DEPARTMENT OF MANAGEMENT

The BBA in Management offers a broad range of career opportunities. A management student develops the ability to plan, organize, make decisions, communicate, and lead effectively in a variety of work settings. Written and verbal communication, teamwork, and problem solving are emphasized.

Management majors pursue a specialization, also called directed elective track, that allows for a focused area of study in one of the five following areas.

- **Consulting and General Management** - This track will appeal to students interested in problem-solving and helping individuals or organizations as they maneuver the business environment, whether the student anticipates working in the consulting industry or in any managerial role.

- **Entrepreneurial Leadership** - Designed for students interested in learning the entrepreneurial process, the role of creativity in identifying and/or developing entrepreneurial opportunities, the elements of a business plan, and the leadership practices associated with successful organizations.

- **Human Resource Management** - A career in human resources allows HR professionals to engage in the strategic management of an organization's human capital. Students in this track will learn how HR professionals develop and implement workplace policies and initiatives regarding employee recruiting, selection, compensation, training & development, performance management, career planning, and employee & labor relations.

- **Nonprofit Management** - For students seeking to invest themselves in a mission beyond profit-making and into the realm of social change for charitable, educational, religious, scientific, and other "public good" causes and organizations.

- **Pre-Law** - This track will expose students to opportunities that combine law and business, and could include careers in corporate law, international affairs, public policy, and conflict resolution, to name a few. Many students in this track will pursue a law or other advanced degree.

Combining theory and application both inside and outside the classroom allows the student to obtain the knowledge and competencies sought by and readily applied in organizations such as consulting firms, Fortune 500 companies, retail and services industries, nonprofit and charitable entities, governmental agencies, new ventures, and family businesses.

The Management major allows the student to select from a variety of jobs, organizations and industries within the student’s specialization or more broadly in management. It also provides a solid foundation for pursuing graduate studies in business, law, and a variety of other disciplines.
