegation of such conduct will result in disciplinary action, up to and including separation from the University. The University’s student sanctioning guidance for substantiated allegations of discrimination on the basis of sex, including sexual harassment, sexual violence and related retaliation, can be found here: Title IX Sanctioning Matrix (https://urc.tamu.edu/media/1601574/title-ix-sanctioning-matrices-august-2018.pdf).

Students who have questions or believe they have experienced discrimination, sexual harassment, sexual violence, and/or related retaliation are encouraged to contact Kevin McGinnis, Chief Risk, Ethics, and Compliance Officer, at the J. K. Williams Building, Suite 302, College Station, TX 77843. He may be contacted at civilrights@tamu.edu or at (979) 458-0308. Students can also contact the TAMU ADA Coordinator at ADA.Coordinator@tamu.edu or (979) 845-8115, or any of the following campus contacts:

- TAMU, TAMU School of Law, and TAMH locations should contact the ADA Coordinator at (979) 845-8115 or ADA.Coordinator@tamu.edu.
- TAMUG should contact the ADA Coordinator at (409) 770-4503 or boyerj@tamu.edu.
- TAMUG should contact Miguel Trevino at +974-4423-0317 or miguel.trevino@qatar.tamu.edu.

In addition, any report can be submitted to Jennifer Smith, Title IX Officer, at the Medical Sciences Library, Suite 007, College Station, TX 77843. Her telephone number is: (979) 458-8167 and email address is civilrights@tamu.edu. Such reports will be immediately forwarded to the Chief Risk, Ethics, and Compliance Officer for investigation and resolution. The Title IX website can be found at http://urc.tamu.edu/title-ix/.

To report incidents, request accommodations, or inquire about discrimination based on disability, you may contact Peggy Zapalac, ADA Coordinator, at (979) 845-8115 or ADA.Coordinator@tamu.edu. The office address is 750 Agronomy Road, Suite 2101, College Station, TX.
University Student Rules

Each student enrolled at Texas A&M University at Galveston is responsible for being fully acquainted with and complying with the Texas A&M University Student Rules. Specific rules, information and procedures may be found in publications pertaining to each particular service or department. Students are encouraged to reference the website at http://www.tamug.edu/studentrules/ for current published rules and regulations.

Fishing Rules

Texas A&M University at Galveston (TAMUG) is an institution of higher education and does not include any public fishing facilities. Due to significant safety and security concerns TAMUG only allows current students, current TAMUG employees and approved guests to fish on property owned or controlled by TAMUG. Approved guests must be accompanied by an affiliated individual, unless otherwise authorized. Fishing is only permitted on the Mitchell Campus on Pelican Island.

1. Guests of affiliated students and employees are permitted to fish as long as the TAMUG student or employee is with them. Employees and students are responsible for the conduct, compliance, safety and actions of their guests. All fishermen are expected to be courteous and respectful at all times.

2. Students and staff may have a reasonable number of guests at any one time. (Campus Police will determine what is reasonable for the situation)

3. Fishermen may only deploy one or two fishing rods at a time, per fisherman. Fishing rods may not be left unattended.

4. All children must be in the immediate care of an adult. Children 12 years old and under must wear an approved USCG flotation device while on TAMUG docks, piers, and beaches, as well as when they are in or near the water. In addition to dangerous drop-offs and currents, equipment and vehicles in the vicinity of authorized fishing areas can pose a danger to unsupervised children.

5. Fishing is permitted from the dock at any time. Fishing is allowed on the beach, between the dock and the Pelican Island Causeway, or on the fishing pier. The area around the small boat basin is not open for fishing during normal hours of operations or if port operations require it to close temporarily. Open mainly on weekends and holidays.

6. Fishing is allowed at night but may be limited or forbidden during certain times for, training, repairs and/or cruise preparation.

7. No wade fishing is allowed in the oil spill compound, the small boat basin, the Oceanography docks or any areas marked as ‘No Fishing’. Fishing on the Teichman Road campus is strictly limited to affiliated students and employees of TAMUG.

8. All fishermen must have a valid Texas fishing license with a salt water stamp and must present it upon request.

9. No alcoholic beverages, drugs or firearms are allowed on-campus at any time. Anyone found in possession of contraband will be subject to immediate removal and/or citation or arrest.

10. All vehicle operators on-campus must obey traffic signs and directions from University Police officers or University Officials. Vehicles operated on-campus without a valid campus parking hangtag must be registered with University Police and display a TAMUG parking pass.

11. Vehicles may be parked in campus parking areas with authorized parking permits, obtained from the Campus Police Department. Parking on the docks, the beach area or within fire lanes or any
other space which is not a clearly marked parking space, is strictly prohibited. Vehicles in violation of these rules will be cited and subject to tow at the owners expense. Failure to pay parking citations (University cashiers office-SAGC) will result in revocation of fishing authorization for one year from date of violation.

12. No littering. All fishermen are responsible for any trash or debris that they may accumulate while on TAMUG property. Fish cleaning is not allowed at any time on campus property.

13. All rules will be enforced by the Campus Police Department. Anyone who fails to follow the instructions of a Campus Police Officer will be subject to revocation of campus fishing authorization, and/or citation or arrest. All unauthorized individuals will be asked to leave. All fishermen shall be considered ‘notified’ of the rules from posted signs.

14. Texas parks and Wildlife agents frequently check fisherman on campus and notify campus officers if University rules are violated.

15. We reserve the right to investigate all containers left tied to any structure on the TAMUG water front. (anyone that suspects a container may present a problem should immediately call the officer on duty for inspection-409-740-4545) We recommend that all who leave a container in the water make sure it has their name and phone number on it, for verification. Homeland Security rules prohibit containers of any kind to be left near the ship or between the dock and the ship. These containers will be removed and discarded without notification. No ropes, strings or lines of any kind will be fastened to water lines, gas lines, electrical conduit or any other piece of infrastructure on the water front. They will be removed and discarded without notification. Any authorized staff or researcher, who finds any unauthorized containers or fastening in the normal course of their duties may remove and discard such objects without notice. (report to Campus Police at time of removal)

16. The fishing pier, located in the sw corner of campus, is small and can only accommodate a small number of fishermen at any one time. Campus Police may relieve any overload situation by whatever reasonable means are available at the time. Safety is number one.

17. No exception to these rules may be made without the approval of the TAMUG CEO or Executive Vice President or their designee.

Title IX – Sexual Discrimination, Sexual Harassment, Sexual Assault & Violence

“No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance...”

(20 U.S.C. Section 1681)

Notice of Nondiscrimination and Abuse

Texas A&M University at Galveston is committed to providing a safe and non-discriminatory learning, living, and working environment for all members of the University community. The University provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation, or gender identity. Texas A&M University at Galveston will promptly investigate and resolve all complaints of discrimination, harassment (including sexual harassment), and related retaliation in accordance with applicable federal and state laws.

The University’s response to allegations of discrimination, harassment, and related retaliation will be 1) prompt and equitable; 2) intended to prevent the recurrence of any harassment; and 3) intended to remedy its discriminatory effects, as appropriate. A substantiated allegation of such conduct will result in disciplinary action, up to and including separation from the University. Visitors, contractors, and third parties who commit discrimination, harassment, retaliation, or complicity may have their relationships with the University terminated and/or their privileges of being on University premises withdrawn.

Reporting Responsibilities

Any employee who observes or has knowledge of discrimination, harassment, retaliation, or complicity must promptly report all known information about the incident(s) to the University’s Designated Official unless they are designated as a “confidential employee” below. Pursuant to state law, the sanction for failure to report an incident of sexual harassment, sexual assault, dating violence, or stalking is termination of employment.

Confidential Employees

Certain University employees have been designated as Confidential Employees: licensed health care personnel and licensed counselors when acting in this capacity as part of their official employment. These employees only report de-identified statistics to the Designated Official.

Where to Report an Incident

# Designated Official: The University has designated Jennifer Smith, Assistant Vice President and Title IX Coordinator to receive all reports of discrimination, harassment, retaliation and complicity related to a protected class or status. Protected classes or statuses include: race, color, sex, gender identity, age, religion, disability, national origin, immigration status, citizenship status, sexual orientation, genetic information, or veteran status.

# To file a report with the University, please contact:

Ms. Jennifer M. Smith, TAMU Assistant Vice President and Title IX Officer

Medical Sciences Library

202 Olsen, Suite 007

College Station, TX 77845

(979) 845-0977
civilrights@tamu.edu

# Local Campus Contact (Allegations against Students): For making inquiries regarding allegations of discrimination by students, you may contact:

Dr. Todd Sutherland, TAMUG Associate VP of Student Affairs

Seibel Student Services Center #101G,

Galveston, TX 77554
To Report Abuse or Neglect of Persons Age 65 or Older, Persons with # Galveston County Sheriff's Office (409) 766-2300
# Galveston Police Department (409) 765-3702
# Texas A&M University at Galveston Police Department (409) 740-4545

...pursued separately or at the same time. An individual wishing to pursue... through law enforcement. Disciplinary and criminal remedies may be...disciplinary remedies through the University and criminal remedies through law enforcement. ...complainant may also choose to decline to notify law enforcement. Any...report to both entities.

...appropriate local law enforcement agency. A complainant will be assisted...of such report. Retaliation may be present even where there is a decision of "unsustained," "insufficient information to substantiate," "not responsible" or "not guilty" on the allegations of discrimination, harassment, or related retaliation. Retaliation does not include good faith actions lawfully pursued in response to a report of discrimination, harassment, or related retaliation. Violation of an interim, remedial, or protective measure will be considered retaliation.

...students, faculty and staff are prohibited from retaliating against a person for (1) making a good faith report of a violation of Texas A&M System policies, university rules, student rules, and/or the law; or (2) participating in any proceeding related to the investigation or resolution of such report. Retaliation includes threatening, intimidating, harassing, coercing or any other conduct that would discourage a reasonable person from engaging in activity protected under this policy. Retaliation may be present even where there is a decision of "unsustained," "insufficient information to substantiate," "not responsible" or "not guilty" on the allegations of discrimination, harassment, or related retaliation. Retaliation does not include good faith actions lawfully pursued in response to a report of discrimination, harassment, or related retaliation. Violation of an interim, remedial, or protective measure will be considered retaliation.

...students, faculty and staff are prohibited from retaliating against a person for (1) making a good faith report of a violation of Texas A&M System policies, university rules, student rules, and/or the law; or (2) participating in any proceeding related to the investigation or resolution of such report. Retaliation includes threatening, intimidating, harassing, coercing or any other conduct that would discourage a reasonable person from engaging in activity protected under this policy. Retaliation may be present even where there is a decision of "unsustained," "insufficient information to substantiate," "not responsible" or "not guilty" on the allegations of discrimination, harassment, or related retaliation. Retaliation does not include good faith actions lawfully pursued in response to a report of discrimination, harassment, or related retaliation. Violation of an interim, remedial, or protective measure will be considered retaliation.

False Complaints
Any person who knowingly files a false complaint of discrimination, harassment, complicity or retaliation is subject to disciplinary action, up to and including dismissal or separation from the University. A finding of ‘unsustainted’ or ‘insufficient information to substantiate’ does not imply that a complaint was false.

Confidentiality
The confidentiality of a complaint of sexual misconduct and all documents, correspondence, and information collected during an investigation will be maintained by the University on a need-to-know basis to the extent permitted by law.
A student or an employee who is a victim of sexual harassment (including sexual misconduct or stalking), domestic violence, or dating violence, whether it occurred on or off-campus, has certain resources, rights and options. Information is available at TAMUG Title IX Resources, Rights, and Options for Individuals Subjected to Sexual Harassment, Sexual Misconduct, Stalking, Domestic Violence, or Dating Violence

A student or an employee who is accused of sexual harassment (including sexual misconduct or stalking), domestic violence, or dating violence, whether it occurred on or off-campus, has certain resources, rights and options. Information is available at TAMUG Title IX Resources, Rights, and Options for Individuals Accused of Sexual Harassment, Sexual Misconduct, Stalking, Domestic Violence, or Dating Violence

For additional information concerning federal and state policies, please reference the appendices (p. 1299) in this catalog.

Department of Foundational Sciences

The mission of Foundational Sciences (FSCI) is to be a community of engaged faculty who offer academically excellent and pedagogically innovative classes in mathematics, chemistry, physics and statistics. We envision that all Galveston students will be challenged and successful in the high quality coursework we offer. Our faculty are proactively engaging the students with hands-on high impact learning experiences and support activities for their coursework.

FSCI advises for and facilitates minors supporting the Oceans and One Health degree and other programs on the Galveston Campus. The department offers the coursework needed for minors in Mathematics (http://catalog.tamu.edu/undergraduate/science/mathematics/minor/), and Chemistry (http://catalog.tamu.edu/undergraduate/science/chemistry/minor/), through the respective departments at Texas A&M. The department also facilitates the STEM (http://catalog.tamu.edu/undergraduate/education-human-development/teaching-learning-culture/ stem-minor/) minor (Science, Technology, Engineering and Mathematics), which will lead to students being certified for teaching life science or chemistry for grades 7-12.

• Bachelor of Science in University Studies, Oceans and One Health Concentration (p. 808)

University Studies - BS, Oceans and One Health Concentration

Oceans and One Health is an interdisciplinary concentration that allows the student to explore the intersection between human, animal, and environmental health specific to the coastal environment. This degree program is intended for students who wish to pursue medical, dental, veterinary, or health-professional degrees or those interested in health issues in urbanized coastal communities. It is a flexible but robust program that provides opportunities for students to have a solid background in the physical and biological sciences, environmental science, and/or health-related disciplines. Students can choose their focus from a diverse list of concentration electives and minors to tailor their degree to their professional goals.

Through a partnership with the University of Texas Medical Branch (UTMB) in Galveston our Oceans and One Health students who apply and are admitted to UTMB after completing 95 hours at TAMUG have the option to obtain a minor in Clinical Laboratory Sciences, which includes the first semester coursework for the M.S. degree in Clinical Laboratory Sciences at UTMB.

This concentration is housed in the Foundational Sciences Department.

Students in this program may choose to pursue secondary (grades 8 thru 12) science teaching certification. Please consult with Department of Foundation Sciences.

All University Studies degree plans require at least 120 hours for completion. A University Studies Degree consists of a concentration of 21-24 hours and two minors of 15-18 hours each. Specific courses may be required for the completion of the hours in the concentrations and minors. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed in a college outside of the college that provides the concentration for the student's degree.

Department of Liberal Studies

The Department of Liberal Studies at Texas A&M at Galveston offers four unique interdisciplinary undergraduate degrees:

1. Bachelor of Arts: Maritime Studies
   The past and present relationships between humans and the sea; nautical archaeology, cultural anthropology, world politics, maritime history, maritime literature, tall ship sail training, museum studies, tourism, domestic and international public service, environmental concerns

2. Bachelor of Arts or Bachelor of Science: University Studies;
   concentration in Tourism and Coastal Community Development Sociology, tourism

3. Bachelor of Science: University Studies; concentration in Maritime Public Policy and Communication Communication, public policy

4. Bachelor of Science: University Studies; concentration in Marine Environmental Law and Policy Law and business

The mission of the Department of Liberal Studies is to provide a robust intellectual foundation for students pursuing occupational and leadership roles in areas such as government, communication, business, non-governmental organizations, public policy, tourism policy, journalism and public relations, archaeology and anthropology, museums and archives, professional diving, and preparation for graduate studies and law school.
Liberal Studies students participate in a variety of state and national programs such as the Model United Nations, Student Conference on National Affairs, and the Bush School Public Service Institute. They are encouraged to avail themselves of the international educational opportunities available through courses offered in the Texas A&M University Education Abroad Programs Office (http://abroad.tamu.edu/).

With faculty maintaining research agendas in a variety of disciplines including politics, history, mass media and communication, English, popular culture, archeology, philosophy, museum studies, anthropology, genocide studies, African-American studies, and mathematics, Liberal Studies builds within students enhanced critical thinking and strong communication skills, while emphasizing the critical nature of multicultural thinking and collaboration in a global economy.

The Department of Liberal Studies provides the skills necessary for students to:

• Lead others through critical thinking, multi-dimensional problem solving, and issue advocacy;
• Be competitive in a multicultural world increasingly interested in college graduates with interdisciplinary backgrounds;
• Inform public policy creation and decision-making from both the governmental and business perspectives;
• Earn internships in areas such as politics, law and legal affairs, communication, for-profit and non-profit organizations, artifact conservation and museum management;
• Prepare for graduate school and law school opportunities;
• Understand the inalienable connections between liberal education, freedom, and democracy.

Majors
- Bachelor of Arts in Maritime Studies (p. 810)
- Bachelor of Science in University Studies, concentration in Marine Environmental Law and Policy (p. 811)
- Bachelor of Arts or Bachelor of Science in University Studies, concentration in Tourism and Coastal Community Development (p. 812)

Minors
- Diving Technology and Methods Minor (p. 813)
- Maritime Studies Minor (p. 814)

Maritime Studies - BA
Maritime Studies (MAST) offers students a unique opportunity to examine the varied ways humans use and impact coastal and maritime environments. The program is well suited for students seeking to understand the vital and synergistic relationship humans have with the sea.

With 40% of the world’s population living within 60 miles of a coastline, a myriad of interests and demand for jobs dependent upon coastal areas exist, such as:
- Energy exploration and use
- Preservation and conversation of culture
- Historical research
- Underwater archaeology
- Contract archaeology
- Commercial fisheries
- Museums and their management
- Policy changes
- The effects of rising sea levels and changing coastal climates on coastal communities
- Human rights at sea

By studying the history, archaeology, literature, and politics of maritime peoples and cultures from ancient times to present, Maritime Studies graduates gain a comprehensive understanding of the interconnected issues, while achieving an excellent broad-based interdisciplinary education with a distinctive, international emphasis.

Working closely with their undergraduate advisor, students tailor the MAST degree program to suit their interests and career goals, and have many opportunities for enrichment activities contribute to a healthy graduation portfolio. Activities can include enrollment in an internship suited to their career interest, participation in field studies, concentration on a particular topic with a professor of their choice, and/or studying abroad for a semester. MAST students are able to train as a crew member on a working 19th century tall ship, The Elissa. MAST students are encouraged to pursue at least one minor, usually in Anthropology, English, Diving, Museum Studies or History, and many earn two.

Employers understand that students of the liberal arts bring advanced comprehensive problem-solving capabilities to the job market. Upon graduation with the MAST degree, students have acquired valuable critical thinking, reasoning, and communication skills. They are prepared for a diverse choice of fields including, but not limited to, oil and gas administration, environmental management, state and federal agencies, historical and non-profit foundations, museums conservation and administration, mass and niche communication, nautical and contract archaeology, journalism, education, management, law school, and graduate studies in related fields.

**Total Semester Credit Hours** 120

1 Must make a grade of C or better.
2 Required the first semester in the MAST program.
3 Select from ANTH 202, ANTH 313, ANTH 350, ANTH 409, ANTH 423, ANTH 485; COMM 203, COMM 365/JOUR 365; ENGL 330, ENGL 334, ENGL 338, ENGL 339/AFST 339, ENGL 374/WGST 374, ENGL 484, ENGL 485; HIST 226, HIST 370, HIST 373, HIST 374, HIST 405, HIST 485; KINE 199; MARA 212, MARA 421, MARA 435, MARA 470; MARB 340; POLS 353, POLS 366; SPAN 101, SPAN 102, SPAN 201, SPAN 202. A maximum of 3 hours of KINE 199, and a maximum of 3 hours of 484 or 485 may be used for directed electives.
4 Select from ANTH 318, ANTH 330, ANTH 351, ANTH 484; CLAS 371; MAST 200-499 (p. 1064) (except MAST 365, MAST 480, MAST 481); PHIL 314; POLS 231, POLS 347. A maximum combination of 6 hours of 484, 485 and/or 491 may be used as MAST electives.

Students in the BA-MAST program must maintain a portfolio of artifacts from MAST required coursework. The portfolio is developed over the course of the undergraduate career, and upon completion, will contain artifacts from each MAST required course. The Portfolio is assessed for completion during the last term of enrollment, after the student submits the graduation application. The completion of the portfolio requirement will be assessed by the Liberal Studies faculty.

**University Studies - BS, Marine Environmental Law and Policy Concentration**

Students who are currently enrolled at Texas A&M University Galveston campus may submit proposals to enroll as University Studies majors. The University Studies degree format was created to provide students the flexibility to combine areas of study within either or both campuses that are of special interest. This flexibility may be attractive to students who have particular career paths or post-baccalaureate degree paths in mind.

All University Studies degree plans require at least 120 hours for completion. A University Studies Degree consists of a concentration of 21-24 hours and two minors of 15-18 hours each. Specific courses may be required for the completion of the hours in the concentrations and minors. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed in a college outside of the college that provides the concentration for the student's degree.

Students must submit a Proposed Course Form that lists the courses for the individual degree plan the student hopes to complete to the University Studies admissions committee. The application includes a required 2-3 page essay in which the student can explain how the degree will help the student meet the desired educational and personal goals. Once it is determined that the Proposed Course Form has been completed with appropriate information, it will be reviewed by the department that offers the concentration. Students must be in good academic standing, and they must have good academic standing in previous courses that count toward the area of concentration or minors.

A University Studies major will be considered a student in the department that offers the concentration; the Marine Environmental Law and Policy concentration is housed in the Liberal Studies department. The student's diploma will list Bachelor of Arts or Bachelor of Science in the same place it is currently listed, and University Studies will be listed in the place the major is currently listed. The student's area of concentration and the two minors will be indicated on the student's transcript.
The concentration in Marine Environmental Law and Policy requires 21 to 24 hours in coursework such as business law, admiralty law, environmental law, environmental ethics and politics of energy and the environment. Students can choose from a wide variety of combinations to position themselves for graduate studies in environmental law, employment in environmental regulatory areas and/or industry interested in environmental protection especially in a near shore environment. The student must complete a minimum of 6 hours at the 400-level and 36 hours of 300-400 level coursework in residence at Texas A&M University Galveston campus.

1 Hours must be in 100-499 courses not used elsewhere. Students are required to take 21 to 24 hours of general electives.  
2 Must make a grade of C or better.  
3 Select from COMM 307/JOUR 301, HIST 232, MARA 304, MARS 435, MARS 491, MAST 411, MGMT 211, PHIL 240, POLS 232, POLS 347. A total of 9 semester hours required.  
4 Two university approved minors are required for this degree program. Students are required to take 15 to 18 semester hours for Minor 1 and 15 to 18 semester hours for Minor 2.

University Studies - BS, Tourism and Coastal Community Development Concentration

Students who are currently enrolled at Texas A&M University Galveston campus may submit proposals to enroll as University Studies majors. The University Studies degree format was created to provide students the flexibility to combine areas of study within either or both campuses that are of special interest. This flexibility may be attractive to students who have particular career paths or post-baccalaureate degree paths in mind.

All University Studies degree plans require at least 120 hours for completion. A University Studies degree consists of a concentration of 21-24 hours and two minors of 15-18 hours each. Specific courses may be required for the completion of the hours in the concentrations and minors. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed in a college outside of the college that provides the concentration for the student’s degree.

Students must submit a Proposed Course Form that lists the courses for the individual degree plan the student hopes to complete to the University
Studies admissions committee. The application includes a required 2-3 page essay in which the student can explain how the degree will help the student meet the desired educational and personal goals. Once it is determined that the Proposed Course Form has been completed with appropriate information, it will be reviewed by the department that offers the concentration. Students must be in good academic standing, and they must have good academic standing in previous courses that count toward the area of concentration or minors.

A University Studies major will be considered a student in the department that offers the concentration; the Tourism and Coastal Community Development concentration is housed in the Liberal Studies department. The student’s diploma will list Bachelor of Arts or Bachelor of Science in the same place it is currently listed, and University Studies will be listed in the place the major is currently listed. The student’s area of concentration and the two minors will be indicated on the student’s transcript.

The concentration in Tourism and Coastal Community Development requires 21-24 hours of major coursework and equips students with the knowledge and skills to help coastal communities progress, while maintaining sound ecological and environmental practices. Such thinking involves an interdisciplinary approach that engenders creative and critical thinking about such issues as maritime public policy, communication, marine science, sociology, and ecology. Students graduate with the capability to guide industry and community toward a path that is both sustainable and economically beneficial. TCD career opportunities include:

- Ecotourism
- Coastal community planning and development
- Environmental policy and legislative affairs
- Sports tourism
- Convention and tourism offices
- Hospitality industry liaison
- Tourism sociological impact researcher
- Ecological economics
- NGOs and international social justice legal centers
- Congressional and legislative assistant

The student must complete a minimum of 6 hours at the 400-level and 36 hours of 300-400 level coursework in residence at Texas A&M University Galveston campus.

The minor in Diving Technology and Methods combines practical scuba training with advanced coursework highlighting scientific and specialized applications of diving. Students gain professional diving certifications and experience in scientific diving research. Students in any major may establish a minor field of study in Diving Technology and Methods through completing 16 hours from the designated courses. A University Studies Degree consists of a concentration for the student’s degree.

In addition to the course requirements, students must:

- Maintain compliance with training agency requirements.
- Maintain a GPA of 2.5.
- Maintain good health and fitness appropriate to the level of diving required. Adverse behaviors that put the diver or other participants at risk such as the use of alcohol or certain medicines may require the diver to be removed from the program.

Maritime Studies - Minor

The Maritime Studies minor offers students an exciting interdisciplinary selection of courses to compliment and enrich all majors offered at the Galveston campus of Texas A&M University. The minor requires a total of 15 hours – three hours each of Anthropology, English, and History/Political Science, and 6 hours of electives to be chosen from Maritime Studies courses. The broad range of liberal arts courses offered by this minor provides an opportunity for TAMUG students in other majors to expand their knowledge and experience of maritime topics. The courses in the minor have been carefully selected for content, class size, and instructor to provide an optimum learning experience.

Minimum of 6 hours at 300- to 400-level.

A minimum grade of 'C' must be made in a course to count toward the minor.

Department of Marine and Coastal Environmental Science

The Department of Marine and Coastal Environmental Science (MCES) educates undergraduate and graduate students to be future leaders in coastal and marine science as well as in management and policy decision-making for the utilization and preservation of marine resources. We recognize today's professional careers demand strong interdisciplinary as well as interpersonal skills and have designed our educational programs to provide a core education in the physical, chemical and geological sciences and the necessary training for applying this knowledge to the maintenance and improvement of our marine resources. Our faculty conducts cutting-edge research in coastal marine geology, physical oceanography, marine geochemistry, and coastal resources management that emphasize and support our degrees and course curricula. Our strength is the diversity of our faculty who utilize their experience from private, governmental, and academic careers to create extraordinary learning opportunities for students through "hands on" and "on the water" field and laboratory research as well as internships that give our students a competitive advantage for employment after graduation.

We offer a variety of majors and minors in subjects centered on the coastal and marine environment. We offer a B.S. in Marine Sciences (MARS) and a B.S. in Coastal Environmental Science and Society. Students enrolled in the MARS degree will have the opportunity to select a track in physical, chemical, or geological marine sciences or an integrated track. The License Option Program (MARS-LO) is also available to MARS majors to obtain a third mate's license in the Merchant Marine upon graduation. We offer a minor in Coastal Environmental Science and Society, as well as facilitating coursework for minors in Geology, Oceanography, and Geography through the respective departments in College Station. Graduate programs offer a Master of Marine Resources Management (MARM) and a Ph.D. program in Marine and Coastal Management and Science (MCMS). We also offer a 3+2 Program in which the student can attain a B.S. in Coastal Environmental Science and Society with a MARM degree in 5 years. Our faculty advise students in diverse M.S. and Ph.D. graduate degrees on our campus such as the interdisciplinary program in Marine Biology (MARB IDP) and programs in...
conjunction with departments in College Station such as Oceanography (OCNG) and Landscape Architecture and Urban Planning (LAUP).

Van Hengstum, Peter J, Associate Professor
Marine and Coastal Environmental Science
PHD, Dalhousie University, Canada, 2011

**Majors**

- Bachelor of Science in Coastal Environmental Science and Society (p. 815)
- Bachelor of Science in (p. 817) Coastal Environmental Science and Society and Master of Marine Resources Management, 5-Year Degree Program
- Bachelor of Science in Marine Sciences (p. 818)
- Bachelor of Science in Marine Sciences, License Option (p. 820)

**Minors**

- Clinical Laboratory Sciences Minor (p. 822)
- Coastal Environmental Science and Society Minor (p. 822)

**Coastal Environmental Science and Society - BS**

The Coastal Environmental Science and Society program is a Bachelor of Science degree that focuses on natural environmental processes (physical, chemical/biogeochemical, and geological) and social issues (policy, management, economics, law, etc.) related to the development and exploitation of oceanic and coastal resources and ecosystems. The Coastal Environmental Science and Society curriculum provides a solid foundation in oceanography, geology, chemistry, biology and physics with additional coursework in economics, policy and management. The curriculum is specifically geared towards understanding the societal and environmental impacts of resource development and exploitation, with the focus on environmental pollution, sustainable development, biological diversity, fisheries and mariculture development and management, or oil and gas extraction and exploration, wetlands, and global climate change.

There is a growing demand for trained entry-level professionals from both government and industry who understand and can use scientific information in the planning and management processes. With a solid scientific foundation, the Coastal Environmental Science and Society graduates are ideally poised to pursue their careers at the interface between government and businesses operating in marine realm. With suitably chosen electives, our graduates are well qualified to enter Master or Ph.D. programs in marine resource management and policy, environmental sciences, oceanography or related disciplines.
Students in Coastal Environmental Science and Society may choose to establish a minor field of study, for example, in Economics (TAMU) or in Maritime Business Administration (TAMUG) through completion of credits as outlined in the available minors’ curriculum pages. Obtaining a minor from a department located at TAMU in College Station with coursework completed in Galveston is also possible. An advisor in the MCES Department can help with course selection and facilitate the minor approval process through another department.

| Semester Credit Hours | 15            |

| Total Semester Credit Hours | 120           |

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication, Mathematics, Life and Physical Sciences, Language Philosophy and Culture, Creative Arts, American History, Government and Political Sciences and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity and the 3 hour requirement for Cultural Diversity may be met with courses used to satisfy other degree requirements.

1. Indicates required courses in the Ocean and Coastal Resources major. These courses will be used to compute the major GPR. Also, if any upper level MARS or OCNG elective courses are taken, they will be used in the major GPR.

2. The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or the 3-hour University Core Curriculum requirement for International and Cultural Diversity and the 3 hour requirement for Cultural Diversity.
Recommended professional electives include, but are not limited to: CHEM 316, CHEM 318, MARA 470, MARB 320, MARB 340, MARB 423, MARB 438, MARB 445, MARS 305, MARS 306, MARS 330, MARS 370/GEOG 370, MARS 410, MARS 412, MARS 415, MARS 423, MARS 435, MARS 440, MARS 491 or MARS 489. Field Experience may also be met with MARB 300 plus one credit hour of a field oriented lab course. Designated writing intensive course. If both MARS 430 and MARS 431 are taken, one can be used as a professional elective.

Coastal Environmental Science and Society - 5-Year Bachelor of Science/Master of Marine Resources Management

The Coastal Environmental Science and Society and MARM Program allows Coastal Environmental Science and Society majors to enter the graduate program for a Master of Marine Resources Management at the beginning of their senior year, enabling students to receive their Coastal Environmental Science and Society undergraduate degree (BS) and a Master of Marine Resources Management (MARM) graduate degree in five years. The Coastal Environmental Science and Society majors who have at least a 3.25 GPA and have fulfilled all of their prerequisite course requirements and otherwise completed 101 or 102 hours by the fall of their fourth year are eligible to apply for the 5-year combined program during their junior year. Applicants to the 5-year combined program submit the same materials (including GRE scores) and are subject to the same admission process and criteria as other MARM program applicants. Those students whose credentials are judged to be competitive by the mid-January deadline will be admitted.

Admitted students enroll in Marine Resources Management graduate courses with an undergraduate classification (U4) during the fall of their fourth year. They are then be reclassified as degree-seeking master’s students (G7) upon completing 120 credit hours, which typically occurs at the beginning of the fall semester of the fifth year. Students are required to complete the same 2-year, 36-hour curriculum as other graduate students admitted to the MARM Professional Track (see MARM curriculum). Students who are interested in the MARM Research (Thesis) Track are afforded additional flexibility to replace required courses with up to nine hours of research courses (MARS 691) and electives chosen with the approval of their advisory committee. To comply with the course and work requirements of the Research Track, this program may extend beyond the 5-year window. For specific requirements to comply with the Research Track curriculum, students are asked to consult the MARM section of the catalog.

Students who choose not to finish the MARM degree after being admitted to the 5-year combined program may exit the program at any time. Completed MARM courses will be applied to their bachelor’s degree in Coastal Environmental Science and Society, as appropriate. Failure to complete the MARM program will in no way impede their ability to attain a bachelor’s degree in Coastal Environmental Science and Society when the requirements for that degree are completed. Those who pursue the 5-year combined program obtain both degrees upon the completion of the 5-year combined program, receiving both their Bachelor of Science and the MARM degrees at the end of year five. Advising for the 5-year combined program is coordinated by the MCES Department’s undergraduate and graduate advisors and by the Office of Graduate Studies. Advising will help ensure that interested students have satisfied the prerequisite course requirements for the bachelor’s degree so that they may enter the 5-year combined program. Coastal Environmental Science and Society students should consult an undergraduate advisor and a graduate advisor for more information.

1 Indicates required courses in the Ocean and Coastal Resources major. These courses will be used to compute the major GPR. Also, if any upper level MARS or OCNG elective courses are taken, they will be used in the major GPR.

2 Designated writing intensive course.

3 Field Experience may also be met with MARB 300 plus one credit hour of a field oriented lab course.

4 Recommended professional electives include but are not limited to: CHEM 316, CHEM 318, MARA 470, MARS 470, MARS 320, MARS 420, MARS 423, MARS 438, MARS 445, MARS 305, MARS 330, MARS 370/GEOG 370, MARS 410, MARS 415, MARS 432, MARS 435, MARS 440, MARS 484, MARS 485, MARS 491 or MARS 489.

5 Credit by exam for MARS 325 and ECON 203 will be awarded after successful completion of MARS 625 and MARA 604, respectively.

6 The 36-hour professional track curriculum is structured with 24 hours of required courses and 12 hours of optional elective courses. The required courses include a 1 hour seminar to be taken in the student’s first year, 8 hours of management, 3 hours of Geographic Information Systems (GIS), 6 hours of resource economics and statistical methods, and 6 hours of law/policy courses. The student in the professional track will choose electives for the remaining 12 credit hours. See MARM curriculum pages of the graduate catalog for additional requirements for the research track (thesis option) curriculum.

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. The 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements.

Students in the 5-year program will take 12 fewer undergraduate credit hours than the other OCRE students. Graduate courses (6 hours) taken in the fourth and fifth year will be counted as credit towards the OCRE degree.

The total undergraduate credit hours prior to enrolling in graduate courses is 98 after the completion of the 3rd year. After the 3rd year, 10 additional undergraduate hours will be taken, 6 additional hours will be obtained by exam hours of two graduate courses, and 6 hours of MARM elective credits will be used for 6 hours of undergraduate elective credits for a total of 120 undergraduate transcript hours. The total graduate credit hours is 36. Substituting 6 hours of MARM electives for one free and one professional elective and applying 6 hours of credit by exam results in a total of 150 hours. The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses.

### Marine Sciences - BS

The Marine Sciences (MARS) program is a Bachelor of Science degree that focuses on the geological, chemical and physical science aspects of the estuarine, coastal, and marine environment. The coastal location of the campus enables students to acquire extensive hands-on field experience in addition to rigorous course work in chemistry, geology,

1 Course counts towards major GPR.
2 Hours vary depending on track focus electives chosen.
If a student is following the geology track, GEOL 106 is their focus elective and they will need to choose any additional 4 credit class for the spring semester to satisfy the curriculum 120 credit hours. Writing intensive course.

3 hours must be International and Cultural Diversity (p. 47). This requirement can be met with courses used to satisfy other degree requirements.

### Track Options

#### Chemical Marine Science

**Focus electives**
- CHEM 227 Organic Chemistry I and Organic Chemistry Laboratory 4
- CHEM 228 Organic Chemistry II and Organic Chemistry Laboratory 4

**Breadth electives**
- Select four of the following:
  - ATMO 363 Introduction to Atmospheric Chemistry and Air Pollution
  - MARS 340 Geochemistry
  - MARS 360 Biochemistry
  - MARS 470 Eco-Environmental Modeling
  - STAT 303 Statistical Methods
  - CHEM 300 to 499 (p. 929)

**Total Semester Credit Hours** 20

#### Geological Marine Science

**Focus electives**
- GEOL 106 Historical Geology 4
- MARS 306 Coastal Sedimentary Geology 4

**Breadth electives**
- Select four of the following:
  - GEOL 300 to 499 (p. 1005)
  - GEOG 331 Geomorphology
  - MARS 305 Environmental Micropaleontology
  - MARS 340 Geochemistry
  - MARS 370/ Coastal Processes
  - GEOG 370 Remote Sensing Technology
  - MARS 430 Geological Oceanography-Plate Tectonics
  - MARS 431 Geological Oceanography-Earth’s Climate
  - MARS 432 Peak Oil, Global Warming and Resource Scarcity
  - MARS 435 Exploration Geophysics
  - MARS 489 Special Topics in Marine Sciences

**Total Semester Credit Hours** 20

#### Physical Marine Science

**Focus electives**
- MATH 251 Engineering Mathematics III 3
- MATH 308 Differential Equations 3

**Breadth electives**
- Select four of the following:
  - ATMO 363 Introduction to Atmospheric Chemistry and Air Pollution
  - MARS 408 Estuarine and Coastal Hydrodynamics
  - MARS 415 Remote Sensing Technology
  - MARS 470 Eco-Environmental Modeling
  - MARS 489 Special Topics in Marine Sciences
  - STAT 303 Statistical Methods
  - PHYS 300 to 499 (p. 1115)

**Total Semester Credit Hours** 18

#### Integrated Track

**Focus electives**
- Select one of the following: 3-4
  - CHEM 227 Organic Chemistry I and Organic Chemistry Laboratory
  - MARS 306 Coastal Sedimentary Geology
  - MATH 251 Engineering Mathematics III

**Breadth electives**
- Select four of the following:
  - CHEM 228 Organic Chemistry II and Organic Chemistry Laboratory
  - GEOL 106 Historical Geology
  - MATH 308 Differential Equations

**Total Semester Credit Hours** 18-20

### Marine Sciences - BS, License Option

The license option (LO) in the Marine Sciences (MARS) program leads toward a license as a deck officer in the United States Merchant Marine. This program retains the physical science core of the MARS curriculum, and adds coursework that prepares the student to sit for the U.S. Coast Guard (USCG) examination as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels. Students combine a broad base of courses in physical science and mathematics and practical instruction in seamanship and navigation with four oceanography courses. The objective of the program is to provide students with a sound intellectual and educational background to function in a scientifically and technologically advanced society, while also providing the practical hands-on training needed for employment in the maritime industry. Graduates are particularly well qualified to serve on research vessels.
where an understanding of the scientific purpose of the voyage is required. Students who wish to enter a physical science graduate program will need to take additional course work in science and mathematics. Midshipmen who enroll in and apply to graduate under one of the license option curricula must complete the appropriate license examination for Third Mate or Third Assistant Engineer in order to graduate from Texas A&M University as well as licensing requirements outlined in the program requirements. Certain USCG courses require a minimum grade of C (70%).

**Texas A&M University**

821
the cadet does not complete the degree within that time period, the cadet
requirements to receive the degree:
requirements outlined here, the cadet must also complete the following
Refer to the University catalog section for the Texas A&M Maritime
Maritime Academy Corps of Cadets as a qualified License Option cadet.
This degree requires full participation in the Texas A&M University
plan.
MARR 300
hour cruise options (Cultural Diversity courses, or any of the six hour cruise options. The six
remedial math, remedial English, foreign language or International and
Language, Philosophy and Culture; Creative Arts; American History;
Government and Political Sciences; and Social and Behavioral Sciences.
The 6-hour University Core Curriculum requirement for International and
Cultural Diversity may be met with courses used to satisfy other degree
requirements.

All electives must be chosen in consultation with, and approved by, the
student's academic advisor. Unless courses are specifically listed, see
University Core Curriculum at http://core.tamu.edu/ for a listing of course
options for Communication; Mathematics; Life and Physical Sciences;
Language, Philosophy and Culture; Creative Arts; American History;
Government and Political Sciences; and Social and Behavioral Sciences.
The 6-hour University Core Curriculum requirement for International and
Cultural Diversity may be met with courses used to satisfy other degree
requirements.

The total hours may be increased if the student is required to take
remedial math, remedial English, foreign language or International and
Cultural Diversity courses, or any of the six hour cruise options. The six
hour cruise options (NAUT 200, NAUT 300 and NAUT 400 or MARR 200,
MARR 300 and MARR 400) do not add any required hours to the degree
plan.

This degree requires full participation in the Texas A&M University
Maritime Academy Corps of Cadets as a qualified License Option cadet.
Refer to the University catalog section for the Texas A&M Maritime
Academy for additional information. In addition to the academic
requirements outlined here, the cadet must also complete the following
requirements to receive the degree:

• Successfully complete required sea service and minimum training
  cruise requirements

• Pass a comprehensive professional examination (either the Third
  Mate Unlimited-Oceans or Third Assistant Engineering Unlimited)
  administered by the U.S. Coast Guard (USCG).

• Successfully complete all competencies required by the International
  Convention on Standards for Training, Certification and Watchkeeping
  (STCW).

Note: STCW competency certifications expire 5 years after completion. If
the cadet does not complete the degree within that time period, the cadet
will be required to revalidate the expired competency prior to graduation.

Clinical Laboratory Sciences - Minor

The Department of Marine Sciences offers a minor in Clinical Laboratory Sciences (CLBS) through a partnership with the University of Texas Medical Branch (UTMB) in Galveston. Students who wish to obtain this minor must be University Studies, Oceans and One Health majors who have been admitted to the Clinical Laboratory Sciences program at UTMB. Seven hours of coursework taken during the first semester in
that program will be applied towards the CLBS minor at TAMUG. More information is available from the Oceans and One Health advisor.

This minor will be completed in 15 credit hours, 8 of which are taught at
TAMUG and 7 are taught at UTMB.

Coastal Environmental Science and Society - Minor

Students in other majors may establish a minor field of study in Coastal
Environmental Science and Society (CESS) through the completion of
at least 16 hours of coursework. The CESS minor pairs well with majors in
Marine Biology (http://catalog.tamu.edu/undergraduate/galveston/
marine-biology-bs/), Marine Fisheries (http://catalog.tamu.edu/
undergraduate/galveston/marine-biology/marine-fisheries-bs/), Maritime
Studies (http://catalog.tamu.edu/undergraduate/galveston/liberal-
studies/maritime-studies-bs/), Maritime Administration (http://
catalog.tamu.edu/undergraduate/galveston/liberal-studies/maritime-studies-ba/), Maritime Law (http://catalog.tamu.edu/
undergraduate/galveston/marine-law-policy-university-studies-bs/) or Marine Public Policy and
Communication (http://catalog.tamu.edu/undergraduate/galveston/
liberal-studies/maritime-public-policy-communication-university-studies-bs/).

Department of Marine Biology

The Department of Marine Biology offers undergraduate Bachelor of Science degrees in Marine Biology, Marine Fisheries, and Marine Biology-License Option from Texas A&M University. At the graduate level, the department offers Master of Science and Doctoral degrees in Marine Biology. Teaching and research facilities are located in Galveston, Texas along the shore of Galveston Bay. The semitropical climate provides students and faculty with year-round access to a variety of estuarine, coastal and pelagic marine ecosystems, including salt marshes, oyster reefs, seagrass meadows and coastal sand dunes and beaches. A state-of-the-art Sea Life Facility is available for additional hands-on experiences with marine organisms.

Undergraduate students have extensive opportunities for laboratory and field education and research at national and international locations. International educational opportunities are frequently available in Mexico, Greece, and Italy in conjunction with the Texas A&M Education Abroad Program Office, as well as summer field courses in Alaska.

The faculty have research expertise in marine fisheries, marine invertebrate and vertebrate zoology, marine botany, marine mammalogy, biological oceanography, wetlands ecology, marine conservation and management, biodiversity, microbiology, virology, genomics, toxicology, physiology, marine acoustics, and evolutionary biology.

Marine biology undergraduate students obtain employment with State and Federal agencies, private industry, environmental consulting entities, biomedical research, marine parks, aquariums and zoos, and teaching. Many undergraduates pursue postgraduate studies in marine biology, as well as in the fields of medicine, veterinary sciences and environmental law.

• Bachelor of Science in Marine Biology (p. 824)
• Bachelor of Science in Marine Biology, License Option (p. 825)
• Bachelor of Science in Marine Fisheries (p. 827)

Minors

• Marine Biology Minor (p. 828)

Marine Biology - BS

The Marine Biology Bachelor of Science degree emphasizes high impact, hands-on learning, with courses offering lab-and field-based experiences. Our curriculum spans a broad range of topics, including ichthyology and fish physiology, marine mammalogy, ecology, marine botany and coastal plant ecology, vertebrate and invertebrate zoology, and marine conservation. Our diverse curriculum allows each student to tailor his/her education to realize one’s career goals. With state-of-the-art labs and classrooms, a fleet of vessels, and world-class faculty, our educational and research opportunities prepare graduates to become leaders in their field.

Learn from Experts in the Field

The faculty of the Department of Marine Biology comprises some of the top researchers in their respective fields. This international group of scientists, hailing from 10 different countries around the world, is eager to share their knowledge and foster the passions of our undergraduates. Our faculty recognizes the power of networking, and provides students research and professional opportunities through affiliations with NOAA, FDA, EPA, Texas Parks and Wildlife Department, Texas Commission on Environmental Quality, Galveston Bay Foundation, General Land Office, and numerous others. Whether a student desires to study the smallest microbes and plankton to the largest marine organisms, or ecosystems along the coastline to the deepest reaches of the ocean, the faculty of the Marine Biology Department equips each student with the knowledge needed to succeed.

Career Opportunities

The unique flexibility of courses and the unparalleled access to top quality professors, training, and the sea puts our students in a great position to succeed in any number of career paths, including:

• Conservation
• Environmental Consulting
• Research
• Biomedical Sciences
• Veterinary and Medical degrees
• Law Enforcement
• Environmental Outreach
• Higher/Secondary Education

Endless Learning Opportunities

The courses offered to Marine Biology undergraduates are tailored to give students a solid foundational knowledge of life in the ocean while allowing students to pursue their specific interests. The diverse array of electives includes such courses as: Biology of Marine Mammals, Tropical Marine Ecology, Marine Toxicology, Animal Behavior, Life in Extreme Environments, and Conservation Biology

Learning Outside the Classroom

Sometimes the greatest lessons are learned away from the classroom. For this reason, the Marine Biology Department offers study abroad and field-based courses in Greece, Alaska, and closer to home at Sea World San Antonio. Additionally, take advantage of our on-campus Sea Life Facility for extensive hands-on opportunities. Undergraduates in our program get more than just a degree, they get experiences of a lifetime!

Double Your Career Options

Marine Biology majors have the option to pursue a U.S. Merchant Marine License Option through the Texas A&M Maritime Academy. Those who complete the program will have not only their Bachelor of Science degree, but will qualify to take the U.S. Coast Guard license examination in order to become a Third Mate for ocean going vessels, a vital asset in a number of career fields.

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. The 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements. Up to 4 hours of MARB 491 and/or MARB 484 may be used as marine biology elective courses in your curriculum. Please consult with your academic advisor.

1. A grade of C or better is required before advancing to upper level courses.
2. Indicates required courses in the Marine Biology major. These courses will be used to compute the major GPR.
3. Student can choose to substitute with MATH 151.
4. Student may choose to substitute with MATH 150 or MATH 152.
5. 17 credit hours of marine biology electives selected from the following: BIOL 351; MARB 300-499 (p. 1051); MARS 305, MARS 325, MARS 360. Students may take a maximum of two mammals courses (selected from MARB 400, MARB 401, MARB 407).
6. Designated writing intensive course.
7. The Earth Science elective may be chosen from GEOL 101-499 (p. 1005) or OCNG 251-499 (p. 1104).
8. MARB 408, which is offered in the Spring semester, can be substituted for MARB 430. MARB 408 is also a writing intensive course.

Marine Biology - BS, License Option

The Marine Biology License Option program allows the marine biology student to prepare for a career as an officer aboard a sea going vessel by participating in the Texas A&M Maritime Academy Corps of Midshipmen. The curriculum provides the basics of marine biology, as well as courses leading toward licensing as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels, in the U.S. Merchant Marine.

The Marine Biology License Option curriculum is an abbreviated version of the Marine Biology curriculum and is oriented toward field activities consistent with service aboard research vessels. Midshipmen who enroll in and apply to graduate in this curriculum must pass the license examination for Third Mate in order to graduate from Texas A&M University. Certain USCG courses require a minimum grade of C (70%).

| Total Semester Credit Hours   | 150     |

1. A grade of C or better is required before advancing to upper level courses.
2. Indicates required courses in Marine Biology License Option major. These courses will be used to compute the major GPR.
3. Indicates license courses leading to a USCG/STCW license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or accrual. Students will be required to repeat the course until they earn a grade of C (70%) or better. MART 307 requires a grade of 75% or better.
4. Other calculus or logic elective may be substituted with approval.
5. Designated writing intensive course.
6. MART 498 must be taken within one year of graduation to receive USCG approval.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at [http://core.tamu.edu/](http://core.tamu.edu/) for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. The 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements.
The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses, or any of the six hour cruise options. The six hour cruise options (NAUT 200, NAUT 300 and NAUT 400 or MARR 200, MARR 300 and MARR 400) do not add any required hours to the degree plan.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified License Option cadet. Refer to the University catalog section on the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:

- Successfully complete required sea service and minimum training cruise requirements
- Pass a comprehensive professional examination (either the Third Mate Unlimited-Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).
- Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.

### Marine Fisheries - BS

This program provides educational opportunities in the biological sciences, with emphasis of marine management. Ecology, taxonomy, zoogeography, culture, and general biology of commercial species are emphasized. Course offerings are structured to provide not only a strong basis of formal academic instruction but also considerable hands-on field and collection experience by taking advantage of the coastal location of the University. A strong preparation in the sciences is recommended. Marine Fisheries graduates are prepared to work as fisheries managers or research biologists for state and federal agencies, ecological consulting firms, and educational institutions. Qualified degree recipients may undertake postgraduate studies in resource management, mariculture, systematics, and fisheries economics.

Cultural Diversity may be met with courses used to satisfy other degree requirements. The 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements.

1 Indicates required courses in the Marine Fisheries major. These courses will be used to compute the major GPR.
2 A grade of C or better is required before advancing to upper level courses.
3 Student may choose to substitute with MATH 151.
4 Student may choose to substitute MATH 150 or MATH 152.
5 Designated writing intensive course.
6 Directed Electives must be selected from MARB 300-499 (p. 1051).

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language, Cultural Discourse or International and Cultural Diversity courses.

Marine Biology - Minor

Coupled with the appropriate major, a minor in marine biology is a powerful asset and can prepare a student for a number of exciting and rewarding career opportunities. This coursework combines top quality classroom, laboratory, and hands-on experiences to diversify a student’s education and prepare them for a future in research, conservation, education, and more.

1 All MARB 300-400 (p. 1051) level courses require BIOL 111 and BIOL 112 with a grade of ‘C’ or better.

Department of Marine Engineering Technology

Texas A&M University at Galveston is a special purpose institution for teaching, research, and public service pertaining to marine and maritime studies in science, engineering, and business. The university is also the home of the Texas A&M Maritime Academy. Within this context, the Marine Engineering Technology (MART) program produces graduates who are prepared to perform engineering work in the marine sector or marine-related shore-based industries involving the design, production, operation, maintenance, and management of engineering systems and projects. The program is available in a License Option version for students who want to serve as an engineering officer aboard seagoing vessels and in a Non-License Option for students who want an education in maritime-related applied engineering but do not plan to serve at sea.

Opportunities for such work abound in the vicinity of the campus, which is located just south of the fourth largest metropolis in the United States. The Houston/Galveston area has extensive port facilities, considerable commercial, recreational, and military ship traffic, and offshore and onshore infrastructure associated with the oil industry. Career opportunities of various kinds are therefore available for these graduates who are ideally suited for working on ships, at port facilities, and at shore facilities, particularly in power generation, distribution, and concomitant auxiliary support systems.

Our goal is to produce graduates with a strong background in engineering fundamentals, mathematics, and analytical methods, which is reinforced by practical machine-shop, welding, and laboratory experiences (including several on the training ship). The curriculum builds on a foundation of basic engineering topics such as fluid mechanics, thermodynamics, electricity, drafting, and materials science to develop inter-disciplinary skills required for the practice of marine engineering. In particular, the program’s educational objectives are to produce graduates who can plan, design, construct, operate, and maintain systems used in marine and facilities power systems such as propulsion, electrical power generation and distribution, refrigeration, and air conditioning. Graduates also support the maritime sector (the Navy and Coast Guard), companies operating sea-going vessels, the offshore oil and gas industry; and, are well-prepared to engage in lifelong education, professional development, and continuous improvement.

PHD, Texas Tech University, 2008
Program Requirements

**Marine Engineering Technology - BS**

The Marine Engineering Technology (MARR) non-license option program is designed to prepare the student for a career as an engineering technologist in the maritime profession. Students receive an education in applied engineering with a maritime focus, but do not plan to serve at sea. The MARR curriculum is a thermal power-oriented specialization of a classical Mechanical Engineering Technology program. A thorough preparation in mathematics, science, and basic engineering courses is the foundation for further study in ship propulsion plants and electrical power generation and distribution equipment. Marine Engineering Technology focuses on power cycles, principles, and methods used to convert the energy in fossil fuels into useful power, and the selection and operation of the major components and support systems in the power cycle. Courses in marine engineering are supplemented with studies in naval architecture and maritime application of electrical engineering fundamentals. The students’ education is enhanced through the use of computer simulation of propulsion plants and direct operation of marine machinery aboard the University's training ship. Marine Engineering Technology (MARR) is accredited by the Engineering Technology Accreditation Commission of ABET, www.abet.org (https://www.abet.org/).

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at [http://core.tamu.edu/](http://core.tamu.edu/) for a listing of course options for Communication, Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History, Government and Political Sciences; and Social and Behavioral Sciences.

The 3-hour University Core Curriculum requirement for International and Cultural Diversity and the 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements.

Although they may count for university credit, grades from another institution below a C in engineering, mathematics and physics will not be accepted by the TAMUG engineering technology program toward the degree.

1. Indicates required courses in Marine Engineering major. These courses will be used to compute the major GPA.
2. MARR students are required to earn a grade of C or better in MATH 151, PHYS 206, PHYS 207, MARE 202, MARE 205, MARE 206 and MARE 207. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite. Although they may count for credit, grades from another institution below a C in engineering, mathematics and physics will not be accepted by the TAMUG engineering programs toward the degree.
3. Technical electives may be any course with the following prefixes: MARE (p. 1054), MARR (p. 1057), MARS (p. 1057), MART (p. 1060), MASE (p. 1064), OCEN (p. 1101), CVEN (p. 950), MATH (p. 1066), PHYHS (p. 1115), or OCNG (p. 1104) in consultation with the student’s advisor. At least one elective must be at the 300 or 400 level.
4. Designated Writing intensive course.
5. Students may take any of the 400-level courses (except MARE 402 and MARE 405) offered by the Marine Engineering Department in their senior year including standard courses such as MARE 401 which are offered to license option students.

The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or if the creative arts; language, philosophy and culture or social science requirements do not fulfill the International and Cultural Diversity requirement.

### Marine Engineering Technology - BS, License Option

The purpose of the Marine Engineering Technology License Option (MARR-LIO) program is to train students to serve as engineering officers aboard sea-going vessels. The MARR curriculum is a thermal power-oriented specialization of a classical Mechanical Engineering Technology program. A thorough preparation in mathematics, science, and basic engineering courses is the foundation for further study in ship propulsion plants and electrical power generation and distribution equipment.

Marine Engineering Technology focuses on power cycles, principles, and methods used to convert the energy in fossil fuels into useful power, and the selection and operation of the major components and support systems in the power cycle. Courses in marine engineering are supplemented with studies in naval architecture and maritime application of electrical engineering fundamentals. The students’ education is enhanced through the use of computer simulation of propulsion plants and direct operation of marine machinery aboard the University’s training ship. Marine Engineering Technology (MARR) is accredited by the Engineering Technology Accreditation Commission of ABET, [www.abet.org](http://www.abet.org/).

In addition to the degree requirements for the Marine Engineering Technology Degree, MARR-LIO Cadets must complete the requirements to achieve a Merchant Mariner Credential (MMC) issued by the USCG. The requirements for the MMC are determined by International conventions, Federal law and regulations, and policies established by the USCG and the Maritime Administration (MARAD). The requirements for an MMC are subject to change according to developments at the International Maritime Organization, Congressional action, the Federal rulemaking process, and consultations between the USCG, MARAD, and the Maritime Academies. The student who successfully completes the program will be qualified to sit for the U.S. Coast Guard license examination as a Third Assistant Engineer of any gross tonnage upon oceans, steam, or motor vessels and issuance of Standards of Training, Certification and Watchkeeping (STCW) international endorsement as Officer In Charge of an Engineering Watch (OICEW).

MARR-LIO students must also complete all the requirements as a cadet in the Texas A&M Maritime Academy, described previously in this catalog, in order to receive the degree. Cadets who enroll in and apply to graduate in Marine Engineering Technology must successfully complete the license examination for Third Assistant Engineer in order to graduate from Texas A&M University. Courses earning USCG or STCW qualifications, sea-time remission or STCW competency certification require a minimum grade of C (70%). In addition, all STCW proficiencies must be satisfactorily completed with a grade of 70% or better (See applicable course outlines available through the department).

1. Indicates required courses in the Marine Engineering Technology License Option major. These courses will be used to compute the major GPA.
2. Indicates license courses leading to a USCG/STCW license endorsement or sea time or workshops skills credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or workshop skills accrual. Cadets will be required to repeat the course until they earn a grade of C (70%) or better. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite.
3. MARR students are required to earn a grade of C or better in MATH 151, PHYS 206, PHYS 207, MARE 202, MARE 205, MARE 206, and MARE 207. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite.
4. Designated Writing intensive course.
5. Technical electives may be any course with the following prefixes: MARE (p. 1054), MARR (p. 1057), MART (p. 1060), MASE (p. 1064), OCEN (p. 1101), CVEN (p. 950), MATH (p. 1066), PHYS (p. 1115), MARS (p. 1057), or OCNG (p. 1104) at the 300 or 400 level in consultation with the student’s advisor.

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity and the 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements. Although they may count for university credit, grades from an other institution below a C in engineering, mathematics
and physics will not be accepted by the TAMUG engineering programs toward the degree.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses, or any of the six hour cruise options. The 6-hour cruise options (MART 200, MART 300, and MART 400 or MARR 200, MARR 300 and MARR 400) do not add any required hours to the degree plan.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified License Option cadet. Refer to the University catalog section for the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:
