

RANGELAND MANAGEMENT - MINOR

Overview

The minor in Rangeland Management is offered from the Department of Rangeland, Wildlife and Fisheries Management (RWFM) for undergraduate majors to further refine their studies. The minor, available to students in all majors (except for RWFM students within Rangeland Management), focuses on developing and integrating the disciplines of ecology and range management to best promote the production, conservation, function, and stewardship of rangelands found around the world. Our curriculum focuses on fundamental ecological and rangeland principles used in addressing leading challenges, such as watershed health, invasive exotic plant control and wildland fires.

An internship, RWFM 484, is available for minors above the required 18 hours.

Program Requirements

Code	Title	Semester Credit Hours
RWFM 202	Concepts in Applied Plant Biology	3
RWFM 302	Wildland Plants of North America	3
RWFM 314	Principles of Rangeland Management Around the World	3
RWFM 316	Range Ecology	3
Select two of the following:		6
RWFM 301	Wildland Watershed Management	
RWFM 313	Vegetation Sampling Methods and Designs in Ecosystems	
RWFM 317	Vegetation Management	
RWFM 349	Rangeland and Wildlife Animal Nutrition	
RWFM 411	Ecosystem Management	
Total Semester Credit Hours		18

Minimum required 2.5 GPA to declare minor.

Must make a grade of C or better in each course used towards minor.

Minimum of 6 hours at 300-400 level.
