## BIOLOGICAL AND AGRICULTURAL ENGINEERING - BS, NATURAL RESOURCES ENGINEERING TRACK

Natural resource engineers apply their knowledge of physical and biological sciences, mathematics, engineering principles and engineering design to the preservation of environmental quality, and to biological systems and processes.

Must make a grade of C or better.

Entering students will normally be given a placement test in mathematics. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

The three hours of international and cultural diversity (https://catalog.tamu.edu/undergraduate/general-information/degree-information/international-cultural-diversity-requirements/) and three hours of cultural discourse (https://catalog.tamu.edu/undergraduate/general-information/degree-information/cultural-discourse-requirements/) courses, as required for graduation, may be met by courses that also satisfy a core curriculum course.

Select from CHEN 320; CVEN 302; MATH 304, MATH 417; MEEN 357;

STAT 211.

<sup>5</sup> All engineering students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the BAEN advising office.

All undergraduate students must take at least two (2) specific courses

in their major designated as writing intensive.
