UNDERGRADUATE CATALOG

Purpose of Catalogs

The Undergraduate and Graduate and Professional catalogs provide information about the academic programs of Texas A&M University to students, prospective students, faculty and staff of the University. Included is information concerning admissions, academic regulations and requirements, services available to students, academic offerings and a list of the administrative officers and faculty of the University. While every effort has been made to make this catalog as complete and accurate as possible, changes may occur at any time in requirements, deadlines, fees, curricula and courses listed in these catalogs.

Students should refer to Howdy, for course offerings in any given semester. For administrative reasons, because of insufficient enrollment or because of limited resources, any given course might not be offered in the announced semester.

This catalog was prepared in advance of its effective date; therefore, the course descriptions may vary from actual course content. The provisions of the catalogs do not constitute a contract, express or implied, between any applicant, student, faculty or staff member of Texas A&M University or The Texas A&M University System. These catalogs are for informational purposes only. The University reserves the right to change or alter any statement herein without prior notice. Neither catalog should be interpreted to allow a student who begins his or her education under either catalog to continue the program under the provisions in that catalog.

Accreditation

Texas A&M University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award degrees at the bachelors’, masters’, doctoral and professional levels. Contact the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of Texas A&M University.

College of Agriculture and Life Sciences

Agricultural Systems Management curriculum is recognized by the American Society of Agricultural and Biological Engineers (ASABE) (http://www.asabe.org/).

Biological and Agricultural Engineering is accredited by the Accreditation Board for Engineering and Technology (ABET (http://main.abet.org/aps/Accreditedprogramsearch.aspx)).

Biochemistry and Biophysics curriculum is accredited by the American Society for Biochemistry and Molecular Biology (ASBMB) (http://www.asmb.org/).

Didactic Program in Dietetics is accredited by the Commission on Accreditation for Dietetics Education (https://www.cdrnet.org/).

Forestry curriculum is accredited by the Society of American Foresters (SAF) (http://www.eforester.org/).

Food Science and Technology curriculum is approved by the Institute of Food Technologists (IFT) (https://www.ift.org/).

Forensics and Investigative Sciences program is accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC) (http://fepac-edu.org/).

Rangeland Ecology and Management curriculum is accredited by the Society for Range Management (SRM).

Recreation, Park and Tourism Sciences undergraduate curriculum is accredited by the National Recreation and Park Association (NRPA) (http://www.nrpa.org/).

College of Architecture

Architecture is accredited by the National Architectural Accrediting Board (NAAB) (http://www.naab.org/).

Construction Science curriculum is accredited by the American Council for Construction Education (ACCE) (http://www.acce-hq.org/).

Landscape Architecture curriculum is accredited by the Landscape Architectural Accreditation Board (LAAB) (https://www.asla.org/accreditationlaab.aspx).

Urban and Regional Planning curriculum is accredited by the Planning Accreditation Board (PAB) (http://www.planningaccreditationboard.org/).

Mays Business School

The baccalaureate and master’s curricula in Mays Business School are accredited by the Association to Advance Collegiate Schools of Business (AACSB) (http://www.aacsb.edu/).

College of Dentistry

Dentistry degree program is accredited by the Commission on Dental Accreditation (CODA) (http://www.ada.org/).

College of Education and Human Development

Programs in professional education at Texas A&M University are approved and fully accredited by the State Board of Educator Certification and the Texas Education Agency (https://tea.texas.gov/About_TEA/Leadership/State_Board_for_Educator_Certification/).

Counseling Psychology and School Psychology are accredited by the American Psychological Association (APA) (http://www.apa.org/).

Athletic Training is accredited by the Commission on Accreditation of Athletic Training Education (CaATE) (http://caate.net/).

College of Engineering

Undergraduate programs in Aerospace, Biomedical, Chemical, Civil, Computer, Electrical, Industrial, Mechanical, Nuclear, Ocean, Petroleum, and Radiological Health Engineering are accredited by the Engineering Accreditation Commission of ABET (http://main.abet.org/aps/Accreditedprogramsearch.aspx).

The undergraduate program in Computer Science Program is accredited by the Computing Accreditation Commission of ABET (http://main.abet.org/aps/Accreditedprogramsearch.aspx).

**Bush School of Government and Public Service**
The Master of Public Service and Administration degree in the Bush School of Government and Public Service is accredited by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA) (https://accreditation.naspaa.org/)

**College of Veterinary Medicine and Biomedical Sciences**
Veterinary Medicine degree program is accredited by the American Veterinary Medical Association Council on Education (AVMA) (https://www.avma.org/Pages/home.aspx).

**Texas A&M University at Galveston**
The undergraduate program in Offshore and Coastal Systems Engineering is accredited by the Engineering Accreditation Commission of ABET (http://main.abet.org/aps/Accreditedprogramsearch.aspx).

The undergraduate program in Marine Engineering Technology is accredited by the Engineering Technology Accreditation Commission of ABET (http://main.abet.org/aps/Accreditedprogramsearch.aspx).
UNDERGRADUATE CATALOG

The Texas A&M University Undergraduate Catalog, published annually, provides information about the undergraduate programs of Texas A&M University to students, prospective students, and faculty and staff of the University. Included is information concerning requirements for admission, services available to students, course offerings and listings of the administrative officers.

Publication

Publication Statement

The Texas A&M University Undergraduate Catalog is published each spring and the provisions for this volume are applicable during the 2020-2021 academic year. A student who registers for the first time at the University during a summer session is subject to the degree requirements set forth in the catalog effective for the fall semester immediately following his or her initial enrollment.

Texas A&M University Undergraduate Catalog, Edition 143, is published online by the Office of the Registrar, Texas A&M University, College Station, Texas 77843-0200

History and Development

Mission Statement
Texas A&M is dedicated to the discovery, development, communication and application of knowledge in a wide range of academic and professional fields. Our mission of providing the highest quality undergraduate and graduate programs emerges from our mission of developing new understandings through research and creativity.

We prepare students to assume roles of leadership, responsibility and service to the greater good. We assume as our historic trust the maintenance of freedom of inquiry and an intellectual environment that nurtures the human mind and spirit.

We welcome and seek to serve citizens of all racial, ethnic and geographic backgrounds, in keeping with our land-grant mission of educating a broad cross-section of the state’s population while meeting the challenges of our increasingly diverse, global economy.

History and Development

Texas A&M is the state’s first public institution of higher education. With a student body of more than 69,400 and more than 5,200 acres on the College Station campus alone, Texas A&M is also among the nation’s largest universities.

Our origins, however, are much humbler. We owe our existence to the Morrill Act, approved by the U.S. Congress on July 2, 1862, which provided for donation of public land to the states. The land was to be sold at auction, with the proceeds set aside in a perpetual fund, and the interest generated supporting a college “to teach such branches of learning as are related to agriculture and mechanical arts . . . in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life.”
In November 1866, the Texas Legislature agreed to provide for the state's land-grant college. Five years later, the Agricultural and Mechanical College of Texas was established through an act that appropriated $75,000 for the construction of buildings and that bound the state to defray all expenses of the college exceeding the annual interest from the endowment. Proceeds from the sale of the 180,000 acres of land scrip received under the Land Grant College Act were invested in $174,000 of Texas gold frontier defense bonds, forming a perpetual endowment for the institution. A commission created to identify a location for the college accepted the offer of 2,416 acres of land from the citizens of Brazos County in 1871, and the College opened its doors five years later.

In 1888, the faculty initiated programs of instruction at the graduate level, and in 1890, two Master of Science degrees were conferred. Initially, the Agricultural and Mechanical College of Texas emphasized graduate programs in agriculture and engineering, which were administered by a faculty committee for graduate studies. In 1898, a single Master of Science degree in horticulture was awarded, followed by a scattering of Master of Science degrees in agriculture over the next 22 years. The acceleration in the awarding of Master of Science degrees after 1920 prompted the College to establish the Graduate School in 1924, with the dean of the college serving as graduate dean.

In 1936, the Board of Directors approved "certain programs of study and research leading to the doctorate." That same year, the Academic Council established the graduate faculty, and in 1940, the first Ph.D. was awarded. In the 1960s, the Board of Regents created programs of graduate instruction in each of the academic colleges.

In 1963, the Texas state legislature officially changed the College's name to Texas A&M University, with the 'A' and 'M' being a symbolic link to the school's past but no longer officially standing for 'Agricultural and Mechanical.'

Texas A&M underwent many other significant changes in the '60s, as well. Under Gen. Earl Rudder's administration, Texas A&M also opened its doors to African American students and formally admitted women students. Participation in the Corps of Cadets was made voluntary.

Since then, Texas A&M has become an academic powerhouse. It is one of only three Tier 1 universities in the state (along with Rice University and the University of Texas at Austin). Texas A&M was designated a sea-grant institution in 1971 and a space-grant institution in 1989, making it among the first four universities to hold this triple distinction, and one of only 17 nationwide.

In 2001, Texas A&M became a member of the Association of American Universities, which is restricted to the 62 top public and private institutions of higher learning in the United States and Canada. In 2004, the Kappa of Texas Chapter of Phi Beta Kappa was installed at Texas A&M.

As the State of Texas has grown, so has the University. Today, women constitute nearly half of the student body, and membership in the Corps of Cadets is more than 2,300. Historically, the Corps of Cadets has produced more officers than any other institution outside the military academies. The George Bush Presidential Library and Museum opened in 1997, making Texas A&M one of only a few universities to host a presidential library.

Texas A&M has a presence in 250 of the state's 252 counties through its extension agencies, and also has two branch campuses: a marine campus in Galveston, and an engineering campus in the Middle Eastern country of Qatar (fully funded by the Qatar Foundation). The university has annual research expenditures of more than $922 million, ranking it among top 20 nationally by the National Science Foundation.

Classified by the Carnegie Foundation as a Research Intensive University, Texas A&M embraces its mission of advancing knowledge and human achievement, helping to drive the economic engine of the state and nation, and preparing students to be life-long learners and leaders in today's knowledge-based, global society.

Texas A&M's focus on excellence and innovation in teaching, research and service has led to rankings among the nation's top universities. Texas A&M today seeks even greater preeminence among the nation's top public universities, while continuing to respect the history and traditions that set us apart.

### University Core Curriculum

The Texas A&M Core Curriculum, in compliance with the Texas Core Curriculum, provides students with a foundation of knowledge of human cultures and the physical and natural world, develops principles of personal and social responsibility for living in a diverse world, and advances intellectual and practical skills that are essential for all learning. The Core Curriculum enhances the individual degree program and university graduation requirements, and all three areas must be met by every student.

Given the rapid evolution of necessary knowledge and skills and the need to take into account global, national, state, and local cultures, the core curriculum ensures that students will develop the essential knowledge and skills they need to be successful in college, in a career, in their communities, and in life. The core curriculum acts to enrich and broaden the University's tradition of providing thorough preparation in each student's academic major and preparing students for a lifetime of learning.

The University Core Curriculum requirements are described in the section that follows. These requirements must be met by every student entering Texas A&M University on or after the 2014 fall semester. Students entering earlier will be guided by the core curriculum in the catalog upon which they entered the university. Individual degree programs may require that specific courses from the core curriculum be used to satisfy core curriculum requirements. Please check with individual program advisors for details. Students transferring course credit to satisfy the Core Curriculum requirements should refer to the Texas Common Course Numbering System (p. 1306).

Texas A&M University branch campuses in Galveston and Qatar do not offer all of the courses included in the Texas A&M core curriculum. All campuses offer courses in each Foundational Component Area so that students can complete the core curriculum at their home campus. However, the Galveston and Qatar campuses have a limited number of courses in each Foundational Component Area. Students should consult their academic advisors for information on core curriculum courses available at their specific campus.

The core curriculum focuses on the development of six skills that have been shown to be effective in preparing students for the job market and their role in a diverse world and democratic society.

- **Critical Thinking Skills** – to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.

---
• Communication Skills – to include effective development, interpretation and expression of ideas through written, oral and visual communication.

• Empirical and Quantitative Skills – to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.

• Teamwork – to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal.

• Personal Responsibility – to include the ability to connect choices, actions and consequences to ethical decision-making.

• Social Responsibility – to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities.

Students develop and practice these skills in the context of 42 semester credit hours assigned to eight Foundational Component Areas, each made up of a selection of courses that meet the definition provided by the Texas Core Curriculum. For additional information, please reference http://core.tamu.edu.

Communication - 6 SCH

<table>

Courses in this category focus on the application of empirical and scientific methods that contribute to the understanding of what makes us human. Courses involve the exploration of behavior and interactions among individuals, groups, institutions, and events, examining their impact on the individual, society, and culture. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, empirical and quantitative, and social responsibility.

### Student Learning Outcomes

Student learning outcomes articulate the knowledge and skills we expect students to gain during their educational experiences. These learning outcomes ask students to connect their course- and degree-level learning to overall goals determined to be critically important to a university's
graduates as they make their way in the world after graduation and prepared to engage in learning for a lifetime.

First and foremost, of course, we expect students to have learned the material presented in their individual courses. From entry-level general education courses required of all undergraduates to capstone courses restricted to seniors in a major to specialized graduate seminars, by the time of graduation students are expected to have learned the material assigned in all of their courses. We call this “content knowledge.”

The broader institutional student learning outcomes ask students to connect the pieces of their education into a whole that synthesizes what they have learned. Students graduate not only knowing facts and understanding basic concepts but also demonstrating an ability to apply and explain those facts and concepts creatively in new situations. Students gain the skills and knowledge that allows them to thrive in a complex world.

**Baccalaureate**

A student who graduates from Texas A&M with a baccalaureate degree will have acquired the knowledge and skills necessary to:

**Master the depth of knowledge required for a degree,** including the ability to:

- Articulate disciplinary and interdisciplinary theories, concepts, principles, skills, and practices;
- Synthesize knowledge across courses and other experiences; and
- Apply knowledge from core curriculum courses, discipline-based courses, and other experiences in a range of contexts to solve problems and make decisions.

**Demonstrate critical thinking,** including the ability to:

- Evaluate, analyze, and integrate information from a variety of sources;
- Use appropriate strategies and tools to represent, analyze, and integrate information; and
- Develop critical, reasoned positions.

**Communicate effectively,** including the ability to:

- Demonstrate effective oral communication skills (which could include the use of languages such as American Sign language for those who do not communicate orally);
- Demonstrate effective writing skills;
- Demonstrate effective nonverbal communication skills (which could include appropriate use of performance, design, or representations such as maps, tables, and graphs);
- Listen actively and critically;
- Present work effectively to a range of audiences; and
- Effectively communicate original and creative ideas.

**Practice personal and social responsibility,** including the ability to:

- Practice ethical leadership;
- Recognize an ethical dilemma and apply rational decision-making in order to address it;
- Choose ethical courses of action in research and practice;
- Acknowledge and address the consequences of one’s own actions; and
- Engage in local and global civic activities.

**Demonstrate social, cultural, and global competence,** including the ability to:

- Live and work effectively in a diverse and global society;
- Articulate the value of a diverse and global perspective; and
- Recognize diverse economic, political, cultural, and religious opinions and practices.

**Prepare to engage in lifelong learning,** including the ability to:

- Exhibit the skills necessary to acquire, organize, reorganize, and interpret new knowledge;
- Show proficiency in current technologies and the ability to adapt to emerging technologies;
- Recognize and participate in activities that enhance wellness of body, mind, and spirit;
- Formulate a plan of personal goals for continued professional growth; and
- Demonstrate intellectual curiosity.

**Work collaboratively,** including the ability to:

- Participate effectively in teams;
- Consider different points of view; and
- Work with others to support a shared purpose or goal.

**Degree and Program Information**

**Which Catalog to Follow**

In meeting the requirements for a baccalaureate degree, a student is expected to complete the course and hour requirements as outlined in the catalog in effect at the time he or she first enrolls at Texas A&M. Normally, a student will not be granted a degree based upon completion of the requirements set forth in a catalog more than seven years old. Before changing catalogs, the student must consult his or her academic advisor. A student changes catalogs by filing a written notification with his or her dean, or designee. It is incumbent on the student to verify that the change has been made. Texas A&M University Student Rules (including periodic revisions) is the governing document in case of conflict between this catalog and Texas A&M University Student Rules. It is the responsibility of the individual student to read this information carefully and to use it as a reference. Please refer to the Student Rules for this information.

Whereas each college must retain the flexibility to improve its curriculum, course offerings may be changed during the student’s education. If a course required under a previous catalog is no longer offered, a student eligible to graduate according to that catalog should consult his or her academic advisor or dean to identify another course that may be used to fulfill the requirement. Course adjustments in the degree program are permitted only with the approval of the dean through the department head or program director. Furthermore, the University reserves the right to make any changes in requirements it may consider necessary and desirable by due notice in the catalog.

Students are required to take the courses listed in a curriculum; however, the display of a curriculum does not in any way indicate the length of time required to finish degree requirements. Rather, this display is intended as a guide to indicate the preferred order for completion of degree requirements. Exceptions to certain requirements may be petitioned through the department head to the dean of the college.
Degrees Offered

The following degrees are offered for the satisfactory completion of resident study in the appropriate curriculum:

- Bachelor of Arts (BA)
- Bachelor of Business Administration (BBA)
- Bachelor of Environmental Design (BED)
- Bachelor of Landscape Architecture (BLA)
- Bachelor of Science (BS)
- Bachelor of Science in Nursing (BSN)
- Master of Agribusiness (MAB)
- Master of Agriculture (MAGR)
- Master of Architecture (MARCH)
- Master of Arts (MA)
- Master of Biotechnology (MBIOT)
- Master of Business Administration (MBA)
- Master of Clinical Nutrition (MCN)
- Master of Computer Science (MCS)
- Master of Education (MED)
- Master of Engineering (MENG)
- Master of Engineering Technical Management (METM)
- Master of Equine Industry Management (MEIM)
- Master of Financial Management (MFM)
- Master of Fine Arts (MFA)
- Master of Geoscience (MGSC)
- Master of Health Administration (MHA)
- Master of Industrial Distribution (MID)
- Master of International Affairs (MIA)
- Master of International Policy (MIP)
- Master of Jurisprudence (MJUR)
- Master of Land and Property Development (MLPD)
- Master of Landscape Architecture (MLA)
- Master of Laws (LLM)
- Master of Marine Resources Management (MMRM)
- Master of Maritime Business Administration and Logistics (MMAL)
- Master of Natural Resources Development (MNRD)
- Master of Ocean Science and Technology (MOST)
- Master of Public Health (MPH)
- Master of Public Service and Administration (MPSA)
- Master of Real Estate (MRE)
- Master of Recreation and Youth Development (MRYD)
- Master of Science (MS)
- Master of Science in Nursing (MSN)
- Master of Science in Public Health (MSPH)
- Master of Urban Planning (MUP)
- Master of Water Management and Hydrological Science (MWM)
- Master of Wildlife Science (MWSC)
- Doctor of Dental Surgery (DDS)
- Doctor of Education (EdD)
- Doctor of Engineering (DEng)
- Doctor of Medicine (MD)
- Doctor of Pharmacy (PharmD)
- Doctor of Philosophy (PhD)
- Doctor of Public Health (DrPH)
- Doctor of Veterinary Medicine (DVM)
- Juris Doctor (JD)

The buying, selling, creating, duplicating, altering, giving or obtaining the Texas A&M diploma or other academic record is prohibited by state law. A person who violates this statute or who aids another person in violation is guilty of a misdemeanor and is subject to a fine and/or confinement if convicted.

The University has the right to rescind a previously granted degree if the University becomes aware of information indicating that the degree never should have been granted.

Tuition Charged for Excess Credit Hours

The State of Texas will not provide funds to state institutions of higher education for excess semester credit hours earned by a resident student. Because funding will not be provided by the State, and as permitted by State law, Texas A&M will charge tuition at the non-resident rate to all students who exceed the semester credit hour limit for their program. Excess semester credit hours are those which accrue after the student attempts more than 30 hours beyond the number of semester credit hours required for the completion of the degree program in which the student is enrolled. Thus, the student may accumulate up to 30 hours beyond those required for the chosen degree program and not exceed the limitation. The limitation on excess credit hours applies only to those undergraduate students who first enter higher education in the fall 1999 and thereafter. The semester credit hours counted toward the limitation include all hours attempted by the student except:

- Semester credit hours earned by the student before receiving a baccalaureate degree that has been previously awarded.
- Semester credit hours earned by the student by examination or other procedure by which credit is earned without registering for a course for which tuition is charged.
- Credit for remedial education courses, technical courses, workforce education courses funded according to contact hours, or other courses that would not generate academic credit that could be applied toward a degree program at Texas A&M.
- Semester credit hours earned by the student at a private or an out-of-state institution.
- Semester credit hours earned by the student before graduating from high school and used to satisfy high school graduation requirements (Effective June 2009).
- Hours not eligible for formula funding.
- Semester credit hours earned 10 or more years before the student began his or her degree program that have been excluded from the student record due to an election of admission under the Academic Fresh Start program.

Supplementary Fee for Courses Attempted More than Twice

Certain courses that are attempted by a student more than twice at a public institution of higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students, or charge a supplementary fee to the student who is repeating the course. Texas A&M has chosen to assess
Requirements for a Baccalaureate Degree

Requirements for a Baccalaureate Degree

To be a candidate for a degree at the end of the semester, a student must:

1. Be enrolled in or have completed all degree requirements by the 60th class day of the fall or spring semester, or the 15th class day of the second summer term either in residence or at another college or university. Proof of enrollment in any courses taken at another college or university must be provided to the Office of the Registrar, Degree Audit, by the above deadlines. A student must be enrolled in his or her degree-granting college(s) and major(s) at the beginning of the student's last semester at Texas A&M to be a candidate for a degree from that college.

2. Complete a minimum of 120 credit hours.

3. Complete, with at least a 2.0 grade point average, all undergraduate coursework attempted at Texas A&M.

4. Complete, with a 2.0 grade point average, all courses included in the major field of study.

5. Meet the Residence Requirement. A minimum of 25% of coursework applying to a degree must be completed in residence at Texas A&M University. Upper-level Residence Requirement: A minimum of 36 semester hours of 300- and/or 400-level coursework must be successfully completed in residence at Texas A&M to obtain a baccalaureate degree. A minimum of 12 of these 36 semester hours must be in the major. A student participating in Texas A&M off-campus study programs approved by the student's college may apply upper division credits earned in the programs toward the residence requirement up to a maximum of 18 semester hours, including hours transferred from another institution as part of one of these programs. These Texas A&M off-campus study programs may involve domestic or international institutions and may be taught by Texas A&M faculty or faculty from other institutions. Students choosing to participate in such programs and wishing to apply credits earned from the programs toward the residence requirement must receive college approval prior to the student's participation in the off-campus study program. Students participating in international programs must contact the Education Abroad Programs Office for details on how to obtain approval for courses taken outside the United States. Students participating in domestic off-campus programs must contact the dean's office of their college for approval procedures.

6. Complete the University Core Curriculum. Core Curriculum courses are listed on the University Core Curriculum (p. 25) page. For additional information, please reference http://core.tamu.edu.

7. Complete the citizenship requirement, which includes at least 6 credit hours in government/political science and at least 6 credit hours in American history. American National Government (POLS 206) and State and Local Government (POLS 207) fulfill the government/political science requirement.

8. Complete the Foreign Language requirement. A minimum of one year of foreign language is required for all baccalaureate degree programs at Texas A&M. For many programs, this degree requirement can be satisfied by the satisfactory completion of two units of the same foreign language at the high school level or one year of the same language at the college level.

a. International students whose native language is not English are exempt from satisfying the university foreign language requirement. These students may not register for the beginning and intermediate level courses in their native language (course numbers 101, 102, 201, and 202) which are used to fulfill the foreign language requirement.

b. Many Bachelor of Arts degrees require at least 6 additional semester credit hours of foreign language at the 200-level. Students should consult with an academic advisor about specific language requirements for their degree program.

c. Students who wish to demonstrate foreign language proficiency without taking acceptable high school or college courses may do so through the existing credit by examination process. In cases where students wish to demonstrate proficiency in a language not taught at Texas A&M, the following procedures shall apply. The student shall request an examination from the Head of the Department of Hispanic Studies or the Head of the Department of International Studies. This department will coordinate the administration of special examinations to demonstrate foreign language proficiency. This will include finding an appropriate examination to test the student's proficiency, informing the student how to arrange to take the examination and certifying the results to the student's advisor. All arrangements shall be made and fees paid by the student.

d. American Sign Language (ASL) may be used to fulfill the foreign language degree requirement unless otherwise specified by the student's college or department. Students may either transfer ASL credits or arrange to be tested at another institution. (Texas A&M does not offer courses in ASL.)

9. Complete the Writing requirement. The requirement may be met by passing two writing (W) courses or one writing (W) course and one oral communication (C) course in the student's major. The requirement may not be met by any course listed as a University Core Curriculum communication requirement, nor may it be met through credit by examination. It may be met by a course transferred from another institution of higher learning, with the approval of the dean of the student's college and the Associate Provost for Undergraduate Studies. Upon request, students will provide their dean with a course description, syllabus or writing sample from the course being transferred.
10. Complete the International and Cultural Diversity and Cultural Discourse requirements (6 credit hours).
   a. The International and Cultural Diversity (ICD) requirement will preparing graduates for a diverse, global society and addresses the following University Baccalaureate Learning Outcomes:
      1) Live and work effectively in a diverse and global society;
      2) Articulate the value of a diverse and global perspective;
      3) Recognize diverse opinions and practices and consider different points of view (including but not limited to economic, political, cultural, gender, and religious opinions).

   Students must take one course (3 credit hours) from the list available on the International and Cultural Diversity Requirement (http://catalog.tamu.edu/undergraduate/general-information/degree-information/international-cultural-diversity-requirements/) page. For additional information, please reference http://icd.tamu.edu.

   b. The Cultural Discourse (CD) requirement will prepare graduates to be leaders in an increasingly diverse world and act in a multicultural and global society and will address the following:
      1) Hold respectful discussions on difficult topics (controversial topics or topics that involve conflict)
      2) The ability to understand conflict from multiple viewpoints
      3) Recognize aspects of personal and society interactions including but not limited to power and authority structures, tolerance and intolerance, and promoting informed dialog

   Students must take one course (3 credit hours) from the list available on the Culture Discourse Requirement page. For additional information, please reference http://icd.tamu.edu.

   c. If a course listed as ICD or CD, but it also satisfies a Core Curriculum requirement, then the course may be used to satisfy both requirements.

Undergraduate Minor Programs

A minor is a selection of courses that focus on a single area or an interdisciplinary perspective as developed by the department or program that offers the minor. The department or program offering the minor is responsible for setting enrollment limits and deciding which courses are used to meet the minor. Coursework consists of 15-18 hours with a minimum of 6 in residence at the 300-400 level.

If a minor is offered by a department or academic unit, then the minor is considered to be available to all students as resources permit. Students must declare a minor no later than the date on which they apply for graduation. A maximum of two minors per degree can be completed by students. A minor is displayed on the transcript after graduation but not displayed on the diploma.

Two Degrees

A student pursuing a second baccalaureate degree must complete all university, college, and department/curricular requirements for the second degree not covered in the first. All essential work required for a second degree must be defined in advance in writing by the Dean or designee of the college granting the second degree. In all such cases, the total semester hours required must be at least 30 hours additional to the greater number required for either degree. At least 12 hours of 300- and 400-level course work must be completed in each field of study.

A student who has previously not been enrolled at Texas A&M and who is seeking a second degree must have a minimum of 36 hours of 300- and 400-level courses, 12 hours of which must be in the major field of study, in residence at Texas A&M. The student must also meet the citizenship requirements for American history and government/political science.

Baccalaureate Degree Option for Students Granted Early Admission to Professional Programs

A minimum of 120 hours is required for a Texas A&M undergraduate degree. Some degree programs require additional hours (see specific degree requirements for each major in this catalog). Students from undergraduate programs who are selected early into participating programs in medicine, dentistry, optometry, pharmacy, law, or veterinary medicine must have satisfied all University Core Curriculum requirements as specified in this catalog. A student intending to use this baccalaureate degree option must coordinate early in his or her program with the appropriate undergraduate advisor in order to ensure that degree requirements are met. The degree candidate must complete at least half of the total hours required for the baccalaureate degree while in residence at Texas A&M. This requirement includes a minimum of 24 hours of upper division courses in residence, of which a minimum of 12 must be in the major. A student will become eligible for the Texas A&M degree upon completion of the total credit hours required by his or her undergraduate degree plan. Each undergraduate major specifies those professional courses that may be used to satisfy its degree plan.

A student then selected into an approved professional program will be required to successfully complete a minimum of one full year of acceptable work at an accredited school of medicine, dentistry, optometry, pharmacy, law, or veterinary medicine in the United States. The student will be responsible for submitting official transcripts to the Office of Admissions to verify completion of agreement requirements. The participating undergraduate department or program will complete the required degree audit, approve the necessary substitutions and clear the student to graduate.

Baccalaureate degrees will be awarded in May, August, and December after the completion of the first year of the approved professional program or the necessary hours for the desired baccalaureate degree. Students must apply for graduation at Howdy. Check the academic calendar for deadlines and for commencement dates. Questions may be emailed to degree-audit@tamu.edu or call (979) 845-1089. For additional information about graduation, visit the graduation (http://graduation.tamu.edu) website.

Students who have received a baccalaureate degree are not eligible to participate in commencement. Individuals who would have been eligible to participate in this program had it been in effect when they were students at Texas A&M may request the conferral of a baccalaureate degree. Although this is a University-wide policy, not all colleges choose to participate. The use of this baccalaureate option will remain a college initiative in that each individual college and/or program must clear each candidate for graduation.
Graduation with Honors

Undergraduate Students

To be eligible for graduation with Latin honors, a student seeking a baccalaureate degree must enroll in and complete a minimum of 60 semester hours at Texas A&M University, Texas A&M University Galveston campus, or Texas A&M University Qatar campus preceding graduation and have an institutional grade point average equal to or greater than that required for the appropriate category of honors. Course credit received by examination, and courses reserved for graduate credit only, are excluded from the calculation of the number of hours and the grade point average for graduation with Latin honors.

Categories for Latin honors shall be designated as follows:

- **Summa Cum Laude**: A student may be graduated Summa Cum Laude with a grade point average of 3.90 or above.
- **Magna Cum Laude**: A student may be graduated Magna Cum Laude with a grade point average range of 3.70 through 3.899.
- **Cum Laude**: A student may be graduated Cum Laude with a grade point average range of 3.50 through 3.699.

Grade point averages used to determine Latin honors designations are calculated during the final degree audit the day before the ceremonies and include hours and final grades in courses taken during the graduation semester. Latin honors designations will not be changed after the final graduation clearance deadline.

Information regarding other honors designations may be found on the Honors and Undergraduate Research (p. 115) page.

Please note:

- Students are not required to enroll in honors courses to graduate with Latin honors.
- Taking designated honors courses does not mean students will graduate with Latin honors.

No Upper Division student found guilty of academic misconduct may receive Cum Laude, Magna Cum Laude, or Summa Cum Laude honors at graduation. Upper Division status is defined as having earned 60 or more credit hours, including transfer hours, prior to the date of the violation. This sanction is automatic upon a finding of academic misconduct, and is imposed without regard to the severity of other sanctions imposed by the instructor or Honor Council.

For more information, please see the Aggie Honor System Office (p. 83) section in the catalog.

First-Professional Students

- Students who complete their entire course of study at Texas A&M University in the College of Medicine are eligible for academic honors. In the College of Medicine, students must obtain a grade point average of 3.50 or greater to graduate with honors.
- In the Irma Lerma Rangel College of Pharmacy, students are eligible for Latin Honors as follows: Summa Cum Laude (4.0-3.90), Magna Cum Laude (3.89-3.75), and Cum Laude (3.74-3.50).
- In the School of Law, JD students may qualify to graduate Summa Cum Laude by holding a final cumulative grade point average of 3.80 or above, Magna Cum Laude with a final cumulative grade point average of 3.60-3.79, and Cum Laude with a final cumulative grade point average of 3.40 through 3.59.

- A first-professional student in the College of Veterinary Medicine may qualify to graduate Summa Cum Laude by holding a final grade point average of 3.90 or above, Magna Cum Laude with a grade point average of 3.70 through 3.899 and Cum Laude with a grade point average of 3.50 through 3.699.

Graduation Application, Diploma and Commencement

Formal application for degrees must be submitted online in Howdy by the deadline stated in the academic calendar.

The diploma of the University, with the appropriate degree, will be granted to the student who has made formal application for the degree by the published official deadline, has all grades on record in the Office of the Registrar, including grades pertaining to graduation with honors, and has satisfied all degree requirements by no later than 5 p.m., Friday, the first week of classes of the succeeding semester or summer term following commencement.

Students must have settled all financial obligations to the university prior to receiving a diploma.

Graduate and undergraduate students who plan to attend a commencement ceremony must do so the semester they apply for graduation and complete their degree requirements.

Formal application for degrees at Texas A&M University at Qatar is a two-step process. An online application must be submitted via the Howdy portal, as well as a supplemental application to the Office of Records, by the deadline stated in the Texas A&M University at Qatar academic calendar. Under unusual circumstances, an application for a degree may be accepted after the stated deadline.

All students must have settled all financial obligations to the university and Qatar Foundation prior to receiving a diploma.

Graduate and undergraduate students completing their degree in July or December will have the opportunity to participate in the commencement ceremony in May, following the completion of their degree. Students must participate in the commencement ceremony of their home campus.

Requirements for a Certificate

Requirements for a Certificate

A student must receive permission from the department offering the certificate and their primary academic advisor in order to pursue a certificate. All requirements outlined in the catalog and degree evaluation for the specific certificate program must be met in order for a certificate to be awarded.

Certificate types:

- **Major-dependent** - A student is admitted to the program through the offering department. Admission to the program requires the student to pursue a specific degree/major at Texas A&M University. This type of certificate program typically serves as a track within a degree program. The certificate and degree are awarded simultaneously.
- **Degree-dependent** - A student is admitted to the program through the offering department. Admission to the program simply requires that the student pursue a degree at Texas A&M University. The certificate may or may not be related to their specific degree/major. The certificate is awarded upon completion of the requirements independent of a degree.
• **Stand-alone** - A student is admitted to the program through the Office of Admissions. The student may pursue the certificate without being enrolled in a degree program. The certificate may be awarded upon completion of requirements.

**Graduation Application, Certificate and Commencement**

Beginning fall 2017, formal application for certificates to be awarded must be submitted online in Howdy (http://howdy.tamu.edu/) by the deadline stated in the academic calendar.

Certificates are granted to students who make formal application for the certificate to be awarded, have all grades on record in the Office of the Registrar, and have satisfied all certificate requirements. Certificates are awarded no more frequently than the last calendar day of each month; with the exception of major-dependent certificates which are awarded at the end of each term, along with the student’s associated degree. In months where a commencement ceremony is held, degree-dependent and stand-alone certificates will be awarded with the conferral date for that term’s commencement.

Students must have settled all financial obligations to the university prior to receiving a certificate.

University certificates will either be mailed directly to the student or issued to the college for formal presentation.

**Certificate/Graduation Fee**

At this time, there is not a fee associated with the awarding of a certificate from Texas A&M University.

For additional information regarding certificate tracking and awarding, please visit the Office of the Registrar website (http://registrar.tamu.edu/Graduation-Degree-Programs/Certificate-Tracking-Awarding/).

**Combination Programs**

Combination programs represent two degrees of different academic levels that are pursued and awarded simultaneously. Combination programs may allow a shorter time for completion due to the “double-counting” of some coursework. Even though the programs are combined, students must satisfy the required hours of both programs. See the specific program for more details.

Texas A&M University currently offers the following undergraduate programs combined with graduate and professional programs:

**Undergraduate and Graduate Programs**

- Bachelor of Arts in Economics and Master of International Affairs, 5-Year Degree Program (p. 572)
- Bachelor of Arts in Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 574)
- Bachelor of Arts in English and Master of Arts in English, 5-Year Degree Program (p. 587)
- Bachelor of Arts in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 511)
- Bachelor of Arts in International Studies and Master of Public International Affairs, 5-Year Degree Program (p. 613)
- Bachelor of Arts in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 732)
- Bachelor of Arts in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 649)
- Bachelor of Arts in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 633)
- Bachelor of Business Administration in Accounting and Master of Financial Management, 5-Year Degree Program (p. 275)
- Bachelor of Business Administration in Accounting and Master of Science, 5-Year Degree Program (p. 277)
- Bachelor of Science in Agricultural Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 140)
- Bachelor of Science in Applied Mathematical Sciences and Master of Science in Mathematics, 5-Year Degree Program (p. 728)
- Bachelor of Science in (p. 817)Coastal Environmental Science and Society and Master of Marine Resources Management, 5-Year Degree Program
- Bachelor of Science in Economics and Master of International Affairs, 5-Year Degree Program (p. 576)
- Bachelor of Science in Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 578)
- Bachelor of Science in Economics and Master of Science in Economics, 5-Year Degree Program (p. 579)
- Bachelor of Science in Environmental Geoscience and Master of Ocean Science and Technology, 5-Year Degree Program (p. 487)
- Bachelor of Science in Geology and Master of Science in Geology, 5-Year Degree Program (p. 516)
- Bachelor of Science in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 514)
- Bachelor of Science in Geophysics and Master of Science in Geophysics, 5-Year Degree Program (p. 518)
- Bachelor of Science in Industrial Engineering and Master of Science in Finance, 5-Year Degree Program (p. 452)
- Bachelor of Science in Industrial Engineering and Master of Public Health in Occupational Safety and Health, 5-Year Degree Program (p. 450)
- Bachelor of Science in Interdisciplinary Engineering and Master of Public Health in Occupational Safety and Health, 5-Year Degree Program (p. 373)
- Bachelor of Science in Kinesiology and Master of Science in Athletic Training, 5-Year Degree Program (p. 337)
- Bachelor of Science in Maritime Business Administration and Master of Maritime Business Administration and Logistics, 5-Year Degree Program (p. 834)
- Bachelor of Science in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 735)
- Bachelor of Science in Meteorology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 495)
- Bachelor of Science in Oceanography, Marine Ecosystem Science and Health Track and Master of Ocean Science and Technology, 5-Year Degree Program (p. 524)
- Bachelor of Science in Oceanography, Ocean Climate Track and Master of Ocean Science and Technology, 5-Year Degree Program (p. 527)
- Bachelor of Science in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 636)
• Bachelor of Science in Public Health and Master of Public Health in Epidemiology, 5-Year Degree Program (p. 676)
• Bachelor of Science in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 652)
• Bachelor of Science in Statistics and Master of Science in Statistics, 5-Year Degree Program (p. 749)
• Bachelor of Science in Urban and Regional Planning and Master of Land and Property Development, 5-Year Degree Program (p. 254)
• Bachelor of Science in Urban and Regional Planning and Master of Urban Planning, 5-Year Degree Program (p. 255)
• Bachelor of Science in Wildlife and Fisheries Sciences and Master of Public Service Administration, 5-Year Degree Program (p. 214)

Undergraduate and Professional Programs
• Bachelor of Science in Interdisciplinary Engineering and Juris Doctor, 6-Year Degree Program (p. 371)

1 Joint program between Texas A&M University, Texas A&M University at Galveston and Texas A&M University–Corpus Christi.

Undergraduate Degree Program

- Bachelor of Science in Nursing (BSN) in Nursing

Graduate Degree Programs

- Doctor of Education (EdD) in Agricultural Education
- Doctor of Education (EdD) in Curriculum and Instruction
- Doctor of Philosophy (PhD) in Plant Breeding
- Doctor of Philosophy (PhD) in Interdisciplinary Engineering
- Master of Agriculture (MAgr) in Agricultural Development
- Master of Agriculture (MAgr) in Poultry Science
- Master of Education (MEd) in Bilingual Education
- Master of Education (MEd) in Curriculum and Instruction
- Master of Education (MEd) in Educational Administration
- Master of Education (MEd) in Educational Psychology
- Master of Education (MEd) in Educational Technology
- Master of Education (MEd) in Special Education
- Master of Engineering (MEng) in Aerospace Engineering
- Master of Engineering (MEng) in Biological and Agricultural Engineering
- Master of Engineering (MEng) in Computer Engineering
- Master of Engineering (MEng) in Electrical Engineering
- Master of Engineering (MEng) in Engineering
- Master of Engineering (MEng) in Industrial Engineering
- Master of Engineering (MEng) in Mechanical Engineering
- Master of Engineering (MEng) in Petroleum Engineering
- Master of Engineering Technical Management (METM) in Technical Management
- Master of Geoscience (MGSC) in Geoscience
- Master of Industrial Distribution (MID) in Industrial Distribution
- Master of Jurisprudence (MJur) in Jurisprudence
- Master of Laws (LLM) in Laws
- Master of Maritime Business Administration and Logistics (MMAL) in Maritime Business Administration and Logistics
- Master of Natural Resource Development (MNRD) in Natural Resource Development
- Master of Public Health (MPH) in Epidemiology
- Master of Public Service and Administration (MPSA) in Public Service and Administration
- Master of Recreation and Youth Development (MRYD) in Recreation and Youth Development
- Master of Science (MS) in Agricultural Systems Management
- Master of Science (MS) in Analytics
- Master of Science (MS) in Bilingual Education
- Master of Science (MS) in Education for Health Care Professionals
- Master of Science (MS) in Educational Human Resource Development
- Master of Science (MS) in Electrical Engineering
- Master of Science (MS) in Energy
- Master of Science (MS) in Engineering Management
- Master of Science (MS) in Health Education
- Master of Science (MS) in Mathematics
- Master of Science (MS) in Plant Breeding
- Master of Science (MS) in Safety Engineering
- Master of Science (MS) in Special Education
- Master of Science (MS) in Sport Management
- Master of Science (MS) in Statistics
- Master of Science in Nursing (MSN) in Family Nurse Practitioner
- Master of Science in Nursing (MSN) in Forensic Nursing
- Master of Science in Nursing (MSN) in Nursing Education
- Master of Wildlife Science (MWSC) in Wildlife Science

A limited number of graduate certificate programs are available by distance education. Please review them here (http://catalog.tamu.edu/graduate/degrees-programs/#graduatecertificateprogramstext).

The delivery platform differs among these programs. Most are available 100% online, some are web-supported with interactive video and others require periodic campus visits. The delivery platform in most programs changes depending on the course/program content, needs of the students and their geographic locations. Students should carefully consider distance education and address any specific questions to the department offering the program of interest.

Only a student who is admitted to Texas A&M University may enroll in these distance education programs and the associated courses. A student wishing to enroll in any of the distance education programs must be admitted as a degree-seeking graduate student or as a post-baccalaureate non-degree seeking student. Please see http://admissions.tamu.edu for graduate admissions information.

A student may take up to 12 hours in non-degree-seeking post-baccalaureate status and apply these hours to a master's program with the approval of the student's advisory committee, the head of the department (or Chair of the Intercollegiate Faculty, if appropriate), and the Office of Graduate and Professional Studies if all admission requirements to the selected master's program are fulfilled. Courses offered for extension credit may not be used on the student's degree plan.
Post-baccalaureate non-degree status does not establish eligibility for admission to degree-seeking status.

Students who are not enrolled in an approved distance education program cannot take more than 50% of their required courses online. The Texas Higher Education Coordinating Board (THECB) [http://www.highered.texas.gov/institutional-resources-programs/public-universities-health-related-institutions/academic-program-development-modifications/distance-education-resources/distance-education-modifications-requests/] rules that no more than 50% of courses can be taken online if the program is not approved to be offered online as a distance education program.

Texas A&M University provides students pursuing a graduate degree by distance a wide variety of student support services, including access to library resources, advising, technology support and course materials acquisition through the online bookstore. A complete listing of services, degree program descriptions, appropriate points of contact within each program, and costs are available through the distance education website at http://distance.tamu.edu. Additional distance education programs are in development. Interested students should check the website periodically for updates. Students should contact the department offering the program for any questions.

**State Authorization**

State authorization allows Texas A&M University to offer educational opportunities to students among other states and nationwide.

**National Council for State Authorization Reciprocity Agreements (NC-SARA)**

Texas was approved as a SARA state in 2015, and is administered by the Southern [https://www.sreb.org/](https://www.sreb.org/) Regional Education Board (SREB.) [https://www.sreb.org/] ‘The State Authorization Reciprocity Agreement (http://nc-sara.org/) is a voluntary agreement among its member states and U.S. territories that establishes comparable national standards for interstate offering of postsecondary distance-education courses and programs. It is intended to make it easier for students to take online courses offered by postsecondary institutions based in another state.’ - NC-SARA

**Approved Minors**

**Minors**

**Interdisciplinary**
- Entrepreneurship (p. 121)
- Leadership (p. 152)
- Neuroscience (p. 123)

**College of Agriculture and Life Sciences**
- Agribusiness Entrepreneurship (p. 142)
- Agricultural Communications and Journalism (p. 151)
- Agricultural Economics (p. 143)
- Agricultural Systems Management (p. 167)
- AgriFood Sales (p. 143)
- Agronomy (p. 230)
- Biochemistry (p. 162)
- Bioenvironmental Sciences (p. 202)
- Entomology (p. 180)
- Environmental Soil Science (p. 231)
- Extension Education (p. 152)
- Financial Planning (p. 144)

- Forestry (p. 173)
- Genetics (p. 163)
- Horticulture (p. 191)
- International Agricultural Development (p. 152)
- Leadership (p. 123)
- Park and Natural Resource Management (p. 221)
- Plant Breeding (p. 231)
- Poultry Science (p. 205)
- Rangeland Ecology and Management (p. 215)
- Recreation, Park and Tourism Sciences (p. 222)
- Spatial Sciences (p. 173)
- Tourism Management (p. 222)
- Wildlife and Fisheries Sciences (p. 215)
- Youth Development (p. 222)

**College of Architecture**

- Architectural Fabrication and Product Design (p. 241)
- Architectural Heritage Conservation (p. 242)
- Art and Architecture History (p. 242)
- Art (p. 260)
- Facility Management (p. 247)
- Game Design and Development (p. 261)
- Global Art, Design and Construction (p. 243)
- Global Culture and Society (p. 243)
- Leadership in the Design and Construction Professions (p. 248)
- Sustainable Architecture and Planning (p. 243)
- Urban and Regional Planning (p. 256)

**Mays Business School**

- Business (p. 267)

**College of Education and Human Development**

- Applied Learning in Science, Technology, Engineering and Mathematics (STEM) (p. 353)
- Coaching (p. 344)
- Creative Studies (p. 321)
- Dance (p. 345)
- Health (p. 345)
- Human Resource Development (p. 314)
- Sport Management (p. 345)
- Technology Management (p. 314)

**College of Engineering**

- Aerospace Engineering (p. 383)
- Analysis, Design and Management of Energy Conversion Systems (p. 468)
- Biomedical Engineering (p. 388)
- Chemical Engineering (p. 393)
- Computer Science (p. 424)
- Control of Mechanical Systems (p. 468)
- Cybersecurity (p. 374)
- Design and Simulation of Mechanical Systems (p. 468)
- Electrical Engineering (p. 431)
- Embedded Systems Integration (p. 376)
- Engineering Concepts
- Engineering Project Management (p. 376)
- Game Design and Development (p. 424)
- Industrial Engineering (p. 454)
- Materials Science and Engineering (p. 460)
- Nuclear Engineering (p. 472)
- Petroleum Engineering (p. 479)
Radiological Health Engineering (p. 472)

**College of Geosciences**
- Climate Change (p. 491)
- Earth Sciences (p. 491)
- Environmental Geosciences (p. 492)
- Geographic Information Science and Technology (GIST) (p. 508)
- Geography (p. 508)
- Geology (p. 519)
- Geophysics (p. 520)
- Meteorology (p. 496)
- Oceanography (p. 528)

**College of Liberal Arts**
- Africana Studies (p. 543)
- Anthropology (p. 555)
- Arabic Studies (p. 619)
- Asian Studies (p. 620)
- Chinese (p. 621)
- Classical Studies (p. 621)
- Communication (p. 566)
- Comparative Cultural Studies - International (p. 544)
- Comparative Cultural Studies - United States (p. 546)
- Economics (p. 580)
- English (p. 589)
- Film Studies (p. 546)
- French (p. 621)
- German (p. 622)
- Global Culture and Society (p. 547)
- Hispanic Studies for Community Engagement (p. 593)
- History (p. 597)
- Italian (p. 622)
- Japanese (p. 622)
- Journalism (p. 566)
- Latina/o and Mexican-American Studies (p. 547)
- Museum Studies (p. 555)
- Performance Studies (p. 626)
- Philosophy (p. 629)
- Psychology (p. 644)
- Religious Studies (p. 548)
- Russian (p. 623)
- Sociology (p. 654)
- Spanish (p. 594)
- Women's and Gender Studies (p. 548)

**School of Military Science**
- Military Studies (p. 773)

**School of Public Health**
- Global Health (p. 677)
- Occupational Health and Safety (p. 678)
- Public Health Studies (p. 678)

**College of Science**
- Astrophysics (p. 745)
- Bioinformatics (p. 696)
- Biology (p. 696)
- Chemistry (p. 713)
- Mathematics (p. 737)
- Pre-Medicine (p. 696)
- Physics (p. 746)

Statistics (p. 750)

**College of Veterinary Medicine and Biomedical Sciences**
- Biomedical Sciences (p. 761)

**Texas A&M University at Galveston**
- Clinical Laboratory Sciences (p. 822)
- Coastal Environmental Science and Society (p. 822)
- Diving Technology and Methods (p. 813)
- Marine Biology (p. 828)
- Maritime Business Administration (p. 836)
- Maritime Studies (p. 814)

**Texas A&M University at Qatar**
- Analysis, Design and Management of Energy Conversion Systems (p. 468)
- Chemical Engineering (p. 393)
- Chemistry (p. 713)
- Control of Mechanical Systems (p. 468)
- Design and Simulation of Mechanical Systems (p. 468)
- Electrical Engineering (p. 431)
- Geology (p. 519)
- Mathematics (p. 737)
- Petroleum Engineering (p. 479)
- Physics (p. 746)
- Political Science (p. 844)

**Approved Certificates**

**Certificates**

**Interdisciplinary**
- Neuroscience (p. 124)

**College of Agriculture and Life Sciences**
- Community Recreation and Park Administration (p. 223)
- Enology (p. 192)
- Equine Science (p. 158)
- Food Diversity (p. 187)
- Hospitality Management (p. 223) ¹
- International Trade and Agriculture (p. 144)
- Meat Science (p. 158)
- Parks and Conservation (p. 224)
- Professional Event Manager (p. 224)
- Public Health Entomology (p. 181)
- Tourism Management (p. 225) ¹
- Watershed (p. 173)
- Youth Development (p. 225)

**College of Architecture**
- Diversity (p. 237)

**Mays Business School**
- Capital Markets and Investments (p. 282)
- Commercial Banking (p. 282)
- Corporate Finance (p. 283)
- Energy Accounting (p. 278)
- European Union Business (p. 268)
- Internal Audit (p. 279)
- International Business Studies (p. 269)
- Investment Banking (p. 283)
Investment Banking and Private Equity (p. 283)
Latin American Business (p. 270)
Nonprofit and Social Innovation (p. 271)
Trading, Risk and Investments (p. 283)

**College of Education**
Interdisciplinary Studies (p. 321)

**College of Engineering**
Corrosion Science and Engineering
Data Center Operations Engineering (p. 454)
Energy Engineering (p. 479)
Engineering Concept, Creation, and Commercialization (p. 377)
Engineering Systems Management (p. 455)
Engineering Therapeutics Manufacturing (p. 393)
Holistic Leadership in Engineering (p. 377)
International Engineering (p. 377)
Petroleum Ventures (p. 479)
Polymer Specialty (p. 378)
Quality Engineering for Regulated Medical Technologies (p. 389)
Safety Engineering (p. 379)

**College of Liberal Arts**
Applied Behavioral Health (p. 644)
Business Economics (p. 581)
Communication and Global Media (p. 567)
Communication Leadership and Conflict Management (p. 568)
Diversity (p. 549)
Health Communication (p. 568)
Healthy Development (p. 644)
Philosophy Pre-Law (p. 629)
Proficiency in Arabic (p. 623)
Psychology of Diversity (p. 645)
Quantitative Economic Methods (p. 581)
Social Media (p. 568)
Strategic Communication (p. 569)
Work and Organizations (p. 645)

**College of Veterinary Medicine and Biomedical Sciences**
Biomedical Research and Development (p. 770)
Cultural Competency and Communications in Spanish (p. 762)

**School of Military Science**
Leadership Study and Development (p. 774)

1 Offered via online Distance Education.

For more information on undergraduate certificate programs, please visit the Office of the Registrar (http://registrar.tamu.edu/Our-Services/ Curricular-Services/Curricular-Approvals/Program-Approvals/Approved-Certificate-Programs/ website).

**Cultural Discourse Requirements**

Students are required to complete three (3) semester credit hours from the courses listed.

Admission

General Application Information

Application Information

Students can apply for undergraduate admission to Texas A&M University by using the ApplyTexas Application or Coalition Application.

You may access the appropriate undergraduate application from the ApplyTexas Application website (www.applytexas.org), the Coalition Application website (http://www.coalitionforcollegeaccess.org/), or the Texas A&M University website (http://admissions.tamu.edu).

Texas A&M University has several conveniently located Prospective Student Centers throughout the state, staffed with regional advisors ready to serve you. Please contact the center nearest you to learn more about admissions, financial aid, academic programs and student services. Texas A&M also has regional advisors who serve the Brazos Valley, Central Texas and El Paso areas as well as regional advisors throughout the U.S. to assist out-of-state applicants. Visit the website admissions.tamu.edu/psc (http://admissions.tamu.edu/psc/) for more details.

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• has completed all levels of related coursework offered at their high school</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Each student is eligible to take 1 (one) course per fall or spring semester, and course registration will be completed by the TAMU advisor. No summer classes are offered at this time. Classes will be held on the Texas A&M University campus.

Students and their parents/guardians will be responsible for any lodging or transportation considerations. Admission for this program is on a space-available basis. The applicant pool is competitive, and admission into this program is not guaranteed.

---

1 An applicant who has enrolled in a post-secondary institution since high school graduation, with or without credit earned, must apply as a transfer applicant.

### Items Necessary to Complete an Application File

Please see the Readmission, Post-baccalaureate or Non-degree sections for other items required to complete the transfer application for those types of admission. U.S. citizens completing a non-U.S. high
school program should refer to International Admissions for questions concerning transcripts, examination results, and foreign credentials.

An application is reviewed to make a decision about admission after all items listed below have been received. The items must be received by the appropriate closing date to qualify for consideration for admission.

In addition, freshman applicants must show proof of meeting the State of Texas Uniform Admission Policy to qualify for review. If you attend an out-of-state high school or are a home schooled student, you are exempt from the Uniform Admission Policy.

**Application submitted electronically via ApplyTexas or the Coalition Application**

**Application Fee (check, money order, Visa, MasterCard, Discover or American Express)—All fees are nonrefundable**

- Domestic Undergraduate - $75
- Domestic Graduate - $65
- International - $90

**Guidelines for requesting application fee waivers:**

- Fee waivers are not available for international students.

**Freshman Waivers**

Applicants who qualify for federally funded free/reduced lunch programs may qualify for a fee waiver. Students must certify their eligibility on the application. Please see our admissions website, [http://admissions.tamu.edu/freshman/apply](http://admissions.tamu.edu/freshman/apply), for additional instructions for requesting a waiver.

**Transfer or Readmit Waivers**

To request a fee waiver, please provide your Student Aid Report (SAR), which you will find within your current FAFSA, or a copy of an award letter from your current institution. The Office of Admissions does not have access to your FAFSA or SAR, you must provide a copy as part of your application file. Checking the fee waiver box on the application will not satisfy the fee waiver requirement.

Please see our admissions website, [http://admissions.tamu.edu/transfer/apply](http://admissions.tamu.edu/transfer/apply), for additional information.

**Essays**

- Freshman applicants are required to complete Essay Topic A.
- Transfer applicants are required to complete Essay Topic A.

**SAT or ACT Scores**

- Required of all freshman applicants, including all international freshman applicants.
- Scores should be sent directly from the testing agency and must be received by the posted deadline to be considered.
- The SAT code is 6003; the ACT code is 4198.
- Test scores must be from a test date within five years of the date of planned enrollment.
- The highest test score from one test date will be used in our review for admission. Texas A&M does not combine test scores from different test dates.

**Self-Reported Academic Record (SRAR)**

- Domestic freshman applicants who have not graduated from high school at the time of application must fill out and submit the Self-Reported Academic Record (SRAR) indicating coursework, credits earned, grades, graduation plan/diploma type, grade point average and a numerical class rank (if available) at least through their junior year. Students should have a copy of their high school transcript available to use as a reference when filling out the SRAR. If admitted, the applicant will be required to submit a final transcript with graduation date by August 15. Discrepancies between a student’s SRAR and official final transcript will be thoroughly reviewed; depending on results, this could result in a student’s admission being rescinded.
- Access to the SRAR will be available on our admissions website when the application opens.
- Domestic applicants attending an international school which follows an academic curriculum patterned after the U.S. education system may fill out the SRAR.
- International students studying in the U.S. may fill out the SRAR.
- International students studying outside the U.S. must provide official academic records, see International Admission Criteria for details.
- The Office of Admissions reserves the right to require official transcripts from any student; students should check the Applicant Information System to ensure completion of their file.
- Freshman and transfer applicants who have graduated from high school at the time of application should submit an official high school transcript that includes grades and credits for all completed coursework, a numerical class rank (if available), date of graduation and graduation plan completed, or a certificate verifying completion of a GED program.
- Post-baccalaureate applicants are not required to submit a high school transcript as part of the application file. Readmit applicants may be required to submit a final high school transcript if one is not currently on file with the university.
- To be considered official, a transcript must bear an original signature of a school official or an original school seal.
- Applicants who have attended high school both in the U.S. and out of the U.S. may complete the SRAR provided the courses and grades are present on the U.S. transcript; otherwise, official transcripts are required. Details for providing international transcripts can be found under International Admission Criteria.
- For students enrolled in the U.S., copies of official transcripts from other countries will be accepted provided the copies are on file and verified by the U.S. institution.
- Faxed or emailed copies are not official and will not be accepted.

**Class Rank**

- Students graduating from a Texas high school who rank in the top ten percent must provide verification of ranking by submitting a high school transcript noting the student’s relative numeric rank or a transcript with a letter from the school on school letterhead signed by a school official noting the student’s relative numeric ranking. Documents may be uploaded in the Applicant Information System for processing.

**Official College Transcripts**

- An official transcript is required from every post-secondary institution attended even if the applicant did not earn credit, receive a course grade or the course is not transferable. Coursework from one
For the Office of Admissions to notify applicants. All items necessary to complete an admission file must be received by the Office of Admissions within one month of the closing date, there may not be sufficient time to process credentials. Please allow at least two weeks to process credentials.

Lawful Permanent Residents of the United States
An applicant who has applied for or been granted Lawful Permanent Resident (LPR) status in the United States by the Department of Homeland Security (DHS) is eligible to submit an application as a Domestic Applicant. To qualify, you must include one of the following with the application:

- a copy of both sides of the DHS-issued Permanent Resident Card, or
- the I-551 Entry Stamp and Immigrant Visa in the passport, or
- an approved I-797 Notice of Action or I-797C Notice of Receipt.

If your parent is also a permanent resident, a copy of the parent’s proof of LPR status will be necessary to determine in-state residency for tuition purposes.

Note: If you have applied for adjustment of status to Lawful Permanent Residency and have not received your LPR card or Notice of Action that says Notice Type: Approval Notice, you are considered an international student once you are admitted to the University. There are certain requirements that international students must fulfill upon enrollment. Please contact International Student Services at iss@tamu.edu for more information about these requirements.

Required Coursework
Applicants who graduate from an accredited Texas public or private high school applying to Texas A&M University must have completed the Foundation High School Program preferably with the Distinguished Level of Achievement with at least one endorsement. The high school curriculum should be noted on the official high school transcript. Please visit http://admissions.tamu.edu/freshman/coursework (http://admissions.tamu.edu/freshman/coursework/) for a complete description of coursework including information for home-schooled and out-of-state applicants.

State of Texas Uniform Admission Policy
Texas Education Code (TEC) 51.803-51.809 (State of Texas Uniform Admission Policy (http://admissions.tamu.edu/freshman/TexasUAP/)) requires that all freshman applicants meet one of the following college readiness standards in order to be eligible to be considered for admission at a Texas four-year public institution.

- Satisfy the College Readiness Benchmarks on the SAT or ACT assessment; or
  - SAT – 480 EBRW and 530 Math for tests taken after February 2016
  - ACT – 18 English, 22 Reading, 22 Mathematics and 23 Science
- Successfully complete the State of Texas foundation, recommended or advanced/distinguished high school program or complete the portion of the program that was available to them; or
- Successfully complete a curriculum that is equivalent in content and rigor to the foundation, recommended or advanced/distinguished high school program at a high school that is exempt from offering such programs.

Students attending an out-of-state/out-of-country high school or home school are exempt from the Uniform Admission Policy.

Freshman Admissions
Additional Information for Freshman Applicants

1. Information Presented in the Application
   - Extracurricular activities including time commitment and duration of involvement
   - Leadership and/or exceptional talent as shown in extracurricular activities and/or work
   - Community/volunteer work including time commitment and duration of involvement
   - Awards and achievements earned while in high school
   - Employment and/or internships including dates of work and hours per week
   - Family educational background and household income
   - Number of people in household

2. Essay Topic A
   Topic A on the application is required. Applicants to the College of Engineering will be asked to answer an additional essay question as part of the application.
Freshman Admissions
When all credentials necessary to complete a freshman applicant’s file are received during the admission application period, one of the following criteria will be used to determine who will be offered admission:

1. Top 10% Applicants from Texas High Schools
   Applicants who are Texas residents or who are enrolled in recognized public or private high schools in Texas with a rank in the top 10% of their high school graduating class, on or before the admissions deadline, will be automatically admitted to Texas A&M University if they have successfully met the State of Texas Uniform Admissions Policy and have successfully completed the recommended or distinguished graduation plan or the foundation distinguished plan. Choice of major is not guaranteed. Applicants must submit all required credentials by the closing date in order to qualify for automatic admission.

2. Review Applicants
   Applicants not meeting the above requirements for automatic admission but who have met the state of Texas Uniform Admission Policy will be considered for admission by holistic review of their application file.

Information for all Freshman Applicants
• All applicants should use the application questions and the essays to present their academic background and personal strengths as well as personal circumstances.
• Letters of recommendation are optional. If an applicant chooses to submit letters of recommendation, only the first two received will be considered. The most helpful letters are from individuals who know the applicant well and who can write about what distinguishes the individual from other applicants in the areas of leadership, exceptional talent or special circumstances. Photocopies are acceptable.
• A competitive applicant who cannot be admitted to a major with restricted enrollment (Colleges of Architecture, Business, Education, Engineering, Liberal Arts, and Public Health) will be offered admission to their second major choice. If the second major choice is full, then an alternate major must be chosen after admission to the university.

Admission Decisions
Notice of Admission Decision
Texas A&M University receives many more academically prepared applicants for admission than we can accommodate. Admission decisions are made beginning September 1 and continue throughout the application period. A final decision may not be announced until early December for spring admission or late March for summer or fall admission. A limited number of applicants may be offered provisional admission that requires the successful completion of a summer school program at Texas A&M. In addition, some applicants may be considered for the Texas A&M Higher Education Center at McAllen (http://admissions.tamu.edu/HECM/), Texas A&M Blinn TEAM Program (http://blinnteam.tamu.edu), Texas A&M Engineering Academy at Blinn-Bryan (http://engineering.tamu.edu/academies/blinn-bryan/), Texas A&M Engineering at Galveston (http://engineering.tamu.edu/academics/engineering-at-galveston/), Texas A&M Engineering at McAllen (https://engineering.tamu.edu/admissions-and-aid/engineering-at-mcallen/), or the Program for System Admission (http://admissions.tamu.edu/PSA/).

Suspected Fraudulent Admission Applications
Applicants for admission to Texas A&M University should be aware that the information submitted as part of the application process will be relied upon by University officials to determine their status for admission and residency for tuition purposes. By signing and submitting an admission application, the applicant certifies that the information in, and submitted with, the application is complete and correct and may be verified by Texas A&M University.

All students applying to Texas A&M University are expected to follow the Aggie Code of Honor which states “An Aggie does not lie, cheat or steal nor tolerate those who do.” Applicants found to have misrepresented themselves or submitted false information on the application will receive appropriate disciplinary action which may include rejection of the application, withdrawal of any offer of acceptance, cancellation of enrollment or any other appropriate disciplinary action. In all instances of disciplinary action, the application fee is non-refundable.

Pursuant to Texas A&M Student Rule 24.4.1 (http://student-rules.tamu.edu/rule24/), acts of dishonesty include but are not limited to:
• Withholding material information from the University, misrepresenting the truth during a University investigation or student conduct conference, and/or making false statements to any University officials or law enforcement officers in the course of their duties.
• Furnishing false information to and/or withholding information from any University official, faculty member, office, or law enforcement officers in the course of their duties.
• Forgery, alteration, possession, or misuse of any University document, record, or instrument of identification.
• The submission of false information at the time of admission or readmission is grounds for rejection of the application, withdrawal of any offer of acceptance, cancellation of enrollment, dismissal or other appropriate disciplinary action.

For prospective undergraduate students (admitted but not enrolled), the initial determination of whether an individual has submitted a fraudulent application will be made by the Director of Admissions Operations, with a right of appeal to the Executive Director of Admissions. All appeals will be considered by the Admissions Decisions Appeals Committee and a recommendation made to the Executive Director of Admissions. For prospective graduate students, initial appeals will be made to the Dean of Graduate and Professional Studies.

Enrolled students suspected of violating Student Rules will be reported to the Student Conduct Office.

Any University official who suspects that a prospective student or enrolled student has submitted a fraudulent admission application must notify the Executive Director of Admissions.

Residence Requirement for Baccalaureate Degree
A student must complete at least 25% of semester credit hours applied to a baccalaureate degree in residence at Texas A&M University. Upper-level Residence Requirement: A minimum of 36 semester credit hours of 300-level and higher coursework must be successfully completed in residence at Texas A&M University to obtain a baccalaureate degree. For the Bachelor of Science in Nursing - RN to BSN Track, a minimum of 30 semester credit hours of 300-level and higher coursework must be successfully completed in residence at Texas A&M University. In all
cases, a minimum of 12 of these 300-level and higher semester hours must be in the major.

1. See this catalog pertaining to your major for the specific science.
2. Choice available for transfer applicants only. Nursing and Dental Hygiene applicants must have completed or be enrolled in prerequisite courses at the time of application. Courses may be completed at any accredited college or university.
3. All new students to the Colleges of Architecture, Business, and Public Health enter the lower level.
4. Requires CHEM 120; MATH 168, MATH 151.
5. The curriculum leading to a professional degree in Architecture begins in the four-year undergraduate Environmental Design Architectural Studies degree program. This degree provides entry to the Master of Architecture program.
6. No spring transfer admission.
7. Choice not available for transfer applicants.
8. All students seeking elementary teacher certification will complete a baccalaureate degree in Interdisciplinary Studies. There is no major in Secondary Teacher Education. All students seeking secondary certification (except those preparing to teach physical education or health) will major in an academic discipline other than education (i.e., mathematics, English, computer science, biology, etc.) and take appropriate coursework for teacher certification in the College of Education and Human Development.
9. Apply through College of Agriculture and Life Sciences.
10. Pre-veterinary medicine is not offered at Texas A&M. If you plan to apply to the Doctor of Veterinary Medicine (DVM) program, you should select a major that would be a good vocational choice if you do not later enter the DVM program. Any major may be selected; however, some curricula more closely parallel courses that must be completed before applying to the DVM program than others.

**Change of Curriculum to Another Campus**
In addition to main campus, Texas A&M offers certain undergraduate degrees at its two branch campuses, Galveston and Qatar, and the Higher Education Center at McAllen. While enrolled as a student in residence at any one of the Texas A&M locations, students may apply for a change of curriculum to another site for a future semester. Students must comply with the established change of curriculum procedures and requirements of their desired major, department, and college, and space must be available. Final approval is granted by the academic dean or departmental advisor for that major.

**Transfer Admissions**

Transfer applicants will be reviewed and receive a decision from the college/major to which they have applied.

Recommended/required coursework for all majors is available on the **Transfer Course Sheets** at http://admissions.tamu.edu/transfer/majors. Students are strongly encouraged to follow the guidelines and complete both the required and recommended courses as outlined on the Transfer Course Sheets and in the catalog. Applicants who begin a set of courses which have a two-semester sequence are encouraged to complete both courses in the sequence before planning to transfer to Texas A&M.
Admission Criteria

- Transfer applicants must have at least a 2.5 grade point average (GPA) on at least 24 graded semester hours of transferable coursework at the time of application to be reviewed for admission.
- Students with less than a 2.5 GPA and/or less than 24 graded transferable hours will be denied admission and will not be sent to the academic college for review.
- Transfer admission decisions are made by each college or major and are competitive; thus, admission standards may change from one semester to another. Preference is given to the applicant with the highest grade point average (GPA) and the most courses completed for the major designated on the application.
- Applicants who drop or withdraw from courses frequently and who do not routinely achieve satisfactory grades will be at a disadvantage in the review for admission.
- Spring grades may be used in the fall admission decision if requested by the Academic College or in instances where the student did not meet the university requirements for review. Spring transcripts must be received by June 1 for review with spring grades. A complete application must be on file by March 1 to be considered for fall admission and to qualify for spring grade review. Spring grade review is not available for all applicants and is not an option for students studying outside the U.S.
- The entire application, including essay topic A, is considered in the review process.
- Some colleges consider second choice majors and some do not consider second choice majors. This is noted on the Transfer Course Sheets. The admission decisions follow the guidelines presented in the Transfer Course Sheets and the College Specific Information provided in the catalog. Space may be limited for those being reviewed for their second choice.

Automatic Transfer Admission through SB 175

A transfer applicant who graduated from a Texas high school and ranked in the top 10% of the student’s high school qualifies for automatic transfer admission to a 4-year university under the provisions of SB 175 if they meet the following guidelines:

1. The applicant must have graduated in the top 10% of his or her high school graduating class from a Texas high school not more than 4 years prior to the semester for which the student is applying. The top 10% ranking must be stated on the final high school transcript, or the applicant must have been previously offered admission under the top 10% rule to the institution to which the applicant seeks admission as a transfer student.
2. The applicant must complete the core curriculum at a public junior college or other public or private lower-division institution with a 2.5 GPA on a four-point scale or equivalent.
3. Transcript should note core completion.
4. The applicant must expressly and clearly claim in the application that he or she is seeking admission under the transfer top 10% rule (SB 175).
5. The applicant must provide all of the documents required for transfer admission to Texas A&M by the posted deadline. Transfer requirements can be found at http://admissions.tamu.edu/transfer.

Applicants qualifying for transfer top 10% admission under SB 175 will be admitted to Texas A&M but the choice of major is not guaranteed. Students desiring admission to Business or Engineering are encouraged to select a second choice major of interest due to the limited enrollment capacity in these colleges.

For information concerning the Transfer Top 10% Admission, please see www.legis.state.tx.us/tlodocs/81R/billtext/doc/SB00175F.doc.

College Specific Information

College of Agriculture and Life Sciences

Transfer admission requirements vary for the different academic programs offered by the College. Admission decisions are made by major and are competitive. Most majors have required and recommended coursework to be completed by the student prior to application. It is highly recommended that prospective students contact the academic advisor for the major of interest to inquire about specific transfer admission requirements. Students should also refer to the Texas A&M University Admissions (http://admissions.tamu.edu/transfer/apply/) website to review the Transfer Course Sheets for each major. Also, note that transfer admission GPA requirements vary by major and several exceed the minimum 2.5 GPA. Completion of the essay indicating why the major was selected and how a degree in this major will help meet career goals is required. For more information on transfer guidelines, coursework and contact information for all academic advisors, refer to the College of Agriculture and Life Sciences (http://aglifesciences.tamu.edu) website.

College of Architecture

Applicants must have completed 24 hours of transferable coursework at the time of application, and it is recommended that these courses be selected from the degree program electives described elsewhere in this catalog. The essay is an important component in the review process and should explain why the applicant is interested in either the Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning or Visualization program. Depending on the program of interest, applicants with less than a 3.0 GPA are rarely admitted. For more information, visit the College of Architecture (http://www.arch.tamu.edu) website.

Enrollment in Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning, and Visualization is driven by available studio space. Additionally, there are eight sequential studios in those degree programs which make it difficult for students that transfer with more than 36 hours.

</table>

¹ MATH 1324 from some colleges will not be a direct equivalent to MATH 140 at Texas A&M University but will satisfy the core math requirement for this major.

Mays Business School
Mays Business School offers transfer admission to the most competitive applicants. The transfer admission process identifies applications that evidence outstanding accomplishments, including academic credentials using the following guidelines.

Transfer admission to Mays generally requires excellence in the following set of eight specific courses. Applicants desiring to major in business are encouraged to plan early, and incorporate this entire body of coursework into their curriculum prior to applying. It is especially important to have credit for both required math courses before applying.

Mays admits transfer applicants for summer or fall admission. No spring transfer admission is available. Applicants are expected to have completed and excelled in substantially all of the 24 semester hours of Required Coursework. Applicants need a grade of A in most courses and a high overall GPA to be competitive.

The entire application is reviewed. Successful applicants include carefully written essays that demonstrate clarity of purpose, creativity, and an advanced writing style. Applicants are encouraged to use the required essay as an opportunity identify their past accomplishments, discuss what they hope to study at Texas A&M University, and describe how their undergraduate business education will help them meet goals after graduation. Applicants who have special circumstances they wish to have considered are urged to share all pertinent information, with appropriate documentation, in their essay(s).

The college has identified the following 31 hours of coursework as transferable for all CEHD majors:

<table>
<thead>
<tr>
<th>Course Number</th>
<th>Course Title</th>
<th>TCCNS Number</th>

</table>

¹ In lieu of MATH 1324 and MATH 1325, Mays accepts MATH 2414 and MATH 2413, respectively.

College of Education and Human Development
The College of Education and Human Development (CEHD) is actively seeking qualified transfer students who are interested in teacher certification. There is a nationwide demand for teachers. In particular, the College is seeking students interested in high-need teaching fields: math, science, special education, bilingual, English as a Second Language, and foreign language. The College also offers a variety of non-certification programs.

To be competitive for admission, an applicant should, at the time of application, have a minimum 2.75 GPA on at least 24 hours of graded transferable coursework. It is preferred that MATH 140/MATH 1324, MATH 142/MATH 1325 and two science courses from the desired major be taken prior to application. Students specifically interested in Allied Health or Kinesiology Exercise Science should complete both math and both science courses with a grade of B or better and maintain a cumulative 3.0 GPA across all transferable coursework in order to be competitive in the applicant pool.

Students interested in certification at grades 8–12 should complete a baccalaureate degree in a discipline area and contact the College regarding certification. The College of Education and Human Development does not consider second-choice majors.

Recommended Courses. Prospective transfer students should refer to the College of Education and Human Development (http://education.tamu.edu) website to identify additional courses that will satisfy degree requirements. Any student applying for a degree in Allied Health or Kinesiology is encouraged to apply with under 60 total hours of transfer credit. Applicants should refer to the College website for more information.

The College of Education and Human Development evaluates performances in all courses and considers all parts of the application. If you have repeatedly dropped or withdrawn from courses or if you are taking courses that do not apply to the Core Curriculum or your major, they may have a negative impact when the application is reviewed. A well-written essay is a student's opportunity to share information and experiences that could indicate success in a particular major.

The college has identified the following 31 hours of coursework as transferable for all CEHD majors:

Guidelines for Transfer Applicants by Program

Health. Applicants who are seeking transfer admission to this program should complete BIOL 1406, CHEM 1411, MATH 1324 and MATH 1325 for admission. Other prerequisite coursework that is recommended is SPCH 1315; and PHED 1304. Students may also take BIOL 2401 and BIOL 2402 to substitute for BIOL 319 and BIOL 320 for this option. Students specifically interested in Allied Health should complete both math courses with grades of B or better and at least two of the available science courses listed with grades of B or better. It is preferred that these students also maintain a minimum 3.0 cumulative GPA across all courses that transfer to Texas A&M University.

Kinesiology–Exercise Science. Students in this program are encouraged to complete at least 24 hours of the science coursework prior to the 60 completed hours. The Texas Common Course Numbers for the required science coursework on the exercise science degree plan (Applied Exercise Physiology, Basic Exercise Physiology and Motor Behavior options in the Kinesiology degree) are BIOL 1406, BIOL 1407, CHEM 1411, CHEM 1412, PHYS 1401 and PHYS 1402. The remaining 8 hours (Anatomy and Physiology I and II) must be taken at Texas A&M. Other coursework that students could complete include MATH 1324 and MATH 1325 (required for transfer); ENGL 2311 or SPCH 1315; and PHED 1301. Students should complete both math courses with grades of B or better and at least two of the available science courses listed with grades of B or better. It is preferred that these students also maintain a minimum 3.0 cumulative GPA across all courses that transfer to Texas A&M University.

Kinesiology–Physical Education Teacher Certification. Applicants who are seeking transfer admission to this program should complete BIOL 1406, PHYS 1401, MATH 1324 and MATH 1325. Other prerequisite coursework that can be taken prior to admission to Texas A&M and the program and is recommended is ENGL 1301 or ENGL 2311; and PHED 1301. Students may also take BIOL 2401 and BIOL 2402 to substitute for BIOL 319 and BIOL 320 for this option.

Sport Management. Applicants who are seeking transfer admission to this program should complete two lab sciences that meet TAMU Core Curriculum which could consist of the following science courses: BIOL 1406, GEOI 1403, CHEM 1411 or PHYS 1401. Check with the Office of Admissions for specific courses that may meet this requirement. MATH 1324 and MATH 1325 are also required for admission. Other recommended coursework includes ENGL 1301 or ENGL 2311 and SPCH 1315; and ECON 2302.

For more information about admission to the College of Education and Human Development, please contact Casey Ricketts at cricketts@tamu.edu.

College of Engineering

Applicants should complete at least 24 hours of graded, transferable coursework at the time of submitting their application, all with a grade of C or better. Transfer admission GPA requirements vary by major, with the majority exceeding the minimum requirements for transfer admission consideration to Texas A&M. Transfer admission course requirements also vary by major. Successful applicants for undergraduate engineering degree programs in the College of Engineering will have completed all or most of the coursework listed before applying for transfer admission. Prospective transfer students should review prospective student information accessed through the College of Engineering (http://engineering.tamu.edu) website for more information and details specific to each major. Transfer Course Sheets (http://admissions.tamu.edu/transfer/majors/) are available for each engineering major to provide guidance on specific transfer admission requirements.

<table>

</tbody>
</table>

1. IDIS will accept an equivalent to Introduction to Composition and Rhetoric (ENGL 103 – ENGL 1301) to fulfill the composition requirement.
2. The MATH 151, MATH 152 and MATH 251 sequence can also be satisfied by completing the TCCNS sequence of four 3-hour courses (MATH 2313, MATH 2314, MATH 2315, MATH 2316). It is intended that applicants finish their calculus sequence, and not intended that applicants mix courses between two different calculus sequences.
3. Applicants are often admitted without this course, but it is recommended.
4. Biomedical Engineering and Chemical Engineering require Fundamentals of Chemistry I (CHEM 119 – TCCNS CHEM 1411) and Fundamentals of Chemistry II (CHEM 120 – TCCNS CHEM 1412). All other majors in the College, except computer science, require CHEM 107/CHEM 117. Students attending an institution without an equivalent to CHEM 107/CHEM 117 can transfer an equivalent to CHEM 120 to fulfill the CHEM 107/CHEM 117 requirement. Computer Science does not require CHEM for their degree plan but CHEM 119 and CHEM 120 can be used toward an approved science requirement.

College of Geosciences

Prospective freshman and transfer applicants are encouraged to refer to the College of Geosciences (http://geosciences.tamu.edu) website for details on appropriate coursework for their intended major. Special attention is paid to performance on required math and science courses and to the essay portion of the application. Fall and spring admission preferred. The College of Geosciences will consider second-choice majors.

Overall, the College of Geosciences requires prospective transfer students to be in the process of completing a minimum of 24 hours from the list of courses provided here with a minimum overall GPA of 2.5. Applicants are expected to have demonstrated successful completion of this body of coursework, to present evidence of success in a course in their selected major, and in the mathematics and science courses specified.

The entire application submitted by transfer students is reviewed. Successful applicants include carefully written essays that demonstrate clarity of purpose and an advanced writing style. In the essay, applicants are advised to identify their intended major within the College of Geosciences and to describe why they are committing to study that subject. Applicants who have special circumstances they wish to share are encouraged to address these within the body of the essay(s), which are held in strict confidence.
Each major requires the courses as listed below:

<table>
<thead>
<tr>
<th>Applicable Majors</th>
<th>Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Environmental Studies (ENST) B.S.</td>
<td>At least one course selected from: GEOG 1302, 1303, GEOG 1303 and 1103, 1403 or other introductory courses in the Geosciences (Geography, Geology, Atmospheric Science, Oceanography) Two Math courses: MATH 1324 and 1325 One Science course selected from: BIOL 1306 and 1106, 1406 CHEM 1311 and 1111, 1411</td>
</tr>
<tr>
<td>Environmental Geosciences (ENGS) B.S.</td>

</tr>
<tr>
<td>Geology (GEOL) B.S.</td>
<td>GEOG 1303 and 1103 or 1403 These four Math/Science courses: MATH 2413, 2414, CHEM 1411, 1412</td>
</tr>
<tr>
<td>Geophysics (GEOP) B.S.</td>
<td>GEOG 1303 and 1103 or 1403 These four Math/Science courses: MATH 2413, 2414; PHYS 2325 and 2125, PHYS 2326 and 2126</td>
</tr>
<tr>
<td>Meteorology (METR) B.S.</td>
<td>MATH 2413, 2414; PHYS 2425, CHEM 1401, 1412 (These courses must be completed with a B or better.)</td>
</tr>
<tr>
<td>Oceanography (OCNG) B.S.</td>
<td>MATH 2413, 2414; CHEM 1411, 1412; PHYS 2325, 2326; BIOL11106, 1306 (These courses must be completed with a C or better.)</td>
</tr>
</tbody>
</table>

**College of Science**

Applicants should complete 24 hours, as appropriate to the choice of major, with a cumulative GPA of at least 3.00. Strength of schedule is a factor in determining admission. Applicants will not be admitted without the completion of the first two semesters of courses in their declared major with a grade of B or better. Chemistry and Physics majors must also complete 8 hours of Calculus I and II with a grade of B or better. Biology students must complete 8 hours of Chemistry I and II with a grade of B or better and Calculus I and II with a grade of C or better. The College of Science will consider second-choice majors. Students with 90 hours of college credit will not be considered for transfer admission. For more information, visit the College of Science website (http://www.science.tamu.edu).

**Field of Study Curricula**

A Field of Study Curriculum is a set of courses that will satisfy lower-division requirements for a baccalaureate degree in a specific academic area at a general academic teaching institution. The Texas Higher Education Coordinating Board publishes information about Board-approved Field of Study Curricula (http://www.thecb.state.tx.us). Texas A&M University complies with requirements outlined in 19 Texas Administrative Code §4.32 regarding transfer of course credit for completed or partially-completed Field of Study Curricula. Per 19 Texas Administrative Code §4.32, following the receipt of credit, “the student may be required to satisfy the remaining course requirements in the field of study curriculum of the receiving institution, or to complete additional requirements in the receiving institution’s program, as long as those requirements do not duplicate course content already completed through the field of study curriculum.”

**College of Veterinary Medicine and Biomedical Sciences**

Applicants should have a 3.00 GPA on at least 45 hours of graded transferable coursework at the time of application and meet all Common Body of Knowledge (CBK) requirements for Biomedical Sciences in order to be considered for admission into Biomedical Sciences. Students who begin a set of courses which have a two-semester sequence are encouraged to complete both courses in the sequence before transferring to Texas A&M. No second-choice majors are considered. No summer admissions accepted. For more information, visit the College of Veterinary Medicine and Biomedical Sciences (http://vetmed.tamu.edu) website.

Transfer students with 45 or more hours completed at the time of application will be given preference in admission. The transfer into Biomedical Sciences must occur before the student reaches 75 completed hours. All CBK courses should have a minimum grade of a C. Any CBK courses transferred in from a community college must have a minimum grade of a B.

Readmits will require a 3.0 at Texas A&M University and all CBK courses completed with at least a C in all courses. Any CBK courses transferred in from a community college must have a minimum grade of a B.

\(^1\) Students may choose to take MATH 2413 or MATH 1325 as calculus for transfer. These are equivalent to TAMU course numbers MATH 151 and MATH 142, respectively.

**Notification of Admission Decisions**

Transfer admissions are made through a competitive review process. Applicants are notified of the admission decision on a rolling basis throughout the application season. For those applicants requested
to submit spring grades for fall consideration, decisions should be announced by early July.

**Additional Information for Transfer Applicants**

1. All applicants are encouraged to view the Transfer Course Sheets (http://admissions.tamu.edu/transfer/majors/) posted on the admissions website for information concerning required courses and GPA requirements for admission to a specific major. Applicants to the Colleges of Architecture, Business, and Veterinary Medicine and Biomedical Sciences should refer to the Upper Level Entry requirements. Applicants to the College of Engineering should refer to the Entry To A Major – College of Engineering requirements.

2. A 2.0 GPA or better on coursework in progress during the semester (excluding summer terms) immediately prior to enrollment at Texas A&M is a condition of admission.

3. Grades for all transferable courses are used in the computation of the GPA. This includes:
   - Failing grades, repeated courses, WF, Incomplete, etc.
   - Grades reported as Incomplete are computed as Fs.
   - Plus and minus grade designations are not used; C+ is computed as a C, B- as a B, etc.

4. Credit by examination courses which are transcripted from other colleges or universities may be transferred if sequential coursework with credit is also indicated. If there is evidence that the credit by examination courses are part of the student’s program of study at that institution, credit will be awarded for those courses that meet the transfer guidelines. Note: Credit by examination will not count toward the 24 hours required for consideration for admission.

5. Coursework taken as credit-by-exam must be listed as a specific course and course number on an official college transcript to be considered for transfer of credit.

**Transfer Course Credit Policies**

Transfer credit on coursework complete at the time of application to Texas A&M University is determined when an official transcript from the originating institution is presented as part of the application for admission or readmission process. An official transcript is required from every post-secondary institution attended (including dual credit earned in high school) even if the applicant did not earn credit, receive a course grade or the course is not transferable.

The transfer of course credit is determined by the Office of Admissions on a course-by-course basis by application of policies set under the guidance of the Texas Higher Education Coordinating Board, the Texas Association of Collegiate Registrars and Admissions Officers, and under the guidance of faculty within the academic colleges. Credit submitted for transfer must be on an official transcript received by the Office of Admissions from the Registrar of the institution where the credit was earned. Course content will be determined from the catalog description or the syllabus. The transferability of courses will be based on the criteria below. All criteria are intended to be considered together; for example, criteria 10 may be qualified by criteria 7.

**Credit from Institutions Accredited by One of the Institutional Accrediting Agencies**

1. A course that is normally considered as part of a bachelor’s degree program (not including the bachelor of technology or similar terminal degree) may be transferred. The following criteria, taken together, are used:

   a. The course is applicable to a bachelor’s degree at Texas A&M.
   b. The course is similar to a course or courses offered for degree credit by Texas A&M.
   c. The course content is at or above the level of the beginning course in the subject matter offered by Texas A&M.

2. A course that is intended for use in a vocational, technical or occupational program will not typically transfer. In certain cases, credit for occupational skill courses will be considered. Transfer of this credit requires that the student’s Texas A&M major is engineering technology or industrial distribution or that the student’s major department and dean approve the course for use in the student’s degree program after enrollment.

3. Credit for support courses such as Math, Science and English intended specifically for use in an occupational program will not be transferred.

4. Credit for the course must be shown on the official transcript in semester hours or in units that are readily converted to semester hours.

5. A graduate-level course will not be transferred for undergraduate credit unless approved for use in the student’s undergraduate degree program by the student’s major department and Dean. This also applies for a course offered in a professional degree program such as Nursing, Law, or Medicine.

6. Credit by examination courses which are transcripted from other colleges or universities may be transferred if sequential coursework with credit is also indicated. If there is evidence that the credit by examination courses are part of the student’s program of study at that institution, credit will be awarded for those courses that meet our transfer guidelines.

7. Courses similar to ones offered by Texas A&M at the junior or senior level transfer by title only. Such courses may be used in the student’s degree program only if approved by the Department Head and Dean of the student’s major field. Validation of such credit, either by examination or the completion of a higher level course, may be required.

8. A field experience, internship or student teaching course may be transferred by title only.

9. Credit for cooperative education will not be transferred.

10. A course that is substantially equivalent to a Texas A&M lower level course transfers as an equivalent course. Two or more courses may be combined to form one or more equivalent courses. If there is doubt about the equivalency of a course, the Texas A&M department offering the course subject matter may be asked to determine if the course is equivalent. STEM courses are often referred to the departments for evaluation.

11. As a general policy, credit for admission will be given for transfer work satisfactorily completed with a passing grade at another properly accredited institution.

12. Grade Point Average (GPA) for any period shall be computed by dividing the total number of semester hours of transferable courses for which the student received grades into the total number of grade points earned in that period. Credit hours to which grades equivalent to Texas A&M grades of W, WF, F, I or U are assigned shall be included; those having grades equivalent to Texas A&M grades of WP, Q, S, X and NG shall be excluded.

13. In any case where a decision cannot be made using the above criteria, the Office of Admissions will determine the transfer of credit based
on University policy, previous actions of the University and prior experience.

Resolution of Transfer Disputes for Lower Division Courses Between Public Institutions in Texas

The following procedures shall be followed by public institutions of higher education in the resolution of transfer credit disputes involving lower-division courses:

1. If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied. A receiving institution shall also provide written notice of the reasons for denying credit for a particular course or set of courses at the request of the sending institution.
2. A student who receives notice as specified in subsection 1 may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution.
3. The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with the rules and guidelines of the Texas Higher Education Coordinating Board (THECB).
4. If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the institution that denies the course credit for transfer shall notify the Commissioner of its denial and the reasons for the denial.

The Commissioner of Higher Education or the Commissioner’s designee shall make the final determination about the dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions.

Credit from Non-accredited Schools

Students who transfer to Texas A&M from an institution of higher education that is not accredited by one of the institutional accrediting agencies may validate the work taken at the institution by one of the following methods upon admission:

1. Successful completion of a comprehensive departmental examination or nationally standardized examination that is approved by the department.
2. Successful completion of a higher level course in the same subject area when approved by the head of the department and the dean of the college.

Credit will be given to students transferring from non-accredited public colleges in Texas for work completed with grades of C or better if they earn a grade point of 2.0 (C average) on the first 30 hours of residence work at Texas A&M.

Credit from Foreign Institutions

Transfer work from institutions that do not follow the United States educational system with instruction in English will be evaluated on an individual basis. A-level examinations with a grade of C or better will result in the award of transfer credit. We do not award credit for Baccalaureate II examinations. Credit will be given for work satisfactorily completed at international institutions offering programs recognized by Texas A&M. Official credentials submitted directly from the Office of the Registrar and a listing of courses completed and grades awarded must accompany any request for transfer credit. Transfer work will be awarded by course title unless previous arrangements have been made using the Texas A&M University Transfer Credit Study Abroad Pre-Approval Form. Courses must be equivalent in character and content to courses offered at Texas A&M. Credit will not be awarded from international institutions which are not academically accredited by the Ministry of Education or other appropriate authority in the home country.

No English composition courses will be transferred from institutions located in non-English speaking countries. American history and American political science (government) courses will not transfer from foreign institutions.

Courses taken at language training centers or language institutes are generally not awarded transfer credit. A transcript from such an institution must be issued through the Office of the Registrar at a Texas A&M recognized university, institute or language training center. Credentials of all language training centers and institutes are carefully reviewed.

Credit for Military Experience

State law (Texas Education Code Section 51.3042) and Texas A&M University policy awards credit for military service to eligible veterans. To receive credit, student veterans must submit proof of eligibility to the Office of Admissions. Up to 12 hours of general elective credits may be awarded, as needed for the student’s degree plan.

Proof of eligibility includes:

• DD Form 214 showing 1 year active duty and an honorable discharge OR
• Military orders OR
• Disability discharge documentation AND
• Documentation of high school completion (final high school transcript or General Educational Development certificate)

Military transcripts are evaluated at the time of application and credit for military experience/training is awarded based on recommendations contained within the Guide to the Evaluation of Educational Experiences in the Armed Services published by the American Council on Education (ACE). Texas A&M University will award KINE 198 and KINE 199 credit for completion of Basic Training if applicable to a student’s degree plan. Credit under this policy does not prohibit Texas A&M University from awarding additional credit. The Military Transcript Credit Appeal form shall be provided to the Office of Admissions with approval of the academic advisor and veteran.

Proof of eligibility includes:

• Official military transcript (JST or CCAF)

Military Service Credits are irrevocable once awarded. Potential consequences should be identified and understood before a request is submitted. Students must consult their academic advisor for advice on the number of credits from military service that can be used in their degree program to avoid excess credit accumulation and possible negative effects.

Extension and Correspondence Courses

Students may apply a maximum of 30 semester hours of approved extension class work and correspondence study toward a degree. Students may apply up to 12 hours of correspondence credit earned through an accredited institution toward the requirements for an
undergraduate degree, even though Texas A&M does not offer courses by correspondence.

Correspondence courses taken through the Defense Activity for Nontraditional Education Support (DANTES) may be accepted and included in the 12 hours allowed.

In order for a student in residence at Texas A&M to receive credit for correspondence work toward a bachelor’s degree, he or she should:

• obtain advance written permission from the dean of his or her college;
• present appropriate evidence of having completed the course.

Testing Services is authorized to act as an agent to receive correspondence courses.

International Admissions

International Admission Criteria

Transcripts/Examination Results

Official academic records (transcripts, mark sheets, diplomas, etc.) are required for all secondary and any university coursework completed. Records should include all courses taken in high school and every college or university the applicant has attended.

Official records require the original school seal or an original signature of a school official (Registrar, Principal, Headmaster or Director of Student Records, Controller of Examinations, or the Ministry of Education).

Official records should be mailed from the school directly to Texas A&M University, Office of Admissions. Examination results should be sent directly from the examination agency. In addition to the original records in a language other than English, Texas A&M requires official translations in English. Translations sent directly from the institution attended or from a recognized translator will be accepted. Transcript evaluations that include a certified copy of the original transcript and a word for word translation from an evaluation service which is a member of the National Association of Credential Evaluation Services (http://www.naces.org/members.html) are strongly recommended and will allow faster processing of files. We recommend a document-by-document evaluation (with a GPA) for high school credentials and a course-by-course evaluation for college/university transcripts from non-U.S. institutions. Credential evaluations that include a word for word translation will be considered as an official translation but will NOT be accepted as a substitute for required transcripts. For students enrolled in the United States, we will accept copies of official transcripts from other countries that are on file and verified by the U.S. institution. Unofficial photocopies, fax copies and notarized copies of records, examination results or translations will not be accepted. Uploaded transcripts and diplomas indicating graduation from secondary school (final high school transcripts) will not be accepted. These transcripts must be mailed.

Admission Criteria for International Applicants with U.S. Based Credentials

International applicants who are completing their education at an institution that is accredited by the U.S. will be reviewed in accordance with the guidelines determined for domestic admission. However, these applicants must still meet international deadlines and testing requirements. (See item 2 below.)

Admission Criteria for International Applicants with Foreign Credentials

International applicants who are completing their education at an institution that is not accredited by the U.S. will be reviewed based on the following criteria:

1. Academic Achievement

• International applicants are expected to complete an educational program that will allow them to be considered for admission to a university in their home country. Examples include the completion of Grade 13, Form 6 or 3 A-level exams following the General Certificate of Secondary Education (GCSE). Predicted A-level exam results must be received by the application closing date.
• Applicants must submit proof of high school graduation, typically a diploma, leaving certificate, or official examination results. Students that complete the West African Examinations Council (WAEC) exam must provide the necessary information for Texas A&M to verify the WAEC results, typically a WAEC scratch card or results checker, by the application closing date.
• Successful applicants will rank near the top of their country’s educational system (B average or better) and score well above average on national exams.
• Secondary school courses: Appropriate college preparatory coursework is required.

2. Testing and Proof of English Proficiency

SAT or ACT scores will be considered in the review criteria for international freshman applicants. Applicants whose native language is not English are required to demonstrate English proficiency by meeting one of the following requirements to be eligible for review for admission:

• TOEFL internet-based test score of 80 or higher (taken within two years of date of intended enrollment)
• IELTS with a 6.0 overall band score (taken within two years of date of intended enrollment)
• SAT Evidence Based Reading and Writing (EBRW) score of 560 or higher
• ACT English score of 21 or higher
• Completed all four years of high school within the U.S.
• Transfer from an accredited U.S. institution of higher education with at least 30 semester credit hours including the equivalent to Texas A&M’s ENGL 103 or ENGL 104 with a grade of C or better

Duolingo English Test and English3: Texas A&M University is temporarily accepting both the Duolingo English Test and English3 online assessments from applicants where TOEFL and IELTS exams are impacted due to Coronavirus (COVID-19) concerns. Applicants from affected countries may submit Duolingo English Test (105 minimum) or English3 scores (67 minimum) to satisfy English proficiency requirements for spring 2021 admission.

1. Individual Achievement and Recognition

• Leadership positions held
• Honors/awards received
• Major national, state or Texas A&M scholarships received

Additional Requirements for International Applicants

After Admission

If admitted, international students should review the International Student Services Channel, howdy.tamu.edu · Applicant tab, for next steps concerning enrollment at Texas A&M University. Additional information
Scholarship Information for International Students
There are a limited number of scholarships, fellowships, grants and loans available to international students, both in the admission process and throughout their enrollment. Some of these come from academic departments, particularly for graduate applicants, but there are also forms of financial aid available through International Student Services and Scholarships & Financial Aid. International applicants with financial need are encouraged to complete the International Student Financial Aid Application (ISFAA) (http://financialaid.tamu.edu/Apply-for-Aid/ISFAA/). This form must be resubmitted annually for continued consideration.

One special opportunity that a student may be eligible for upon admission to Texas A&M University is the Texas/Mexico Education Scholarship. Texas law allows a limited number of admitted applicants who are citizens of Mexico, and who can document financial need, to pay the same tuition as the residents of the State of Texas. For more information regarding how to apply for this scholarship, please refer to International Student Services (http://iss.tamu.edu) website.

For additional information regarding financial assistance and other scholarships available to International Students, please contact:

Scholarships & Financial Aid
Texas A&M University

Other Admissions
Admission Criteria for Other Application Types
Readmission Criteria
Admission decisions for readmission are based on the following:

• GPA on Texas A&M coursework;
• GPA on coursework since leaving Texas A&M;
• desired major; and
• information presented in the application and essay/statement of purpose.

If you were previously admitted but did not enroll and attend class through the official census date, you do not qualify as a readmit, and you must apply as either a freshman or transfer student.

If you were previously enrolled at Texas A&M but did not attend class through the official census date of the previous long semester, then you must apply for readmission.

Transcripts from institutions attended since the last enrollment at Texas A&M are required as follows:

<table>
<thead>
<tr>
<th>If Desired Readmission Term Is</th>
<th>Must Have Transcripts Through</th>
</tr>
</thead>
<tbody>
<tr>
<td>2021 Spring semester</td>
<td>2020 Summer session</td>
</tr>
<tr>
<td>2021 Summer semester</td>
<td>2020 Fall semester</td>
</tr>
<tr>
<td>2021 Fall semester</td>
<td>2021 Spring semester if applying after June 1</td>
</tr>
</tbody>
</table>

Post-baccalaureate Undergraduate Criteria
Admission is limited and intended for applicants with a degree who wish to apply for further study at the undergraduate level to pursue a second bachelor’s degree.

Additional requirements to complete a post-baccalaureate application:

• an official transcript indicating the receipt of a recognized baccalaureate degree
• a statement of purpose explaining why enrollment at Texas A&M is necessary
• official transcripts from all colleges attended (official high school transcript not required)

Admission decisions for post-baccalaureate undergraduates consider:

• GPA on transferable college coursework
• completion of prerequisite coursework
• information presented in the application

Priority is given to qualified applicants for their initial degree; therefore, post-baccalaureate undergraduate admission may be limited or may not be available. Mays Business School, the College of Liberal Arts, the School of Public Health, and the College of Veterinary Medicine do not currently consider applicants for post-baccalaureate study. See the Classification section of this catalog for the enrollment rights and privileges of this classification.

Undergraduate Non-degree Criteria
Admission is limited and intended for applicants with a high school diploma (with the exception of High School Enrichment Program participants) or for degree applicants who do not intend to pursue a baccalaureate degree at Texas A&M. This includes:

• local residents or University employees taking courses on a part-time basis
• applicants completing established Texas A&M University requirements for teacher or other certification
• applicants completing a prescribed set of courses as preparation for application to graduate study or professional programs (i.e., medical school, veterinary school, law school or CPA exam)
• others as deemed appropriate by the Office of Admissions and the college or program of admission
Eligibility requirements:

- any transportation considerations.
- registration will be completed by the Texas A&M advisor. No summer levels of related coursework offered at their high school. Each student
- To be considered for this program, students must have completed all
- may qualify to continue to study Physics at the college level.
- and you have completed all of the classes your high school offers, you
- graduation at both levels. For example, if you are interested in Physics
- This program provides a chance to further your knowledge in a subject
- toward high school graduation. Admission for this program is on a space-
- by the posted deadline. If a student does not have coursework subsequent to ten years, he or she will be considered for admission based on the guidelines for new entering freshmen, which will require, among other things, an acceptable SAT or ACT score that has been completed within the past five years.

Priority is given to qualified applicants for their initial bachelor’s degree; therefore, non-degree admission may be limited or not available. The College of Liberal Arts limits enrollment to summer only and the College of Veterinary Medicine and School of Public Health does not allow non-degree seeking admission. See the Classification section of this catalog for the enrollment rights and privileges of this classification.

Transient Session Only Criteria

Admission is considered for applicants who wish to attend summer only and present appropriate credentials for the level of specified coursework and apply within the processing period for the specific session.

Additional requirements to complete transient session only application:

- a statement of purpose explaining why enrollment at Texas A&M is desired
- an official college transcript showing the latest collegiate coursework attempted or a complete, official high school transcript if no college work has been attempted after high school graduation

High School Enrichment Program

Texas A&M University is pleased to offer the High School Enrichment Program (HSEP) for qualified high school students in the Bryan/College Station area that will provide college credit and may also provide credit toward high school graduation. Admission for this program is on a space-available basis. The applicant pool is competitive, and admission into this program is not guaranteed.

This program provides a chance to further your knowledge in a subject you have completed in high school and earn valuable credit for graduation at both levels. For example, if you are interested in Physics and you have completed all of the classes your high school offers, you may qualify to continue to study Physics at the college level.

To be considered for this program, students must have completed all levels of related coursework offered at their high school. Each student is eligible to take one course per fall or spring semester, and course registration will be completed by the Texas A&M advisor. No summer classes are offered at this time. Classes will be held on the Texas A&M campus, and students and their parents/guardians will be responsible for any transportation considerations.

Eligibility requirements:

- You must be a junior or senior in high school in the Bryan/College Station area.
- You must have a minimum new SAT score of 1270 or an ACT score of 27.
- You must provide a recommendation form from your high school counselor to participate.

Academic Fresh Start Policy

Applicants for admission or readmission to Texas A&M may choose to have academic coursework that was completed at least 10 years prior to their term of application removed from consideration in the admission decision (Texas residents only). All other admission requirements apply. Should a Fresh Start applicant be admitted, he or she will forfeit all credit earned prior to 10 years from the term of admission. Academic Fresh Start must be requested as part of the application process. It cannot be requested after an applicant is admitted or enrolled.

Academic work done subsequent to ten years will be used in the evaluation of the applicant for admission. Applicants with subsequent coursework are required to submit the transfer application along with transcripts for all college level coursework as well as all additional required documents by the posted deadline. If a student does not have coursework subsequent to ten years, he or she will be considered for admission based on the guidelines for new entering freshmen, which will require, among other things, an acceptable SAT or ACT score that has been completed within the past five years.

Admitted Fresh Start applicants have “Academic Fresh Start” indicated on their official Texas A&M transcript, are required to satisfy TSI (https://successcenter.tamu.edu/Texas-Success-Initiative/) requirements, and will follow the academic requirements of the Undergraduate Catalog of record for the term of admission.

Forfeited coursework cannot be considered as prerequisites but placement examinations are allowed for courses which were not considered for admission because of the Fresh Start Policy. Once admitted on Academic Fresh Start, the applicant or student cannot subsequently request that the Fresh Start policy restrictions be removed.

If an applicant has used the Academic Fresh Start Policy at a previous school, the Academic Fresh Start will remain in effect at Texas A&M upon transfer.

Note: For financial aid purposes all previously taken coursework will be included when evaluating aid eligibility. In addition, the Department of Veterans Affairs (VA) does not recognize the Academic Fresh Start program. Students cannot be certified for courses they have successfully completed. Students using VA Educational benefits should coordinate with the Veterans Services Office.

Entry to a Major – College of Engineering

Freshmen in General Engineering (https://engineering.tamu.edu/admissions-and-aid/incoming-students/), Engineering at Galveston (https://engineering.tamu.edu/academics/engineering-at-galveston/), Engineering at McAllen (https://engineering.tamu.edu/admissions-and-aid/engineering-at-mcallen/), or Engineering Academy programs (https://engineering.tamu.edu/academies/) have a common first year engineering curriculum to allow time for students to learn about the various engineering degree granting majors. It is recognized that in most cases students are not made aware of all our engineering majors prior to joining Texas A&M. Students are introduced to the different engineering majors in the first year engineering courses, ENGR 102, ENGR 216/PHYS 216 and ENGR 217/PHYS 217. Students are encouraged to leverage additional resources, including the career center, faculty, and advisors to get even more information. Students must complete the following courses in at least two semesters before applying to an engineering major: two engineering courses, two math courses, and two science courses in the first year engineering curriculum. Exceptions
will be made as needed for students entering with credit for the required courses.

The entry-to-a-major (ETAM) process is designed for students to take ownership of their future by identifying at least three majors that are a good match for their career goals and academic performance. The entry-to-a-major process (https://engineering.tamu.edu/academics/undergraduate/entry-to-a-major/) is designed to place students in the highest rank major possible based upon academic performance, ETAM application content, and program capacities. Students are encouraged to be in a major as early as possible. Students in the General Engineering (https://engineering.tamu.edu/admissions-and-aid/incoming-students/), Engineering at Galveston (https://engineering.tamu.edu/academics/engineering-at-galveston/), Engineering at McAllen (https://engineering.tamu.edu/admissions-and-aid/engineering-at-mcallen/) and the Engineering Academy programs (https://engineering.tamu.edu/academics/academies/) must be in a major by the end of the fourth semester in engineering.

Transfer students are admitted directly to a degree granting major through the admissions process.

**Upper-Level Entry into Colleges of Architecture, Business and Veterinary Medicine and Biomedical Sciences—Biomedical Science**

**College of Architecture**

**Transfer Students**

Transfer students, who meet the University entrance requirements and who desire to enter a major field of study in the College of Architecture, will be admitted based on available space and current College of Architecture entrance criteria. Following admission, some departments place transfer students on a 2.5 GPA probation for a minimum of 12 credit hours to substantiate competency in required lower-level courses. Departments with lower-level classification will admit transfer students into the college with a lower-level classification. Students may apply for upper-level status after at least one semester at Texas A&M University.

**Change of Major**

Students currently enrolled in another major at Texas A&M University with fewer than 60 hours (fewer than 90 hours for University Studies - Global Arts, Planning, Design, and Construction students) who desire to change their major field of study into the College of Architecture must fill out a Change of Curriculum application found on the College of Architecture homepage. Deadlines for applications are as follows:

- March 1 for summer admittance (for Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning, Visualization, and University Studies - Global Arts, Planning, Design, and Construction students)
- June 1 for fall admittance (for Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning, Visualization, and University Studies - Global Arts, Planning, Design, and Construction students)
- October 1 for spring admittance (for Construction Science, Landscape Architecture, Urban and Regional Planning, Visualization, and University Studies - Global Arts, Planning, Design, and Construction students)

The college will admit the best-qualified applicants based on the number of spaces available in their program of choice. Enrollment in Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning, and Visualization is driven by available studio space. Additionally, there are eight sequential studios in those degree programs which make it difficult for students that transfer with more than 36 hours to graduate in a timely manner.

**Mays Business School**

Lower-level business (BUAD) students are encouraged to complete the freshman and sophomore sequence of courses as listed under Program Requirements.

The BBA Upper-Level (UL) entry requirements and application procedures are as follows:

1. **Admission:** To be admitted to an UL BBA major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 229</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECON 202</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 203</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 140</td>
<td>Mathematics for Business and Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Business Calculus</td>
<td>3</td>
</tr>
</tbody>
</table>

   b. Submitted application for UL admission no later than preregistration for the expected UL entry term. **NOTE:** For summer UL entry, all requirements must be completed BEFORE the first class day of the FIRST SUMMER SESSION.
   c. UL admission requirements include completion of the three remaining lower-level Core Business Knowledge (CBK) courses prior to or during the first UL semester. Business students must preregister for and complete the following three remaining lower-level CBK courses at Texas A&M during their first UL semester, unless satisfactorily completed prior to UL entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ISTM 210</td>
<td>Fundamentals of Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

   d. BUAD students may preregister for UL business courses in the semester for which they have applied for UL. However, students who fail to complete UL requirements shall not be permitted to remain registered in UL business classes.

2. **Transfer Students:** Transfer students admitted to Mays Business School enter as lower-level business (BUAD) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an UL BBA major. Transfer students may immediately apply for UL when admitted to Mays Business School if, and only if, they meet all UL requirements at that time.

3. **Change of Curriculum Students:** Texas A&M students who change curriculum into Mays Business School from another college or department at the University will enter as lower-level business (BUAD) students until they complete all requirements listed previously in
item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to an UL BBA major may do so.

4. Junior- and Senior-Level Business Courses: Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a BBA granting major in Mays Business School. All ineligible students who preregister for UL business classes are subject to cancellation of their registration in these courses.

College of Veterinary Medicine and Biomedical Sciences

Biomedical Sciences

1. A Biomedical Sciences (BIMS) major will be admitted into the upper-level courses according to the following criteria:
   a. Completion of a set of Common Body of Knowledge (CBK) courses with a grade of C or better in each course completed at Texas A&M. Any CBK course transferred from a community college must have a minimum grade of a B. Normally, for admission to BIMS upper-level courses, a student may have attempted a CBK course no more than twice.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>

   | Total Semester Credit Hours | 35 |

   b. Transfer students admitted under another major and wishing to change into BIMS must complete one semester of graded coursework at Texas A&M University with a cumulative overall TAMU GPA of 2.5, as well as meet change of major requirements for current students.
   c. Texas A&M University change of majors must have at least 55 semester credit hours with a minimum cumulative GPA of 3.0.

4. Students seeking readmission will be considered on a case-by-case basis, according to current catalog policy. No quotas will be placed on readmission; however, the decision to readmit will be dependent on resource availability and University policy.

5. Any BIMS student admitted to upper-level courses who then falls below the 2.5 GPA requirement will not be considered in good academic standing in their major and will be placed on college probation. Students who achieve less than an overall TAMU GPA of 1.0, in any semester, are not eligible for college probation or grade warning status. All Biomedical Sciences majors must follow established probation rules for the Biomedical Sciences Program.

6. The Dean, Director or Department Head will reserve the right to waive CBK or GPA requirements within the criteria established in Texas A&M University Student Rules.

7. No courses other than BIMS 481, BIMS 484, VIBS 310, VIBS 311, or research/directed studies courses can be taken S/U to be used in the degree plan.

8. BIMS probation is determined at the end of the Spring semester. Students not meeting acceptable GPA requirements (2.5 BIMS majors with 55 or more credit hours or 2.0 area of concentration (USVM) or BIMS majors with less than 55 credit hours) will be required to attend Texas A&M University that summer and repeat courses as needed to raise their GPA. Students who achieve less than an overall TAMU GPA of 1.0 in any semester (BIMS or USVM) are not eligible for college probation or grade warning status.

9. Students may only attempt CVM courses a total of three times.

Texas Success Initiative (TSI)

The Texas Success Initiative (TSI) was instituted to ensure that students enrolled in Texas public colleges and universities possess the necessary academic skills to perform effectively in college and to provide diagnostic information about reading, writing and mathematics skills of each student. All undergraduate students who did not meet one of the allowed exemptions must take the approved TSI Assessment.

Students who do not meet established cutoff scores or other approved exemptions for the TSI Assessment are required by Texas law to be enrolled in, and actively attend, an academic skills course and/or program each semester prior to completing all TSI requirements. Academic skills courses in each of the three TSI areas are offered by Texas A&M. Failure to meet the attendance requirements of the academic skills course will result in withdrawal from Texas A&M. The hours for these courses will not count toward any degree program but may count toward determining attendance status. See http://asc.tamu.edu/TSI-Assessment/TSI-Assessment-Q&As (http://successcenter.tamu.edu/Texas-Success-Initiative/TSI-FAQs/) for specific information.

Students required to take the TSI Assessment should provide their score reports to the Academic Success Center at Texas A&M University at the address below.

Academic Success Center
1133 TAMU
College Station, TX 77843-1133
More information can be obtained from testing centers at most Texas public colleges and universities or by contacting:

Texas Higher Education Coordinating Board
P. O. Box 12788
Austin, TX 78711-2788

Undergraduate Studies’ units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

College of Dentistry – Caruth School of Dental Hygiene

Basis For Acceptance

All applicants will be considered using the following criteria. In addition, the applicant must be able to perform the essential functions required in the curriculum. The quality of the applicant’s academic achievement is a prime consideration. A grade point average (GPA) is computed based on all courses taken in college.

Preference for admission is given to students with:

- A cumulative GPA and Science GPA indicating ability to succeed in the program.
- Attention given to detail when completing the application.
- A comprehensive biographical sketch that includes information that will help the Admissions Committee know the applicant better. Details about the dental hygiene procedures that have been observed, a description of the community service projects in which you have participated and information concerning your interests, abilities and attitudes that have motivated you to make the commitment required for a career in dental hygiene are examples of information that might be included.

The application deadline is January 5. The Office of Recruitment and Admissions encourages applicants to submit the online application forms by December 1. All materials related to the application must be received in the Office of Recruitment and Admissions by February 1.

- The following must be included with the application when it is submitted online:
  a. Application for Admission
  b. Secondary Application
  c. List of courses in progress and those planned prior to enrollment in the dental hygiene program
  d. Biographical sketch
- Other materials that should be sent to complete your application:
  a. Application Fee ($35.00)
  b. Photograph sized 2 x 2 (does not have to be a passport picture - can be regular photograph cut down)
  c. Transcripts from high school and all colleges attended (if you attended a foreign high school, you do not have to submit a copy)
  d. Scores from Texas Success Initiative (TSI). (Or if exempt, SAT/ACT or TAAS – usually scores are listed on high school transcript; you do not have to submit scores separately.)
  e. Observation Verification Form (minimum 16 hours required)
  f. Recommendations: these evaluation forms should be completed by 1) a college instructor, 2) a dental hygienist and 3) an individual who has known applicant for some time; for example, an employer or supervisor.
  - An application is valid for one academic year only.
  - Official transcripts are required and will be accepted only when sent directly from each school the applicant has attended.
  - It is the responsibility of the applicant to keep the application file current. Failure to supply grades, transcripts or recommendations may be perceived as an indication that the applicant is no longer interested in admission.

Interviews

Processing of applications begins the year prior to entrance into the professional program and continues until the class is filled. The applications are evaluated, and an invitation for an interview may be extended. The purpose of the interview is to determine the applicant’s knowledge of the dental hygiene profession. It also provides an opportunity for the applicant to see the facility, meet with the Admissions Committee and to ask questions about the Caruth School of Dental Hygiene program.

All prospective students are encouraged to contact the college with questions regarding prerequisite courses or the program.

To Access the Dental Hygiene Application Forms:

The applicant will need to create an account on the Banner Admissions Management Framework (BAMF) website. The applicant will be required to complete and submit the College of Dentistry Dental Hygiene Application, the Secondary Application and the Ethnicity Form.

The application for the Dental Hygiene Program will be available on the BAMF website from July 15 to January 5.

Download Forms (Adobe PDF files):

The Evaluation Form and Observation Verification Form are available for download. You will need to print these forms and submit them with signatures through regular mail.

- Evaluation Form – top section to be filled in by applicant
- Observation Verification Form

For questions about the application process, please contact The Office of Recruitment and Admissions at (214) 828-8231 or by email at admissions-dentistry@tamhs.edu.

Mail forms and transcripts to:

Office of Recruitment and Admissions
Texas A&M University College of Dentistry
3302 Gaston Avenue, Room 525
Dallas, TX 75246-2013
USA

Transfer Credit

Transfer credit will be determined by each component in conjunction with the staff of the college on a course-by-course basis from official transcripts submitted in the competitive admissions process. Course content will be determined by the catalog course description or course syllabus.

Course acceptability is guided by these criteria:
• Courses completed at regionally accredited institutions are considered for transfer if:
  a. They are acceptable as credit for a bachelor’s degree at a regionally accredited institution.
  b. Course content is at or above the level of courses specified in the requirements for admission.
• Courses intended for use in a vocational, technical or occupational program normally do not transfer; general courses within this type of program may transfer.
• Credit on the transcript must appear in semester hours or credits that may be converted to semester hours.
• Credit by examination courses may be transferred if accepted by another college and followed by sequenced coursework.
• Equivalency of coursework is determined by content found in catalog course descriptions or syllabi of courses. In case of doubt, departmental faculty will determine equivalency. The final determination is left to the Program Director.
• As a general policy, coursework with a passing grade may be transferred, but the applicant must keep in mind that admission to the hygiene program is on a competitive basis and grades of F are calculated into the grade point average.
• Course hours will be evaluated on a course-by-course basis but will be transferred as a block of hours, and the grades do not calculate into the GPA for the hygiene program.
• Online courses are accepted.
• Typically, credit will not be given for courses completed at institutions not accredited by a regional accrediting agency.
• The college does not accept non-credit coursework to be used in lieu of coursework taken for academic credit.

College of Dentistry
Dental Hygiene Program (BS)

| Application Fee | $35 non-refundable fee |
| Admissions Standards | Completion of required courses with GPA as high as possible. Admission is competitive. |
| Use of High School Record | No |
| Number of Articulation Agreements and Requirements for Admission | Not applicable |
| TOEFL** | Not applicable |
| Other Requirements | Three LOR required and TSI assessment. Interview; comprehensive biographical sketch; and 16 hours of verified observation of a dental hygienist |

College of Nursing

There are three different tracks leading to a baccalaureate degree in nursing. The traditional BSN track is for students seeking their first degree in college. The second degree BSN track (post baccalaureate) is for individuals who have already earned a bachelor’s degree in another field of study. The third option is an RN to BSN program for registered nurses who hold an associate degree in nursing. Prerequisite courses, which are the essential foundation for nursing, must be completed before entry into upper-division nursing courses through a competitive admission process. In addition, all students must meet the core curriculum requirements for Texas A&M University if not already completed at another institution.

The following documents are required for an application to be considered complete and eligible for review:

• Application
• Application fee
• Official college transcript(s)
• Personal statement (essay)
• Completion of prerequisite courses by the time of enrollment with a grade of C or better
• Admissions Assessment (HESI A2) entrance exam required for traditional and second degree BSN applicants only
• Reference required for RN to BSN applicants only
• RN to BSN applicants must provide proof of RN licensure in good standing
• Copy of permanent resident card, if applicable
• Official TOEFL Scores required for international applicants and must be taken within the past two years. Test scores must be sent directly from the testing agency to be considered official.

The most current information regarding application to nursing can be found on the College of Nursing (https://nursing.tamhsc.edu/) (CON) website. Applications must be received by the posted deadline. No late documents will be accepted. Admission to the college is competitive. At the time of application, students must be enrolled in or have completed all prerequisite course requirements which includes University Core Curriculum and nursing prerequisites. Admission offers may be made to students finalizing courses and will be contingent upon successful completion of all prerequisite requirements and students presenting a clear criminal background check and a negative drug screen.

If the student completed a core curriculum from another Texas public institution in a previous degree program, they are not required to complete the college's Core Curriculum. Students transferring from out of state, from a private institution, those with an international degree or anyone with concerns about this requirement, please contact an advisor at the College of Nursing for further clarification. Students will not be considered for admission unless the required coursework will be completed by the time of enrollment.

Additional Requirements for International Applicants and Applicants with Foreign Credentials

In addition to each program’s stated application requirements, applicants with foreign transcripts must also include a transcript evaluation from an evaluation service which is a member of the National Association of Credential Evaluation Services. A course-by-course listing that reflects U.S. grade point equivalencies and semester credits is required. These reports must be sent directly from the evaluation agency in the original sealed envelope to NursingCAS. Send to: NursingCAS, P.O. Box 9201, Watertown, MA 02471. If sent via UPS or FEDEX, send to NursingCAS Transcript Department, 311 Arsenal Street, Suite #15, Watertown, MA 02472. Students may wish to speak with an advisor to determine transfer credits based on results of the evaluation.

If admitted to the College of Nursing, applicants with foreign transcripts must submit the native language transcript along with an official English translation. These documents must include all original seals and/or
signatures and be approved by the Texas A&M Office of Admissions prior to enrollment in the program.

**English Proficiency and other Requirements for International Applicants**

Applicants whose native language is not English are required to submit proof of English proficiency to be eligible for review. English proficiency can be demonstrated through various criteria. See more on this requirement on the international admissions website (https://admissions.tamu.edu/international/transfer/). International applicants will be expected to present declaration of finances, F-1 travel documents and additional documentation upon acceptance to the College of Nursing. All deadlines required by the Office of International Student Services must be met.

| Use of High School Record | • Not used for admission purposes but required upon acceptance  |
| Number of Articulation Agreements | • Two: South Texas College and Angelina College  |
| TOEFL | See website for additional information  |

**Other Requirements**

Entrance exam for pre-licensure applicants; Reference for RN to BSN applicants; Personal Statement for all applicants through Nursing CAS application portal.

**Course Credit**

**Course Credit**

**Testing Services**

Testing Services serves as the center for credit by examination, placement testing and correspondence testing, as well as national standardized testing. Other services include posting of test scores and evaluation of tests for college credit.

**Credit by Examination**

Undergraduate students at Texas A&M may earn course credits by demonstrating superior achievement on tests offered through several examination programs. Credit by examination is available to freshmen who plan to enter the University and to students who are currently enrolled. Credit earned by examination does not contribute to a student’s grade point ratio. The University awards credit for scores on certain tests published by the Advanced Placement Program (AP), the College Level Examination Program Computer-Based Testing (CLEP CBT), the SAT Subject Tests, DANTES Subject Standardized Tests (DSST) and the International Baccalaureate (IB) Program. Texas A&M also offers qualified students opportunities to earn credits by taking departmental examinations prepared by the faculty. Information concerning credit by examination may be obtained from Testing Services (http://testing.tamu.edu), (979) 845-0532.

Please note these regulations concerning credit by examination:

1. Test scores and/or credit eligibility must be reported formally to Testing Services for credit by examination to be awarded. Credit is posted to the academic record once appropriate scores are received by Testing Services, the student has officially enrolled in the University and the student has accepted the credit. For information regarding current procedures for accepting credit, please visit the Testing Services (http://testing.tamu.edu) website.
2. Students may not receive credit by examination for courses that are prerequisites to courses for which they already have credit except with the approval of the department authorizing the examination.
3. A student may not have credit posted for credit by examination for a course in which he or she is currently registered. If a student has acquired a grade or exercised First-Year Grade Exclusion on a course, then the student will not be eligible to take the equivalent departmental exam. Eligibility will not be affected if a student has a Q, W or NG in a course.
4. Please note that once any credit has been accepted it cannot be removed.

**Advanced Placement Program (AP)**

Examinations offered by the AP Program are administered during late spring by high schools. Students usually take the examinations after completing Advanced Placement courses, although experience in an AP course is not required. Interested students should contact their high school counselors for information concerning registration and test sites. High school students and currently enrolled students should have the College Board forward their scores to Testing Services, institution code: 6003. Advanced Placement scores of entering freshmen are generally
Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via AP tests. Testing Services suggests visiting with your advisor before you accept credit.

1 Students must consult their academic advisor for advice on the number of credits that can be used in their degree program to avoid excessive credit accumulation and possible negative effects.
2 Variable credits up to a maximum of 3 credit hours. Students must consult their academic advisor for advice on the number of credits that can be used in their degree program to avoid excessive credit accumulation and possible negative effects.
* Engineering majors should accept credit for PHYS 206 and 207 only, (not 226 and 227) a 2 hour lab is required for their degree plan.

For instructions on accepting AP credit, please visit Testing Services (http://testing.tamu.edu).

**College Level Examination Program Computer-Based Testing (CLEP CBT)**

CLEP CBT tests are designed to evaluate nontraditional college-level education such as independent study, correspondence work, etc. Both enrolled undergraduate students and entering freshmen may receive CLEP CBT credit for the courses which are listed below. Only examination titles below are currently accepted. The minimum scores listed below are based on the current version of CLEP CBT Examinations. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via CLEP tests. Testing Services suggests visiting with your advisor before you accept credit.

**International Baccalaureate (IB)**

Texas A&M University, in compliance with SB111, will grant at least 24 semester credit hours of course-specific college credit in subject-appropriate areas on all International Baccalaureate (IB) exam scores of 4 or above as long as the incoming freshman has earned an IB diploma. While some course credit will be awarded regardless of a student’s IB diploma status, some course credit at Texas A&M University may be subject to the successful completion of the IB diploma.

Entering freshman students should submit their International Baccalaureate transcript to Texas A&M University, institution code: 01355, for review. Students should contact Testing Services regarding their eligibility for course credit. Students should work with an academic advisor to determine the use of the IB credits in their individual degree
plan and the impact accepting the credit may have upon tuition rebate eligibility, tuition charges for excessive total hours, and preparedness for sequential coursework based on IB test scores. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via IB tests. Testing Services suggests visiting with your advisor before you accept credit.

Texas A&M University will notify IB applicants of their eligibility to receive credit by posting information on the website, Testing Services, and by establishing links to other web pages.

The evaluation of IB courses in order to identify the appropriate course credit is continuing and will be posted as it becomes available. The following list includes all IB examinations currently accepted for credit.

For instructions on accepting IB credit, please visit Testing Services (http://testing.tamu.edu).

### SAT Subject Tests

Credits are offered to entering freshmen who score high on the SAT Subject Tests. High school students who are interested in taking these tests should contact their school counselors or write College Board ATP, Box 592, Princeton, NJ 08541.
The minimum score required is based on the re-centered scale. Students who took tests before April 1, 1995, should contact Testing Services to determine the minimum score required. For instructions on accepting SAT Subject credit, please visit Testing Services (http://testing.tamu.edu).

### Departmental Examinations for Entering Freshmen and Currently Enrolled Students

Qualified entering freshmen may take departmental tests after being officially admitted into Texas A&M University. Currently enrolled students can also take the exams throughout the year. Contact Testing Services (http://testing.tamu.edu) for registration information. The tests are prepared by participating Texas A&M departments. Current offerings include:

### Graduate Admission

#### Graduate Admission

For information related to graduate admission, please contact:

Office of Graduate Admissions
Texas A&M University
P. O. Box 40001
College Station, TX 77842-4001
(979) 845-1060
admissions@tamu.edu
http://admissions.tamu.edu/graduate

Please reference the Texas A&M University Graduate and Professional Catalog on this website.

### Registration and Academic Status

Registration for the fall and spring semesters is accomplished at several times. During the fall and spring semesters (in November and April), a preregistration period is held for currently enrolled and readmitted students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New Student Conferences serve as an opportunity for new undergraduate students to register. Further information concerning registration may be obtained from the academic calendar published in this catalog or from the Office of the Registrar. The schedule of classes is available online.

#### Full-Time Student

A full-time undergraduate student is defined as one who is registered for 12 semester hours during a fall or spring semester or 8 hours in a summer semester. Full-time enrollment for federal financial aid is always defined as 12 semester hours, including the summer term. A Q grade or W grade does not count toward the certification of enrollment status. Only hours for which a student is currently enrolled at Texas A&M University can be used toward certification of enrollment.*

* - Students participating in the Blinn TEAM program or the TAMU Engineering Academy at Blinn Bryan program may have unique enrollment certification specifications based on the program agreements. Enrollment status for students in these programs is reported to the National Student Clearinghouse by Texas A&M University and includes enrolled hours from both institutions. Students can obtain enrollment verification which will reflect this enrollment status.
status from the National Student Clearinghouse through Howdy. Students alternatively requesting enrollment verification directly from the Texas A&M University Registrar’s Office on TAMU letterhead are provided enrollment verification of Texas A&M University enrolled hours ONLY. Students may also consider obtaining a verification of their enrollment from Blinn College that will reflect their Blinn enrollment.

Undergraduates Registering for Graduate Courses
A senior undergraduate student with a cumulative grade point average of at least 3.0 or approval of his/her academic dean, is eligible to enroll in a graduate course and reserve it for graduate credit by filing a petition obtained from the student’s undergraduate college and approved by the course instructor, the student’s major department head, the dean of the college offering the course, and the dean of the student’s undergraduate college.

An academically superior undergraduate student with a cumulative grade point average of at least 3.25 or approval of his/her academic dean, is eligible to apply graduate credit hours toward his/her undergraduate degree program by filing a petition obtained from the student’s undergraduate college and approved by the course instructor, the student’s major department head, the dean of the college offering the course, and the dean of the student’s undergraduate college. Graduate credit hours used to meet the requirements for a baccalaureate degree may not be used to meet the requirements for a graduate degree.

VA Benefits
Students who are military veterans should note that to receive full VA benefits they must be registered for enough hours to be considered full-time for their degree during each term they are seeking benefits. This number may differ between degrees and during the summer semester. For hour requirements, please visit Veterans Services.

Maximum Schedule
An undergraduate student with an overall grade point average of 3.0 or better may register for a course load in excess of 19 hours in a fall or spring semester with the approval of his or her advisor. An undergraduate student with an overall grade point average of less than 3.0 must obtain approval of his or her dean before registering for a course load in excess of 19 hours in a fall or spring semester.

Classification
Each student has a classification which indicates the type of degree program in which the student is enrolled, and reflects the student’s progress within that program. The classifications are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Classification Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>U0</td>
<td>Undergraduate Non-degree</td>
</tr>
<tr>
<td></td>
<td>Students with a high school diploma (with the exception of high school concurrent enrollment participants) who do not intend to pursue a baccalaureate degree at Texas A&amp;M University. This includes:</td>
</tr>
<tr>
<td></td>
<td>a. Summer session only students.</td>
</tr>
</tbody>
</table>

b. Local residents or university employees taking courses on a part-time basis.

c. Others as may be deemed appropriate by the Office of Admissions and the college or program of admission.

Undergraduate non-degree students are not permitted to enroll in courses until all degree seeking students have had the opportunity to enroll. Undergraduate non-degree enrollment begins on the first day of open registration. Enrollment may be limited by college or program policies. Admitted students are not eligible for refund of the admission processing fee regardless of course availability.

An academically superior undergraduate student must maintain a 2.0 GPA on all coursework attempted to remain eligible to register. Enrollment is subject to review at the end of each semester of enrollment. Enrollment beyond two years of attendance will be approved only in exceptional cases.

Should an undergraduate non-degree student desire admission to a degree program, regular formal application is necessary, including: a complete application for admission, the required application processing fee, the submission of all required credentials, and the meeting of all admission requirements.

An undergraduate non-degree student may not take graduate-level coursework.

Undergraduate non-degree students are subject to TSI and English proficiency requirements.

An undergraduate non-degree student does not qualify for financial aid through the University.

With few exceptions, undergraduate non-degree status is not available to international students.

U1 Freshman 0-29 hours
U2 Sophomore 30-59 hours
U3 Junior 60-89 hours
U4 Senior 90+ hours
U5 Postbaccalaureate Undergraduate
Students with a recognized baccalaureate degree who wish to complete requirements for a second baccalaureate degree at Texas A&M University or to complete established Texas A&M University certification requirements.

The postbaccalaureate undergraduate classification (U5) has all the privileges and responsibilities of a senior classification (U4).

Recipients of a Texas A&M University baccalaureate degree are not eligible for continued enrollment unless they have the specific approval of the college offering the second bachelor's degree or certification. Should they break enrollment, they must apply for readmission as second bachelor's degree candidates.

A candidate for a second baccalaureate degree must complete all the essential work of the second degree not covered in the first. In all such cases, the total semester hours required must be at least 30 semester hours additional to the greater number required for either degree (see Two Degrees in the Degree Information section). To pursue a second baccalaureate degree concurrently with the pursuit of the initial degree, all essential work required for a second degree must be defined in advance in writing by the dean of the college granting the second degree. To pursue a second baccalaureate degree sequentially requires admission to a second bachelor's degree classification.

Pursuit of a second baccalaureate degree may be limited or may not be allowed by some colleges.

E0 Extension, Undergraduate

Up to 30 hours of extension work may apply toward an undergraduate degree.

### Academic Status

**Distinguished Student and Dean’s Honor Roll**

An undergraduate student who completes a semester schedule of at least 15 graded hours or a summer session schedule of at least 12 graded hours with no grade lower than C and with a grade point average of not less than 3.5 for the semester or for a summer session shall be designated “distinguished student.” A student who, under the same circumstances, achieves a grade point average of at least 3.75 shall also be designated as a member of the “dean’s honor roll.” First semester freshmen must complete a semester schedule of at least 15 hours with no grade lower than a C, no Q-drops and with a grade point average of not less than 3.5 for “distinguished student” designation and a 3.75 for “dean’s honor roll.” Official notification of these designations will be issued to the student by the dean of the student’s college. The hours earned with a grade of S shall not be included in determining minimum hours required for the designation of “distinguished student” or “dean’s honor roll.” A grade of I or U disqualifies a student from being considered as a “distinguished student” or for the “dean’s honor roll.” Grades of Q, W, and NG may not be included in the 15 graded hours. Only undergraduate courses or graduate courses used for the undergraduate degree will be used in either calculation.

**Scholastic Probation**

Scholastic probation is conditional permission for an undergraduate student to continue in the University after he or she has become scholastically deficient. For university policy regarding scholastic deficiency and scholastic probation, see the Texas A&M University Student Rules (http://student-rules.tamu.edu).

**Withdrawal from the University**

An official withdrawal from the university will result when a student drops all in progress and courses not yet started in a particular term. A student who withdraws from the university before the completion of a semester or summer term is required to comply with the official withdrawal procedure. This process is initiated by submitting a request through the Student Withdrawal channel on the My Record tab in the Howdy portal. Students may not withdraw after the Q-drop deadline. The student’s dean will retain the authority to support a student withdrawal after the deadline.

If a student is enrolled in one or more inter/intra-session (‘minimesters’) or summer terms and chooses to withdraw, all current and future in progress courses for the entire semester will be dropped. The student will be ineligible to register for courses for the remainder of that semester.

For university policy regarding withdrawal, see the Texas A&M University Student Rules (http://student-rules.tamu.edu).

**Correct Addresses**

It is necessary to have a correct residence address on file with the University. Students may change their address in Howdy. International students must have a correct physical and permanent address.

**Official University Communications**

Texas A&M may also use email for official communications. It is each student’s responsibility to claim his/her Texas A&M University email account (http://gateway.tamu.edu) and to check that account on a frequent and consistent basis.

**Grading System**

Because students attend a college or university to extend their education, grades are usually given as an indication of the proficiency of their endeavors. The student's semester grade in a course shall be based upon performance and/or participation in class, exercises and tests, laboratory work and final examination, as applicable to the course. The proportionate weight assigned to each of the factors shall be determined by the department administering the course.
The basis upon which the final grade will be determined shall be distributed in written form to the class during the first class meeting.

There are five passing grades at the undergraduate level, A, B, C, D and S, representing varying degrees of achievement; these letters carry grade points and significance as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Significance</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent, 4 grade points per semester hour</td>
</tr>
<tr>
<td>B</td>
<td>Good, 3 grade points per semester hour</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory, 2 grade points per semester hour</td>
</tr>
<tr>
<td>D</td>
<td>Passing, 1 grade point per semester hour</td>
</tr>
<tr>
<td>F</td>
<td>Failing, no grade points, hours included in GPA calculation</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete, no grade points, hours not included in GPA calculation</td>
</tr>
<tr>
<td>NG</td>
<td>No grade, grade removed from record, no grade points, hours not included in GPA calculation</td>
</tr>
<tr>
<td>Q</td>
<td>Course dropped with no penalty, no grade points, hours not included in GPA calculation</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory (C or above), no grade points, hours not included in GPA calculation</td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory (D or F), no grade points, hours included in GPA calculation</td>
</tr>
<tr>
<td>X</td>
<td>No grade submitted, no grade points, hours not included in GPA calculation</td>
</tr>
<tr>
<td>W</td>
<td>Withdrew, no grade points, hours not included in GPA calculation (effective Spring 1996)</td>
</tr>
<tr>
<td>F*</td>
<td>Aggie Honor Code violation, no grade points, hours included in GPA calculation</td>
</tr>
<tr>
<td>U*</td>
<td>Aggie Honor Code violation, no grade points, hours included in GPA calculation</td>
</tr>
</tbody>
</table>

There are two failing grades, U and F, indicating work of unsatisfactory quality.

**Repetition of a Course to Improve Grade**

Any undergraduate student who wishes to repeat a course must do so before he or she completes a more advanced course in the same subject. What constitutes a more advanced course will be determined by the head of the department offering the course.

Credit for a course failed may be obtained only by registering for and repeating the course. The original grade will remain on the student’s permanent record, and both grades will be used in computing the GPA. An F or U previously earned is not removed once the course is passed. Credit for each repeated course may only be used once toward degree requirements.

A student repeating a course completed at Texas A&M in which a grade of B or better has been earned will not receive grade points for the repeated course, unless the catalog states the course may be repeated for credit.

**I and X Grades**

A temporary grade of I (incomplete) at the end of a semester or summer term indicates that the student has completed the course with the exception of a major quiz, final examination or other work. The instructor shall give this grade only when the deficiency is due to an authorized absence or other cause beyond the control of the student. When an instructor reports an incomplete grade to the Office of the Registrar, he or she will fill out an “Incomplete Grade Report,” which is filed with the head of the department in which the course is taught. Copies are sent to the student and to the student’s academic dean. This report includes:

1. a statement of the instructor’s reason for awarding the incomplete grade and
2. a statement concerning the remaining work to be completed.

The remaining work must be completed before the last day of scheduled classes of the next fall or spring semester in which the student enrolls in the University unless the student’s academic dean, with the consent of the instructor (in the absence of the instructor, the department head), grants an extension of time for good reason. If the incomplete work is not completed within this time or if the student registers for the same course again, the I will be changed to an F by the Office of the Registrar.

The X notation is assigned to a course by the Office of the Registrar at the end of a semester or summer term only when a grade is not submitted by the instructor. The Office of the Registrar will notify the dean of the college in which the course is taught that an X notation has been made. The dean of the college offering the course will request, through the department head, that the instructor submit a Grade Change Request online in Howdy, removing the X notation and assigning a grade. The instructor will have 30 days from the beginning of the succeeding semester or summer term to report a change of grade to the Office of the Registrar. If a Grade Change Request is not received during this time period, the Office of the Registrar will automatically remove the X notation and assign a grade of F.

**Q-Drop and Add and Drop**

1. A student may enroll in a class during the first five class days of a fall or spring semester or during the first four class days of a summer term. A student requesting to add a course after these deadlines must have the approval of the student’s dean or designee and department.

2. A student may drop a course with no record during the first 12 class days of a fall or spring semester and during the first four class days of a summer term. Following this period, if approved by the dean of the college or his or her designee, a student may drop a course without penalty through the 60th class day of a fall or spring semester, the 15th class day of a summer term or the 35th class day of a 10-week summer semester. The symbol Q shall be given to indicate a drop without penalty.

Under section 51.907 of the Texas Education Code, “an institution of higher education may not permit a student to drop more than six courses, including any course a transfer student has dropped at another institution of higher education.” Any course that a student drops is counted toward the six-course limit if “(1)” the student was able to drop the course without receiving a grade or incurring
an academic penalty; (2) the student's transcript indicates or will indicate that the student was enrolled in the course; and (3) the student is not dropping the course in order to withdraw from the institution.” Some exemptions for good cause could allow a student to drop a course without having it counted toward this limit, but it is the responsibility of the student to establish that good cause. Undergraduate students at Texas A&M will normally be permitted four Q-drops during their undergraduate studies. However, in order to comply with this statute a student who has dropped courses at other Texas public institutions may not be permitted four Q-drops if the student's total number of dropped courses would exceed the State limit of six.

3. Any course taught on a shortened format or between regularly scheduled terms will have add/drop, Q-drop and withdrawal dates proportionally the same as if the course were offered in a regular term. These dates will be determined by the Office of the Registrar.

4. After the Q-drop period has elapsed, a course may be dropped and a grade of W recorded if the student's dean determines that unusual circumstances exist to warrant a late drop.

Satisfactory/Unsatisfactory

Undergraduate students may be permitted to take courses in their degree programs at Texas A&M on a satisfactory/unsatisfactory (S/U) basis consistent with the requirements of the student's college. The hours for which a student receives a grade of satisfactory shall not be included in the computation of the student's semester or cumulative GPA; a grade of unsatisfactory shall be included in the computation of the student's grade points per credit hour as an F. A grade of satisfactory (S) will be given only for grades of C and above; a grade of unsatisfactory (U) will be given for grades D and F. The hours earned on a satisfactory/unsatisfactory basis shall not be included in the designation of distinguished student or dean's honor roll.

Students on probationary standing may be required to take electives on an S/U basis as determined by published college policies.

Students must register for courses on an S/U basis during the official registration periods and shall not be permitted to change the basis on which their grades will be recorded on their official transcripts, except for unusual circumstances and with the approval of the student's academic dean.

Students registered for KINE 198 or KINE 199 who wish to change the grade type from a graded course to S/U or from S/U to a graded course, may do so in Howdy. All requests for KINE 198 and KINE 199 changes must be completed on or before the Q-drop deadline for the fall, spring or summer semester.

Grade Point Average (GPA)

Only the grade earned in coursework for which the student was registered in this institution shall be used in determining his or her grade point average. Students anticipating graduating with honors should refer to that section of this catalog for information concerning the computation of grade point averages for that purpose.

A student's grade point average for any period shall be computed by dividing the total number of semester hours for which he or she received grades into the total number of grade points earned in that period. Semester credit hours to which grades of F or U are assigned shall be included; those involving grades of W, Q, S, X, I, and NG shall be excluded.

Classification

Classification for academic purposes shall be based solely on scholastic progress as shown by the official records in the Office of the Registrar. Sophomore, junior and senior classification will be granted students who have passed 30, 60 and 90 semester hours, respectively.

Grade Reports

Mid-semester Report

Near the middle of the fall and spring semesters, a preliminary report, showing the current progress of undergraduate students who have completed less than 30 semester credit hours of coursework at Texas A&M, and of a selected group of other students that the academic deans/departments are monitoring, will be made available. Preliminary grades are not recorded on the student's permanent record. Grades are available in Howdy.

Final Grade Report

End of semester final grades are available in Howdy. No student grade may be posted in a manner that is personally identifiable unless the student has given written consent in advance.

Parent/Guardian Access to Grades

A parent or guardian may access midterm and final grades in Howdy after the student sets the parent access password. The Office of the Registrar cannot access the passwords created by students for parental access.

Semester Credit Hour

A lecture course which meets one hour per week for 15 weeks is worth 1 semester credit hour. Thus, a course worth 3 semester credit hours, meets three hours per week. Credit hours for laboratory courses are determined to be some fraction of the number of hours spent in class.

For further information, visit Texas A&M University Rule — Definition of a Credit Hour — 11.03.99.M1 (http://rules.tamu.edu/PDFs/11.03.99.M1.pdf), which complies with The Texas Higher Education Coordinating Board definition of minimum course lengths as part of the Texas Administrative Code, “Minimum Length of Courses and Limitation on the Amount of Credit that a Student May Earn in a Given Time Period”. For more information, please see the Texas Administrative Code online (http://texreg.sos.state.tx.us/public/readtac$ext.TacPage/?sl=T&app=9&p_dir=N&p_rloc=162966&p_tloc=&p_ploc=1&pg=19&pt=1&ch=4&rl=5).

Transcripts

Students applying for admission to Texas A&M are required to submit transcripts of previous academic work and in some cases, results of standardized tests. The submission of altered documents or the failure to furnish complete and accurate information on admission forms will be grounds for disciplinary action.

Individuals who have attended the University may obtain an official transcript of their completed work, provided they have no financial obligations to the University. A fee, which, according to state law must be paid in advance, will be charged for each copy. During grading and degree posting, official transcripts may be produced for enrolled students only if all courses for that semester or term are shown as in progress (IP) or have all final grades posted. Students and former students may submit a Transcript Request Order form in person, by mail, by fax or by completing the transcript request form in the Howdy portal. Transcript requests will not be accepted over the phone. A faxed request must be paid using a credit card from a United States bank. A transcript request ordered
through the Howdy portal must be paid either by electronic check (ECH) or by credit card from a United States bank. Requests made in person or by mail may only be paid with check, money order or a credit card.

Housing

Off-Campus Student Services
http://ocss.tamu.edu

AggieSearch provides students access to apartment and property listings, as well as roommate search options.

The Off Campus Survival Manual (OCSM) introduces students to the community and provides information regarding leases, transportation, security deposits, the BCS community, and more.

On-Campus Housing and White Creek Apartments
http://reslife.tamu.edu

Admission to the University is required prior to apply for campus housing.

Undergraduate students can apply for campus housing online. Applications should be completed as soon as possible following admission since the date of application for housing is important in the housing assignment process. An application fee is required at the time of application.

On-campus housing is assigned on a first-come, first-served basis. With the exception of the Corps of Cadets, students are not required to live on campus at Texas A&M.

University Apartments (The Gardens)
http://reslife.tamu.edu/apartments

Available for graduate students, married students, students with dependent children, international students, U.S. military veteran students, students who are at least 21 years old, or undergraduate students who have completed at least 30 credit hours.

Fully furnished one- and two-bedroom units are available. Rent for The Gardens can be monthly or by semester and includes furniture, parking, cable TV service and high-speed Internet. Students pay electricity. All leases are either 9 1/2- or 12-month leases.

Application forms, rental rates and additional information may be obtained online.

Orientation

New Student Conferences
http://newaggie.tamu.edu

- Held each year for undergraduate students entering Texas A&M University. New students are required to register for and attend a conference in order to accept their offer of admission and register for classes.
- During the two day conference, new students learn about valuable University services and meet with academic advisors for curriculum advisement and selection of first semester courses.

Additional services and programs from the Office of New Student and Family Programs (http://studentlife.tamu.edu/nsfp/):

- Howdy Week: Aggieland’s Week of Welcome (https://howdyweek.tamu.edu/) - held the week before Fall classes begin
- Aggie Family Member (http://familyprograms.tamu.edu/) - support and outreach including a family communication portal open to all Aggie families
- Family Weekend (http://familyweekend.tamu.edu/) - held each Spring to honor and celebrate family members as they support their A&M student
- Online Orientation (https://newaggie.tamu.edu/online/) - series of educational modules incoming students complete prior to their New Student Conference
- Supervision and advisement of Aggie Orientation Leader Program (https://newaggie.tamu.edu/studentleadership/ol/) and Aggie Family Ambassadors (https://familyprograms.tamu.edu/aggie-family-ambassadors/)
- Publications for incoming students and family members

Aggie Honor Code

Integrity is a fundamental core value of Texas A&M University. Academic integrity requires a commitment by all faculty, students, and administrators to:

- Remain constantly focused on the quality of the academic programs;
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University degrees;
- Demand high academic standards from all members of the Aggie community.

All Texas A&M University students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

*An Aggie does not lie, cheat, or steal or tolerate those who do.*

Upon accepting admission to Texas A&M University or one of its branch campuses, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Honor System.

The Honor System Office is charged with promotion of the honor code and administration of academic misconduct cases. The Honor Council, comprised of students and faculty from colleges and offices across the University, will investigate all such infractions of the honor code and recommend appropriate sanctions. The website, http://aggiehonor.tamu.edu, defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations — 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations — Ethics in Research, Scholarship and Creative Work —
Leadership (ExCEL) is a student organization designed to help new Texas A&M students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code: “An Aggie does not lie, cheat, or steal or tolerate those who do.”

Upon accepting admission to Texas A&M University, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Aggie Honor System Office (see http://aggiehonor.tamu.edu). Students may be required to state their commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Aggie Honor System Office.

### Extended Orientation

#### ExCEL Program

http://excel.tamu.edu

Texas A&M University’s Excellence uniting Culture, Education, and Leadership (ExCEL) is a student organization designed to help new students find academic, social, and personal balance at Texas A&M by fostering a community where they can culturally identify and connect to campus. Since 1984, ExCEL has assisted new Aggies in making a smooth transition to college by orienting them to the program through a conference, cultivating relationships between peers and mentors, providing a sense of belonging, offering academic and personal support, and serving as a resource for transitioning into Aggie life.

ExCEL launches with the ExCEL Conference the Friday before fall classes. During the conference, students become familiar with the year-long program as they are assigned upper-class peer mentors and a peer group. The conference consists of motivational speakers, dialogue within peer groups, developmental series focused on personal development, and meet and greet mentor activities. Following the conference, academic, social, and cultural and community activities begin through the close of the spring semester. Activities include programs relevant to the audience, mentor/mentee engagement activities, community service, and socials.

While ExCEL is student-run, you may also obtain information by contacting the Department of Multicultural Services at (979) 862-2000 or in Suite 2200 of the Memorial Student Center.

### Fish Camp

http://fishcamp.tamu.edu

Fish Camp is a student-run, extended orientation program intended to provide incoming freshman students the opportunity to establish friendships, meet student leaders, become familiar with Aggie traditions, and learn about Texas A&M campus life. Peer counselors, as well as faculty and staff, speak on topics such as study habits, personal goals, student involvement, and campus resources. Held during a three-week period preceding the fall semester, each four-day, three-night session is designed to aid students in the transition from high school to college and, particularly, to Texas A&M.

In addition to providing educational programs, group activities, and small group discussions, Fish Camp allows students to get to know each other through recreation, intramural sports, and evening theme mixers. Additionally, Fish Camp is not just a four-day experience before classes begin; activities and camp hangouts continue into the Fall semester. For more information on Fish Camp and how to register for a session, please visit our website.

### Howdy Camp

http://atc.tamu.edu

Occurring every January, Howdy Camp is a three-day, two-night extended orientation program hosted by Aggie Transition Camps for all students entering Texas A&M University in the spring semester.

Howdy Camp is the spring semester’s equivalent to T-Camp and Fish Camp, and offers a great way for incoming students to find community before classes begin. At Howdy Camp, new Aggies are introduced to the many traditions, indescribable spirit, and unique customs of Aggieland. Additionally, Howdy Camp doesn’t end when the bus leaves camp! Counselors continue to be available and serve as resources during the semester as students transition into Texas A&M.

For more information on Howdy Camp and how to register, please visit our website listed above.

### T-Camp

http://atc.tamu.edu

Held in August each year, T-Camp is a three-day, two-night extended orientation program for transfer and other non-traditional students entering Texas A&M in the summer and fall semesters. By the time new students leave camp, they will have gained knowledge of Texas A&M campus resources, learned about Aggie Traditions, and made many new friends.

Additionally, T-Camp doesn’t end when the bus leaves camp! Counselors will continue to be available and serve as resources as incoming students complete their transition into Texas A&M. Counselors will be at the T-Camp Backyard Bash during Howdy Week, will show new students around the MSC Open House, and will plan frequent camp hangouts. Counselors can also coordinate tours around campus so that new students are not lost on their first day! T-Camp is hosted by Aggie Transition Camps, a sponsored student organization at Texas A&M University.
For more information on T-Camp and how to register for a session, please visit the ATC website listed above.

**Venture Camp: Backpacking**

https://maroonlink.tamu.edu/organization/aggieventurecamp

Venture Camp: Backpacking is the newest extended orientation program to be offered out of the Departments of Student Activities and Recreational Sports. Venture Camp: Backpacking is a 9-day program led by trip leaders from Outdoor Adventures who will guide incoming Aggies through the beautiful Gila Wilderness in New Mexico. While exploring this beautiful terrain, students will learn about the same Aggie traditions and campus resources as the other extended orientation camps, but in a totally unique setting! Similarly to Venture Camp: Base Camp, participants on this Backpacking trip will participate in peer-led large and small group discussions about college and life at Texas A&M, and the most important asset will be a can-do attitude (beginners are welcome to attend).

**Venture Camp: Base Camp**

http://venturecamp.tamu.edu

Venture Camp: Base Camp, the inaugural program under the Venture Camp umbrella, is an outdoor, six-day, five-night extended orientation experience that occurs in July and takes place both on the Texas A&M main campus and also in the Texas Hill Country. A collaborative program hosted by the Departments of Student Activities and Recreational Sports, Venture Camp: Base Camp involves numerous outdoor adventures including hiking, rock climbing, camping, and paddling a river. Staff and students from Outdoor Adventures guide the trip activities during the day, and in the evening campers gather back at the campsite to participate in peer-led large and small group discussions about college and life at Texas A&M. No prior outdoor experience is required, but a willingness to be an active participant and a team player is very important! A much smaller program than the other summer extended orientation programs, Venture Camp: Base Camp offers a more intimate extended orientation experience while also providing information important to students transitioning into college life.

**Venture Camp: Veterans**

https://maroonlink.tamu.edu/organization/aggieventurecamp

Venture Camp: Veterans is an extended orientation program designed specifically for incoming student veterans which will take place over the course of the students’ first semester. A collaborative effort between the Departments of Student Activities, Recreational Sports, and the Veterans Resource & Support Center, Venture Camp: Veterans is designed to offer a combination of outdoor experiences as well as peer-led, on-campus activities designed to create greater sense of competence for incoming students learning to navigate the Texas A&M campus and community. Interested individuals can learn more by contacting the Veterans Resource & Support Center (http://aggieveterans.tamu.edu/).

**Office for Student Success**

The Office for Student Success (https://studentsuccess.tamu.edu/) is committed to the retention, success, and timely graduation of all students at Texas A&M University through first-year, first-generation, and undergraduate initiatives that address academic and financial obstacles. As an extension of the Office of the Provost, the Office for Student Success offers assistance if you need help but don’t know where to start. Our office provides:

- **Hullabaloo U**: This FREE first-semester experience course (zero credit hours) is designed to help freshmen transition to college and make Aggieland feel like home. Each 25-student section meets regularly for 50 minutes with their faculty/staff instructor and student peer mentor to discuss topics such as adjusting to college life, taking advantage of campus resources, and contributing to our diverse and inclusive environment as a member of the Aggie community. Some experiences may extend for a second semester. Read more: tx.ag/ OSSFYE (https://studentsuccess.tamu.edu/First-Year-Experience/Hullabaloo-U/)
- **The Help Desk**: Online and in-person, the Help Desk network of advisors works with students, faculty, and staff to overcome barriers between students and timely graduation. Read more: tx.ag/ OSSHelpDesk (https://studentsuccess.tamu.edu/Help-Desk/)
- **The First-Gen Center**: First-generation college students are invited to visit the First-Gen Center to utilize resources, receive support, and attend first-gen events throughout their undergraduate career. Read more: tx.ag/ OSSFirstGen (https://studentsuccess.tamu.edu/Gen1A-M-PITO-SSI-Simple-Subpage/)
- **The Navigate Student app**: Make every semester count with the Navigate Student app. Designed to get you from NSC to graduation, students can see their class schedule, explore campus resources, schedule advising appointments, keep up with deadlines, receive pre-registration hold alerts, and much more. Available in the App Store and Google Play. Read More: tx.ag/ OSSNavigate (https://studentsuccess.tamu.edu/Navigate/For-Students/)

The Office for Student Success is located in Hotard Hall – across the street from Northside Garage. Visit studentsuccess.tamu.edu (https://studentsuccess.tamu.edu) for more information about our office, mission, and initiatives and follow us on Facebook, Twitter, Instagram, and YouTube for student success news, stories, and events on campus.

Academic Advising

Academic advising is an interactive partnership between a student and an academic advisor. Through teaching and learning experiences, the student sets goals, acquires information and services to make decisions consistent with interests, goals, abilities and degree requirements.

Academic advising at Texas A&M University is an important component of student learning and degree completion, contributing to the academic success of all students through:

- Supporting student achievement of the University Learning Outcomes and commitment to lifelong learning
- Being responsible to and respectful of the individual student
- Encouraging commitment to lifelong learning by directing students toward opportunities to interpret, reflect upon, and apply their classroom experiences in ways relevant to their careers and their lives
- Interpreting and conveying Texas A&M University’s mission to students
- Supporting the educational policies, procedures and values of the department, college and university; likewise, academic advising relies on the support and resources of the university, college and department
- Involving other university programs, services and individuals, when appropriate in the advising process
- Being responsible for professional academic advising, training, development and practices to ensure knowledge and skills stay relevant.

Academic Success Center

The Academic Success Center (http://asc.tamu.edu) helps all Aggies achieve their academic goals and fulfill their academic potential. We provide exceptional quality academic support services and resources in a welcoming environment, including:

- Academic coaching (http://asc.tamu.edu/Academic-Coaching/), personalized to help you find your success
- Courses and workshops (http://asc.tamu.edu/Courses-Presentations/Courses-Workshops/) on study strategies, time management, motivation, and related topics
- Supplemental Instruction (http://asc.tamu.edu/Supplemental-Instruction/) (SI)
- TutorHubs (http://asc.tamu.edu/Tutoring-TutorHubs/) across campus, including the Commons, Evans Library, Zachry Education Complex, and some residence halls
- Texas Success Initiative (http://asc.tamu.edu/TX-Success-Initiative/) (TSI)
- Transfer Student Programs (http://asc.tamu.edu/Transfer-Students/) (TSP), linking you to peer mentors who support your transition to TAMU
- StudyHub (http://studyhub.tamu.edu) to help you find academic help on campus

Also check out the Academic Success Center study and learning handouts (http://asc.tamu.edu/getdoc/3383509c-4419-48ba-9a90-2d04de0f816c/Study-Learning-Handouts(1).aspx) and YouTube (https://www.youtube.com/channel/UCF55VU8Tb6Gqepw-SN4er/) channel and keep up with our events by following us on Instagram or Facebook. Undergraduate Studies’ units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

The Association of Former Students

www.AggieNetwork.com

- Aggie Ring
- Informational and Interactive Exhibits
- Alumni Services, Giving and Events
- Traveling Aggies

Career Center

The Texas A&M University Career Center provides comprehensive services and resources to undergraduate, graduate and former students to support you in exploring career opportunities, preparing for the job search, gaining relevant experience, seeking admission to graduate and professional school, and securing professional employment upon graduation. Our goal is to assist you every step of the way, from admission through graduation, and after, as a Former Student. We offer a variety of programs, services and resources:

- Career Exploration, Assessment, and Planning
- Introduction to Career Readiness Goals
- Job Search, Resume Writing, and Interview Preparation Tools
- Professional Networking Resources and Events
- Campus Recruiting for Aggies seeking Full-Time Positions, Internships, Externships, and Cooperative Education
- Assistance with Professional and Graduate School Applications and Interviews
- Presentations to Classes and Student Organizations, Workshops and Panel Discussions, Career Fairs, and Webinars
- Employer, Professional School and Graduate School Contacts
- Individual Appointments, Walk-in Advising, Open Office Hours, Mock Interviews

One of the largest programs of its kind in the nation, the Career Center has been recognized nationally and regionally for our many Best Practices. The Career Center can be found online at careercenter.tamu.edu (http://careercenter.tamu.edu/) and is located in the Koldus Building, Suite 209. You can also find us on Facebook, follow us on Twitter, Snapchat and Instagram, and view us on YouTube.

Counseling and Psychological Services

http://caps.tamu.edu

In support of the mission of Texas A&M and the Division of Student Affairs, Counseling & Psychological Services contributes to student
learning and development. We provide exceptional services and programming focused on student mental health. Counseling & Psychological Services exists to advance student development and academic success by providing short-term goal-oriented personalized and evidenced-based mental health care to Aggies. We, at Counseling & Psychological Services, are committed to respecting and celebrating the diverse students at Texas A&M University. We commit to enriching student development and growth through compassion, empowerment, advocacy and empathy. Below is a brief list of our services - Please go to our website for further information.

- **Confidential Services**
- **Prevention and Education**
  - Suicide Prevention Training
  - Educational outreach/programming
  - Sanvello – Wellness App paid for by Counseling & Psychological Services and accessible to all Texas A&M students
- **Short-term Counseling**
  - Assessment is the first step
  - Workshops and Group counseling
  - Individual and Couples counseling
  - AOD Assessment
  - ADHD/Learning Disability Screening
  - Psychiatric services in conjunction with counseling
  - Assistance with Community Referrals
- **Crisis Intervention**
  - Crisis intervention available anytime during business hours 8:00 a.m. - 5:00 p.m., Monday through Friday
  - HelpLine is open after-hours, 4:00 p.m. - 8:00 a.m., during the week, and 24 hours on the weekends. It is a confidential telephone hotline staffed by Aggies to provide: information, support, crisis intervention, and referrals

### Disability Resources

http://disability.tamu.edu

- Makes student disability and accommodation determination decisions.
- Collaborates with faculty, staff and students to achieve access for students with disabilities.
- Facilitates accommodations including (but not limited to): exam accommodations, sign language interpreting and transcription, and classroom accommodations.
- Consults with all campus entities on providing access for students with disabilities.

### Gay, Lesbian, Bisexual, and Transgender (GLBT) Resource Center

http://glbt.tamu.edu

- Programs include:
  - **Spirit Day:** Spirit Day is a means of speaking out against LGBTQ bullying and standing with LGBTQ youth, who disproportionately face bullying and harassment because of their identities. The Center provides Spirit Day shirts and encourages the Aggie Community to stand up for LGBTQ youth.
  - **Transgender Day of Remembrance:** On this day, the GLBT Resource Center encourages Aggies to honor the memory of those whose lives were lost in acts of anti-transgender violence.
  - **Mentorship Program:** The purpose of the GLBT Resource Center’s Mentorship Program is to offer support and guidance to lesbian, gay, bisexual, transgender, queer or questioning students at Texas A&M. Students are matched with a mentor based on academic and professional interests as well as personal interests and will meet with their mentor approximately once a month.
  - **The Coming Out Monologues:** The Coming Out Monologues is an annual story-telling performance made up of current and former students, faculty, staff, and community members who identify as LGBTQ+ or allies of the community.
  - **LGBT Awareness Week:** Designed to allow students to share their stories, experiences, and to foster a respectful and understanding community, GLBT Awareness Week helps Aggies better understand the diversity of their community and the global society of which they are a part.
  - **Lavender Graduation Celebration:** The Lavender Graduation Celebration serves as a cultural celebration that recognizes and affirms LGBTQ+ students and their allies while acknowledging their achievements and contributions to the university.
  - Presentation topics include, but are not limited to:
    - LGBTQ+ 101
    - Transgender 101
    - Organizational Inclusion
    - Resources to Create Affirming Healthcare Services for LGBTQ+ Patients
    - Custom Requests
    - Resource Library (Books, Periodicals, Brochures, and Films)
  - Advocacy
  - Visibility

### George H.W. Bush Presidential Library and Museum

https://www.bush41.org

The George H.W. Bush Presidential Library and Museum at Texas A&M University is dedicated to preserving and making available the records and artifacts of George H.W. Bush, 41st President of the United States. We promote civic literacy and increased historical understanding of our national experience, and foster a community of public service and volunteerism. We accomplish this mission by offering:

- Rich Educational and Public Programs
- Original Museum Exhibits
- Access to our Archival Holdings
- Research Opportunities
- Special Events
- Unique Volunteer and Internship Positions
- Foundation Memberships

The George H.W. Bush Presidential Library and Museum can be found online at https://www.bush41.org and is located at 1000 George Bush Drive West, College Station, Texas 77845. For additional information on the resources the George Bush Presidential Library and Museum have to offer please call 979-691-4000 for all
Health Promotion
http://studentlife.tamu.edu/hp

- Provides educational health information and consultation
  • Alcohol and Other Drugs, Nutrition, Interpersonal Violence Prevention, Reproductive Health, Sexual Health, Stress Management, etc.
- Presentations available upon request
- Offers GreenDot Bystander Intervention Training
- Offers Stand UP Training on trauma informed care
- Offers the Stand UP Workshop
- Peer health educator training and outreach
- Resource tables and interactive programming available for student events

To request a presentation on any of these topics, visit our website at https://studentlife.tamu.edu/ (https://studentlife.tamu.edu/clear/) or email Health Promotion and healthpromotion@tamu.edu

For presentations on Green Dot Bystander Intervention Program visit http://greendot.tamu.edu (http://greendot.tamu.edu/)

For presentations on Stand UP visit https://studentlife.tamu.edu/standup/

For more information on Texas A&M's Step In Stand UP Campaign visit http://stepinstandup.tamu.edu (http://stepinstandup.tamu.edu/)

International Student Services
http://iss.tamu.edu

International Student Services provides the following support services to international students (defined as students who are not U.S. citizens or lawful permanent residents):

- Pre-arrival information
- Certificate of Eligibility (Forms I-20 and DS-2019)
- On-line Orientation and International Student Conference
- Represent the University with the Department of Homeland Security, Department of State and the Student Exchange Visitor Information System (SEVIS)
- Assist students with federal immigration regulation compliance
- Advising
- Liaison for students, university and community
- International student employment information
- Administration of some international student scholarships and loans
- Coordinate with the Texas A&M University System Student Health Insurance Plan provider and students
- Community involvement activities
- Acts as a liaison between the University, sponsors and sponsored students

Math Learning Center
The Math Learning Center (http://mlc.tamu.edu (http://mlc.tamu.edu/)) fosters the academic success of all Aggies by supporting the high-enrollment courses with significant mathematics, statistics, and quantitative reasoning content. Our high quality services include:

- Tutoring Help Sessions in multiple locations on campus.
- Active-learning Hands On, Grades Up sessions.
- Reboot Workshops on a variety of topics taught throughout the semester.
- Weekly reviews (Week-In-Review sessions) for the large enrollment courses.

Undergraduate Studies' units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

Memorial Student Center (MSC)
http://msc.tamu.edu/

- The Memorial Student Center provides the local and campus community with academic, entertainment, arts, political and cultural awareness programs through experiential learning opportunities. The MSC’s student-driven committees, supported by full-time staff, foster leadership development and excellence through campus programming designed to enhance and enrich the Aggie experience. Volunteer in nature, our programming and service opportunities provide next level professional, personal and practical experiences in budgeting, communication, fund development, team development, program planning and logistics, meeting facilitation, public speaking, and technical skills such as running sound for a concert or installing an art exhibit.
- Our programs represent a wide variety of interests including the MSC OPAS performing arts series, student-curated art exhibitions in the MSC Reynolds Gallery, weekly concerts, service events and free film screenings. Dedicated to preparing our students to engage in a global society, our programs attract world-renowned speakers to discuss current events, national affairs, and other relevant topics of today.
- Each semester, the MSC hosts several Signature Events focused on creating a transformational learning experience for all in attendance to the annual Reverend Dr. Martin Luther King, Jr. Breakfast and MSC Open House, MSC Student Conference On National Affairs, MSC Student Conference On Latinx Affairs, MSC Spencer Leadership Conference and Kyle Field Day.
- The MSC Box Office provides students and organizations with convenient and affordable ticketing, cash handling and sales services. The MSC Box Office makes selling easier by eliminating the worry and risk of cash handling by providing online sales and extensive reporting capabilities, taking the hassle out of accounting, tracking sales and cash flow.

Department of Multicultural Services
http://dms.tamu.edu/

The Department of Multicultural Services (DMS) contributes to steady progress toward institutional diversity goals of greater inclusion and academic excellence by positively impacting the campus climate. The department has a mission to provide multiple educational and developmental services for underrepresented and historically marginalized racial and ethnic populations and diversity education programs that foster inclusive learning environments for all students. DMS supports, advocates for and challenges students as they transition and persist at Texas A&M, as well as provides opportunities for students to examine and communicate ways to contribute to an inclusive
and respectful campus community, develop cultural knowledge and competence and build cross-cultural communication skills.

DMS is home to a number of student organizations and programs that provide academic, social, cultural, and personal development, as well as intentional interaction and engagement. DMS assists students with their transition to and persistence through Texas A&M University and educates students about individual differences, cultural competence, and how to contribute to a respectful campus. The department strives to maintain a welcoming and inclusive environment for all students.

Ombuds Services

The Office of the Associate Provost for Undergraduate Studies provides Undergraduate Ombuds services to assist students, faculty, staff, and administrators with resolving academic conflicts on an informal and confidential basis. The Ombuds is equally open and accessible to all parties—students, faculty, staff, and administrators—in disputes that may arise when there are differing expectations or conflicting policies regarding academic issues. For more information, see http://us.tamu.edu/Students/Undergraduate-Ombuds. (http://us.tamu.edu/Students/Undergraduate-Ombuds/)

What does the Ombuds do?

- Assists members of the university community in solving problems and conflicts
- Investigates claims of unfair treatment or erroneous procedure
- Serves as a neutral listener, resource, advisor, intermediary, and mediator
- Considers all sides of a question impartially and objectively
- Explains established policies and procedures of Texas A&M University
- Develops options for addressing students’ concerns and helps craft a solution
- Facilitates communication between students and others involved in an issue

When would an undergraduate student need an Ombuds?

- There is an issue or a concern that cannot be resolved by the parties involved, or that one or all parties would prefer not to address through formal channels.
- There is a matter that is preferred for handling as “off the record,” or a need for an informal consultation.
- There is a problem and one or more parties are unsure of whom to speak with or what options are available to address it.
- One or more parties feel that a university policy, procedure, or regulation has been applied unfairly, or is itself unfair or ambiguous.
- There is a problem that requires an outside party to negotiate a solution or facilitate your communication with others.

What kinds of concerns could be brought to the Ombuds?

The Ombuds can assist with any concern, but some of the issues brought to the office typically involve the following:

- Academics (grading disputes, testing, procedures, instructor/student misunderstandings)
- Conflicts between undergraduate advisors and their students
- Disagreements/misunderstandings with university policy
- Questions about discrimination
- Cultural conflicts
- Reporting unethical behavior

Undergraduate Studies’ units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

Professional School Advising

http://opsa.tamu.edu

- Preprofessional advising for Medical, Veterinary, Dental, Physical Therapy, Physician Assistant, Occupational Therapy and Nursing careers.
- PreLaw Advising Services
- Preprofessional Student Organizations

Recreational Sports

http://recsports.tamu.edu

- All currently enrolled Texas A&M students (with some exceptions) are automatically Rec members. All you need is your student ID to utilize the Student Recreation Center and other Rec Sports facilities. Guest passes for visitors are available for purchase. Persons with disabilities are invited to contact Member Services to inquire about accommodations.
- Drop-in recreation at the Student Recreation Center encompasses the use of recreational facilities such as a walking/jogging track, handball/racquetball courts, and indoor courts for soccer, basketball, volleyball, and badminton. The Rec Center also features a bouldering wall, an indoor rock climbing facility, outdoor basketball and sand volleyball courts, extensive strength and conditioning areas, dance/activity rooms, and a world-class natatorium featuring indoor and outdoor pools and a diving well. Facilities may be used on a drop-in basis except when reserved for classes or university functions.
- An additional recreational facility, ‘The Polo Road Rec Center’, located on Polo Road near University Drive, is slated to open in Spring 2021 and will offer about 28,000 square feet with strength and conditioning space, a fitness/multipurpose room, lockers, and changing areas.
- Rec Sports also offers aquatics classes, group exercise and specialty classes, boot camps, personal and small group training, intramural sports, the Texas A&M Sport Clubs program, Outdoor Adventures, and the Walk of Champions brick campaign.

Department of Residence Life

http://reslife.tamu.edu/

- Responsible for the operation of on-campus residence halls and University Apartments (White Creek and Gardens Apartments). Summer occupancy of on-campus residence halls is open to undergraduate and graduate students.
- University Apartment units (http://reslife.tamu.edu/apartments (http://reslife.tamu.edu/apartments)) are available for graduate students, single-parent families, veterans, international students, married students or single undergraduate students without children who are sophomores, juniors, seniors or non-traditional freshmen (The Gardens).

Student Activities

http://studentactivities.tamu.edu/ (http://aggieserve.tamu.edu/)
The Department of Student Activities fosters and supports leadership, learning, and involvement opportunities that enhance the growth and development of students and recognized student organizations. At Texas A&M, we care about helping Aggies develop in ways, both in and out of the classroom, that will prepare them for life beyond Aggieland. To do so, Student Activities offers opportunities to lead, serve, participate in campus traditions, represent student voice, and make an impact at Texas A&M. We also provide a way for Aggies to connect and volunteer with local community agencies through our AggieServe database (http://aggieserve.tamu.edu/). The perks of getting involved on campus range from reaching your leadership potential to networking with administrators and potential employers to forming lasting friendships.

**Student Assistance Services**

http://sas.tamu.edu

- Referrals/Resource Connections such as:
  - Personal
  - Academic
  - Community
  - Liaison with foster care alumni
  - Student absence notification
  - Assistance in coordinating family needs in the event of an emergency
  - Transition issues
- General consultation:
  - University rules
  - Process
  - Faculty concerns

**Student Conduct Office**

http://studentlife.tamu.edu/sco

- Receive and process reports of alleged student rule violations
- Presentations available upon request

**Student Health Services**

(Accredited by Accreditation Association for Ambulatory Health Care)

http://shs.tamu.edu

Patient Services/General Questions: (979) 458-8310

Clinics:

- Medical Clinics
- Women’s Clinic
- Specialty Clinics

Ancillary:

- Dietitian
- Medical Laboratory
- Pharmacy
- Physical Therapy
- Preventive Medicine
- Radiology Services

Additional Services:

- Ambulance Service/EMS
- Dial-A-Nurse
- Health Insurance (https://tamu.myahpcare.com) Information
- Integrated Behavioral Health
- Appointments – Monday - Friday, 8 a.m. - 5 p.m.

**Student Legal Services**

http://studentlife.tamu.edu/sls

- Notary Public
- Legal advice and counseling for Texas A&M students

**Student Life**

http://studentlife.tamu.edu/

- The Offices of the Dean of Student Life strive to enhance your opportunities as a student to participate fully in the University experience. We do this by providing students with information, services, programs and involvement opportunities that facilitate responsible life choices and promote awareness of themselves and their community. Each of the program areas within the Offices of the Dean of Student Life has a specific mission, but one common goal: to provide education, outreach, and support to you.

- Specific services and programs offered include:
  - Health Promotion (Alcohol and other Drugs, Interpersonal Violence Prevention, and Wellness)
  - LGBTQ+Pride Center
  - New Student and Family Programs
  - Student Assistance Services
  - Student Conduct Office
  - Student Legal Services
  - Student Media (The Battalion and Aggieland yearbook)
  - Women’s Resource Center

**Student Media**

http://studentlife.tamu.edu/studentmedia (http://studentlife.tamu.edu/studentmedia/)

- Student Media produces national, award-winning publications; The Battalion newspaper, the Aggieland yearbook and the Maroon Life magazine. All three are written, edited and produced by students and offer excellent opportunities to gain valuable experience for journalistic and related careers.

- The Battalion, Texas A&M’s student newspaper since 1893, is typically printed weekly on Thursdays during the fall and spring and every other week during the summer sessions. Around finals and holidays, the delivery days may be changed. It is distributed to students, faculty and staff on campus and at many apartments and other high traffic areas in College Station. The Battalion is also available online and on mobile devices at thebatt.com. (http://www.thebatt.com/)

- The Aggieland, which dates back to 1895, is distributed in the fall but is a year-round project documenting school activities. It is one of the nation’s largest college yearbooks.

- Maroon Life is published five times during the school year with New Students’ Guide to Aggieland (distributed at New Student Conferences), Fall Sports Preview, Best of Aggieland (winter
distribution), Spring Sports Preview and Housing Guide (Family Weekend) editions.

Technology Resources
http://IT.tamu.edu
- Internet Access
- TAMULink Wireless Internet (http://tamulink.tamu.edu (http://tamulink.tamu.edu/))
- Texas A&M Gmail (http://google.tamu.edu)
- 24-Hour Technical Support (Help Desk Central (http://hdc.tamu.edu))
- Campus Computer Labs Ø (http://oal.tamu.edu/) pen Access Labs (http://oal.tamu.edu))
- Learning Management System - eCampus (http://ecampus.tamu.edu (http://ecampus.tamu.edu/))
- Discounted Software (http://software.tamu.edu (http://software.tamu.edu/))

Transportation Services
Transit - The university operates an on- and off-campus transit system that can be used by anyone on campus, fare-free. The off-campus transit system serves most of the major apartment complexes and housing areas in College Station, as well as the Blinn College Campus and RELLIS Campus.

All transit services are included in student registration fees and do not require a bus pass, however, passengers are required to present their Texas A&M, Blinn, or Brazos Transit District (BTD) ID when boarding at any off-campus stops. Members of the general public possessing a Brazos Transit District ID may ride both on- and off-campus bus routes. In addition, students may ride The District (http://bd.org/) buses fare-free by showing their IDs upon entering the bus. For BTD bus route information, visit http://bd.org (http://bd.org/).

For updates about transit routes, subscribe to the RSS feed at http://transport.tamu.edu/parking/faqpermit.aspx or follow @aggiespiritbus (http://twitter.com/aggiespiritbus/) on Twitter. For transit information, including maps and leave times, visit https://m.tamu.edu.

Parking - Those who choose to bring a vehicle to campus are required to purchase a permit or pay-by-the-hour to park. Download the Parkmobile app, available on the AppStore, Google Play, or Windows Store, or those without a smartphone may use the mobile web app at https://parkmobile.io in designated visitor areas (see also Optional Campus Services (http://catalog.tamu.edu/graduate/tuition-fees-financial-information/optional-campus-services/)).

Parking is at a premium on Texas A&M’s campus; MOST customers are not assigned their first choice for parking. Often the available parking may not be immediately adjacent to your building or facility. Students may register for a permit at https://transport.tamu.edu/parking/faqpermit.aspx (http://transport.tamu.edu/parking/faqpermit.aspx) or sign up for the wait lists at http://transport.tamu.edu/account (http://transport.tamu.edu/account/). To get the best parking available, register online by the July 8 priority deadline.

For updates about parking, traffic, and construction, subscribe to the RSS feeds at https://transport.tamu.edu/about/rss.aspx (http://transport.tamu.edu/about/rss.aspx) or follow @aggieparking (http://twitter.com/aggieparking/) on Twitter or @TAMUTransportation on Facebook and Instagram.

For more information about parking permits or to view the Parking Rules and Regulations, visit http://transport.tamu.edu/parkingreg (http://transport.tamu.edu/parkingreg/).

Bicycles - Bicycles are a great way to get to, from, and around campus. Bike services include the bike share program, bike lease program, borrow-a-bike, bike registration, summer bike storage, and maintenance stations.

For more information visit http://transport.tamu.edu/bicycles (http://transport.tamu.edu/bicycles/).

Alternatives - Don’t have a car? There are plenty of alternatives, including carshare, rideshare, and break/weekend shuttles to major Texas cities. For more Alternative Transportation options, visit http://transport.tamu.edu/alternative (http://transport.tamu.edu/alternative)/.

University Center and Special Events (UCEN)
http://ucenter.tamu.edu/

- University Center and Special Events features a variety of special event and meeting spaces, as well as theatrical production spaces. Our venues are ideal for student, academic, administrative, corporate, social, non-profit and arts-related events. Our spaces include: the Memorial Student Center, Rudder Theatre Complex, J. Earl Rudder Tower, Koldus Building, All Faiths Chapel, designated outdoor spaces and the University Center Guest Suites. We also provide services in any approved facility of your choosing.

- When it comes to planning events on campus, visit the University Center and Special Events office on the 2nd floor of Rudder Tower. Our staff can assist you with reservations in any of the UCEN facilities as well as help in all aspects of planning meetings, socials or conferences. The highly skilled staff arranges event set ups; provides and operates audio/visual equipment, electricity, lighting and event staging; and assists with many of the other support details that are essential to a successful event.

University Libraries
http://library.tamu.edu
- Sterling C. Evans Library (http://evans.library.tamu.edu/)
- Business Library and Collaboration Commons (BLCC) (http://wcl.library.tamu.edu)
- Medical Sciences Library (MSL) (http://msl.library.tamu.edu)
- Policy Sciences and Economics Library (PSEL) (http://psel.library.tamu.edu)

University Police
http://upd.tamu.edu
- Law Enforcement and Criminal Investigations
- Crime Prevention Programs

University Writing Center
The University Writing Center (p. 91) (http://writingcenter.tamu.edu) supports Aggies working on writing and public speaking. Our consultants
give advice and feedback on any writing or public speaking project. We offer the following resources:

- Online writing and speaking guides (http://writingcenter.tamu.edu/Students/Writing-Speaking-Guides/) – resources include print, audio, and video help for writers and public speakers. Also check for writing and speaking advice on our YouTube channel (https://www.youtube.com/user/tamuwritingcenter/).

- In-person and online consultations on writing and public speaking – Make an appointment (http://writingcenter.tamu.edu/Students/Make-an-Appointment/) for feedback on writing (anything—including papers, lab reports, memos, short stories, articles), speeches (for example, a script, presentation slides, or a video of you delivering a speech), posters, videos, and multi-modal communication. Come in person, send in work online, or meet in a web conference. You can also schedule appointments for group writing projects.

- Workshops and studios (http://writingcenter.tamu.edu/About-Us/Request-a-Presentation/) on writing and public speaking – Available for classes or organizations, workshops present information and engage participants in practice; studios combine instruction with an extended opportunity to write and seek advice from a consultant.

Undergraduate Studies’ units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

**Veteran Resource and Support Center (VRSC)**
http://aggieveterans.tamu.edu

- Aggie Veteran Network – Connects military-affiliated students (veterans, active duty, reserve/National Guard and dependents) with hundreds of resources and contacts. http://aggieveterannetwork.tamu.edu/

- Academic and Student Life Support – Connects students with academic assistance and student life resources to meet individual requirements.

- Military Admissions Liaison – Located in the VRSC to assist student veterans with the admission process, military withdrawals and readmission paperwork.

- Vetsuccess on Campus (VSOC) – Connect with our campus VA Counselor for VA related inquiries, vocational rehabilitation support and programs. http://aggieveterans.tamu.edu/vetsuccess-on-campus/

- Peer Advising for Veteran Education (PAVE) – Connects new student veterans with current student veterans to facilitate the transition to Texas A&M University.

- Student Veteran Association – The organization for student veterans. Opportunity to meet other vets and be part of the Aggie veteran community.

- Assists eligible students in securing federal and state veterans’ education benefits and other educational funding including scholarships and financial aid.

**Women’s Resource Center**
http://studentlife.tamu.edu/wrc (http://studentlife.tamu.edu/wrc/)

- Programs include:
  - Elect Her: Aggie Women Win: A one day conference which encourages and trains women to run for student government and future political office.
  - First Thursday: Held on the first Thursday of the month during the fall and spring semesters, First Thursday connects students with professionals through informational panels which cover a variety of topics relevant to students.
  - International Women’s Day Conference: The aim of this evening conference is to bring awareness to the struggle women face internationally as well as to celebrate and empower women from all cultural backgrounds. The Conference is held during Women’s History Month in March.
  - Salary Negotiation Workshops: These workshops teach college students preparing to enter the job market about the gender pay gap, including its personal consequences; how to quantify the market value of their education, skills, and experience; how to conduct objective market research and determine a fair target salary; and how to create a strategic pitch and respond to salary offers.
  - Women’s History Month Calendar: A printed calendar highlighting campus events related to Women’s History Month in March.
  - Women’s Progress Award: Awards for students, staff, faculty, and administrators who encourage and promote sensitivity to and awareness of issues that relate to women. Presented during the Accountability, Climate and Equity Awards during the spring semester.

- Online Resources for Pregnant and Parenting Students
  - **Student Rights and Campus Resources:** A list of frequently asked questions regarding the rights of pregnant and parenting students and some of the on-campus resources available to students.
  - **Breastfeeding Welcomed Here:** A list of private, accessible spaces for nursing mothers to express their milk on campus. Locations can be found on the WRC website or the Aggie Map.
  - **The Little Aggie:** A resource guide for Aggie parents with information about local activities for children, information about local medical providers, and suggested questions for childcare providers.
  - **Off-Campus Resources:** A list of local, state, and national resources available to pregnant and parenting students covering a variety of issues from maternal health, to breastfeeding, to childcare.

- Presentation topics include, but are not limited to:
  - Women’s Leadership
  - Gender Equity
  - Body Image
  - Salary Negotiation

- Internships:
  - Elect Her Student Liaison
  - Pregnant and Parenting Initiatives Coordinator
• Internships designed to benefit the student and the Women’s Resource Center
• Onsite lactation suite for mothers to express their milk
• Student organization advisor: The American Association of University Women at Texas A&M University (AAUW-TAMU)
• Offers resources and referrals to survivors of sexual violence, dating and domestic violence, and stalking
• Offers resources and referrals to pregnant and parenting students

The Corps Experience

http://corps.tamu.edu

The Corps of Cadets is the largest and most visible student organization at Texas A&M. Known as the Keepers of the Spirit and the Guardians of Tradition, many of Texas A&M’s most cherished traditions grew out of the Corps, including Midnight Yell Practice, Aggie Muster and Silver Taps. Currently, over 2,300 young men and women are Corps members.

Most cadet graduates pursue a career in the public and private sector; however, the Corps of Cadets consistently commissions more officers than any institution other than the service academies.

Academic excellence is the top priority of the Corps of Cadets offering scholastic advising and cadet-led support programs as well as access to state-of-the-art academic facilities.

Cadets who pursue non-military careers continue to hone their leadership skills through a rigorous progression of academic leadership courses, applied leadership experiences within the Corps and broader Texas A&M community, and personal development of an Individual Leadership Development Plan. Additional emphasis is given to the development of career readiness competencies of critical thinking, teamwork, professionalism, oral/written communication, career management, digital technology, leadership, and global/intercultural fluency.

The Corps of Cadets offers cadet organizations (The Fightin’ Texas Aggie Band, a precision military band; the Ross Volunteers, the official honor guard for the governor of the state of Texas; the Fish Drill Team, a precision drill unit; and Parsons Mounted Cavalry, the only mounted ROTC unit in the United States), ROTC special units (Army’s Ranger Challenge Team and Rudder’s Rangers, Navy SEAL Platoon, Marine Recon Platoon and the Air Force’s Arnold Air Society) and advanced course ROTC contracts.

Department of Multicultural Services

http://dms.tamu.edu

The Department of Multicultural Services (DMS) contributes to steady progress toward institutional diversity goals of greater inclusion and academic excellence by positively impacting the campus climate.

The department has a mission to provide multiple educational and developmental services for underrepresented and historically marginalized racial and ethnic populations and diversity education programs that foster inclusive learning environments for all students.

DMS supports, advocates for and challenges students as they transition and persist at Texas A&M, as well as provides opportunities for students to examine and communicate ways to contribute to an inclusive and respectful campus community, develop cultural knowledge and competence and build cross-cultural communication skills.

DMS is home to a number of student organizations and programs that provide academic, social, cultural, and personal development, as well as intentional interaction and engagement. DMS assists students with their transition to and persistence through Texas A&M University and educates students about individual differences, cultural competence, and how to contribute to a respectful campus. The department strives to maintain a welcoming and inclusive environment for all students.

Office of Fraternity and Sorority Life (OFSL)

http://aggiegreeks.tamu.edu

• housed in the Department of Student Activities, the Office of Fraternity and Sorority Life’s mission is to build an inclusive fraternity and sorority community at Texas A&M and enhance the collegiate experience by supporting opportunities for leadership, academic success, civic engagement and the creation of fraternal bonds. Our office serves as a liaison among our collegiate chapters, parents, alumni, international organizations, and Texas A&M University to provide organizational guidance, educational programs, and resources while challenging members to live their fraternal values.

• Fraternities and Sororities are a fundamental part of Texas A&M University. We are home to 55+ internationally affiliated or local Greek-letter organizations governed by one of four councils: Collegiate Panhellenic Council (CPC), the InterFraternity Council (IFC), the Multicultural Greek Council (MGC), and the National Pan-Hellenic Council (NPHC). Our fraternities and sororities collectively constitute the largest membership-based and multi-faceted community on campus.

• Representing 10 percent of the undergraduate student population, fraternity and sorority members are committed to their academics, developing and strengthening their leadership skills, volunteering time in the community and continually forming a campus and cultural support network for current and incoming Aggies.

Intercollegiate Athletics

www.aggieathletics.com
• Texas A&M is a member of the National Collegiate Athletic Association (NCAA) and the prestigious Southeastern Conference (SEC), which also includes the University of Alabama, University of Arkansas, Auburn University, University of Florida, University of Georgia, University of Kentucky, Louisiana State University, University of Mississippi, Mississippi State University, University of Missouri, University of South Carolina, University of Tennessee and Vanderbilt University.

• Texas A&M sponsors 20 intercollegiate athletics teams. The nine men’s programs are football, basketball, baseball, golf, indoor track and field, outdoor track and field, cross country, swimming and diving, and tennis. The 11 women’s programs are basketball, cross country, golf, indoor track and field, outdoor track and field, softball, swimming and diving, tennis, volleyball, soccer and equestrian.

• Texas A&M brought home four national champion titles in 2011 as the women's basketball team, the men's and women's outdoor track and field squads and the women's western equestrian all won their respective national championships. The track and field program accomplished the double national titles for the third straight year, a historic accomplishment in NCAA history.

• Aggie athletes have earned more than 800 All-American citations and hundreds have gone on to successful professional careers in their respective sports. In addition, Texas A&M has produced a number of Olympic athletes, including a record number of Aggies who competed in the 2012 Summer Olympic Games.

• The mission of Texas A&M athletics is “Building Champions” and it at the heart of the athletic department's Mission Statement: "Texas A&M Athletics commits to Building Champions through academic achievement, athletic excellence and national recognition of our student-athletes, teams and programs. We provide our student-athletes with all the necessary tools for them to be Champions in their sport and in life. The integrity of our program takes root in the tradition and spirit of Texas A&M, bringing honor and distinction to our University.”

Memorial Student Center (MSC)
http://msc.tamu.edu

• The Memorial Student Center provides the local and campus community with academic, entertainment, arts, political and cultural awareness programs through experiential learning opportunities. The MSC’s student-driven committees, supported by full-time staff, foster leadership development and excellence through campus programming designed to enhance and enrich the Aggie experience. Volunteer in nature, our programming and service opportunities provide next level professional, personal and practical experiences in budgeting, communication, fund development, team development, program planning and logistics, meeting facilitation, public speaking, and technical skills such as running sound for a concert or installing an art exhibit.

• Our programs represent a wide variety of interests including the MSC OPAS performing arts series, student-curated art exhibitions in the MSC Reynolds Gallery, weekly concerts, service events and free film screenings. Dedicated to preparing our students to engage in a global society, our programs attract world-renowned speakers to discuss current events, national affairs, and other relevant topics of today.

• Each semester, the MSC hosts several Signature Events focused on creating a transformational learning experience for all in attendance to the annual Reverend Dr. Martin Luther King, Jr. Breakfast and MSC Open House, MSC Student Conference On National Affairs, MSC Student Conference On Latinx Affairs, MSC Spencer Leadership Conference and Kyle Field Day.

• The MSC Box Office provides students and organizations with convenient and affordable ticketing, cash handling and sales services. The MSC Box Office makes selling easier by eliminating the worry and risk of cash handling by providing online sales and extensive reporting capabilities, taking the hassle out of accounting, tracking sales and cash flow.

Music Activities (MUSA)
http://musa.tamu.edu

Band Opportunities

• Fightin’ Texas Aggie Band – The Fightin’ Texas Aggie Band is nationally known for its precision military marching formations on the football gridiron and is the largest military marching band in the nation. This 400+ member, Corps of Cadets unit is the official marching band of Texas A&M University. Corps of Cadets membership is required as well as an audition with the directors. Please refer to our website (http://musa.tamu.edu/) for more information.

• University Concert Bands – Wind Symphony, Symphonic Winds, Symphonic Band and Concert Band. These ensembles consist of outstanding wind and percussion players from all areas of the Texas A&M campus. Literature performed by the bands is chosen from the best of traditional and contemporary band works. The bands perform at least two concerts per semester and occasionally participate in off-campus concerts and tours. Students from all majors are welcome in the band, and Corps of Cadets membership is not required. An audition is required to participate in the bands. Please refer to our website (http://musa.tamu.edu/) for more information.

• University Jazz Ensembles – These two groups utilize standard 17-piece, large jazz ensemble instrumentation for 13 winds and 4 rhythm section instruments. The bands perform select literature from the best traditional and contemporary big band jazz repertoire. The ensembles perform at least two concerts each semester, including campus and community performances. An audition is required to participate in the jazz ensembles. Please refer to our website (http://musa.tamu.edu/) for more information.

• Hullabaloo Band – The Hullabaloo Band is housed in the Athletic Department and is a sponsored student organization, consisting of 100 student musicians that support Texas A&M Volleyball, and Men's and Women's Basketball. The band regularly travels to tournaments with the teams during postseason play. An audition is required to participate in the Hullabaloo Band. Please refer to our website (http://www.12thman.com/sports/2015/3/23/GEN_20140101165.aspx) for more information.

Choral Opportunities

• Century Singers – The Century Singers is a close-knit family that connects through a shared passion for music. Members also have the opportunity to participate in events throughout the year including overnight retreats and activities such as ice-skating, movie nights, and group dinners. Involvement in both social gathering and formal rehearsals brings members together as Aggies, musicians, and friends. This creates a truly unique and rewarding experience that will be remembered for a lifetime. An audition is required to participate in the Century Singers. Please refer to our website (http://musa.tamu.edu/) for more information.
• Singing Cadets – The purpose of the Singing Cadets is to enhance the public relations of Texas A&M University through musical presentations as deemed appropriate by the Director and to develop disciplined leaders of character as defined by the Singing Cadet Handbook. The four pillars of the Singing Cadets are Purpose, Unity, Spirit, and Honor. Together, these four pillars have formed the solid foundation that has inspired and enabled our organization to succeed in carrying out its purpose for over a century. An audition is required to participate in the Singing Cadets. Please refer to our website (http://musa.tamu.edu/) for more information.

• Women’s Chorus – The Texas A&M Women’s Chorus is a recognized student organization that strives to promote excellence in the fine arts and to encourage cultural expansion at Texas A&M. They also aim to provide entertainment for the campus community, and to enhance the perception of the ensemble at all levels. The choir travels throughout Texas, beyond our state borders, and internationally, and performs a varied repertoire of sacred and secular classical selections. An audition is required to participate in the Women’s Chorus. Please refer to our website (http://musa.tamu.edu/) for more information.

Orchestral Opportunities
• University Orchestras – The orchestra program at Texas A&M consists of two orchestras; the Chamber Orchestra and the Philharmonic Orchestra. Both of these groups are comprised of students from all majors at the university. Both orchestras provide students with outstanding musical experiences while allowing time for academics and other interests. Students in the orchestras perform the best of both string and symphony orchestra literature at a high level of artistic achievement in a focused and supportive environment. An audition is required to participate in the orchestras. Please refer to our website (http://musa.tamu.edu/) for more information.

Recreational Sports
http://recsports.tamu.edu
• All currently enrolled Texas A&M students (with some exceptions) are automatically Rec members. All you need is your student ID to utilize the Student Recreation Center and other Rec Sports facilities. Guest passes for visitors are available for purchase. Persons with disabilities are invited to contact Member Services to inquire about accommodations.
• Drop-in recreation at the Student Recreation Center encompasses the use of recreational facilities such as a walking/jogging track, handball/racquetball courts, and indoor courts for soccer, basketball, volleyball, and badminton. The Rec Center also features a bouldering wall, an indoor rock climbing facility, outdoor basketball and sand volleyball courts, extensive strength and conditioning areas, dance/activity rooms, and a world-class natatorium featuring indoor and outdoor pools and a diving well. Facilities may be used on a drop-in basis except when reserved for classes or university functions.
• An additional recreational facility, The Polo Road Rec Center, located on Polo Road near University Drive, is slated to open in Spring 2021 and will offer about 28,000 square feet with strength and conditioning space, a fitness/multipurpose room, lockers, and changing areas.
• Rec Sports also offers aquatics classes, group exercise and specialty classes, boot camps, personal and small group training, intramural sports, the Texas A&M Sport Clubs program, Outdoor Adventures, and the Walk of Champions brick campaign.

Speech and Debate Team
http://speech.tamu.edu
• Compete at national level while impacting the community and the world at a grassroots level.
• Compete in debate, public address events, individual limited preparation events and oral interpretation events.
• Student-run, student-funded and student-oriented organization.

Student Activities
http://studentactivities.tamu.edu
• The Department of Student Activities fosters and supports leadership, learning, and involvement opportunities that enhance the growth and development of students and recognized student organizations. At Texas A&M, we care about helping Aggies develop in ways, both in and out of the classroom, that will prepare them for life beyond Aggieland. To do so, Student Activities offers opportunities to lead, serve, participate in campus traditions, represent student voice, and make an impact at Texas A&M. We also provide a way for Aggies to connect and volunteer with local community agencies through our AggieServe database (http://aggieserve.tamu.edu/). The perks of getting involved on campus range from reaching your leadership potential to networking with administrators and potential employers to forming lasting friendships.
• The Department of Student Activities houses key involvement opportunities, including 1100+ recognized student organizations, as well as 50+ fraternity and sorority chapters that can be found through our Office of Fraternity and Sorority Life. The Student Government Association and the Texas A&M Class Councils offer opportunities for those who are passionate about representing the student voice and hosting Texas A&M traditions.
• At Texas A&M, Aggies are held to a high standard of leadership and selfless service. To promote and develop these qualities, our Leadership and Service Center offers a number of leadership programs to help you reach your leadership potential, including the Maroon & White Leadership Fellows Program, and it also houses several service-based organizations and events such as The Big Event and the Volunteer Opportunities Fair.

Student Government (SGA)
http://sga.tamu.edu
• SGA is comprised of the executive, legislative and judicial branches. Members of these branches work to advocate for student needs and help better the Texas A&M campus.
• In addition, SGA has four commissions – Development, Election, Diversity and Legislative Relations. Each of these serve to carry out the goals of the Student Body President from fundraising money for all of SGA to advocating for students at the state level.
• Finally, SGA houses 13 committees including CARPOOL, The BIG Event, Muster and more. These committees strive to enhance the student body through their leadership, programs, conferences and traditions, and they directly have an impact on the student body and community.

Student Life
http://studentlife.tamu.edu
• The Offices of the Dean of Student Life strive to enhance your opportunities as a student to participate fully in the University experience. We do this by providing you with information, services, programs and involvement opportunities that facilitate responsible life choices and promote awareness of yourself and of your community. Each of the program areas within the Offices of the Dean of Student Life has a specific mission, but one common goal: to provide education, outreach, and support to you.

• Additionally, the department advises the following student organizations: Aggie Orientation Leader Program (AOLP), American Association of University Women at Texas A&M University (AAUW-TAMU), Graduate and Professional Student Government (GPSG), Aggie Parent & Family Ambassadors (APFA) and Sexual Health and Relationship Education Campaign (SHREC).

• Specific services and programs offered include:
  • Health Promotion (Alcohol and other Drugs, Interpersonal Violence Prevention, Wellness)
  • LGBTQ+ Pride Center
  • New Student and Family Programs
  • Off Campus Student Services
  • Student Assistance Services
  • Student Conduct Office
  • Student Legal Services
  • Student Media (The Battalion and Aggieland yearbook)
  • Women’s Resource Center

Student Life Studies
http://studentlifestudies.tamu.edu

• Facilitates the Division of Student Affairs and student organizations in the assessment and evaluation of services and programs and assists in expanding the knowledge base about Texas A&M students and their co-curricular experiences. Department staff can assist with the development of assessment instruments and the collection and analysis of data.

Student Media
http://studentmedia.tamu.edu

• Student Media produces national, award-winning publications; The Battalion newspaper, the Aggieland yearbook and the Maroon Life magazine. All three are written, edited and produced by students and offer excellent opportunities to gain valuable experience for journalistic and related careers.

• The Battalion, Texas A&M’s student newspaper since 1893, is typically printed weekly on Thursdays during the fall and spring and every other week during the summer sessions. Around finals and holidays, the delivery days may be changed. It is distributed to students, faculty and staff on campus and at many apartments and other high traffic areas in College Station. The Battalion also is available online and on mobile devices at thebatt.com.

• The Aggieland, which dates back to 1895, is distributed in the fall but is a year-round project documenting school activities. It is one of the nation’s largest college yearbooks.

• Maroon Life is published five times during the school year with New Students’ Guide to Aggieland (distributed at New Student Conferences), Fall Sports Preview, Best of Aggieland (winter distribution), Spring Sports Preview and Housing Guide (Family Weekend) editions.

University Art Galleries
http://uart.tamu.edu

• The University Art Galleries (UART) Department supports the educational mission of Texas A&M University by providing impactful visual arts experiences to diverse campus and regional community audiences. UART serves as steward of its collections, promoting arts advocacy and engagement across the university. It is responsible for visual art exhibitions at the J. Wayne Stark Galleries, the Forsyth Galleries, the public art on campus, and for art inventories at Texas A&M.

• The program organizes the major art exhibitions for the University; advises on the selection, display and management of visual art objects on the campus; handles all art and art-related gifts to the University; and provides guidance and support to all exhibitions and collections at the University. The department also maintains the outdoor sculpture collection for the university.

• In addition, the University Art Galleries department organizes programs to complement exhibitions; has a docent program, which provides guided tours of changing exhibitions on campus and the University’s permanent collections to interested community and school groups as well as other art education programs.

University Center and Special Events (UCEN)
http://ucenter.tamu.edu

• University Center and Special Events (UCEN) is a highly skilled team of professionals committed to creating extraordinary guest experiences. We provide exceptional event management and technical support in state-of-the-art facilities that are well maintained, safe and clean. Through our facilities and services, we enhance the educational, business, social and cultural experiences of students, faculty, staff and visitors of Texas A&M University.

• Event Services – located on the second floor of Rudder Tower, the Event Services team assists in the booking, coordination, setup and staffing of meetings and events held in the Memorial Student Center (MSC), J. Earl Rudder Conference Tower, John J. Koldus Building, All Faiths Chapel, and the surrounding outside event spaces.

• Special Events – located on the first floor of Rudder Theatre Complex, the Special Events team assists with the booking of space in Rudder Theatre Complex, which includes Rudder Auditorium, Rudder Theatre, Rudder Forum, and the Exhibit Hall. Additionally, our Special Events team provides AV technical support, event setup and support, equipment rental and event consultation for events held outside of UCEN facilities.

• University Center Guest Suites – located in the Memorial Student Center (MSC), the University Center Guest Suites are an ideal and convenient place for housing speakers, visitors, and out-of-town guests. With an offering of 800 square feet, each suite includes a living room, kitchenette, king bedroom, full bath and vanity. Individually decorated, each suite welcomes guests with tailored amenities, exemplary service and an experience which embraces university traditions and values.
Vice President for Student Affairs

http://studentaffairs.tamu.edu

In support of the Texas A&M University mission, the Division of Student Affairs contributes to student learning and development. The Division provides exceptional services, facilities, and programs that promote student success, embody the Aggie spirit, and foster a diverse and inclusive campus community to deepen the understanding and individual application of the Aggie Core Values - Loyalty, Integrity, Excellence, Leadership, Selfless Service and Respect.
**TUITION, FEES AND OTHER FINANCIAL INFORMATION**

**General Information**

Educational expenses for nine months will vary according to personal needs and course of study. The Financial Aid Office's basic budget for new undergraduate students including tuition and fees, books, supplies, transportation, on-campus room and board, incidental and living expenses come to about $30,024. Total expenses for returning students during an academic year should be slightly less than those for new students. The costs for new nonresident or international students is about $58,550. All tuition and fees amounts provided herein represent the most accurate figures available at the time of publication and are subject to change without notice. University Rules in place at the time of publishing are reflected here. All are subject to change. The most current information available will be maintained on the Scholarship & Financial Aid (http://financialaid.tamu.edu) website. Student Business Services online tuition and fee estimate calculator can be found at the Student Business Services (http://sbs.tamu.edu) website.

**Payment of Tuition and Fees**

Students must meet all financial obligations to the University by their due dates to avoid late penalties. Failure to pay amounts owed may result in cancellation of the student's registration, barring from future enrollment and non-issuance of official transcripts. State law requires that tuition and fees be paid prior to the first day of classes. Students who wish to pay fees in installments can select the option on the My Finances tab on the Howdy (http://howdy.tamu.edu) Portal.

**Obligation to Pay Tuition, Required Fees, Other Fees and Charges for Optional Services**

By registering for classes, students agree to pay all tuition and required fees associated with their registration, optional services and other fees, whether paying in full or utilizing the installment payment option. Failure to pay tuition, fees and other charges may result in penalties, late registration fees and/or possible cancellation.

**Financial Obligation for Graduating Students**

According to Texas A&M University Student Rules and Chapter § 54.007 (c) of the Texas Education Code, all financial obligations to the University must be paid by the end of the semester. Failure to settle all financial obligations will result in withholding a student’s diploma at graduation. Additionally, a block will be placed on the student’s account which will prohibit registration in subsequent semesters and receipt of official transcripts.

**Citations**

- Section 14.15 of the Texas A&M University Student Rules states “The student must have settled all financial obligations to the University.”
- Chapter § 54.007 (c) of the Texas Education Code states “A student who fails to make payment prior to the end of the semester may be denied credit for the work done that semester.”

**Tuition**

**Texas A&M Tuition and Required Fees per Semester Credit Hour**

A tuition calculator is provided on the Student Business Services (SBS) website to assist students in estimating their tuition and fee costs based on enrolled semester credit hours. Tuition and fee explanations can also be found at sbs.tamu.edu.

All rates are the most current available at the time of printing and are subject to change.

**Nonresident Tuition Waiver**

If you have any questions concerning your eligibility for a waiver of nonresident tuition, please visit our website (http://sbs.tamu.edu/accounts-billing/forms/waivers-exemptions/) or contact Student Business Services by email at sbs@tamu.edu.

**University Advancement Fee**

The University Advancement Fee is a required fee charged to all Texas A&M University students. The University Advancement Fee funds services such as advising, the Career Center, University Writing Center, technology and libraries as well as administrative services such as ID services, the campus bus system, billing and refunds, access for students to discounted software and many of the services provided through the Division of Student Affairs.

**CEHD Teacher Preparation Program**

Undergraduate students enrolled in the professional phase of teacher preparation programs incur a differential tuition charge of $300 in each of the remaining fall and spring semesters. This differential tuition helps support field experiences, supervision, scholarships and international/urban experiences in culturally diverse settings.

**Distance Education Administration Fee**

This $30 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.

**Distance Education Differential Tuition**

The rate to be charged for distance education courses will range from a minimum of $40/SCH to a maximum of $550/SCH. Each academic department will have an individual rate that will be approved annually by the President of Texas A&M University. For more information regarding Distance Education Differential Tuition, please visit http://sbs.tamu.edu/accounts-billing/tuition-fees/schedule/#DIST_ED_DIFF.

**TAMUHSC Tuition and Required Fees**

Texas A&M University Health Science Center tuition and fees are approved by The Texas A&M University System Board of Regents within guidelines established by the Texas Legislature. Fees are subject to change by the Board of Regents.

A tuition calculator is provided on the SBS website to assist students in estimating their tuition and fee costs based on enrolled semester credit hours. Tuition and fee explanations can also be found at sbs.tamu.edu.
TAMUHSC Fees

Distance Education Administration Fee
This $30.00 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.

Field Trip Fees
Field trip fees are assessed to cover the cost of providing trips and vary depending on the course taken and expected expenses.

Group Hospital Fee
The group hospital fee supports the provision of medical services to students to access services at the academic locale.

Instructional Enhancement/ Equipment Fee
The Texas A&M University Health Science Center charges an Instructional Enhancement Fee (IEF) at each of the colleges offering TAMUHSC academic programs. The colleges have varying fee rates based on the IEF needs of the college. This fee supports an array of educational activity enhancing academic programs at the college. A few examples of enhancement expenditures are; software to enhance education, media, web-based instruction, tracking and evaluation tools, licensure fees, and integration of technology.

Publication ASDA/ ADHA Fee
This fee provides for students to receive a monthly publication, annual membership into the ASDA, ADA, or ADHA, and many leadership opportunities depending on the student’s academic program.

ID card (1-time flat rate)
This additional ID fee covers the College of Dentistry badge, which also serves an access card to secure locations of the dental school in addition to being an identification card.

Matriculation Fee (1-time flat rate)
This is a setup fee for first-year dental students related to a college-specific file set up with the college.

Drug Testing Fee (1-time flat rate)
All dental students pay this fee to cover drug testing for students, and this is a one-time assessment.

Lab Fee
The University is required to assess and collect a laboratory fee not less than $2 nor more than $30.00 for each laboratory course to cover in general the cost of laboratory materials and supplies used by a student.

Medical Liability
Medical Liability Insurance is required by students interacting & treating patients. This fee covers medical malpractice required for this type of activity.

Equipment Usage
This fee supports costs associated with instruments used during dental education.

Summer Clinic Fee (D3 and D4 only)
The Summer Clinic Fee is used to partly cover the cost of students working in the clinic. This fee is a flat fee and is not charged by the hour.

The students are scheduling and working on patients as part of their clinical training.

Clinical Simulation Fee
The fee covers costs associated with Clinical Learning Resources Center to include specialized simulation technology, equipment, materials and supplies related to the operating of the simulation center.

Gross Anatomy Fee (M1 Only)
This fee covers costs associated with Gross Anatomy lab to include lab materials, supplies, furnishings, software and equipment specific to gross anatomy

Professional Liability Fee
Professional liability insurance coverage is required of all students who will be in clinical settings providing patient care. It is a mandatory requirement of all local facilities with which we have contracts for student clinical experiences.

Clinic Simulation Fee
This fee covers costs associated with Clinical Learning Resources Center to include specialized simulation technology, equipment, materials, and supplies related to the operating of the simulation center.

Professional Activity Fee
The Professional Activity Fee supports various professional activities for pharmacy students such as participation in clinical partnerships enhancing experiential education, financial resources to ensure these clinical experiences meet pharmacy education expectations, support of student travel to professional meetings/conferences, and other professional activities.

Professional Development Fee
One-third of the pharmacy curriculum is experiential education, which consists of the Introductory Pharmacy Practice Experiences (IPPE) and the Advanced Pharmacy Practice Experiences (APPE). This fee supports clinical site payments for student rotations. In addition to clinical site payments, the Professional Development Fee supports service learning activities and other professional development services and programs.

Environmental Service Fee
This fee supports distribution, maintenance and pickup of recycle bins and materials from each building located on the Texas A&M University-Kingsville campus. Only pharmacy students located at Kingsville are assessed this fee.

Career Services and Professional Services Fee
This fee will support efficient and effective support services for professional career development services. Various operational costs associated with the provision of professional career development services.

Advising Services Fee
This fee will provide advising support services for all graduate degree programs not provided by members of the faculty. This fee includes, but is not limited to Graduate Studies, Professional School Advising, and Admission Services related to student enrollment. Various operational costs associated with the delivery of services noted in programmatic justification.
Transportation Fee
This $70 per semester fee ($35 for a 5-week summer term and $70 for a 10-week summer semester) is assessed to provide unlimited fare-free access to all students to on-campus and off-campus services, and expanded service and revenue for a long-term bus replacement plan. In addition, revenue will pay for operating expenses and the enhancement of bus facilities on campus. Fee subject to change.

Locked and Variable Rate Tuition Plans
Beginning with the Academic Year 2018-2019, incoming undergraduate Texas resident students at Texas A&M University will be offered the choice between a variable rate tuition plan or a locked-rate (fixed) tuition plan allowing students and their parents to better plan and budget for college expenses. You will need to select the best option for you and your family prior to registration. Incoming Non-Resident Students will default to the Variable Rate Plan.

Options
Variable rate plan: Tuition and fees could increase each year, using the Higher Education Price Index.

Locked-rate (fixed) plan: Tuition and fees are locked into a per semester rate for 12 consecutive semesters, or 4 years, from the point of initial enrollment at a public or private institution.

Entering Freshman Texas Resident Students: Will choose either the variable rate or the locked-rate (fixed) associated with their first term of enrollment.

Entering Transfer or Readmit Texas Resident Students: Have three options to choose from

- Variable rate, which will vary each academic year
- Locked rate (fixed), based on their first term of enrollment in college after high school, which will expire at the end of 12 consecutive semesters, or 4 years from that first term of enrollment
- The current academic year’s tuition and fee rate which will be locked in for 12 consecutive semesters or 4 years

Presumptions
Students will enroll in 30 hours an academic year for 4 years allowing completion of most degree plans. Some majors such as engineering and architecture are offered 1-2 additional semesters at the locked rate.

Where do I select my tuition rate?
All incoming freshmen and admitted transfer and readmit applicants must select a rate prior to registration. Rate code selections can be made by logging in to the Howdy Portal at howdy.tamu.edu (http://howdy.tamu.edu), selecting the My Finances Tab and following the instructions. The choice will be offered only once and cannot be changed in future semesters.

Tuition estimates can be found on the Student Business Services website at http://sbs.tamu.edu/.

Texas A&M University meets requirements of the Texas Education Code, Section 54.017 regarding fixed tuition for undergraduate students.

1 Distance Education Instruction: This group includes traditional off-campus classes, all university centers and telecommunications, video and other nontraditional Distance Education Instruction delivery models.
2 In Absentia: The traditional student who is performing individual research or completing degree requirements that do not require classroom instruction.
3 Cooperative Registration: Students participating in the Cooperative Education Program at Texas A&M University.
4 Texas A&M University Graduate Students—Galveston: Texas A&M graduate students who enrolled at College Station, but who are taking courses exclusively at Galveston.
5 Study Abroad: Students participating in the Texas A&M University Education Abroad Program.
Application Fees
Graduate: $50; Undergraduate: $75; International: $90

Cooperative Education Fee
A fee of $75 is charged to all participants of the Cooperative Education program.

Field Trip Fees
Field trip fees are assessed to cover the cost of providing trips and vary depending on the course taken and expected expenses.

Laboratory Fees
The University is required to assess and collect a laboratory fee not to exceed $30 for each laboratory course to cover the cost of laboratory materials and supplies used by a student.

Late Penalties
Students who fail to pay fees and installments when due are assessed a late payment fee for each payment or installment paid late.

Late Registration/Add Penalties
The Late Registration Charge is assessed to students who register on or after the first class day. A charge of $100 for registration between the 1st and 12th class day and $200 for registration after the 12th class day also applies to students who have not paid 100% of tuition and fees or submitted adequate Installment Plan payments by the semester census date. Registration after the 12th class day is by exception only and requires Dean’s approval.

Students who add classes after the 12th class day that result in a net increase in hours enrolled are assessed a $50 late add fee.

Microfilming, Binding and Collating
Binding, collating, microfilming theses and dissertations—Masters: $110, Doctoral: $170

New Student Conference Fee
A non-refundable new student orientation fee of $225 is charged to all freshmen students and $153 to transfer students. An additional fee of $35 is required of all international students to cover additional costs associated with orientation programs.

ROTC Uniform Rental
Qualifying cadets enrolled in Army, Air Force, or Naval ROTC will be reimbursed the cost of basic cadet uniforms. Cadets who are not enrolled in ROTC (Drills and Ceremonies Cadets) are required to pay for the cost of uniforms.

Supplementary Fee for Courses Attempted More than Twice
A non-repeatable course that is attempted by a student more than twice at a public institution of higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students or charge a supplementary fee to the student who is attempting the course more than twice. Texas A&M has chosen to assess a supplementary fee to those students attempting a course more than twice.

A student attempting non-repeatable courses more than twice at Texas A&M University will be subject to a supplementary fee of $125 per semester credit hour ($375 for a 3-hour course) for the repeated course, in addition to tuition and required fees associated with the course.

Students will be notified at the time they register for a course that it has been taken twice at Texas A&M and is subject to the supplementary fee.

Greek Dues Fee
This $25 due fee provides members of fraternities and sororities with a sustainable advising and programming model to create a membership experience that is congruent with both the university’s and the organizations’ mission, purpose and values.

Musical Activities Performance Fee
The $100 Musical Activities Facility Performance Fee is a per semester fee that is charged to each participant in a Music Activities affiliated vocal or instrumental program and supports programming, performance, and operational costs. This charge is not Title IV eligible.

Diploma/Graduation Fee
A non-refundable fee per degree sought is assessed the semester a student applies for graduation. This fee is payable each time a student applies for graduation. A late fee of $50, in addition to the diploma/graduation fee, may be charged to those who apply for graduation after the published deadline.

Health Center Fee
This $75.00 per semester fee ($25 for a 5-week summer term and $75.00 for a 10-week summer term) is required of all students for the purpose of operating, maintaining and equipping the University Health Center and entitles the student to its services. These services do not include surgical operations or charges for consultations with outside physicians.

Identification Card (Aggie Card)
Every student is required to have a student ID card. ID cards are permanent and students are responsible for maintaining a working ID throughout their career at the University. The Aggie Card is used for residence hall access, registration, fee collection, financial aid disbursement, dining halls, athletic event and recreational sports admissittance and library privileges. Replacement ID cards are $12.

Students who lose their IDs can report the loss immediately and deactivate their card online at http://myaggiecard.tamu.edu or by contacting:

Student Business Services
Aggie Card Office, General Services Complex
(979) 845-4661
8 a.m.–5 p.m., Monday through Friday

International Student Health Insurance
The Texas A&M University System requires all international students entering the U.S. on a F-1 or J-1 student visa to be covered under the Texas A&M University System Student Health Insurance Plan (SSHIP) or have equivalent insurance coverage that meets the waiver criteria.
The System Student Health Insurance Regulation is located at http://policies.tamus.edu/26-99-01.pdf.

For more information regarding the health insurance and waiver processes, please visit http://iss.tamu.edu.

**International Student Orientation Fee**

This $35 fee is charged to cover the cost of new student programming for newly admitted or returning international students.

**International Student Services Fee**

This $85 fee is required of all students who are not U.S. Citizens or Lawful Permanent Residents to offset the cost of specialized services provided to these students from International Student Services, Center for Teaching Excellence - English Language Proficiency Program, and the Writing Center.

**Recreational Sports Fee**

The Recreational Sports fee is assessed to all students attending the University for use of the Student Recreation Center and all other Recreational Sports facilities. The fee for new undergraduate students, graduate students and students on the variable rate tuition plan is $145 per semester ($72.50 for a 5-week summer term and $145 for a 10-week summer semester). Returning undergraduate students for fall 2020 semester on a fixed rate tuition plan will continue to pay $106 per semester ($53 for a 5-week summer term and $106 for a 10-week summer semester) for the duration of their fixed rate tuition agreement.

**Reinstatement Fee**

Students who fail to pay all fees by the last day of the semester will be administratively withdrawn from the University and charged a $50 reinstatement fee.

**Sponsored International Students**

International Student Services (ISS) provides specialized administrative services, advising, and other program management related to the specific requirements for sponsored students. ISS serves as a liaison with academic departments, the Texas A&M University campus, sponsored students and their sponsors.

Third Party Billing and invoices for sponsored students are handled by Student Business Services (SBS). http://sbs.tamu.edu/accounts-billing/for-sponsors-and-sponsored-students/

An administrative fee not to exceed $500 per semester or summer session (all or part thereof) will be required to support international sponsored students whose programs are coordinated through International Student Services, unless these fees are waived as part of negotiated contractual agreements.

For more information, please visit the sponsored student section at http://iss.tamu.edu.

**Student Center Complex Fee**

This $100 fee ($50 for a 5-week summer term and $100 for a 10-week summer semester) is required of all students for operating, maintaining, improving and equipping the Student Center Complex.

**The TEA Teacher Ed Prep Program Fee**

The TEA Teacher Ed Prep Program Fee is mandated by the Texas Education Agency for all candidates seeking educator certification in the State of Texas TAC 229.9 (https://texreg.sos.state.tx.us/public/readtac$ext.TacPage/?sl=R&app=9&p_dir=&p_rloc=&p_loc=&p_tloc=&pp=1&p_tac=&ti=19&pt=7&ch=229&page=10). This fee is assessed based on information provided by the College of Education.

**Optional Services**

**Athletic Events**

Sports Pass are available for purchase. For more information, please visit http://mysportspass.tamu.edu (http://mysportspass.tamu.edu/).

**Installment Payment Option**

Students who choose to pay using the installment plan pay a $15 installment payment service charge per semester (excluding the Summer term.) This charge is non-refundable. You may add the installment plan by selecting the installment option through the online registration system at https://howdy.tamu.edu (https://howdy.tamu.edu/).

**MSC OPAS Tickets**

Special Discounted Student OPAS tickets are available through the MSC Box office. For more information, please contact MSC OPAS at (979) 845-1661 or visit their website (http://mscopas.org/).

**Yearbook**

The cost is $81.19 including shipping and sales tax.

**Campus Dining**

Freshmen (classified as U1s with less than 30 hours of college credit when they initially apply to live on campus) will be required to have a minimum dining plan for the full academic year (or remainder of the academic year for those that apply for housing after the beginning of the fall semester).

All Corps of Cadets members are required to have a dining plan, as designated by the Office of the Commandant.

Upperclassmen and students who are not campus residents are not required to purchase a Dining Plan, but the option is available.

All Dining Plans are loaded onto the Student ID card to make access and use easy.

Fees for the selected meal plan will be added to your Texas A&M University student fee, and are separate from housing fees. Any plan purchases or additions made after the ninth week of class cannot be charged to the student’s account and must be paid via credit card. Please visit our website for official date as it may vary each semester based on the academic and billing calendars.

Students have the option to select a Dining Plan that fits their individual needs. Dining Plans are designed to be flexible for an array of lifestyles and appetites. Smaller Dining Plans are available for upperclassmen and students who live off campus. Most Dining Plans include 2 parts: First, “Meals,” which can be used at the all-you-care-to-eat dining halls, or in select retail locations as a “meal trade.” The second part of the dining
plan consists of “Dining Dollars.” These declining balance dollars can be spent like cash or a debit card, and are accepted at all University Dining kiosks, coffee shops, food courts and dining centers. Each purchase is automatically deducted from the account.

When paying with Dining Dollars, patrons will enjoy a discount on the door rate at Duncan, Sbisa, and The Commons, the all-you-care-to-eat dining halls on campus. Dining Dollars roll over from fall to spring with the purchase of a spring dining plan.

Dining Dollars are only accepted on campus, assuring parents and guardians that this money is spent only on food and beverages. Applicable sales tax will be added at checkout.

**Parking Permit**

Vehicles parked on the Texas A&M University campus are required to display a valid parking permit or pay by the hour to park in designated visitor areas. Costs of permits are prorated and subject to change.

For more information or to purchase a permit, visit transport.tamu.edu/permitreg (http://transport.tamu.edu/parking/faqpermit.aspx).

**Residence Hall and Apartment Room Rates**

All students living in residence halls or apartments are required to pay room rent. Rooms are furnished with beds, mattresses, desks, chairs and dressers. Students are expected to furnish their own pillows, blankets and linens internet and basic tv service. Room rates include heat, air-conditioning, lights and cleaning of common areas. Rates are for the semester and are subject to change.

For more information, please see Residence Life (http://reslife.tamu.edu).

**Payments**

**Scholarships, Grants and Loans**

All financial aid or loans must be accepted and requirements completed before it can be applied toward a student’s account.

**Payment Methods**

Texas A&M utilizes online statements and electronic payments in its efforts to provide timely financial information to students and to control costs. Student account payment options include:

- **Electronic/Online**
  - Students can view their account and make online payments using E-Checks, American Express, Discover Card or MasterCard by selecting “Pay Bill/Manage Account” on the My Finances tab in the Howdy portal. Payments made with credit cards will incur a convenience fee charged at the time of payment. Payments made with credit cards will incur a 2.25% convenience fee minimum charge of $3.00. Additional forms of payment accepted include personal checks, cashier’s checks, wire transfers and Pin Debit. (Please Note: Once online payment transaction has occurred, the Convenience Fee is non-refundable).

**Paper**

- Checks – Students may still use paper checks for payments. The University reserves the right to utilize check conversion technology to convert paper checks into electronic format.
- Cashier’s checks
- Money orders

**Cash**

- Cash is not accepted.

**Flywire**

- All bank wire transfers are accepted using our partner, Flywire. Texas A&M University does not accept direct wire transfers and will not provide our banking information.

**Returned Payments**

Any payment that is rejected for payment by the paying bank, credit card company or other financial institution is subject to returned item charges of $30 or more. Rejected payments may also result in cancellation of the student’s registration and additional late registration penalties if the student is required to re-register on or after the first day of classes.

**Installments**

Tuition, required fees, room, board and parking are payable in full, or in installments. A $15 per semester service charge, to cover the cost of handling, will be assessed to each student who chooses to use the installment plan. Students may pay their account in full any time during a semester; however, the service fee will not be refunded once a payment is made under the installment plan or after the first installment due date. See the Student Business Services (http://sbs.tamu.edu) website for information on installment plans.

**Deposits**

**General Deposit**

A deposit of $100 is required of every student to ensure the institution against losses, damages, and breakage for which the student is responsible, or to be used to offset in part amounts owed by the student to the institution. General deposits are returned to students, less any such amounts owed to the institution, within a reasonable period after the date of the student’s withdrawal or graduation from the institution, not to exceed 180 days. The deposit retention period provides the University sufficient time to identify all amounts owed and to determine if the student intends to enroll in the semester or summer session immediately following the student’s withdrawal or graduation or, if the student withdraws or graduates in the spring semester, in the next fall semester. If a student leaves the University without graduating or officially withdrawing, they must submit a written request to Student Business Services to receive a refund of their deposit. Deposits for students that do not graduate, withdraw or otherwise request a refund remain on file for four years. Those deposits are forfeited to the University’s General Deposit Scholarship Fund, after deducting any amounts owed the University.
Residence Hall Deposit
There is a $75 non-refundable application fee that is required to complete the housing application and sign a contract for the residence halls and university apartments. Students have until May 1st to cancel their housing for the Fall term, or October 31st for the Spring term. Any cancellation after that date is considered a late cancellation and cancellation penalties apply. Freshmen classified as U1 with less than 30 hours will be required to have a dining plan if they live on campus.

Penalties and Late Fees

Late Payment Penalty
There are severe penalties for failure to pay student account balances and installments by their specified due dates. If a payment is delinquent when a semester ends, the student will be blocked and may not receive credit for academic work performed. Students will not be readmitted to the University until all past due balances, including late charges, are paid. A late fee of $25 for A&M students and $50 for HSC students will be assessed for each payment not received on or before it is due. If a student is removed from the rolls of the University or is withdrawn for failure to pay amounts owed the University, a reinstatement fee of $50 for A&M students and $150 for HSC students will be assessed in addition to any other late fees or penalties already incurred and must be paid before the student will be reinstated. Current due dates can be found online at the Student Business Services website.

Late Registration Fees
Students who register on or after the first day of classes are assessed a late registration fee of $100 for A&M students and $200 for HSC students. Students who register after the official census date (12th class day for fall or spring and 4th class day for summer) are assessed a late registration fee of $200 for A&M students and $250 for HSC students. Students who add classes after the official census date are assessed a late add fee of $50 for A&M students and $100 for HSC students. Note: Penalties, late registration and late add fees also apply to students who are required to re-enroll because their registrations were canceled for nonpayment. Registrations are subject to cancellation and/or financial penalties if sufficient payment is not received before 5:00 p.m. on the semester due date.

Use of Collection Agencies and Credit Bureau
If amounts become past due, the University reserves the right to report the account to the Credit Bureau. This will also initiate internal collection efforts and could cause the University to employ an outside collection agency to recover the debt. If any collection efforts must take place, the student will be required to reimburse the University for the fees of any collection agency which may be based on a percentage at a maximum of 30% of the debt. All costs and expenses, including reasonable attorney’s fees the University, incur in such collection efforts.

Canceling Registration
Once students have registered for classes, they must select one course of action from the following to remain in good standing with the University:

- pay all amounts due by the specified due date;
- use the online registration to drop all classes prior to the first day of classes; or
- initiate the withdrawal process online in Howdy to begin the process to withdraw from the University after the first day of classes.

Following this procedure is especially important for students who have been awarded scholarships or financial aid since the aid may automatically pay tuition and fees and cause the registration to be held even though the student has decided not to attend. Failure to request cancellation of an unwanted registration may result in grades of F or I in all courses for the semester. The student will be required to reimburse the University for scholarships and other financial aid applied to his or her account and will be held responsible for paying all fees for the semester, regardless of whether he or she attended classes.

Cancellation for Nonpayment of Tuition or Fees
The University reserves the right to cancel registrations not paid by their due date, or the official census date for a semester or summer term, to comply with state laws requiring payment of tuition and fees, to free the classroom spaces for other students, and to ensure the most efficient use of university resources.

Refunds and Adjustments

Fee Adjustments for Courses Dropped
A student may drop individual courses during the first five days of a fall or spring semester (first four days of a summer term). Students also may drop individual classes with special permission of the dean between the 6th and 12th class days. Full refunds will be given for the individually dropped courses during these periods provided the student remains enrolled in at least one class and has not withdrawn from the university. Refunds will not be issued for classes dropped after the 12th class day. Any credit balance on a student account as a result of dropping courses will not be refunded until after the fifth class day. As of the first day of the semester, students may not drop all of their courses through the drop/add process, but instead must begin the official withdrawal process online through Howdy (https://howdy.tamu.edu) (see Withdrawal from the University below for additional information regarding the withdrawal process). A student may add courses during the first five days of a fall or spring semester.

Adjustments for Withdrawal—Tuition and Fees
Tuition and fee adjustments shall be made to students officially withdrawing from the University for charges listed below according to the following refund schedule: Tuition and Required Fees, Residence Hall Rent, and Meal Plans.

Fall and Spring Semester and 10-Week Summer Semester
By 5 p.m. on the last business day before the first day of class

- 100%
- During the first five class days
- 80%
- During the second five class days
- 70%
- During the third five class days
- 50%
- During the fourth five class days
- 25%
- After the fourth five class days
- None

Summer Term of More Than 5 Weeks But Less Than 10 Weeks
By 5 p.m. on the last business day before the first day of class

- 100%
During the first, second or third class day | 80%
During the fourth, fifth or sixth class day | 50%
Seventh day of class and thereafter | None

Athletic Refunds
Refunds are not allowed for individual games or games missed. A prorated refund is permitted until the option is used to pick up a ticket for any one game. Once a ticket option has been used, prorated refunds will be given only in the event of withdrawal from the University. For information on refunds, contact the Athletic Business Office at (979) 846-8892.

Reductions in Rates for Late Entry to the University
No reduction will be made in the charge of room rent and board in case of entrance within 10 days after the opening of a semester or summer term, nor will a refund be made in case of withdrawal during the last 10 days of a semester or summer term, or the last days for which payment is made.

Refund Delivery
Texas A&M and Heartland ECSI have joined forces to deliver financial aid and other refunds to students faster through the University’s refund delivery process. You will receive information from Heartland ECSI and the University at your new student conference and in your official University email account, which will explain the process for signing up for direct deposit of refunds.

Yearbook Refunds
Yearbook charges are refundable in full during the semester in which payment is made. Thereafter, no refunds will be made on orders canceled in subsequent semesters. Yearbooks must be picked up during the academic year in which they are published. Students who will not be on campus when the yearbooks are published must pay a mailing and handling fee. Yearbooks will not be held, nor will they be mailed, without payment of the mailing and handling fee. Refunds will not be made on books not picked up within one semester of the publication date. Refunds will not be made before 21 days from the date of payment. Refund policies contained herein reflect policies in effect at the time of publication and are subject to change.

Dining Plan Refunds and Add/Change/ Drop Policies
Texas A&M University Dining’s dining plans and options listed are based on information available at time of printing and are subject to change. University Dining follows the University’s refund schedule for Tuition and Fee Adjustments. Refunds are given on the percentage basis listed for students dropping fee options or officially withdrawing from the University.

Students may purchase a dining plan, change to a larger plan or add on to a plan during registration for classes or at any time through University Dining. Dining Plans and additions to the plans may be charged to the student account through the ninth week of school. Any purchases after that point will require a credit card payment. Changes from a higher dining plan to a smaller dining plan or requests to cancel/drop are permitted only through the fourth week of classes. The appropriate fee is to be paid to the Office of Student Business Services.

Dining plans are valid for one semester starting with the first day of campus move-in (as designated by the Department of Residence Life) and end after the last final exam day. Check with Dining for posted dates for dining plan access. Location hours may vary during class breaks and meal availability may exclude official University holidays.

Following University policy, no one is authorized to use or borrow a student’s identification card (Aggie Card); therefore, dining plans are not transferable between students. The Aggie Card must be presented to Dining cashiers for dining plan participation. If an Aggie Card becomes lost, report it immediately by calling (979) 845-4661 or go to http://myaggiecard.tamu.edu (https://myaggiecard.tamu.edu/) to deactivate the card.

For questions and assistance, please email dining@tamu.edu (include name, UIN and instructions if dining plan related) or contact our office at (979) 845-0152. Additional information on University Dining and dining plans can be found on our website (https://new.dineoncampus.com/tamu/) or in this catalog under Campus Dining.

Residence Hall Rent Refund
If a student withdraws, moves off campus or in any other way terminates the housing contract, a refund of residence hall rent may be made according to the stipulations in the housing contract. Any cancellation after May 1st for the Fall (regardless of when the student applies) is subject to the following cancellations penalties: 1) Prior to May 1st - no penalty, 2) May 2nd to May 30th - $500, 3) June 1st to August 14th - $1000, 4) August 15th (or after move) - 100% of Fall semester rent and 5) Students who cancel their housing assignment after the student has moved in for the Fall is subject to 100% of the Spring semester rent.

Exceptions to the housing charge/refund schedule may be granted for students who graduate at the end of the Fall semester, enlist in the Armed Forces of the United States, are accepted into one of the Service Academies, or participate in a cooperative education/internship, student teaching (not in the local area), or a student abroad program for the Spring semester if written notification and verification of the aforementioned condition is received in the Housing Assignments Office, Corps Housing Office, or University Apartments Office (as applicable) by November 15th. Exceptions may also be made for students who are academically restricted from re-enrollment or who become medically unable to return for the Spring (or summer if a 12 month contract) semester if written notification is received prior to the beginning of classes for the Spring (or Summer if a 12 month contract).

Withdrawal from the University
Once the University has accepted payment for tuition and fees, a student is considered officially enrolled unless otherwise restricted from enrolling. Stopping payment on a check for fees or allowing the check to be returned unpaid by the bank for any reason does not constitute official withdrawal.

Before classes begin, you may go online to Howdy (http:// howdy.tamu.edu/) and cancel your courses and options for the semester.

After classes begin, you must go through the official withdrawal process in order to cancel your registration for the semester. In Howdy (http:// howdy.tamu.edu/), go to the Student Withdrawal channel on the My Record tab to begin the online withdrawal process. Failure to complete
the withdrawal process will result in forfeiture of any tuition and fee adjustments, and course work may be recorded as incomplete or failed.

Failure to follow procedures for withdrawing from the University may result in financial penalties and delays with future enrollment in the University. Once a student registers, he or she is responsible for the total fees assessed regardless of whether the installment option is used. Refund percentages are applied to total fees assessed and not the amount paid. This means that students who withdraw before paying all installments may, in the event of withdrawal, still owe the University.

International students must visit with an advisor in the International Student Services Office before withdrawing to determine if doing so will affect visa status.

Student athletes should visit with an academic advisor in the Department of Athletics before initiating the withdrawal process.

Recipients of financial assistance should visit with a Scholarships & Financial Aid advisor before withdrawing. Students receiving funds awarded by Scholarships & Financial Aid should be aware of policies (http://financialaid.tamu.edu/Undergraduate/Maintaining-Eligibility/#2-Withdrawals) regarding withdrawal from the University. Federal regulations require a return calculation for all students who receive Title IV student assistance at a post-secondary institution of higher education and withdraw during a payment period (semester). The length of time during which a return must be calculated is up to 60 percent of the payment period. Students withdrawing prior to 60 percent of the payment period may be required to return disbursed funds not earned. Additionally, students who do not successfully complete courses for the semester may be considered unofficially withdrawn and may be subject to a return calculation or all disbursed funds being returned if attendance cannot be documented. Eligibility for state and institutional funds may also be impacted by withdrawing from the University.

Drops and withdrawals are considered unsuccessfully completed coursework when determining Satisfactory Academic Progress (http://financialaid.tamu.edu/Undergraduate/Maintaining-Eligibility/) (SAP) and will impact completion rate.

Allocating Returned Title IV (Federal Aid)
Funds that are returned to the federal government due to student withdrawal are used to reduce the outstanding balances in individual federal programs.

Financial aid returned (by the University and/or the student or parent) must be allocated in the following order:

1. Unsubsidized Federal Direct Loan
2. Subsidized Federal Direct Loan
3. Federal Perkins Loan
4. Direct Graduate Plus (Student) Loan
5. Federal Direct PLUS (Parent) Loan
6. Federal Pell Grant
7. Federal Supplemental Educational Opportunity Grant (FSEOG)
8. TEACH Grant
9. Other federal loan or grant assistance
10. Other state or institutional financial aid programs

State and institutional aid awards will be calculated using the same percentage proration used by Student Business Services to determine the amount of tuition and fees to be charged to a withdrawn student.

Additionally, students who do not successfully complete courses for the semester may be considered unofficially withdrawn and may be subject to a return calculation if attendance cannot be documented.

Unclaimed Refunds
According to federal law, the university is required to return Title IV funds that have not been claimed (i.e., refund check that has not been cashed) within 240 days of issue. These funds will be returned to the appropriate federal financial aid program.

Rebates
Tuition Rebates After Graduation
Certain undergraduate students who attempt no more than three hours in excess of the minimum number of semester credit hours required to complete the degree under the catalog under which they were graduated may be entitled to a $1,000 tuition rebate after graduation. Several conditions apply and students must meet all of the specified criteria. If you wish to try and qualify for this program, please see the Office of the Registrar (http://registrar.tamu.edu) website for a complete set of student and institutional responsibilities and other criteria.

Financial Assistance and Scholarships
The mission of Scholarships & Financial Aid is to provide students with information and financial resources to attend Texas A&M University along with support programs that promote higher education and developmental opportunities. As a part of this commitment, we strive to provide financial solutions to students at all income levels and with varying academic, merit, and leadership qualifications.

The need-based financial assistance program is designed for students who have a demonstrated financial need, as defined by the Free Application for Federal Student Aid (FAFSA) or other applicable application, in order to assist students in paying college expenses. All financial aid is contingent upon student enrollment and making Satisfactory Academic Progress (SAP), as defined by Scholarships & Financial Aid or the specific aid program.

Financial aid is available in two forms: Gift Aid and Self-help.

<table>
<thead>
<tr>
<th>Gift Aid</th>
<th>Self-Help</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grants (Federal, State, Institutional)</td>
<td>Loans (Federal, State, Institutional, Alternative)</td>
</tr>
<tr>
<td>Scholarships</td>
<td>Student Employment (Work Study, Part-time Employment, Internships, Assistantships)</td>
</tr>
</tbody>
</table>

Non-resident Tuition Waivers
Texas A&M University’s packaging philosophy for need-based financial aid is to provide the greatest amount of gift aid to those students with the highest demonstrated need and to keep loan liability to a minimum. Financial aid is awarded on a first-come, first-served basis based on priority dates published on financialaid.tamu.edu (http://financialaid.tamu.edu/).

To apply for financial assistance, an eligible student must submit a Free Application for Federal Student Aid (FAFSA). The FAFSA becomes available on October 1st each year for the next academic year. Students are encouraged to submit their FAFSA online at https://fafsa.gov as
soon as possible. Students who do not meet the citizenship eligibility requirements to complete the FAFSA may be eligible to submit the Texas Application for State Financial Aid (TASFA) or the International Student Financial Aid Application (ISFAA). Only students who have been accepted for enrollment, have a FAFSA or other financial aid application on file, and have submitted all requested documentation to Scholarships & Financial Aid will be sent a financial aid offer. Award offers for incoming students beginning in the Fall semester are made early in the preceding Spring semester. Award offers for incoming students beginning in the Spring semester are made late in the preceding Fall semester. Award offers to continuing students for the upcoming academic year are made after Spring semester grades have been submitted. Summer financial assistance is offered to students with a FAFSA on file who enroll at least half-time in summer coursework at Texas A&M.

Financial aid offers are made based on the assumption that students will enroll full-time in the Fall and Spring semesters. Cost of attendance and awards will be adjusted for students who are enrolled less than full-time at Texas A&M University or through the Texas A&M-Blinn TEAM Program, the Texas A&M Engineering Academy at Blinn-Bryan, or another approved consortium program. Students may only receive federal financial aid for eligible courses that count towards the program of study. State and Institutional Aid are not subject to the same regulatory restrictions. However, the cost of attendance for students will be reduced for courses that are not counting to the program of study, which can result in a lower amount of state and institutional aid a student could receive. Financial aid awards may also be adjusted if a student does not begin attendance in all courses in which he or she is registered.

Student inquiries may be directed to:

Scholarships & Financial Aid

Please visit our website (http://financialaid.tamu.edu) for the most current information on financial aid applications, programs, and any associated deadlines.

Grants
The Federal Pell Grant is available to undergraduate students who have not received a baccalaureate degree and who have demonstrated financial need as determined by the FAFSA. The Federal Pell Grant provides a foundation of financial assistance to which aid from other sources may be added.

The Federal Supplemental Educational Opportunity Grant (FSEOG), and the Texas Public Education Grant (TPEG) are available to students, provided the results of their financial aid application show evidence of financial need and funds are available. These funds are awarded on a first-come, first-served basis.

The Towards EXcellence, Access and Success (TEXAS) grant is available to eligible Texas residents who have requisite levels of financial need according to the FAFSA and have met the remaining program criteria (http://financialaid.tamu.edu/Undergraduate/Types-of-Aid/#0-TEXASGrant); it is also subject to funds availability and eligibility guidelines as defined by the Texas Higher Education Coordinating Board.

Additionally, Texas A&M University provides institutional grant aid to eligible students to assist with educational expenses. Student grants are subject to fund availability and may be single-year or multi-year awards.

Student Part-Time Employment
The Student Employment Office in Scholarships & Financial Aid coordinates student part-time employment, both off- and on-campus in the Bryan/College Station area. Students may visit the online job database. Work Study, assistantships and other part-time positions are posted. Students secure their own employment through job referrals provided by Scholarships & Financial Aid or through their own initiative. Employment advising is available to students who have not had previous job seeking experience.

On-campus student employees are paid minimum wage or higher and are paid bi-weekly along with regular University employees. University student employees are not eligible for paid holidays, retirement, vacation, nor sick leave.

Professional development workshops are available for student employees and supervisors of student employees. These free workshops include topics ranging from communication skills to preventing sexual harassment in the workplace and from customer service to workplace etiquette. For more information or to register, please visit the Jobs for Aggies website (http://jobsforaggies.tamu.edu) or call (979) 845-0686.

The Federal/Texas College Work Study Programs
Federal and state programs provide part-time employment for U.S. citizens, permanent residents and eligible non-citizens, within fund limitations, who have an established financial need and desire on-campus employment.

To qualify for the Federal/Texas College Work Study Programs, a student must have submitted a financial aid application, have financial need, be eligible to work in the United States, be enrolled at least half-time or accepted for enrollment and be making Satisfactory Academic Progress if enrolled.

The Community Service Program allows students who qualify for the Federal Work Study Program to work part-time with participating local non-profit, governmental and community-based organizations. This program is designed to improve the quality of life for community residents, particularly low-income individuals, or to solve problems related to community needs.

The Texas A&M University Reads and Counts program is a partner of the national Every Student Succeeds Act (established initially as a part of the No Child Left Behind initiative). It is based on the philosophy that children are our nation’s greatest asset. It calls all Americans to support teachers and help ensure that every child can read well by the end of the third grade. Eligible and dedicated college students are called to serve as reading and math tutors, as well as mentors and role models for area elementary and middle school students.

All Work Study students are paid minimum wage or higher, work an average of 20 hours per week, and are not eligible for paid holidays, retirement, vacation, nor sick leave. For more information on Federal/ Texas College Work Study, the Community Service Program, or Texas A&M University Reads and Counts, visit the Student Employment Office on the second floor of the Pavilion or the Jobs for Aggies website (http://jobsforaggies.tamu.edu).
Loan Programs
The Federal Direct Loan Programs are available to students who have submitted a FAFSA. Students will be notified of their eligibility for the Direct Loan program(s) through a financial aid offer.

Students and parents seeking the Parent Loan for Undergraduate Students (PLUS) may obtain information from the financial aid website (http://financialaid.tamu.edu). This program requires the FAFSA to be on file with Scholarships & Financial Aid.

Short-term loans are available to provide assistance to students who experience temporary financial difficulties with educationally related expenses. Funding for this program is provided by The Association of Former Students, the Class of 1926 and other University resources. This program is not intended to provide long-term assistance or to replace other assistance available through Scholarships & Financial Aid. Students must be degree-seeking and enrolled at least half-time to be eligible for short-term loans.

The Emergency Tuition and Required Fees loan program is available to help students pay their Texas A&M University tuition and required fees. The loan is applied directly to the student's tuition and fee account.

Please refer to our website (http://financialaid.tamu.edu) for detailed information on all of the aforementioned programs and more.

The Money Education (ME) Center

The Money Education (ME) Center provides Aggies with the education and resources they need to make smarter personal finance decisions during college so that they can lay a foundation of financial success for a lifetime. Through the following resources, the ME Center teaches Aggies about budgeting, saving and banking, building and protecting credit, investing, buying a car and home, and more. The ME Center offers the following services and resources:

- Foundations of Money Education Course (AGEC 235)
- Scheduled Appointments
- Walk-in Advising
- Scheduled Presentations
- Class Presentations
- Student Group Presentations
- Resource Tables
- Online Resources

To learn more about these free resources, visit money.tamu.edu (http://money.tamu.edu/) or contact money@tamu.edu.

Scholarships

College/Departmental Level Scholarships
A number of colleges and departments at the University award scholarships to students interested in particular major fields of study on the basis of academic record, service, activities, and demonstrated leadership. The value of the awards vary, and the term of scholarships range from one to four years. Awarding college and department select recipients based upon criteria. Completed scholarship applications must be received no later than specified deadlines. Awards are typically announced mid-spring for the following academic year. For more information, please visit https://u.tamu.edu/CollegeDepartmentScholarships (https://u.tamu.edu/CollegeDepartmentScholarships/)

Incoming Freshmen Scholarship Programs

Opportunity Awards are awarded to freshmen based on academic achievement, leadership ability, extracurricular participation, and, in some cases, financial need.

Achievement Scholarships are available to incoming freshmen who attended and graduated from targeted high schools in the State of Texas. Scholarships include the President’s Achievement Scholarship and Century Scholars. Awards are based on academic achievement, leadership ability, and extracurricular participation.

Academic Scholarships are available to incoming freshmen who achieve a minimum SAT/ACT score eligibility requirements. Scholarships include the President’s Endowed Scholarship, Lechner Scholarship, and McFadden Scholarship. Awards are based on academic achievement, leadership ability, and extracurricular participation.

For more information on Freshman Scholarships, visit https://uwide.tamu.edu

Continuing Student Scholarships

The University Scholarship Application is available to students with at least one semester completed at Texas A&M. Awards range in value from $500 to $1,500 and are available to undergraduate, graduate, and professional students currently enrolled at Texas A&M. Some awards are limited to certain fields of study and to individuals who have attained a necessary academic classification, while others are unrestricted. Awards are made to outstanding students based on a combination of academic achievement, campus/community involvement, campus leadership roles, and, for some scholarships, financial need. In addition to scholarships offered through the Scholarships & Financial Aid office, many colleges, departments, the Corps of Cadets, and the Texas A&M Foundation use the University Scholarship Application for award consideration. Students are encouraged to complete the University Scholarship Application beginning in October. The deadline for submitting applications is February 1, prior to the academic year for which the student will be awarded.

For more information on Continuing Student Scholarships, visit http://sfaid.tamu.edu/uwideapp/

Transfer Student Scholarships

Aggie Transfer Student scholarships are designed to recognize outstanding students who transfer to Texas A&M University. Scholarships are awarded based on a combination of academic achievement, extracurricular activities, campus involvement at their current institution, leadership, major and, in some instances, financial need. In addition to scholarships offered through the Scholarships & Financial Aid office, many colleges, departments, the Corps of Cadets, and the Texas A&M Foundation use the transfer scholarship application for award consideration.

For more on Transfer Student Scholarships, visit https://u.tamu.edu/TransferScholarships (https://u.tamu.edu/TransferScholarships/)

Scholarship Recipients and Non-Resident Tuition Waivers
The Non-Resident Tuition Waiver for Competitive Scholarship Recipients, authorized under the Texas Education, is an optional waiver that institutions can implement. An eligible non-resident student who holds a competitive academic scholarship of a specified minimum dollar amount for the academic year or summer for which the student is enrolled may be
eligible to pay the fees and charges required of Texas residents without regard to the length of time the student has resided in Texas. The student must have competed with other students, including Texas residents, for the scholarship and the scholarship must be awarded by a Texas A&M University college or departmental scholarship committee or university representative.

More information is available at https://u.tamu.edu/NonResScholarshipWaiver (https://u.tamu.edu/NonResScholarshipWaiver/)

For additional information on scholarships, please visit https://scholarships.tamu.edu/ or email scholarships@tamu.edu.
UNIVERSITY POLICIES

Aggie Honor Code (p. 110)

Intellectual Property (p. 110)

Responsible Conduct of Research (p. 110)

Student Grievances and Appeals Procedures (p. 111)

University Statement for Individuals with Disabilities (p. 111)

University Statement on Harassment and Discrimination (p. 112)

University Student Rules (p. 112)

Aggie Honor Code

Integrity is a fundamental core value of Texas A&M University. Academic integrity requires a commitment by all faculty, students, and administrators to:

- Remain constantly focused on the quality of the academic programs;
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University degrees;
- Demand high academic standards from all members of the Aggie community.

All Texas A&M University students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

"An Aggie does not lie, cheat, or steal or tolerate those who do."

Upon accepting admission to Texas A&M University or one of its branch campuses, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Honor System.

The Honor System Office is charged with promotion of the honor code and administration of academic misconduct cases. The Honor Council, comprised of students and faculty from colleges and offices across the University, will investigate all such infractions of the honor code and recommend appropriate sanctions. The website, http://aggiehonor.tamu.edu, defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations — 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations — Ethics in Research, Scholarship and Creative Work — 15.99.03 (https://www.tamus.edu/legal/policy/policy-and-regulation-library/), and Texas A&M University rules and standard administrative procedures — Responsible Conduct in Research and Scholarship — 15.99.03.M1, 15.99.03. M1.01-06 (http://rules-saps.tamu.edu/TAMURulesAndSAPs.aspx#15)).

Contact information for each campus can be found at the following:

Intellectual Property

The ownership, management and commercialization of system-owned Intellectual Property and Tangible Research Property are set forth in System Policy 17.01 Intellectual Property Management and Commercialization. Intellectual Property will mean, collectively, all forms of intellectual property including, but not limited to, issued patents, patentable inventions, copyrightable works, trademarks, mask works, and trade secrets. The system recognizes and affirms the traditional academic freedom of its faculty and staff to publish pedagogical, scholarly or artistic works without restriction. In keeping with this philosophy, the system does not claim copyright to pedagogical, scholarly or artistic works, regardless of their form of expression, unless required by a funding or research contract. Such works include, but are not limited to, copyrightable works of students created in the course of their education, such as dissertations, papers and journal articles. Authors of copyrightable works that are not owned by the system, its members, or another party such as a research sponsor, own the copyright in their works and are free to publish them, register the copyright, and receive any revenues which may result.

Accordingly, copyrightable works may be owned by the student/author/creator, by multiple individuals (such as a research team or co-authors of a publication), by the System, by a System member, or by another party such as a research sponsor. Factors that require consideration in determining ownership include:

1. whether or not the intellectual property was conceived or developed as a result of activities related to an individual's employment responsibilities and/or with support from University-administered funds, facilities or personnel;
2. whether or not the intellectual property was conceived or developed in the course of, or resulting from, research supported by a grant or contract with the federal government or state government or a nonprofit or for-profit nongovernmental entity; and,
3. the individual collaborators, relative contributions of each individual, and agreements among creators of the work.

It is required that the student identify in the thesis, dissertation or record of study any collaborators, contributors, and sources of financial support (unless prohibited through contractual agreements) in carrying out the research or in publications presented in the thesis/dissertation/record of study. It is also required that the student clearly indicate what the student’s independent contributions were to the work. The advisory committee is responsible for ensuring that the student’s independent contribution is sufficient to represent a thesis, dissertation, or record of study.

Responsible Conduct of Research

Students who will be involved in research involving human subjects (e.g., survey data; human tissue/cell lines, protected health information), animals (e.g., vertebrate animals, animal tissues/cell lines), and/or
biosafety/biohazards (e.g., recombinant DNA/transgenic animals, plants; agents infectious to humans, animals or plants) should obtain approval through the appropriate university committee (or be included in existing research approvals) prior to engaging in the research. Engaging in unauthorized research can result in severe penalties for non-compliance. All students are urged to complete responsible conduct of research training early in their programs to support their efforts in conducting research responsibly and ethically.

Additional information, as well as online training, may be obtained from the office of Research Compliance and office of Biosafety at http://rcb.tamu.edu (http://rcb.tamu.edu/).

**Student Grievances and Appeals Procedures**

Specific procedures at Texas A&M University allow students to pursue a grievance for any of the problems, issues, or concerns listed in the table below. **BEFORE** initiating a grievance, students are strongly encouraged to seek clarification and advice regarding appropriate procedures. The Office of the Associate Provost for Undergraduate Studies provides Undergraduate Ombuds services (p. 89) to assist students, faculty, staff, and administrators with resolving academic conflicts on an informal and confidential basis. These are valuable resources for questions regarding grievances and appeals.

Undergraduate Studies’ units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

**University Statement for Individuals with Disabilities**

Texas A&M University (TAMU) is committed to maintaining an accessible campus community and providing reasonable accommodations to qualified students, faculty, staff and visitors, including making its web sites accessible and usable. TAMU does not discriminate on the basis of an individual’s disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended.

Students are protected from discrimination regarding access to and participation in TAMU’s programs and activities. TAMU provides academic adjustments and auxiliary aids to accommodate needs of students with disabilities, as defined under the law, who are otherwise qualified to meet the institution’s academic requirements.

Students with disabilities who would like to request accommodations may contact the following:

- TAMU, Texas A&M Health's (TAMH) College of Nursing, Irma Lerma Rangel College of Pharmacy College Station, College of Medicine, and School of Public Health should contact Disability Resources (979) 845-1637 or disability@tamu.edu.
- TAMH College of Dentistry should contact the Office of Academic Affairs (214) 828-8978 or bramsey@tamu.edu to request accommodations.
- TAMU School of Law should contact the Office of Student Affairs at (817) 212-4020 to request accommodations.
- TAMH Irma Lerma Rangel College of Pharmacy in Kingsville should contact the Disability Resource Center at TAMU at Kingsville at (361) 593-3024 to request accommodations.
- TAMU at Galveston (TAMUG) should contact Counseling and Career Services at (409) 740-4736 or studentservices@tamu.edu.
University Policies

• TAMU at Qatar (TAMUQ) should contact the campus psychologist, Dr. Steve Wilson +974-4423-0047 or stephen.wilson@qatar.tamu.edu.

Students with a disability who believe they have experienced discrimination may contact Kevin McGinnis, Chief Risk, Ethics, and Compliance Officer, at the J. K. Williams Building, Suite 302, College Station, TX 77843, civilrights@tamu.edu, or at (979) 458-0308. Students can also contact the TAMU ADA Coordinator at ADA.Coordinator@tamu.edu or (979) 845-8115, or any of the following campus contacts:

• TAMU, TAMU School of Law, and TAMH locations should contact the ADA Coordinator at (979) 845-8115 or ADA.Coordinator@tamu.edu.

• TAMUG should contact the ADA Coordinator at (409) 740-4503 or boyerj@tamug.edu.

• TAMUQ should contact Miguel Trevino at +974-4423-0317 or miguel.trevino@qatar.tamu.edu.

For more information about disability accommodations, see TAMU Student Rule 46, Disability Accommodations in Academic Programs (http://student-rules.tamu.edu/rule46/) or TAMUG Student Rule 46, Disability Accommodations in Academic Programs (http://www.tamug.edu/studentrules/Student_Grievance_Procedures/46_Disability_Accommodations.html).

University Statement on Harassment and Discrimination

Texas A&M University is committed to providing a safe and non-discriminatory learning, living, and working environment for all members of the University community. The University provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation, or gender identity. Texas A&M University will promptly investigate and resolve all complaints of discrimination, harassment (including sexual harassment), and related retaliation in accordance with applicable federal and state laws and University rules and standard administrative procedures.

The University’s response to allegations of discrimination, harassment, and related retaliation will be 1) prompt and equitable; 2) intended to prevent the recurrence of any discrimination, harassment or retaliation; and 3) intended to remedy its discriminatory effects, as appropriate. A substantiated allegation of such conduct will result in disciplinary action, up to and including separation from the University. The University’s student sanctioning guidance for substantiated allegations of discrimination on the basis of sex, including sexual harassment, sexual violence and related retaliation, can be found here: Title IX Cumulative Sanctioning Matrix (https://urc.tamu.edu/media/1601574/title-ix-sanctioning-matrices-august-2018.pdf).

Students who have questions or believe they have experienced discrimination, harassment, sexual violence, and/or related retaliation are encouraged to contact Kevin McGinnis, Chief Risk, Ethics, and Compliance Officer, at the J. K. Williams Building, Suite 302, College Station, TX 77843. He may be contacted at civilrights@tamu.edu or at (979) 458-0308.

In addition, any report can be submitted to Jennifer Smith, Title IX Officer, at the Medical Sciences Library, Suite 007, College Station, TX 77843. Her telephone number is: (979) 458-8167 and email address is civilrights@tamu.edu. Such reports will be immediately forwarded to the Chief Risk, Ethics, and Compliance Officer for investigation and resolution. The Title IX website can be found at http://urc.tamu.edu/title-ix/.

To report incidents, request accommodations, or inquire about discrimination based on disability, you may contact Peggy Zapalac, ADA Coordinator, at (979) 845-8115 or ADA.Coordinator@tamu.edu. The office address is 750 Agronomy Road, Suite 2101, College Station, TX 77843 or see the ADA website at https://urc.tamu.edu/ada/). Reported allegations of discrimination will be immediately forwarded to the Chief Risk, Ethics, and Compliance Officer for investigation and resolution.

University Student Rules

Each student enrolled at Texas A&M University is responsible for being fully acquainted with and complying with the Texas A&M University Student Rules. Specific rules, information and procedures may be found in publications pertaining to each particular service or department. Students are encouraged to reference the website at http://student-rules.tamu.edu (http://student-rules.tamu.edu/) for current published rules and regulations.

For information concerning federal and state policies, please reference the appendices (p. 1299) in this catalog.
INTERNATIONAL OPPORTUNITIES FOR STUDENTS

Education Abroad

http://abroad.tamu.edu (http://abroad.tamu.edu/)

Texas A&M University is committed to providing access to high impact international opportunities for all students. The ability to engage successfully across cultures and the development of international leadership skills and global awareness are crucial for success as graduates enter the work force and commit to lifelong learning.

Texas A&M Education Abroad provides access for all Texas A&M students to a broad range of transformational and international experiences lasting from one week to an academic year. Last year, over 5,800 students participated in study, intern, volunteer, and research opportunities in over 100 different countries. Our office also contributes to the development of on-campus experiences that foster cultural awareness.

Students are encouraged to visit Education Abroad, located on the 1st floor of the Pavilion, any weekday from 8 am – 5 pm for additional information. It is also important to consult with your academic advisor to identify courses to take abroad.

Faculty-led and Field Trip Programs

Programs led by a Texas A&M faculty member designed around specific A&M courses. To find the most recent offerings, visit http://abroad.tamu.edu/Program-Types/Faculty-led (http://abroad.tamu.edu/Program-Types/Faculty-led/).

Exchange Programs

Pay tuition at Texas A&M but “switch places” with counterparts at one of our foreign partner universities. Students can learn more about our exchange partners at http://abroad.tamu.edu/Program-Types/Exchange (http://abroad.tamu.edu/Program-Types/Exchange/).

Affiliate Provider Programs

Pursue a study, intern, volunteer, or research program through one of our third-party affiliate providers. Learn more at http://abroad.tamu.edu/Program-Types/Affiliate-Provider-Programs (http://abroad.tamu.edu/Program-Types/Affiliate-Provider-Programs/).

Intern and Volunteer

Students have a variety of options for credit or non-credit intern or volunteer abroad programs through Texas A&M offices and student organizations as well as third-party affiliate providers. Visit Education Abroad to learn more.

Research and Conferences

Texas A&M faculty engage in research around the world. Students who join faculty to research overseas, who develop independent research opportunities, or attend conferences, must also register with Education Abroad. Learn more at http://abroad.tamu.edu/Program-Types/Independent-Travel (http://abroad.tamu.edu/Program-Types/Independent-Travel/).

Other Opportunities

Students going abroad on a program not organized by a Texas A&M office or department or through an affiliate provider must complete the Independent Travel Registration (http://abroad.tamu.edu/Program-Types/Independent-Travel/) if one or more of the following applies:

• Receiving credit (TAMU or transfer) for the experience
• Receiving any support from a TAMU entity (e.g. funding or arranging experience)
• Satisfying a degree or graduation requirement (e.g. thesis or dissertation research)
• Representing Texas A&M University in any way

Funding to Go Abroad

Federal and other financial aid may be adjusted to accommodate for extra costs associated with credit-bearing international experiences. Students interested in exploring funding options should discuss this with your academic department, your education abroad advisor, and Scholarships & Financial Aid. Learn about funding available through Texas A&M, locally and nationally, and from affiliate providers at http://abroad.tamu.edu/Funding (http://abroad.tamu.edu/Funding/).

University Locations Abroad

Texas A&M has a research and education center in Costa Rica as well as a campus in Qatar.

The Soltis Center for Research and Education in north-central Costa Rica was established in January 2009 to support research, education, and outreach throughout Central America. The unique physical and cultural setting of the center provides students and faculty with research and educational opportunities in tropical ecology, civil engineering, ecosystem sciences, geosciences, public and rural health and agricultural economics.

Texas A&M’s branch campus in Qatar, part of the 2,500-acre multi-institutional campus known as Education City formally opened on September 7, 2003. Texas A&M University at Qatar is fully funded by the Qatar Foundation for Education, Science, and Community Development and provides a unique opportunity for the University to expand its international presence and provide educational and research opportunities for all faculty and students. Learn more at http://qatar.tamu.edu (http://qatar.tamu.edu/).

On Campus Engagement

Students don’t have to go abroad to take advantage of international opportunities offered by Texas A&M. Students who remain on campus are encouraged to participate in many options available including the following:

• Center for International Business Studies (http://cibs.tamu.edu/)
• Corps Global Leadership Initiatives (http://corps.tamu.edu/global/)
• Halliburton Engineering Global Programs (http://engineering.tamu.edu/global/)
• MSC L.T. Jordan Institute for International Awareness (http://ltjordan.tamu.edu/)
• MSC SCONA (http://scona.tamu.edu/)
• Norman Borlaug Institute for International Agriculture (http://borlaug.tamu.edu/)
• Public Policy Internship Program (http://ppip.tamu.edu/)
• Scowcroft Institute of International Affairs (http://bush.tamu.edu/scowcroft/)
• Student Organizations (http://studentactivities.tamu.edu/app/organization/) – To find internationally focused student organizations, visit http://studentactivities.tamu.edu/app/search/index (http://studentactivities.tamu.edu/app/search/index/) and search international.
• Undergraduate Research (http://ugr.tamu.edu/)

Students should consult their department and college advisers for additional opportunities to engage in global education on or off campus.
HONORS AND UNDERGRADUATE RESEARCH

LAUNCH promotes student success by providing high-impact educational experiences and challenges motivated students in all academic disciplines to pursue an enriched, intellectually-stimulating curriculum. LAUNCH joins the university community in making Texas A&M a welcoming environment for all individuals. We are committed to helping our students understand the cultures that set us apart and appreciate the values that bring us together.

Undergraduate Research

LAUNCH: Undergraduate Research promotes, coordinates, creates, and assesses undergraduate programs involving creative scholarship, inquiry, and research in all academic disciplines at Texas A&M. As a recognized “high impact practice,” undergraduate research experiences increase undergraduate student learning and success, not only while students are at Texas A&M, but long after graduation.

In terms of professional and intellectual development, being involved in undergraduate research allows students to participate in a scholarly community of students with common interests, to learn more about their future professional field, and to develop a close working relationship with acclaimed faculty. Research experiences make students more competitive for scholarships, internships, jobs, international opportunities, and admission to top graduate and professional programs. Perhaps most importantly, engaging in undergraduate research allows students to experience the excitement of working collaboratively to create new knowledge, solve cutting-edge problems, and communicate more effectively—life skills that are increasingly valued in our world.

Campus-wide programs coordinated by LAUNCH: Undergraduate Research include the Undergraduate Research Scholars program, the Undergraduate Research Ambassadors, and the publication of Explorations: the Texas A&M Undergraduate Journal. The office offers workshops for undergraduate students on getting started in research, finding summer research opportunities, developing research presentations, and organizing thesis writing, as well as workshops for faculty and graduate students on mentoring undergraduate researchers. LAUNCH: Undergraduate Research also works with groups across campus to promote and facilitate activities that support undergraduate research opportunities, such as Summer Undergraduate Research Experiences, National Science Foundation Research Experiences for Undergraduates (REU) programs, the LAUNCH Undergraduate Research Expo, and the LAUNCH Undergraduate Research Scholars Symposium. Lastly, the office provides assistance for developing externally-funded proposals and implementation of funded projects that have undergraduate research involvement, such as National Science Foundation REU, Beckman Scholars, and Howard Hughes Medical Institute Education grants.

Undergraduate Research Scholars Program

Any junior or senior student with a cumulative Texas A&M GPA of 3.0 or above may apply to the Undergraduate Research Scholars (http://ugr.tamu.edu/UGR/UGRS/) program. Groups of at least two students collaborating as a team on a single project may also apply. The Research Scholars program requires independent research during the Fall and Spring semesters supervised by a faculty advisor that culminates in a scholarly product. The scholarly product may be a research thesis, an accepted article in a professional journal, an exhibit, a performance, or other product as determined by the faculty advisor in collaboration with the LAUNCH: Undergraduate Research Office. Participants are selected for this program based on the quality of their project proposals and their academic records.

Explorations: The Texas A&M Undergraduate Journal

Explorations is an interdisciplinary, student-led journal guided by faculty and administrators that selects and publishes student-authored research, scholarly, and creative pieces of general interest in any area. Explorations is composed of an executive board, editorial board, as well as a marketing and design team made of students that work to accomplish the many facets of editing, publishing, and marketing the journal while representing departmental diversity, critical thought, and creativity. The call for new board members is early in the fall semester each year.

The call for submissions begins in the fall semester and extends into the early spring semester. Manuscripts are submitted in a two-stage process: first, synopses of prospective manuscripts are reviewed by faculty-student teams; second, full-length manuscripts are evaluated in another round of peer review. All authors of accepted pieces are paired with student board members who provide editorial assistance and formatting guidance. Additionally, the Explorations Board extends a call for cover art submissions based on one of the accepted pieces for each volume. Every fall Explorations hosts a journal release event to recognize all who were involved in the making of the latest volume.

Acceptance to the journal is highly competitive—less than 20% of submitted synopses result in published articles. Recently published articles cover a wide range of academic fields: music, creative poetry, forensics, cancer biology, astrophysics, nanomedicine, computer algorithms, business, geosciences, sociology, aerospace engineering, and cultural anthropology. To review recent volumes and to find upcoming deadlines, visit explorations.tamu.edu (http://explorations.tamu.edu/).

Undergraduate Research Ambassadors

Undergraduate Research Ambassadors represent LAUNCH: Undergraduate Research at research, recruiting, and outreach events. Juniors or seniors with an extensive background in research, a GPA of 3.0 or higher, outstanding oral communication skills, and the ability to describe research to a general audience may apply to the program. A cohort of about a dozen Ambassadors are chosen to join existing Ambassadors from multiple disciplines each year. They are trained in presentation and leadership skills and then participate in a variety of activities including meeting with highly-placed members of the University Administration, distinguished faculty, outstanding alumni, prospective students, and parents.

Workshops and Events

LAUNCH: Undergraduate Research offers informational workshops on undergraduate research for undergraduate students, graduate students, and faculty. Additionally, we coordinate numerous public events that celebrate and promote undergraduate research, providing venues for students to present their research projects, for faculty to recruit new student researchers, and for recognition of research efforts by both students and faculty. Workshops and events are publicized through emails, newsletters, and the LAUNCH (http://ugr.tamu.edu/) website.
Grant, Proposal, and Project Assistance

LAUNCH: Undergraduate Research provides a wide variety of support services for undergraduate research programs, proposal development, and implementation. Please contact the office directly for more information.

Other Capstones

LAUNCH: Capstones offers one year Capstone experiences to any junior or senior with a cumulative Texas A&M GPA of 3.0 or above. A listing of capstone options can be found at http://tx.ag/Capstones (http://tx.ag/Capstones/).

The Undergraduate Teacher Scholars program allows students to collaborate closely with a Texas A&M University faculty member to create a one-credit hour seminar or to improve an existing course in collaboration with a faculty expert. The Teacher Scholar will have the opportunity to research, design, and arrange the content of the seminar. The Teacher Scholar will be responsible for the presentation of class material under the supervision of the Texas A&M University supporting faculty member.

The Undergraduate Service Scholars program pairs students with community leaders to develop and carry out projects that benefit the greater community. The Undergraduate Service Scholars capstone allows the student to draw upon their undergraduate education to plan, coordinate, and execute a project aimed at improving the community while learning about issues that affect that community.

The Undergraduate Leadership Scholars program enables student leaders in various organizations to refine their leadership skills and methodologies. In collaboration with their faculty advisor, Undergraduate Leadership Scholars plan and implement improvements to their organization's programming and impact on campus or in the community.

The Undergraduate Performance Scholars program allows students to explore the impact of art on their academic career. Under the supervision of a working artist, students will create a performance project that creatively synthesizes their art and experience.

All capstones require a proposal and timeline, two semesters engaging with the project, supervision by a faculty member or similar expert, a public presentation, regular reflection, and a scholarly project appropriate for the field. Students are selected for participation in these programs based on the quality of their proposals, their academic record and the recommendation of their faculty or community advisor.

Admission to the University Honors Program

Honors Fellows is the university-level Honors distinction offered by the University Honors Program run by LAUNCH: Honors. Students are admitted to the Honors Fellows curriculum on a competitive basis. Incoming freshmen apply as part of their application for admission to the university. Continuing students may apply each spring for entry in the fall prior to completing 60 credit hours at Texas A&M.

Applications are evaluated on the basis of the student's record of academic achievement and demonstrated potential for creativity, intellectual ability, imagination, curiosity, willingness to try new things and self-awareness. Once admitted to the Honors Fellows curriculum, students are designated as “Honors Students” and may then access specific privileges and resources, including additional advising, priority registration, contracting non-honors courses for Honors credit, and enrolling in graduate-level courses for undergraduate Honors credit. Honors Students also receive priority for the Honors Housing Community and advising for competitive national fellowships.

Freshmen admitted to the University Honors Program are required to live in the Honors Housing Community and participate in the Honors first year experience course. To remain in the program, all students (freshman and continuing students) must make progress toward the Honors Fellows distinction and meet minimum co-curricular participation requirements. See the section on Maintaining Honors Status (p. 117).

Honors Fellows Curriculum

To receive the Honors Fellows distinction at graduation, Honors Students must:

- Earn a total of 30 Honors points. Each credit hour of Honors coursework equals 1 point. 21 points must come from Honors courses distributed as follows:
  - Depth: 12 hours in upper-division (300/400-level) courses or graduate courses taken for undergraduate credit
  - Breadth: 9 hours in the Core Curriculum, ICD, or W courses, as specified in the student's catalog
  - Additional honors points to bring the total to 30 points
- Maintain 3.25 GPA in Honors coursework and 3.5 GPA overall (http://registrar.tamu.edu/Transcripts-Grades/How-to-Calculate-GPA/).
- Annually update an ePortfolio
- Practical Application: Complete an Honors Capstone experience (http://honors.tamu.edu/Capstones/).

The University Honors Program works with academic departments across the university to ensure that appropriate Honors courses are offered. Honors courses have limited enrollment and encourage participatory learning. In Honors classrooms, students work closely with many of the University's most acclaimed faculty. Material in Honors courses is intended to provide increased breadth, depth, and complexity, not simply more work or greater difficulty. Honors classes may be special sections of regularly offered courses or courses developed specifically for Honors Students. Students are encouraged to visit regularly with University Honors Program advisors to ensure that their course selection meets both degree and Honors curriculum requirements.

Honors Students are afforded other avenues to earn Honors credit in addition to regularly offered Honors courses. Honors Students may contract for Honors credit or take graduate courses that count toward undergraduate degree requirements. Honors Students should consult with University Honors Program advisors about these opportunities.

Honors Students are expected to annually reflect in an ePortfolio on how their long-term goals are connected to their values and how their education, both in and out of the classroom, is preparing them to meet those goals. For more details, see http://tx.ag/ePortfolio (http://tx.ag/ePortfolio/).

To complete Honors Fellows curriculum requirements, Honors Students must complete a capstone experience. The requirement may be met by engaging an academic research project in the Undergraduate Research Scholars Program, by preparing and teaching a seminar or adding enriching material to an existing course as part of the Undergraduate Teacher Scholars Program, by undertaking a community service project as a participant in the Undergraduate Service Scholars Program, by developing an enhancement project for a student organization through the Undergraduate Leadership Scholars Program, creating an
artistic performance through the Undergraduate Performance Scholars program, or by completing a capstone project designated by their home department that meets expectations described at http://tx.ag/Capstones (http://tx.ag/Capstones/). Students should consult with a University Honors Program advisor in the planning stages to seek approval for their capstone experience.

Honors Students with unique intellectual interests and specific educational goals may also “major” in Honors by pursuing the innovative University Studies – Honors (USHN) degree. Students may combine a range of related academic areas into a coherent degree plan by designating an “area of concentration” in combination with two established minor fields of study. The formulation of the degree plan requires students to conceptually link their course selection to a specific “problem” that will be addressed in a capstone thesis.

**Maintaining Honors Status**

To remain in the Honors Fellows curriculum, Honors Students must:

1. Maintain a 3.5 cumulative GPA,
2. Maintain a 3.25 GPA in honors coursework,
3. Make progress toward curriculum requirements by taking at least 6 Honors credits per year,
4. Fulfill annual co-curricular participation requirements,
   a. Freshmen: Live in Honors Housing Community (or obtain a waiver) and participate in the Living Learning Program course (UGST 181 Honors Family Meeting), and
   b. Continuing Students: Participate in at least two Honors Student Council events each semester, with at least one designated as academic/intellectual.
   c. All: Prepare or update an ePortfolio on an annual basis.

Honors Students who fail to meet any of these requirements will be given a semester of probation to correct any deficiencies. Honors Students who fail to meet requirements after a semester of probation will be dismissed from the program.

**University Scholars**

The University Scholars program identifies students who embody academic leadership and enhances the personal, professional and intellectual development of these students.

University Scholars receive a scholarship stipend and participate in a number of development activities, including the University Scholar Exploration Series, which are intimate discussion-based seminars offered on a wide variety of topics. Additionally, University Scholars serve as ambassadors for LAUNCH at Texas A&M University, representing the office at outreach events and in publicity materials.

Each spring semester, eligible freshmen are invited to apply for the University Scholar program. The application process involves an extensive written application and, for the approximately 40 students selected as semi-finalists, an in-depth interview. In the end, approximately 10 students are invited to join the University Scholar program.

Freshmen who meet the eligibility criteria for the program will be contacted via their official Texas A&M University email accounts at the start of the Spring semester. Students with questions about eligibility should contact LAUNCH.

**Honors Student Services**

Honors students have access to numerous special services and programs. Throughout the academic year, LAUNCH: Honors coordinates recreational and community-building events, lectures and workshops. Honors students are invited to engage in leadership opportunities and contribute to the development of the University Honors Program through Honors Student Council, the University Scholars program, and as members of the Honors Housing Community.

Honors students can take advantage of supplemental advising to help them identify ways to enrich their college experience and complete the requirements for the prestigious Honors Fellows distinction. Throughout their time in the University Honors Program, students are encouraged to take on challenging and enriching experiences such as undergraduate research, study abroad, service learning, capstone experiences, and application to nationally-competitive scholarships and fellowships. This program is uniquely designed to make Honors students good candidates for opportunities coordinated through LAUNCH: National Fellowships. These include scholar programs such as the Rhodes, Truman, and Goldwater Scholarships. They also include other prestigious opportunities such as the Fulbright Program for U.S. Students and the National Science Foundation Graduate Research Fellowship Program.

Information about upcoming opportunities for Honors students appear regularly in our email bulletins (https://listserv.tamu.edu/cgi-bin/wa/?A0=honors-l).

**Services for All Students**

LAUNCH challenges all motivated and high-achieving Texas A&M students to explore their world, expand their horizons and excel academically. While some services of the office are exclusive to Honors Students, advisors are available to talk with any undergraduate student who is interested in sampling the academic challenge of an Honors course, committing to an undergraduate research project, applying to the University Honors Program or engaging the process of self-discovery entailed in preparation for national fellowships. Students interested in applying to nationally competitive scholarships like the Rhodes, Marshall, Goldwater, and Fulbright U.S. Student Program should visit our list of fellowship opportunities (http://tx.ag/natlFellows/) and make note of instructions for our campus application processes.

Continuing students with a minimum 3.5 cumulative GPA who have not applied or not been accepted to the Honors Fellows program may enroll in honors coursework during their assigned registration time. Students who would like to meet with a University Honors Program advisor may sign up for an appointment through our online appointment system (https://tamucampus.eab.com/https://tamucampus.eab.com/ (http://tx.ag/HonorsAdvising/)). All students interested in the services offered by LAUNCH are encouraged to sign up for the Honors weekly email bulletin.

**Graduation with Honors**

All Honors courses are designated on a student's transcript demonstrating to future employers or graduate and professional admissions committees that the student has engaged with an enriched, challenging curriculum. Students who complete the Honors Fellows curriculum and/or complete the Undergraduate Research Scholars program have these distinctions noted on their transcripts.

Undergraduates in some academic colleges and departments may pursue additional transcript distinctions (See http://honorsprograms.tamu.edu (http://honorsprograms.tamu.edu/)). These
distinction requirements work in parallel with the Honors Fellows plan but are separate and distinct from the University Honors Program. Many students elect to graduate with multiple distinctions from the university, college, or departmental offerings. In general, all Honors transcript distinctions require that the student complete a substantial body of Honors coursework, hold a minimum cumulative Texas A&M GPA of 3.5, and a cumulative Honors course GPA of 3.25, and meet other program participation requirements. Students are encouraged to work through their college and/or departmental advisor to ensure satisfactory completion of the distinction requirements.

These Honors transcript distinctions are separate and distinct from “Latin Honors” such as *cum laude, summa cum laude* or *magna cum laude* which are conferred by the Office of the Registrar and are based upon cumulative GPA and residency requirements (See http://registrar.tamu.edu/Graduation-Degree-Programs/Graduation-Diplomas/Graduation-with-Honors/).

*Undergraduate Studies’ units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.*
Transition Academic Programs

Transition Academic Programs (TAP) provides academic advising and administrative support for students transitioning between majors, as well as programming for students transitioning from high school to college. Campus-wide TAP programs include the Texas A&M-Blinn TEAM co-enrollment partnership with Blinn College (TEAM), the Aggie Gateway to Success provisional admission program (Gateway), and the General Studies transitional major.

Academic Advising for Students in Transition

Students in the TEAM and Gateway programs are supported by TAP academic advisors for the length of those programs. Continuing students approved to enter TAP for one semester to qualify for entry to a different degree-granting major are temporarily classified as "General Studies" majors. A TAP academic advisor will help each General Studies student develop a realistic academic plan for transitioning into a specific major and progressing toward timely graduation.

Aggie Gateway to Success

Qualified students are selected for provisional admission by the Office of Admissions to participate in the Aggie Gateway to Success (AGS or Gateway) program as General Studies students. Students participating in this mandatory program are assigned 6 hours of University Core Curriculum courses plus a study skills class during the second summer session (July-August) prior to their first fall semester at Texas A&M University. They participate in peer-mentor led groups and must reside on campus during the summer. Participating students must attend a designated New Student Conference. Gateway students may apply for summer Financial Aid.

Students who pass all assigned summer courses with at least a 2.0 grade point average and no failing grades earn the right to continue as fully admitted students for the fall semester. They gain the opportunity to earn acceptance into any major program for which they meet regular change of curriculum requirements. Gateway students are advised by Transition Academic Programs advisors about the best way to complete these requirements.

The Texas A&M-Blinn TEAM Program

The Texas A&M-Blinn TEAM Program (TEAM) is a collaborative, co-enrollment partnership between Texas A&M University and Blinn College. To be considered for selection to the TEAM program, a prospective student must apply for regular freshman admission and meet all admission criteria. Participating TEAM students enroll in a minimum of 12 total credit hours per semester, divided between Texas A&M and Blinn. TEAM students are able to transition into degree-granting majors at Texas A&M via the change of curriculum process if they satisfy benchmark credit and grade point criteria at both schools, and complete departmental entry requirements. It is sometimes possible for TEAM students to transition to full enrollment at A&M in less than two years. TEAM students are able to access student services and programs on both campuses, to include participation in the Corps of Cadets and Greek Life. They may apply for on-campus housing at A&M, as well as financial aid (based upon their combined credit hours from both schools).

FOCUS Learning Community

FOCUS is a learning community that allows first-year students to discover more about themselves while building a foundation for a successful undergraduate experience. Students who participate in FOCUS are Regents’ Scholarship recipients who are pursuing degrees in the College of Agriculture and Life Sciences, College of Veterinary Medicine and Biomedical Sciences, and the Texas A&M Health Science Center School of Public Health.

As an Office for Student Success First-Generation Learning Community, FOCUS offers first-year Regents’ Scholarship recipients a full-year experience while they build Foundations of Continued Undergraduate Success (FOCUSE). During the first year on campus, FOCUS students delve into connection, achievement, respect and exploration as guiding principles for personal development and individual responsibility in university life. Students meet weekly in one In-FOCUSE Session of FYEX 101 (zero-credit, S/U) each semester and benefit from professional staff guidance, undergraduate Community Leaders, and monthly activities.

FOCUS students are highly encouraged to live in the First Year Eats Living-Learning Program in Clements Hall. Regents’ Scholars register for the program through the Living-Learning Programs application in the Residence Life housing portal during the spring prior to enrolling at Texas A&M University. Students who are not eligible for Regents’ Scholarships may register and request placement on the wait list.

First-generation students who are not Regents’ Scholarship recipients are invited to apply for participation in Ignite. Ignite offers peer mentoring, a weekly seminar, professional guidance and monthly activities as well as participation in the Constellation Living-Learning Program. For information on the Office for Student Success’ First-Generation Learning Communities, please visit http://studentsuccess.tamu.edu/First-Generation/First-Generation-Learning-Communities/.

Undergraduate Studies' units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.
UNIVERSITY STUDIES DEGREES

The University Studies Degree provides students the flexibility to combine areas of study that are of special interest. The combination of courses may not be possible through existing degree plans. This flexibility may be attractive to students who have particular career paths or post-baccalaureate degree paths in mind.

A University Studies Degree consists of a concentration of 21-24 hours and two minors of 15-18 hours each and requires 120 hours for completion. One of the two minors must be completed in a college outside of the college that provides the concentration for the student’s degree. A University Studies major will be considered a student in the college that offers the concentration and will receive academic advising services from that college. The student’s diploma will list Bachelor of Arts or Bachelor of Science in University Studies.

Information on specific University Studies degree programs is listed with individual colleges.

Texas A&M University

- University Studies - BA, Journalism Studies Concentration (p. 565)
- University Studies - BA, Race, Gender, Ethnicity Concentration (p. 655)
- University Studies - BA, Religious Thought, Practices and Cultures Concentration (p. 656)

• Doctor of Philosophy in Water Management and Hydrological Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/water-management-hydrological-science-phd/)

Entrepreneurship - Minor
The entrepreneurship minor fosters development of a creative, visionary mindset and spirit and prepares students to be opportunity seekers and creators that identify, evaluate, and implement innovative, value-added solutions. The entrepreneurship minor requires a total of 15 credit hours to consist of 6 hours of foundational courses that are common across all clusters plus 6 hours of discipline-specific courses and a 3-hour capstone experience. The minor includes discipline-specific course clusters intended to aid students’ course selection. Course clusters are not restrictive. Students may select courses within a single cluster or across multiple clusters to best meet their interests and professional goals. Undergraduate Studies’ units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

**Capstone Courses**

Select 3 hours from the following:

1. **Agriculture and Life Sciences Cluster**
   - AGEC 425 Agribusiness Entrepreneurship – Financial Analysis
   - AGSM 440 Management of Agricultural Systems II
   - BAEN 480 Biological and Agricultural Engineering Design II
   - MGMT 477 Entrepreneurship: The Lean Startup Approach
   - Internship
   - Research

2. **Business Cluster**
   - MGMT 432 Managing the Nonprofit Organization
   - MGMT 477 Entrepreneurship: The Lean Startup Approach
   - SOCI 450/ MGTMT 478 Social Entrepreneurship

3. **Liberal Arts Cluster**
   - ENGL 489 Special Topics in... (Narrative and Digital Technology)
   - MGMT 432 Managing the Nonprofit Organization
   - MGMT 477 Entrepreneurship: The Lean Startup Approach
   - SOCI 404/ RPTS 404 Sociology of the Community
   - SOCI 450/ MGTMT 478 Social Entrepreneurship

**Total Semester Credit Hours**

1. Choose 2 three-hour courses or 1 three-hour course plus 3 one-hour courses.
2. Course has prerequisites; student should consult with academic advisor or instructor before enrolling.
3. Approval required.
4. Choose at least three hours at 300- to 400-level.
Leadership - Minor

The minor in leadership studies (LDAG) provides students with formal instruction in leadership theory and the application of concepts necessary to be successful leaders in future careers. The 15 hour curriculum prepares students to be effective industry, community, and organizational leaders. Students explore leadership roles in their future contexts, develop an awareness of personal leadership characteristics, and apply leadership theories and models to future their professional experiences. The coursework includes five courses in foundational leadership concepts that can be completed 100% in an asynchronous distance education environment. Students must have a declared major, a GPA of 2.5 or higher, and completed less than 75 credit hours at the time of application.

For more information about this minor, visit our LDAG web page (https://alec.tamu.edu/academics/undergraduate/minor-in-leadership-studies-ldag/).

Neuroscience

Interdisciplinary Program in Neuroscience

Chair: J. Welsh

Neuroscience is a field devoted to the scientific study of the nervous system, from its molecular/cellular underpinnings to the organization of neural circuits, and the manifestation of this biological/neurochemical machinery as behavioral, physiological and psychological processes. It aims to detail both how the normal system operates and how alterations in function contribute to clinical diseases, such as mental illness, dementia, developmental disorders, neurodegenerative diseases, chronic pain, drug addiction, and the loss of function with aging or neural injury.

Minors

- Neuroscience Minor (p. 123)

Certificates

- Neuroscience Certificate (p. 124)
BIOL 388  Principles of Animal Physiology  
BIOL 435  Laboratory for Regulatory and Behavioral Neuroscience  
Total Semester Credit Hours 15

The minor must be declared before the student has completed 95 credit hours.

Student must make a grade of C or better.

No more than 6 credit hours can be counted toward both the Neuroscience Minor and the student’s major(s). Hours cannot be counted towards both the Neuroscience Minor and an additional minor.

A total of 6 hours of directed research (485/491) may be counted toward the minor. Directed studies may be conducted with any member of the faculty of Neuroscience. Research experiences must be approved by the NRSC faculty mentor.

Neuroscience - Certificate
The Neuroscience Certificate, offered by the Texas A&M Institute for Neuroscience (TAMIN), provides students with the opportunity to acquire enhanced training in research in various aspects of the nervous system of humans and other animals. Students in this Certificate Program will gain a broader understanding of how the nervous system functions during health and disease through enriched experiences in areas of molecular, structural, physiological, cognitive, behavioral, computational, or bioengineering neuroscience. The Neuroscience Certificate requires completion of 16 hours of course work in designated courses. Students must complete, prior to graduation, a combination of coursework and inquiry-based research (or an internship), which will be completed under the supervision of a TAMIN faculty member.

Steps:
Normally, students should apply to the Neuroscience Certificate program approximately two years before they plan to graduate. For the first two years of the program (Fall 2014-Spring 2016), students who are further along in the program may apply (and are expected to complete all requirements). To apply, students must:

1. Identify a faculty advisor who is willing to supervise Directed Studies in Research (NRSC 485/491). Working with the faculty advisor, the student must develop a brief (one paragraph) description of the proposed line of research.
2. Complete the Neuroscience Certificate Program form and have the faculty advisor sign it.
3. Submit the form to the TAMIN Coordinator in the Interdisciplinary Life Sciences Building, Room 3148.
4. Once a student completes the Undergraduate Neuroscience Certificate program requirements, the Completion Form for the Undergraduate NRSC Certificate must be submitted to the TAMIN Advising Office in ILSB 3148. *This form is due no later than the first month of the semester in which the student intends to graduate.

Students must maintain the required GPA for their major.

Students must present their research at one TAMU Student Research Week and a poster at the Annual TAMIN Spring Symposium (or related conference approved by TAMIN faculty member). One hour of NRSC 681-

Seminar will be taken to complete presentation requirements and the Neuroscience Certificate.

Students are expected to file a degree plan for their major within the administering department at the start of their junior year.

Students wishing to obtain an Honors Neuroscience Certificate must maintain a GPA of 3.5. Please visit the Honors Office in Henderson Hall to request honors credit and to complete any paperwork required by that office.

**Total Semester Credit Hours**: 16

---

1. No more than six credits can be used towards the Neuroscience Certificate. This limit does not preclude students from taking additional hours. Those hours will not, however, count towards the 16 credit hours needed to complete the Neuroscience Certificate.

2. If a student takes more than one course, it can count towards their electives.
College of Agriculture and Life Sciences

Administrative Officers

Vice Chancellor and Dean - Patrick J. Stover, Ph.D.
Executive Associate Dean - Clare A. Gill, Ph.D.
Associate Dean for Academic Affairs - Mary Bryk, Ph.D.
Associate Dean for Inclusive Excellence - Craig Coates, Ph.D.
Associate Dean for Student Development - Chris L. Skaggs, Ph.D.
Associate Dean for Faculty Affairs - X. Ben Wu, Ph.D.
Assistant Dean for Student Success - Danielle A. Harris, Ph.D.

General Statement

The College of Agriculture and Life Sciences is widely recognized as a leader in the academic programs offered by its departments. The students we educate and the scientific advancements we make and share improve the lives of Texans and people around the world through agriculture. Our faculty members and students are breeding crops to help conserve water, unlocking genetic mysteries to cure diseases, fostering best practices in environmental stewardship, and improving the safety, healthfulness, and abundance of the world’s food supply. Through innovative curricula, we prepare students for careers as scientists, business leaders, engineers, educators, physicians, affiliated health professionals, sales representatives, and other professionals.

Our academic programs focus on high-impact learning experiences and the science, technology, engineering, and math (STEM) courses that prepare students for a variety of careers. Students gain technical expertise, learn to think creatively and critically, solve problems, make decisions, communicate effectively, and learn how to work effectively with people of varied backgrounds. Faculty members who teach undergraduate classes include many who are recognized nationally and internationally for research and other accomplishments in their disciplines. Undergraduates also have opportunities to participate in research themselves.

All students are encouraged to participate in at least three high-impact experiences before graduation, such as undergraduate research, field study, an internship, or international experience. The college has study abroad programs in the Americas, Asia, Europe, Oceania, Africa, and the Caribbean. Honors programs are available in many of the college’s academic departments. There are numerous student organizations that are sponsored by departments or the college such as the Freshman Leadership Experience and the College of Agriculture and Life Sciences Student Council. These organizations promote interaction among students who share interests and foster leadership skills.

The College of Agriculture and Life Sciences and its departments offer a variety of scholarships to students on a competitive basis. Many are reserved for incoming freshmen or transfer students. Additional information and application forms for college-level scholarships for current students can be obtained from the Scholarships & Financial Aid Office. Information about departmental scholarships can be obtained from the departments directly.

College of Agriculture and Life Sciences

Baccalaureate Degree Programs

Each major can be arranged to prepare students for graduate study or admission to professional schools in medicine, dentistry, veterinary medicine, other health professions, and law. Students in programs, such as biochemistry, genetics, and nutritional sciences, are highly recruited for medicine, nursing, and other health professions. Animal science and wildlife and fisheries sciences are among several excellent choices for students interested in veterinary medicine. Students with a background in natural resources, the agricultural industry, forensics, or life sciences can use that knowledge to their advantage if they choose to enter law school. An environmental lawyer with a degree in a natural resource area is better equipped to incorporate the science with the law.

Advising is provided for each student in the college through offices in the individual academic departments. Departmental faculty and professional advisors assist with course selection and other academic issues. They also serve as mentors for career planning and admission to graduate or professional school. Advisors serve as professional consultants for students in the College with the objective of avoiding problems if possible and solving problems if needed.

Requirements for Graduation

Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

Internships

Internships provide real-world experience in industries related to a student’s education and professional career preparation. Students return to campus with a broader perspective and more intense interest in their education. The experiences are so valuable that many students complete more than one internship. Most departments in the College offer academic credit for the satisfactory completion of an internship. In fact, an internship is required for graduation in some degree programs.

The Agricultural and Natural Resources Policy (ANRP) Internship Program places students from the College of Agriculture and Life Sciences in policy-based internships in Austin, TX, Washington, D.C. and Rome, Italy for a semester or summer. Selection for the program is based upon factors such as academic performance, leadership, and a student’s general interest in learning the policy process.

Graduate Study

All departments in the College of Agriculture and Life Sciences offer graduate degrees at the masters and doctoral levels. Many departments offer courses and programs online.

Students are encouraged to contact the department in which they wish to obtain information about graduate study. Information on admission, programs available, etc., can be found in the Texas A&M University Graduate and Professional Catalog.

Teacher Certification

Texas teacher certification in agricultural science is available through the Department of Agricultural Leadership, Education, and Communications. Certification is granted through the State Board of Educator Certification (SBEC) upon a student's completion of the course of study administered
by the department. The undergraduate major in agricultural science includes all coursework required for teacher certification. The requirements can be completed with any major in the College of Agriculture and Life Sciences. See an advisor in Agricultural Science, Department of Agricultural Leadership, Education, and Communications, for more information.

**Majors**

**College of Agriculture and Life Sciences**
- Bachelor of Science in Renewable Natural Resources (p. 219)

**Department of Agricultural Economics**
- Bachelor of Science in Agribusiness (p. 133)
- Bachelor of Science in Agricultural Economics, Finance and Real Estate Option (p. 135)
- Bachelor of Science in Agricultural Economics, Food Marketing Systems Option (p. 136)
- Bachelor of Science in Agricultural Economics, Policy and Economic Analysis Option (p. 137)
- Bachelor of Science in Agricultural Economics, Rural Entrepreneurship Option (p. 139)
- Bachelor of Science in Agricultural Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 140)

**Department of Agricultural Leadership, Education, and Communications**
- Bachelor of Science in Agricultural Communications and Journalism (p. 146)
- Bachelor of Science in Agricultural Leadership and Development (p. 148)
- Bachelor of Science in Agricultural Science (p. 149)
- Bachelor of Science in University Studies, Leadership Studies Concentration (p. 151)

**Department of Animal Science**
- Bachelor of Science in Animal Science, Production/Industry Option (p. 155)
- Bachelor of Science in Animal Science, Science Option (p. 157)

**Department of Biochemistry and Biophysics**
- Bachelor of Science in Biochemistry (p. 160)
- Bachelor of Science in Genetics (p. 161)

**Department of Biological and Agricultural Engineering**
- Bachelor of Science in Agricultural Systems Management (p. 164)
- Bachelor of Science in Biological and Agricultural Engineering (p. 165) – offered in conjunction with the College of Engineering

**Department of Ecology and Conservation Biology**
- Bachelor of Science in Ecological Restoration (p. 169)
- Bachelor of Science in Forestry (p. 170)
- Bachelor of Science in Renewable Natural Resources (p. 219)
- Bachelor of Science in Spatial Sciences (p. 171)

**Department of Entomology**
- Bachelor of Science in Entomology (p. 175)
- Bachelor of Science in Forensic and Investigative Sciences, Pre-Law Emphasis (p. 177)
- Bachelor of Science in Forensic and Investigative Sciences, Science Emphasis (p. 178)

**Department of Food Science and Technology**
- Bachelor of Science in Food Science and Technology, Food Industry Option (p. 182)
- Bachelor of Science in Food Science and Technology, Food Science Option (p. 184)
- Bachelor of Science in Food Systems Industry Management (p. 186)

**Department of Horticultural Sciences**
- Bachelor of Arts in Horticulture (p. 188)
- Bachelor of Science in Horticulture (p. 190)

**Department of Nutrition**
- Bachelor of Science in Nutrition, Didactic Program in Dietetics Track (p. 193)
- Bachelor of Science in Nutrition, General Nutrition Track (p. 194)
- Bachelor of Science in Nutrition, Molecular and Experimental Track (p. 196)

**Department of Plant Pathology and Microbiology**
- Bachelor of Science in Bioenvironmental Sciences (p. 198)
- Bachelor of Science in Environmental Studies (p. 199)
- Bachelor of Science in University Studies, Environmental Business Concentration (p. 200)

**Department of Poultry Science**
- Bachelor of Science in Poultry Science, Industry Emphasis (p. 203)
- Bachelor of Science in Poultry Science, Technical Emphasis (p. 204)

**Department of Rangeland, Wildlife and Fisheries Management**
- Bachelor of Science in Rangeland Ecology and Management, Ranch Management Option (p. 206)
- Bachelor of Science in Rangeland Ecology and Management, Rangeland Resources Option (p. 208)
- Bachelor of Science in Renewable Natural Resources (p. 219)
• Bachelor of Science in Wildlife and Fisheries Sciences, Fisheries, Aquaculture and Aquatic Sciences Track (p. 210)
• Bachelor of Science in Wildlife and Fisheries Sciences, Vertebrate Zoology Option (p. 211)
• Bachelor of Science in Wildlife and Fisheries Sciences, Wildlife Ecology and Conservation Option (p. 212)
• Bachelor of Science in Wildlife and Fisheries Sciences and Master of Public Service Administration, 5-Year Degree Program (p. 214)

Department of Recreation, Park and Tourism Sciences
• Bachelor of Science in Recreation, Park and Tourism Sciences with Certificate (p. 217)
• Bachelor of Science in Renewable Natural Resources (p. 219)

Department of Soil and Crop Sciences
• Bachelor of Science in Plant and Environmental Soil Science, Crops Emphasis (p. 227)
• Bachelor of Science in Plant and Environmental Soil Science, Soil and Water Emphasis (p. 228)
• Bachelor of Science in Turfgrass Science (p. 229)

Minors
Minors consist of a group of specified courses totaling between 15 and 18 credit hours. Students who are eligible to enroll in a minor should contact an advisor in the department offering the minor. Minors available in the college are listed.

Department of Agricultural Economics
• Agribusiness Entrepreneurship Minor
• Agricultural Economics Minor (p. 143)
• AgriFood Sales Minor (p. 143)
• Financial Planning Minor (p. 144)

Department of Agricultural Leadership, Education, and Communications
• Agricultural Communications and Journalism Minor (p. 151)
• Extension Education Minor (p. 152)
• International Agricultural Development Minor (p. 152)
• Leadership Minor (p. 123)

Department of Biochemistry and Biophysics
• Biochemistry Minor (p. 162)
• Genetics Minor (p. 163)

Department of Biological and Agricultural Engineering
• Agricultural Systems Management Minor (p. 167)

Department of Ecology and Conservation Biology
• Forestry Minor (p. 173)
• Spatial Sciences Minor (p. 173)

Department of Entomology
• Entomology Minor (p. 180)

Department of Horticultural Sciences
• Horticulture Minor (p. 191)

Department of Plant Pathology and Microbiology
• Bioenvironmental Sciences Minor (p. 202)

Department of Poultry Science
• Poultry Science Minor (p. 205)

Department of Rangeland, Wildlife and Fisheries Management
• Rangeland Ecology and Management Minor (p. 215)
• Wildlife and Fisheries Sciences Minor (p. 215)

Department of Recreation, Park and Tourism Science
• Park and Natural Resource Management Minor (p. 221)
• Recreation, Park and Tourism Sciences Minor (p. 222)
• Tourism Management Minor (p. 222)
• Youth Development Minor (p. 222)

Department of Soil and Crop Sciences
• Agronomy Minor (p. 230)
• Environmental Soil Science Minor (p. 231)
• Plant Breeding Minor (p. 231)

Certificates
Certificate programs document expertise in an area beyond a major or minor. Information on requirements for certificate programs is available from the advisor of the department offering the certificate. Certificate programs available in the college are listed.

Department of Agricultural Economics
• International Trade and Agriculture Certificate (p. 144)

Department of Animal Science
• Equine Science Certificate (p. 158)
• Meat Science Certificate (p. 158)

Department of Ecology and Conservation Biology
• Watershed Certificate (p. 173)
Department of Entomology
• Public Health Entomology Certificate (p. 181)

Department of Food Science and Technology
• Food Diversity Certificate (p. 187)

Department of Horticultural Sciences
• Enology Certificate (p. 192)

Department of Recreation, Park and Tourism Science
• Community Recreation and Park Administration Certificate (p. 223)
• Hospitality Management Certificate (p. 223)
• Parks and Conservation Certificate (p. 224)
• Professional Event Manager Certificate (p. 224)
• Tourism Management Certificate (p. 225)
• Youth Development Certificate (p. 225)

Masters

College of Agriculture and Life Sciences
• Master of Natural Resources Development in Natural Resources Development (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/recreation-park-tourism-sciences/mmr/)
• Master of Science in Plant Breeding (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/horticultural-sciences/plant-breeding-ms/)

Department of Agricultural Economics
• Master of Agriculture in Agricultural Economics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-economics/agriculture-masters/)
• Master of Science in Agricultural Economics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-economics/ms/)

Department of Agricultural Leadership, Education, and Communications

Interdepartmental Degree Programs

The Bachelor of Science in Renewable Natural Resources degree is an interdepartmental degree in the College of Agriculture and Life Sciences. It is offered in the Department of Ecology and Conservation Biology (p. 168), the Department of Recreation, Park and Tourism Sciences, (p. 216) and the Department of Rangeland, Wildlife, and Fisheries Management (p. 206).

Majors

- Bachelor of Science in Renewable Natural Resources (p. 219)
Department of Agricultural Economics

The Department of Agricultural Economics offers Bachelor of Science degree programs in the fields of Agricultural Economics and Agribusiness. The B.S. degree in Agricultural Economics allows students to direct their plan of study towards their professional interests by selecting a concentration in either Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, or Rural Entrepreneurship (course requirements for the freshman and sophomore years are identical for all concentrations). The department also offers an accelerated five-year program in association with the Bush School of Government and Public Service that provides AGEC students with the opportunity to receive a B.S. in Agricultural Economics and a Masters of Public Service and Administration. The B.S. in Agribusiness is a selective program that provides students with a comprehensive and versatile business skill set designed to address the challenges of both agribusinesses and non-agricultural companies, incorporating coursework from the Mays Business School.

Department of Agricultural Economics Honors Program

The Department of Agricultural Economics at Texas A&M University offers an enhanced learning experience to qualified, academically-talented students majoring in Agricultural Economics and Agribusiness. Participation in the AGEC Honors Program enriches a student's college experience by offering scholastically-challenging curriculum and stimulating an interest in research. As honors classes are restricted in size, students also have the opportunity to work closely with the renowned faculty at Texas A&M University while developing the vital problem solving and critical thinking skills that are valued in today's fast-paced business culture. The coursework and co-curricular activities offered through this program are specially designed to promote academic and professional success. Honors distinctions are also beneficial to students that are planning to attend graduate school or law school by demonstrating one's ability to handle a challenging course of study.

The Department of Agricultural Economics Honors Program is administered through the AGEC Undergraduate Programs Office (located in Room 214 of the Agriculture and Life Sciences Building). For more information, contact the AGEC Undergraduate Programs Office at (979) 845-4911 or visit our website at http://agecon.tamu.edu/undergraduate/current-students/honors/.

Faculty

Adcock, Flynn, Assistant Lecturer
Agricultural Economics
MS, Texas A&M University, 1998

Anderson, David, Visiting Professor
Agricultural Economics
PHD, Texas A&M University, 1994

Boadu, Frederick O, Professor
Agricultural Economics
PHD, University of Kentucky, 1981

Buenger, Sarah D, Lecturer
Agricultural Economics
MS, College for Financial Planning, 2015

Harness, Nathaniel J, Instructional Associate Professor
Agricultural Economics
PHD, Texas Tech University, 2007

Ishdorj, Ariun, Associate Professor
Agricultural Economics
PHD, Iowa State University, 2008

Kibriya, Shahriar, Visiting Lecturer
Agricultural Economics
PHD, Texas A&M University, 2011

Kilmer, Nicholas G, Lecturer
Agricultural Economics
MBA, University of Texas at Tyler, 2011

Leatham, David J, Professor
Agricultural Economics
PHD, Perdue University, 1983

McCarl, Bruce A, Distinguished Professor
Agricultural Economics
PHD, The Pennsylvania State University, 1973

Menzies III, Max D, Lecturer
Agricultural Economics
PHD, Texas A&M University, 2017

Mjelde, James W, Professor
Agricultural Economics
PHD, University of Illinois at Urbana - Champaign, 1985

Moore, Christopher M, Lecturer
Agricultural Economics
CERT, Texas A&M University, 2016

Ng, Desmond W, Associate Professor
Agricultural Economics
PHD, University of Illinois at Urbana-Champaign, 2001

Noack, Kyle W, Assistant Lecturer
Agricultural Economics
CERT, Texas Department of Insurance, 2018

Outlaw, Joe, Visiting Professor
Agricultural Economics
PHD, Texas A&M University, 1992

Palma, Marco, Professor
Agricultural Economics
PHD, University of Florida, 2005

Park, John, Professor
Agricultural Economics
PHD, Texas A&M University, 1996

Price, Edwin C, Professor
Agricultural Economics
PHD, University of Kentucky, 1973

Rister, M E, Professor
Agricultural Economics
PHD, Michigan State University, 1981
Majors

Agribusiness

- Bachelor of Science in Agribusiness (p. 133)

Agricultural Economics

- Bachelor of Science in Agricultural Economics, Finance and Real Estate Option (p. 135)
- Bachelor of Science in Agricultural Economics, Food Marketing Systems Option (p. 136)
- Bachelor of Science in Agricultural Economics, Policy and Economic Analysis Option (p. 137)
- Bachelor of Science in Agricultural Economics, Rural Entrepreneurship Option (p. 139)

- Bachelor of Science in Agricultural Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 140)

Minors

- Agribusiness Entrepreneurship Minor (p. 142)
- Agricultural Economics Minor (p. 143)
- AgriFood Sales Minor (p. 143)
- Financial Planning Minor (p. 144)

Certificates

- International Trade and Agriculture Certificate (p. 144)

Agribusiness - BS

Curriculum in Agribusiness (BS)

The Bachelor of Science degree in Agribusiness combines selected Core Business Knowledge classes from a degree in business with coursework emphasizing the understanding of the unique institutional and managerial challenges facing agribusiness firms. By integrating business management principles with applied technical knowledge, students develop practical decision-making skills to address challenges facing agribusiness firms in the production, processing and distribution of food and fiber in Texas, the nation, and the world. Students in the BS Agribusiness degree program will take selected coursework in the Mays Business School.

Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades. In addition, students pursuing the Agribusiness degree must have a GPA of 2.0 in the courses included in the Core Business Knowledge.

Upper-Level Entry into Agribusiness

The requirements and procedures for consideration for upper level are as follows:

1. In order to be considered for upper-level and possible admission into the program of study in agribusiness, a student must have:
   a. Satisfactorily completed at least 60 semester credit hours.
   b. Satisfactorily completed all of the following eight courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

   c. Students should complete the freshman and sophomore sequence of courses as listed under Curriculum in Agribusiness.
Program Requirements

First Year

Fall

Semester Credit Hours

1. AGEC 105 Introduction to Agricultural Economics 1 3
2. MATH 140 Mathematics for Business and Social Sciences 3
3. American History (p. 29) 2
4. Communication elective (p. 26) 3
5. Life and physical sciences elective (p. 26) 3
6. Semester Credit Hours 15

Spring

1. AGEC 117 Critical Thinking and Decision Making in Agricultural Economics 4 1
2. MATH 142 Business Calculus 3
3. American History (p. 29) 2
4. Creative arts elective (p. 29) 5
5. Language, philosophy and culture elective (p. 27) 5
6. Life and physical sciences elective (p. 26) 3
7. Semester Credit Hours 16

Second Year

Fall

1. ACCT 229 Introductory Accounting 3
2. ECON 202 Principles of Economics 3
3. MGMT 211 Legal and Social Environment of Business 3
4. Government/Political science elective (p. 30) 2
5. Life and physical sciences elective (p. 26) 3
6. Semester Credit Hours 15

Spring

1. ACCT 230 Introductory Accounting 3
2. AGEC 217 Fundamentals of Agricultural Economics Analysis 3
3. ECON 203 Principles of Economics 3
4. Communication elective (p. 26) 3
5. Government/Political science elective (p. 30) 2

   4. AGEC 440 Agribusiness Strategic Analysis 3
   5. General electives 5,8
6. Semester Credit Hours 15
7. Total Semester Credit Hours 120

1. Satisfies the University Core Curriculum Social and Behavioral Sciences requirement.
2. For those students under ROTC contract, see Requirement 7 of the Requirements for a Baccalaureate Degree (p. 33).
3. Three hours must be selected from ENGL 103 or ENGL 104.
4. All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive (W). This course is an approved W course.
5. The Graduation requirements include 3 hours of cultural discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.
Six hours required. A complete list of approved international electives is available in the college Undergraduate Program Office, Room 214 of the Agriculture and Life Sciences Building, or can be found on our website (http://ageon.tamu.edu/undergraduate/).

Three hours of technical agriculture electives to be selected from any course offered by the College of Agriculture and Life Sciences except 285s, 484s, 485s and agricultural economics courses. To be selected in consultation with an advisor.

Any Texas A&M or transfer course (except ASCC 001- ASCC 003 (p. 908); KINE 198 and KINE 199) not used to meet other requirements.

Agricultural Economics - BS, Finance and Real Estate Option

The Bachelor of Science degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for the above Agricultural Economics options.

In addition to the four options, the department offers a five-year program in conjunction with the Bush School of Government & Public Service which would allow a student to receive a Bachelor of Science (B.S. AGEC) in Agricultural Economics and a Master’s of Public Service and Administration degree.

The Agricultural Economics program is designed to assist in the development of skills in agriculture, applied economics, and economic logic that students can utilize to analyze and communicate about financial, real estate, sales, marketing, policy, and entrepreneurship issues in Texas, the nation, and the world. Graduates are trained for a wide variety of jobs in agricultural and non-agricultural businesses, firms, and agencies in both the public and private sectors. Flexibility is included in the curriculum so that a student, in consultation with an academic adviser, can develop a degree program that best fits personal career objectives and may include one or more of the following experiences: industry internship, the Agricultural and Natural Resources Policy Internship program, and research, directed studies, or study abroad opportunities.

Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

Finance and Real Estate Option

The Finance and Real Estate option is designed to provide a well-founded basis in principles, concepts and methods for students interested in finance and/or real estate professional careers in the agricultural industry and/or related professions.

Agricultural Economics - BS, Food Marketing Systems Option

The Bachelor of Science degree in Agricultural Economics, with an option in Food Marketing Systems is designed to assist in the development of economic theory and quantitative analysis skills that students can apply to analyze and communicate about the food marketing issues in Texas, the nation, and the world. Students apply analytical skills to address operations involved in movement of agricultural commodities from farmer to consumer via several intermediaries; functions involve buying, selling, transportation, storage, financing, grading, pricing and risk bearing; agricultural supply chain or value chain is studied in detail; marketing aspects of commodities and differentiated goods. A student's educational experience is further enriched with supportive high impact opportunities such as business and industry internships, study abroad, directed studies and research, and industry professional mentorship, and participation in prestigious sales competitions such as the National Agri-Marketing Association (NAMA) student competition.

Graduates are trained for a wide variety of jobs in agricultural and non-agricultural oriented businesses, firms, and agencies in both the public and private sectors. The program prepares students to continue on to graduate school, or pursue the 5-year combined program (BS-AGEC and MPS-PSAA (p. 140)) with the Bush School of Government and Public Service. The flexibility in the program allows a student to specialize in an area such as sales. These students end up joining major agriculture, non-agriculture and technology sales firms.
The BS in Agricultural Economics with a Food Marketing Systems option is also offered in McAllen, Texas.

8 AGEC 447 is a fall only class. AGEC 448 is a spring only class.

### Agricultural Economics - BS, Policy and Economic Analysis Option

The Bachelor of Science degree in Agricultural Economics, with an option in Policy and Economic Analysis is designed to assist in the development of economic theory and quantitative analysis skills that
students can apply to analyze and communicate about agricultural policy and economic issues in Texas, the nation, and the world. The option equips students with analytical skills to understand the causes, nature, and effects of government participation in agriculture, and interrelationship of the American agriculture and agribusiness sector with the political and economic system, public administration, and interest group representation. A student's educational experience is further enriched with supportive high impact opportunities such as participation in the Agriculture and Natural Resource Program (ANRP) Congressional Internship; Texas State Government Internships, Commodity groups and Lobby internship; Study Abroad and Independent research. With the aid of faculty and staff advisors, students in the Policy and Economic Analysis option design their plan of study reflecting their particular future goals by incorporating higher-level electives outside the department.

Students interested in graduate education may focus on developing a strong background in the following areas: quantitative analysis, economic theory, and applied economics. Those interested in entering law school may focus on courses in law, political science, and technical writing. Furthermore, those students interested in careers in government and policy may focus on courses in policy, political science, and management.

Graduates are trained for a wide variety of careers in local, state, and federal governments, and also with commodity groups and lobby firms. The program prepares students to continue on to graduate school, or pursue the 5-year combined program (BS-AGEC and MPS-PSAA (p. 140)) with the Bush School of Government and Public Service. A good number of students have pursued this option and continued on to law school.

The BS in Agricultural Economics with a Policy and Economic Analysis option is also offered in McAllen, Texas.

Agricultural Economics - BS, Rural Entrepreneurship Option

The Bachelor of Science degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for the above Agricultural Economics options.

In addition to the four options, the department offers a five-year program in conjunction with the Bush School of Government & Public Service that would allow a student to receive a Bachelor of Science (B.S. AGEC) in Agricultural Economics and a Master's of Public Service and Administration degree.

The Agricultural Economics program is designed to assist in the development of skills in agriculture, applied economics, and economic logic that students can utilize to analyze and communicate about financial, real estate, sales, marketing, policy, and entrepreneurship issues in Texas, the nation, and the world. Graduates are trained for a wide variety of jobs in agricultural and non-agricultural oriented businesses, firms, and agencies in both the public and private sectors. Flexibility is included in the curriculum so that a student, in consultation with an academic adviser, can develop a degree program which best fits personal career objectives and could include one or more of the following experiences: industry internship, the Agricultural and Natural Resources Policy Internship program, and research, directed studies, or study abroad opportunities.

Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

1. Students under ROTC contract, see Requirement 7 of the Requirements for a Baccalaureate Degree. (p. 908)
2. Any course offered by the College of Agriculture and Life Sciences, except 285s, 484s, 485s and agricultural economics courses.
3. The Graduation requirements include a requirement for 3 hours of international and cultural diversity courses and 3 hours of cultural discourse courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.
4. All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive (W). This course is an approved W course.
5. Six hours to be selected in one or more departments outside of the Department of Agricultural Economics. A minimum of 3 of these hours must be at the 300- or 400-level. To be selected in consultation with an advisor.
6. To be selected in consultation with an advisor.
7. Any Texas A&M or transfer course (except ASCC 001 - ASCC 003 (p. 908); KINE 198 and KINE 199) not used to meet other requirements.
Agricultural Economics - 5-Year Bachelor of Science/Master of Public Service Administration

The combined program between the Department of Agricultural Economics and The Bush School of Government and Public Service allows undergraduate Agricultural Economics students to enter the Master of Public Service Program at the beginning of their senior year (typically year four) at Texas A&M University. This enables students to receive both their Bachelor of Science in Agricultural Economics (B.S. AGEC) and a Master of Public Service and Administration (MPSA) graduate degree, with a track emphasis in public policy analysis (PPA), in five years. The program includes a total of 151 hours with 17 hours double-counting to both degrees.

To be considered for the 5-year combined degree program, Agricultural Economics students must have a minimum 3.25 GPA and have completed 103 of the 120 hours of course work required to receive a bachelor’s degree. These courses must include all of the specific prerequisites for a B.S. in Agricultural Economics, as well as the courses required by the College of Agriculture and Life Sciences and by Texas A&M University for an undergraduate degree.

Students in the 3+2 combined program will submit the same materials (including GRE scores) as other MPSA applicants; the one exception to this is the submission of a 2-page application found on the Bush School website rather than the ApplyTexas application, hence no application fee. Students whose records are judged to be competitive by the mid-January deadline will be invited to attend the GBS Interview Conference Weekend in late February/early March. The admissions criteria for the five-year program will be the same as for other MPSA students.

To be considered for the 5-year combined degree program, Agricultural Economics students must have a minimum 3.25 GPA and have completed 103 of the 120 hours of course work required to receive a bachelor’s degree. These courses must include all of the specific prerequisites for a B.S. in Agricultural Economics, as well as the courses required by the College of Agriculture and Life Sciences and by Texas A&M University for an undergraduate degree.

Students who choose not to finish the MPSA degree after being admitted to the five-year program may exit the program at any time. Completed MPSA courses will be applied to their bachelor’s degree in Agricultural Economics, and students will select the Agricultural Economics option area that is most appropriate for their interest. Failure to complete the MPSA program will in no way impede their ability to attain a bachelor’s degree in Agricultural Economics when the requirements for that degree are completed.

Advising for the five-year program will involve a coordinated effort by the Undergraduate Program Office in the Department of Agricultural Economics and the Director of the MPSA program in the Bush School. Advising by the Department of Agricultural Economics will help ensure that interested students have satisfied the prerequisite course requirements for their bachelor’s degree by the beginning of their senior year. The MPSA director and GBS director of recruiting will also be available for Agricultural Economics students who wish to set up appointments to talk individually about the MPSA program’s curriculum and career opportunities available to its graduates.

Students in the five-year program will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School’s MPSA program.

The Agribusiness Entrepreneurship Minor is for students who are interested in starting their own business; working in an existing family-owned business; working for an entrepreneur; pursuing employment with a bank or financial institution; or wanting a working knowledge of business development practices and strategies.
Students will choose to develop a business plan for their own professional career pursuit, or to evaluate a business from an investor’s or consultant’s perspective in the coursework included in this minor. The instructor and student will mutually agree on a business venture and business settings selected. The options for students’ businesses are wide and varied, with locations in either a rural or metropolitan setting.

A critical ingredient in the Agribusiness Entrepreneurship Minor is learning to establish and develop a large network with successful entrepreneurs and other professionals. This minor offers ample opportunities for you to learn how to develop networking strategies in the classroom and in social settings.

Innovation and entrepreneurship are not limited to one field/degree area; therefore, the Agribusiness Entrepreneurship Minor is open to all majors. Students must have a cumulative GPA of 2.0 or higher to be approved to pursue the minor. Students must earn a grade of C or better in all required minor coursework.

Total Semester Credit Hours: 16

1 Must be taken as MGMT 489 Innovative Product Design: The Lean Startup Method.

Must have declared a major.

Must meet all prerequisites for each course listed above prior to enrolling in any required course.

Must make a grade of ‘C’ or better in each required course.

Must have a cumulative GPR of 2.0 or higher.

**AgriFood Sales - Minor**

A minor in AgriFood Sales is essential for any student looking to pursue a career in professional sales, expand a strong network of industry representatives, and explore career development opportunities. Our mission is to develop emotionally intelligent sales professionals through industry partnerships, self-management and self-awareness application, and high impact learning environments. We are focused on developing qualified sales professionals that are easily recruited by reputable firms upon graduation.

Although there is an emphasis on AgriFood, we find that our students go into a wide variety of industries. The courses are applicable to tech, pharmaceutical, and other industries that do not fall under the agriculture umbrella. Our four video labs in the Agriculture and Life Sciences building allow students to review their simulated role-plays instantly with state of the art technology. This addition to any degree plan would offer a substantial high-impact learning experience.

The Minor in AgriFood Sales consists of 16 hours of specific courses. Students must have declared a major; meet all the requirements for each course listed prior to enrolling in the course, have a cumulative GPA of 2.0 or higher, and must earn a grade of C or better in each required course to earn the minor.

Financial Planning - Minor

The minor in Financial Planning prepares students for leadership roles in this growing profession. Financial planners advise their clients about financial decisions, including budget management, insurance, investment, taxes, retirement and estate planning. Their goal is to assist clients in achieving their financial goals in an increasingly complex economy. The six-course curriculum (18 credit hours) also satisfies the educational requirements to be eligible to sit for the exam portion of the CERTIFIED FINANCIAL PLANNER™ (CFP®) designation conferred by the CFP Board of Standards (http://www.cfp.net). Professionals who have earned this designation are in high demand in the financial services sector.

The minor in Financial Planning is available to all junior or senior undergraduate students enrolled at Texas A&M University, who have completed an introductory finance course and have an overall GPA of 2.5 or higher. Successful completion of the minor requires the courses to be taken for academic credit with a grade of C or better for each course. Coursework is offered both online and in the classroom to meet students’ learning preferences. Visit our website (http://financialplanning.tamu.edu) for more information about this minor and the career opportunities in Financial Planning.

Total Semester Credit Hours 15

Study abroad, foreign languages, and international internships are encouraged and allowed to contribute toward the 15 hours required for the certificate. No more than three hours of foreign language or six hours of study abroad or six hours of international internship may be counted as credit toward the certificate.

Department of Agricultural Leadership, Education, and Communications

The Department of Agricultural Leadership, Education, and Communications (ALEC) includes a student-centered faculty and staff offering undergraduate degrees leading to professional careers. Using a blend of asynchronous and synchronous courses, our programs offer a unique combination of practical, hands-on experiences and critical people skills required for success in today’s fast-paced careers. Upon graduation, our students are uniquely equipped for leadership, education, communications, and training roles in the broad field of agricultural sciences and human performance in both domestic and international settings.

We offer four Bachelor of Science degrees: Agricultural Communications and Journalism, Agricultural Leadership and Development, Agricultural Science, and University Studies-Leadership Studies; and four minors: Agricultural Communications and Journalism, Extension Education, International Agricultural Development, and Leadership.

Degree Programs

Agricultural Communications and Journalism (AGCJ)

This program prepares the student to work in news, magazine, broadcast, public relations, advertising, multimedia, digital cable, or satellite communications. Students in this program will complete courses in writing, editing, and basic digital design. Professional skills courses include publications production, public relations, photography, broadcasting, and electronic communications.

Agricultural Leadership and Development (ALED)

This program prepares the student to work with people involved in agriculture and life sciences and other related fields. Students in this program will complete courses in personal and organizational leadership, ethics, and leading change. Specialized courses include courses such as team leadership, leading volunteers, cultural pluralism, and agricultural extension related courses.

University Studies-Leadership Studies (ALED-USAL)

This program prepares the student for careers in profit and non-profit organizations, law, politics, public service, military careers, etc. Students have the ability to customize their higher educational experience to suit their future career goals. Specific fields are determined by the students’ interest, which makes each University Studies-Leadership degree as unique as each of our students.

Agricultural Science (AGSC)

This program prepares the student for a degree and as well as teacher certification in Secondary Agricultural Science. Students in this program will study educational technologies, instructional design and program planning in agricultural science. The program is aimed at creating high quality high school agricultural science teachers. However, other careers can often benefit from this training in agriculture and education.

For more information about each of our programs, visit the specific majors tab (https://catalog.tamu.edu/undergraduate/agriculture-life-sciences/agricultural-leadership-education-communications/#majorstext) or visit our department web page. (https://alec.tamu.edu/academics/undergraduate/)

Degree Minors

We offer four minors, in specific areas, that provide our students with foundational knowledge and concepts required for success in future careers such as communication specialists, Extension educators, and students seeking positions as leaders in domestic or international settings.

- Agricultural Communication and Journalism (AGCJ)
- Extension Education (EXED)
- International Development in Agriculture (IDAG)
- Leadership Studies (LDAG)

NOTE: The LDAG minor can be completed 100% in an asynchronous distance education environment.

For more information on each minor, select the link below or visit our department web page (https://alec.tamu.edu/academics/undergraduate/).

Agricultural Communications and Journalism - BS

Students graduating with a Bachelor of Science in Agricultural Communications and Journalism are prepared for employment in agricultural businesses, organizations, associations, government
The degree requires the completion of 120 semester credit hours. The student who wishes to develop specific career plans may do so in consultation with their Agricultural Communications and Journalism advisor. With approval of the advisor and the dean’s office, substitutions may be made in the required scientific and technical agriculture courses to help meet the student’s goals.

For more information about this minor, visit our AGCJ web page (https://alec.tamu.edu/academics/undergraduate/agricultural-communications/).

Total Semester Credit Hours 120

---

1 Select from ALED 100-499 (p. 890), NFSC 100-499. (p. 1090)
2 Select from ANSC 100-499 (p. 891), ENTO 100-499 (p. 980), POSC 100-499 (p. 1123), WFSC 100-499 (p. 1170).
3 Select from ESSM 100-499 (p. 985), HORT 100-499 (p. 1024), PLPA 100-499 (p. 1118), SCSC 100-499 (p. 1139).
4 Agriculture emphasis area courses will be used to develop a cohesive career emphasis and are to be selected in consultation with an academic advisor.
5 Select from AGCJ 411, STAT 201-225 (p. 1154), STAT 301-415 (p. 1154).

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See an academic advisor.

### Agricultural Leadership and Development - BS

The Agricultural Leadership and Development program includes a multidisciplinary curriculum emphasizing the development of tools to be successful both professionally and personally. Graduates are prepared for leadership positions in local, state, regional, and national groups, organizations, and agencies that are involved in the agricultural industry. The degree requires the completion of 120 semester credit hours and a 15-18 hour university approved minor that serves as a context for students to apply their leadership knowledge.

For more information about this minor, visit our ALED web page (https://alec.tamu.edu/academics/undergraduate/agricultural-communications/). (https://alec.tamu.edu/academics/undergraduate/agricultural-communications/)

1 Select course not taken the previous semester.
2 Select from AECJ 100-499 (p. 879); AECJ 101-499 (p. 881); AGST 100-499 (p. 888); AGST 100-499 (p. 894); BAEN 100-499 (p. 912); CESC 100-499 (p. 917); BICH 100-499 (p. 916); DASC 100-499 (p. 955); ENTO 100-499 (p. 980); ESSM 100-499 (p. 985); FIVS 100-499 (p. 996); GENE 100-499 (p. 999); HORT 100-499 (p. 1024); NFSC 100-499 (p. 1090); PLPA 100-499 (p. 1118); POSC 100-499 (p. 1123); RENR 100-499 (p. 1132); RPTS 100-499 (p. 1133); SCSC 100-499 (p. 1139); WFSC 100-499. (p. 1170)
3 ALED courses may not be used for these electives.
4 6 hours of the 12 required Agriculture electives must be in the 300-400 level.
5 Select from AECJ 300-499 (p. 889); AECJ 300-499 (p. 890).

Students are required to make a C or better for each of their courses in the major coursework area.

Before registering as a junior, students must develop a degree program in consultation with a departmental advisor.

At least 36 credits must be 300- and 400-level courses.

The Graduation requirements include 3 hours of International and Cultural Diversity (p. 47), and 3 hours of Cultural Discourse. (p. 46) A course satisfying a Core category, a college/department requirement or a free elective can be used to satisfy this requirement.

**Agricultural Science - BS**

The Agricultural Science curriculum includes a combination of courses in scientific agriculture and professional education that will meet requirements for employment and advanced study in careers emphasizing formal and informal programs of education. This degree plan will prepare a student to successfully work toward teacher certification, resulting in the ability to teach Agriculture, Food, and Natural Resources (AFNR) classes in a secondary school setting. A student following this curriculum must meet the requirements of admission to the teacher education program as determined by the State of Texas. Enrollment in this program requires a passing score on the TExES AFNR content exam and a full semester off-campus professional teaching internship in a secondary classroom in order to graduate. After successful completion of the professional teaching semester, a student may be eligible to enter public schools as a teacher of AFNR certified by the Texas Education Agency.

In addition to teaching in a secondary agriculture program, career options may include working as an agricultural extension agent, working for a marketing agency or agricultural supply company, or working in other industries related to agricultural education.

A student majoring in agricultural science will be counseled by an advisor in the Department of Agricultural Leadership, Education, and Communications to ensure that the program developed with the student will satisfy his or her unique interests, needs and professional aspirations, as well as requirements for teacher certification. The degree requires the completion of 120 semester credit hours. Course selection allows a student to place emphasis on a particular field of agriculture or to prepare broadly in agricultural studies.

For more information on this major, visit our AGSC web page (https://aecd.tamu.edu/academics/undergraduate/agricultural-science-agsc/).

### Total Semester Credit Hours

| 120           |

---

1. All scientific agricultural electives are to be selected in consultation with an academic advisor.
2. Must make a grade of C or better to receive credit.
3. Professional development course required for certification as a teacher of agricultural science.
4. Select from ESSM 100-499 (p. 985), HORT 100-499 (p. 1024), SCSC 100-499 (p. 1139).

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See an academic advisor.

### Additional Requirements:

1. Completion of all courses listed on the degree plan. All AGSC and Interdisciplinary Studies (INST) courses with a C or better.
2. A minimum of 2.75 Cumulative GPA at Texas A&M.
University Studies - BS, Leadership Studies Concentration

The University Studies-Leadership (USAL/LED) degree is an interdisciplinary program requiring the completion of 120 semester credit hours with a concentration of 26 hours of leadership studies and two 15-18 credit hour minors. The University Studies Degree format was created to provide the student the flexibility to combine areas of study that are of special interest. In the leadership studies concentration, students learn theories and models of the leadership process and they use analysis and evaluation to synthesize multiple leadership theories. This interdisciplinary program allows students the ability to customize their higher education experience to their future career goals. The student, with support from an USAL/LED advisor, will choose minors to assist them in creating a degree plan that will allow students to gain the knowledge and skills required for their chosen career path.

For more information on this major, visit our USAL/LED web page (https://alec.tamu.edu/academics/undergraduate/university-studies-usalled/).

</table>

$^1$ Before registering as a junior, each student must develop a degree program in consultation with the departmental advisor.

$^2$ The total number of hours between Minor 1, Minor 2 and general electives must be 54 hours. Courses counting in other areas of the degree plan and toward a minor cannot count toward the 54 total hours. One of the two minors must be completed in a college outside of the College of Agricultural and Life Sciences. Must meet with an advisor to determine correct hours.

Students are required to make a C or better for each of their courses in the major coursework.

At least 36 credits must be 300- and 400-level courses.

The Graduation requirements include a requirement for three hours of international and cultural diversity courses and three hours of cultural discourse courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

Agricultural Communications and Journalism - Minor

Students seeking a minor in Agricultural Communications and Journalism (AGCJ) should begin the process by discussing the option with their academic advisor in their major. Students should then make an appointment with an AGCJ advisor to discuss interests. An application is required for establishing a minor in Agricultural Communications and Journalism. The minor requires the completion of 18 semester credit hours. To be eligible for the AGCJ minor, a student must have completed less than 70 hours and have at least a 2.5 GPA.

The AGCJ minor is highly focused on written communication. Students should consider their interest in writing before beginning the minor. Students seeking to complete the AGCJ minor will graduate prepared to assist with writing news releases, social media posts, photography or other media relations activities in many communication fields.

For more information about this minor, visit our AGCJ web page (https://alec.tamu.edu/academics/undergraduate/minor-agricultural-communications-journalism/).

Program Requirements

**Extension Education - Minor**

The undergraduate Minor in Extension Education (EXED) provides students with formal instruction in Extension Education necessary to be successful Extension educators. The 18 hour curriculum prepares students in the history and philosophy of Extension education, extension educational methodologies, program management and program development. Students explore Extension educational roles in their future contexts; develop an awareness of program development, volunteer management, Extension educational theories and models for future application as an Extension educator. The curriculum includes nine credits of foundational leadership concepts, three credit hours in a specialized area of leadership, and three hours in an Extension internship. Students must be in good standing with Texas A&M University, have a declared major, and must have a cumulative 2.5 GPR or higher. Students must have also completed 75 hours or less at time of application.

For more information about this minor visit our EXED web page (https://alectic.tamu.edu/academics/undergraduate/extension-education-minor-ixed/).

Total Semester Credit Hours 18

Students must make a grade of 'C' or better in all courses.

**International Agricultural Development - Minor**

The minor in International Agricultural Development (IDAG) provides students with instruction in international development concepts and practical experiences through language acquisition and/or international study, research, and fieldwork. Students examine current international agricultural issues and/or diversity and communications. The 18-hour curriculum prepares students for post-baccalaureate international careers or graduate studies. Coursework includes 12 credits of foundational concepts and six hours of upper-division foreign languages or approved international experiences. Students must have a declared major, a GPA of 2.0 or higher, and have completed less than 75 hours at time of application. Before being accepted into the minor, students must meet with an IDAG advisor and complete an online application.

For more information about this minor visit our IDAG web page (https://alectic.tamu.edu/academics/undergraduate/international-development-idag/).

Practical Skills/Experiences: Upper-division, university-level foreign languages; or IDAG advisor approved international experiences

Total Semester Credit Hours 18

Students must have completed less than 75 hours and have a minimum GPA of 2.0 or higher.

**Leadership - Minor**

The university-level leadership minor provides students the skills and knowledge needed to become leaders demonstrated by an ability to apply ethical frameworks to varied settings and situations, respect others, and do what is right even if it is more difficult. The minor in leadership focuses on leadership practice with a grounding in leadership theory. Thus, the minor’s 15 credit hour curriculum consists of six hours of foundational courses in leadership theory, six hours of practice-focused courses that allow students to develop depth or breadth in areas that support their professional goals, a three hour capstone experience that requires a leadership practicum, and a required reflection. Undergraduate Studies’ units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

1 Departmental approval required.
2 Must be taken as a 0-credit course and for a letter grade.

Must make a grade of C or better is required in all courses. A grade of S cannot be used to meet the program requirements.

Courses used to fulfill requirements of the leadership minor may not be used to fulfill area of concentration requirements for university studies degrees.

At least 6 credit hours must be completed in residence at the 300-400 level.

Department of Animal Science

The curricula in Animal Science are designed to prepare students for rewarding careers in animal-oriented agribusiness. The millions of domestic animals that provide food, fiber and recreation for humans offer a variety of career opportunities for animal science graduates.

Students completing the Bachelor of Science degree in Animal Science are in demand by both the private and public sectors. Career paths include livestock production and the extensive infrastructure that provides the products and services required for management, marketing and processing of livestock and livestock products. Students receive training in nutrition, breeding, reproductive physiology, meat science, dairy products, wool and mohair, and the production and management
of livestock. Extensive laboratory facilities and livestock operations located on or near campus in the Animal Science Teaching, Research and Extension Complex facilitate practical application of the scientific principles.

Leadership skills are developed through participation in a wide array of extracurricular activities, including departmental clubs, judging teams and continuing education/youth programs. A substantial number of students gain experience in a variety of disciplines through high impact learning experiences such as internships, research, study abroad and field trips.

Animal Science - BS, Production/Industry Option

This curriculum prepares students for careers in animal-oriented agribusinesses. Other courses, in addition to animal science courses, include accounting, economics, genetics and management. A wide array of internships giving students invaluable experience in all phases of livestock production and related industries is available. Career opportunities include sales, management, public relations, marketing, quality control and education. Students may concentrate on an emphasis area within this option, including the following.

Beef Cattle

Students receive training that enables them to pursue careers in ranch management, feedlot management, pharmaceutical sales and other service-oriented livestock industries. Students are trained in all aspects of production, marketing and merchandising techniques for employment in the beef industry. The University Beef Cattle Center gives students hands-on experience.

Dairy

The focus of this emphasis area is to develop a well-rounded, knowledgeable student. Students have the opportunity to apply scientific principles, problem-solving methods, state-of-the-art techniques and information transfer to complex dairy production systems.

Equine

Designed for students with professional or vocational interests in horses and the horse industry. Coursework emphasizes equine nutrition, breeding, reproduction, health, management, training and judging. Lectures are reinforced with laboratories in which students work with horses. Graduates are well prepared for careers with horse production farms, stallion stations, performance and race training stables, breed associations, performance horse organizations, feed and pharmaceutical companies, county extension positions, and other industries and agencies related to the horse industry.

Meat

Students prepare for a career in the meats industry by taking meat science and processing and evaluation courses. Students also can conduct research through special problems courses and can gain valuable work experience on campus in the Meat Science Section or the Rosenthal Meat Science and Technology Center or off campus through internships or summer jobs. Job opportunities are available in packing, processing, retailing, purveying, food service, promotion, public relations and government regulatory agencies.

Sheep

Designed to prepare students for careers in the sheep and goat industries and in the associated wool and mohair industries, this emphasis gives students first-hand experience in sheep production and management practices, as well as procedures for processing and evaluating fleeces. Job opportunities are diverse and include flock management, marketing...
of lamb and fiber products, feed and pharmaceutical sales and county extension agent positions.

Swine

This emphasis area is designated for students planning to pursue a career in swine production or closely allied industries. Students are taught the principles of breeding and genetics, nutrition and feeding, animal health, environmental control and waste management as they relate to profitable swine production systems. These principles are reinforced by hands-on experience with the department's swine herd. Career paths include management of swine production units and technical service or sales for feed, pharmaceutical and breeding stock companies.

1 To be selected from the University Core Curriculum. The University Core Curriculum includes a requirement for 3 hours of International and Cultural Diversity (p. 47) and 3 hours of Cultural Discourse (p. 46). Refer to the University Core Curriculum (p. 25) catalog page for a list of acceptable courses. A course satisfying another Core category, a college/department requirement or taken as a general elective can be used to satisfy these requirements. Select in consultation with an academic advisor.
Select from the following courses: ANSC 404, ANSC 406, ANSC 408, ANSC 412, ANSC 414, ANSC 420, ANSC 429, ANSC 434, ANSC 447, DASC 418. 8 total hours required.

Any ANSC (p. 891) course that is not fulfilling part of your ‘major coursework’ category.

May include but is not limited to: undergraduate research, study abroad, internships, and competitive judging teams. At least one term enrollment in ANSC 399 required; can complete in Fall, Spring, or Summer.

Any course taught within the College of Agriculture and Life Sciences.

Students are required to make a C or better in each of their courses in their major (ANSC) coursework area.

All undergraduate students must take at least (2) specific courses in their major designated as writing or communication intensive (W or C). To be chosen in consultation with your academic advisor.

**Animal Science - BS, Science Option**

This curriculum is designed to provide scientific expertise in chemistry, biological and physical sciences and mathematics and is recommended for students considering entry into the veterinary, medical or allied health field, or the graduate program of their choice. This option provides a strong background for graduate study in a wide variety of disciplines. Animal scientists graduating with a Bachelor of Science degree in this option who do not enter graduate or professional school find employment in rewarding careers in the pharmaceutical, clinical and food-related industries. Students may concentrate on an emphasis area within this option, including the following.

**Pre-Professional**

Students planning to pursue a career in veterinary medicine can complete course requirements for admission to the professional curriculum in this emphasis. Students gain experience working with animals through direct contact in laboratory courses and directed field study. Students acquire knowledge of animal systems and animal behavior principles through coursework and interaction with livestock industry leaders. Students are also prepared to seek admission to the professional curricula in medicine, dentistry, pharmacy, optometry and physical therapy.

**Pre-graduate Studies**

This emphasis prepares students to pursue a Master of Science, Master of Agriculture or Doctor of Philosophy degree. Possible graduate programs include animal behavior, animal breeding, biochemistry, cellular and molecular biology, meats, dairy science, food science and technology, genetics, growth biology, nutrition and reproductive physiology. Experience gained through honors courses, internships, special problems courses and research laboratories helps the student identify specific disciplines of interest for graduate study. Students with advanced degrees are employed as university professors, research scientists or technicians, extension livestock specialists and technical representatives for industry.

| Total Semester Credit Hours | 120 |

1. To be selected from the University Core Curriculum. The University Core Curriculum includes a requirement for 3 hours of International and Cultural Diversity (p. 47) and 3 hours of Cultural Discourse (p. 46). Refer to the the University Core Curriculum (p. 25) catalog page for a list of acceptable courses. A course satisfying another Core category, a college/department requirement or taken as a general elective can be used to satisfy these requirements. Select in consultation with an academic advisor.

2. Students may choose to use general electives to complete a concentration in a pre-professional program, a pre-graduate study area, or a certificate program.

3. May include but is not limited to: undergraduate research, study abroad, internships, and competitive judging teams. At least one term enrollment in ANSC 399 required; can complete in Fall, Spring, or Summer.

4. Select from the following courses: ANSC 404, ANSC 406, ANSC 408, ANSC 412, ANSC 414, ANSC 420, ANSC 429, ANSC 434, ANSC 447; DASC 418. 8 total hours required.

Students are required to make a C or better for each of their courses in the major (ANSC) coursework area.

All undergraduate students must take at least (2) specific courses in their major designated as writing or communication intensive (W or C). To be chosen in consultation with your academic advisor.

---

**Equine Science - Certificate**

The Department of Animal Science offers a certificate in Equine Science for students who wish to obtain specialization in this area. The certificate is designed to provide a knowledge base to those individuals who have an interest in pursuing a career in the equine industry. Please reference the program requirements tab for information on course of study requirements for the Equine Science certificate.

**Meat Science - Certificate**

The Department of Animal Science offers a certificate in Meat Science for students who wish to obtain specialization in this area. The certificate is designed to provide a knowledge base to those individuals who have an interest in pursuing a career that involves the meat industry. Students must complete a minimum of 18 credit hours by taking four required courses and selecting additional courses from the elective list to complete the minimum credit hour requirement.

Students who have taken ANSC 489, Special Topics in Advanced Meat Technology, will be credited with ANSC 447.

Students who have taken ANSC 489, Special Topics in Meat Merchandising, will be credited with ANSC 337.

Department of Biochemistry/Biophysics

Curriculum in Biochemistry is administered by the Department of Biochemistry and Biophysics.

Biochemists seek to understand life at the molecular level, including the detailed structures of biological molecules and the chemical reactions in which they participate. They study the molecules of living systems of all kinds, from the simplest viruses and bacteria to higher plants and animals. In their work, biochemists use experimental tools ranging from x-ray crystallography and nuclear magnetic resonance to bioinformatics and genetic engineering. Biochemistry is a dynamic and diverse field that has become the basic discipline for the life sciences, and biochemists have made significant discoveries that relate to medicine, agriculture, and the environment.

Faculty

Ayres, Nicola M, Senior Lecturer
Biochemistry & Biophysics
PHD, University of Nebraska - Lincoln, 1987

Bryk, Mary E, Associate Professor
Biochemistry & Biophysics
PHD, Albany Medical College, 1994

Cho, Jae H, Assistant Professor
Biochemistry & Biophysics
PHD, State University of New York at Stony Brook, 2006

Cruz-Reyes, Jorge A, Professor
Biochemistry & Biophysics
PHD, London School of Hygiene & Tropical Medicine, 1992

Datta, Sumana, Professor
Biochemistry & Biophysics
PHD, University of California - San Diego, 1987

Devarene, Timothy P, Associate Professor
Biochemistry & Biophysics
PHD, University of Kentucky, 2000

Glasner, Margaret E, Associate Professor
Biochemistry & Biophysics
PHD, Massachusetts Institute of Technology, 2003

Gohil, Vishal M, Associate Professor
Biochemistry & Biophysics
PHD, Wayne State University, 2005

He, Ping, Professor
Biochemistry & Biophysics
PHD, Kansas State University, 2003

Henderson, Michelle, Senior Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 2010

Herman, Jennifer K, Associate Professor
Biochemistry & Biophysics
PHD, Indiana University, 2005

Igumenova, Tatyana I, Associate Professor
Biochemistry & Biophysics
PHD, Columbia University, 2003

Kunkel, Gary R, Associate Professor
Biochemistry & Biophysics
PHD, University of California - Los Angeles, 1977

Kurosaki, Dzmitry L, Assistant Professor
Biochemistry & Biophysics
PHD, Suny at Albany, 2013

Li, Pingwei, Professor
Biochemistry & Biophysics
PHD, Peking University, 1996

Meek, Thomas D, Professor
Biochemistry & Biophysics
PHD, Pennsylvania State University, 1981

Miles, Bryant W, Senior Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 1998

Mullet, John E, Professor
Biochemistry & Biophysics
PHD, University of Illinois - Urbana-Champaign, 1981

Panin, Vladislav M, Professor
Biochemistry & Biophysics
PHD, Moscow State University, 1990

Park, William D, Professor
Biochemistry & Biophysics
PHD, University of Florida, 1977

Pellois, Jean-Philippe, Professor
Biochemistry & Biophysics
PHD, University of Houston, 2002

Perez, Stephanie A, Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 2012

Pishko, Elizabeth J, Lecturer
Biochemistry & Biophysics
PHD, University of Texas, 1993

Polymenis, Michael S, Professor
Biochemistry & Biophysics
PHD, Tufts University, 1994

Reinhart, Gregory D, Professor
Biochemistry & Biophysics
PHD, University of Wisconsin - Madison, 1979

Reynolds, Mollie M, Senior Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 2010
Rye, Chavela M, Senior Lecturer
Biochemistry & Biophysics
PHD, MIT, 2014

Rye, Hays S, Associate Professor
Biochemistry & Biophysics
PHD, University of California-Berkeley, 1995

Sacchettini, James C, Professor
Biochemistry & Biophysics
PHD, Washington University in St. Louis, 1987

Shippen, Dorothy E, University Distinguished Professor
Biochemistry & Biophysics
PHD, University of Alabama at Birmingham, 1987

Stover, Patrick, Professor
Biochemistry & Biophysics
PHD, Virginia Commonwealth University, 1990

Straight, Paul D, Associate Professor
Biochemistry & Biophysics
PHD, University of Colorado, 2000

Sze, Sing, Associate Professor
Biochemistry & Biophysics
PHD, University of Southern California, 2000

Threadgill, David, University Distinguished Professor
Biochemistry & Biophysics
PHD, Texas A&M University, 1989

Young, Ryland F, University Distinguished Professor
Biochemistry & Biophysics
PHD, University of Texas at Dallas, 1975

Zeng, Lanying, Associate Professor
Biochemistry & Biophysics
PHD, University of Illinois at Urbana-Champaign, 2007

Zhang, Xiuren, Professor
Biochemistry & Biophysics
PHD, Cornell University, 2003

Biochemistry - BS

The undergraduate biochemistry curriculum is designed to provide a solid background in chemistry and the physical sciences, as well as in the biological sciences. Consequently, biochemistry is an especially versatile major giving undergraduates many options when they complete their BS degree. A biochemistry major provides a strong background for entering graduate school in a variety of fields, and the majority of biochemistry majors go on to graduate school or to professional schools such as medicine, veterinary medicine or dentistry. Biochemistry majors excel in biomedical professional schools because of their strong background in the basic sciences. In addition, a wide variety of job opportunities is open to biochemistry majors with a BS degree. Many find rewarding careers working in laboratories as research scientists, forensic scientists and technicians in clinical, governmental and university laboratories. Biochemists are also employed by diverse companies in the chemical, pharmaceutical, agricultural, food and scientific equipment industries.

Majors in Biochemistry must make a grade of C or better in CHEM 227, CHEM 237, CHEM 228 and CHEM 238 before registration in BICH 440. In addition, majors in Biochemistry must make a grade of C or better in all major coursework used to satisfy the degree plan.

**Semester Credit Hours** 16

**Total Semester Credit Hours** 120

---

1. Often used for a minor degree. Students intending to pursue and advance degree in biochemistry are strongly encouraged to use some free electives for additional upper division courses in BICH (p. 916), GENE (p. 999), BIOL (p. 919), CHEM (p. 929), MATH (p. 1066) or STAT (p. 1154). Except: BICH 303, BICH 410-412 (p. 916); MATH 100-104, 131-148 (p. 1066).

2. To be selected from the University Core Curriculum (p. 25). Of the 21 hours shown as University Core Curriculum (p. 25) electives, 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from POLS 206 and POLS 207. The Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses which may be met by courses satisfying the language, philosophy and culture, creative arts, social and behavioral sciences, government/political science and American history requirements if they are also on the approved list of international and cultural diversity courses.

3. Before registration in BICH 440, students much have attained a grade of C or better in each of these courses: CHEM 227, CHEM 228, CHEM 237, CHEM 238.

4. The fourth registered hour of research must be taken as writing intensive.

5. Hours to be selected from any 400-level course in BICH with approval of student's academic advisor. BICH 404, BICH 414, BICH 431/GENE 431, BICH 432/GENE 432, BICH 440, BICH 441, or BICH 491 may not be used to satisfy this requirement.

Students must make a grade of C or better in all major coursework used to satisfy degree plan.

### Genetics - BS

Curriculum in Genetics is administered by the Department of Biochemistry and Biophysics.

Genetics is one of the most exciting, rapidly expanding areas in the life sciences. More than an independent discipline, it has become the basis for understanding many aspects of medical and agricultural systems, animal and plant diseases, and even animal behavior. Developments in molecular genetics have provided biotechnologies that will dramatically affect our lives from the improved diagnosis of human disease, to the production of viral-resistant crops, to environmental cleanup.

The undergraduate curriculum in genetics allows the study of several different aspects of genetics, including population genetics, human genetics and genetic engineering. The genetics major is designed to develop the knowledge and skills necessary for advanced studies in all disciplines related to life sciences from medicine/veterinary medicine to genetic engineering. This basic science curriculum also has enough flexibility to allow a student to prepare for such diverse careers as forensics, medicine, business or law.

## Biochemistry - Minor

The Department of Biochemistry and Biophysics offers a minor in Biochemistry. Students seeking a minor must complete a minor form (http://biochemistry.tamu.edu/academics/undergraduate-programs/academic-requirements/minors/) and have it approved and signed by the BICH/GENE undergraduate advisor and their major academic advisor. Students are required to obtain a grade of C or better in all minor courses and meet all minor course prerequisites.

3

5

The fourth registered hour of research must be taken as Writing Intensive.

Students must make a grade of C or better in all major coursework used to satisfy the degree plan.
Biochemistry elective (p. 916)  

Total Semester Credit Hours  

1 Hours to be selected from any 400-level course in BICH with approval of academic advisor.  

Students must make a grade of 'C' or better in all courses.

Genetics - Minor

The Department of Biochemistry and Biophysics offers a minor in Genetics. Students seeking a minor must complete a minor form (http://biochemistry.tamu.edu/academics/undergraduate-programs/academic-requirements/minors/) and have it approved and signed by the BICH/GENE undergraduate advisor and their major academic advisor. Students are required to obtain a grade of C or better in all minor courses and meet all minor course prerequisites.

Department of Biological and Agricultural Engineering

Biological and agricultural engineers apply their knowledge of physical and biological sciences, mathematics, engineering principles and engineering design to the production and processing of food and fiber, to the preservation of environmental quality, to biological systems and processes, and to machine systems that interface with all of these. Because of their broad general engineering background, biological and agricultural engineering graduates are sought by a wide variety of employers including environmental consulting firms, equipment manufacturers, crop storage and handling industries, the cotton and forest products industries, food and feed processing industries, animal production industries, biotechnology companies, electric utility companies, chemical companies, and governmental agencies. Biological and agricultural engineers make significant contributions to meeting many basic needs of society such as maintaining food quality, quantity and safety, improving environmental quality, and enhancing the quantity and quality of our water resources.

The Biological and Agricultural Engineering Department provides quality education, research and outreach in engineering and technology for the world’s agricultural, biological, environmental and food systems. Our undergraduate programs provide a high quality education for engineering and systems management students to fulfill the needs of industries we serve and advance our reputation as a world leader in engineering and systems management education.

Biological and Agricultural Engineering is accredited by the Accreditation Board for Engineering and Technology (ABET). The Fundamentals of Engineering (FE) exam is generally your first step in the process to becoming a professional licensed engineer (P.E.). Students are able to obtain these licenses upon graduating from an ABET-accredited program.

PHD, University of Kentucky, 1997

Majors

• Bachelor of Science in Agricultural Systems Management (p. 164)
• Bachelor of Science in Biological and Agricultural Engineering (p. 165)

Minors

• Agricultural Systems Management Minor (p. 167)

Agricultural Systems Management - BS

Graduates of the Agricultural Systems Management program manage people, money and machines in the food and agricultural industries. They are typically employed as production or processing operations managers, equipment managers, or in technical sales and services. Employers include farm and industrial equipment companies, food processing plants, cotton gins, grain and seed companies, livestock feeding operations, irrigation companies, construction companies, manufacturers, and a variety of other employers who need technical managers.

The technological courses are applications-oriented and focus on practical experience in food processing systems, water management, machinery and power systems, electrical systems and electronics. Business courses include accounting, economics, marketing, management, law and finance. Students can obtain a minor in either Agricultural Economics or Business by taking the 15 hours of noted coursework, plus one additional 3-hour class per minor. Management and systems science techniques such as linear programming, simulation, optimization, queuing theory, inventory models, PERT/CPM and expert systems are taught along with applications for solving realistic problems faced by agribusiness managers. Supporting courses provide a foundation of mathematics, chemistry, computer and communications skills. Technical electives are available to develop a degree program that meets personal career objectives.

The curriculum is administered by the Department of Biological and Agricultural Engineering and leads to the Bachelor of Science degree in Agricultural Systems Management. AGSM 360 prepares students for the opportunity to pursue an occupational license. Students who participate in the class regularly and pass the course will be eligible for a ‘30 hour Course for General Industry’ diploma from NASP. Please refer to the Notification for Students Pursuing an Occupational License (http://catalog.tamu.edu/undergraduate/appendices/occupational-licensing/) in our catalog for additional information.

1. To be selected from the University Core Curriculum.
2. The 3 hours of international and cultural diversity (p. 47) and 3 hours of cultural discourse (p. 46) courses, as required for graduation, may be met in the curriculum. Students may select Language, Philosophy, and Culture, Creative Arts, Technical Electives, or American History Electives that also meet the ICD/CD requirement.
3. A minor in Business may be obtained by completing the noted courses, plus ISTM 209. Each of these courses must be completed with a C or better.
4. A minor in Agricultural Economics may be obtained by completing the noted courses, plus AGEC 105. Each of these courses must be completed with a C or better.
5. The two (2) required AGSM Directed Electives must be selected from AGSM 335, AGSM 337, AGSM 435, AGSM 477.
6. All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive (W). This course is an approved W course.
7. Technical electives must be selected in consultation with the student’s advisor and from the current list of approved electives published by the department.

A grade of C or better is required for all Common Body of Knowledge (CBK) courses; ACCT 209, AGSM 301, CHEM 119, ECON 202, MATH 140, MATH 142 and PHYS 201, or equivalents and senior capstone courses AGSM 439 and AGSM 440.

### Biological and Agricultural Engineering - BS

Graduates from the Biological and Agricultural Engineering program will:

- Successfully enter the biological and agricultural engineering profession as practicing engineers and consultants in the natural resources, machine systems, food processing, bioprocessing, and agricultural production and processing fields.
- Pursue graduate education and research at major universities in biological and agricultural engineering, and related fields.
- Advance into leadership positions in their chosen fields and professional societies.
- Engage in life-long learning through professional registration and professional development.

Students learn to apply fundamental knowledge of biological and physical sciences, mathematics, and engineering principles to formulate...
and solve engineering problems. Engineering design is integrated throughout the curriculum, along with opportunities to develop communication, learning, and teamwork skills, culminating in a capstone design experience. Electives in the curriculum allow the student to focus in one of the following areas:

- **Environmental and Natural Resources Engineering**—design and management of systems affecting soil, water, and air resources.
- **Renewable Energy Engineering**—design and development of biomass, wind and solar energy systems.
- **Food and Bioprocess Engineering**—design and development of systems for processing and handling of food and agricultural products and processes involving cells, enzymes, or other biological components.
- **Machine Systems Engineering**—design and development of machines and machine systems for food, feed and fiber production and processing.

Students select courses with the assistance of faculty advisors in an individualized advising system. Faculty members also assist with professional development and job placement for students.

The biological and agricultural engineering program is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering, and the curriculum is fully accredited by the Engineering Accreditation Commission of ABET, Inc., www.abet.org. The department is one of the largest in North America and is consistently ranked as one of the top programs in the nation.

For graduates to become successful practicing biological and agricultural engineers, students need to acquire a set of skills, knowledge, and behaviors as they progress through the curriculum. We have established the following program outcomes outlining what students are expected to know and be able to do upon completion of the curriculum. At the time of graduation, students should have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Biological and Agricultural Engineering is accredited by the Accreditation Board for Engineering and Technology (ABET).**

### Agricultural Systems Management - Minor

The minor in Agricultural Systems Management is available to all students enrolled at Texas A&M University. The primary educational objective of this minor program is to provide students, majoring in other fields, with a fundamental knowledge of the fields of agricultural systems management.

AGSM 360 prepares students for the opportunity to pursue an occupational license. Students who participate in the class regularly and pass the course will be eligible for a '30 hour Course for General Industry' diploma from NASP. Please refer to the Notification for Students Pursuing an Occupational License (http://catalog.tamu.edu/undergraduate/appendices/occupational-licensing/) in our catalog for additional information.
AGSM 477  Air Pollution Control and Regulatory Compliance
Total Semester Credit Hours  18

Students must make a grade of C or better in all courses.

Department of Ecology and Conservation Biology

The Department of Ecology and Conservation Biology provides one of the most advanced educational opportunities available to prepare undergraduate students for leadership in the science and stewardship of rangeland, forest and wetland ecosystems across the rural-urban gradient. We offer Bachelors of Science degrees in Ecological Restoration, Forestry, Rangeland Ecology and Management, Renewable Natural Resources, and Spatial Sciences.

PHD, University of California Davis, 2012

Majors

• Bachelor of Science in Ecological Restoration (p. 169)
• Bachelor of Science in Forestry (p. 170)
• Bachelor of Science in Renewable Natural Resources (p. 219)
• Bachelor of Science in Spatial Sciences (p. 171)

Minors

• Forestry Minor (p. 173)
• Spatial Sciences Minor (p. 173)

Certificates

• Watershed Certificate (p. 173)

Ecological Restoration - BS

Ecological restoration is the process of repairing dysfunctional ecosystems to provide essential ecosystem goods and services important to society. The Ecological Restoration degree prepares students for a career that requires an understanding of the causes of land degradation and strategies for recovery of ecosystems damaged, degraded, or destroyed by natural or human causes.

The curriculum focuses on restoration of damaged ecosystems and landscapes, particularly terrestrial, wetland, and riparian systems in diverse settings that span the rural-urban spectrum. The discipline of ecological restoration requires a strong conceptual/theoretical foundation as well as a practical application component. This degree combines basic sciences, modern technologies, and contemporary ecological knowledge. Students will develop practical capabilities and gain critical understanding of the interaction of biophysical, socio-economic and political drivers that affect land degradation and restoration through a program that incorporates integrated coursework and an internship with ecological restoration practitioners.

Completion of this degree will prepare students to assess the causes of ecosystem degradation and to develop strategies for ecological restoration at multiple spatial scales. Graduates will be equipped for professional careers with environmental consulting companies, governmental and non-governmental land management organizations, and regulatory agencies. This degree program also provides a foundation for students planning to pursue advanced degrees in restoration ecology, disturbed land reclamation, natural resources conservation and management, or related fields.

1 Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

2 Credit by examination may be used to substitute 3 hours of POLS 206 or POLS 207.

3 To be selected from an approved list in consultation with an academic advisor.

### Forestry - BS

The Department of Ecology and Conservation Biology provides one of the most advanced educational opportunities available for developing leaders in the management, conservation and restoration of the world’s diverse forests. Students seeking to study forestry in this department are interested in solving problems related to protecting forest biodiversity, providing wood, water, recreation and wildlife for a growing society, and contributing to the advancement of knowledge about forests. Resolving today’s forest management issues requires a broad education in the biological, physical and social sciences, a solid understanding of the methods used to integrate information from many fields and to solve problems, and an in-depth knowledge of the sophisticated tools and techniques that are an essential part of modern forestry. Curriculum in the Department of Ecology and Conservation Biology incorporates these ideas so that motivated and capable students can become competent forest and resource management professionals and scientists.

Forests cover one-third of the land area of the United States. The products and services derived from forests, and the scenic beauty they provide, have contributed to the well-being of the American people since the founding of this country. These benefits range from lumber and paper to recreation and biological diversity. Forests also are renewable. Under proper stewardship, they yield products and biodiversity indefinitely. Proper management of forests, which is the responsibility of the professional forester, results in healthy, productive forests that are capable of serving human needs and providing a quality environment in rural or urban settings.

The primary objective of the Department of Ecology and Conservation Biology is to educate students in the scientific management of forest resources. Students select a course of study best suited to their educational and career goals. Students also receive help from faculty
advisors in their areas of interest. The total number of credit hours required for a degree is 120.

### Spatial Sciences - BS

A degree in Spatial Sciences offers students the opportunity to obtain a career in a cutting-edge discipline at the intersection of environmental and spatial sciences. The spatial sciences combine multidisciplinary fields of scientific study with geospatial technologies including Geographic Information Systems (GIS), Global Positioning Systems (GPS), and Remote Sensing. A spatial sciences graduate will possess an advanced knowledge of these technologies, experience in interpretation of aerial photographs and processing of satellite images, as well as a broad understanding of computer applications and database management. Graduates are capable of working as environmental and natural resource managers and possess the necessary skills to map geographical features, patterns, and changes. Furthermore, these individuals will be able to lead and conduct modern environmental management activities.
Through core and supporting coursework, students will learn to utilize the full potential of the spatial sciences in real-world problem solving. From real-time wildfire risk assessment to crime analysis, habitat mapping for endangered species, and evaluating environmental damage from natural disasters, the spatial sciences are an integral part of modern resource management.

Students in this degree program receive guidance from faculty advisors in their areas of interest and meet regularly to discuss courses and career opportunities.

<td></td>
<td></td>
</tr>
</tbody>
</table>

Students must complete a minimum of 6 hours in residence at the 300-400 level.

Students must maintain a 2.0 or above in minor curriculum.

Watershed - Certificate

The goal of the Watershed Certificate is to provide a rigorous and high quality program that will produce graduates capable of working as a professional in watershed or hydrology fields, but with very solid scientific and ecological foundation. Graduates will be qualified to work in government or consulting or if they choose, be prepared to pursue graduate training in any watershed/hydrology science program. Training will be built on a solid foundation in watershed management and hydrology.

Department of Entomology

The Department of Entomology at Texas A&M University is one of the top entomology departments in the United States. We offer two undergraduate degrees, a Bachelor of Science degree in Entomology and a Bachelor of Science degree in Forensic and Investigative Sciences (FIVS). Our FIVS degree is the only bachelor’s degree in the state of Texas that is nationally accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC) of the American Academy of Forensic Sciences. Both undergraduate degrees provide students with the necessary curriculum requirements to pursue graduate study in entomology, as well as in other professional fields, such as law and medicine.

Faculty

Adelman, Zachary N, Professor
Entomology
PHD, Colorado State University Fort Collins, 2000

Behmer, Spencer T, Professor
Entomology
PHD, University of Arizona, 1998

Bernal, Julio S, Professor
Entomology
PHD, University of California, Riverside, 1995

Brundage, Adrienne L, Instructional Assistant Professor
Entomology
PHD, Texas A&M University, 2012

Coates, Craig J, Instructional Professor
Entomology
PHD, Australian National University, 1997

Coulson, Robert N, Professor
Entomology
PHD, University of Georgia, 1969

Eubanks, Micky D, Professor
Entomology
PHD, University of Maryland, College Park, 1997

Hamer, Gabriel L, Associate Professor
Entomology
PHD, Michigan State University, 2008

Heinz, Kevin M, Senior Professor
Entomology
PHD, University of California, Riverside, 1989

Helms, Anjel Marie, Assistant Professor
Entomology
PHD, The Pennsylvania State University, 2015

Johnston, J S, Professor
Entomology
PHD, University of Arizona, 1972

Kovar, Scott J, Senior Lecturer
Entomology
MS, CUNY John Jay College of Criminal Justice, 2007

Medina, Raul F, Professor
Entomology
PHD, University of Maryland, College Park, 2005

Myles II, Kevin M, Professor
Entomology
PHD, Colorado State University, 2003

Olive Chavez, Adela, Assistant Professor
Entomology
PHD, University of Minnesota, 2014

Oswald, John D, Professor
Entomology
PHD, Cornell University, 1991

Pietrantonio, Patricia, Professor
Entomology
PHD, University of California, Riverside, 1995

Rangel Posada, Juliana, Associate Professor
Entomology
PHD, Cornell University, 2010

Slotman, Michel A, Associate Professor
Entomology
PHD, Yale University, 2003

Song, Hojun, Associate Professor
Entomology
PHD, The Ohio State University Columbus, OH, 2006

Sword, Gregory A, Professor
Entomology
PHD, University of Texas at Austin, 1998

Tambarindgeuy, Cecilia, Associate Professor
Entomology
PHD, Institut National Polytechnique de Toulouse, 2004

Tarone, Aaron M, Professor
Entomology
PHD, Michigan State University, 2007

Teel, Pete D, Professor
Entomology
PHD, Oklahoma State University, 1978

Tomberlin, Jeffery K, Professor
Entomology
PHD, University of Georgia, 2001

Vargo, Edward L, Professor
Entomology
PHD, University of Georgia, Athens, 1986
Majors
- Bachelor of Science in Entomology (p. 175)
- Bachelor of Science in Forensic and Investigative Sciences, Pre-Law Emphasis (p. 177)
- Bachelor of Science in Forensic and Investigative Sciences, Science Emphasis (p. 178)

Minors
- Entomology Minor (p. 180)

Certificates
- Public Health Entomology Certificate (p. 181)

Entomology - BS

Entomology is a basic and applied science of insects and their relatives such as ticks and mites. Insects are the most numerous and diverse forms of life on earth; they are essential constituents of virtually every terrestrial and aquatic ecosystem. While society benefits from the many diverse roles played by the vast majority of insects, some species may become limiting factors in the production, processing and storage of our food and fiber crops, and to the health and well being of humans and animals. The knowledge and skills possessed by entomologists are essential components of modern integrated pest management strategies designed to safely and efficiently produce adequate food supplies for a continuously expanding world population, and to impede the transmission of insect-borne diseases, while at the same time protecting our endangered species and fragile ecosystems.

The Bachelor of Science degree in Entomology leads to a wide array of career paths with strong employment demands among corporate and private agribusiness; urban pest management companies; scientific and technical organizations; public health agencies; local, state and federal governments; and international organizations. In addition, employment opportunities exist in areas such as forensic entomology, conservation biology, environmental quality, food quality, regulatory inspection, public health and many more. Our curriculum is sufficiently flexible such that a student, in consultation with the academic advisor, may tailor the degree to meet their individual academic goals, including requirements for graduate school, professional schools in the health career areas (medical, veterinary, dental) as well as providing the analytical skills needed for law school. Our department also participates in the Texas A&M accelerate online program for teaching certification, which is an innovative approach to training Texas secondary science teachers to gain the background education needed to prepare for certification to teach science grades 8–12.

Students majoring in related areas such as agronomy, animal science, horticulture, biology, genetics and biomedical sciences may wish to consider augmenting their knowledge base and broaden their career opportunities by electing to either double major or to minor in entomology. Interested students should contact the departmental Undergraduate Advisor for additional information on these options.

1 To be selected in consultation with student's academic advisor in the department. Three hours of international and cultural diversity (p. 47) electives and three hours of cultural discourse (p. 46) are required for graduation; these courses may fulfill other degree requirements as well. See the list of approved courses.
2 Technical electives must be selected in consultation with the student's advisor or from the current list of approved electives published by the department. See Technical Electives table.

Additional Requirements for a Baccalaureate Degree

- Foreign Language (two years of the same language in high school or one year/two semester sequence in college)
- Writing Intensive Courses (two courses designated W in major or one W and one C course in major)
- International and Cultural Diversity Courses (three credit hours)
- Cultural Discourse Course (three credit hours)

Forensic and Investigative Sciences - BS, Pre-Law Emphasis

Forensic and Investigative Sciences, an accredited program by the Forensic Science Education Programs Accreditation Commission (FEPAC), is a major offered by the Department of Entomology and is a growing area of interest for students seeking to gain entry into careers that deal with the collection, preservation, processing and use of evidentiary information to solve problems. A life sciences-based education, which develops skills in problem solving and critical thinking, is essential for career opportunities in this field. Forensic and investigative scientists rely upon state-of-the-art scientific discoveries and technologies as tools to seek answers to critical questions in a variety of settings. Molecular, organismal, environmental, and ecological sources of information are often analyzed and interpreted in industrial, regulatory, legal, medical and associated professions. Graduates will be competitive for employment opportunities in quality assurance laboratories, homeland security and investigative services at local, state and national levels. Graduates will also be well prepared for opportunities to enter post-graduate studies or professional schools including medicine, law, and veterinary medicine.

Interactions with and among plants, animals and microbes occur regularly. These interactions impact public and environmental health and require life science-based forensic and investigative science to improve the quality of life. Homeland security, criminal investigation, environmental quality, agricultural and public health offer careers for students with forensic and investigative skills. Students can also pursue avenues to forensic careers through degree programs in specialty areas such as chemistry, anthropology, physics, computer science and business.

Forensic and investigative sciences also operate at the crossroads of science and the legal profession, and provide opportunities for students to consider pre-law preparation. There are growing demands for attorneys with knowledge and understanding of science and research to address legal issues and cases where the interpretation of science and/or scientific data and analyses are pivotal. Law schools often seek candidates with diverse backgrounds and interests, and they look closely at curricula that stress analytical and problem-solving skills, critical reading abilities, writing skills, oral communication and listening abilities, general research skills, and task organization and management skills.

The Forensic and Investigative Sciences program provides students with opportunities to build these essential skills and knowledge areas through a combination of required and elective courses.

Law Emphasis

This track provides pre-law students with a solid scientific foundation while also preparing them for success in law school. Ultimately, our goal is to empower students to more effectively practice law in arenas where science will play a critical role in the judicial process. We aim to educate and train Texas A&M students as the next generation of lawyers, judges, and policy makers that are best able to critically evaluate scientific research and apply these concepts to the evaluation of evidence, in order to improve the application of justice for all. Students in this major have successfully completed their Juris Doctor (JD) degrees at top law schools.

1 Students must choose one course (minimum 3 hours) from each of the three categories of pre-law directed electives. The remaining pre-law directed electives must be selected in consultation with the student's advisor based on career and educational goals and from the current list of approved list published by the department. See below the approved list of directed electives.

Category 1 - AGEC 105, AGEC 315, AGEC 344, AGEC 350, AGEC 429; ECON 202; ECON 323, ECON 420; ESSM 406; MGMT 209, MGMT 212; PSYC 305; SOCI 211, SOCI 314; URPN 361, URPN 401, URPN 450, WFSC 303.

Category 2 - ALED 340; COMM 203, COMM 243, COMM 305, COMM 325, COMM 443; PSYC 354, PSYC 371; SOCI 304.

Category 3 - ALED 202, ALED 301, ALED 424, ALED 440; FIVS 289, FIVS 421, FIVS 489; GENE 420; HIST 447; PHIL 111, PHIL 307, PHIL 314, PHIL 315, PHIL 334, PHIL 480; RENR 470; SOCI 445.

2 This course fulfills a writing requirement. See Requirement for a Baccalaureate Degree (p. 33) section.

The Forensic and Investigative Sciences program requires students to earn a grade of C or better in all courses within the program curriculum.

University Graduation Requirements:

- Foreign Language (two years of the same language in high school OR one year/ two semester sequence in college)
- Writing Intensive courses (two courses designated W in major or one W and one C course in major)
- International and Cultural Diversity (p. 47) courses (three credit hours)
- Cultural Discourse (p. 46) course (three credit hours)

Forensic and Investigative Sciences - BS, Science Emphasis

Forensic and Investigative Sciences, an accredited program by the Forensic Science Education Programs Accreditation Commission (FEPAC), is a major offered by the Department of Entomology and is a growing area of interest for students seeking to gain entry into careers that deal with the collection, preservation, processing and use of evidentiary information to solve problems. A life sciences-based education, which develops skills in problem solving and critical thinking, is essential for career opportunities in this field. Entomology - Minor

Entomology is a basic and applied science of insects and their relatives such as ticks and mites. Insects are the most numerous and diverse forms of life on earth; they are essential constituents of virtually every terrestrial and aquatic ecosystem. While society benefits from the many diverse roles played by the vast majority of insects, some species may become limiting factors in the production, processing and storage of our food and fiber crops, and to the health and well being of humans and animals. The knowledge and skills possessed by entomologists are essential components of modern integrated pest management strategies designed to safely and efficiently produce adequate food supplies for a continuously expanding world population, and to impede the transmission of insect-borne diseases, while at the same time protecting our endangered species and fragile ecosystems.

Students majoring in related areas such as agronomy, animal science, horticulture, biology, genetics and biomedical sciences may wish to consider augmenting their knowledge base and broaden their career opportunities by electing to either double major or to minor in entomology. Interested students should contact the departmental Undergraduate Advisor for additional information on these options.

Program Requirements

The minor in Entomology is available to all students enrolled at Texas A&M University. The courses listed constitute the minimum 17 hours required for a minor in Entomology.

1. Students must earn a grade of C or better in each course used for the minor.

2. Prerequisite Courses: All prerequisites for each core and elective course also must be met. Prerequisite courses will not be applied to the minor requirements and do not count toward the number of hours needed to complete the minor. Please refer to the Texas A&M University Undergraduate Catalog for a listing of course prerequisites.

3. Availability of courses and minor recognition: The Department of Entomology cannot guarantee the availability of the courses required to meet the minor requirements. Successful completion of the minor will be certified by a degree audit in Howdy during the semester of the student’s graduation. The minor will be recognized after graduation on the student’s transcript, but not on the student’s diploma.

Students pursuing the Minor in Entomology (http://entomology.tamu.edu/entomology-academic-program/entomology-minor/) are to complete the minor application form and submit the document to the Department of Entomology Advising Office in 404 Minnie Belle Heep Building (HPCT).

- ENTO 489 Special Topics in...
- ENTO 491 Research
Students are encouraged to visit the Department of Entomology Advising Office in 404 Minnie Belle Heep Building (HPCT), West Campus, to select the appropriate directed elective courses based on their individual educational and career interests.

Students must earn a grade of C or better in each course used for the minor.

**Public Health Entomology - Certificate**

Population growth and distribution predicted over future decades pose increased risks of disease outbreaks and emergence of new diseases worldwide. Scientists from many disciplines, physicians, veterinarians, health-care practitioners, public health workers and policy makers are needed to provide public health surveillance, make new discoveries, and find solutions to address these risks.

This certificate offers a 15 credit-hour concentration in Public Health Entomology focused on insects and other arthropods that serve as vectors and reservoirs of disease pathogens, and are responsible for the direct and indirect causation of disease.

Employment opportunities in the public health sector include environmental and health service agencies, mosquito control districts, the Centers for Disease Control and Prevention (CDC), the Department of Defense, the World Health Organization, and the PanAmerican Health Organization.

Students completing this certificate will be competitive for employment upon graduation, for graduate programs in related disciplines, such as Master’s programs in Public Health, Epidemiology, and Entomology, as well as professional schools.

**Eligibility Requirements for Entrance:**

1. Completion of a minimum of one (1) course from both Category I and II with a grade of B or better and a cumulative TAMU GPA of 2.0+.
2. Students must complete Eligibility Requirement 1 and submit an application before completion of 75 total credit hours.

**Eligibility Requirements for Application and Entrance:**

1. Complete a minimum of one course from both Category I and Category II with a grade of B or better.
2. Students must complete Eligibility Requirement 1 and submit an application before completion of 75 total credit hours.
3. Must have a 2.0 overall GPA or better at Texas A&M University.

**To Complete the Certification, Students Must:**

- Successfully complete courses in Category I-III PRIOR to enrollment in Category IV.
- Complete all courses within the certification with a minimum grade of C.
- Earn a cumulative 3.0 GPA or better in the certificate courses.
- Complete exit survey.
- Meet the minimum qualifications for graduation as defined by Texas A&M University including a 2.0 cumulative GPA.

For additional information and to discuss the scheduling of these courses upon successful completion of your entrance requirements, please contact a member of the Entomology Academic Advising Team to submit your Certificate in Public Health Entomology Application.

**Department of Food Science and Technology**

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who
successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one’s chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit http://nfs.tamu.edu. (http://nfs.tamu.edu)

Faculty
Creasy, Rebecca, Lecturer
Food Science and Technology
PHD, University of Florida, 2013

Murano, Elsa, Professor
Food Science and Technology
PHD, Virginia Tech, 1990

Quailes, Natasha, Lecturer
Food Science and Technology
MS, Chapman University, 2014

Talcott, Stephen, Professor
Food Science and Technology
PHD, University of Arkansas, 2000

Talcott, Susanne, Associate Professor
Food Science and Technology
PHD, University of Florida, 2004

Majors
• Bachelor of Science in Food Science and Technology, Food Industry Option (p. 182)
• Bachelor of Science in Food Science and Technology, Food Science Option (p. 184)
• Bachelor of Science in Food Systems Industry Management (p. 186)

Certificates
• Food Diversity Certificate (p. 187)

Food Science and Technology - BS, Food Industry Option

Food Science and Technology is an exciting multidisciplinary field that prepares majors with a comprehensive knowledge of the biological, physical and engineering sciences to develop new food products, design innovative processing technologies, improve food quality and nutritive value, enhance the safety of foods and ensure the wholesomeness of our food supply. Food Science majors apply the principles learned in the basic sciences such as food chemistry, biochemistry, genetics, microbiology, food engineering and nutrition to provide consumers with safe, wholesome and attractive food products that contribute to their health and well-being. For more information, visit http://nfs.tamu.edu

The undergraduate curriculum is approved by the Institute of Food Technologists (IFT) and offers two tracks, a Food Science Option and an Industry Option. These tracks provide promising career opportunities in areas such as food product/process design, technical service, research and development, quality assurance, food safety, food law, regulatory oversight, technological innovation, marketing, corporate sales, sensory evaluation and operations management. There are numerous opportunities available for corporate internships, scholarships and study abroad programs that provide real-world experience and enhance opportunities for employment after completing a baccalaureate degree. The major also provides an excellent background for those interested in professional schools, graduate studies, medicine, veterinary medicine, dentistry, pharmacy, physical therapy, nursing, occupational therapy and public health.

Food Industry Option

The Food Industry option integrates knowledge from the basic disciplines of chemistry, microbiology, physics and biology and applies scientific principles from food engineering, food processing operations, sensory evaluation, food safety, HACCP, quality assurance and management to produce foods that are wholesome, affordable and safe. The goal of the curriculum is to prepare Food Technologists for careers in the food and related industries. These careers may involve food processing, manufacturing, technical service, food product development, operations management, regulatory oversight and other technology based opportunities.

Food Science and Technology - BS, Food Science Option

Food Science and Technology is an exciting multidisciplinary field that prepares majors with a comprehensive knowledge of the biological, physical and engineering sciences to develop new food products, design innovative processing technologies, improve food quality and nutritive value, enhance the safety of foods and ensure the wholesomeness of our food supply. Food Science majors apply the principles learned in the basic sciences such as food chemistry, biochemistry, genetics, microbiology, food engineering and nutrition to provide consumers with safe, wholesome and attractive food products that contribute to their health and well-being. For more information, visit http://nfs.tamu.edu

The undergraduate curriculum is approved by the Institute of Food Technologists (IFT) and offers two tracks, a Food Science Option and an Industry Option. These tracks provide promising career opportunities in areas such as food product/process design, technical service, research and development, quality assurance, food safety, food law, regulatory oversight, technological innovation, marketing, corporate sales, sensory evaluation and operations management. There are numerous opportunities available for corporate internships, scholarships and study abroad programs that provide real-world experience and enhance opportunities for employment after completing a baccalaureate degree. The major also provides an excellent background for those interested in professional schools, graduate studies, medicine, veterinary medicine, dentistry, pharmacy, physical therapy, nursing, occupational therapy and public health.

Food Science Option

The Food Science option provides a strong knowledge base and fundamental understanding of chemistry, biology, engineering, physics, statistics, genetics, biochemistry, microbiology and nutrition that is applied toward the preservation, processing, packaging and distribution on foods that are wholesome, affordable and safe. The goal of the curriculum is to prepare Food Scientists for career opportunities in the food and allied industries or for further studies in graduate or professional schools. See an academic advisor for specific course listings.

**Total Semester Credit Hours**

| Credit Hours | 120 |

1. MATH prefix required.

2. The Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) and 3 hours of Cultural Discourse (p. 25). Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For more information on core requirements visit the University Core Curriculum (p. 25) catalog page.

3. Students may earn a chemistry minor by taking 6 hours of additional chemistry courses from an approved list as free electives. See the Department of Chemistry for more details. Students seeking a minor in chemistry must complete the Declaration of Minor in Chemistry form and have it approved by the undergraduate advisor in Chemistry (Room 104 Chemistry) and their NFSC advisor.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.
Food Systems Industry Management - BS

The Bachelor of Science in Food Systems Industry Management is a program that focuses on the application of chemical, physical, and engineering principles to the development and implementation of manufacturing, packaging, storage, and distribution technologies and processes for food products. Includes instruction in food engineering, food preservation and handling, food preparation, food packaging and display, food storage and shipment, and related equipment and facilities design, operation and maintenance. The program capitalizes on the food system supply chain from a post-harvest to table perspective. It is a unique and integrated Science, Technology, Engineering, and Mathematics degree program with an interdisciplinary approach with equal input from Agricultural Systems Management, Food Science and Technology, and Agricultural Economics. Students will be prepared in four core competency domains, as well as high impact experiences to integrate knowledge across discipline areas: (a) operate and manage food processing, storage, and distribution systems; (b) perform systems analysis and management of food processing, storage, and distribution systems; (c) perform economic analyses on food processing, storage, and distribution systems; and (d) effectively manage and utilize large databases and information systems. Students can choose directed electives in specialize areas and will complete 2 capstone class experiences and an off-site internship as part of the degree requirements. For more information, visit http://nfs.tamu.edu.

**Department of Horticultural Sciences**

Horticulture encompasses a unique blend of art, science and technology. Horticultural crops include trees, shrubs, tropical plants, ornamental grasses, herbs, flowers, fruits, vegetables and nuts which are grown and utilized throughout the world. The Department of Horticultural Sciences offers two undergraduate degrees: a Bachelor of Science in Horticulture and a Bachelor of Arts in Horticulture. Our flexible degree plans enable students opportunities to develop programs tailored to their unique career goals. The horticulture industry is one of the largest agricultural industries in the state and offers graduates a multitude of diverse career opportunities.

**Faculty**

Arnold, Michael A, Professor
Horticultural Sciences
PHD, North Carolina State University, 1990

Burghner, Gerald, Lecturer
Horticultural Sciences
PHD, Texas A&M University, 2019
MLA, Louisiana State University, 1994

Byrne, David H, Professor
Horticultural Sciences
PHD, Cornell University, 1980

Cisneros-Zevallos, Luis A, Professor
Horticultural Sciences
PHD, University of California, Davis, 1998

Crosby, Kevin M, Professor
Horticultural Sciences
PHD, Texas A&M University, 1999

The Graduation requirements include a requirement for 3 hours of international and cultural diversity (p. 47) and 3 hours of cultural discourse (p. 46). Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For more information on core requirements visit the University Core Curriculum (p. 25) catalog page.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.

**Food Diversity - Certificate**

Our food supply is internationally connected and highly dependent on additives and ingredients from around the world representing different cultures and processing regulations. As such, issues of food safety, food authentication, food certifications are prevalent and issues of “food diversity” are a nexus between the food industries and consumers. The Food Diversity Innovation Program (FDIP) encompasses key principles of increasing importance to the global food industry including religious and ethnic foods and other certified food systems such as organic, non-GMO, gluten-free, allergen-free, and other personal/socially conscious certifications. Certified food systems require extensive employee training and recordkeeping to verify authenticity, safety, processing adulterations, and fraud. Our endowed FDIP program was established in 2016 as a sustainable high-impact research and education model based on religious and ethnic foods and other certified foods to educate students through high impact learning in concert with the food industry. The current research and education portfolio of FDIP will join forces with the training program for environmental health and interdisciplinary program in toxicology at the graduate and undergraduate level with research in human exposure to toxins in food and water and environmental impacts of food production. These programs will provide outside the classroom high-impact-learning modules for existing courses and research activities for graduate and undergraduate students exploring complexities of diverse food systems, environmental and food toxicology, food safety, and food authentication/adulteration/fraud while engaging in hands-on, life-long learning, and critical thinking activities that increase our students’ ability to thrive and excel in diverse work-environments.
Majors

- Bachelor of Arts in Horticulture (p. 188)
- Bachelor of Science in Horticulture (p. 190)

Minors

- Horticulture Minor (p. 191)

Certificates

- Enology Certificate (p. 192)

Horticulture - BA

This degree blends traditional horticulture with the benefits derived from the human association with plants. This degree offers students the option of pairing a horticulture degree with electives in social sciences, business, education, art and design. Pairing the horticulture degree with a required minor of the student’s choosing from outside of horticulture provides an opportunity for a secondary area of emphasis. Creative opportunities range from planning gala events, operating floral shops, and constructing educational programs for school gardens to pursuing advanced degrees. Graduates may find themselves working in exciting environments including wedding venues, international flower markets, or upscale resorts.

1. The Graduation requirements include a requirement for 3 hours of I (p. 47) International and Cultural Diversity (p. 47) courses and 3 hours of C (p. 46) Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free or directed elective can be used to satisfy this requirement. See academic advisor.
2. Student must successfully compete a course of a foreign language beyond that required by the university in general.
3. Selected general elective courses should include a student's required minor or dual major. Any university approved minor or major is acceptable, except a minor or major in Horticulture as the intent is to provide a concentration in a second field of expertise.
4. This course fulfills a writing requirement (see Requirements for a Baccalaureate Degree (p. 31)).
Horticulture - BS

This degree is designed to provide students with the knowledge and skills needed for production, management and marketing of horticulture and floriculture crops or designing and building residential or small scale commercial landscapes. This degree also offers students with strong interests in science and/or technology opportunities in research related fields including preparation for graduate studies. Career prospects range from producing specialty crops such as local foods for upscale restaurants, controlled environment crop production, managing landscape businesses for growing communities, designing sustainable residential landscapes of the future, working with clientele in botanic and community gardens to enhance urban environments, to growing and marketing fruits and vegetables for healthier lifestyles. Many former students are self-employed, owning their own horticultural crop production, greenhouse, nursery or landscape operation. Others work in upper management of large corporations; facilitate implementation and development of new products and production services; serve in educational institutions, government agencies, or community service organizations; or travel the world developing and marketing future horticultural crops.

3 This course fulfills a writing intensive course requirement.

4 This course fulfills a communications requirement.

5 Hours to be selected based on the emphasis area chosen in consultation with the student’s academic advisor.

### Horticulture - Minor

An undergraduate minor in Horticulture provides students a concentration of courses that focus on areas of horticulture and floriculture. These may range from a broad based, comparative perspective to a narrower application within the field. Students may choose such diverse topics as herb, fruit, and vegetable production, viticulture and wine production (enology), greenhouse and nursery management, floral and landscape design, science and biotechnology, urban and environmental horticulture and much more. Earning a minor in Horticulture provides students with the skills required to have a basic working knowledge in the field of Horticulture.

Upper-level requirement 9
for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one's chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit http://nfs.tamu.edu. (http://nfs.tamu.edu)

**Department of Nutrition**

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council
Majors

- Bachelor of Science in Nutrition, Didactic Program in Dietetics Track (p. 193)
- Bachelor of Science in Nutrition, General Nutrition Track (p. 194)
  - Teacher certification in Biology and Life Sciences, Chemistry and Science (p. 196)
- Bachelor of Science in Nutrition, Molecular and Experimental Track (p. 196)

Nutrition - BS, Didactic Program in Dietetics Track

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

Didactic Program in Dietetics Track

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) and is designed to prepare students for meeting the requirements for the credential of Registered Dietician (RD). The DPD provides a strong science base and foundational courses in nutrition for students desiring a dietetic practice in a clinical, therapeutic, community wellness, public health or food production/service setting.

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one's chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit http://nfs.tamu.edu. (http://nfs.tamu.edu)

### General Nutrition Track

The General Nutrition Track provides a wide range of approved electives in biochemistry, nutrition, food science, microbiology, immunology, genetics, and psychology in order to customize a degree suited to research interests and career objectives. Through this program, students are prepared to work in community nutrition programs, sports nutrition programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. This is also an excellent program for students wanting to go to professional schools such as medicine, dentistry, physical therapy, physician assistant, or pharmacy.

### Teacher Certification

The secondary Provisional Teaching Certificate may be obtained in conjunction with the Bachelor of Science degree in Nutritional Sciences, General Nutrition Track. There are three subject areas available for teacher certification through this degree: Biology/Life Science (grades 8-12), Chemistry (grades 8-12), and Science (grades 8-12).

Students must also complete the STEM (Science, Technology, Engineering, Mathematics) minor. Students interested in teacher certification should contact the teacher certification advisor in the Department of Teaching, Learning and Culture in the College of Education and Human Development for more information.

### Program Requirements

#### First Year

<table>
<thead>

<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>120</td>
</tr>
</tbody>
</table>

1. MATH prefix required.
2. The Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) and 3 hours of Cultural Discourse (p. 46). Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For more information on core requirements visit the University Core Curriculum (p. 25) catalog page. Use the Creative Arts Elective (p. 29) and ANTH 205, ANTH 210 as Language, Philosophy & Culture to satisfy degree requirements as well as international and cultural diversity and cultural discourse requirements.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.

To be eligible to participate in the DPD program, students must maintain an overall GPR of 3.0 or above and have a grade of at least C in all non-nutrition courses and a grade of at least B in all nutrition courses. See NFSC Academic Advisor for information on specific course listings and eligibility requirements.

for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one's chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit http://nfs.tamu.edu. (http://nfs.tamu.edu)

**Molecular and Experimental Track**

The Molecular and Experimental Track emphasizes a fundamental background in the biological and physical sciences that relate to human health and nutrition. This option offers students the opportunity to develop analytical and critical thinking skills through undergraduate research with department faculty, independent study and study abroad programs, and a science-based curricula that is essential for graduate studies and pre-professional schools. The goal of this track is to enable students to seek employment in specialized science-based fields in the biological or medical sciences, to pursue graduate degrees beyond the baccalaureate or to enter professional schools of medicine, veterinary medicine, dentistry, pharmacy or similar disciplines. See academic advisor for information on application procedures, GPA requirements, specific course listings and eligibility requirements.

**Program Requirements**

### Nutrition - BS, Molecular and Experimental Track

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council

### Department of Plant Pathology and Microbiology

Our mission is to conduct leading edge research on plant diseases and plant-microbe interactions that directly and indirectly impact: Our ability to feed the world; Human and animal health; Environmental stewardship and sustainability. Educate and prepare leaders in the STEM fields of plant and environmental health through a creative and challenging educational environment that integrates scholarship, fundamental knowledge, and experiential learning. Convey information relevant to society through effective outreach and services that address plant health, food safety and environmental health to the citizens of Texas, the United States and the World.

An extension of this mission is to train the next generation of environmental professionals by providing them both the analytical and biological understanding to successfully protect the environment while promoting economic vitality.

### Faculty

- Antony Babu, Sanjay, Assistant Professor
  Plant Pathology & Microbiology
  PHD, Newcastle University, 2018

- Chappell, Thomas M, Assistant Professor
  Plant Pathology & Microbiology
  PHD, Duke University, 2010

- Dai, Yuan, Associate Professor
  Plant Pathology & Microbiology
  PHD, Duke University, 2006

- Ebbole, Daniel J, Professor
  Plant Pathology & Microbiology
  PHD, Purdue University, 1988

- Gonzalez, Carlos F, Professor
  Plant Pathology & Microbiology
  PHD, University of Nebraska - Lincoln, 1978
Major breakthroughs are taking place locally, regionally and globally concerning environmental awareness. Environmental hazards take many forms, including microbial threats, toxic wastes and the indirect impact of man’s activities on a fragile ecosystem. As a result, there is a growing recognition that the solutions to environmental problems require innovative multi-disciplinary perspectives and technologically-intensive approaches. The Bioenvironmental Sciences curriculum (BESC) was designed in consultation with numerous industry representatives in order to comply with the most current thinking on the talents needed for tomorrow’s environmental fields. Students will be prepared for a breadth of career choices in the environmental sciences. These choices include such areas as research and development, environmental consulting, remediation of wastes, site assessment and environmental sampling, and environmental law. Graduates from BESC find employment in federal, state and municipal environmental agencies; in industries concerned with the generation and clean-up of hazardous wastes; with environmental advocacy and educational groups. In addition, the strong science base in BESC prepares students for professional and graduate schools in a variety of disciplines.

The curriculum described combines a foundation of required courses of technical and free electives to allow the student the maximum flexibility to design a personalized course of study. Students are advised to focus on an area of emphasis with those electives that come from such categories as conservation/ecology, policy/ethics/regulations, the physical environment, engineering, plant studies, genetics/biotechnology and general environmental. The Department of Plant Pathology and Microbiology also supports the extracurricular activities needed to support a successful environmental professional.

1 Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

2 Select 18 hours from: BESC 204, BESC 311, BESC 314, BESC 320, BESC 357, BESC 367, BESC 401, BESC 402, BESC 403, BESC 411, BESC 489, SCSC 405. Other courses approved by advisor.

3 Courses may be selected from categories designed to reflect the professional aspirations of the student. Select 15 hours from: AGEC 344, AGEC 350, AGEC 429; AGSM 360; ATMO 201; BESC 491; BICH 303, BICH 410, BICH 411; BIOL 213, BIOL 214, BIOL 357, BIOL 440; CHEM 228, CHEM 238, CHEM 316, CHEM 318; ENTO 201, ENTO 424; ESM 308, ESSM 309, ESSM 314, ESSM 320, ESSM 351/RNEN 405, ESSM 406/EESM 440; GENE 412, GENE 431/BICH 431, GENE 432/BICH 432; GEOG 201, GEOG 202, GEOG 203, GEOG 205, GEOG 213, GEOG 330, GEOG 380, GEOG 390, GEOG 398, GEOG 434, GEOG 435, GEOL 101, GEOL 104, GEOL 410, GEOL 420, GEOS 105; HIST 359, HORT 201, HORT 202, MEPS 313, MEPS 411; NSFC 201, NSFC 326/ANS C 326, NFSC 327/ANSC 327, OCNG 420; PHIL 314; PHY5 305, PHY5 330, PHY5 331; PHYS 201, PHYS 202, PHYS 206; POLS 306, POLS 347, POLS 461; RENR 375, RENR 405/EESM 351, RENR 410, RENR 460/RPTS 460, RENR 470; RPTS 307; SCSC 105, SCSC 455; SOCI 328; URNP 360, URNP 370; URNP 460; VTPB 221, VTPP 423, WFSC 301, WFSC 303, WFSC 403, WFSC 405, WFSC 406,WFSC 407, WFSC 420,WFSC 425, WFSC 428.

Environmental Studies - BS

The BS degree in Environmental Studies in the College of Agriculture and Life Sciences provides students with the opportunity to learn about the major societal forces that influence environmental issues. These include political agreement supporting legal and regulatory requirements, economics and the marketplace, environmental values, and technology. Students gain technical background blended with a solid foundation in economics, political issues, environmental law, ethics, and communications. Technology and the environment are well supported in existing curricula and contribute to the multidisciplinary nature of the Environmental Studies degree. Technical courses focus on biological sciences, natural resources, and assessment of the environment and come from the Agricultural Economics; Bioenvironmental Sciences; Entomology; Forest Science; Rangeland Ecology and Management; Recreation, Park and Tourism Sciences; Soil and Crop Sciences; and Wildlife and Fisheries Sciences. It is the fusion of these courses with those from the Liberal Arts that make this a truly unique curriculum. This degree is housed within the Department of Plant Pathology and Microbiology.

A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.
2 Select five from the following in consultation with academic advisor: AGEC 344, AGEC 350, AGEC 429, BESC 314, BESC 357; ECON 202, ECON 203, ECON 323, ECON 412, ENTO 210, ENTO 431/FIVS 431; ESSM 406; GEOG 205, GEOG 401, GEOG 406, GEOS 105, PHIL 205, PHIL 314, URPN 202, URPN 360, URPN 370, URPN 460, POLS 229, POLS 231, POLS 306, POLS 340, POLS 342, POLS 347, POLS 440, POLS 461, SOCI 312, SOCI 328, WFSC 303.
3 Select four from the following in consultation with academic advisor: AGSM 301, AGSM 377, BESC 204, BESC 320, BESC 401, BESC 403, ENTO 201, ENTO 320, ENTO 403, ENTO 424; ESSM 201, ESSM 309, ESSM 320, ESSM 444, FRSC 421, HORT 301, POSC 427, RENR 410, RPTS 316, RPTS 426, RPTS 460/RENR 460, WFSC 304, WFSC 403, WFSC 405, WFSC 418, WFSC 420.

A minimum of 120 semester hours will be required for a BS degree.

University Studies - BS, Environmental Business Concentration

A University Studies Degree differs from a traditional “major” in that it consists of a concentration of 21-24 hours and two minors of 15-18 hours each. The University Studies Degree format was created to provide students the flexibility to combine areas of study that are of special interest. Under the guidelines of the University Studies Degree requirements, the student’s diploma will list “University Studies” in the place where the major is currently listed. The student’s area of concentration (Environmental Business) and the two minors (Rangeland Ecology & Management AND Business) will be indicated on the student’s transcript.

This new degree option features a blending of environmental science coursework and business coursework in a truly unique combination unlike any other degree at Texas A&M University. The Environmental Business concentration draws heavily from the established Bioenvironmental Sciences degree already offered at Texas A&M, but this concentration is significantly different in that it lacks the larger number of life science courses that serve as a necessary foundation in any environmental science degree. The focus on environmental coursework (through the BESC and ECCB courses) coupled with core business coursework allows this University Studies concentration to provide a very well-rounded and marketable degree in a variety of arenas.

This interdisciplinary degree plan provides a highly-marketable focus from an already fast-rising, multi-faceted discipline. The coursework retains the “customizable” nature of the university studies degree within the concentration itself, allowing students a truly one-of-a-kind opportunity for their bachelor’s degree. The Environmental Business concentration provides a solid foundation of Bioenvironmental Sciences...
coursework that, when paired with the Rangeland Ecology & Management minor and the Business minor, provides students with a versatile, sound degree that is uniquely positioned in the job market and combines a general overview of both environmental issues/policies and business administration principals/content.

Total Semester Credit Hours 18

1. The Information Systems CLEP exam is available for students who have not taken ISTM 209 to demonstrate mastery of the course concepts. See http://testing.tamu.edu/Exams/CLEP (http://testing.tamu.edu/Exams/CLEP/).
2. MGMT 212 cannot be used to meet this requirement.
3. Course must be taken in residence at Texas A&M. No transfer courses or substitutions will be allowed.

Students must earn a grade of ‘C’ or better in each course listed above to be awarded the business minor and receive transcript recognition.

Total Semester Credit Hours 15

Students must make a grade of C or better in all courses.

**Bioenvironmental Sciences - Minor**

The purpose of the Bioenvironmental Sciences minor is to prepare students for a breadth of career choices in the environmental sciences. The minor in Bioenvironmental Sciences is available to all students enrolled in majors at Texas A&M University outside of the Department of Plant Pathology & Microbiology.

The minor requirements can be found on the Program Requirements tab. Note that all prerequisites for each core and elective course also must be met. Prerequisite courses will not be applied to the minor requirements and do not count toward the number of hours needed to complete the minor.

Total Semester Credit Hours 15
Department of Poultry Science

Growth of the poultry industry has created the need for scientific, technical and business knowledge in the various fields important to successful poultry production. In few fields of science is an understanding of the basic sciences, nutrition, genetics, physiology, diseases, biotechnology, processing and marketing more rewarding than in the modern, intensive methods of poultry and food production. Students are trained in the necessary background, analytical skills, problem solving and leadership for complex production units, hatcheries, integrated feed mills, processing plants and research laboratories. Rapid industry growth provides many career opportunities for graduates. Students are given two emphasis areas in which to specialize their education toward their selected career goals. The University Core Curriculum courses and the Poultry Science Core courses are required for both emphases. Students then complete a BS degree in either emphasis area by completing the respective emphasis area courses. All students are strongly encouraged to get early and frequent academic counseling which is readily available.

Faculty

Athrey, Giridhar N, Assistant Professor
Poultry Science
PHD, University of Louisiana at Lafayette, 2009

Bailey, Christopher A, Professor
Poultry Science
PHD, Texas A&M University, 1982

Berghman, Luc R, Professor
Poultry Science
PHD, University of Leuven, Belgium, 1987

Carey, John B, Professor
Poultry Science
PHD, Kansas State University, 1982

Duong, Tri, Associate Professor
Poultry Science
PHD, North Carolina State University, 2008

Farnell, Morgan B, Associate Professor
Poultry Science
PHD, Texas A&M University, 2003

Farnell, Yuhua Z, Instructional Assistant Professor
Poultry Science
PHD, Texas A&M University, 2002

McElroy, Audrey, Professor
Poultry Science
PHD, Texas A&M University, 1998

Pillai, Suresh D, Professor
Poultry Science
PHD, University of Arizona, 1989

Walzem, Rosemary L, Professor
Poultry Science
PHD, University of California, Davis, 1987

Poultry Science - BS, Industry Emphasis

Growth of the poultry industry has created the need for scientific, technical and business knowledge in the various fields important to successful poultry production. In few fields of science is an understanding of the basic sciences, nutrition, genetics, physiology, diseases, biotechnology, processing and marketing more rewarding than in the modern, intensive methods of poultry and food production. Students are trained in the necessary background, analytical skills, problem solving and leadership for complex production units, hatcheries, integrated feed mills, processing plants and research laboratories. Rapid industry growth provides many career opportunities for graduates. Students are given two emphasis areas in which to specialize their education toward their selected career goals. The University Core Curriculum courses and the Poultry Science Core courses are required for both emphases. Students then complete a BS degree in either emphasis area by completing the respective emphasis area courses. All students are strongly encouraged to get early and frequent academic counseling which is readily available.

Students completing a BS degree in the industry emphasis find employment with the poultry and food industries in positions such as corporate management, quality assurance, sales or technical support in live production, processing or marketing. Students in this emphasis also get positions with pharmaceutical and equipment companies, with industry trade publications and in various university and public service positions.

Students completing a BS degree in the technical emphasis are prepared for advanced study in biochemistry, nutrition, physiology, molecular genetics, reproduction, processing technology, microbiology or environmental science and for eventual professional employment in research, teaching or public service. This curriculum can be easily tailored to meet the veterinary medicine preprofessional requirements.

**Poultry Science - Minor**

The minor in Poultry Science is available to all students enrolled at Texas A&M University. The main educational goal of this program is to provide students majoring in other fields with a basic knowledge of various fields within the poultry industry. The courses required for this minor will cover information on major topics in the poultry industry.

• Wildlife and Fisheries Sciences Minor (p. 215)

Rangeland Ecology and Management - BS, Ranch Management Option

Students majoring in Rangeland Ecology and Management are taught to integrate knowledge and technology in a systems approach to manage land for sustainable utilization of natural resources. Emphasis is placed on conservation and maintenance of biological diversity in wet to arid environments and sustainable production, conservation and function of land. Rangelands comprise approximately 50% of the land area of the United States and the world. Natural resources on rangelands provide many products and values for society including: livestock grazing, habitat for game and non-game wildlife, water for urban and agricultural uses, recreational opportunities, minerals, oil and gas. The expansiveness and diversity of rangelands require that knowledge and technology be drawn from numerous disciplines.

Employment opportunities are diverse. They include all aspects of natural resource management, including ranch management, environmental consulting, conservation and natural resource planning on private lands and with state and federal agencies. Students also find employment in agribusiness sales, marketing, agricultural finance real estate, consulting
and reclamation. Students can also pursue professional careers in teaching agricultural science.

Two options in the Rangeland Ecology and Management curriculum provide the opportunity for specialization in a minor field.

**Ranch Management Option**

Designed for students preparing for careers in ranch management and agribusiness. This option emphasizes management and utilization of rangeland for livestock and wildlife production. It provides excellent preparation for students desiring to obtain a Master of Agriculture degree in ranch management. Employment opportunities are available on private ranches, businesses, and industries supporting ranches and with state and federal agencies.

**Emphasis Areas**

**Ecology**

Designed for students to explore and specialize in a diverse array of ecological topics. They study plants and animals and the ecological principles essential for effective conservation, management and restoration of the land and associated natural resources. They are prepared for careers in resource monitoring, management and conservation with state and federal agencies and the private sector.

**Environmental Science**

Designed for students preparing for professional careers in environmental management. The coursework includes a basic foundation of ecological sciences, plant taxonomy and rangeland management with emphasis on plants, water and soils. Job opportunities are available in environmental consulting firms, public utility companies, municipalities and federal environmental agencies. The curriculum provides a good foundation for students planning to pursue graduate studies in watershed management, environmental sciences, pollution control or waste management.

**Preveterinary Medicine**

Prepares students for admission to the professional program in veterinary medicine. Students planning to work in large animal practice would benefit from studies in rangeland ecology and management.

**Range/Soil Conservation**

Designed to qualify students as range management specialists or soil conservationists with the federal government. The curriculum will provide students with competitive ratings with federal Civil Service for positions with the Natural Resources Conservation Service, Forest Service and Bureau of Land Management. Various electives and work experience may be used to increase the rating score. Job opportunities are also available in private and state organizations.

**Teaching**

For students majoring in rangeland ecology and management who wish to teach. Directed electives may be chosen so that, following this curriculum, the student is eligible to enter the induction year as a teacher of agricultural science under the Texas Education Agency Plan. Off-campus student teaching is required.

**Watershed Resources**

For students preparing for a professional career in watershed management. Graduates qualify for employment as range management specialists and soil conservationists or, with proper selection of electives, as hydrologists. Opportunities are also available in environmental consulting firms, public utility companies, land reclamation firms, municipalities, secondary school education and private land management.

Rangeland Ecology and Management - BS, Rangeland Resources Option

Students majoring in Rangeland Ecology and Management are taught to integrate knowledge and technology in a systems approach to manage land for sustainable utilization of natural resources. Emphasis is placed on conservation and maintenance of biological diversity in wet to arid environments and sustainable production, conservation and function of land. Rangelands comprise approximately 50% of the land area of the United States and the world. Natural resources on rangelands provide many products and values for society including: livestock grazing, habitat for game and non-game wildlife, water for urban and agricultural uses, recreational opportunities, minerals, oil and gas. The expansiveness and diversity of rangelands require that knowledge and technology be drawn from numerous disciplines.

Employment opportunities are diverse. They include all aspects of natural resource management, including ranch management, environmental consulting, conservation and natural resource planning on private lands and with state and federal agencies. Students also find employment in agribusiness sales, marketing, agricultural finance real estate, consulting and reclamation. Students can also pursue professional careers in teaching agricultural science.

Two options in the Rangeland Ecology and Management curriculum provide the opportunity for specialization in a minor field.

Rangeland Resources Option

Designed for students preparing for careers in the private, state and federal sectors in the area of natural resources conservation and management. It also provides good preparation for graduate study leading to positions in extension, teaching, research and consulting. It allows maximum flexibility to orient a degree program towards specific career interests. Students are encouraged to develop an emphasis area by selecting 15 hours of directed elective courses in related disciplines. Several suggested emphasis areas for the Rangeland Resources Option follow.

Emphasis Areas

Ecology

Designed for students to explore and specialize in a diverse array of ecological topics. They study plants and animals and the ecological principles essential for effective conservation, management and restoration of the land and associated natural resources. They are prepared for careers in resource monitoring, management and conservation with state and federal agencies and the private sector.

Environmental Science

Designed for students preparing for professional careers in environmental management. The coursework includes a basic foundation of ecological...
sciences, plant taxonomy and rangeland management with emphasis on plants, water and soils. Job opportunities are available in environmental consulting firms, public utility companies, municipalities and federal environmental agencies. The curriculum provides a good foundation for students planning to pursue graduate studies in watershed management, environmental sciences, pollution control or waste management.

**Preveterinary Medicine**
Prepares students for admission to the professional program in veterinary medicine. Students planning to work in large animal practice would benefit from studies in rangeland ecology and management.

**Range/Soil Conservation**
Designed to qualify students as range management specialists or soil conservationists with the federal government. The curriculum will provide students with competitive ratings with federal Civil Service for positions with the Natural Resources Conservation Service, Forest Service and Bureau of Land Management. Various electives and work experience may be used to increase the rating score. Job opportunities are also available in private and state organizations.

**Teaching**
For students majoring in rangeland ecology and management who wish to teach. Directed electives may be chosen so that, following this curriculum, the student is eligible to enter the induction year as a teacher of agricultural science under the Texas Education Agency Plan. Off-campus student teaching is required.

**Watershed Resources**
For students preparing for a professional career in watershed management. Graduates qualify for employment as range management specialists and soil conservationists or, with proper selection of electives, as hydrologists. Opportunities are also available in environmental consulting firms, public utility companies, land reclamation firms, municipalities, secondary school education and private land management.

of Science degree. Each student will choose a course of study from among the options within the department’s curricula after consultation with the academic advisor. The chosen option is enhanced by a common departmental “core” of courses necessary for a sound education in the wildlife and fisheries conservation professions.

Students are encouraged to develop an emphasis area within their degree option. To build this emphasis area, students will choose directed electives, from related disciplines, in consultation with their academic advisor and faculty members.

This option (previously known as the Aquatic Ecology and Conservation) is designed for students interested in the research and management of fish, other freshwater and marine organisms, and the ecosystems that sustain them as well as controlled production of organisms in aquatic systems. Careers are available in state and federal resource agencies; fisheries management companies; nongovernmental conservation organizations; environmental consulting firms; and private consultation. In addition, careers may be available in supporting areas such as quality control, supply, marketing, distribution, finance, consultation as well as domestic and foreign resource development. This degree option can also prepare students for grad school. This option meets American Fisheries Society requirements for certification as an Associate Fisheries Professional.

**Wildlife and Fisheries Sciences - BS, Fisheries, Aquaculture and Aquatic Sciences Track**

Graduates are well equipped for post-baccalaureate study in many life science fields (graduate school programs and human and veterinary medicine) or for direct entry into professions such as wildlife management, fisheries management, environmental impact assessment, aquaculture, natural history museum education, zoological park collection management, public school teaching and urban wildlife management. Employers of recent graduates include state and federal resource agencies, scientific foundations, ranches, hunting and fishing clubs, fish farms, environmental consulting firms, museums and secondary schools.

Wildlife Ecology & Conservation; Fisheries, Aquaculture & Aquatic Sciences; and Vertebrate Zoology curriculum options lead to the Bachelor
Students are required to make a C or better in all WFSC and RENR 205/RENR 215 courses.

**Vertebrate Zoology Option**

This emphasis provides the rigorous training needed for careers in the various aspects of natural resources related to the fields of ichthyology, herpetology, mammalogy and ornithology, including behavior, ecology, evolution, genetics, molecular biology, physiology and systematics. It is a flexible program which permits the inclusion of courses specifically required by schools graduate programs as well as schools of dentistry, law, medicine and veterinary medicine.

For students interested in biological diversity and the ecological processes and population interactions that sustain it, courses in this option are designed to provide a strong foundation in basic and applied organismal biology that will prepare students for graduate studies as well as careers within governmental and nongovernmental agencies and environmental firms dealing with biological conservation.

Students who are interested in mathematical and statistical approaches to conservation of endangered species, management of exploited populations, and their habitats will be equipped in basic ecological data analysis and modeling. The demand for professionals who can integrate quantitative methods and ecological concepts is rapidly increasing among government agencies, academia, and the private sector. Possible careers include entry-level assistant positions in fisheries management, wildlife management, environmental consulting, and research at conservation agencies, hospitals, and universities. This is also suitable for students who plan to obtain a post baccalaureate degree (MS or PhD) in ecology and related fields later in order to pursue higher level positions.

A total of 120 semester hours will be required for a BS degree.

**Wildlife and Fisheries Sciences - BS, Vertebrate Zoology Option**

Graduates are well equipped for post-baccalaureate study in many life science fields (graduate school programs and human and veterinary medicine) or for direct entry into professions such as wildlife management, fisheries management, environmental impact assessment, aquaculture, natural history museum education, zoological park collection management, public school teaching and urban wildlife management. Employers of recent graduates include state and federal resource agencies, scientific foundations, ranches, hunting and fishing clubs, fish farms, environmental consulting firms, museums and secondary schools.

Wildlife Ecology & Conservation; Fisheries, Aquaculture & Aquatic Sciences; and Vertebrate Zoology curriculum options lead to the Bachelor of Science degree. Each student will choose a course of study from among the options within the department’s curricula after consultation with the academic advisor. The chosen option is enhanced by a common departmental “core” of courses necessary for a sound education in the wildlife and fisheries conservation professions.

Students are encouraged to develop an emphasis area within their degree option. To build this emphasis area, students will choose directed electives, from related disciplines, in consultation with their academic advisor and faculty members.

| Total Semester Credit Hours | 120 |

---

1. Directed electives to be chosen to meet prerequisite requirements for admission to professional schools.
2. Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.
3. Select from ENTO 201; WFSC 311, WFSC 315, WFSC 401, WFSC 402.

Students are required to make a C or better in all WFSC and RENR 205/RENR 215 courses.

A total of 120 semester hours will be required for a BS degree.

**Wildlife and Fisheries Sciences - BS, Wildlife Ecology and Conservation Option**

Graduates are well equipped for post-baccalaureate study in many life science fields (graduate school programs and human and veterinary medicine) or for direct entry into professions such as wildlife management, fisheries management, environmental impact assessment, aquaculture, natural history museum education, zoological park collection management, public school teaching and urban wildlife management. Employers of recent graduates include state and federal resource agencies, scientific foundations, ranches, hunting and fishing clubs, fish farms, environmental consulting firms, museums and secondary schools.

Wildlife Ecology & Conservation; Fisheries, Aquaculture & Aquatic Sciences; and Vertebrate Zoology curriculum options lead to the Bachelor of Science degree. Each student will choose a course of study from among the options within the department’s curricula after consultation with the academic advisor. The chosen option is enhanced by a common
departmental “core” of courses necessary for a sound education in the wildlife and fisheries conservation professions.

Students are encouraged to develop an emphasis area within their degree option. To build this emphasis area, students will choose directed electives, from related disciplines, in consultation with their academic advisor and faculty members.

Wildlife Ecology and Conservation Option

This option is designed for students interested in the research, management and conservation of wildlife and its ecosystems. This option provides considerable flexibility when designing a degree program and allows students to focus on both terrestrial and aquatic conservation management. Job opportunities are available with state and federal agencies; private land management individuals and companies; state, national and international organizations; zoos and wildlife centers; environmental consulting firms; and as private consultants. In addition, this degree program can prepare students for further graduate school studies in the wildlife and/or fisheries area. Emphasis areas in this option include:

Wildlife Ecology Emphasis

The wildlife ecology emphasis is for students interested in research and management of terrestrial animals and ecosystems, including game, non-game, and endangered species. The ability to be certified is becoming increasingly important for employment. Courses taken can go toward course certification requirements of The Wildlife Society.

Wildlife and Fisheries Management Emphasis

This emphasis is for students interested in understanding and management of both aquatic and terrestrial habitats. Courses taken can go toward course certification requirements of both the American Fisheries Society and The Wildlife Society. The ability to be certified is becoming increasingly important for employment.

Conservation Biology Emphasis

This emphasis is for students interested in conservation of the earth’s biodiversity. This emphasis allows the student to focus on various ecological environments and socio-economic aspects including urban and/or wetland conservation.

1 Directed electives to be chosen in areas related to wildlife management, conservation or animal behavior.
2 Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.
3 Select from ENTO 201, WFSC 311, WFSC 315, WFSC 401, WFSC 402.

Students are required to make a C or better in all WFSC and RENR 205/REN 215 courses.

A total of 120 semester hours will be required for a BS degree.

Wildlife and Fisheries Sciences - 5-Year Bachelor of Science /Master of Public Service Administration

The Department of Rangeland, Wildlife and Fisheries Management and The Bush School of Government and Public Service offers a five-year joint-degree program that allows undergraduate students majoring in Wildlife and Fisheries Sciences to enter the Master of Public Service and Administration program at the beginning of their fourth year. The program integrates the science and practice of managing fish and wildlife populations with policies for these public resources on both public and private lands. Students are prepared for careers in conservation with a foundation in life and physical sciences, mathematics, and problem-solving skills that accommodate animals and their habitats within larger ecological systems. After completing the joint-degree, students are prepared for a wide variety of post-graduate opportunities including employment in local, state, or federal government, non-profit organizations, and private industry.

Total Semester Credit Hours 15

Students must make a grade of C or better in all courses.

**Wildlife and Fisheries Sciences - Minor**

The Department of Rangeland, Wildlife, and Fisheries Management offers an 18-hour minor in Wildlife and Fisheries Sciences as a supplement to
other related majors. The minor includes three required courses as well as three additional courses that students can choose from which include courses centered on wildlife management, fisheries management, habitat management, and differences among the different types of wildlife. Students will get an exposure to both terrestrial and aquatic wildlife and habitats. BIOL 111 and BIOL 112 as well as RENR 205 are required prerequisites for several of these courses.

1 Aquatic course

Students must choose at least one terrestrial and one aquatic course.

Department of Recreation, Park and Tourism Sciences

The undergraduate curriculum leading to a Bachelor of Science degree with a major in Recreation, Park and Tourism Sciences emphasizes problem-solving skills, development of an international perspective and the application of scientific principles to managerial problems. Students study both the social and life sciences to gain an understanding of how to manage and market organizations in the vast park, recreation and tourism industry. The curriculum provides the student with an introduction to the history and concepts of recreation, park and tourism sciences, followed by the knowledge and skills for both entry-level positions and for future professional growth in the field. In addition to core courses, students must fulfill requirements for at least one certificate, and may earn additional certificates. An education in recreation, park and tourism sciences prepares students to become leaders for the 21st century with the capacity to learn from life and throughout life.

Scott, David, Professor
Recreation, Park & Tourism Sc
PHD, Pennsylvania State University, 1990
Recreational, park and tourism sciences prepare students to become professionals with the capacity to learn from life and throughout life. Through the curriculum, students develop the depth and breadth of knowledge needed to scientifically investigate and select among alternatives as well as the intellectual skills to organize and integrate their knowledge in new and more effective patterns. An education in recreation, park and tourism sciences prepares students to become professionals with the capacity to learn from life and throughout life.

Recreation, Park and Tourism Sciences majors must complete at least one of the following certificate options:

**Community Recreation and Park Administration Certificate**

Management of recreation, park and leisure-service agencies requires expertise in problem-solving, decision-making, assessment of social and environmental impacts, personnel, public relations, volunteer management, financing and fund-raising, marketing of services, and needs assessments. Skills in working with people in the legal and political environment are necessary, as well as the ability to assess and work with other organizations for cooperative developments in recreation and tourism. Utilizing computer based decision-aids, students in this emphasis prepare for managerial careers with public recreation and park agencies, youth agencies, not-for-profit recreation agencies, and commercial recreation enterprises.

**Parks and Conservation Certificate**

This option focuses on management of natural and cultural resources associated with conserving parks, and other protected areas, while also providing for their use by people. Land managers and related professionals operate within a variety of forums that require the integration of concepts in the environmental, social and behavioral sciences, along with policy and administrative decision-making. Necessary skills include computer applications for natural resource management, planning and design related to natural and cultural resources. Students with an option in this field look forward to careers with both public and private employers in the recreation, park and tourism fields, including state and federal agencies and private enterprises, non-profit organizations, camps and environmental education programs.

**Tourism Management Certificate**

Tourism is one of the world's largest and most diverse industries. To help students prepare for tourism careers, this option area introduces issues pertaining to the management, development, and promotion of places and events as tourism attractions. Courses in tourism are designed to collectively build understanding about the links that exist between local places, host populations, and various public, private and special interest groups. Students also develop competencies in assessing economic, environmental, social and political impacts of tourism, as well as in tourism marketing. Students in this option can pursue careers in private sector enterprises, government agencies, convention and visitor bureaus, and other tourism-related service organizations.

**Youth Development Certificate**

This option focuses on programs and services that contribute to the development of young people's personal, physical, social and educational abilities. Youth workers are program developers, leaders and managers.
who need to be able to work with youth, families, organizations and communities. Coursework in this option focuses on positive youth development, program planning and evaluation, methods for working with young people, and societal factors that both contribute to and inhibit the development of young people. Students with an option in this field look forward to careers with non-profit, public and for-profit agencies that supply youth development opportunities for young people. Settings include after-school programs, community programs, camps, outdoor adventure and church-related recreation programs.

5 This course satisfies the writing (W) course requirement.

### Renewable Natural Resources - BS

#### Professional Fields of Study and Department Heads

- Rangeland, Wildlife and Fisheries Management - Cliff Lamb, Interim Head
- Recreation, Park and Tourism Sciences - Scott Shafer, Head
- Ecology and Conservation Biology - Kirk Winemiller, Interim Head

#### General Statement

Three departments offer degrees in specific areas of natural resources management and conservation. Students may select one of these degree programs or a broad approach to natural resource education by pursuing the multi-department degree in Renewable Natural Resources.

### Renewable Natural Resources

Renewable Natural Resources (RENR) is for students desiring a rigorous education in the study and management of sustainable ecosystems for a wide variety of resource values. The RENR program of study is comprised of a core of courses and two emphases. The goal of this core/emphasis structure is to provide students with an identity as a renewable natural resources specialist, while, at the same time, affording the flexibility for preparation for a variety of career tracks. One emphasis focuses on management and the other on policy. Technical electives prepare the students in chosen educational and career directions. The underlying goal of the RENR degree is to integrate the scientific issues of renewable natural resources. Graduates of this program will be able to articulate these issues verbally and in writing in their chosen career. Therefore, the RENR degree emphasizes verbal presentations and major papers as well as field-oriented activities.

The RENR programs are designed to help students prepare for careers in public and private organizations associated with the planning and use of natural resources and the environment. Possible employment includes...
areas such as multi-use land management, environmental assessment, resource inventory, natural resource planning, law, policy analysis and land remediation.

An emphasis may be selected in policy or management. The RENR degree consists of 120 credit hours: 42 university core, 42-45 common to both emphasis areas and 24-27 designated by the emphasis area and 9 free elective hours.

**RENR Areas of Emphasis**
The BS in Renewable Natural Resources includes two emphasis areas for students to select. The directed electives available from advisors are what differentiates the emphases.

**Management Emphasis**
Designed for an education in the scientific management of integrated natural resources. In today's world, it is important to have college graduates prepared to deal with integrated systems, accounting for all of the separate aspects of the system. The management emphasis seeks to prepare the student to integrate concerns related to land, water, air, plants and wildlife into the management process. Students select 24 credit hours of directed electives from an approved list in consultation with their advisor. The remaining 9 credit hours are free electives.

**Policy Emphasis**
Designed for students desiring an education in natural resources policy. This emphasis incorporates knowledge from all renewable natural resources disciplines, which provides a foundation for decision-making related to the environment. Students will obtain an understanding of the behavior of institutions and organizations associated with natural resource management.

Professionals associated with natural resources need to consider legislative mandates, community interests, resource evaluation and competing uses, and conflict management techniques. This emphasis prepares the student for work in private industry, public and non-profit agencies, and graduate school. Students must select 24 hours of restricted electives from an approved list in consultation with their advisor. The remaining nine hours are free electives.

1 Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.
2 To be selected from an approved list in consultation with an academic advisor.
3 Credit by examination may be used to substitute for 3 hours of POLS 206 or POLS 207.
4 Students will complete an internship, study abroad or independent research experience.

Park and Natural Resource Management - Minor

The Department of Recreation, Park and Tourism Sciences offers an 18 credit hour minor in Park and Natural Resource Management as a supplement to other majors. The minor focuses on management of natural and cultural resources associated with conserving parks and other protected areas. Land managers and related professionals integrate concepts in the bio-environmental sciences, social and behavioral sciences, and policy and administrative decision-making. Students with an emphasis in this field look forward to careers with both public and private employers in the recreation, park, and tourism fields, including state and federal agencies and private enterprises, non-profit organizations, youth camps, and environmental education programs.

1 Maximum of 3 hours of RENR 400 will apply to Minor.

Students must make a grade of C or better in all courses.

An internship, RPTS 484, is available for minors above the required 18 hours.
Recreation, Park and Tourism Sciences - Minor

The minor in Recreation, Park and Tourism Sciences provides historical and philosophical foundations of recreation and tourism, with flexibility for students to select electives in their areas of interest.

An internship (RPTS 484) is available for minors above required 18 hours.

Youth Development - Minor

The Department of Recreation, Park and Tourism Sciences offers an 18 hour minor in Youth Development as a supplement to other majors. The minor focuses on programs and services that contribute to the development of young people's personal, physical, social and educational abilities. Youth workers are program developers, leaders and managers who need to be able to work with youth, families, organizations and communities. Coursework in this option focuses on positive youth development, program planning and evaluation, methods for working with young people, and societal factors that both contribute to and inhibit the development of young people.

Youth Development - Minor

The Department of Recreation, Park and Tourism Sciences offers an 18 credit hour minor in Tourism Management as a supplement to other majors. The minor focuses on the planning, management, development, and promotion of places and events as tourism attractions. Courses in tourism are designed to collectively build understanding about the linkages that exist between local places and cultures, host populations, and various public, private, and special interest groups. The minor requires RPTS 302 and RPTS 311. Students select four additional courses from a list of ten.

Community Recreation and Park Administration - Certificate

Management of recreation, park and leisure-service agencies requires expertise in problem-solving, decision-making, assessment of social and environmental impacts, personnel, public relations, volunteer management, financing and fund-raising, marketing of services, and needs assessments. Skills in working with people in the legal and political environment are necessary, as well as the ability to assess and work with other organizations for cooperative developments in recreation and tourism. Utilizing computer based decision-aids, students in this emphasis prepare for managerial careers with public recreation and park agencies, youth agencies, not-for-profit recreation agencies, and commercial recreation enterprises.

Hospitality Management - Certificate

The Certificate in Hospitality Management, offered by the Department of Recreation, Park and Tourism Sciences, is designed to provide students with an understanding of the planning, analysis, and decision-making techniques needed for management positions in the tourism and hospitality industries. Students will study and develop skills related to principles of management, sustainability, development, cultural tolerance, marketing, finance, and service quality as they apply to the hospitality and tourism industries.

This program is also approved to be offered online and is delivered via asynchronous technology.

This Certificate requires a minimum of 15 credit hours of designated courses, all of which are to be taken online. If a student has taken the on-campus version of any course prior to enrollment in the Certificate, it may be substituted for the on-line version with permission of the RPTS academic advisor. Students must earn a grade of a C or better in each course used to meet the requirements, and an overall average of at least a 2.5 in applicable coursework.

**Parks and Conservation - Certificate**

This option focuses on management of natural and cultural resources associated with conserving parks, and other protected areas, while also providing for their use by people. Land managers and related professionals operate within a variety of forums that require the integration of concepts in the environmental, social and behavioral sciences, along with policy and administrative decision-making. Necessary skills include computer applications for natural resource management, planning and design related to natural and cultural resources. Students with an option in this field look forward to careers with both public and private employers in the recreation, park and tourism fields, including state and federal agencies and private enterprises, non-profit organizations, camps and environmental education programs.

Total Semester Credit Hours: 19

The PEMC program requires a minimum of 15 credit hours in designated courses, plus the zero-credit course RPTS 324. Students must earn a grade of “C” or better in each course used to meet the requirements, and maintain a “B” average (3.0 GPA) in the required courses. Students who pursue the PEMC must complete all requirements prior to graduation. Details are available in the Undergraduate Programs Office of the Department of Recreation, Park and Tourism Sciences and on our website.

**Professional Event Manager - Certificate**

The Professional Event Manager Certificate (PEMC), offered by the Department of Recreation, Park and Tourism Sciences, is designed to provide students with an understanding of and the ability to plan, implement, and evaluate festivals, fairs and special events in a variety of governmental, not-for-profit and commercial settings. This certificate is open to all majors.

Total Semester Credit Hours: 15

For graduation, students must earn at least a C average (2.0) in certificate courses.
Tourism Management - Certificate

Tourism is one of the world's largest and most diverse industries. To help students prepare for tourism careers, the certificate in Tourism Management introduces issues pertaining to the management, development, and promotion of places and events as tourism attractions. Courses in tourism are designed to collectively build understanding about the links that exist between local places, host populations, and various public, private and special interest groups. Students also develop competencies in assessing economic, environmental, social and political impacts of tourism, as well as in tourism marketing. Students in this certificate can pursue careers in private sector enterprises, government agencies, convention and visitor bureaus, and other tourism-related service organizations.

This program is approved for delivery via asynchronous or synchronous distance education technology.

Youth Development - Certificate

This option focuses on programs and services that contribute to the development of young people's personal, physical, social and educational abilities. Youth workers are program developers, leaders and managers who need to be able to work with youth, families, organizations and communities. Coursework in this option focuses on positive youth development, program planning and evaluation, methods for working with young people, and societal factors that both contribute to and inhibit the development of young people. Students with an option in this field look forward to careers with non-profit, public and for-profit agencies that supply youth development opportunities for young people. Settings include after-school programs, community programs, camps, outdoor adventure and church-related recreation programs.

Total Semester Credit Hours 19

For graduation, students must earn at least a C average (2.0) in certificate courses.
Department of Soil and Crop Sciences

Undergraduate Students who complete the undergraduate course of study receive the degree of Bachelor of Science in Plant and Environmental Soil Science or Turfgrass Science.

The B.S. degrees require a minimum of 120 credit hours. Details of course requirements are given below and in the Texas A&M University Undergraduate Catalog. Information on undergraduate admissions, including how to order a catalog, can be obtained from the Office of Admissions (http://admissions.tamu.edu/). We encourage prospective students to make an appointment with an academic advisor prior to applying.

Undergraduates are required to complete an internship, undergraduate research or study abroad. Soil and Crop Sciences offers a wide variety of experiential learning opportunities for students to achieve their graduation needs. Students are able to complete their experiential learning requirement regionally, nationally, or internationally. Information about undergraduate research and internship opportunities can be obtained from students’ academic advisors and professors.

Plant and Environmental Soil Science

- BS, Crops Emphasis

Curriculum in Plant and Environmental Soil Science is administered by the Department of Soil and Crop Sciences. Students following this curriculum develop and utilize basic scientific knowledge to understand the most fundamental resources—plants, soils, and water—and the interaction of these resources in different environmental settings. The required courses provide an essential foundation in several disciplines, while the elective courses can be selected to meet the interests, needs and objectives of individual students.

Based on professional goals and objectives, students majoring in Plant and Environmental Soil Science will select an emphasis in crops or soil and water. The crops emphasis focuses on the principles of production, management, marketing and use of fiber, forage, grain, biofuel and oilseed crops. The graduate in Plant and Environmental Soil Science with a crops emphasis may choose a career in: education such as consulting, extension, or public relations, or in production agriculture such as biofuel or seed production, farming, or farm management.

Flexible curricula are provided so that each student, in consultation with their academic advisor, can design a degree program that best serves the student’s career objectives.
curriculum develop and utilize basic scientific knowledge to understand the most fundamental resources—plants, soils, and water—and the interaction of these resources in different environmental settings. The required courses provide an essential foundation in several disciplines, while the elective courses can be selected to meet the interests, needs and objectives of individual students.

Based on professional goals and objectives, students majoring in Plant and Environmental Soil Science will select an emphasis in crops or soil and water. In the soil and water emphasis, students will study the nature, properties, management, conservation, and use of soils and water. The graduate in Plant and Environmental Soil Science with a soil and water emphasis may choose a career in: soil and water resource management such as soil surveying, land appraisal, land use planning, conservation and pollution abatement, or watershed management, or in environmental areas such as pollution control and environmental protection as affected by plant-soil-water interactions.

Flexible curricula are provided so that each student, in consultation with their academic advisor, can design a degree program that best serves the student's career objectives.

Semester Credit Hours 15

Total Semester Credit Hours 120

1. Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

2. Choose from core curriculum courses with a MATH prefix.

3. To be selected from SCSC 201 and SCSC 300-499 (p. 1139) courses not already required on the degree plan and selected in consultation with an academic advisor.

4. Statistics course to be selected in consultation with academic advisor.

5. Students will complete an internship, study abroad or independent research experience.

---

**Turfgrass Science - BS**

Curriculum in Turfgrass Science is administered by the Department of Soil and Crop Sciences. Students following this curriculum develop and utilize basic scientific knowledge to understand the most fundamental resources—turfgrass, soils, and water—and the interaction of these resources in different environmental settings. The required courses provide an essential foundation, while the elective courses (i.e., ornamental horticulture, plant protection, business, landscape architecture) can be selected to meet the interests, needs and objectives of individual students.

Turfgrass Science prepares graduates for careers in: management—golf courses, athletic fields, public, private or commercial grounds; production agriculture—turfgrass production, or plant breeding; agribusiness—seed sales, turf equipment and supplies, landscape contractor, commercial or home lawn care specialists; education—consulting, extension, or public relations.

Semester Credit Hours 15
### Agronomy - Minor

The Department of Soil and Crop Sciences offers a minor in Agronomy. The minor in Agronomy prepares agricultural majors for a career in the nation's food, feed, fiber, greenspace, shelter, and bioenergy industries. Exposure to this academic discipline could lead students to the pursuit of advanced degrees and a career in the field of agronomy or several related agricultural fields. Agronomy is the cornerstone of modern agriculture that provides the necessities of human existence at a level unprecedented in human history. Continued advancement in productivity must be made in order to feed, clothe, shelter, and meet other basic human needs as global population continues to expand.

SCSC 105, Food & Fiber or SCSC 205, Problem Solving in Plant and Soil Science and SCSC 301, Soil Science are required. Select an additional 8

**Total Semester Credit Hours**

1. Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) courses and 3 hours of Cultural Discourse (p. 46) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.
2. Choose from core curriculum courses with a MATH prefix.
3. To be selected from SCSC 300-499 (p. 1139) courses not counting elsewhere on the degree plan and in consultation with an academic advisor.
4. Statistics course should be selected after consultation with an academic advisor.
5. Students will complete an internship, study abroad or independent research experience.

---

### Agronomy - Minor

The Department of Soil and Crop Sciences offers a minor in Agronomy. The minor in Agronomy prepares agricultural majors for a career in the nation’s food, feed, fiber, greenspace, shelter, and bioenergy industries. Exposure to this academic discipline could lead students to the pursuit of advanced degrees and a career in the field of agronomy or several related agricultural fields. Agronomy is the cornerstone of modern agriculture that provides the necessities of human existence at a level unprecedented in human history. Continued advancement in productivity must be made in order to feed, clothe, shelter, and meet other basic human needs as global population continues to expand.

SCSC 105, Food & Fiber or SCSC 205, Problem Solving in Plant and Soil Science and SCSC 301, Soil Science are required. Select an additional 8
hours of course work within Soil and Crop Sciences. Please speak with an advisor concerning courses prior to registering.

1. Except SCSC 481, SCSC 484, SCSC 491
2. Students with a major in the Department of Soil and Crop Sciences may not use courses already used elsewhere in their degree program.

Students must make a grade of C or better in all courses.

Environmental Soil Science - Minor

The Department of Soil and Crop Sciences offers a minor in Environmental Soil Science. The minor in Environmental Soil Science prepares agricultural majors for a career in industry, government, and non-government organizations that address environmental issues related to soil, soil science, and water quality. Additional career avenues include industry and agencies dealing with food, feed, fiber, greenspace, shelter, and bioenergy. Exposure to this academic discipline could lead students to the pursuit of advanced degrees and a career in the field of soil science or several related agricultural fields.

SCSC 301, Soil Science is required. You may select from the 11 hours of soil science courses. See an advisor for more details.

1. GEN 301 may be substituted for GEN 310. Must have an overall GPA of 2.75 to enter program.

Students must make a grade of 'C' or better in all courses.

Plant Breeding - Minor

The Department of Soil and Crop Sciences offers a Minor in Plant Breeding. The minor in plant breeding prepares agricultural majors for a career in nation's variety development industry and exposes the student to an academic discipline that could lead to the pursuit of advanced degrees and a career in the field of plant breeding. Plant breeders develop new varieties that are the cornerstone of modern agriculture and improve the genetic basis of improved yield, quality, and resistance to biotic and abiotic stresses affecting or nation's food, feed, fiber, greenspace, shelter, and bioenergy plants.

SCSC 304, plant breeding and genetics, and GEN 301, principles of heredity, are required courses. Students select an additional nine hours of course work and a C or better is required in all coursework. GEN 301 may be substituted for GEN 310. The Plant Breeding minor offers the opportunity for students to explore their interest in applied biological sciences in the areas of plant breeding, crop improvement, crop biotechnology, and genetics. Students must have an overall GPA of 2.75 or better to enter the program.

University Studies Programs

The College of Agriculture and Life Sciences offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration of 26 hours and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

• Bachelor of Science in University Studies, Environmental Business Concentration (p. 200)
• Bachelor of Science in University Studies, Leadership Studies Concentration (p. 151)

University Studies - BS, Leadership Studies Concentration

The University Studies-Leadership (USAL/LED) degree is an interdisciplinary program requiring the completion of 120 semester credit hours with a concentration of 26 hours of leadership studies and two 15-18 credit hour minors. The University Studies Degree format was created to provide the student the flexibility to combine areas of study that are of special interest. In the leadership studies concentration, students learn theories and models of the leadership process and they use analysis and evaluation to synthesize multiple leadership theories. This interdisciplinary program allows students the ability to customize their higher education experience to their future career goals. The student, with support from an USAL/LED advisor, will choose minors to assist them in creating a degree plan that will allow students to gain the knowledge and skills required for their chosen career path.
For more information on this major, visit our USAL/LED web page (https://alec.tamu.edu/academics/undergraduate/university-studies-usalled/).

Total Semester Credit Hours 120

---

1. Before registering as a junior, each student must develop a degree program in consultation with the departmental advisor.
2. The total number of hours between Minor 1, Minor 2 and general electives must be 54 hours. Courses counting in other areas of the degree plan and toward a minor cannot count toward the 54 total hours. One of the two minors must be completed in a college outside of the College of Agricultural and Life Sciences. Must meet with an advisor to determine correct hours.

Students are required to make a C or better for each of their courses in the major coursework.

At least 36 credits must be 300- and 400-level courses.

The Graduation requirements include a requirement for three hours of international and cultural diversity courses and three hours of cultural discourse courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.
COLLEGE OF ARCHITECTURE

Administrative Officers
Dean - Jorge A. Vanegas, Ph.D.
Executive Associate Dean - Dawn Jourdan, Ph.D.
Associate Dean for Outreach and Diversity - Cecilia Guisti, Ph.D.
Associate Dean for Academic Affairs - Leslie H. Feigenbaum, M.S.
Associate Dean for International Programs - Elton Abbott, D.E.D.

General Statement
The College of Architecture offers undergraduate and graduate professional programs to prepare individuals to enter the professions of architecture, landscape architecture, construction management, urban and regional planning and visualization. The planning, design and construction of the world's buildings, cities and landscapes involve a variety of professional skills. The faculty of architects, urban planners, landscape architects, engineers, computer scientists, constructors, lawyers, historians and artists, in collaboration with educators in the language, philosophy and culture and natural and social sciences, help students develop an understanding of the physical, social, economic and political forces that shape our environment.

Undergraduate degree programs are offered in landscape architecture, construction science, environmental design architectural studies, visualization and urban and regional planning. Minors in art and architectural history, global art, design and construction; architectural fabrication and product design; and sustainable architecture and planning are offered through the Department of Architecture. A minor in urban and regional planning is offered through the Department of Landscape Architecture and Urban Planning. Minors in facility management; and leadership in the design and construction professions are offered through the Department of Construction Science. Minors in art; and game design and development are offered through the Department of Visualization. Master’s degree programs are offered in architecture, landscape architecture, urban planning, land and property development, construction management, fine arts and visualization. Doctor of Philosophy degrees are offered in architecture and urban and regional sciences.

Personal Computers
Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the College of Architecture (http://dept.arch.tamu.edu) or in a professional internship. Specific information on these programs is available through each department or the Texas A&M Education Abroad Office.

Enrollment Management Policy
Students that are admitted into the College of Architecture enter with a lower level classification in Construction Science (p. 244) (COSL), Environmental Design Architectural Studies (p. 237) (EDAL), Landscape Architecture (p. 248) (LANL), Urban and Regional Planning (p. 248) or Visualization (p. 258) (VISL). All students must comply with the guidelines in terms of coursework and process to be considered for upper level. Until students are accepted into upper level they are prohibited from taking 300 and 400 level courses in their major.

Admission will be effective upon successful completion of in-progress courses. If all requirements are not met prior to the start of the following semester, admission will not be granted and registration in all upper level coursework in the College of Architecture will be cancelled. Admission is not guaranteed. If there are more qualified applicants than there is space available, preference will be given to students based on their academic achievement.

Transfer Students
Transfer students, who meet the University entrance requirements and who desire to enter a major field of study in the College of Architecture, will be admitted based on available space and current College of Architecture entrance criteria. Following admission, all transfer students are placed on a 2.5 GPA probation for a minimum of 12 credit hours to substantiate competency in required lower-level courses. Transfer students will be admitted into the college with a lower-level classification and may apply for upper-level status after at least one semester at Texas A&M University.

Transfer students accepted into the Bachelor of Environmental Design degree program must submit a portfolio to the Department of Architecture to receive credit for drawing and design studio classes taken at another university or college, unless the course is listed as an equivalent under the Texas common course numbering system. The review of the portfolio will ensure appropriate studio placement. Additional information may be found on the Department of Architecture (http://dept.arch.tamu.edu/undergraduate/prospective-students/) website.

Change of Major
Students currently enrolled in another major at Texas A&M University with fewer than 60 hours who desire to change their major field of study into the College of Architecture must fill out a Change of Curriculum application. Deadlines for applications are as follows:
- March 1 for summer admittance (for Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning, Visualization and University Studies students)
- June 15 for fall admittance (for Construction Science, Environmental Design Architectural Studies, Urban and Regional Planning, Visualization and University Studies students)
- October 1 for spring admittance (for Construction Science, Urban and Regional Planning, Visualization and University Studies students)

Students will be notified of action on their applications within 30 days of the deadline date. The college will admit the best-qualified applicants based on the number of spaces available in their program of choice.

Semester Away
The College of Architecture requires all upper-level undergraduate students to spend one semester studying abroad or at another university, or in a professional internship. Specific information on these programs is available through each department or the Texas A&M Education Abroad Office.
Academic Policies

For Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban Planning and Visualization

Majors: Students must make a grade of C or better in every College of Architecture course (ARCH, ARTS, CARC, COSC, ENDS, LAND, LDEV, URPN, VIST) used to satisfy degree requirements. Students must also make a grade of C or better in any course used as an equivalent substitution for College of Architecture courses that satisfy degree requirements. All majors within the college require student to maintain a 2.0 or better GPA; the college does not offer academic probation.

Majors

College of Architecture

- Bachelor of Science in University Studies, Global Arts, Planning, Design and Construction Concentration (p. 257)

Department of Architecture

- Doctor of Philosophy in Architecture (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/phd/)

Department of Architecture

- Doctor of Philosophy in Urban and Regional Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/landscape-architecture-urban-planning/urban-regional-science-phd/)

Global Culture and Society - Minor

The Global Culture and Society minor will combine a study abroad experience at a single Texas A&M University-affiliated facility abroad with the completion of an interdisciplinary undergraduate minor on a theme appropriate for the center that can be completed in one semester.

- b. Co-curricular component
- c. Service learning component
- d. Capstone retreat

Other Courses approved by student's college 2

Total Semester Credit Hours 16

Students must make a grade of C or better.

1. Portfolio in global culture and society. May be completed either during the long semester abroad or upon return to College Station.
2. Must be taken in a single fall or spring semester at a TAMU-affiliated facility such as Santa Chiara or Softis Center.

Diversity - Certificate

The Diversity Certificate, developed and administered in association with the Department of Multicultural Services, is available to undergraduate students in several colleges at Texas A&M University, including the College of Architecture. Drawing from existing courses, programs and associations within the university, the Diversity Certificate Program enables its students to create, synthesize and integrate academic coursework, co-curricular experience, and service learning engagement in order to demonstrate their preparedness for participation in the modern global economy.

Students who complete the certificate will be able to discuss issues such as race, ethnicity, gender, disability and socioeconomic status, and explain how individual and group behavior affects others in terms of human rights, environmental, social, and economic well-being. To complete the certificate, students must complete a one-hour directed study course in addition to 12 hours of academic coursework from their field of study. See the Program Requirements section for more information, or go to https://dms.tamu.edu/academics/diversity-certificate/.

Department of Architecture

The undergraduate curriculum in Environmental Design Architectural Studies at Texas A&M University is offered through the Department of Architecture. The four-year Bachelor of Environmental Design (BED) degree prepares students for challenging careers in industries supporting the built environments. The program produces graduates who are
prepared to influence society with informed and visionary designs—designs that ensure sustainability by responding to cultural, social, economic and ecological factors.

Students interested in professional registration as an architect must complete a National Architectural Accreditation Board (NAAB) accredited Master of Architecture program in addition to the four-year undergraduate Bachelor of Environmental Design degree.

Enrollment in Environmental Design Architectural Studies Upper Level Program

1. Students must have satisfactorily completed at least 54 hours of coursework with a minimum GPA of 2.5 for those courses completed at Texas A&M University.

2. Students must satisfactorily complete the following courses as part of the 54 hours of coursework with a minimum of a 2.5 GPA to apply for upper level.

3. Students must apply to the upper level through the department. The application is to be submitted by the following date:
   - March 1 for Summer and Fall admission

4. Students applying for upper level must submit a portfolio that provides documentation of the applicant's design representation and creative problem solving ability. Portfolios will be reviewed as evidence supporting design ability. Guidelines are outlined on the application form and in the Student Services office. Students will be admitted according to available space.

Preparation for Professional Studies in Architecture

Although the four-year BED degree at Texas A&M University is a pre-professional degree and is not accredited by the National Architectural Accrediting Board (NAAB), those who have completed this pre-professional degree can apply to an accredited Master of Architecture program, which is offered at Texas A&M University.

In the United States, most state architectural registration boards require, as the prerequisites for licensure, a degree from a National Architectural Accrediting Board (NAAB) accredited professional degree program, the fulfillment of the National Council of Architectural Registration Board's (NCARB) Internship Development Program (IDP), and the successful completion of NCARB's Architectural Licensing Examination (ARE). The NAAB, which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture (BArch), the Master of Architecture (MArch), and the Doctor of Architecture (DArch). Students should consult the Texas A&M Master of Architecture, NAAB and NCARB websites for additional information.

Transfer and Change of Major Students

Transfer and change of major students (students currently enrolled in another major at Texas A&M University) who are admitted to the Department of Architecture are classified as lower level (EDAL). Transfer students who meet all the criteria for admittance to upper-level studies may immediately apply for admittance to upper level.

Transfer students who have completed at least 24 graded transferable hours, and change of major students who have completed at least 12 graded transferable hours are encouraged to participate in a 10-week summer module offered by the Department of Architecture. The summer module is designed to provide an intensive first-year design studio sequence along with support coursework that will enable change of major and transfer students to qualify for sophomore design studios the following semester. This summer module can enable Transfer and Change of Major students to complete the four-year degree in a more efficient and timely manner.

Transfer students accepted into the Bachelor of Environmental Design degree program must submit a portfolio to the Department of Architecture to receive credit for drawing and design studio classes taken at another university or college, unless the course is listed as an equivalent under the Texas common course numbering system. The review of the portfolio will ensure appropriate studio placement. Additional information may be found on the Department of Architecture website.

**Majors**

- Bachelor of Environmental Design in Environmental Design Architectural Studies (p. 240)

**Minors**

- Architectural Fabrication and Product Design Minor (p. 241)
- Architectural Heritage Conservation Minor (p. 242)
- Art and Architectural History Minor (p. 242)
- Global Art, Design and Construction Minor (p. 243)
- Sustainable Architecture and Planning Minor (p. 243)

**Environmental Design Architectural Studies - BED**

The degree in Environmental Design Architectural Studies requires study in the arts, humanities and sciences. The curriculum fosters creativity and problem-solving skills while providing a solid foundation in design, theory, architectural history, building and technology. Coursework encourages multidisciplinary and comparative perspectives that allow opportunities for communication and team-oriented methods of production. Global perspectives are encouraged by a mandatory semester-long study away experience that includes study abroad or internship opportunities.

Students develop skills and acquire knowledge through a studio-based experience with a variety of proposed or actual design-related projects. The studio projects place a shared emphasis on the technical and expressive content of design work; the processes by which student’s research, synthesize and document their design ideas; and the creation of tangible products that achieve a high quality of graphic and physical craft.

1. To be selected from any of the 100-499 level courses designated as cultural discourse (p. 46) (CD) not used elsewhere (such as CARC 101).
2. Study away electives will be selected with approval of the Assistant Dean for International Programs and Initiatives.
3. Select from ARCH 216, ARCH 246, ARCH 260, ARCH 317, ARCH 327, ARCH 328, ARCH 345, ARCH 421, ARCH 430, ARCH 433, ARCH 434, ARCH 438, ARCH 441, ARCH 458, ARCH 463, ARCH 481, ARCH 484; ARTS 330, COSC 253; GEOG 330; LAND 301; RENR 375; URPN 340, URPN 361, URPN 370, URPN 470.

All proposals for undergraduate independent study must be signed by the supervising faculty and submitted to the department for approval; forms are available from the Department of Architecture Undergraduate Advisor (in Langford ARCA 219) and on the department website.

A grade of C or better must be made in all College of Architecture courses (ARCH, ARTS, COSC, CARC, ENDS, LAND, LDEV, URPN, and VIST). Students must also make a grade of C or better in any course used as an equivalent substitution for College of Architecture courses satisfying degree requirements.

Architectural Fabrication and Product Design - Minor

The minor in Architectural Fabrication and Product Design can serve as a complement to several major fields of study and is open to all Texas A&M University undergraduates. The structure of the minor encourages students to gain a broad understanding of the terminology, history, prototyping and professional practices in Architectural Fabrication and Product Design. The minor includes six (6) credit hours of foundation coursework and nine (9) credit hours of design, theory and practice coursework.

1. This is a 1 credit hour course that must be taken three times for a total of 3 credits.

Must make a grade of 'C' or better in all courses.

NOTE: Must see ENDS Undergraduate Academic Advisor for minor form
Architectural Heritage Conservation - Minor

The minor in Architectural Heritage Conservation provides an interdisciplinary and global approach to understanding heritage conservation and its importance to sustainable conservation of the built environment. The curriculum emphasizes an awareness of principles and theories impacting architectural heritage conservation. In addition, the minor enables students to explore technological advancements critical to documenting and assessing the built environment. The minor in Architectural Heritage Conservation can serve as a complement to several major fields of study and is open to all Texas A&M undergraduates. The structure of the minor encourages students to gain a broad understanding of the foundations of conservation before advancing to specialized areas of interest. The minor includes six (6) credit hours of required foundation coursework, three (3) credit hours of architectural history, and six (6) credit hours elective coursework. Note: The minor is 15 credit hours. Six (6) hours of minor coursework must be in residence at the 300-400 level.

1 Eligible undergraduate students meeting prerequisite requirements may enroll in the ARCH 648.

Students must complete a minimum of 6 hours in residence at the 300-400 level.

Students applying for a minor in Architectural Heritage Conservation must have a 2.0 or better overall GPR. Some colleges and departments outside the College of Architecture may permit their students to minor.

Students must obtain a C or better in each course listed above (or in any transfer course used as an equivalent).

Coordination with Bachelor of Environmental Design (BED) Degree Plan - For students pursuing the BED degree, upper level coursework for the minor may be applied to general or free electives, but may not be applied to directed electives or any other requirements for BED degree plan.

Art and Architecture History - Minor

The Minor in Art and Architecture History provides undergraduate students with an interdisciplinary, global, and multicultural approach to understanding visual arts and the built environment. The curriculum emphasizes an awareness of diverse global cultures and historical traditions, an appreciation of context, visual understanding, and critical thinking. The Minor in Art and Architecture History can serve as a complement to several major fields of study and is open to all Texas A&M undergraduates. The structure of the minor encourages students to gain a broad chronological understanding of art and architectural history before advancing to specialized areas of interest. Coursework includes six (6) credit hours at the introductory level (100- and 200-level courses) and nine (9) credit hours in specialized subjects at an advanced level (300- and 400-level courses) for a total of 15 credit hours.

The application form can be found on the Department of Architecture's website. Per university guidelines, the student's home college/department is responsible for advising students pursuing the Minor in Art and Architecture History.

Total Semester Credit Hours: 18

1. Must be taken as international internship.
2. Must be taken as international studio.

Students must make a grade of C or better.

**Sustainable Architecture and Planning - Minor**

The Minor in Sustainable Architecture and Planning (SARP) provides undergraduate students with a multidisciplinary approach to understanding sustainability of the built environment. The curriculum emphasizes an awareness of responsible practices at a variety of scales impacting the built environment: buildings, communities, architectural systems, global resource management, and social equity. Students will become aware of responsible architectural design and develop critical thinking skills to address the multifaceted issues facing the profession today.

The Minor in Sustainable Architecture and Planning can serve as a complement to several major fields of study and is open to all Texas A&M undergraduates. The structure of the minor encourages students to gain a broad understanding before advancing to specialized areas of interest.
Coursework includes six (6) credit hours at the introductory level (100- and 200-level courses) and nine (9) credit hours in specialized subjects, three of which must be at an advanced level (300- and 400-level courses) for a minimum total of 15 credit hours. Per University guidelines, the student’s home college/department is responsible for advising students pursuing the Minor in Sustainable Architecture and Planning.

Total Semester Credit Hours 15

1. At least three of the nine hours must be at the 300-400 level. Six of the nine hours may be coursework taken outside of the College of Architecture.

2. BED majors may not use directed electives to satisfy both the minor and graduation requirements. USAR majors may not use coursework to satisfy both the minor and the concentration area.

3. Students must complete a minimum of 6 hours in residence at the 300-400 level.

Students must make a grade of ‘C’ or better in all courses.

**Department of Construction Science**

The construction industry is the largest industry in the nation with more than 7.7 million employees who annually produce more than 5 percent of the nation’s Gross Domestic Product. Managing the construction process requires a broad understanding of the principles of construction science as well as leadership skills in motivating teams and integrating a wide range of tasks to produce a completed project.

The primary mission of the Department of Construction Science is to prepare students for successful careers and future leadership roles in construction and construction-related industries. The program integrates principles of architecture, technology, engineering, business and project management preparing students to effectively manage the total construction process. Courses taught by the Department include construction materials and methods, fundamental design courses in soils and foundations, mechanical and electrical systems and structures, project control systems and management, construction law, labor and contracts, and industry emphasis courses. In addition, related courses from other colleges are included to ensure a broad base of knowledge in business, engineering and construction fundamentals.

**Enrollment in Construction Science Upper Level Program**

1. Students must have satisfactorily completed at least 54 hours of coursework with a minimum GPA of 2.5 for those courses completed at Texas A&M University.

2. Students must satisfactorily complete the following courses as part of the 54 hours of coursework with a minimum of a 2.5 GPA to be considered to upper level:

- Bachelor of Science in Construction Science (p. 246)

**Minors**

- Facility Management Minor (p. 247)
- Leadership in the Design and Construction Professions Minor (p. 248)

**Construction Science - BS**

The Construction Science Program is a 120 hour program accredited by the American Council for Construction Education. Strong ties are maintained with the construction industry via the Construction Industry Advisory Council, an organization of construction and construction-related companies and individuals committed to supporting the Construction Science Program at Texas A&M University.

The undergraduate program integrates the principles of architecture, technology, engineering, business and project management, which prepares students to effectively manage the total construction process. Specialized course work in building systems, materials and methods of construction, scheduling, cost estimating, structures, construction management, law, and business/labor relations are taught. This interdisciplinary approach provides the student with the best possible exposure to the various tools needed to become a construction industry leader.

Construction management graduates quickly become valued members of a construction team and participate in planning, cost estimating, scheduling, supervision, and commissioning of complete facilities in a timely, safe and quality manner. They also possess the professional knowledge to confidently interact with professional engineers, registered architects, and owners to solve problems that may arise.

In addition to the academic coursework, each student is required to accomplish an approved internship of full-time practical work experience with a construction company, or in a construction-related work activity. For more information, please visit the Department of Construction Science website.

Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the College of Architecture website.

This program is approved to be offered at the Texas A&M Higher Education Center in McAllen, Texas.

  - Select one of the following:
    - COSC 326: Mechanical, Electrical and Plumbing Systems in Construction II
    - COSC 421: Soil and Structural Analysis
    - COSC 461: Building Information Modeling System
    - COSC 489: Special Topics in...
- COSC directed elective IV 4
  - Select one of the following:
    - COSC 326: Mechanical, Electrical and Plumbing Systems in Construction II
- Semester Credit Hours 15
- Total Semester Credit Hours 120

---

1. Consult with advisor for course options.
2. Internship must be Fall or Spring semester. Only online courses at Texas A&M can be taken during an official internship.
3. Capstone must be taken the last semester.
4. Must select a course from Directed Electives 1, 2, or 3 that has not already been completed for credit.

A grade of C or better is required in all College of Architecture course (ARCH, ARTS, CARC, COSC, ENDS, LAND, URPN, and VIST) to satisfy Construction Science degree requirements.

### Facility Management - Minor

The Department of Construction Science offers a minor in Facility Management.

Facilities management is an integral part of the built environment and students will learn to strategically and systematically manage and ensure functionality of the built environment by integrating people, place, process and technology.

Courses offered in this minor will provide an introduction to concepts and components of project management; their interrelationships in construction practice; the life cycle of a project; strategic planning; performance measurements; life cycle cost approach; building sustainability; maintenance management; and industry practices.

Leadership in the Design and Construction Professions - Minor

The College of Architecture through the Department of Construction Science offers a minor in Leadership in the Design and Construction Professions. The minor is designed to enhance leadership skills and increase each students understanding of themselves by encouraging and facilitating introspective looks into each individuals personality type, strengths and challenges. The goal of the minor is to focus on personal growth to become the most effective leaders in the design and construction industries.

Leadership in the Design and Construction Professions - Minor

College of Architecture students can apply no more than six hours of coursework toward both the Facility Management Minor and their degree requirements.

At least two courses must be taken outside of the major area of study.

Must make a grade of C or better.

A grade of 'C' or better is required in all classes used towards the minor.

Must have at least a 2.5 TAMU GPA to apply for minor.
private and public sector practice. Our educational goal is to produce graduates motivated to be leaders in the field and professionals who are intellectually active, broadly-educated citizens and life-long learners.

Urban and Regional Planning

The Bachelor of Science in Urban and Regional Planning degree program emphasizes the social, economic, cultural and natural factors that govern how communities and society are shaped. Coursework provides students with the knowledge and skills needed to develop solutions to community and regional growth and development issues that face our state and nation. Students have an opportunity to specialize in specific aspects of community and regional planning and development issues along with internship and service-learning experiences locally, nationally, and/or internationally.

Majors

• Bachelor of Landscape Architecture in Landscape Architecture (p. 250)
• Bachelor of Science in Urban and Regional Planning, Urban Design Track (p. 251)
• Bachelor of Science in Urban and Regional Planning, Urban Policy Track (p. 252)
• Bachelor of Science in Urban and Regional Planning and Master of Land and Property Development, 5-Year Degree Program (p. 254)

Minors

• Urban and Regional Planning Minor (p. 256)

Landscape Architecture - BLA

The mission of the Bachelor of Landscape Architecture (BLA) program is to prepare students to become professional landscape architects in the private and public sectors of practice. We foster a learning environment of creativity and critical analysis that uses evidence-based design principles as its core. This approach builds upon the knowledge of natural and built environments and how humans interact within various cultural settings. Our BLA graduates use this knowledge to produce spatial solutions at multiple scales from site design to land use planning. This creative process aims to advance human health, and social, economic and environmental sustainability. The program strives to produce graduates motivated to be life-long learners capable of working independently and leading interdisciplinary teams in the field of landscape architecture.

Graduates from the BLA program are prepared for employment with private practice firms in landscape architecture, engineering, architecture, or planning; and with federal, state, or local government agencies. Upon graduation and with additional two-year practical experience students are qualified to pursue licensure in the profession or post graduate education in landscape architecture or a related field.

Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the Department of Landscape Architecture and Urban Planning website.

---

1. Any approved university core curriculum history course
2. This course will be selected in consultation with the student’s advisor.
3. URPN 320 or URPN 325 or approval of BLA Program Coordinator
4. Semester Away: May be satisfied by study abroad, at another university, internship, or special arrangement by advisor or instructor. Electives may be taken during summer, online, distance education, at another university or college, or at a study abroad university.
5. Study abroad course.
6. If electing to study abroad, must take CARC 311 for PHIL 314 and CARC 331 as an elective.

A grade of C or better is required in College of Architecture courses (CARC, COSC, ENDS, ARCH, URPN, LAND, VIST, ARTS) to satisfy Landscape Architecture degree requirements.

Any student wishing to change majors into the Landscape Architecture program must have less than 60 total hours, including all transfer hours.

## Urban and Regional Planning - BS, Urban Design Track

The Bachelor of Science in Urban and Regional Planning degree program is based in the Department of Landscape Architecture and Urban Planning (LAUP) within the College of Architecture at Texas A&M University. The Urban and Regional Planning program equips students for entry-level positions in planning allied fields and prepares them for graduate studies in fields such as Urban Planning and Land Development. The core curriculum, designed to equip students with knowledge and skills to deal effectively with the opportunities and challenges inherent in the development, growth and culture of neighborhoods, cities, and regions, is based on theoretical training in the natural, physical, and social sciences. Students acquire skills that enable them to apply these theories to develop communities, cities, and regions which are safe, healthy, and sustainable.

Critical thinking and analytical skills are emphasized for problem-solving at the community and regional scale. Classroom service-learning experiences enable graduates to more reliably and realistically assess complex community problems, design solutions for overcoming those problems, and evaluate the outcomes of programs and policies in meeting community and regional needs.

The Urban Design Track emphasizes physical solutions and the urban form of communities and cities, related to land uses, site planning, the provision of infrastructure such as roads, sidewalks, and storm water management, and the provision of public spaces. Skill-building emphasizes graphic representation and the use of Geographic Information Systems (GIS) for both analysis and design.

Urban and Regional Planning - BS, Urban Policy Track

The Bachelor of Science in Urban and Regional Planning degree program is based in the Department of Landscape Architecture and Urban Planning (LAUP) within the College of Architecture at Texas A&M University. The Urban and Regional Planning program equips students for entry-level positions in planning allied fields and prepares them for graduate studies in fields such as Urban Planning and Land Development. The core curriculum, designed to equip students with knowledge and skills to deal effectively with the opportunities and challenges inherent
in the development, growth and culture of neighborhoods, cities, and regions, is based on theoretical training in the natural, physical, and social sciences. Students acquire skills that enable them to apply these theories to develop communities, cities, and regions which are safe, healthy, and sustainable.

Critical thinking and analytical skills are emphasized for problem-solving at the community and regional scale. Classroom service-learning experiences enable graduates to more reliably and realistically assess complex community problems, design solutions for overcoming those problems, and evaluate the outcomes of programs and policies in meeting community and regional needs.

The Urban Policy Track emphasizes policy solutions for building resilient, efficient, healthy, and sustainable communities. Policy evaluation and formulation address urban issues related to the equitable provision of public services, housing, environmental services, employment, and transportation. Skill-building emphasizes critical thinking, analytical skills, and written and verbal communication.

**Urban and Regional Planning - 5-Year Bachelor of Science/Master of Land and Property Development**

The 5-year combined BS and MLPD allows high-performing undergraduate students to streamline their undergraduate and professional education. The undergraduate core is designed to equip students with knowledge and skills to deal effectively with the opportunities and challenges inherent in the development, growth and culture of neighborhoods, cities, and regions, is based on theoretical training in the natural, physical, and social sciences. Students acquire skills that enable them to apply these theories to develop communities, cities, and regions which are safe, healthy, and sustainable. While still completing undergraduate credits, students begin graduate coursework in land and property development, where their core knowledge of urban growth and development can be enhanced with real estate, financial and management skills, leading to a fruitful career in real estate and land development.

Urban and Regional Planning - 5-Year Bachelor of Science/Master of Urban Planning

The 5-year combined BS and MUP allows high-performing undergraduate students to streamline their undergraduate and professional education. The undergraduate core is designed to equip students with knowledge and skills to deal effectively with the opportunities and challenges inherent in the development, growth and culture of neighborhoods, cities, and regions, is based on theoretical training in the natural, physical, and social sciences. Students acquire skills that enable them to apply these theories to develop communities, cities, and regions which are safe, healthy, and sustainable. While still completing undergraduate credits, students begin graduate coursework in urban planning to refine and extend their skills in critical thinking, problem-solving, and communication, leading to an accredited professional degree appropriate for planning positions in the public sector, private consulting, or the non-profit world.
Spring

Total Semester Credit Hours 150

1 Must make a grade of C or better.
2 Equivalent Coursework: Students enrolled in the 3+2 program will take a designated section of the following courses which will be double counted.
   • PLAN 664, Planning Theory & History will substitute for a Concentration/Directed Elective
   • PLAN 667, Site Planning will substitute for a Concentration/Directed Elective
   • URPN 220 (special section), will substitute for PLAN 624, Digital Communications in Landscape Architecture and Urban Planning
   • URPN 325 (special section), will substitute for PLAN 625, GIS in Landscape Architecture and Urban Planning
   • URPN 310 (special section), will substitute for PLAN 613, Planning Methods II
   • URPN 401 (special section), will substitute for PLAN 658, Plan Implementation
3 Semester Away: May be satisfied by study abroad, at another university, internship, or special arrangement by advisor or instructor. Concentration electives may be taken during summer, online, distance education, at another university or college, or at a study abroad university.
4 Study abroad course. If electing to study abroad, must take CARC 311 and CARC 331 as concentration electives.
5 If a student takes URPN 494 in Fall of 4th year, 6 hours of concentration electives must be added to different semesters other than this fall.
6 See advisor for a list of approved courses.
7 This course will be selected in consultation with the student’s advisor. If not participating in study abroad, 3 hours must come from approved course in International and Cultural Diversity (p. 47).

A grade of B or better is required for graduate level courses.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Science in Urban & Regional Planning and the Master of Urban Planning.

Urban and Regional Planning - Minor

By pursuing a minor in urban planning at Texas A&M, students will earn an education within a multi-disciplinary atmosphere where analytical skills and critical thinking are harvested. Students will then apply this acquired knowledge to address real-world issues which communities and regions face on a daily basis. Those earning a minor in urban planning can effectively solve problems related to a number of complex issues involving the built and natural environment, transportation, health, economic development, among others.

The minor in urban planning program will provide a solid educational basis for those students wishing to pursue a post-graduate education within the planning field. Also, because of its broad scope, the minor program may serve as an effective introduction to graduate studies in other social science disciplines such as economics, geography, political science, and public policy.

The minor program will prepare students for entry-level positions in a variety of fields including state and local government; advocacy, grant-making and civic organizations; real estate management; environmental science; social assistance services; and health care services.

¹ The student’s home college or major department may approve/disapprove GEOG 306.
² USAR students will have to take URPN 330.

## University Studies Programs

The College of Architecture offers a degree in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

### Majors

- Bachelor of Science in University Studies, Global Arts, Planning, Design and Construction Concentration (p. 257)

## University Studies - BS, Global Arts, Planning, Design and Construction Concentration

The Global Arts, Planning, Design and Construction concentration is an interdisciplinary course of study that integrates multiple aspects of the built environment. The course offerings are from all of the professional undergraduate programs within the College of Architecture and are intended to give students an understanding of the interplay of professions that are required to work as a team in order to successfully complete built environment projects. These foundation courses are coupled with a required study abroad experience. All students in the College of Architecture are required to participate in a semester away experience that serves to expand the context of their education. The benefit of this experience is integrated into the concentration at a smaller scale.

¹ Or approved study abroad course.

A 2.0 GPA is required in all major field of study courses.

Two writing-intensive courses are required.

One course must meet the International and Cultural Diversity (p. 47) requirement.

One course must meet the Cultural Discourse (p. 46) requirement.
Department of Visualization

Visualization is the blending of art and science focusing on visual communication. The Bachelor of Science in Visualization is a studio-based program requiring completion of 120 credit hours including elements of traditional art, programming, history, and theory as well as digital media. The degree prepares students for the artistic and technical demands facing digital content creators in a variety of visually-oriented professions including interactive design, information technology, education, entertainment, and independent practice.

Enrolled Visualization Students

Students enrolled in the Bachelor of Science in Visualization (VISL) program will move into the Sophomore level art and visualization courses by obtaining a 3.6 GPA in category A courses and a 3.0 GPA in category B courses and completing 27 semester credit hours during the first two semesters in the Visualization Program (VISL).

</tbody>
</table>

If AP or Dual Credit courses are available as substitutions in any of the above courses, sequential or other art/visualization/math/science courses taken at Texas A&M University will be used to calculate the respective GPAs. For change of major and transfer students, equivalent transferable courses may be substituted for any of the above courses. In this case, courses taken at Texas A&M University in the same program area will be specified and used to calculate the respective GPAs.

Students who do not achieve the required GPA in the above courses can remain in the visualization program, but cannot move on through studio classes. Depending on space availability, students can proceed into sophomore level art and visualization courses based on a ranking of the combined GPA of the Category A and Category B courses. An optional 500 word essay may be submitted to explain extenuating circumstances related to the 1st year academic experience and provide justification why the student should be allowed to take sophomore level courses. The essay may be used to adjust the overall student ranking.

Transfer and Change of Major Students

Transfer and change of major students (students currently enrolled in another major at Texas A&M University) who are admitted to the Department of Visualization are classified as lower level (VISL) and are required to complete the same 120 course work. This includes sequential coursework, that is designed to take place in a four year program.

Faculty

Akleman, Ergun, Professor Visualization
PHD, Georgia Institute of Technology, 1992

Andreassen, Mayet Maria, Lecturer Visualization
MFA, School of Animation and Visual Effects, 2006

Majors

• Bachelor of Science in Visualization (p. 259)

Minors

• Art Minor (p. 260)

• Game Design and Development Minor (p. 261)

Visualization - BS

The mission of the Bachelor of Science in Visualization program is to engage and develop the student's visual, intuitive and analytical capabilities through the scientific and aesthetic issues surrounding the use of technology in visual communication. To fulfill its mission, the program requires both a creative spirit and the technical understanding to adapt to the changing demands of the visual industries served by the departmental programs.

The curriculum integrates elements of fine arts, three-dimensional design, programming and digital technology to provide a broad, wide-ranging educational experience. The core of the program is the studio experience, which explores the relationship between theory and practices through a variety of exercises and projects using traditional and electronic media. A semester away from Texas A&M University is required during the Junior year. This is followed by a capstone proposal and studio during the Junior and Senior years. A broad range of directed electives allows the student to gain an in-depth understanding of an area of specialization.

Graduates of the program are prepared to be technically adept artists, designers and/or tool-makers capable of utilizing interactive and directed media. Employment may be found in such fields as user interface and web design, the entertainment industry (game design and development, animation and visual effects), as well as fields such as modeling and simulation, data analytics and other fields where visualization contributes to understanding. Alternatively, graduates may enter graduate programs that emphasize digital media in either computer science or art/design. Two such programs, the Master of Science (MS) in Visualization and the Master of Fine Arts (MFA) in Visualization, are offered by the Department of Visualization at Texas A&M University.

**Semester Credit Hours** | 15
**Total Semester Credit Hours** | 120

1. Select from any 300 or 400 level ARTS (p. 906) or VIST (p. 1164) courses
2. Select from ARTS 305, ARTS 308, ARTS 311, ARTS 312, ARTS 315, ARTS 325, ARTS 328, ARTS 353, VIST 310, VIST 465.
3. Semester Away Semester: May be satisfied by study abroad, at another university, internship, or special arrangement by advisor or instructor. Electives may be taken during summer, online, distance education, at another university or college, or at study abroad university.
4. Select from any 300-499 course not used elsewhere. If you do not participate in study abroad, 3 hours will come from ICD. (p. 47)
5. Select from ARTS 303, ARTS 304, ARTS 403, VIST 357, VIST 370, VIST 372, VIST 374, VIST 470, VIST 472, VIST 476/CSCE 447, VIST 477/CSCE 446, VIST 486, VIST 487/CSCE 443.

A grade of C or better must be made in all College of Architecture courses (ARCH, ARTS, CARC, COSC, ENDS, LAND, LDEV, VIST, URPN and VIZA). Students must also make a grade of C or better in any course used as an equivalent substitution for College of Architecture courses that satisfy degree requirements.

**Art - Minor**

The Minor in Art provides a broad orientation to the visual arts offered by the Department of Visualization to non-visualization majors. Students pursuing other majors may minor in Art by taking the required hours. There are three emphases within the minor: Traditional Media, New Media, and Visual Culture. Based on the student’s interests, an emphasis in either may be selected.

Students must have a minimum cumulative GPA of 3.20 with 70 or fewer semester credit hours completed to apply and must maintain a C average or better in all courses completed as part of the minor in Art. The student’s home college/department may grant, with agreement from the Department of Visualization to non-visualization majors.

Per University guidelines, the student’s home college/department is responsible for advising students pursuing a minor in Art.

To apply, download the Art Minor Form, complete it and turn it into the Visualization Academic Advisor before the deadline. For additional information, please visit our website (https://viz.arch.tamu.edu/undergraduate/minors/).

**Submission due dates:** Summer: March 1st | Fall: June 1st | Spring: October 1st

- ARTS 343 History of Illustration
- ARTS 345 History of Gaming
- VIST 442 Digital Characters: Art, Technology, Uses and Meaning

Total Semester Credit Hours 18

1. Must be taken prior to additional Traditional Media Emphasis courses.

---

### Game Design and Development - Minor

The Minor in Game Design and Development offers students the opportunity to develop the knowledge and skills associated with the aesthetic and technical aspects of game creation. The minor consists of 16 credit hours, 10 credit hours are required courses and six are from a prescribed menu of courses. The minor provides a foundation in the principles of game design and software development. Students develop core competencies, collaborate on the design and development of game projects, and engage in authentic, situated creative problem-solving to broaden their horizons as interdisciplinary team members.

Total Semester Credit Hours 16

1. Must be taken prior to additional Traditional Media Emphasis courses.

2. Must be taken prior to additional New Media Emphasis courses.

Minimum GPA of 3.2 for admittance into the minor.

A grade of 'C' or better is required for all courses used towards the minor.
MAYS BUSINESS SCHOOL

Administrative Officers
Dean - Eli Jones, Ph.D.
Associate Dean - Annie L. McGowan, Ph.D.
Director of Academic Services - Peter K. Drysdale, M.S.

General Statement
Mays Business School’s vision is to advance the world’s prosperity. To advance the world’s prosperity means providing a better future for generations who follow, including quality of life, environment and economic systems. To fulfill this vision, Mays’ mission is to be a vibrant learning organization that creates impactful knowledge and develops transformational leaders.

Mays is a comprehensive business school that equips students with a holistic view of an enterprise, a business mindset, functional area expertise and the full range of required technical skills that exist across all areas of business. Diversity, inclusion, and engagement inform decisions and actions at all levels of the organization. Best-in-class business education goes beyond the standard business functional areas – accounting, finance, management, marketing, management information systems, and supply chain management – to deliver an integrated, high-impact, career-launching set of experiences.

The business curriculum has a dual emphasis: a broad-based education in the foundation disciplines of the liberal arts and the sciences; and a focused development of business knowledge and behavioral skills. Lower level business majors learn and practice broad skills in core curriculum areas: American history; communication; creative arts; mathematics; political science; language, philosophy and culture; life and physical sciences; and social and behavioral sciences. They simultaneously take introductory business courses.

Upon successful completion of this broad-based foundation coursework, the student will begin to focus on a major field of study and a full range of business courses. The major field is chosen from accounting, finance, management, management information systems, marketing, and supply chain management. Students admitted to Mays Business Honors pursue an interdepartmental degree in business honors.

This combination of a broad educational foundation and more specialized study produces graduates uniquely prepared for entry-level, career launching organizational positions.

Requirements for Graduation
Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog.

Courses taken to satisfy degree requirements must be taken for letter grades, with the exception of general elective requirements.

Students in Bachelor of Business Administration degree programs must complete with a 2.0 GPR or greater all courses included in the Core Business Knowledge.

Students must complete the Writing requirement. The requirement may be met by taking two writing (W) courses or one W course and one oral communication (C) course. See an academic advisor for additional information.

Students must complete the International and Cultural Diversity (ICD) and Cultural Discourse (CD) requirement.

- For the ICD requirement students must take one course (3 credit hours) from a list of approved courses. Students in BBA degree programs satisfy the ICD requirements by taking 3 hours of coursework from an approved list of international elective courses that also simultaneously fulfill the university’s ICD requirement. See an academic advisor for additional information.
- For the CD requirement students must take one course (3 credit hours) from a list of approved courses. If a course approved as CD also satisfies a Core Curriculum requirement, it can be used to satisfy both requirements. See an academic advisor for additional information.

Transfer of Credits
Acceptance of transfer of credit for business courses will generally be limited to those courses taught in the freshman and sophomore years at this institution. Transfer credit is not offered for upper-level (junior- and senior-level) business courses.

Bachelor’s Degrees and Departments of Instruction
There are five departments of instruction in Mays Business School: Accounting, Finance, Information and Operations Management, Management, and Marketing.

The Bachelor of Business Administration degree is offered in each of the following seven majors: Accounting, Business Honors, Finance, Management, Management Information Systems, Marketing, and Supply Chain Management.

A Bachelor of Science degree in University Studies with concentration in business (USBU) is offered.

Bachelor of Business Administration
The degree of Bachelor of Business Administration is offered in these seven majors: accounting, business honors, finance, management, management information systems, marketing, and supply chain management. Each requires a minimum of 120 semester credit hours of study. The student elects one of these as a “major,” but is also required to study fundamental theory and procedure in each of the basic business functions. In addition, the student takes courses essential to a general liberal education.

The following is a representation of the curriculum requirements by major.

### Upper-Level Entry into Accounting, Business Honors, Finance, Management, Management Information Systems, Marketing and Supply Chain Management (BBA)

Students who meet the University and college entrance requirements enter Mays Business School as lower-level business (BUAD) students. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven BBA majors: accounting, business honors, finance, management, management information systems, marketing, and supply chain management.

### Upper-Level Entry Requirements and Application Procedures

Lower-level business (BUAD) students are encouraged to complete the freshman and sophomore sequence of courses as listed under Program Requirements.

The BBA upper-level (UL) entry requirements and application procedures are as follows:

1. **Admission**: To be admitted to an UL BBA major, a student must be admitted to Mays Business School and have:

    1. To satisfy the University’s Cultural Discourse (CD) graduation requirement students must take one course (3 credit hours) from a list of approved courses. If not satisfied through Core Curriculum, an approved CD [KUCD] course can be used to satisfy unmet General Elective requirement.
a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 229</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>

<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 203</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 140</td>
<td>Mathematics for Business and Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Business Calculus (or its equivalent)</td>
<td>3</td>
</tr>
</tbody>
</table>

b. Submitted application for UL admission no later than prereregistration for the expected UL entry term. NOTE: For summer UL entry, all requirements must be completed BEFORE the first class day of the FIRST SUMMER SESSION.

c. UL admission requirements include completion of the three remaining lower-level Core Business Knowledge (CBK) courses prior to or during the first UL semester. Business students must preregister for and complete the following three remaining lower-level CBK courses at Texas A&M during their first UL semester, unless satisfactorily completed prior to UL entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ISTM 210</td>
<td>Fundamentals of Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

d. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.

2. Transfer Students: Transfer students admitted to Mays Business School will be classified as lower-level business (BUAD) majors until they complete all requirements listed previously in item 1, at which time they may apply for admission to an UL BBA major. Transfer students may immediately apply for UL when admitted to Mays Business School if, and only if, they meet all UL requirements at that time.

3. Change of Curriculum Students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University enter the business school as lower-level Business (BUAD) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to an UL BBA major may do so.

4. Junior- and Senior-Level Business Courses: Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a BBA degree granting major in Mays Business School. All ineligible students who pre-register for UL business classes are subject to cancellation of their registration in these courses.

Cooperative Education

Cooperative education is designed to augment the academic program of study with on-the-job training. Academic requirements a business undergraduate must have to be eligible to participate are 45 completed credit hours and a minimum 2.5 cumulative GPA. Interested students may obtain more information from the Career Center (http://careercenter.tamu.edu/) website or (979) 845-5139 or in Room 209, Koldus Building.

Restrictions on Two Degrees

Mays Business School is enrollment managed; demand for admission to the undergraduate business program consistently exceeds available educational resources. Priority is given to qualified applicants for their initial bachelor’s degree.

Double Major

Only Business Honors majors may elect a second major field of study within the BBA degree. The first major must be business honors. The Business Honors student must satisfy all University and Business School requirements and complete all curriculum requirements for each major. This option leads to the granting of one BBA degree with two majors. Additional restrictions may apply.

Double Degree

Approval of double degrees (BBA with BA or BS) is granted by exception only. A written appeal for a double degree may be submitted; the appeal should reflect an excellent academic record, support from the BA or BS granting college, and a compelling justification.

Second Degree

Postbaccalaureate admission to Mays is severely restricted and granted by exception only. Applicants for a postbaccalaureate business degree may present a case for an exception to this enrollment restriction in the essay of a complete Texas A&M admission application. Generally, eligible applicants are denied postbaccalaureate admission but may be encouraged to apply, instead, to an appropriate graduate degree program.

Certificate Programs

Mays offers certificate programs for undergraduate students who want to explore a particular topic area in more depth. Most are open to all BBA majors, and some are designed for specific majors who wish to specialize in a particular area in the major field of study.

Students who pursue any of the certificate programs must complete all requirements for the specific program prior to graduation. Certificates are noted on the transcript after graduation. Information regarding certificates programs and requirements can be found in the Mays Business School Certificates section.

Mays Business School

International: Each program offers BBA degree seeking students the opportunity to study international business and other cultures to develop foundation knowledge to meet global business challenges.

- European Union Business Certificate (p. 268)
- International Business Studies Certificate (p. 269)

Department of Management
- Doctor of Philosophy in Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/management/phd/)

Business Honors - BBA

Mays Business School offers a Business Honors program. Selection through a separate application process is required to be eligible for participation in Business Honors. Prospective students apply to Business Honors as incoming freshmen or during the spring semester of their freshman year. Both selection cycles are competitive processes. More information is available at https://mays.tamu.edu/bba-business-honors/.

Bachelor of Business Administration

The Bachelor of Business Administration (BBA) in Business Honors degree is available only to students admitted to Mays’ Business Honors program. The Business Honors major is designed for students whose academic excellence is matched by strong character, leadership skills, and teamwork. The Business Honors major prepares students to begin careers in all fields or to continue on to a graduate program or professional school.

Students pursuing a BBA in Business Honors must maintain a cumulative GPA of 3.5 or higher and meet other program requirements to continue in Business Honors. Students are required to complete a total of 30 hours of honors coursework plus an internship for credit. Other program requirements apply.

Business Honors majors work closely with an academic advisor to identify a set of courses to meet their academic goals. They may pursue a double major in Business Honors and one of the six other BBA majors (accounting, finance, management, management information systems, marketing and supply chain management).

Upper-Level Entry Requirements

Admission to an upper level (UL) major in Business Honors requires satisfactory completion of specific coursework, in addition to the application and selection process for Business Honors program participation. To review UL requirements and application procedures see Upper-Level Entry Requirements and Application Procedures. (p. 262)

Business - Minor

Mays Business School offers a business minor (http://mays.tamu.edu/business-minors/) for undergraduate non-business majors. Students interested in pursuing a future MBA may find that when combined with appropriate statistics and economics coursework, the business minor provides the business foundation required by most MBA programs.

Students applying for a business minor must have a 2.0 or better overall GPA. Application is made in the student’s home college or major department. Students are encouraged to start taking business minor courses as soon as the minor is declared.

To be awarded the business minor and receive transcript recognition, students must obtain a grade of C or better in each required course. Once declared, minor requirements become graduation requirements. The
minor will be recognized on the transcript after graduation, but not on the diploma.

Program Requirements

The minor in business consists of six specific courses chosen to develop a foundational knowledge in the basic aspects of business, including accounting, finance, management, marketing, and management information systems.

The courses listed below constitute the 18 hours required for a minor in business.

</table>

1 The Information Systems CLEP exam is available for students who have not taken ISTM 209 to demonstrate mastery of the course concepts. See http://testing.tamu.edu/Exams/CLEP (http://testing.tamu.edu/Exams/CLEP/).
2 MGMT 212 cannot be used to meet this requirement.
3 Course must be taken in residence at Texas A&M. No transfer courses or substitutions will be allowed.

Students must earn a grade of 'C' or better in each course listed above to be awarded the business minor and receive transcript recognition.

European Union Business - Certificate

The Certificate in European Business (EUB) is designed to provide Mays Business School undergraduate students seeking a BBA degree the opportunity to gain a better understanding of European business by studying its history, politics, and business models.

The EUB requires 21 credit hours of course work that can be integrated as part of the BBA business curriculum. Also, a European Union (EU) international experience is required along with demonstration of the ability to conduct business transactions in an EU language (other than English).

- ACCT 445/IBUS 445 International Accounting
- AGEC 452/3 International Trade and Agriculture
- AGEC 453 International Agribusiness Marketing 3
- FINC 445/IBUS 446 International Finance
- IBUS 455 Asian Business Environment
- IBUS 457/Global Entrepreneurship
- MGMT 457
- IBUS 459 Latin American Markets
- MGMT 450/International Environment of Business
- MGMT 452/International Management
- MKTG 401/Global Marketing
- MKTG 402/International Marketing: Study Abroad

Select three of the following electives focused on Europe: 9

- ECON 320 Economic Development of Europe
- HIST 336 Europe Since 1919
- HIST 338 The Rise of the European Middle Class
- HIST 339 Eastern Europe Since 1453
- HIST 421 European Intellectual History in the Twentieth Century
- HIST 477/WGST 477 Women and Gender in Modern European History
- POLS 322 Western European Government and Politics
- POLS 432 The Politics of European Union

Total Semester Credit Hours 21

1 IBUS 456 or another course that focuses specifically on conducting business in the European Union. Must have prior approval.
2 Three hours must be taken in the student's business major.
3 Either AGEC 452 or AGEC 453 is required for AGBU majors.

Approved European Union Experience

An approved international experience in an EU country. 1 month minimum. Options available include:

- Mays or university-wide reciprocal exchange program
- Mays or TAMU study abroad program or field trip.
- International internship (for IBUS 484 credit)
- Other study abroad or volunteer program (with prior approval)

Foreign Language Competence

To determine competence in a non-English European Union language, a student must pass an oral competency exam in their desired EU language.
as administered by a Mays faculty member, or pass a designated proficiency exam upon completion of the European Union experience.

**International Business Studies - Certificate**

The Certificate in International Business Studies (IBS) is designed to offer Mays Business School undergraduate students seeking a BBA degree the opportunity to study international business and other cultures to develop a knowledge foundation to meet global business challenges.

The IBS requires 18 credit hours of course work that can be integrated as part of the BBA business curriculum. Also, an international experience is required. Students who pursue the IBS certificate program must complete all requirements prior to graduation.

- | SOCI 329 | Pacific Rim Behavior |
- | SPAN 312 | Hispanic Culture and Civilization: 18th Century to Present |
- | SPAN 320 | Introduction to Hispanic Literature |
- | SPAN 410 | Hispanic Film |
- | SPAN 411 | Contemporary Hispanic Society and Culture |
- | SPAN 412 | U.S. Hispanic Writers |
- | SPAN 421 | Spanish Language Poetry |
- | SPAN 450 | Contemporary Spanish and Spanish-American Literature |
Three hours must be taken in the student’s business major. Business courses taken through Mays and university-wide exchange may also be approved.

Either course is required for AGBU majors.

Must be the same language (e.g. SPAN 101 & SPAN 102) and taken at the university level. Credit-by-exam not allowed.

Non-business courses taken abroad as part of a TAMU faculty-led, semester exchange program, or through direct enrollment in a foreign institution may also be used to satisfy this requirement.

### Approved International Experience

An approved international experience, one month minimum, is required. Options available include:

- Mays or university-wide reciprocal exchange program
- Mays or TAMU study abroad program or field trip
- International internship (for IBUS 484 credit)
- Other study abroad or volunteer program (with prior approval)

### Latin American Business - Certificate

The Certificate in Latin American Business (LAB) is designed to provide Mays Business School undergraduate students seeking a BBA degree the opportunity to gain a better understanding of Latin American business by studying its history, politics and business models.

The LAB requires 21 credit hours of course work that can be integrated as part of the BBA business curriculum. Also, a Latin American international experience is required along with demonstration of the ability to conduct business transactions in Spanish or Portuguese.

Students who pursue the LAB certificate program must complete all requirements prior to graduation.

Select three of the following electives focused on Latin America:

- AGEC 452 International Trade and Agriculture
- AGEC 453 International Agribusiness Marketing
- ANTH 308 Archaeology of Mesoamerica
- ECON 312 Poverty, Inequality and Social Policy
- ECON 330 Economic Development
- GEOG 323 Geography of Latin America
- HIST 304 Southwest Borderlands
- HIST 305 Chicana/o History since 1848
- HIST 341 Latin America to 1810
- HIST 342 Latin America Since 1810
- HIST 441 History of Mexico, 1821 to the Present
- POLS 323 Political Systems of Latin America
- POLS 362 Latin American Political Thought
- SPAN 311 Hispanic Culture and Civilization to the 18th Century
- SPAN 312 Hispanic Culture and Civilization: 18th Century to Present
- SPAN 410 Hispanic Film
- SPAN 411 Contemporary Hispanic Society and Culture

Total Semester Credit Hours 21

1. IBUS 459 or another course that focuses specifically on conducting business in Latin America (must have prior approval).
2. Three hours must be taken in the student’s business major.

### Approved Latin American Experience

An approved international experience in a Latin American country, a minimum of 1 month. Options available include:

- Mays or university-wide reciprocal exchange program
- Mays or TAMU study abroad program or field trip
- International internship (for IBUS 484 credit)
- Other study abroad or volunteer program (with prior approval)

### Foreign Language Competence

To determine competence in Spanish or Portuguese, a student must pass an oral competency exam administered by a Mays faculty member, or pass a designated proficiency exam upon completion of the Latin American experience.
Nonprofit and Social Innovation - Certificate

The Nonprofit and Social Innovation Certificate offers Mays Business School students the ability to tailor their education towards a career of service. The program provides students with high-impact educational opportunities that will equip them to contribute positively to nonprofit and social purpose organizations.

The certificate includes 13 hours of coursework and a required internship with a social purpose organization (nonprofit or for-profit) that will enhance a student’s undergraduate education to include preparation for occupations, service roles, and graduate study.

Not-for-profit organizations make up one of the fastest growing employment sectors in the country, and are actively looking for graduates who can use their skills to immediately make an impact. Also, organizations around the world are increasingly recognizing the importance of addressing societal challenges. This certificate allows students to contribute toward the goal of advancing the world’s prosperity.

Total Semester Credit Hours 13

1. BUSN 489 Strategic Philanthropy.
2. The Nonprofit Sector or Business Solutions to Solve Social Problems.

An internship with a social purpose organization (nonprofit or for-profit) is required. The internship does not need to be taken for academic credit. An internship completed for a student’s major (e.g., MGMT 484, MKTG 484, FINC 484, ISTM 484, SCMT 484 or ACCT 484) may be applied to this certificate provided it is with a social purpose organization (nonprofit or for-profit). The internship must offer meaningful, professional-level opportunities to apply business knowledge and skills.

Exceptions based on course offerings require Certificate Coordinator approval.

James Benjamin Department of Accounting

The accounting profession continues to be recognized as one of the world's leading professions and as one offering many opportunities for a challenging career. The major challenge confronting the accounting profession today is the continuous development of accounting and information systems that can be utilized by business firms operating in an increasingly complex global environment. Within this environment, business firms and government units are generating and utilizing information at an accelerating rate.

A Bachelor of Business Administration (BBA) degree in accounting provides the opportunity for entry into a career offering a variety of different and challenging paths. Many accounting graduates are employed by public accounting firms that provide assurance, tax and other services to all types of organizations. Other accounting graduates pursue careers with business firms and financial institutions, within all levels of government, and as accounting educators. All of these careers provide an opportunity to earn the Certified Public Accountant (CPA) license and to serve society by maintaining the highest levels of integrity.

The American Institute of Certified Public Accountants (AICPA) recognizes the need for technically competent graduates entering the accounting profession. In response to the recommendations of the AICPA, other professional accounting organizations, and many professional accounting firms, the State of Texas requires candidates for the CPA examination to have a minimum of 150 semester hours of college coursework, including at least 30 hours of upper-division accounting courses. As a consequence, highly motivated students are encouraged to give serious consideration to pursuing advanced studies to enhance their potential for a successful accounting career. The BBA degree alone does not meet the requirements to sit for the CPA examination in Texas.

The James Benjamin Department of Accounting offers a 5-year combined professional program that students apply for admission to enter during their junior year. The Professional Program offers a curriculum integrating undergraduate and graduate education. Graduates receive a BBA and a Master of Science degree (MS) or receive a BBA and a Master of Financial Management (MFM). This program offers opportunities for successful and motivated students to pursue academic coursework that challenges both their interests and abilities. Courses are taught by experienced faculty with superior teaching and professional credentials and are limited in class size.

Objectives of the Professional Program include developing sound conceptual, technical, analytical and communication skills that are required for success in the accounting profession. The program develops decision making and teamwork skills through extensive use of discussions and case studies. Also, the program enables the student to select a specialization in assurance services/information management, information systems, financial management, marketing, entrepreneurship, taxation, and tax technology. Each track offers the student an opportunity to participate in a professional accounting internship which can be taken for course credit, should the student elect to do so.

The department also offers a traditional Master's Program (Master of Science in Accounting) that students enter after completion of the Bachelor's degree. For more details about the Professional Program or the Master's Program, refer to the Texas A&M University Graduate and
Professional Catalog or contact the director of the Professional Program in the James Benjamin Department of Accounting.

Students must be able to complete the coursework of any of the aforementioned programs in College Station, TX.

Please be advised that Texas A&M offers many programs that lead to an occupational license as defined under Texas Occupations Code 58.001. Licensing authorities may have guidelines concerning prior criminal convictions that would make an individual ineligible for issuance of a given license. Applicants are encouraged to review all eligibility requirements related to degrees resulting in a license. Note the following:

- An individual who has been convicted of an offense may be ineligible for issuance of an occupational license.
- Licensing authorities must establish and make available guidelines explaining why a particular offense is considered a basis for ineligibility for a particular license and other criterion that may affect the decision to grant or withhold a license.
- An individual has the right to request a criminal history evaluation letter regarding their eligibility for a license issued under Texas Occupations Code 53.102.

Questions related to eligibility requirements to take the CPA examination in Texas should be directed to the Texas State Board of Public Accountancy (http://txrules.elaws.us/rule/title22_chapter525_sec.525.1/) (or the licensing authority in other jurisdictions).

**Majors**

- Bachelor of Business Administration in Accounting (p. 273)
- Bachelor of Business Administration in Accounting and Master of Financial Management, 5-Year Degree Program (p. 275)
- Bachelor of Business Administration in Accounting and Master of Science, 5-Year Degree Program (p. 277)

**Certificates**

- Energy Accounting Certificate (p. 278)
- Internal Audit Certificate (p. 279)

**Accounting - BBA**

A Bachelor of Business Administration (BBA) degree from an AACSB-Accredited (Association to Advance Collegiate Schools of Business) Accounting program prepares students for careers that offer numerous opportunities for growth and development. This degree program provides the minimum credentials necessary for entry into most accounting careers. However, the BBA degree does not meet the requirements to sit for the CPA examination in Texas.

Many accounting graduates are employed by public accounting firms that provide assurance, tax and other services to all types of organizations. Other accounting graduates pursue careers with business firms and financial institutions, within all levels of government, and as accounting educators.

**Upper Level Entry Requirements**

Admission to the upper level major of accounting requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 262).
**Program Requirements**

**Lower-Level Business Program (BUAD)**

General electives - 6

Semester Credit Hours - 15

Total Semester Credit Hours - 60
Six hours required. A complete list of approved courses is available in the Undergraduate Program Office, Room 238, Wehner Building. In the BBA curricula, the 6 hours of approved international elective courses simultaneously fulfill the University’s International and Cultural Diversity Graduation requirement.

This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

General elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply; see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

No more than 33 hours of accounting courses may be applied toward the undergraduate degree.

See Department of Accounting advisors for more information on the requirements to sit for the CPA examination.

Professional Program students will follow the degree plan coordinated by the Professional Program office.

Professional Program students will substitute ACCT 321 to replace 2 hours of General electives.

Accounting- 5-Year Bachelor of Business Administration in Accounting/Master of Financial Management

The James Benjamin Department of Accounting offers a combined 5-year, AACSB-accredited (Association to Advance Collegiate Schools of Business) Professional Program in Accounting. Professional Program graduates receive a Bachelor of Business Administration (BBA) in Accounting and a Master of Financial Management (MFM). Students must apply for admission and be accepted into the Professional Program to be eligible.

The objectives of the Professional Program include developing sound conceptual, technical, analytical and communication skills that are required for success in the accounting profession. Many accounting graduates are employed by public accounting firms that provide assurance, tax and other services to all types of organizations. Other accounting graduates pursue careers with business firms and financial institutions, within all levels of government, and as accounting educators.

Upper Level Entry Requirements

Admission to the upper level major of accounting requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 262).

2 Course availability will vary each semester. For a complete list of prescribed electives, please contact an Academic Advisor or the Certificate in Energy Accounting coordinator.
3 May take ECON 633 as an elective.

International Audit - Certificate

Business students with a consulting mindset interested in serving an internal function with a broad focus on areas such as risk management, compliance, fraud investigation, and auditing for operational efficiency and effectiveness may be a good match for a career as an internal auditor.

To prepare students for such roles, the James Benham Department of Accounting offers an Internal Audit Certificate which is recognized by The Institute of Internal Auditors (https://na.theiia.org/Pages/IIAHome.aspx) (IIA). This certificate is available to undergraduate students enrolled at Texas A&M University. To be eligible for this certificate students must be pursuing a BBA in ACCT (includes students admitted in the Professional Program of Accounting), BHN, FINC, MGMT, Misy, MKTG, or SCMT. Students must apply and be accepted into the Internal Audit Program, to be eligible to take some of the coursework offered in this certificate.

To meet the program requirements, students must earn a grade of C or better in the required coursework. All requirements must be completed prior to graduation. Upon graduation a certificate notation will be added to the official transcript.

<td>ACCT 484</td>
<td>Accounting Internship 2</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Semester Credit Hours 15

1 Students may use another course in lieu of the course listed if approved by an Internal Audit Program Director in advance of the student registering for the course.
2 An internship experience is required for the certificate and will be documented through registering and completing an internship course. If the student pursues an internship and earns less than three credit-hours in their internship course, an additional elective must be taken. Completing less than three credit-hours for the internship course and the selection of the appropriate elective must be approved in advance of registering for either course by an Internal Audit Program Director. At least 15 credit hours must be taken to earn the certificate.

Department of Finance

The Department of Finance at the Mays Business School is one of the country's top finance departments. The department's goal is to provide students with the theoretical and empirical tools necessary to achieve high levels of expertise in all areas of finance. The business enterprise must raise capital, use it to maximum advantage, and reward investors. Finance is the set of management challenges (and career opportunities) concerned with succeeding at these tasks.

The Department of Finance offers a Bachelor of Business Administration (BBA) in Finance. The Finance (FINC) major involves both required and elective courses in three areas.

- **Corporate Finance** encompasses the tools and techniques for valuing productive assets, choosing ways of funding them, and gauging financial success.
- **Investments** encompasses the theoretical and practical models that help assess risks and rewards of stocks, bonds, derivatives, and other "financial assets" (individually and in portfolios), as well as the financial health of firms and institutions offering them to the investing public.
- **Markets and Institutions** explores the ways in which bankers, brokers, and other financial institutions convert savings into productive capital.

Mays BBA FINC graduates with good academic records place well in all these areas, as well as in graduate and professional schools. They work in industry, on Wall Street, in major banking and consulting firms, and as wealth managers. Accordingly, the Department of Finance emphasizes scholarship in its faculty, professionalism in its programs, and innovation in its relationships with employers and mentors.

The Department of Finance offers five certificate programs for BBA business majors. Each program is designed to complement the student's degree by providing a concentrated course of study and participation in experiential learning opportunities or internships in the selected area. For more information visit the Department of Finance (https://mays.tamu.edu/department-of-finance/) website.

Majors

- Bachelor of Business Administration in Finance (p. 281)

Certificates

- Capital Markets and Investments Certificate (p. 282)
- Commercial Banking Certificate (p. 282)
- Corporate Finance Certificate (p. 283)
- Investment Banking and Private Equity Certificate (p. 283)
- Investment Banking Certificate (p. 283)
- Trading, Risk and Investments Certificate (p. 283)

Finance - BBA

The Department of Finance offers a Bachelor of Business Administration (BBA) in Finance. Finance is the study of how individuals, companies, and governments allocate resources over time, under conditions of risk or uncertainty. The BBA Finance (FINC) major equips students in the core financial areas of corporate finance, investments, and markets and institutions.

In addition to earning a BBA FINC degree, majors may apply for one of six specialized fields of study:

- Aggies on Wall Street Investment Banking Certificate Program (AOWS)
- Corporate Finance Certificate Program (CFP)
- Commercial Banking Certificate Program (CBP)
- Trading, Risks and Investments Certificate Program (TRIP)
- Petroleum Ventures Certificate Program (PVP)
- Quantitative Finance Program (QFR).

Finance students also have access to applied finance courses including the Titans of Investing, which exposes students to a broad perspective of financial markets and global developments; the Tanner Fund, which allows students to manage real money for credit; and multiple commercial real estate analysis classes.

BBA FINC graduates are qualified for careers including investment bankers, commercial bankers, investment fund managers, traders, corporate treasurers, comptrollers, chief financial officers, investor relations officers, risk managers, investment analysts, and commercial real estate analysts.

Upper Level Entry Requirements

Admission to the upper level major of finance (FINC) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 262).

¹ MATH 148, MATH 152, MATH 168 and MATH 172 will be accepted in lieu of MATH 140.
Management Information Systems: Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

Business Honors: Students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 225 Business Competency (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective and a communication elective can be taken during the junior year.

Finance: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower-level). The general elective taken in the senior year can be reduced by 1 credit.

³ MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

Capital Markets and Investments - Certificate

The Department of Finance offers the Capital Markets and Investments (CMI) Certificate. The CMI is designed to acquaint BBA FINC and BBA Business Honors/FINC students with the fundamentals of investing in the public equity and fixed income markets, managing capital risks, asset pricing and financial modeling and complying with the SEC (Securities Exchange Commission) and FINRA (Finance Industry Regulatory Authority) regulations.

Students who pursue the CMI must complete all program requirements prior to graduation. Upon graduation a certificate notation will be added to the official transcript.

Commercial Banking - Certificate

The Department of Finance offers specialized study through the Commercial Banking Certificate Program (CBP). The CBP is designed to equip BBA FINC students with the banking and finance skills needed to
prepare for, and transition into, banking careers serving the personnel needs of the industry in the state of Texas and the United States.

The CBP requires completion of prescribed coursework and a paid summer internship with a member bank of the CBP Advisory Board. Business students must be U.S. citizens or permanent residents.

Students who pursue the CBP must complete all program requirements prior to graduation. Upon graduation a certificate notation will be added to the official transcript.

Corporate Finance - Certificate

The Department of Finance offers specialized study through the Corporate Finance Certificate Program (CFP). The CFP is designed to prepare BBA FINC students focused on a career in corporate finance.

The CFP requires completion of a set of guided finance and data analytics electives which have been selected to prepare students for the many roles available in world of corporate finance. Business students must be U.S. citizens or permanent residents.

Students who pursue the CFP must complete all program requirements prior to graduation. Upon graduation a certificate notation will be added to the official transcript.

Investment Banking and Private Equity - Certificate

The Department of Finance offers the Investment Banking and Private Equity (IB/PE) Certificate. The IB/PE is designed to acquaint BBA FINC and BBA Business Honors/FINC students with the knowledge required to be successful as a junior professional in an investment bank or a private equity firm. Key themes include company valuation, issuance of debt and equity, mergers and acquisitions, financial modeling, as well as the private equity ecosystem.

Students who pursue the IB/PE must complete all program requirements prior to graduation. Upon graduation a certificate notation will be added to the official transcript.

1 BUSN 392, a 2-credit course, is repeatable and must be taken two times. This certificate program requires completion of two internships, with BUSN 392 enrollment required during each internship period. A total of 4 credits earned through BUSN 392 enrollment is required.

## Department of Information and Operations Management

The Department of Information and Operations Management (https://mays.tamu.edu/department-of-information-and-operations-management/) (INFO) ranks among the top departments internationally in research productivity, impact and visibility. The INFO department offers two undergraduate degree programs: a Bachelor of Business (BBA) in Management Information Systems and a BBA in Supply Chain Management.

Management Information Systems (MISY) is a people-oriented field with an emphasis on service through technology. The BBA MISY degree program is the study of people, technology, organizations, and the relationships among them. MISY professionals help firms realize maximum benefit from investment in personnel, equipment, and business processes. This major is designed for students who have an interest in technology and have the desire to use technology to improve people’s lives.

Supply Chain Management (SCMT) includes all the activities that must take place to get the right product into the right consumer’s hands in the right quantity and at the right time — from raw materials extraction to consumer purchase. The BBA SCMT degree program is primarily concerned with the efficient integration of suppliers, factories, planning and forecasting, purchasing, product assembly, moving, storage, distribution, sales, and customer service. This major is designed for students who have an interest in problem solving, are detail-oriented, and a desire to help businesses achieve a sustainable competitive advantage by building and delivering products better, faster and cheaper.

In each degree program, students learn how to use technology to make businesses more efficient, effective, and competitive. Coursework includes both the technical and managerial aspects of MISY and SCMT to ensure that students are well-equipped for successful careers in the dynamic, global business environment.

A list of recommended courses for each degree program is available from the Department of Information and Operations Management (https://mays.tamu.edu/department-of-information-and-operations-management/advising/) undergraduate advisors, Room 330, Wehner Building.

Management Information Systems - BBA

The Department of Information and Operations Management offers a Bachelor of Business Administration (BBA) degree in Management Information Systems (MISY). The MISY major addresses the impact of computer-based information systems in a variety of organizational settings. The degree program produces graduates who are both business analysts (i.e., professionals who understand accounting, marketing, finance, etc.) and information system specialists (i.e., professionals who can implement information systems strategies).

Graduates of the program possess the business, technical, and leadership skills to meet the challenges presented by rapidly evolving information technology and the need to effectively incorporate this technology into business strategy and day-to-day operations.

For more information visit the BBA Management Information Systems (https://mays.tamu.edu/bba-management-information-systems/overview/) website.

Upper-Level Entry Requirements

Admission to the upper level major of MISY requires satisfactory completion of specific coursework. To review requirements and
application procedures see Upper-Level Entry Requirements and Application Procedures (p. 262).

Supply Chain Management - BBA

The Department of Information and Operations Management offers a Bachelor of Business Administration (BBA) degree in Supply Chain Management (SCMT). The SCMT major is primarily concerned with the efficient integration of suppliers, factories, warehouses, and retail outlets. Management Information Systems must add Programming Logic and Design (3 credits) to sophomore year curriculum.

The SCMT program produces graduates with strong analytical and problem-solving skills and the ability to work in and coordinate team activities. Graduates possess the business, technical, and leadership skills needed to meet the challenges of the rapidly evolving global marketplace.

For more information visit the BBA Supply Chain Management (https://mays.tamu.edu/bba-supply-chain-management/) website.

Upper-Level Entry Requirements

Admission to the upper level major of SCMT requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 262).

3 Select in consultation with a supply chain management academic advisor. A list of acceptable courses is available in the department academic advising office, 330 Wehner.

4 A complete list of approved courses is available in the Undergraduate Advising Office, 238 Wehner Building. The six required hours simultaneously fulfill the University’s International and Cultural Diversity Graduation requirement.

### Department of Management

The Department of Management at the Mays Business School is a distinguished leader in the field of management education and research. Our programs and curricula receive global recognition for their strength and continued contributions to the field of management. For more information visit the Department of Management (https://mays.tamu.edu/department-of-management/) website.

The Bachelor of Business Administration (BBA) degree in Management (MGMT) effectively incorporates theory and application in each student’s learning experiences. The degree program is designed to ensure that students gain the knowledge and competencies they will need to be valued employees in consulting firms, Fortune 500 companies, retail and service industries, non-profit and charitable entities, governmental agencies, new ventures and family businesses. The degree makes possible a broad range of career opportunities.

A MGMT student develops the ability to plan, organize, make decisions, communicate, and lead effectively in a variety of work settings. Written and verbal communication, teamwork, and problem solving are emphasized.

BBA MGMT majors pursue a specialization, also called directed elective track, which allows for a focused area of study. Students focus their specialization in one of the four following areas.

- **Consulting and General Management** - Designed for students interested in problem-solving and helping individuals or organizations as they maneuver the business environment, whether the student anticipates working in the consulting industry or in any managerial role.

- **Entrepreneurial Leadership** - Designed for students interested in learning the entrepreneurial process, the role of creativity in identifying and/or developing entrepreneurial opportunities, the elements of a business plan, and the leadership practices associated with successful organizations.

- **Human Resource Management** - Designed for students interested in learning how HR professionals develop and implement workplace policies and initiatives regarding employee recruiting, selection, compensation, training and development, performance management, career planning, and employee and labor relations. A career in human resources allows HR professionals to engage in the strategic management of an organization’s human capital.

- **Pre-Law** - Designed to expose students to opportunities that combine law and business, and could include careers in corporate law, international affairs, public policy, and conflict resolution, to name a few. Many students in this track will pursue a law or other advanced degree.

The BBA MGMT degree program allows the student to select from a variety of jobs, organizations and industries within the student’s specialization or more broadly in management. It also provides...
a solid foundation for pursuing graduate studies in business, law, and a variety of other disciplines.

Management - BBA, Consulting/General Management Track

The Department of Management offers a Bachelor of Business Administration (BBA) in Management. The BBA Management (MGMT) major equips students with the academic knowledge and professional skills they need to pursue rewarding careers in a variety of industries. Students select from one of four specializations, or tracks, that provide academic focus and career direction for student interests.

The BBA MGMT-Consulting and General Management track is designed for students interested in problem-solving and helping individuals or organizations as they maneuver the business environment, whether the student anticipates working in the consulting industry or in any managerial role. The curriculum will sharpen students problem-solving skills and teach how to help organizations or individuals manage the challenges and capitalize on opportunities they face.
Life and physical sciences (p. 26) 3

Semester Credit Hours 15

Total Semester Credit Hours 60

1 MATH 148, MATH 152, MATH 168 and MATH 172 will be accepted in lieu of MATH 140.

2 For those students under ROTC contract, see Requirement 7 of the 'Requirements for a Baccalaureate Degree' (p. 31).

3 MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

Management Information Systems: Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

Business Honors: Students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 225 Business Competency (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

Finance: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower level). The general elective taken in the senior year can be reduced by 1 credit.

Management - BBA, Human Resource Management Track

The Department of Management offers a Bachelor of Business Administration (BBA) in Management. The BBA Management (MGMT) major equips students with the academic knowledge and professional skills they need to pursue rewarding careers in a variety of industries. Students select from one of four specializations, or tracks, which provide academic focus and career direction for student interests.

The BBA MGMT-Human Resource Management track is designed for students interested in learning how HR professionals develop and implement workplace policies and initiatives regarding employee recruiting, selection, compensation, training & development, performance management, career planning, and employee & labor relations. A career in human resources allows HR professionals to engage in the strategic management of an organization’s human capital.

Upper Level Entry Requirements

Admission to the upper level major of management (MGMT) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 262).
Management Information Systems: Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

Business Honors: Students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 225 Business Competency (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

Finance: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower level). The general elective taken in the senior year can be reduced by 1 credit.

Management - BBA, Pre-Law Track

The Department of Management offers a Bachelor of Business Administration (BBA) in Management. The BBA Management (MGMT) major equips students with the academic knowledge and professional skills they need to pursue rewarding careers in a variety of industries. Students select from one of four specializations, or tracks, which provide academic focus and career direction for student interests.

The BBA MGMT-Pre-Law track is designed to expose students to opportunities that combine law and business, and could include careers in corporate law, international affairs, public policy, and conflict resolution, to name a few. Many students in this track will pursue a law or other advanced degree.

Upper Level Entry Requirements

Admission to the upper level major of management (MGMT) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 262).

Select in consultation with a management academic advisor. A list of acceptable courses is available in the department academic advising office, or in the Undergraduate Advising Office, Room 238, Wehner Building.

Department of Marketing

The Department of Marketing at the Mays Business School is a distinguished leader in the field of marketing education and research. Our programs and curricula receive global recognition for their strength and continued contributions to the field of marketing. For more information visit the Department of Marketing (https://mays.tamu.edu/department-of-marketing/) website.

Marketing involves developing goods and services to satisfy customers' needs and then making them available at the right places, at the right times and at competitive prices. Marketing also provides information to help customers decide whether specific goods and services will meet their needs.

Recent changes in social and economic systems have created new challenges for marketing professionals. Increasingly, they must focus on both domestic and global opportunities and the explosive changes that new technology brings. They must also be continually responsive to cultural differences, quality concerns and ethical issues.

The Bachelor of Business Administration (BBA) in Marketing prepares students to work effectively in corporate and nonprofit organizations that are part of a global economy. A career path in marketing typically begins in an entry-level position in advertising, retailing, marketing analytics, marketing consulting, professional selling, or healthcare marketing. Opportunities are available in manufacturing, wholesale and retail, as well as nonprofit organizations such as universities, government agencies, relief agencies and charitable organizations.

Success in marketing requires understanding a number of fundamental concepts, principles, theories, tools and techniques. Courses are designed to help students acquire this knowledge and to develop competencies needed throughout a marketing career.

Marketing Academic Advising

Academic advising and career guidance for upper division marketing majors is available in the Department of Marketing office, Suite 220 Wehner Building. (979) 845-2309. Hannah Cole, hcole@mays.tamu.edu, is the academic advisor for the department.

Majors

- Bachelor of Business Administration in Marketing, Advertising Strategy Track (p. 297)
- Bachelor of Business Administration in Marketing, Analytics and Consulting Track (p. 298)
- Bachelor of Business Administration in Marketing, Healthcare Marketing Track (p. 300)
- Bachelor of Business Administration in Marketing, Professional Selling and Sales Management Track (p. 301)
- Bachelor of Business Administration in Marketing, Strategic Retailing Track (p. 302)

Marketing - BBA, Advertising Strategy Track

The Department of Marketing offers a Bachelor of Business Administration (BBA) in Marketing. A career path in marketing typically begins in an entry-level position in advertising, retailing, marketing analytics, marketing consulting, professional selling, or healthcare marketing. Opportunities are available in manufacturing, wholesale and retail, as well as nonprofit organizations such as universities, government agencies, relief agencies and charitable organizations.

Success in marketing requires understanding a number of fundamental concepts, principles, theories, tools and techniques. Students select from one of five specializations, or tracks, which provide academic focus and career direction for student interests. Courses are designed to help students acquire this knowledge and to develop competencies needed throughout a marketing career.

The BBA Marketing (MKTG) Advertising Strategy track offers students interested in advertising several opportunities for building skills specific to this career path, and for networking with advertising professionals. In addition to taking advertising courses, students can attend professional conferences, participate in local, regional, and national advertising campaign competitions, and tour top advertising agencies.

The BBA MKTG-Advertising Strategy track supplements the degree by tailoring directed elective courses and building specific advertising skills. Also, it provides recruiters a means of identifying top students interested in advertising.

Students who complete the BBA MKTG-Advertising Strategy degree program are well-prepared for careers in advertising account services or brand management, or they may choose to specialize in related areas such as media planning, social and digital media, or public relations.

Upper Level Entry Requirements

Admission to the upper level major of marketing (MKTG) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 262).

A career path in marketing typically begins in an entry-level position in advertising, retailing, marketing analytics, marketing consulting, professional selling, or healthcare marketing. Opportunities are available in manufacturing, wholesale and retail, as well as nonprofit organizations such as universities, government agencies, relief agencies and charitable organizations.
Success in marketing requires understanding a number of fundamental concepts, principles, theories, tools and techniques. Students select from one of five specializations, or tracks, which provide academic focus and career direction for student interests. Courses are designed to help students acquire this knowledge and to develop competencies needed throughout a marketing career.

The BBA Marketing (MKTG) Analytics and Consulting track offers students interested in analytics and consulting several opportunities for building skills specific to this career path, and for networking with analytics and consulting professionals. In addition to taking courses geared to analytics and consulting, students can attend professional conferences and participate in local, regional, and national consulting competitions.

The BBA MKTG-Analytics and Consulting track complements the student's degree and provides tangible evidence of rigorous academic and experiential preparation for a career in analytics or consulting. The curriculum emphasizes marketing analytics and marketing consulting as well as a consulting project in corporate social responsibility.

Students who complete the BBA MKTG-Analytics and Consulting degree program are well-prepared to work in marketing analytics or consulting positions for marketing, information systems, or organizational structure.

**Upper Level Entry Requirements**

Admission to the upper level major of marketing (MKTG) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 262).

**Marketing - BBA, Professional Selling and Sales Management Track**

The Department of Marketing offers a Bachelor of Business Administration (BBA) in Marketing. A career path in marketing typically begins in an entry-level position in advertising, retailing, marketing analytics, marketing consulting, professional selling, or healthcare marketing. Opportunities are available in manufacturing, wholesale and retail, as well as nonprofit organizations such as universities, government agencies, relief agencies and charitable organizations.

Success in marketing requires understanding a number of fundamental concepts, principles, theories, tools and techniques. Students select from one of five specializations, or tracks, which provide academic focus and career direction for student interests. Courses are designed to help students acquire this knowledge and to develop competencies needed throughout a marketing career.

The BBA Marketing (MKTG) **Professional Selling and Sales Management** track offers students interested in sales several opportunities for building skills specific to that career, and for networking with sales professionals. In addition to taking sales courses, students can attend professional conferences, participate in local, regional, and national sales competitions, and network with sales partners through local events.

Students who are looking to expand their communication and relationship building skills should consider the BBA MKTG-**Professional Selling and Sales Management** track. Students in this program take three sales-related directed electives that provide real world scenarios and role-plays which help them build skills that are critical for a successful career in sales and marketing.

Students completing the BBA MKTG-**Professional Selling and Sales Management** degree will have enhanced their interpersonal communication skills in a business environment, giving them a distinct advantage in the job market regardless of the planned career path.

**Upper Level Entry Requirements**

Admission to the upper level major of marketing (MKTG) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 262).
Management Information Systems: Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

Business Honors: Students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 225 Business Competency (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

Finance: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower level). The general elective taken in the senior year can be reduced by 1 credit.

Students pursuing the Bachelor of Science in University Studies - BS, Business Concentration are encouraged to identify minors that complement the business concentration and reflect their individual interests and strengths.

- **Flexibility for the future:** Students who earn this degree find they have flexible options after graduation since they are prepared to pursue a wide range of careers and graduate programs.

Careers pursued by University Studies-Business graduates include financial advisor, account manager, marketing coordinator, sales representative, web developer, public relations specialist, consultant, and human resource specialist.

### Majors

- Bachelor of Science in University Studies, Business Concentration (p. 303)

### University Studies - BS, Business Concentration

The Bachelor of Science in University Studies is offered by Texas A&M University.

Students who earn a Bachelor of Science (BS) in University Studies are able to tailor their undergraduate coursework to align with future personal and career objectives. Specific requirements, course offerings, and restrictions exist for the University Studies-Business degree.

The University Studies-Business curriculum consists of a 24 credit hour business concentration and two minors of 15 to 18 hours each. The degree program offers a number of unique features and benefits:

- **Foundational knowledge:** The business concentration provides students with a firm grasp of the basic aspects of business including accounting, finance, management, management information systems, marketing and supply chain management.

- **Interdisciplinary study:** Students pursue two minors that involve coursework in other Texas A&M colleges and departments. Students are encouraged to identify minors that complement the business concentration and reflect their individual interests and strengths.

- **Flexibility for the future:** Students who earn this degree find they have flexible options after graduation since they are prepared to pursue a wide range of careers and graduate programs.

Careers pursued by University Studies-Business graduates include financial advisor, account manager, marketing coordinator, sales representative, web developer, public relations specialist, consultant, and human resource specialist.

1. Two university approved minors are required for this degree program. The minors must be completed in colleges other than Mays Business School. Includes the 30-36 hours used to satisfy the two minor requirements.

2. 18-24 hours selected from any 100-499 course not used elsewhere.

3. Enrollment of University Studies majors in courses offered at Mays Business School is limited to the required business concentration courses plus the following courses to be used as electives: ACCT 210, BUSN 403, BUSN 481, FINC 201 and MGMT 212.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 47) coursework and 3 hours of Cultural Discourse (p. 46) coursework. A course satisfying a core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.
COLLEGE OF DENTISTRY

Executive Director, Communications, Institutional Advancement and Alumni Affairs - Susan Mitchell Jackson, M.A.
Assistant Dean, Finance - Gail Parrigin-Clark, M.B.A.
Executive Director, Facilities Services and Planning - Dale A. Christensen, M.B.A.

General Statement

The College of Dentistry has been a distinguished resource for dental education in Texas for more than 100 years and is dedicated to combining higher education and research with community service.

Known internationally for producing excellent clinicians, the college opened in 1905. Since then, it has graduated more than 8,000 dentists and dental hygienists. Nearly one-third of all dentists in Texas are College of Dentistry graduates. The college also graduates a large number of dental hygienists with bachelor’s degrees in the state. In addition to a doctor of dental surgery and bachelor’s degree in dental hygiene, postdoctoral certificate and degree programs are offered.

Today, the college works toward innovative treatments, leading-edge technology and better ways to deliver care. It not only ensures that Texas has qualified generations of dentists, dental hygienists and scientists, but also provides care for patients who have no other access to oral health care.

This program prepares students for the opportunity to pursue an occupational license. Please refer to the Notification for Students Pursuing an Occupational License in our catalog for additional information. If you are unsure if your program is affected by the recent approval of this new law (HB 1508), you will need to contact the accrediting agency and inquire.

Location

The College of Dentistry is located in Dallas, Texas, adjacent to the rapidly expanding Baylor University Medical Center. The Dallas-Fort Worth metropole is an area noted for the vigor, optimism and friendliness of its population. The ever-changing skyline reflects the continuing growth of the area.

Opportunities for educational, cultural and religious enrichment are numerous. Within a 100-mile radius of Dallas are more than 40 colleges and universities. Dallas has professional theater, opera, symphony and dance companies. Among the many museums and galleries in the area, the Dallas Museum of Art has received international acclaim for both its design and its exhibits.

For sports enthusiasts, Dallas has professional and college football, basketball, baseball, hockey and soccer teams. The metroplex annually hosts competitions in golf, tennis, bowling, soccer and running that attract many of the world's best athletes. Numerous lakes and parks provide recreational opportunities for boating, fishing, swimming, jogging, biking and horseback riding.

Dallas is served by a variety of transportation modes, including several interstate highways, the Amtrak rail system and the Dallas Area Rapid Transit system. The Dallas/Fort Worth International Airport, with many major and feeder airline connections, is one of the busiest air terminals in the nation. Airline connections also can be made at nearby Love Field, which is a 20-minute car ride from the college.

The College of Dentistry is centrally located in the city of Dallas, about one mile east of the downtown business district. This is an area where restored historic homes and varied types of new construction create diverse neighborhoods. The Texas State Fairgrounds and the downtown arts district, with its world-class performance halls and art museum, help make this part of Dallas an exciting place to live and work. Living accommodations are located as close as one block from the campus.

Caruth School of Dental Hygiene

The Caruth School of Dental Hygiene is an integral part of the College of Dentistry. The dental hygiene school was equipped in 1954 through a generous gift from the Caruth Foundation of Dallas and W.W. Caruth, Jr., in honor of W.W. Caruth, Sr., a pioneer Texas philanthropist.

The first dental hygiene students were accepted in fall 1955. At that time, there was no requirement for previous college experience. In 1964, the
Caruth School of Dental Hygiene established prerequisite courses prior to professional study. During the same year, the Bachelor of Science degree was offered in addition to the traditional certificate program. All graduates since 1973 have received the degree of Bachelor of Science in Dental Hygiene. In 1997, the Master of Science degree was added.

**Purpose**

The purpose of the Caruth School of Dental Hygiene is to educate preventive oral health professionals, eligible for licensure as dental hygienists, who are capable of providing educational, clinical and therapeutic services that support total health through the promotion of optimal oral health.

**Opportunities**

The services of a dental hygienist are offered in private dental practices and clinics, public health agencies, school systems, hospitals, nursing homes and corporate health facilities. Dental hygienists also teach in dental and dental hygiene programs and participate in health research. The baccalaureate degree offered through the Caruth School of Dental Hygiene by the College of Dentistry satisfies the educational requirement for eligibility for state licensure. Graduates are provided with diverse experiences to prepare for a variety of employment settings and to pursue graduate education. A Master of Science in Education for Healthcare Professionals with a focus in dental hygiene is also offered.

*This program prepares students for the opportunity to pursue an occupational license. Please refer to the Notification for Students Pursuing an Occupational License in our catalog for additional information.*

**Faculty**

Brown, Maureen D, Adjunct Assistant Professor
Dental Hygiene
BS, Baylor College of Dentistry, 2003

Cotter, Jane C, Assistant Professor
Dental Hygiene
MS, Caruth School of Dental Hygiene, 2009

Fox, Eric, Clinical Assistant Professor
Dental Hygiene
MS, Texas A&M University Baylor College of Dentistry, 2005

Garcia, Alejandra, Clinical Assistant Professor
Dental Hygiene
BS, Baylor College of Dentistry, 1997

Kabani, Faizan A, Assistant Professor
Dental Hygiene
PHD, University of North Texas Health Science Center, 2017

Kaz Frick, Emma, Adjunct Assistant Professor
Dental Hygiene
BA, Arizona State University, 2015

King, Tracy, Clinical Associate Professor
Dental Hygiene
MS, TX A&M College of Dentistry, 2002

Mallonee, Lisa F, Professor
Dental Hygiene
MPH, University of North Carolina at Chapel Hill, 2000

Muzzin, Kathleen B, Clinical Professor
Dental Hygiene
MS, University of Missouri - Kansas City, 1985

Reed, Kayla, Adjunct Assistant Professor
Dental Hygiene
MED, Texas A&M University, 2019

Spittle, Leah, Adjunct Assistant Professor
Dental Hygiene
MED, Texas A&M University, 2016

Vu, Mary T, Clinical Assistant Professor
Dental Hygiene
MS, Texas A&M University Baylor College of Dentistry, 2013

Wyatt, Leigh A, Executive Professor
Dental Hygiene
MS, Baylor College of Dentistry, 2014

**Majors**

- Bachelor of Science in Dental Hygiene (p. 306)

**Dental Hygiene - BS**

The Caruth School of Dental Hygiene is dedicated to delivering the most innovative techniques for educating future dental hygienists, as well as provide respectful public clinical services with the utmost integrity and ethical standards. Caruth fosters a sense of community, embraces a diverse group of students and faculty, and supports personal growth. Caruth School of Dental Hygiene is committed to being a national leader in dental hygiene education and with that our school takes pride in the students who choose to maintain a high level of diligence, are dedicated, and achieve success within our program.

The goals of the Dental Hygiene Program are:

- The curricular program will support student competency and prepare them for dental hygiene practice.
- The Dental Hygiene program facilitates student learning.
- The Dental Hygiene faculty will demonstrate participation in teaching, service and scholarly activity.
- The Dental Hygiene students will provide quality care to patients.

Dental hygiene offers an excellent opportunity to serve the community. The services of a dental hygienist are offered in private dental practices and clinics, public health agencies, school systems, hospitals, nursing homes and corporate health facilities. Dental hygienists also teach in dental and dental hygiene programs and participate in health research. The baccalaureate degree offered through the Caruth School of Dental Hygiene by Texas A&M University College of Dentistry satisfies the educational requirement for eligibility for state licensure. Graduates are provided with diverse experiences to prepare for a variety of employment settings and to pursue graduate education.

Registered dental hygienists assess a patient’s oral condition in order to offer patient-specific preventive and educational services. In addition to providing tailored treatment plans, dental hygienists motivate their patients to understand and improve their current oral conditions. A major role of a dental hygienist is to perform periodontal therapy which includes evaluating the current state of the oral cavity through periodontal
charting and providing treatment based upon the health of the gingival tissues and surrounding periodontium.

Dental Hygiene is an exciting career choice for anyone interested in promoting oral health. A dental hygienist is a licensed preventive oral health professional who provides educational, clinical and therapeutic services supporting total health through the promotion of optimal oral health.

This program in dental hygiene is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of ‘approved without reporting requirements.’ The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at (312)440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611-2678. The Commission’s web address is http://www.ada.org/en/coda (https://www.google.com/url?q=http://www.ada.org/en/coda&amp;sa=D&amp;ust=1587048625665000&amp;usg=AFQjCNGYIerTxGY73EApbQxsA9Wzc_DdXQ). The Commission on Dental Accreditation can be contacted at (312)440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611-2678. The Commission’s web address is http://www.ada.org/en/coda (https://www.google.com/url?q=http://www.ada.org/en/coda&amp;sa=D&amp;ust=1587048625665000&amp;usg=AFQjCNGYIerTxGY73EApbQxsA9Wzc_DdXQ).

The length of the program is two years. Application deadline is January 5 of the year of anticipated entrance into the program with a start term in the Fall.

The BS in Dental Hygiene is offered in Dallas, Texas.

Program Requirements

Coursework totaling 60 semester credit hours, including core courses for BS degree.

General Statement
The College of Education and Human Development is dedicated to transforming and enriching lives with programs built on the core Aggie values of leadership, excellence, integrity, loyalty, respect and selfless service.

Consistent with the land grant mission of our university, the teaching, research and service activities of the college foster innovation and development, influence policy and practice, and transform the lives of individuals in our state and across the nation. Using basic and applied research activities, the college aims to translate research findings into accessible models and structures that will fundamentally improve educational and health outcomes for all.

With outstanding faculty and students, the college creates a community of scholars who impact the world. Its faculty provide innovative, high-impact educational experiences with an emphasis on transformational learning opportunities.

The college has a history of preparing high-quality teachers and administrators and is consistently among the leading institutions in the state for producing the highest number of certified teachers in high-need areas. It continues this tradition of preparing professionals and leaders in education, sport, business, government, and health through programs in four academic departments: Educational Administration and Human Resource Development (EAHR), Educational Psychology (EPSY), Health and Kinesiology (HLKN), and Teaching, Learning and Culture (TLAC).

The college manages programs for the preparation of certified school personnel as well as human service professionals in the private sector, state and community agencies. Majors include interdisciplinary studies (certification) EC-6, middle school, bilingual and special education; technology management and human resource development; health (including school health education, community health, and allied health); kinesiology (including physical education certification); and sport management. Students interested in any elementary, middle school or secondary certification programs are responsible for meeting with a college advisor. Advisors have specific information available regarding all program options.

The College of Education and Human Development is required by Federal policy to make available the summary report of students’ scores on the TExES examination. This information is available from the Associate Dean for Academic Affairs.

Requirements for Admission to Teacher Education Programs
The State of Texas establishes standards for teacher education programs. All certification programs at Texas A&M are in compliance with these requirements. Students must meet state, University, College of Education and Human Development and department/program requirements for matriculation into a teacher education program. Students are responsible for contacting the departmental advisors to obtain information about specific requirements for their major and program areas.

Teacher Education Retention Policy
A student, after being admitted to teacher education, who fails to continue to meet all requirements, will be dropped from the program and may not continue in or register for any professional teacher education course. Any student removed from or who discontinues student teaching because of unsatisfactory performance will be dropped from the teacher education program. A student dropped from the teacher education program may apply through their respective department for readmission to the teacher education program.

Majors

Department of Educational Administration and Human Resource Development
- Bachelor of Science in Human Resource Development (p. 311)
- Bachelor of Science in Technology Management (p. 312)

Department of Educational Psychology
- Bachelor of Science in Interdisciplinary Studies, Bilingual Education-EC6 (p. 317)
- Bachelor of Science in Interdisciplinary Studies, Special Education-EC12 (p. 318)
- Bachelor of Science in University Studies, Child Professional Services Concentration (p. 320)

Department of Health and Kinesiology

Health
- Bachelor of Science in Community Health (p. 326)
- Bachelor of Science in Health, Allied Health Track (p. 327)
- Bachelor of Science in Health, School Health Track (p. 328)

Kinesiology
- Bachelor of Science in Kinesiology, All-Level Physical Education Teacher Certification Track (p. 329)
- Bachelor of Science in Kinesiology, Dance Science Track (p. 331)
- Bachelor of Science in Kinesiology, Exercise and Sport Science Track (p. 332)
- Bachelor of Science in Kinesiology, Exercise Science Track, Applied Exercise Physiology Concentration (p. 334)
- Bachelor of Science in Kinesiology, Exercise Science Track, Basic Exercise Physiology Concentration (p. 335)
• Bachelor of Science in Kinesiology, Exercise Science Track, Motor Behavior Concentration (p. 336)
• Bachelor of Science in Kinesiology and Master of Science in Athletic Training, 5-Year Degree Program (p. 337)
• Bachelor of Science in University Studies, Dance Concentration (p. 343)

Sports Management
• Bachelor of Science in Sport Management (p. 339)
• Bachelor of Science in Sport Management, Internship Track (p. 340)
• Bachelor of Science in Sport Management, Non-Internship Track (p. 342)

Department of Teaching, Learning and Culture
• Bachelor of Science in Interdisciplinary Studies, English Language Arts/Social Studies, Middle Grades Certification (p. 349)
• Bachelor of Science in Interdisciplinary Studies, Math/Science, Middle Grades Certification (p. 350)
• Bachelor of Science in Interdisciplinary Studies, Pre-K-6, Generalist Certification (p. 351)

Certification
• Secondary Graduate Certification Program (p. 352)

Minors

Department of Educational Administration and Human Resource Development
• Human Resource Development Minor (p. 314)
• Technology Management Minor (p. 314)

Department of Educational Psychology
• Creative Studies Minor (p. 321)

Department of Health and Kinesiology
• Coaching Minor (p. 344)
• Dance Minor (p. 345)
• Health Minor (p. 345)
• Sport Management Minor (p. 345)

Department of Teaching, Learning and Culture
• Applied Learning-Science, Technology, Engineering and Mathematics (STEM) Minor (p. 353)

Certificates

Department of Educational Psychology
• Interdisciplinary Studies Certificate (p. 321)

Masters

Department of Educational Administration and Human Resource Development
• Master of Education in Educational Administration (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/education-human-development/educational-administration-human-resource-development/administration-med/)

Department of Educational Administration and Human Resource Development

The Department of Educational Administration and Human Resource Development prepares people for many professional careers associated with the broad fields of corporate education. The Bachelor of Science in Human Resource Development and the Bachelor of Science in Technology Management are designed to encourage students to achieve a bachelor’s degree and to enter the profession in their area of specialty. The programs prepare graduates to assume responsibility for enhancing technology, developing workplace competence and strengthening student achievement in their career paths.

**Majors**
- Bachelor of Science in Human Resource Development (p. 311)
- Bachelor of Science in Technology Management (p. 312)

**Minors**
- Human Resource Development Minor (p. 314)
- Technology Management Minor (p. 314)

**Human Resource Development - BS**

The curricula for Human Resource Development provides students with the content and course sequence to enter the workforce in either...
education, business or industry. The program stresses application in real settings as well as strong foundations in knowledge, and has strong field-based components. The following courses have been combined to give students a well-rounded foundation in the roles and responsibilities in education and business settings.

1. To be chosen in consultation with academic advisor, if necessary
2. Writing or Communication Intensive course requirement
3. Professional Phase.
4. Online course offered

Students must have completed 60 hours to register for 300/400-level courses.

Three hours of International and Cultural Diversity (p. 47) and three hours of cultural discourse (p. 46) are required. Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences, creative arts, language, philosophy and culture, or electives.

Foreign Language Requirement - 2 years same foreign language in high school OR 1 full year (2 semesters) of same foreign language in college.

## Technology Management - BS

Texas A&M University’s Technology Management (TCMG) program focuses on the profound importance of connecting people, information, and technology from a multidisciplinary perspective for the betterment of society.

The students of the Technology Management program can expect to obtain integrated knowledge of human development, management,
and technology competencies within a dynamic and rapidly evolving environment through innovative learning.

The Bachelor of Science degree in Technology Management will inculcate students with the knowledge, skills, abilities, and attitudes to leverage technology opportunities in all organizations. The BS-TCMG program will provide students with in-depth knowledge, hands-on experience, and practical skills of managing information technology and developing IT personnel to achieve organizational goals. Through our program, graduates will:

- Gain in-depth knowledge that covers the full spectrum of information technology, including database, networking, systems administration, data analytics, and information security;
- Obtain hands-on experience with a wide variety of technical tools commonly used in today’s IT industry;
- Understand the human decision making process and managerial implications when interacting with information technology; and
- Learn practical skills of managing the various technology, human, and business components in an organizational environment to achieve goals.

Our strong internship program provides graduates with direct experience in the development and management of information technology in a real-world organizational environment. These internships are designed to match the backgrounds and career interests of students.

The program could lead to a wide variety of careers in IT/data analytic fields, such as:

- IT Support,
- Business Analyst,
- Data analyst,
- User Experience Engineer,
- Information Security Analyst

**Human Resource Development - Minor**

Human Resource Development (HRD) is the process of improving learning and performance in individual, group and organization contexts through domains of expertise such as lifelong learning, career development, training and development, and organization development. A minor in HRD allows for a wider range of potential employment and accommodation to a diverse education professional experience.

Please refer to the webpage - https://eahr.tamu.edu/ - for information, requirements, and application deadlines for adding the minor.

Total Semester Credit Hours 15

Minimum required GPA to declare minor is a 2.5.

Obtain a ‘C’ or better in each courses taken towards minor

Achieve overall GPA of 2.5 in approved minor coursework.

Students must enrolled after completing 12 hours at Texas A&M and a maximum of 75 hours total.

**Department of Educational Psychology**

The Department of Educational Psychology offer a Bachelor of Science (B.S.) degree in Interdisciplinary Studies with teacher certification concentrations in Bilingual Education or Special Education. The department also offers a B.S. in University Studies with a non-certification concentration in Child Professional Services. The department’s minor in Creative Studies focuses on developing and growing one’s creative thinking ability for personal and professional situations.
Requirements for Admission to Professional Phase

The undergraduate curricula in the Department of Educational Psychology are composed of two phases: the pre-professional phase and the professional phase. Upon acceptance into the department, all students enter the pre-professional phase and are assigned a lower-division classification (EDIS). The pre-professional phase consists of University Core Curriculum requirements and introductory courses to the major field of study. After successful completion of these requirements, students are eligible to apply for admission into the professional phase. Cohorts in bilingual and special education are limited in number and students are admitted on a competitive basis; meeting the minimum program prerequisites does not guarantee admission to the professional phase. If admitted to the professional phase of the program, students will be assigned an upper-level classification (INST). The professional phase consists of advanced work in the major field of study and professional development courses with field-based experiences.

Requirements for Admission to the Professional Phase of Teacher Education Programs

The State of Texas establishes standards for teacher education programs. All certification programs at Texas A&M are in compliance with these requirements. Students must meet state, University, College of Education and Human Development and department/program requirements for matriculation into a teacher education program. Below are the requirements for the traditional certification program. Students are responsible for contacting a departmental advisor to obtain information about specific requirements for majors and program areas, as some programs have requirements beyond those listed below. University-wide requirements for admission to teacher education include the following:

1. An approved degree plan or certification and teaching field plan(s).
2. Minimum GPR of 2.75 for the special education program and 2.75 for the bilingual education program based on all coursework completed at Texas A&M University. (See departmental advisor for additional grade requirements.)
3. Completion of all required University core courses.
4. A grade of B or higher in all certification courses. (See departmental advisor for additional grade requirements).
5. Satisfaction of English proficiency requirement by:
   a. Earning a grade of B or higher in ENGL 103 or ENGL 104 (or receiving credit by exam for the course); or
   b. Earning a grade of B or higher in ENGL 210, ENGL 235 or ENGL 241; and
   c. Earning no grade below C in any course taken in (a) or (b) above.
6. Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.
7. Oral interview required for admission to upper level for Hispanic Bilingual Education.
8. Documentation of foreign language and computer literacy requirements on file in the Texas A&M University Office of Admissions.
9. Transcripts from all institutions of higher education on file in the Texas A&M University Office of Admissions.

Requirements for Admission to Student Teaching

1. Successful admission to Professional Phase of Teacher Education.
2. Complete Application for Clinical Teaching by the given deadlines for each semester.
3. Completion of all courses listed on the degree plan. All coursework must have a grade of C or better. See departmental advisor for additional grade requirements.
4. A minimum GPR of 3.0 in upper-level courses in Special Education. See departmental advisor for additional grade requirements.
5. A minimum GPR of 2.75 on all coursework completed at Texas A&M. See departmental advisor for additional grade requirements.
6. Satisfaction of Spanish proficiency requirements (Hispanic Bilingual Education ONLY).
7. In addition to #6, satisfactory performance on the written and oral Spanish proficiency component of the Hispanic Bilingual Education program admission process.

Certificates

- Interdisciplinary Studies Certificate (p. 321)

Interdisciplinary Studies - BS, Bilingual Education EC-6

The Department of Educational Psychology offers an undergraduate degree program in Interdisciplinary Studies that includes certification in bilingual education and general elementary education, grades EC through 6. This program prepares teachers to instruct students who are served in bilingual classes at the elementary level. Students interested in certification in bilingual education should contact the EPSY undergraduate advisor in Heaton Hall.

Program Requirements

The following curriculum leads to the Bachelor of Science degree in Interdisciplinary Studies with certification in Bilingual Education, EC-6. Students are required to meet with their assigned academic advisor prior to registration each semester.

Educational Psychology
PHD, Texas A&M University, 2004

Yoon, Myeongsun, Associate Professor
Educational Psychology
PHD, Arizona State University, 2007

Zhang, Dan D, Professor
Educational Psychology
PHD, University of New Orleans, 1998
### Second Year

**Fall**
- GEOG 202 Geography of the Global Village or GEOG 301 Geography of the United States (3)
- INST 210 Understanding Special Populations (3)
- SPAN 302 Advanced Grammar (3)
- TEFB 273 Introduction to Culture, Community, Society and Schools (3)
- Life and physical sciences elective (4)

#### Select one of the following:
- CHEM 106 Molecular Science for Citizens and Molecular Science for Citizens Laboratory (3)
- CHEM 119 Fundamentals of Chemistry I (3)
- GEOG 203 Planet Earth and Planet Earth Lab (3)
- PHYS 201 College Physics (3)
- PHYS 202 College Physics (3)
- GEOL 101 Principles of Geology (3)

**Spring**
- EDCI 364 Creativity and the Young Child (3)
- EDCI 353 Early Childhood through Adolescent Education (3)
- EPFB 210 Family Involvement and Empowerment (3)
- EPSY 320 Child Development or EPSY 321 Adolescent Development (3)
- KINE 120 The Science of Basic Health and Fitness (1)
- SPAN 303 Spanish Composition (3)

**Summer**
- EPSY 485 Directed Studies (1)
- MATH 366 Structure of Mathematics II (3)

**Semester Credit Hours** 16

### Third Year

**Fall**
- BEFB 472 Bilingual and Dual Language Methodologies (3)
- BEFB 474 Biliteracy for Bilingual and Dual Language Classrooms (3)
- SPAN 320 Introduction to Hispanic Literature (3)
- RDNG 373 Teaching Reading Through Children’s Literature (3)
- TEFB 371 Dynamics and Management in Multicultural/Inclusionary Learning Environments (3)

**Spring**
- BEFB 470 Bilingual Assessment and Monitoring (3)
- BEFB 476 Content Area Instruction for Bilingual Programs (3)
- RDNG 351 Reading in the Elementary School (3)
- RDNG 473 Assessment in Reading Instruction (3)
- SPAN elective (3)

**Semester Credit Hours** 15

### Fourth Year

**Fall**
- RDNG 467 Reading and the Language Arts (3)
- TEFB 410 Social Studies and the Humanities in the Elementary School (3)
- TEFB 412 Mathematics in the Elementary School (3)
- TEFB 413 Science in the Elementary School (3)

**Semester Credit Hours** 12

**Spring**
- BEFB 425 Student Teaching in Hispanic Bilingual Education (3)
- BEFB 426 Effective Instruction of Hispanic Students of Diverse Abilities (3)

**Semester Credit Hours** 6

**Total Semester Credit Hours** 124

---

**Interdisciplinary Studies - BS, Special Education EC-12**

The Department of Educational Psychology (EPSY) offers an undergraduate degree program in Interdisciplinary Studies that prepares students to be special educators. Completion of this program leads to teaching certifications in special education (EC through grade 12), general education (EC through grade 6), and English as a Second Language (ESL) within the constraints of the Texas Education Agency (TEA). The Special Education program focuses on preparing teachers to instruct students with disabilities in both general education and special education settings. Students interested in becoming special education teachers should contact the EPSY undergraduate advisor in Heaton Hall.

### Program Requirements

The following curriculum leads to a Bachelor of Science degree in Interdisciplinary Studies with certification in Special Education K-12.
Students are required to meet with their assigned academic advisor prior to registration each semester.

University Studies - BS, Child Professional Services Concentration

The Department of Educational Psychology offers a Bachelor of Science (B.S.) in University Studies with an area of concentration in Child Professional Services. This non-certification degree has a flexible 120-hour program of study, enabling students to pursue a body of coursework closely aligned with their professional interests. The degree includes a prescribed concentration and two minors: one in Sociology and another in either Creative Studies or Human Resource Development. The Child Professional Services concentration does not allow students to seek teacher certification. However, it provides a strong foundation in child and adolescent development, instructional methods, educational psychology, kinesiology, human resource development, and sociology as a means of preparing graduates for careers in civic, social, or religious organizations; hospitals or non-profit organizations; or family and community services. Students interested in University Studies - Child Professional Services should contact the EPSY undergraduate advisor located in Heaton Hall.

Select one of the following:

1. Students will participate in at least two seminars per semester with the program director and graduate assistant. Seminars are a great way for students to continue to work on transition skills but more in-depth and in relation to living on a college campus. Seminars may include financial management, self-determination and advocacy, career awareness/readiness, technology, job shadowing, health and wellness, interpersonal skills, and decision making.

2. Five zero-credit courses are required. See Advisor for a complete list of electives.

Interdisciplinary Studies - Certificate

The Interdisciplinary Studies Certificate through the Department of Educational Psychology is designed for the Aggie ACHIEVE Program. Aggie ACHIEVE is a four-year postsecondary program for young adults with intellectual and developmental disabilities (IDD) at Texas A&M University. Aggie ACHIEVE aims to provide an inclusive and immersive college education and equip students for employment in the community. The program aligns coursework, internship opportunities, and extracurricular activities with each student's academic interests and employment goals. Please reference the program requirements tab for information on course of study requirements for the Interdisciplinary Studies certificate. For additional information about the program, please reference our website (https://aggieachieve.tamu.edu/).

Department of Health and Kinesiology

The Department of Health and Kinesiology offers degrees in Health, Kinesiology, Sport Management and University Studies. Several tracks are offered for students who are interested in a career in these fields. All students majoring in the Department of Health and Kinesiology are assigned an advisor in accordance with their career choice.

The curricula in Health, Kinesiology, Sport Management and University Studies offer opportunities to obtain professional preparation for careers such as health and physical education teachers in public and private schools, coaches, sport administrators, community health educators, clinical and applied exercise physiologists, exercise scientists, recreational leaders (in non-school agencies), dance scientists, sports marketing professionals and athletic administrators. The department also
provides academic preparation for students interested in allied health and medical related professional schools, e.g., physical therapy, occupational therapy, physicians’ assistant, nursing, or medicine.

The Department of Health and Kinesiology offers minors in coaching, dance, health, and sport management. The coaching, dance, and health minors consist of 18 credit hours. The sport management minor is 15 credit hours. A list of courses and enrollment information regarding the minor may be obtained from the Advising Office in the Department of Health and Kinesiology.

In addition to undergraduate degrees, the department offers the Master of Education, Master of Science, Doctor of Education, and Doctor of Philosophy degrees.

**Teacher Certification**

Students majoring in either Health or Kinesiology may qualify for a Provisional Teaching Certificate after being admitted to teacher education, completing the prescribed requirements, and being recommended by the department to the Texas Education Agency through the University’s Council for Teacher Education. Completion of this degree and other academic requirements does not automatically assure that the student will be recommended for a teaching certificate. Students interested in Texas certification for a teaching career must apply for, and be admitted to, the professional phase of teacher education. Students should see an academic advisor for specific requirements and courses to be admitted to professional phase.

**Non-Teacher Certification Tracks**

Students may seek a career other than public school teaching. The department offers opportunities in allied health, community health, dance science, exercise science, motor behavior, and sport management. Students are encouraged to declare career intentions early so that appropriate coursework and field experiences may be planned. Students pursuing careers other than teaching are not eligible for teacher certification. These opportunities are briefly summarized in the descriptions of each track.

**Departmental Advising**

Because of the wide variety of careers in Health, Kinesiology, and Sport Management and the difference in course requirements for each, it is essential for students to take advantage of the advising opportunities offered by the department. Students are assigned to an academic advisor in accordance with their degree choice and are encouraged to consult with their advisor on course sequencing and timing for completion of degree plan requirements. It is recommended for students to declare career intentions early so appropriate coursework may be planned. All undergraduate advising matters are handled by the advisors in the department’s Advising Office. Information concerning entrance to professional schools in health-related fields is available from the Office of Professional School Advising.

Students are encouraged to become engaged in professional organizations and extracurricular activities that afford opportunities for involvement in their respective professions.

**Majors**

**Health**
- Bachelor of Science in Community Health (p. 326)
- Bachelor of Science in Health, Allied Health Track (p. 327)
- Bachelor of Science in Health, School Health Track (p. 328)

**Kinesiology**
- Bachelor of Science in Kinesiology, All-Level Physical Education Teacher Certification Track (p. 329)
- Bachelor of Science in Kinesiology, Dance Science Track (p. 331)
- Bachelor of Science in Kinesiology, Exercise and Sport Science Track (p. 332)
- Bachelor of Science in Kinesiology, Exercise Science Track, Applied Exercise Physiology Concentration (p. 334)
- Bachelor of Science in Kinesiology, Exercise Science Track, Basic Exercise Physiology Concentration (p. 335)
- Bachelor of Science in Kinesiology and Master of Science in Athletic Training, 5-Year Degree Program (p. 337)

**Sport Management**
- Bachelor of Science in Sport Management (p. 339)
- Bachelor of Science in Sport Management, Internship Track (p. 340)
- Bachelor of Science in Sport Management, Non-Internship Track (p. 342)

**University Studies**
- Bachelor of Science in University Studies, Dance Concentration (p. 343)

**Minors**

The Department of Health and Kinesiology offers four minors to all students at the university. The coaching, dance, and health minors have admission requirements. Students should consult with an advisor in the Department of Health and Kinesiology for admission requirements.

- Coaching Minor (p. 344)
- Dance Minor (p. 345)
- Health Minor (p. 345)
- Sports Management Minor (p. 345)

**Community Health - BS**

The Bachelor of Science in Community Health prepares and educates students to serve as community health educators and promoters in a variety of government and private health agencies, clinical settings, nonprofit organizations, volunteer agencies and other community organizations. This program is unique in that it offers a wide range of approved electives permitting the student to develop a program according to his or her needs and interests. Each graduate will have knowledge enabling them to communicate health and health education needs, concerns, and resources.

In addition to classroom experience, the student is exposed to pre-professional training through a non-paid, full semester internship in the final semester. This internship program provides them with on-the-job experience and employment opportunities. Students are placed in a setting which best fits their professional goals.

**Program Requirements**

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

Total Semester Credit Hours: 120

1. Must make a grade of C or better.
2. Course should meet Core Curriculum requirement.
3. Course selection should meet the International and Cultural Diversity (p. 47) and/or Cultural Discourse (p. 46) graduation requirement, if needed.
4. Select from the following courses: HLTH 216, HLTH 221, HLTH 333, HLTH 334, HLTH 354, HLTH 403, HLTH 405, HLTH 407, HLTH 410, HLTH 429; or NFSC 202.
5. Can be taken S/U or for a grade. Must make a C or better.
6. Course meets the University writing or communication requirement.
7. Must be taken S/U.

Health - BS, Allied Health Track

The goals of the curriculum leading to a Bachelor of Science in Health are to more effectively develop literate, informed professionals capable of making the world healthier and more humane. Students receive a general education through a broad exposure to information. They also receive a specialized education through coursework designed to help them develop as a professional, expand their knowledge and skills related to health education and prepare them for professional practice. The curriculum in health offers two options: the Allied Health track and the School Health track.

The Allied Health concentration gives students a strong background in health that serves them well if they choose to pursue additional schooling in an allied health area. This concentration provides an opportunity for students to take prerequisite courses for professional allied health schools such as nursing, PA, PT, OT, or other medical fields of study, as electives while receiving a background in the health education field. Students select electives from a list of prerequisites for specific professional school programs.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

Health - BS, School Health Track

The goals of the curriculum leading to a Bachelor of Science in Health are to more effectively develop literate, informed professionals capable of making the world healthier and more humane. Students receive a general education through a broad exposure to information. They also receive a specialized education through coursework designed to help them develop as a professional, expand their knowledge and skills related to health education, and prepare them for professional practice. The curriculum in health offers two options: the Allied Health track and the School Health track.

The School Health option provides a background in health education pedagogy and prepares educators to plan, implement, and evaluate health education in a variety of settings—with an emphasis on teaching health education in the school setting. Graduates have the ability to acquire K-12 teacher certification credentials, enabling them to teach health only in public or private schools, although students are encouraged to become certified in a support field through the use of core curriculum and support field electives. The degree plan provides the flexibility for students to take support field electives that also serve as course pre-requisites for professional schools such as nursing, occupational therapy, and other healthcare fields. Students complete appropriate course work in academic foundations and professional preparation as well as participate in several field-based learning experiences, representing a variety of grade levels and instructional types. The School Health option consists of three professional development phases with all students completing a full semester of clinical teaching in a public school setting as a culminating experience.

### Kinesiology - BS, All-Level Physical Education Teacher Certification Track

The Bachelor of Science degree in Kinesiology offers several options designed to prepare students for a variety of careers in public school education, exercise science and dance science. Some options also provide academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician’s assistant or medicine. There are some common course requirements for all
kinesiology options. Additional hours for each option are specifically
designed to prepare students for that field of study. The sequencing
of courses should be determined in consultation with an appropriate
academic advisor.

The Physical Education Teacher Education option is offered to students
wishing to teach/coach physical education/physical activity/sports in
public or private schools. This all-level certification qualifies the recipient
to teach/coach preschool–12th grades. The degree plan will lead to
successful fulfillment of the certification requirements outlined by the
Texas Education Agency, and also allows simultaneous completion of
the coaching minor. Students can also be certified in a support teaching
field through the use of core curriculum and support field electives. The
rigorous degree plan includes a full semester of clinical teaching in a
public school setting after completion of all necessary coursework.
More program information is available on the Department of Health and
Kinesiology (https://hlkn.tamu.edu/academics/bs-pk12-pe-teacher-cert/)
website. Interested individuals can acquire additional information by
contacting the advising office in the department or the faculty members
of the program.

**Program Requirements**

This degree plan has been laid out showing students the number of hours
they must take each semester in order to complete the degree in four
years without attending summer school. This is a suggested plan and
does not have to be followed as laid out below. Students should use
this information in conjunction with advising documents available from
their advisor or the department website when scheduling courses each
semester to ensure they are meeting all prerequisites, taking courses
for admission to professional phase in a timely manner and meeting all
grade requirements.

3. Must take at Texas A&M University.
4. Must meet Core Curriculum requirements.
5. Course selection should meet the International and Cultural Diversity (p. 47) and/or Cultural Discourse (p. 46) graduation requirement if needed.
6. To be chosen in consultation with your academic advisor.
7. Meets Creative Arts core curriculum requirement.

**Kinesiology - BS, Dance Science Track**

The Bachelor of Science degree in Kinesiology offers several options designed to prepare students for a variety of careers in public school education, exercise science and dance science. Some options also provide academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician’s assistant or medicine. There are some common course requirements for all kinesiology options. Additional hours for each option are specifically designed to prepare students for that field of study. The sequencing of courses should be determined in consultation with an appropriate academic advisor.

The Dance Science track for the BS in Kinesiology is offered to prepare and educate students to enter the field of dance science. Dance Scientists are professionals who are employed by dance companies and dance training facilities throughout the world to devise effective training programs as well as advise the dancers regarding nutrition, injury prevention/care, and dance psychology. Dance Scientists also become researchers, dance therapists, massage therapists, and better informed dancers and teachers.

**Program Requirements**

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

## Kinesiology - BS, Exercise and Sport Science Track

The Bachelor of Science degree in Kinesiology offers several options designed to prepare students for a variety of careers in public school education, exercise science and dance science. Some options also provide academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician’s assistant or medicine. There are some common course requirements for all kinesiology options. Additional hours for each option are specifically designed to prepare students for that field of study. The sequencing of courses should be determined in consultation with an appropriate academic advisor.

The Exercise and Sport Science option is offered to students wishing to pursue careers in exercise and sport training. A solid foundation in scientific principles related to the biology of sport along with the practical knowledge in physical activity pedagogy, coaching, and exercise training will prepare future coaches and trainers. This degree plan includes a full semester of practicum experience in appropriate environments.

Additional program information is available on the Department of Health and Kinesiology website or by contacting the advising office in the department.

The options in exercise science expose students to a strong science background making them excellent candidates for employment opportunities in exercise related areas (cardiac rehabilitation, corporate or private fitness), advanced graduate studies (motor behavior, exercise physiology) or professional school (medical, dental or physical therapy). Course prerequisites for medical, dental or physical therapy professional schools are included in the various programs under this track.

Kinesiology - BS, Exercise Science Track, Applied Exercise Physiology Concentration

The Bachelor of Science degree in Kinesiology offers several tracks designed to prepare students for a variety of careers. The Applied Exercise Physiology track prepares students to become clinical exercise physiologists working in cardiopulmonary rehabilitation programs. This program contains a strong science background making students excellent candidates for professional schools such as Physical Therapy School. Students can also prepare for immediate employment in clinical fields to include areas like cardiac and pulmonary rehabilitation, pharmaceutical sales and medical equipment sales and service. In addition, students also train for jobs as personal trainers or corporate/private fitness specialists. This track also enables students to continue their education in the fields such as clinical exercise physiology, sport physiology and nutrition.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

1. Must make a grade of C or better.
2. Must be taken at Texas A&M University.
3. Course selection should meet the International and Cultural Diversity (p. 47) (ICD) and/or Cultural Discourse (p. 46) (CD) graduation requirement, if needed.
4. Must meet Core Curriculum requirements.
5. To be chosen in consultation with your academic advisor from: BICH 410, BICH 411, BICH 412, BIOL 206, BIOL 213, BIOL 351, BIOL 405, BIOL 434, NRSC 434, BIOL 454, CHEM 227, CHEM 228, CHEM 237, CHEM 238; COMM 370; GENE 301, GENE 312, GENE 320/BIMS 320, GENE 310; HLTH 231, HLTH 335, HLTH 353, HLTH 354; KINE 285, KINE 305, KINE 485, KINE 491; NFSC 202, NFSC 203, NFSC 300-499 (p. 1090); PHIL 111, PHIL 251, PHIL 480; PSYC 300-499 (p. 1125); VTPB 409, VTPP 425; KINE 240/HLTH 240 or ISTM 209 or ISTM 210; PSYC 304 or SPMT 304; SOCI 205; STAT 302 or STAT 303.
6. Must take Majors Aerobic Movement and Majors Res/Flex.
7. Participation in band or athletics cannot be used for KINE 199 credit. KINE 199 activities cannot be repeated for credit and must be taken for a grade.

**Kinesiology - BS, Exercise Science Track, Basic Exercise Physiology Concentration**

The Bachelor of Science degree in Kinesiology offers several tracks designed to prepare students for a variety of careers. Basic Exercise Physiology provides a background in the physical and biological sciences required for additional graduate study in Exercise Physiology or entry into medical or dental professional school. Students pursuing medical or dental school use professional directed elective hours to meet professional school entrance requirements. Students planning to pursue a graduate degree in Exercise Physiology may enroll in independent study leading to an undergraduate research project.

**Program Requirements**

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

### Program Requirements

The Bachelor of Science degree in Kinesiology offers several tracks designed to prepare students for a variety of careers. Motor Behavior prepares students to enter physical or occupational therapy, or other related professional schools. The course of study is designed to provide students a broad background with special emphasis on both the physiology and psychology of human movement. Professional directed electives allow students to obtain the prerequisites unique to the professional school of choice. This program also provides the background for students that wish to go to graduate school in motor neuroscience. These students, with the permission of the laboratory director, may enroll in independent study leading to an undergraduate research project in motor behavior (motor development, motor learning, or motor control).

Kinesiology - 5-Year Bachelor of Science/Master of Science

The combined degree program (3+2) allows undergraduate Kinesiology students to enter the Master of Science in Athletic Training program the beginning of their fourth year at Texas A&M University and earn a Bachelor of Science in Kinesiology and a Master of Science in Athletic Training (MSAT) degree in five years.

Students will follow departmental requirements for admission into the professional phase of the BS in Kinesiology. Kinesiology majors who have at least a 3.25 GPA by the end of fall semester of their junior year and who will have completed all of their prescribed courses by the spring of their junior year will be eligible to apply for the five-year program.

Applicants to the five-year program will submit the same materials (including GRE scores) as other MSAT applicants by the spring deadline of their junior year, and those who meet all minimum requirements, including having earned a B or better in ATTR 201, ATTR 202, ATTR 301, ATTR 302, will receive placement in the MSAT program. The admissions criteria for the five-year program will be the same as for other MSAT students.
Students continuing into the 4th year of the 3+2 combined program must finish the entire 156 hours to obtain both the Bachelor's and Master's degrees. Students will be conferred with two degrees once they complete the 5th year of the concurrent program.

Students in the 3+2 combined program will be required to complete the same two-year, 60 hour curriculum as other students admitted to the MSAT program. Students will take 96 hours of undergraduate courses, and 60 hours of graduate course work, of which 24 hours will be applied to the undergraduate degree. Students are required to maintain a 3.25 GPA through the first 24 hours of graduate course work at which time the student must maintain a 3.0 GPA. Students continuing in the 3+2 program will change from U4 to G7 status when they complete 96 hours.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the program. The undergraduate portion of the plan is a suggested plan and should be followed closely. There may be some modifications in course order that can occur but students should consult with the departmental academic advisor for the combined degree program before changes are made in order to ensure they are meeting all requirements.

Course selection should meet the core curriculum requirements.

Activities should be chosen in consultation with your advisor.

Participation in band or athletics cannot be used for credit and must be taken for a grade.

Course must meet core curriculum requirements.

Course selection should meet the International and Cultural Diversity requirement (p. 47) and/or Cultural Discourse requirement (p. 46).

Meets core curriculum writing requirement.

Students may elect to take PHYS or CHEM courses during the Summer semester between freshman and sophomore year to reduce the Fall load.

The program includes a total of 180 hours which up to 24 hours may be applied toward both the Bachelor of Science in Kinesiology and the Master of Science in Athletic Training.

**Sport Management - BS**

The Bachelor of Science degree in Sport Management is designed to prepare students for careers as administrators and managers in athletic, health, and country club industries, as well as entry-level management positions in college and professional athletic organizations. Through this program, students are prepared for diverse roles in the areas of sport marketing and promotions, facility management and planning, activity programming, and event management. The curriculum stays in tune with the sport industry to ensure graduating students are competitive in the field. Students complete their degree plan with a culminating experience that consists of four (4) options: (1) internship, (2) capstone project, (3) foreign program project, and (4) undergraduate research project. The internship, following coursework, provides students with on-the-job experience and networking opportunities. The capstone project is a multifaceted assignment that serves as a culminating academic and intellectual experience for students. The foreign program project is a unique blend of academic programming which provides students with global experience. The undergraduate research option provides an opportunity for students to develop and investigate their own research project under the guidance of SPMT faculty. The degree plan allows freedom for students to obtain a minor from a list of approved minors (i.e., business, journalism, speech communications, etc.).

1. Must make a grade of C or better.
2. Must be taken at Texas A&M University.
3. Must make a grade of B or better.
4. Activities should be chosen in consultation with your advisor.
   Participation in band or athletics cannot be used for KINE 199 credit.
   KINE 199 activities cannot be repeated for credit and must be taken for a grade.
5. Course must meet core curriculum requirements.
6. Course selection should meet the International and Cultural Diversity requirement (p. 47) and/or Cultural Discourse requirement if needed.
7. Meets core curriculum writing requirement.
8. Must be taken S/U.
9. Course will count in undergraduate and graduate program.
The Bachelor of Science degree in Sport Management Internship Track is designed to prepare students for careers as administrators and managers in athletic, health and country clubs, as well as entry-level management positions in college and professional athletic organizations. Through this program, students are prepared for a diversity of roles in the areas of sport marketing and promotions, facility management and planning, activity programming and events management. Students electing this track are required to complete a twelve (12) credit internship. The internship, following coursework, provides students with on-the-job experience and networking opportunities. Students in this track may choose courses to fulfill a minor in approved departments. Please contact your advisor for a list of approved minors.

**Program Requirements**

Students who meet the University and college entrance requirements enter the Sport Management major as lower-level (EDSM) majors. Students are encouraged to complete the freshman, sophomore, and junior sequences of courses as listed under Curriculum in Sport Management. Enrollment of Sport Management students in senior-level courses is limited to those who have been admitted to upper-level (also referred to as upper division).

1. Must make a grade of C or better
2. Course selection can meet International and Cultural Diversity (p. 47) and/or Cultural Discourse (p. 46) graduation requirement.
3. Must meet Core Curriculum requirements.
4. To be chosen in consultation with academic advisor. For SPMT-Internship students, choose from the following: Any 100-499 course associated with chosen required minor. For SPMT-Internship students, Minor Business is required. Courses must be selected from the following: ACCT 209 or ACCT 229; ISTM 209; MGMT 209 or MGMT 211; MGMT 309; MKTG 409; FINC 409; STAT 201.
5. SPMT-Internship students must take ISTM 209.
6. Choose from any of the following: Any SPMT 200-499 (p. 1151) course (except SPMT 217, SPMT 225, SPMT 304, SPMT 319/ SOCI 319, SPMT 333, SPMT 421, SPMT 422, SPMT 423, SPMT 402, SPMT 482, SPMT 484); ACCT 210; ALED 340, ALED 341; COMM 205, COMM 210, COMM 315, COMM 320, COMM 340; ECON 203; EHRD 408; FINC 201; MGMT 105, MGMT 212; MKTG 402/IBUS 402; PSYC 107; RPTS 300, RPTS 302; RPTS 311, RPTS 340, RPTS 426; WGST 430/MGMT 430.
7. May choose any SPMT 200-499 (p. 1151) course (except SPMT 217, SPMT 225, SPMT 304, SPMT 319/SOCI 319, SPMT 333, SPMT 421, SPMT 422, SPMT 423, SPMT 482, SPMT 402, SPMT 484).
8. To be chosen in consultation with academic advisor but may be any 100-499 course.
9. Course meets University writing requirement.
Sport Management - BS, Non-internship Track

The Bachelor of Science degree in Sport Management Non-internship Track is designed to prepare students for careers as administrators and managers in athletic, health and country clubs, as well as entry-level management positions in college and professional athletic organizations. Through this program, students are prepared for a diversity of roles in the areas of sport marketing and promotions, facility management and planning, activity programming and events management. The non-internship track allows students to study sport management from a specific perspective with the goal of continued educational experiences in graduate or professional school, obtaining a post-baccalaureate internship or securing an entry-level position in a sport organization. Students in the non-internship track must complete a minor from a list of approved minors (i.e., business, journalism, speech communications, etc.). The non-internship track allows for students to have academic flexibility with additional course work while not having the responsibility of completing an internship.

Program Requirements

Students who meet the University and college entrance requirements enter the Sport Management major as lower-level (EDSM) majors. Students are encouraged to complete the freshman, sophomore, and junior sequences of courses as listed under Curriculum in Sport Management. Enrollment of Sport Management students in senior-level courses is limited to those who have been admitted to upper-level (also referred to as upper division).

### University Studies - BS, Dance Concentration

The dance concentration curriculum leads to a Bachelor of Science in University Studies. It is designed to serve students who are in good academic standing with the University (2.0+ GPA) and are specifically seeking an interdisciplinary degree plan which provides preparation in dance history and production. Students complete courses in the foundations of dance, dance production, and dance composition, and technique courses in various forms of dance. Students choose two minors to complement the dance concentration. This concentration is housed in the Division of Kinesiology within the Department of Health and Kinesiology.

### Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

Coaching - Minor

This minor is designed for students who are pursuing a teaching career and are also interested in coaching. It is also useful to those who plan to work with youth in sports leagues. Admission to this minor is by application only and requires completion of BIOL 111. Consult with an advisor in the Department of Health and Kinesiology for admission requirements and application. Students should allow a minimum of three semesters to complete this minor.

KINE 355 Coaching of Track

Total Semester Credit Hours 18

Meets Core Curriculum Creative Arts requirement.

Some electives should be selected to meet the International and Cultural Diversity (http://catalog.tamu.edu/undergraduate/education-human-development/health-kinesiology/dance-university-studies-bs%20/undergraduate/general-information/degree-information/international-cultural-diversity-requirements/) and/or Cultural Discourse (p. 46) graduation requirement.

Must meet Core Curriculum requirements.

Must make a grade of B or better.

Must be 300 or 400 level course in order to meet university residency requirement.

Two university approved minors are required for this degree program. One of the two minors must be completed in a college outside of the college that provides the concentration for the student’s degree. See advisor for assistance.

Must be a specific activity. See advisor for required activity.

Must be taken at Texas A&M University.

Meets university writing requirement.
**Dance - Minor**

Admission to the Dance minor requires an audition. Refer to the Dance Program (http://tamudance.tamu.edu/) website for information on auditions.

A minor in dance can lead to numerous opportunities within the field of dance performance and education. Students can obtain the necessary tools to teach and choreograph in private studios or with dance/drill teams, or to utilize their minor studies to pursue degrees in dance. Dance is considered to be an important part of the visual and performing arts educational experience. Studies of dance performance, education, and history can enhance a student's academic experience.

Dance minor students are part of the Dance Program (http://tamudance.tamu.edu/), and have the opportunity to participate in events throughout the year.

**Performance**

Performance opportunities include: an annual dance concert (Perpetual Motion), Senior Concerts, informal performances, student organization concerts, performances throughout the community and on campus and state, regional, and national/international gala performances. Dance faculty often receive grants for other performances throughout the university in collaboration with faculty from other colleges. Students are also given the opportunity to attend various festivals and conferences.

The Dance Program also offers students the capability to work with guest artists (http://dance.tamu.edu/people/guest-artists/) in master classes, watching performances and learning repertory. This not only gives students an unique opportunity to build their resumes, but to work with a variety of professionals in the field.

1 Must take Dance Improvisation or Pilates Mat.

**Health - Minor**

The health minor is designed for students who want to develop knowledge in health-related topics and engage in courses which complement or enhance the myriad of degree programs available at Texas A&M University. The majority of the courses for this minor are available online. Two courses in the health minor meet the International and Cultural Diversity requirements for core curriculum and one course meets the Cultural Discourse requirement.

1 Course meets International and Cultural Diversity and/or Cultural Discourse graduation requirements

Students admitted to the Health Minor must have a minimum GPA of 2.0. All courses in the Health Minor must be completed with a grade of C or better.

**Sport Management - Minor**

The Sport Management Minor provides a foundational understanding of the multifarious sport industry from the perspectives of management, marketing, and other business principles. The minor provides an introductory understanding of the broadly defined sport management discipline and potential careers that can be leveraged in the sport industry.

Students must make a grade of ‘C’ or better in all courses.
Department of Teaching, Learning and Culture

The Department of Teaching, Learning and Culture is responsible for undergraduate programs that lead to certification at the early childhood/elementary, middle and secondary levels. Note these exceptions:

1. students interested in teaching either health or physical education must major in the Department of Health and Kinesiology;
2. students interested in teaching agricultural science must major in the Department of Agricultural Education;
3. students interested in secondary certification can be certified through the secondary graduate certification program, the secondary accelerate certification program, the University Studies program or the Aggie Teach program.

Early Childhood/Elementary or Middle Grades Certification

Baccalaureate Degree Programs. Most students interested in early childhood/elementary (PreK-6) or middle school (4–8) certification pursue a program leading to the Bachelor of Science degree (BS) with a major in interdisciplinary studies (INST). The INST degree certification programs prepare students for the many diverse instructional roles assumed by public school teachers. A minimum of 123 credit hours is required for the INST degree. Within this program, students may focus on:

1. early childhood (PreK–grade 6);
2. middle school (grades 4–8 math and science); and
3. middle school (grades 4–8 English language arts and social studies).

For complete information, see an advisor in the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising in Harrington Tower (EDCT 111).

There is another baccalaureate middle grades certification program available for students majoring in English. For information about this program, see an advisor in the Department of English, College of Liberal Arts.

Eligibility. Students must meet the requirements for a bachelor’s degree in the college and the department in which they are majoring. Further, they must meet specific admission and performance standards established by the Department of Teaching, Learning and Culture as well as requirements for professional education and certification established by the State of Texas. These requirements include admission to teacher education, admission to student teaching and qualification for initial certification. It is the responsibility of the student to contact the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising for specific information pertaining to program changes.

Please see an advisor in the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising for current information.

Requirements for Admission to Teaching Education

Early Childhood/Elementary and Middle Grades Education Program

1. Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.
2. Completion of a minimum 42 hours of pre-professional coursework from degree program (includes University Core Curriculum courses).
3. Completion of a minimum of 32 hours of University Core Curriculum courses with no grade lower than a C.
4. Completion of TEFB 273 or INST 210 with a grade of B or higher (equivalent courses from a community college may be substituted).
5. Completion of English Proficiency grade requirement by earning a B/C grade combination in ENGL 103 or ENGL 104 and one of the following courses: ENGL 203 or ENGL 210.
6. A GPR of 2.75 on all coursework on a degree plan with no grade lower than a C.
7. Transcripts for all institutions of higher education on file in the Texas A&M University Office of the Registrar.
8. Approved and signed degree plan on file in the Advising Office of the Department of Teaching, Learning and Culture.

These requirements must be seen as minimum standards only. Successful fulfillment of all of the above requirements does not guarantee admission to the program. Admission also depends upon the number of places available and the number of applications received each year. If more qualified students apply than the available number of spaces, admission may be based on selection factors at the time of application, such as GPA in pre-professional courses, number of hours needed to complete the program, and enrollment in prerequisite courses.

Graduate Certification Program

Four routes leading to initial teacher certification at the secondary level are available. These include the Aggie Teach program, the University Studies program, the graduate certification program and Accelerate (an alternative certification program). Complete information is available from the TLAC advising office in Heaton Hall.

Requirements for Admission to Clinical Teaching

1. Complete a student teaching application by the given deadlines and complete all coursework prior to senior methods. Students must see their advisors for deadlines.
2. Admission to teacher education.
3. Completion of all courses listed on the degree plan. All Education/Interdisciplinary Studies and professional courses with a grade of C or better.
4. All certification coursework must be completed. Each emphasis/teaching field must have a grade of C or better in each course with a minimum GPR of 2.75 in teacher emphasis/teaching field.
5. ENGL 203 or ENGL 210 must be completed with a grade of C or better.
6. A minimum of 2.75 on all coursework completed at Texas A&M.
7. A minimum of 2.75 on all coursework that applies to the degree plan, taken at Texas A&M.
8. A minimum of 2.75 on all coursework that applies to the emphasis/teaching field, taken at Texas A&M.

**Majors**

- Bachelor of Science in Interdisciplinary Studies, English Language Arts/Social Studies, Middle Grades Certification (p. 349)
- Bachelor of Science in Interdisciplinary Studies, Math/Science, Middle Grades Certification (p. 350)
- Bachelor of Science in Interdisciplinary Studies, Pre-K-6, Generalist Certification (p. 351)

**Certification**

- Secondary Graduate Certification Program (p. 352)

**Minors**

- Applied Learning-Science, Technology, Engineering and Mathematics (STEM) Minor (p. 353)

**Interdisciplinary Studies, BS, English Language Arts/Social Studies, Middle Grades Certification**

The Department of Teaching, Learning and Culture (TLAC) offers a Bachelor of Science (B.S.) in Education. Completion of this program leads to teaching certification in reading/language arts and social studies for grades 4-8 and English as a second language within the constraints of the Texas Education Agency. Students interested in becoming a 4-8 grade reading/language arts and social studies teacher should contact a TLAC undergraduate advisor in Harrington Tower.

Programs in the Department of Teaching, Learning and Culture are based upon new State of Texas standards. You must consult with an advisor in the Department of Teaching, Learning and Culture (Heaton Hall) prior to enrolling in coursework each semester or term.

Interdisciplinary Studies, BS, Math/Science, Middle Grades Certification

The Department of Teaching, Learning and Culture (TLAC) offers a Bachelor of Science (B.S.) in Education. Completion of this program leads to teaching certification in math and science for grades 4-8 and English as a second language within the constraints of the Texas Education Agency. Students interested in becoming a 4-8 grade math and science teacher should contact a TLAC undergraduate advisor in Harrington Tower.

Programs in the Department of Teaching, Learning and Culture are based upon new State of Texas standards. You must consult with an advisor in the Department of Teaching, Learning and Culture (Heaton Hall) prior to enrolling in coursework each semester or term.

Interdisciplinary Studies - BS, Pre-K-6, Generalist Certification

The Department of Teaching, Learning and Culture (TLAC) offers a Bachelor of Science (B.S.) in Education. Completion of this program leads to teaching certification in grades PreK-6 general education and English as a second language within the constraints of the Texas Education Agency. Students interested in becoming a PreK-6 grade teacher should contact a TLAC undergraduate advisor in Harrington Tower.

Programs in the Department of Teaching, Learning and Culture are based upon new State of Texas standards. Students should check with the advisors in the appropriate departments to receive the most current programs, policies and procedures.

KINE 120 is recommended.

Must make a grade of C or better in each course.
### Secondary Graduate Certification Program

#### Secondary Graduate Certification Program

This program is designed for those candidates who have completed the baccalaureate degree and desire initial certification at the secondary level. Candidates are admitted upon recommendation of departmental advisors and progress through summer, fall and spring as a cohort. The certification program requires completion of 21 graduate semester credit hours and the successful completion of appropriate State examinations. A full public school year internship and the opportunity to apply all coursework toward the Master of Education degree are unique features of this program. The candidate may, upon approval by the department and a cooperating school district, serve as an intern in a full-time salaried teacher of record position, in a part-time salaried teaching position, or as a paid substitute teacher. All candidates will serve a full public school year internship whether in a salaried or non-salaried position.

#### Prerequisites

Completion of the following prior to the first summer session:

1. Baccalaureate degree from an accredited institution with a GPA of 2.75.
2. Code Title Semester Credit Hours
   
   | Nine (9) semester credit hours | 9 |
   | INST 210 Understanding Special Populations | |
   | TEFB 322 Teaching and Schooling in Modern Society | |
   | TEFB 324 Teaching Skills II | |
3. Coursework for one teaching field as approved by the teaching field advisor.
4. Pass the appropriate content area TExES exam.

#### Course of Study for Secondary Certification at the Post-Baccalaureate Level

Enrollment in the following courses is limited to candidates pursuing initial secondary certification in the post-baccalaureate program.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDCI 611</td>
<td>Teaching English as a Second Language</td>

</tr>
<tr>
<td>TEED 649</td>
<td>Instructional Strategies in Academic Specialties in Middle and Senior HS: Principles &amp; Applications</td>
<td>3</td>
</tr>
</tbody>
</table>

1. KINE 120 is recommended

Must make a grade of C or better in each course
competency in speech and technology, and passing scores on all State-required examinations, candidates will be recommended for certification.

NOTE: To complete the Master of Education degree, candidates will enroll in Teaching, Learning and Culture foundation courses and courses in their teaching field(s) as approved by their graduate advisory committee. The department also offers a "certification only" option for secondary certification. Contact the TLAC office for information about the accelerate option.

Secondary Certification Through Accelerate Online Program

This program is designed for those candidates who have completed the baccalaureate degree and desire initial certification at the secondary level. The program is designed to provide college graduates with a program of teacher preparation that can be completed in 12-18 months. The Accelerate Online program provides an individual with the flexibility of completing teacher certification through online instructional modules followed by a year-long paid internship in a secondary public school in Texas. Other information and additional program requirements can be obtained from Jane Rankin at janerankin@tamu.edu or (979) 862-1928.

Secondary Certification Through the Aggie Teach Program

Contact the Aggie Teach advisor in the office of the Associate Dean, College of Science.

Secondary Certification Through the University Studies Program

Contact the graduate TLAC advisors in Harrington Tower.

Applied Learning in Science, Technology, Engineering and Mathematics (STEM) Minor

The Department of Teaching, Learning and Culture (TLAC) offers a minor in Secondary Education to students with non-education majors. The minor requires 18 semester credit hours of education coursework, and 6 hours of clinical practice in the field, for students seeking teaching certification for middle and high school subject areas. Students must declare a major in a subject area for which teacher certification options are available in order to be eligible for this minor. Students interested in obtaining a minor in Secondary Education should contact a TLAC undergraduate advisor in Harrington Tower.

To meet Teacher Certification requirements, student must also successfully complete an approved internship or clinical teaching(MEFB 497-6 hours). A 2.5 GPA is required in minor courses to pursue teacher certification and a 2.75 cumulative GPR to be admitted to Teacher Education

University Studies - BS, Dance Concentration

The dance concentration curriculum leads to a Bachelor of Science in University Studies. It is designed to serve students who are in good academic standing with the University (2.0+ GPA) and are specifically seeking an interdisciplinary degree plan which provides preparation in dance history and production. Students complete courses in the foundations of dance, dance production, and dance composition, and technique courses in various forms of dance. Students choose two
Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

1. Meets Core Curriculum Creative Arts requirement.
2. Some electives should be selected to meet the International and Cultural Diversity [requirements](http://catalog.tamu.edu/undergraduate/education-human-development/health-kinesiology/dance-university-studies-bs/undergraduate/general-information/degree-information/international-cultural-diversity-requirements/) and/or Cultural Discourse (p. 46) graduation requirement.
3. Must meet Core Curriculum requirements.
4. Must make a grade of B or better.
5. Must be 300 or 400 level course in order to meet university residency requirement.
6. Two university approved minors are required for this degree program. One of the two minors must be completed in a college outside of the college that provides the concentration for the student's degree. See advisor for assistance.
7. Must be a specific activity. See advisor for required activity.
8. Must be taken at Texas A&M University.
The mission of the College of Engineering is to serve Texas, the nation, and the global community by providing engineering graduates who are well founded in engineering fundamentals, instilled with the highest standards of professional and ethical behavior, and prepared to meet the complex technical challenges of society.

To achieve this mission the College of Engineering is committed to:

- ensuring an academic environment conducive to our faculties achieving the highest levels of academic and research excellence;
- building upon our traditional partnerships with industry, engineering practitioners and former students, to enhance our impact on the profession of engineering;
- encouraging excellence, innovation and cross-disciplinary initiatives in education and research;
- providing national and international leadership in undergraduate and graduate engineering education;
- becoming the engineering college of choice for the increasingly diverse citizenry of the state; and
- encouraging and supporting opportunities for our students to grow beyond their chosen disciplines by participation in ethics courses, leadership programs, study-abroad programs and research.

A student engineer can pursue any one of several degree plans, according to personal ambitions, interests and abilities. The student may choose the traditional BS degree and consider advanced research-oriented graduate programs leading to the MS and PhD degrees. Alternatively, at the graduate level, the student may select the Master of Engineering or the Doctor of Engineering program which are directed toward professional engineering.

Within the College of Engineering, the undergraduate programs in aerospace, biological and agricultural, biomedical, chemical, civil, computer, electrical, industrial, mechanical, nuclear, ocean, and petroleum engineering are accredited by the Engineering Accreditation Commission of ABET, www.abet.org. The electronic systems engineering technology program, and manufacturing and mechanical engineering technology program are accredited by the Engineering Technology Accreditation Commission of ABET, www.abet.org. The Computer Science program is accredited by the Computing Accreditation Commission of ABET, www.abet.org.

Entrance and Enrollment Requirements

The minimum requirements for entrance to the University are listed in the earlier pages of this catalog. Because of the importance of science and mathematics to engineering, high school students who aspire to pursue a career in engineering are encouraged to take as many of these courses as possible. In particular, high school preparation should include four years of mathematics and four years of science emphasizing algebra, geometry, trigonometry, calculus, chemistry, physics and biology.

A critical step in an engineering education is proper individual placement in the first courses undertaken. The College of Engineering strongly recommends the following guidelines to students participating in the math advanced placement examinations in high school. Incoming engineering students can earn advanced placement (AP) credits for MATH 151 with a score of 4 on the Calculus AB exam or 3 on the BC exam, and for MATH 152. The Computer Science program is accredited by the Computing Accreditation Commission of ABET, www.abet.org.
exam are recommended to begin in MATH 151 or MATH 152. These conservative recommendations help ensure students have thoroughly mastered the content that is fundamental to the engineering curriculum. Students should discuss their choice with their assigned undergraduate academic advisor before registering for mathematics classes. New Student Conferences and associated Credit by Examination tests provide information to advisors so that students begin at a level which may differ from the printed curriculum, but is appropriate to their aptitudes and background. All freshmen admitted into engineering are required to complete the Math Placement Exam (MPE) at the New Student Conferences and should review algebra, trigonometry and geometry prior to taking the MPE.

Because of the importance of computing in the disciplines housed within the College of Engineering, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program, effective Fall 2014. Details about the personal computer needed to meet the requirement can be found on our website. No student will be denied admission to Texas A&M University based on an inability to purchase a computer.

Freshmen in General Engineering (https://engineering.tamu.edu/admissions-and-aid/incoming-students/), Engineering at Galveston (https://engineering.tamu.edu/academics/engineering-at-galveston/), Engineering at McAllen (https://engineering.tamu.edu/admissions-and-aid/engineering-at-mcallen/), or Engineering Academy programs (https://engineering.tamu.edu/academies/) have a common first year engineering curriculum to allow time for students to learn about the various engineering degree granting majors. It is recognized that in most cases students are not made aware of all our engineering majors prior to joining Texas A&M. Students are introduced to the different engineering majors in the first year engineering courses, ENGR 102, ENGR 216/PHYS 216 and ENGR 217/PHYS 217. Students are encouraged to leverage additional resources, including the career center, faculty, and advisors to get even more information. Students must complete the following courses in at least two semesters before applying to an engineering major: two engineering courses, two math courses, and two science courses in the first year engineering curriculum. Exceptions will be made as needed for students entering with credit for the required courses. The entry-to-a-major process (https://engineering.tamu.edu/academics/undergraduate/entry-to-a-major/) is designed for students to take ownership of their future by identifying at least three majors that are a good match for their career goals and academic performance. The entry-to-a-major process (https://engineering.tamu.edu/academics/undergraduate/entry-to-a-major/) is designed to place students in the highest rank major possible based upon capacity and student performance. Students are encouraged to be in a major as early as possible. Students in the General Engineering (https://engineering.tamu.edu/admissions-and-aid/incoming-students/), Engineering at Galveston (https://engineering.tamu.edu/academics/engineering-at-galveston/), Engineering at McAllen (https://engineering.tamu.edu/admissions-and-aid/engineering-at-mcallen/) and the Engineering Academy programs (https://engineering.tamu.edu/academies/) must be in a major by the end of the fourth semester in engineering. Transfer students are admitted directly to a major degree granting program through the admissions process.

**Freshman Curriculum**

The freshman year is identical for all majors in the College of Engineering. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care and in consultation with an academic advisor to ensure that prerequisites for all courses are met.

**Bring Your Own Device (BYOD)** (https://engineering.tamu.edu/easa/areas/academics/byod/)

Just as students are required to have specific textbooks and supplies in order to gain the highest quality engineering educational experience, the College of Engineering requires students to purchase a computer to complement the course instruction. The vast majority of the students entering the College already bring some form of desktop or laptop computer with them when they begin school. Unfortunately, the variation in the types of computers makes it next to impossible for instructors to routinely ask students to use their own computers in the classroom. A computer designated by the College and purchased by entering students will provide students the convenience to explore course content anytime, anywhere.

While there are many computers available, the College can only guarantee performance and provide support for the specific computers identified by the College of Engineering. These computers will accommodate most of the needs of an engineering student throughout a four-year degree plan, balancing performance, cost and expected life of the computer. The computers have been negotiated with the various vendors, which are external to Texas A&M University, at a price point that is lower than what an individual would likely be able to negotiate. The price for each computer includes up to a four-year warranty.

**ENGR**

ENGR is a college-wide, zero-credit-hour required program that is composed of approved engineering-centric activities that meet the criteria of high-impact learning experiences. Undergraduate students can use their participation in one of these activities to satisfy in part their ENGR requirement. Full satisfaction of the ENGR requirement includes participating in an engineering-centric activity and submitting a meaningful, self-reflection that discusses the impact and overall experience on the student’s education.

Each department in the College of Engineering identifies the activities it will accept in satisfying a student’s ENGR requirement. Some activities may include the following:

- Education Abroad (https://abroad.tamu.edu/)
- Internship or Co-op Experience (http://careercenter.tamu.edu/current-students/)
- Grand Challenge Scholars Program (https://engineering.tamu.edu/student-life/gcsp/)
- The University, College, or Departmental Honors Program (http://honorsprograms.tamu.edu/)
- Aggies Invent (https://engineering.tamu.edu/student-life/aggies-invent/)
- AggieE_Challenge (https://engineering.tamu.edu/academics/undergraduate/aggie-challenge/)
- Startup Aggieland (https://mays.tamu.edu/mcferrin-center-for-entrepreneurship/startup-aggieland/)
- Undergraduate research (https://engineering.tamu.edu/academics/undergraduate/undergraduate-bridges.html)
• TAMU Minor or Certificate Programs, like the Zachry Leadership Program (https://engineering.tamu.edu/student-life/zachry-leadership-program/) or Engineering Honors Program (https://engineering.tamu.edu/academics/eh/)
• Department design competitions, like the High Altitude Balloon Club (https://astrocenter.tamu.edu/stem-outreach/high-altitude-balloon-club/)
• Leadership in student organizations (https://engineering.tamu.edu/student-life/student-orgs.html)

Financial Aid
For financial aid recipients, purchase of the computer device can be considered in the cost of attendance. To request this, please complete the Request to Change Cost of Attendance form (http://financialaid.tamu.edu/Forms/) for Scholarships & Financial Aid. Submission of documentation does not guarantee additional aid will be awarded. In certain situations, students may not be eligible for additional funding.

Undergraduate students entering the College are required to follow the BYOD policy of purchasing one of the configured devices designated by the College. No student will be denied admission to Texas A&M University based on an inability to purchase a computer.

For more information, including specific requirements, visit the Bring Your Own Device (BYOD) web page (http://engineering.tamu.edu/easa/areas/academics/byod/).

College Prerequisite Policy
The following prerequisite policy applies to any student in a College of Engineering undergraduate degree program and to any student who seeks admission to an undergraduate degree program in the College of Engineering. This policy is in addition to prerequisite policies imposed by the University (Texas A&M University Student Rules). For complete details concerning this policy, students should contact their Undergraduate Advising Office.

Students must earn a grade of C or better in all courses identified in each College of Engineering undergraduate degree program and any prerequisites for these courses. If a student earns a grade of D or F in any of these courses, the student is required to repeat the course before enrolling in a more advanced course that has the D/F course as a prerequisite. A student may attempt a course no more than three times, including courses graded Q or W but excluding those graded NG, unless approval has been received from their department. A student must complete all prerequisites for a course with a grade of C or better by the start of the semester in which the student plans to enroll in the course.

A student is responsible for checking the prerequisites for each course to ensure the prerequisite requirements have been satisfied. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. A student who is told to drop a course and is still enrolled by the deadline set each semester may be administratively dropped by their department. If a student is administratively dropped from a course, the student is responsible for all financial obligations associated with the drop. An administrative drop may adversely impact (including, but not limited to): health insurance benefits, financial aid, athletic eligibility, INS status, veterans’ benefits, and eligibility to participate in extracurricular activities.

Other Requirements
All required coursework must be taken for a grade to satisfy requirements for a degree in the College of Engineering. Courses cannot be taken on a satisfactory/unsatisfactory basis to satisfy this requirement.

Fast Track Program (https://engineering.tamu.edu/academics/fasttrack/)
This program allows students to begin making progress toward a master’s degree while completing the undergraduate program. Each participating department in the College of Engineering has streamlined its program for Fast Track participants by substituting specific graduate courses for selected undergraduate offerings. Academically qualified students take these 600-level courses during their senior year, earning graduate credit while fulfilling undergraduate requirements through “credit by exam.” The individual department sets its own grade and exam requirements for earning dual credit. The department also establishes the maximum number of credit hours allowed for acceleration, usually five to seven.

Industry-University Cooperative Education
Cooperative education is a study-work plan of education in which a student alternates periods of attendance in college or university with periods of employment in industry related to his or her major. Students who choose this degree plan must complete at least 12 months of experience in order to receive the cooperative education certificate. The practice of engineering is an art which is learned through practice as well as in the classroom. The cooperative education program provides the education that can be achieved from practice by having the student work with professional engineers on the job. Consequently, the student who graduates with the cooperative education certificate has both the academic background and the practical experience to qualify him or her for more meaningful employment in the profession of engineering. The cooperative education work periods also provide an income for students that allows them to pay for their school expenses.

Those who wish additional information concerning this program should contact the Associate Director of Cooperative Education (rblock@tamu.edu).

Advanced Study
Students who rank in the upper half of their undergraduate class should give serious consideration to developing their full intellectual potential in engineering by continuing with advanced studies at the graduate level. Two routes are available for students. The traditional master of science and doctor of philosophy degrees should be considered by students who wish to go into research fields. For those students interested in the practice of professional engineering, the master of engineering and doctor of engineering degrees should be given serious consideration. The professional doctor of engineering degree was established in the fall of 1974 to fill a need for better-educated engineers in the practice of engineering. Students may enter this program at any time after they receive the bachelor’s degree in engineering by applying and being accepted to a departmental graduate program within the College of Engineering. Master's level degrees require a minimum of one year of course work after the bachelor's, and the doctoral degrees require a minimum of an additional two years of coursework. The doctor of
philosophy also requires a dissertation based on research by the student, and the doctor of engineering requires at least one year of internship experience in industry or government.

For more information concerning these programs, please refer to the Texas A&M University Graduate and Professional Catalog or contact the Office of the Dean of Engineering.

The engineering programs also provide a foundation for further education in the fields of medicine, law or business. An engineering background will prepare the individual to understand, contribute to and embrace technical advances in these fields. An early assurance program called Engineering to Medicine (E2M) (https://medicine.tamu.edu/admissions/early-assurance/) is available for outstanding Texas A&M University College of Engineering students who are interested in obtaining a medical degree with the Texas A&M College of Medicine, ultimately pursuing a career as a physician or physician scientist.

The Texas A&M Engineering Academies

The Texas A&M Engineering Academies are co-enrollment programs between the College of Engineering and select two-year institutions. Students in the Engineering Academy program are Texas A&M engineering students, who take math, science, and core courses from the two-year institution and engineering courses from the College of Engineering. Except for the Engineering Academy-Blinn Bryan, the admission process for the Engineering Academies is unique to each partner institution, with the offer of admission to the Engineering Academy made by Texas A&M University. Students enrolled in a Texas A&M Engineering Academy, who satisfy the program GPA requirements, may be considered for entry to a major as early as the end of the first year.

Eligible students receive financial aid based upon their combined credit hours from both institutions.

For more information, including specific requirements for each of the partner institutions, visit Texas A&M Engineering Academies Texas A&M Engineering Academies (https://engineering.tamu.edu/academies/).

Majors

College of Engineering

- Bachelor of Science in Architectural Engineering, Mechanical Systems for Buildings Track (p. 364)
- Bachelor of Science in Architectural Engineering, Structural Systems for Buildings Track (p. 366)
- Bachelor of Science in Biological and Agricultural Engineering (p. 367)
- Bachelor of Science in Interdisciplinary Engineering (p. 369)
- Bachelor of Science in Interdisciplinary Engineering and Master of Public Health in Occupational Safety and Health, 5-Year Degree Program (p. 373)
- Bachelor of Science in Interdisciplinary Engineering and Juris Doctor, 6-Year Degree Program (p. 371)

Department of Aerospace Engineering

- Bachelor of Science in Aerospace Engineering (p. 382)

Department of Biomedical Engineering

- Bachelor of Science in Biomedical Engineering (p. 386)

Artie McFerrin Department of Chemical Engineering

- Bachelor of Science in Chemical Engineering (p. 391)

Zachry Department of Civil and Environmental Engineering

- Bachelor of Science in Civil Engineering, Coastal and Ocean Engineering Track (p. 397)
- Bachelor of Science in Civil Engineering, Construction Engineering and Management Track (p. 399)
- Bachelor of Science in Civil Engineering, Environmental Engineering Track (p. 401)
- Bachelor of Science in Civil Engineering, General Civil Engineering Track (p. 404)
- Bachelor of Science in Civil Engineering, Geotechnical Engineering Track (p. 406)
- Bachelor of Science in Civil Engineering, Structural Engineering Track (p. 408)
- Bachelor of Science in Civil Engineering, Transportation Engineering Track (p. 410)
- Bachelor of Science in Civil Engineering, Water Resources Engineering Track (p. 412)
- Bachelor of Science in Environmental Engineering (p. 415)

Department of Computer Science and Engineering

- Bachelor of Arts in Computing (p. 423)
- Bachelor of Science in Computer Engineering, Computer Science Track (p. 419)
- Bachelor of Science in Computer Science (p. 421)

Department of Electrical and Computer Engineering

- Bachelor of Science in Computer Engineering, Electrical Engineering Track (p. 428)
- Bachelor of Science in Electrical Engineering (p. 430)

Department of Engineering Technology and Industrial Distribution

- Bachelor of Science in Electronic Systems Engineering Technology (p. 435)
- Bachelor of Science in Industrial Distribution (p. 437)
- Bachelor of Science in Manufacturing and Mechanical Engineering Technology (p. 439)
- Bachelor of Science in Multidisciplinary Engineering Technology, Electro Marine Engineering Technology Track (p. 440)
- Bachelor of Science in Multidisciplinary Engineering Technology, Mechatronics Track (p. 442)
Department of Industrial and Systems Engineering
- Bachelor of Science in Industrial Engineering (p. 449)
- Bachelor of Science in Industrial Engineering and Master of Public Health in Occupational Safety and Health, 5-Year Degree Program (p. 450)
- Bachelor of Science in Industrial Engineering and Master of Science in Finance, 5-Year Degree Program (p. 452)

Department of Materials Science and Engineering
- Bachelor of Science in Materials Science and Engineering (p. 459)

J. Mike Walker '66 Department of Mechanical Engineering
- Bachelor of Science in Mechanical Engineering (p. 466)

Department of Nuclear Engineering
- Bachelor of Science in Nuclear Engineering (p. 470)

Department of Ocean Engineering
- Bachelor of Science in Ocean Engineering (p. 474)

Harold Vance Department of Petroleum Engineering
- Bachelor of Science in Petroleum Engineering (p. 477)

Minors

College of Engineering
- Cybersecurity Minor (p. 374)
- Engineering Concepts Minor (p. 376)
- Engineering Project Management Minor (p. 376)

Department of Aerospace Engineering
- Aerospace Engineering Minor (p. 383)

Department of Biomedical Engineering
- Biomedical Engineering Minor (p. 388)

Artie McFerrin Department of Chemical Engineering
- Chemical Engineering Minor (p. 393)

Department of Computer Science and Engineering
- Computer Science Minor (p. 424)
- Game Design and Development Minor (p. 424)

Department of Electrical and Computer Engineering
- Electrical Engineering Minor (p. 431)

Department of Engineering Technology and Industrial Distribution
- Embedded Systems Integration Minor (p. 446)

Department of Industrial and Systems Engineering
- Industrial Engineering Minor (p. 454)

Department of Materials Science and Engineering
- Materials Science and Engineering Minor (p. 460)

J. Mike Walker '66 Department of Mechanical Engineering
- Analysis, Design and Management of Energy Conversion Systems Minor (p. 468)
- Control of Mechanical Systems Minor (p. 468)
- Design and Simulation of Mechanical Systems Minor (p. 468)

Department of Nuclear Engineering
- Nuclear Engineering Minor (p. 472)
- Radiological Health Engineering Minor (p. 472)

Harold Vance Department of Petroleum Engineering
- Petroleum Engineering Minor (p. 479)

Certificates
The College of Engineering has designed the following certificate programs to offer ambitious students the opportunity to go beyond the traditional curriculum and gain specific knowledge in a concentration area. Students are required to consult with their academic advisor prior to submitting an application for a certificate. Enrolling and being accepted into a certificate program does not guarantee registration into required courses. Each certificate will be recognized on the candidate's transcript. A coordinator reviews each student's coursework via a certificate worksheet and requirements met prior to certification. Certificate coordinators are given the discretion to determine the eligibility of students in other colleges and/or majors to pursue College of Engineering certificates. For specific information on each certificate available, visit the College of Engineering website.

College of Engineering
- Engineering Concept, Creation, and Commercialization Certificate (p. 377)
- Holistic Leadership in Engineering Certificate (p. 377)
- International Engineering Certificate (p. 377)
• Polymer Specialty Certificate (p. 378)
• Safety Engineering Certificate (p. 379)

**Department of Biomedical Engineering**
• Quality Engineering for Regulated Medical Technologies Certificate (p. 389)

**Department of Chemical Engineering**
• Engineering Therapeutics Manufacturing Certificate (p. 393)

**Department of Industrial and Systems Engineering**
• Data Center Operations Engineering Certificate (p. 454)
• Engineering Systems Management Certificate (p. 455)

**Department of Materials Science and Engineering**
• Corrosion Science and Engineering Certificate (p. 461)

**Harold Vance Department of Petroleum Engineering**
• Energy Engineering Certificate (p. 479)
• Petroleum Ventures Certificate (p. 479)

**Masters**

**College of Engineering**
• Master of Engineering in Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/interdepartmental-degree-programs/meng/)
• Master of Engineering in Systems Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/interdepartmental-degree-programs/systems-engineering-meng/)
• Master of Science in Interdisciplinary Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/interdepartmental-degree-programs/systems-engineering-meng/)
• Master of Science in Safety Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/interdepartmental-degree-programs/safety-engineering-meng/)

**Department of Aerospace Engineering**
• Master of Engineering in Aerospace Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/aerospace/meng/)
• Master of Science in Aerospace Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/aerospace/ms/)

**Department of Biomedical Engineering**
• Master of Engineering in Biomedical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/biomedical/meng/)

**Artie McFerrin Department of Chemical Engineering**
• Master of Engineering in Chemical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/chemical/meng/)
• Master of Science in Chemical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/chemical/ms/)

**Zachry Department of Civil and Environmental Engineering**
• Master of Engineering in Civil Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/civil-environmental/meng/)
• Master of Science in Civil Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/civil-environmental/ms/)

**Department of Computer Science and Engineering**
• Master of Computer Science in Computer Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/mcs/)
• Master of Engineering in Computer Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/engineering-meng/)
• Master of Science in Computer Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/engineering-ms/)
• Master of Science in Computer Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/ms/)

• Master of Engineering in Electrical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/electrical-computer/electrical-meng/)
• Master of Science in Computer Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/electrical-computer/computer-ms/)
• Master of Science in Electrical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/electrical-computer/electrical-ms/)
Department of Engineering Technology and Industrial Distribution

- Master of Engineering Technical Management in Technical Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/technology-industrial-distribution/metm/)
- Master of Industrial Distribution in Industrial Distribution (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/technology-industrial-distribution/mid/)
- Master of Science in Engineering Technology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/technology-industrial-distribution/ms-entc/)

Department of Industrial and Systems Engineering

- Master of Engineering in Industrial Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/industrial-systems/meng/)
- Master of Science in Engineering Systems Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/industrial-systems/engineering-systems-management/ms/)
- Master of Science in Industrial Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/industrial-systems/ms/)

J. Mike Walker ’66 Department of Mechanical Engineering

- Master of Engineering in Mechanical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/mechanical/meng/)
- Master of Science in Mechanical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/mechanical/ms/)

Department of Nuclear Engineering

- Master of Engineering in Nuclear Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/nuclear/meng/)
- Master of Science in Nuclear Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/nuclear/ms/)
Department of Electrical and Computer Engineering

- Doctor of Philosophy in Computer Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/phd/)
- Doctor of Philosophy in Electrical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/electrical-computer/electrical-phd/)

Department of Industrial and Systems Engineering

- Doctor of Philosophy in Industrial Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/industrial-systems/phd/)
- Doctor of Philosophy in Materials Science and Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/materials-science/phd/)

J. Mike Walker ‘66 Department of Mechanical Engineering

- Doctor of Philosophy in Mechanical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/mechanical/phd/)

Department of Nuclear Engineering

- Doctor of Philosophy in Nuclear Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/nuclear/phd/)

Department of Ocean Engineering

- Doctor of Philosophy in Ocean Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/ocean/ocean-phd/)

Harold Vance Department of Petroleum Engineering

- Doctor of Philosophy in Petroleum Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/petroleum/phd/)

Architectural Engineering - BS, Mechanical Systems for Buildings Track

The BS in Architectural Engineering degree prepares graduates for professional engineering careers within the architectural, engineering and construction industry. Specifically, it prepares them to become licensed professional engineers, achieve leadership positions in consulting firms, suppliers or government agencies, as well as successfully complete graduate studies in engineering or other areas. The Mechanical Building Systems Track to fulfill the BS in Architectural Engineering degree prepares students for careers with more emphasis on energy efficiency, HVAC (Heating, Ventilation, and Air-Conditioning), building environmental controls, and building environment. The focus electives prepare students to design and analyze mechanical systems for buildings.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

A grade of C or better is required.

Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.

BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

6 All students must take at least two courses in their major that are designated as writing intensive (W). AREN 175/COSC 175 and AREN 200 taken at Texas A&M University satisfy this requirement. Other AREN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

7 All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the AREN advising office.

8 Select from ARCH 328, ARCH 335, ARCH 421; COSC 253, COSC 325, COSC 326, COSC 443.

9 At least three (3) Technical electives must be engineering courses.

10 Select from MEEN 421, MEEN 436, MEEN 439, MEEN 463, MEEN 469, MEEN 477.
A grade of C or better is required in all science, mathematics, and engineering courses taken to satisfy degree requirements.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

**Total Program Hours 128**

**Architectural Engineering - BS, Structural Systems for Buildings Track**

The BS in Architectural Engineering degree prepares graduates for professional engineering careers within the architectural, engineering and construction industry. Specifically, it prepares graduates to become licensed professional engineers, achieve leadership positions in consulting firms, suppliers or government agencies, as well as successfully complete graduate studies in engineering or other areas. The Structural Building Systems Track to fulfill the BS in Architectural Engineering degree prepare students for careers with more emphasis on the structural design and safety of buildings. The focus electives prepare students to design and analyze structural systems for buildings.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is identical for degrees in aerospace engineering, chemical engineering, petroleum engineering, environmental engineering, and industrial engineering.

Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Biological and Agricultural Engineering - BS

Graduates from the Biological and Agricultural Engineering program will:

- Successfully enter the biological and agricultural engineering profession as practicing engineers and consultants in the natural resources, machine systems, food processing, bioprocessing, and agricultural production and processing fields.
- Pursue graduate education and research at major universities in biological and agricultural engineering, and related fields.
- Advance into leadership positions in their chosen fields and professional societies.
- Engage in life-long learning through professional registration and professional development.

Students learn to apply fundamental knowledge of biological and physical sciences, mathematics, and engineering principles to formulate and solve engineering problems. Engineering design is integrated throughout the curriculum, along with opportunities to develop communication, learning, and teamwork skills, culminating in a capstone design experience. Electives in the curriculum allow the student to focus in one of the following areas:

- **Environmental and Natural Resources Engineering**—design and management of systems affecting soil, water, and air resources.
- **Renewable Energy Engineering**—design and development of biomass, wind and solar energy systems.
- **Food and Bioprocess Engineering**—design and development of systems for processing and handling of food and agricultural products and processes involving cells, enzymes, or other biological components.
- **Machine Systems Engineering**—design and development of machines and machine systems for food, feed and fiber production and processing.
Students select courses with the assistance of faculty advisors in an individualized advising system. Faculty members also assist with professional development and job placement for students.

The biological and agricultural engineering program is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering, and the curriculum is fully accredited by the Engineering Accreditation Commission of ABET, Inc., www.abet.org. The department is one of the largest in North America and is consistently ranked as one of the top programs in the nation.

For graduates to become successful practicing biological and agricultural engineers, students need to acquire a set of skills, knowledge, and behaviors as they progress through the curriculum. We have established the following program outcomes outlining what students are expected to know and be able to do upon completion of the curriculum. At the time of graduation, students should have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The BS in ITDE is comprised of 70 credit hours of standard components and 58 credit hours of interdisciplinary specialization. The 70 standard credits include:

1. common first-year engineering courses
2. an English/communication course
3. a ‘foundations of interdisciplinary engineering’ course
4. two semesters of senior capstone design
5. three additional math courses beyond first-year courses (from an approved list)
6. an additional math/science elective course
7. university core curriculum courses

The 58 remaining credits of specialization may either be determined through a pre-approved program of study or through a student-led design with approval from the ITDE Advisory Committee.

Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor.

Before commencing course work in the major, students must be admitted to the major or have the approval of the degree program.

The BS in ITDE degree is offered at the College Station, Galveston, and McAllen campuses.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/ CHEM 117 and CHEM 120.

Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

**Interdisciplinary Engineering - BS**

Earning a Bachelor of Science (BS) degree in interdisciplinary engineering (ITDE) allows students to develop unique skill sets and specialize in areas that may not be provided in a traditional department degree program. Such specializations may be driven by emerging technical fields or by a student’s desire to have an immersive interdisciplinary experience. ITDE students graduate with a specific set of skills resulting from a unique program of study.

A grade of C or better is required for all math, science, and engineering courses.

A total of 58 technical electives are required. To be selected with consultation with ITDE advisor.

Select from the following courses: ASTR 314; ATMO 363; BIOL 111, BIOL 113; CHEM 222, CHEM 227, CHEM 310, CHEM 311, CHEM 315, CHEM 316, CHEM 318, CHEM 322; GEOL 101, GEOL 104; MARS 408, MARS 410; MATH 304, MATH 311, MATH 323, MATH 401; OCNG 410; PHYS 222; RENR 205, RENR 375; STAT 211, STAT 414.

Total Program Hours 128
Interdisciplinary Engineering - 6-Year Bachelor of Science/Juris Doctor

The College of Engineering and School of Law offer a combination degree program leading to the BS in Interdisciplinary Engineering (ITDE) and Juris Doctor (JD) degrees. This program is structured to allow students to complete it in six academic years, reducing the typical time to completion for sequential degrees by one year.

This combined degree program educates students in engineering and technology as a precursor to studies and practice in the law. Areas of legal practice that require advanced understanding of the engineering and technology development process include patents and intellectual property law, environmental law, and workplace health and safety law, among others. This program allows a streamlining of studies with mutual reinforcement of the respective degree disciplines.

Students who enroll in the combined program complete their first three academic years at the College of Engineering on the College Station campus. Upon the conclusion of the spring semester of the third year, students begin coursework in the School of Law for the fourth and fifth academic years in Fort Worth. For the sixth and final year, students have their primary curricula with the School of Law with coursework taken from both the School of Law and the College of Engineering, and courses are taken on the College Station campus. Students must complete all curriculum requirements and all additional graduation requirements published in the applicable undergraduate and graduate catalogs for the BS-ITDE degree and the JD degree.

Students interested in this combined program are strongly advised to meet with an academic advisor in the BS in Interdisciplinary Engineering program as early as possible to understand issues related to admission to both the BS and JD programs, course scheduling, minimum academic performance standards, and others. Admission to the BS degree program does not guarantee admission to the JD portion, and students must apply to the School of Law in the third academic year in order to begin law studies in the fourth academic year.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Semester Credit Hours 15

Total Semester Credit Hours 157

6. A total of 40 semester credit hours of technical electives are required. To be selected in consultation with ITDE advisor.
7. Select from the following courses: ASTR 314; ATMO 363; BIOL 111, BIOL 113; CHEM 222, CHEM 227, CHEM 310, CHEM 311, CHEM 315, CHEM 316, CHEM 318, CHEM 322; GEOL 101, GEOL 102, GEOL 104; MARS 408, MARS 410; MATH 304, MATH 311, MATH 323; PHYS 222, PHYS 224; RENR 375; STAT 211, STAT 414, STAT 415.
8. Students must successfully complete a minimum of six credit hours in one or more upper-level experiential courses. As part of the six credit hours, the student must successfully complete an approved externship or a clinic that involves advising or representing one or more actual clients or serving as a third-party neutral. An experiential course must be a simulation course, a law clinic, or a field placement.
9. One LARW III course is required.
10. Courses taken for credit for both the undergraduate and professional degree for a combined total of 30 semester credit hours: ENGR 401, ENGR 402, 6 semester credit hours of technical electives, and 18 semester credit hours of upper level LAW electives. All double-counted elective courses are to be selected in consultation with both ITDE and LAW advisors.

The combined program includes a total of 188 semester credit hours, which includes 30 semester credit hours applied both to the Bachelor of Science in Interdisciplinary Engineering and Juris Doctor degrees.

The JD degree is conferred on students who satisfactorily complete the program with a cumulative grade point average of 2.33 or better in LAW classes. In addition, each student must complete an upper-level rigorous writing requirement, a six-hour experiential requirement, and a 30-hour pro bono requirement. Students must complete their degree requirements within 72 months of starting law school, which occurs at the start of the fourth year of this combined program.
Interdisciplinary Engineering - 5-Year Bachelor of Science /Master of Public Health in Occupational Safety and Health

The College of Engineering and School of Public Health offer a combination degree program leading to the BS in Interdisciplinary Engineering (ITDE) and Master of Public Health (MPH) in Occupational Safety and Health degrees. This program is structured to allow students to complete it in five academic years, reducing the typical time to completion for sequential degrees by one year.

This combined degree program will educate students in biomedical technology and public health aspects of occupational environments. It utilizes an interdisciplinary approach to integrate relevant aspects of human health monitoring, ergonomics and workplace design, and public education and intervention for the purpose of creating healthier and safer working environments. This program has developed from university interdisciplinary research initiatives that are addressing the grand challenge of overcoming the human and economic burden of diabetes, heart disease, and other chronic conditions in underserved communities.

Students who enroll in the combined program complete their first three academic years in the College of Engineering. Upon the conclusion of the spring semester of the third year, students begin concurrent coursework in the School of Public Health and College of Engineering for the fourth and fifth academic years. Students must complete all curriculum requirements and all additional graduation requirements published in the applicable undergraduate and graduate catalogs for the BS-ITDE degree and the MPH degree.

Students interested in this combined program are strongly advised to meet with an academic advisor in the BS in Interdisciplinary Engineering program as early as possible to understand issues related to admission to both the BS and MPH programs, course scheduling, minimum academic performance standards, and others. Admission to the BS degree program does not guarantee admission to the MPH portion, and students must apply to the School of Public Health in the third academic year in order to begin public health studies in the fourth academic year.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Cybersecurity - Minor

The Cybersecurity Minor is designed to appeal to both less technically-oriented and more technically-oriented undergraduate students, across multiple departments, in multiple colleges. All students who enroll in the minor will acquire a basic understanding of programming, and a firmly grounded understanding of cybersecurity, to include cyber ethics. The inclusion of these courses in the minor will allow students to specialize in the area of cybersecurity that is most closely aligned with their respective interests and their degree plans.

Total Semester Credit Hours 16

1 Course must be approved by the Director of Interdisciplinary Engineering for inclusion in the minor and include applications in cybersecurity.

2 Course may be applied to latter category only if it is not applied above.

Minimum required GPA to declare minor is a 2.5.

Must make a grade of C or better in each course used towards minor.

Must achieve an overall GPA of 2.5 in approved minor coursework.

Minimum of 6 hours at 300-400 level.
Engineering Concepts - Minor

The Minor in Engineering Concepts is intended for students with majors outside the College of Engineering. The minor exposes them to the concepts of engineering design, analysis, and application so that they may work cooperatively and productively with engineers to improve society through technology and other advances.

Upon completion of this minor, students should be able to explain the general engineering design process and its components; differentiate respective engineering fields, their topical focuses, and typical applications; employ basic quantitative methods engineers commonly use to enhance understanding of problems; and relate engineering design process and analytical tools to at least 3 areas of major societal pursuit.

Engineering Project Management - Minor

The Engineering Project Management minor is intended to help meet the requirements of industry by educating undergraduate engineering students to understand complex engineering projects, project organizations, and project management methods. Students completing this minor will be able to work effectively in multidisciplinary engineering projects immediately after completion and to advance more rapidly within the project management organization and profession. The management of projects entails technical knowledge, engineering skills, and management skills.

To earn the minor, a student must complete a total of 16 semester credit hours that include prerequisite introductory core courses (ENGR 333 and ENGR 380) and courses selected from the following 3 categories:

1. **Business management and leadership.** The courses listed under this category provide required skills to understand the key management principles and provide leadership in project planning and execution.
2. **Economics, systems, and decisions.** The courses listed under this category provide advanced understanding of the analytical tools required to support project planning and execution.
3. **Project management applications.** The courses listed under this category provide examples of the application of project management principles.

Minimum required GPA to declare minor is a 2.5.

Must earn a grade of C or better in each course used towards minor.

Must achieve an overall GPA of 2.5 in approved minor coursework.

### Engineering Concept, Creation, and Commercialization - Certificate

The Engineering Concept, Creation, and Commercialization Certificate provides students with the training and experience to develop their ideas, create/design solutions to solve customer needs, and to understand the process of commercializing developed solutions. The program will focus on developing an entrepreneurial mindset which will be valuable to the students as employees of companies or as creators of their own startup. Students from any engineering major may find great value in the knowledge and skills this certificate develops.

### Holistic Leadership in Engineering - Certificate

The Zachry Leadership Program focuses on helping you expand your perspective and gain an appreciation for the power of collaboration and the diversity of thought, while also learning to become more selfless.

By participating in this program, you will gain lasting friendships with peers and interact with accomplished professionals with remarkable backgrounds. You’ll also be exposed to art as part of an initiative to stimulate creativity and open your mind.

After five semesters, you’ll emerge from this experience with a strong understanding of capitalism and how businesses operate within a free enterprise system. You’ll also have strengthened leadership capabilities and will be confident in your ability to influence people, while never losing sight of the many ways individuals and organizations make meaningful contributions to society. The combination of traditional coursework, exposure to thought leaders and a wide range of other experiences will help develop the capabilities and insights necessary for you to lead a successful and rewarding career. These skills will also help you lead a rewarding life outside of your 9-to-5 job.

### International Engineering - Certificate

Today's engineering industry is global and interconnected with supply, demand and service providers located around the world. An effective engineer in this global environment is one that complements his/her core technical knowledge with excellent cross-cultural competencies and international exposure. Students completing the International Engineering Certificate will be better prepared to join the global job market they will face following graduation. The International Engineering Certificate is only available to undergraduate, engineering degree-seeking students within the Texas A&M University College of Engineering.
Students from the Texas A&M University-Qatar campus are also eligible to apply for the certificate. The certificate is annotated on the student’s permanent transcript. Students completing the International Engineering Certificate will be better prepared to work effectively (professional, productive and culturally sensitive) as an engineer in multicultural and multidisciplinary work environments. By completing the 15-credit certificate, students will learn to:

- Integrate and apply skills required to solve an engineering design problem considering different perspectives;
- Understand intercultural differences and similarities, and their relevance to effectiveness in the workplace;
- Apply intercultural knowledge for self-knowledge/improvement (Intrapersonal competence);
- Apply intercultural knowledge for effective teamwork (Interpersonal competence).

The International Engineering Certificate may be completed by students pursuing College of Engineering degree programs in College Station, Galveston, McAllen, and Qatar and requires completion of three credit hours of coursework with an international experience.

For additional information, contact the Halliburton Engineering Global Programs Office via email at engineeringglobalprograms@tamu.edu, via phone at (979) 862-5880, or in-person at the Zachry Engineering Education Complex, Suite 410.

1. No course may be used more than one (1) time to fulfill certificate requirements.
2. Course only offered in the Fall term.
3. Pre-approval must be requested and granted prior to course completion. The Director of Halliburton Engineering Global Programs, the respective course faculty, and the student must meet to determine the specific course content or project that will suffice the ‘significant international component’ requirement.
4. After the International experience component is satisfied, engineering course credit received on a study abroad program, international field trip, international internship, international research experience, or another approved course or field experience may be used to fulfill this requirement.
5. To be selected from approved Cultural Discourse (p. 46) courses.
6. To be selected from approved International and Cultural Diversity (p. 47) courses. Course listing can be found at icd.tamu.edu.
7. May be satisfied by course credit received on a study abroad program, international field trip, international internship, international research experience, or another approved course or field experience.
8. Three (3) credit hours of a 200-level or higher course in a single language. Students are not allowed to use English to fulfill this requirement unless the TOEFL was required for their admission to Texas A&M University. If the TOEFL was required for their admission, students may use ENGL 210 to fulfill this requirement. Students may obtain course credit for this requirement by accepting AP credits or credits obtained through the on-campus language proficiency exam onto their transcript.

### Polymer Specialty - Certificate

The Polymer Specialty Certificate is designed to provide a strong interdisciplinary educational program for undergraduate engineering and suitably prepared science students interested in pursuing a polymer career. The certificate will also provide knowledge to reduce the training time required to turn Texas A&M students into productive members of the industrial workforce. This program is the first of its kind offered in the State of Texas and is administered by the Polymer Technology Center. No other universities in the State of Texas offer a formal polymer curriculum, despite the significant role the polymer industry plays in the state’s economy.

#### Why Should I Be Interested:

**Benefits**

- Gain an interdisciplinary education with an emphasis in polymers
- Be better prepared for jobs focusing on polymers
- Acquire an edge over students from other universities who have no documented polymer knowledge
- Obtain knowledge to foster entrepreneurial thinking
- Receive recognition on university transcript upon completion of certificate requirements and graduation
- Broaden your exposure to a diverse polymer science and engineering curriculum
- Expand employment horizons beyond the traditional industrial jobs

For additional information, contact the Polymer Specialty Certificate coordinator at 979-458-0918 or email at icantu@tamu.edu.

Students should take at least 2 courses outside their department to receive the Polymer Certificate.

### Safety Engineering - Certificate

The Safety Engineering Certificate prepares the graduate for positions in several areas of safety engineering. Students must complete 15 semester credit hours of specified courses to earn a Safety Engineering Certificate. The Safety Program (https://engineering.tamu.edu学术/ certificates/safety.html) coordinator reviews each student's coursework prior to certification.

Students should complete and submit a certificate application to the Mary Kay O'Connor Process Safety Center (246 Jack E. Brown Engineering Building) prior to registering for any of the certificate courses.

The mission of the Aerospace Engineering program is

1. to provide students with a quality undergraduate and graduate education for the State of Texas and the nation through an innovative educational program;
2. to advance the science and aerospace engineering knowledge base through basic and applied research, inventions, technologies and solutions to aerospace problems; and
3. to serve the aerospace engineering profession by preparing leaders for leadership in the creation, design and operation of the next generation aerospace systems.

To achieve this mission, the educational objectives established by the Aerospace Engineering undergraduate program are to produce graduates whose expected accomplishments within three to five years of graduation are...
1. to have successful careers in industry, private practice, or government, or have pursued advanced graduate studies;
2. to be skilled practitioners who apply their knowledge and skills to solve relevant engineering problems in the aerospace or a related profession; and
3. to function well in teams, communicate well, continue enhancing their professional competence, and understand the impact of engineering solutions.

To carry out these educational objectives, the goals of the program are
1. using a high quality faculty, to provide a comprehensive aerospace engineering education that develops in students the fundamental skills necessary for the design, synthesis, analysis and research development of aircraft, spacecraft and other high technology flight systems; and
2. to prepare students for the aerospace engineering profession and related fields by developing the attributes needed, so that they can contribute successfully to society and to the engineering profession now and in the future.

The Department offers a Bachelor of Science in Aerospace Engineering with Honors degree option. This option was proposed by our students and implemented for our students. Very few programs across the country offer this type of experience within Aerospace Engineering. You will be part of an honors community and be provided with the opportunity to enhance your learning experience through one-on-one research with a faculty mentor, introduction to advanced aerospace theories, and much more. The Department also offers a Fast Track program, which is tailored for high-achieving undergraduate students who wish to extend their knowledge and gain an edge by earning a Master of Engineering (ME) degree. Fast Track allows qualified students to earn up to nine hours of credit toward their Aerospace Engineering undergraduate and graduate degrees. Consequently, through Fast Track a student can earn a ME degree in two semesters beyond their undergraduate degree.

Laboratories supplement theoretical studies in the major disciplines in the Department. Numerous wind tunnels for low-speed and supersonic aerodynamic studies, a jet engine test facility, numerous research aircraft, a flight simulator, a satellite laboratory with Integrated Concurrent Engineering Capability, a robotics laboratory, and state-of-the-art materials and structures testing equipment are available, equipped with modern instrumentation. The Department and the University also provide an extensive array of computing resources.

Students are encouraged to enrich their undergraduate experience through a variety of ways in the Department, including co-op and internship positions, student competition design projects, and even undergraduate research. In addition, students have the opportunity to study abroad or participate in an international exchange program.

The Department also offers programs of study leading to the ME, MS, and PhD degrees (see the Texas A&M University Graduate and Professional Catalog). The Bachelor of Science in Aerospace Engineering degree is accredited by the Engineering Accreditation Commission of ABET, www.abet.org. Before commencing course work in the major, students must be admitted to the major or have the approval of the Department.

Majors
- Bachelor of Science in Aerospace Engineering (p. 382)

Minors
- Aerospace Engineering Minor (p. 383)

Aerospace Engineering - BS

Coursework in aerodynamics, structures and materials, propulsion, and dynamics and control provide a strong fundamental basis for advanced study and specialization, while technical electives offer a concentration of study in fields of special interest. Design philosophy and practice are developed throughout the curriculum to relate analysis to aerospace engineering design. The design of aerospace system components is particularly emphasized in the junior- and senior-level courses. A senior-level two-semester design sequence, involving specific goals, objectives, and constraints, integrates analysis and design tools and requires students working in small teams to design, build, test, and even fly an aerospace system, such as an aircraft, rocket, or spacecraft. Application of modern engineering and computational tools is required and emphasized in all courses.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

1 A grade of C or better is required.
2 Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3 Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.
4 BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.
5 For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

#### Total Semester Credit Hours

17

6 All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the AERO advising office.

7 A two-semester sequence is required.

### Total Program Hours 128

**Aerospace Engineering - Minor**

The Department of Aerospace Engineering offers a minor to students within the College Of Engineering who are interested in Aerospace applications of engineering related to subsonic and supersonic aerodynamics, dynamics, vehicle stability and control, and aerospace structures. Eligible students must submit an application in order to be considered for and allowed to pursue a minor in Aerospace Engineering.

**Requirements:**

To earn a Minor in Aerospace Engineering, students must meet and adhere to the following requirements and guidelines:
• In good academic standing within major department.
• Approval to pursue the minor from Aerospace.
• Overall and Major GPA > 2.50 when entering the minor field of study.
• Maintain a cumulative 2.0 GPA in the AERO minor courses, including prerequisites.
• Must earn C or higher to count as a minor field of study.

Additional Requirements

• Overall GPR > 2.50 when entering the minor field of study.
• Major GPR >2.50 when entering the minor field of study.
• Must earn C or higher to count as a minor field of study.

Prerequisites

• Approval to pursue the minor from Aerospace.

Department of Biomedical Engineering

The objectives of the Biomedical Engineering program are to produce high-quality graduates with a broad-based education in engineering, life sciences and natural sciences applied to the fields of biomechanics, biomaterials, bioinstrumentation, and biomolecular and cellular engineering who:

1. are well prepared for further graduate studies, careers in the biomedical or biotechnology industries or entry into medical or other professional schools;
2. will make significant contributions in biomedical industries, medicine and other sectors;
3. will apply acquired knowledge appropriately, work professionally with others, effectively communicate ideas and technical information and continue to learn and improve their knowledge base and skills.

These objectives are met through a modern and comprehensive curriculum taught by a well prepared, professionally active and dedicated faculty. In addition, the program actively supports professional development among the students through individual study and research opportunities, cooperative education and internships, and student society activities. These goals are measured by the success of the graduates in finding rewarding professional employment, and by admission to respected graduate and professional schools.

Design is an important part of biomedical engineering and design skills are emphasized throughout the curriculum, beginning the first year in the program, and culminating in the two-semester senior design course sequence that requires application of a wide range of engineering methods to a focused design project. Other courses in biomedical engineering and in supporting disciplines include examples of the application of the principles to design, as well as specific design exercises. The biomedical engineering curriculum is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Before commencing coursework in the department, students must be admitted to the major or minor.

Biomedical Engineering - BS

Department Head: M. McShane

Director of Undergraduate Programs: M. McDougall

Committed to solving the world’s greatest health problems through the exploration of new ideas, integrated research and innovation, the Department of Biomedical Engineering at Texas A&M University is producing the next generation of biomedical engineers in industry and at tier-one research institutions, developing new technologies and new jobs, and achieving revolutionary advancements for the future of health care.

The undergraduate curriculum in biomedical engineering involves the development and application of engineering science and technology for living and medical systems. Based around a basic core of courses, the bachelor’s degree is designed to prepare students for team involvement with other engineers and with physicians and life scientists to solve a wide array of biological and medical problems. Elective courses are included to accommodate individual student specialty interests within the fields of biomechanics, biomaterials, bioinstrumentation, and biomolecular and cellular engineering. Students interested in specialized professional school programs such as medical school can meet admission prerequisites through slight modifications and additions to the curriculum.

The department offers a Bachelor of Science degree and a minor. For more information, including degree requirements and application deadlines, visit http://engineering.tamu.edu/biomedical (http://engineering.tamu.edu/biomedical/).

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

</table>

1 A grade of C or better is required.
2 Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3 Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.
BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEN 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEN 117.

For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

## Biomedical Engineering - Minor

The Department of Biomedical Engineering offers a minor to students within the College of Engineering who are interested in biomedical applications of engineering related to the sub-specialty fields of biomechanics, biomaterials, or bioinstrumentation. Eligible students must submit an application in order to be considered for and allowed to pursue a minor in Biomedical Engineering.

### Requirements

In order to earn a minor in Biomedical Engineering, students must meet and adhere to the following requirements and guidelines:

- Admitted into a College of Engineering major.
- In good academic standing within major department (GPA of 2.5 or higher).
- Maintain a cumulative 2.0 GPA in minor courses.
- Complete the courses listed for the selected Biomedical Engineering minor track.
- Following acceptance into a particular track, change of Biomedical Engineering minor track will not be permitted unless by petition and review by the Director of Undergraduate Programs.

### Program Requirements

<table>
<thead>

</tbody>
</table>
or ECEN 389 or Electrical Circuit Theory  
BMEN 420 Medical Imaging  
Select 6 hours from the following:  
BMEN 322 Biosignal Analysis  
BMEN 401 Principles and Analysis of Biological Control Systems  
BMEN 422 Bioelectromagnetism  
BMEN 425 Biophotonics  
BMEN 427 Magnetic Resonance Engineering  
or ECEN 463 Magnetic Resonance Engineering  
BMEN 428/CSCE 461 Embedded Systems for Medical Applications  
BMEN 448 Healthcare Technology in the Developing World  
ECEN 411 Introduction to Magnetic Resonance Imaging and Magnetic Resonance Spectroscopy  
ECEN 412 Ultrasound Imaging  
ECEN 414 Biosensors  
ECEN 447 Digital Image Processing  

**Biomaterials Area**  
BMEN 343 Introduction to Biomaterials  
or MEEN 222 Materials Science  
MSEN 222  
BMEN 344 Biological Responses to Medical Devices  
Select 6 hours from the following:  
BMEN 480 Biomedical Engineering of Tissues  
BMEN 482 Polymeric Biomaterials  
BMEN 483 Polymeric Biomaterial Synthesis  
BMEN 486 Biomedical Nanotechnology  
BMEN 487 Drug Delivery  
CHEM 466 Polymer Chemistry  
CHEN 451 Introduction to Polymer Engineering  
MEEN 458 Processing and Characterization of Polymers  
MSEN 410 Materials Processing  
MSEN 420 Polymer Science  

**Biomechanics Area**  
BMEN 341 Biofluid Mechanics  
BMEN 361 Biosolid Mechanics  
or MEEN 366 Solid Mechanics in Mechanical Design  
Select 6 hours from the following:  
BMEN 432 Molecular and Cellular Biomechanics  
BMEN 457 Orthopedic Biomechanics  
BMEN 458 Motion Biomechanics  
BMEN 461 Cardiac Mechanics  
BMEN 463 Soft Tissue Mechanics and Finite Element Methods  
BMEN 471 Numerical Methods in Biomedical Engineering  

**MEEN Area**  
MEEN 363 Dynamics and Vibrations  
MEEN 440 Bio-inspired Engineering Design  
MEEN 441 Design of Mechanical Components and Systems  
MEEN 442 Computer Aided Engineering  
MEEN 444 Finite Element Analysis in Mechanical Engineering  

| Total Semester Credit Hours | 15 |

1. Students must select courses exclusively from one of the three areas represented and not mixed.  
2. Students may use no more than 6 hours from their home department to satisfy minor requirements. All substitutions must be approved by the BMEN academic advisor and director.  

Students must be admitted to a degree sequence in the College of Engineering or to the degree sequence in Biological and Agricultural Engineering. Students should know that all tracks require completion of math through Differential Equations (MATH 308). Applications are available in the Biomedical Engineering Advising Office and will be reviewed on a competitive basis at the end of every fall and spring semester.

---

### Quality Engineering for Regulated Medical Technologies - Certificate

Quality engineering principles are mandated by federal and state regulations for clinical facilities and for the design, testing and manufacture of medical technologies (such as pharmaceuticals and imaging, diagnostic and therapeutic devices). Completion of this certificate requires specific instruction in quality engineering and regulation of medical technologies; moreover, candidates must go beyond understanding concepts and demonstrate appropriate usage of quality engineering principles in a medically related career, candidates for this certificate are expected to be entering a high-growth job market for engineers.

For additional information, contact the Quality Engineering for Regulated Medical Technologies Certificate coordinator at bmen@tamu.edu.

### Elective Courses
Artie McFerrin Department of Chemical Engineering

Chemical engineering is a broad field of engineering and thus requires a diverse preparation in science and engineering. Distinguishing chemical engineering from other engineering disciplines is its use of chemical and biochemical reactions to produce products and materials for society. Traditionally, chemical engineers have provided leadership in the petrochemical, refining, chemical, polymer, and food processing industries. Because of strengths in the foundation sciences of mathematics, chemistry, physics and biology, as well as in engineering, this leadership role has now extended to the biochemical, biomedical, high-tech materials, semi-conductor and microelectronics, nanotechnology, environmental quality, safety, and a host of other areas. Chemical engineers have consistently commanded starting salaries among the highest of all college graduates because of the combined breadth and depth of their education.

The mission of the Artie McFerrin Department of Chemical Engineering at Texas A&M is to educate and prepare students for national and international leadership roles in industry, government, and academia; to attract top students to chemical engineering; to define and develop new directions in chemical engineering fundamentals and practices, and in chemical engineering education and curricula; to be a valuable resource and service base to the State and to industry; and to provide leadership in solving problems of social and economic importance.

Objectives of the chemical engineering program are that

1. graduates will have successful chemical engineering careers in industry, academia or government,
2. graduates will obtain, apply and transfer knowledge across disciplines and into emerging areas of chemical engineering and related fields,
3. graduates will communicate effectively, be leaders in their fields and work competently in interdisciplinary teams, and
4. graduates will be professionally responsible and ethical and engage in professional activities to impact the society on a global scale.

To supplement coursework, well-equipped laboratories provide our students with experiences in operating and analyzing a variety of unit operations and process control equipment and in the use of the modern computational tools and software used in chemical engineering. The department offers vibrant undergraduate research, co-op and study abroad programs that provide students with additional enrichment and experiential opportunities.

The undergraduate program in Chemical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org, and compares favorably with the best in the nation.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Certificates

• Engineering Therapeutics Manufacturing Certificate (p. 393)

Chemical Engineering - BS

The chemical engineering curriculum provides a balanced education in virtually all aspects of chemical engineering principles and practice and includes education in economics, language, philosophy and culture and communication. Chemical engineering courses emphasize fundamentals and methods that are applicable to the analysis, development, design and operation of a wide variety of chemical engineering systems and processes, thereby providing the necessary background for entry into the wide array of activities described above. At the same time, specific example applications provide the student with insight into the ability of chemical engineers to work in such a variety of areas. The curriculum is structured to offer students an opportunity to extend and apply the fundamentals developed in the basic courses toward more focused areas of specialization. The sequence of courses converges in the senior year into a comprehensive capstone design course that includes elements of economics, safety and environmental issues. The course provides
an experience much like that of an industry design project. It is this philosophy of fundamentals, applications and design that has enabled our chemical engineering graduates to adapt readily to a dynamic and rapidly changing world and to solve problems they have not previously experienced.

### Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar).

Students pursuing degrees in biological and agricultural engineering (Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar).

Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

For a list of approved specialty options, please see a chemical engineering advisor.

All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the CHEN advising office.

A grade of C or better is required in all CHEN courses.

Total Program Hours 128

Chemical Engineering - Minor

The Department of Chemical Engineering offers a minor for students interested in applied chemistry related to the large-scale production of chemicals (e.g., clean water, food, beverages, pharmaceuticals, specialty chemicals, plastics, fertilizer, gasoline, etc.). Eligible students must submit an application in order to be considered for a minor in Chemical Engineering.

In order to earn a minor in Chemical Engineering, students must meet and adhere to the following requirements and guidelines:

- In good academic standing within major department (GPA of 3.0 or higher)
- Minimum of 30 hours completed with no grade below a C
- No grade below a C in minor courses
- Complete the courses listed for the selected Chemical Engineering minor

Please see our undergraduate office for assistance pertaining to certain engineering majors that may have courses which may substitute for courses in the minor.

Engineering Therapeutics Manufacturing - Certificate

The Engineering Therapeutics Manufacturing Certificate is intended to meet the requirements of industry by educating engineering Bachelor of Science graduates how to economically, ecologically and safely design and operate equipment used for the production and separation of biological materials. By the end of the certificate program, students will be able to:

1. understand the processing of biological materials
2. analyze functions and properties of biological materials
3. understand the impact of the use/misuse of biological materials
4. understand the life cycle and evolution of biological materials
5. design, operate and optimize biological process units

For additional information, contact the Engineering Therapeutics Manufacturing Certificate coordinator or Engineering Academic and Student Affairs, 481 Zachry Engineering Education Complex, (979) 845-7200.

Additionally, the department provides opportunities for enhancement of advances to facilitate the development of their problem-solving skills. Engineering principles and that will couple with the latest technological in the engineering profession by providing our students with a solid is to prepare our graduates to become professional engineers and leaders

Environmental engineers are also employed by consulting firms, public
minimizing the adverse effects of human activity on the environment.
Environmental engineers work to protect human health and welfare while
such as water treatment, waste management, and climate change.
Environmental engineers work to protect human health and welfare while
minimizing the adverse effects of human activity on the environment.
Environmental engineers are also employed by consulting firms, public
agencies, and start and operate their own businesses. Workplaces
range from construction sites to design offices. Most civil engineers work
with some engineering or construction aspect of private and/or public
facilities, such as airports, bridges, buildings, coastal structures, dams,
environmental remediation of contaminated sites, harbors, highways,
offshore structures, pipelines, railroads, transportation systems,
tunnels, water collection systems, water distribution systems, water and
wastewater treatment facilities, and waterways. Civil engineers are on the
forefront of applying the newest technology innovations in engineering
and construction.

Civil engineering projects are unique because they require individual
planning, analysis, design, construction supervision, performance
monitoring, management, and retrofitting. Civil engineering projects often
require technical, governmental, legal, financial, and social evaluations.
The primary objective is to provide the best service for the users while
minimizing costs and other undesirable impacts.

Environmental engineers use a multidisciplinary approach to solve
environmental challenges facing public and environmental health,
such as water treatment, waste management, and climate change.
Environmental engineers work to protect human health and welfare while
minimizing the adverse effects of human activity on the environment.
Environmental engineers are also employed by consulting firms, public
agencies, and start and operate their own businesses.
The mission of the Zachry Department of Civil and Environmental
Engineering (http://engineering.tamu.edu/civil/) at Texas A&M University
is to prepare our graduates to become professional engineers and leaders
in the engineering profession by providing our students with a solid
education that will enable them to integrate fundamental scientific
ingineering principles and that will couple with the latest technological
advances to facilitate the development of their problem-solving skills.
Additionally, the department provides opportunities for enhancement of

the students’ educational experience through meaningful interactions
with the profession. In summary, we expect our graduates to be fully
prepared for life-long learning experiences that will strengthen their
abilities to successfully and effectively solve the complex engineering
problems facing society.

The faculty of the Zachry Department of Civil and Environmental
Engineering strives to ensure that our ever-evolving educational programs
accomplish several objectives. First, our faculty must prepare the
students to address the current and future civil and environmental
engineering needs of the State of Texas, the nation and the world by
being able to recognize the important geopolitical and public policy
needs; and solve technical problems. In addition, the Department
provides a curriculum that integrates scientific and technical knowledge
with an appreciation for social, economic, and political concerns. The
curriculum and programs provide opportunities for our students to:

1. build leadership skills,
2. learn professionalism and ethical responsibility, and
3. develop an understanding of the need to engage in lifelong learning.

Finally, the faculty of the Zachry Department of Civil and Environmental
Engineering at Texas A&M University promotes the highest academic
standards of excellence, quality, and ethics in both our undergraduate and
graduate programs, and in doing so create both a culture of excellence
and a community of scholars. Through our programs, our faculty and
graduates provide local, state, national, and international leadership to
a profession that must solve the civil and environmental engineering
problems facing an increasingly complex society.

B.S. in Civil Engineering

The program educational objectives for the undergraduate civil
engineering program within the Department of Civil and Environmental
Engineering at Texas A&M University are to produce graduates:

1. who are prepared to enter civil engineering practice and/or continue
their education through study in graduate and professional programs,
2. most of whom will become practicing civil engineers with most of
these becoming licensed professional engineers, and
3. many of whom will pursue advanced studies.

The undergraduate program in civil engineering within the Zachry
Department of Civil and Environmental Engineering at Texas A&M
is accredited by the Engineering Accreditation Commission of
ABET, www.abet.org (http://www.abet.org)/.

Students pursuing a B.S. in Civil Engineering can follow a general
track or specialize in one of seven areas. Eight tracks are available for
undergraduate study within Civil Engineering as follows:

1. General Civil Engineering
2. Coastal Engineering
3. Construction Engineering and Management
4. Geotechnical Engineering
5. Environmental Engineering
6. Structural Engineering
7. Transportation Engineering
8. Water Resources Engineering

Before commencing course work in the major, students must be admitted
to the major or have the approval of the department.
Graduate programs in civil engineering are also available. These programs allow further specialization and offer more in-depth study to address more complex technical and management issues. Graduate degrees also offer additional employment opportunities.

**B.S. in Environmental Engineering**

The program educational objectives for the undergraduate environmental engineering program within the Department of Civil and Environmental Engineering at Texas A&M University are to produce graduates:

1. who are prepared to enter environmental engineering practice and/or continue their education through study in graduate and professional programs,
2. most of whom will become practicing environmental engineers with most of these becoming licensed professional engineers, and
3. many of whom will pursue advanced studies.

Our environmental engineering curriculum is unique in that it:

1. Has a specific focus on the protection of public and environmental health by solving environmental challenges;
2. Showcases a broad range of coursework to pursue specific environmental interests in natural or engineered systems;
3. Is multidisciplinary in every approach, melding earth science, life science, chemistry, social science and engineering;
4. Provides the tools to develop solutions to solve emerging and existing issues such as water treatment, climate change, and other environmental challenges.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Civil Engineering - BS, Coastal and Ocean Engineering Track

The Coastal and Ocean Engineering Track to fulfill the BS in Civil Engineering degree emphasizes breadth across civil engineering with a focus on coastal and offshore engineering. The track electives prepare students to analyze and design systems for shallow and deep water environments. The track is appropriate for a career related to coastal and offshore engineering, and for those planning on further specialization in graduate studies.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Total Semester Credit Hours: 97

6 A total of 35 hours of technical electives is required. Technical electives are divided into four categories: science courses, breadth courses, focus courses, and capstone design courses. The choice of courses to be taken in each of the four categories depends on the track chosen and must be made in consultation with the student’s advisor and/or the Civil Engineering Undergraduate Student Services Office to ensure pre- and co-requisites are satisfied. Capstone design courses must include more than one civil engineering context.
All students must take at least two courses in their major that are designated as writing intensive (W). CVEN 207 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

**Total Program Hours 128**

**Coastal and Ocean Engineering Track - Technical Electives**

Technical electives for the BS in Civil Engineering, Coastal and Ocean Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (11 semester credit hours), FOCUS courses (18 semester credit hours), and a CAPSTONE DESIGN course (3 semester credit hours), as delineated below, for a total of 35 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office.

**Civil Engineering - BS, Construction Engineering and Management Track**

The Construction Engineering and Management Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in the fundamentals of construction engineering and project management. The Track blends the principles of basic science, engineering, and technology with a strong component of business coursework. The Track is appropriate for students interested in a career in the construction industry.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees
in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

1. A grade of C or better is required.

2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

3. Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.

4. BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

5. For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

Civil Engineering - BS, Environmental Engineering Track

The Environmental Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in water and waste water treatment, air and water quality management, solid and hazardous wastes, ground water protection and remediation, and environmental policy. The track is appropriate for those wishing to pursue careers in protecting the natural environment from human activities, protecting human populations from the effects of adverse environmental factors and improving the environmental quality for human health and well-being.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering,
computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Total Semester Credit Hours 97

6 A total of 35 hours of technical electives is required. Technical electives are divided into four categories: science courses, breadth courses, focus courses, and capstone design courses. The choice of courses to be taken in each of the four categories depends on the track chosen and must be made in consultation with the student’s advisor and/or the Civil Engineering Undergraduate Student Services Office to ensure pre- and co-requisites are satisfied. Capstone design courses must include more than one civil engineering context.

7 All students must take at least two courses in their major that are designated as writing intensive (W). CVEN 207 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

Total Program Hours 128

Environmental Engineering Track - Technical Electives

Technical electives for the BS in Civil Engineering, Environmental Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (8-14 semester credit hours), FOCUS courses (15-21 semester credit hours), and a CAPSTONE DESIGN course (3 semester credit hours), as delineated below, for a total of 35 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

Total Program Hours 128

Environmental Engineering Track - Technical Electives

Technical electives for the BS in Civil Engineering, Environmental Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (8-14 semester credit hours), FOCUS courses (15-21 semester credit hours), and a CAPSTONE DESIGN course (3 semester credit hours), as delineated below, for a total of 35 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.
The General Civil Engineering Track to fulfill the BS in Civil Engineering degree emphasizes breadth across the civil engineering field. Students take courses in all major sub-disciplines of civil engineering with an advanced focus elective allowing deeper learning in one area. The track is appropriate for a career in any area of civil engineering, with particular relevance for those interested in public works, land development, and general civil, and for those planning on further specialization in graduate studies.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.

BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/117.

For BS-PETE, allocate 3 hours to core communications course (ENGL 210, or COMM 203, or COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

6 A total of 35 hours of technical electives is required. Technical electives are divided into four categories: science courses, breadth courses, focus courses, and capstone design courses. The choice of courses to be taken in each of the four categories depends on the track chosen and must be made in consultation with the student’s advisor and/or the Civil Engineering Undergraduate Student Services Office to ensure pre- and co-requisites are satisfied. Capstone design courses must include more than one civil engineering context.

7 All students must take at least two courses in their major that are designated as writing intensive (W). CVEN 207 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.
Civil Engineering - BS, Geotechnical Engineering Track

The Geotechnical Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in applied soil mechanics and foundation engineering, as well as civil engineering sub-disciplines with strong geotechnical engineering connections such as structures, water resources, construction, transportation, environmental, coastal and ocean engineering. The track is appropriate for those wishing to pursue careers in engineering design and management of infrastructure in a wide array of sectors that can include energy, transportation, and water resources.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Civil Engineering - BS, Structural Engineering Track

The Structural Engineering track to fulfill the BS in Civil Engineering degree provides coursework in the areas of structural analysis and structural design that equip the student to analyze and design the frameworks that support buildings, bridges, offshore installations and civil infrastructure projects. This track is appropriate for careers related to the structural design of engineered facilities to safely resist the forces found in their environment, and for those planning on further specialization in graduate studies.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). 3. Up to 2 hours of CVEN 485 or CVEN 491 may be used.

Civil Engineering - BS, Transportation Engineering Track

The Transportation Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in transportation engineering areas of planning, design, and operations, as well as civil engineering sub-disciplines with strong transportation connections such as water resources, construction, and geotechnical. The track is appropriate for those wishing to pursue careers in engineering related to the planning, design, construction, operation, and maintenance of various elements of the transportation system, including roads, rail, transit, and aviation.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.
Select one of the following:

- University Core Curriculum (p. 25) \(^3\) 3

**Spring**

- ENGR 216/PHYS 216: Experimental Physics and Engineering Lab II - Mechanics \(^1\) 2
- MATH 152: Engineering Mathematics II \(^1\) 4
- PHYS 206: Newtonian Mechanics for Engineering and Science \(^1\) 3

University Core Curriculum (p. 25) \(^3\) 3

Select one of the following: 3-4

- CHEM 120: Fundamentals of Chemistry II \(^4\) 1
- University Core Curriculum (p. 25) \(^3,5\) 3

**Total Semester Credit Hours** 15-16

A grade of C or better is required.

1. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

2. Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.

3. BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/CHM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHM 117.

4. For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.
A total of 35 hours of technical electives is required. Technical electives are divided into four categories: science courses, breadth courses, focus courses, and capstone design courses. The choice of courses to be taken in each of the four categories depends on the track chosen and must be made in consultation with the student’s advisor and/or the Civil Engineering Undergraduate Student Services Office to ensure pre- and co-requisites are satisfied. Capstone design courses must include more than one civil engineering context.

All students must take at least two courses in their major that are designated as writing intensive (W). CVEN 207 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

**Total Program Hours 128**

### Transportation Engineering Track - Technical Electives

Technical electives for the BS in Civil Engineering.

Transportation Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (12-18 semester credit hours), FOCUS courses (11-17 semester credit hours), and a CAPSTONE DESIGN course (3 semester credit hours), as delineated below, for a total of 35 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office.

### Civil Engineering - BS, Water Resources Engineering Track

The Water Resources Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in applied hydraulics and hydrology as well as civil engineering sub-disciplines with strong water resources connections such as environmental, transportation, geotechnical, and coastal engineering. The track is appropriate for those wishing to pursue careers in engineering design and management for water quantity and quality issues.
Program Requirements

The freshman year is identical for degrees in aerospace engineering,
architectural engineering, civil engineering, computer engineering,
computer science, electrical engineering, electronic systems engineering
technology, environmental engineering, industrial distribution, industrial
engineering, interdisciplinary engineering, manufacturing and mechanical
engineering technology, nuclear engineering, ocean engineering, and
petroleum engineering (Note: not all programs listed are offered in
Qatar). The freshman year is slightly different for chemical engineering,
bioengineering and materials science and engineering degrees
in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120.
Students pursuing degrees in biological and agricultural engineering
should refer to the specific curriculum for this major. It is recognized that
many students will change the sequence and number of courses taken in
any semester. Deviations from the prescribed course sequence, however,
should be made with care to ensure that prerequisites for all courses are
met.

Environmental Engineering - BS

The BS in Environmental Engineering degree coursework is specifically designed to educate students to solve environmental challenges facing public and environmental health, such as water treatment, waste management and climate change. The degree offers a broad range of coursework in the natural sciences and engineering, providing a multidisciplinary approach that merges with engineering principles to solve emerging and existing environmental issues. The program is appropriate for those who wish to protect human health and welfare while minimizing the adverse effects of human activity on the environment.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

6 All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the EVEN advising office.

7 All students must take at least two courses in their major that are designated as writing intensive (W) or communications intensive (C). EVEN 201 and EVEN 400 taken at Texas A&M satisfy this requirement. Other EVEN courses may be approved as W/C courses at a later date. A grade of C or better is required in these courses.

8 Select from ATMO 363; BAEN 464, BAEN 468; BESC 357, BESC 367, BESC 402, BESC 403; BICH 303; CVEN 306, CVEN 307, CVEN 315, CVEN 454, CVEN 455; ESSM 420; GEOG 467; GEOS 410; OCEN 362; OCNG 350; SCSC 405; SENG 310.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

**Total Program Hours 128**
Department of Computer Science and Engineering

Computing devices are all around us and computer algorithms support almost every aspect of our daily activities, decisions, and transactions. Our majors are at the center of these exciting activities; in envisioning new forms of services, in applications to address existing or emerging needs, in formulation and evaluation of algorithms to build the necessary computer and networking systems, and in development of the necessary software infrastructures to deploy the resulting solutions. In this, they rely on skills learned in our degree programs; skills that include algorithm design and analysis, programming languages, computer system design, artificial intelligence and machine learning, graphics, human-computer interaction, and many more. Our graduates are found in a wide range of industries, both public and private, reflecting the ubiquity of computing in society.

The Department of Computer Science and Engineering prepares our students to become computing experts who are equipped to address the many and varying challenges that they will encounter in their careers. We offer three degree programs, which are designed to address a variety of student goals and industry demands.

Mission

The mission of the Department of Computer Science is to develop the human and intellectual resources needed to meet the future technological challenges in the field of computing. This includes developing computer scientists and computer engineers for positions of leadership in industry, government, and academia.

BS in Computer Science

The curriculum in Computer Science is designed to prepare students to enter the rapidly expanding computer field. Curricula and courses are based upon recommendations by the Institute of Electrical and Electronic Engineering Computer Society and the Association for Computing Machinery. The Computer Science program is accredited by the Computing Accreditation Commission of ABET, www.abet.org.

BS in Computer Engineering

The Computer Engineering curricula provide a balanced view of hardware, software, hardware-software trade-offs, analysis, design, and implementation techniques. It is a dynamic and broadly interdisciplinary field that continues to experience rapid growth that impacts every area of human endeavor. The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

BA in Computing

The Bachelor of Arts in Computing allows students to couple foundational skills in computing, both theoretical and practical, with a sound knowledge of an intersecting area of interest.

Faculty

Ahmed, Sarker T, Instructional Assistant Professor
Computer Science & Engineering
PHD, Texas A&M University, 2016

Akleman, Ergun, Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 1992

Amato, Nancy M, Professor
Computer Science & Engineering
PHD, University of Illinois, 1995

Bettati, Riccardo, Professor
Computer Science & Engineering
PHD, University of Illinois, 1994

Caverlee, James B, Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 2007

Chai, Jinxiang, Associate Professor
Computer Science & Engineering
PHD, Carnegie Mellon University, 2006

Chaspari, Theodora, Assistant Professor
Computer Science & Engineering
PHD, University of Southern California, 2017

Chen, Jianer, Professor
Computer Science & Engineering
PHD, Columbia University, 1987

Choe, Yoonsuck, Professor
Computer Science & Engineering
PHD, University of Texas, 2001

Da Silva, Dilma M, Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 1997

Daugherity, Walter C, Senior Lecturer
Computer Science & Engineering
PHD, Harvard University, 1977

Davis, Timothy A, Professor
Computer Science & Engineering
PHD, University of Illinois - Urbana Champaign, 1989

Dewitte, Paula S, Associate Professor of the Practice
Computer Science & Engineering
JD, St. Mary’s University School of Law, 2008
PHD, Texas A&M University, 1989

Dongarra, Jack J, Visiting Professor
Computer Science & Engineering
JD, St. Mary’s University School of Law, 2008
PHD, Texas A&M University, 1989

Duffield, Nicholas G, Professor
Computer Science & Engineering
PHD, Queen Mary College, Univ. of London, 1987

Furuta, Richard K, Professor
Computer Science & Engineering
PHD, University of Washington, 1986

Garay, Juan A, Professor
Computer Science & Engineering
PHD, The Pennsylvania State University, 1989
Goldberg, Daniel W, Assistant Professor
Computer Science & Engineering
PHD, University of Southern California, 2010

### Computer Engineering - BS, Computer Science Track

The curriculum is designed to cover the engineering aspects of both hardware and software—a total computer systems perspective. All computer engineering students take courses in the following areas: electrical circuits, electronics, digital circuits, computer architecture ranging from microcomputers to mainframes, interfacing, programming languages ranging from assembler to high level, data structures, analysis of algorithms, operating systems, software engineering and microcomputer systems. A solid foundation in the basic sciences of physics, chemistry and mathematics is used to support these courses.

There are two distinct tracks in this curriculum, the Electrical Engineering track and the Computer Science track, both culminating in the same Computer Engineering degree. The tracks are substantially similar, each providing a broad coverage of the computer engineering discipline, but each has a slightly different emphasis. Students in the Computer Science track often have a stronger interest in the software-related aspects of computer engineering, and students in the Electrical Engineering track often are more focused on the hardware-related aspects of the field. Note, however, that students in either track can take courses from the other as electives, or they can use their electives to further specialize within their own track. Although students are required to select a track immediately upon entering the Computer Engineering program, it is usually possible to change tracks as late as the junior year.
The Computer Science track of the Computer Engineering degree provides students the freedom to enhance their knowledge in the broad range of topics comprising Computer Engineering: computer networks, computer architecture, artificial intelligence, computer graphics, robotics, cybersecurity, computer languages, microcomputers, VLSI, and large-scale hardware and software systems. The track is administered by the Department of Computer Science and Engineering and encompasses nearly all of the core material of the Computer Science degree, but its greater emphasis on design and engineering fundamentals prepares the student for registration as a professional engineer.

Program Mission
The mission of the Computer Engineering program is to provide students with an education that ensures an excellent understanding of hardware and software systems and the necessary system design and development skills, and that fosters professional curiosity and imagination that drives them throughout their career.

The program will stimulate and challenge the students with an exceptional, highly motivated faculty that shares its knowledge and excitement about Computer Engineering, well designed undergraduate and graduate curricula, research opportunities at all levels, and a first-class educational infrastructure.

The program strives to produce graduates who are well prepared to excel in industry, academia and government, and who will take on leadership roles in shaping the technological landscape of the future.

Program Objectives
1. Graduates of the program will have the necessary knowledge, both in breadth and depth, to pursue the practice, or advanced study, of Computer Engineering.
2. Graduates of the program will understand the importance of life-long learning, and be prepared to learn and understand new technological developments in their field.
3. Graduates of the program will understand the technical, social and ethical context of their engineering contributions.
4. Graduates of the program will develop the communication, teamwork, and leadership skills necessary to carry on the legacy of excellence of an Aggie Engineer.

Program Requirements
The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/ CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

| Total Semester Credit Hours | 31-32 |

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and cultural, and American history requirements if they are also on the approved list of international and cultural diversity (p. 47) courses and cultural discourse (p. 46) courses.
4. BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 119 or CHEM 107/ CHEM 117 and CHEM 120; Credit by Examination (CBE) for CHEM 119 plus CHEM 120; or 8 hours of CBE for CHEM 119 and CHEM 120. BMEN, CHEN and MSEN should take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/ CHEM 117.
5. For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

**Total Program Hours 128**

**Computer Science - BS**

The four-year undergraduate curriculum in Computer Science at Texas A&M provides a sound preparation in computing, as well as in science, mathematics, English, and statistics. Students take a broad set of core computer science courses in the early semesters, which exposes them to the main concepts in computing. During the later semesters, students take elective computer science courses drawn from four tracks (algorithms and theory, computer systems, software, and information and intelligent systems) to provide both breadth and depth. The electives can be used to tailor the curriculum to match the student’s interests. Graduate courses may be taken by qualified students for some of the electives.

A major in Computer Science includes a 12-hour area of concentration. This allows students to design a course of study that complements their computer science coursework and takes advantage of opportunities offered by other departments across the university.

**Program Mission**

The mission of the Computer Science program at Texas A&M University is to prepare intellectual, professional, and ethical graduates, capable of meeting the diverse and changing challenges in the field of computer science.

**Program Objectives**

1. Graduates who choose to enter the workforce will become productive and valuable professionals in their fields.
2. Graduates who choose to pursue advanced degrees will gain admission to graduate programs and will become successful graduate students.
