

# AGRONOMY - MINOR

The minor in Agronomy prepares agricultural majors for a career in the nation's food, feed, fiber, greenspace, shelter and bioenergy industries.

The Department of Soil and Crop Sciences offers a minor in Agronomy. Exposure to this academic discipline could lead students to the pursuit of advanced degrees and a career in the field of agronomy or several related agricultural fields. Agronomy is the cornerstone of modern agriculture that provides the necessities of human existence at a level unprecedented in human history. Continued advancement in productivity must be made in order to feed, clothe, shelter, and meet other basic human needs as global population continues to expand.

Please speak with an advisor concerning courses prior to registering.

## Program Requirements

Code	Title	Semester Credit Hours
<b>Required Courses:</b>		
SCSC 105	World Food and Fiber Crops	3
	or SCSC 201 or Problem Solving in Plant and Soil Systems
