AGSM 125 Introduction to Agricultural Systems Management  
Credit 1. 2 Lab Hours.
Introduction to technical management of agricultural systems using management projects presented by agricultural managers from industry; problem definition, information search, idea generation and development of management solutions.
Prerequisite: Freshman or sophomore classification or approval of instructor; majors only.

AGSM 201 Agricultural Energy and Power Systems  
Credits 3. 2 Lecture Hours. 2 Lab Hours.
(AGRI 2301) Agricultural Energy and Power Systems. A study of the types of power and energy sources used in agricultural equipment and systems; management considerations for selecting, operating and maintaining internal combustion engines, electric equipment and motors, and renewables as power sources.

AGSM 284 Internship  
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
No Credit. Practical experience working in a professional agricultural systems management setting. May be taken three times.
Prerequisite: Freshman or sophomore classification; approval of the instructor.

AGSM 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.
Selected problems in any phase of agricultural systems management; credit and specific content dependent upon background, interest, ability and needs of student enrolled; individual consultations and reports required.
Prerequisites: Freshman or sophomore classification; approval of the instructor.

AGSM 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural systems management. May be repeated for credit.
Prerequisite: Approval of instructor.

AGSM 291 Research  
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in agricultural systems management.
Prerequisites: Freshman or sophomore classification and approval of instructor.

AGSM 301 Systems Analysis in Agriculture  
Credits 3. 3 Lecture Hours.
Operations research and systems theory applied to management problems in food and agricultural industries; linear programming, queuing theory, simulation and critical path method; provides the knowledge and computer skills to better manage resources for the evolving agricultural industries.
Prerequisites: Grade of C or better in MATH 140 or MATH 168 and MATH 142 or MATH 151.

AGSM 310 Agricultural Machinery Management  
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Selection of a matched complement of power units and machines for farming operations; consider constraints such as crops, season, weather, personnel and capital; apply systems techniques such as linear programming, optimization, queuing theory and inventory models; utilize available software programs and learn to develop electronic spreadsheets and other customized software.
Prerequisites: AGSM 201; grade of C or better in AGSM 301 or concurrent enrollment; grade of C or better in PHYS 201.

AGSM 315/NFSC 315 Food Process Engineering Technology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elementary mechanics, physical and thermal properties of food and processing materials, heat transfer, mass and energy balances, psychrometrics (properties of air), insulation.
Prerequisites: Grade of C or better in PHYS 201 or PHYS 218, or approval of instructor.

AGSM 325 Agri-Industrial Applications of Electricity  
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elements of electric current generation and transmission, applications of electric heating, lighting and power, wiring, motors, energy rates, meter reading, safety rules and regulations.
Prerequisite: AGSM 201; AGSM majors or minors only.

AGSM 335 Water and Soil Management  
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elementary principles of surface and ground water supply, flood control, water distribution systems and irrigation systems; principles of drainage, soil conservation and erosion control; elementary surveying, chaining, leveling and mapping applied to agricultural and natural resource needs; illustrated by practical examples of terracing and farm pond design.
Prerequisite: Grade of C or better in MATH 140 or MATH 168; grade of C or better in CHEM 101 and CHEM 111, or CHEM 107 and CHEM 117, or CHEM 119; or approval of instructor.

AGSM 337 Technology for Environmental and Natural Resource Engineering  
Credits 3. 3 Lecture Hours.
For the nonengineering student in the environmental and management sciences; concentrates on the application of technology for solving local environmental problems while considering global issues; reduction of water, air and hazardous waste pollutants; legislative issues and modeling.
Prerequisites: Grade of C or better in MATH 140 or MATH 168 and MATH 142, or MATH 151 and MATH 152, or AGSM 301.

AGSM 360 Occupational Safety Management  
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Safety considerations in the work environment, including safety mandates, safety mission, personal and business liability, fire, chemical, dust, machine noise, personal protective devices; design and implementation of safety programs.
Prerequisite: Junior or senior classification.
AGSM 403 Processing and Storage of Agricultural Products  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Factors influencing the nature of biological materials and the preservation of quality throughout the harvesting, handling and processing system; a systems approach to cereal grains includes principles of drying, quality deterioration, storage, conveying and handling; processing of fiber crops.  
Prerequisites: AGSM 310 and AGSM 315/NFSC 315; or approval of instructor.  

AGSM 417/NFSC 417 Food Process Engineering Technology II  
Credits 3. 3 Lecture Hours.  
Applications of basic engineering concepts to understand common unit operations in the food (and related) industry.  
Prerequisites: AGSM 315/NFSC 315 or NFSC 315/AGSM 315; approval of instructor.  
Cross Listing: NFSC 417/AGSM 417.  

AGSM 435 Irrigation Principles and Management  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Principles of irrigation and management for efficient use of water; soil-water-plant relationships; methods of application; power and labor requirements; automated systems and components.  
Prerequisites: Grade of C or better in MATH 140 or MATH 168; grade of C or better in CHEM 101 and CHEM 111 or CHEM 119.  

AGSM 439 Management of Agricultural Systems I  
Credits 3. 3 Lecture Hours.  
Application of agricultural systems management principles in solving realistic problems faced by agribusiness managers; project selection from problems posed by biological and agricultural industrial consultants; project feasibility study and outline; management and application philosophy; teamwork and communication, economics; product liability and reliability; standards and codes; goal setting and time management.  
Prerequisites: Grade of C or better in AGSM 301, ENGL 210, AGSM 310, and AGSM 325; AGSM 335, AGSM 337 and AGSM 403 or concurrent enrollment; must be taken prior to AGSM 440; AGSM majors only.  

AGSM 440 Management of Agricultural Systems II  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Management of agricultural systems through team solution of management problems posed by agribusiness managers, farmers, extension specialists and other industry consultants; application of management principles to give experience in solving realistic problems faced by agribusiness managers; critical evaluation of results by students, staff and consultants.  
Prerequisites: COMM 203; grade of C or better in AGSM 439; should be taken last spring semester prior to graduation.  

AGSM 470 Agricultural Electronics and Control  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Technology of electronic systems in agricultural production and processing, sensors, actuators, and controllers, controller hardware and computer bases.  
Prerequisite: AGSM 325; or approval of instructor.  

AGSM 473 Project Management for Agricultural Systems Technology  
Credits 3. 3 Lecture Hours.  
Development of fundamental skill set in project management; basic knowledge of project management methods, tools and techniques; includes organization and life cycle, management processes, integration management, time management, cost management, quality management, communications management, risk management, procurement management, stakeholder management.  
Prerequisites: Grade of C or better in AGSM 301; senior classification.  

AGSM 477 Air Pollution Control and Regulatory Compliance  
Credits 3. 3 Lecture Hours.  
Overview of federal and state environmental regulations focusing on permitting requirements for agricultural operations; operation of air pollution abatement systems to include cyclones, bag filters, and scrubbers; dispersion modeling; National Ambient Air Quality Standards.  
Prerequisites: Grade of C or better in AGSM 301, or grade of C or better in MATH 168 and MATH 142, or equivalent.  

AGSM 481 Seminar  
Credit 1. 1 Lecture Hour.  
Professional development; ethics; career opportunities and topics of interest related to the practice of agricultural systems management.  
Prerequisite: Senior classification.  

AGSM 484 Internship  
Credits 0 to 6. 0 to 6 Other Hours.  
Practical experience working in a professional agricultural and/or food systems management setting. May be taken three times.  
Prerequisites: Junior or senior classification; approval of the instructor.  

AGSM 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Selected problems in any phase of agricultural systems management; credit and specific content depend on background and interest of student; individual consultations and reports required.  
Prerequisites: Junior classification; approval of department head; 2.0 GPR.  

AGSM 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Special topics in an identified area of agricultural systems management. May be repeated for credit.  

AGSM 491 Research  
Credits 0 to 3. 0 to 3 Lecture Hours.  
Research conducted under the direction of faculty member in agricultural systems management. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.
