MATHEMATICS - BS

The curriculum in the Bachelor of Science in Mathematics explores mathematical problems and their interplay with science and engineering. Students in this program investigate a broad array of techniques in pure mathematics and pursue electives in science and related fields that demonstrate the crucial underpinnings of mathematics in our understanding of information, science, and technology.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries or modern financial markets. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools, including PhD programs in Mathematics. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.
