

# MATHEMATICS - BA

The curriculum in the Bachelor of Arts in Mathematics affords students to undertake a traditional liberal arts education in mathematics. Students in this program investigate a broad array of techniques in mathematics and pursue electives in related fields that demonstrate how mathematics is fundamental to the world at large. The degree is well suited for students interested in pursuing mathematics and some other area, and a minor field of study is required for this degree.

A student completing this program is prepared to enter the professional work force, or with appropriately chosen electives, to pursue professional degrees in various fields, including education, law, and medicine. Students in this degree can also pursue teaching certification programs. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.
