APPLIED MATHEMATICS - BS, MATH EMPHASIS

The curriculum in the Bachelor of Science in Applied Mathematics with a Mathematics emphasis explores the application of analytical problem-solving tools to concrete problems in technology and business. Students in the Mathematics emphasis investigate a broad array of techniques in applied and pure mathematics and pursue electives in related fields, such as computer science and statistics, that demonstrate how mathematics models challenges we face every day.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries or modern financial markets. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools, including PhD programs in Applied Mathematics or Mathematics. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.
