CHEM 100 Horizons in Chemistry  
**Credit 1. 1 Lecture Hour.**  
An introduction to chemistry and its relationship to and influence on society; emphasis on chemical demonstrations and the practical application of chemical phenomena. For chemistry majors.  
**Prerequisite:** Major in chemistry or approval of instructor.

CHEM 106 Molecular Science for Citizens  
**Credits 3. 3 Lecture Hours.**  
(CHEM 1305, 1405*) Molecular Science for Citizens. Molecules that control daily life explored via a conceptual approach to molecular science; properties, synthesis, transformations and utility of important molecules and fuels, fibers, metals, pharmaceuticals, foods, biomolecules and structural materials; pollution, consumerism, energy production, disease, biotechnology and risk-benefit analysis considered.  
**Prerequisite:** Concurrent enrollment in CHEM 116; also taught at Galveston campus.

CHEM 107 General Chemistry for Engineering Students  
**Credits 3. 3 Lecture Hours.**  
(CHEM 1309, 1409*) General Chemistry for Engineering Students. Introduction to important concepts and principles of chemistry; emphasis on areas considered most relevant in an engineering context; practical applications of chemical principles in engineering and technology. Students completing CHEM 107 and changing majors to curricula requiring CHEM 101 and CHEM 102 may substitute CHEM 107 for CHEM 101. Only one of the following will satisfy the requirements for a degree: CHEM 107 and CHEM 101.  
**Prerequisite:** Concurrent enrollment in CHEM 117; also taught at Galveston campus.

CHEM 116 Molecular Science for Citizens Laboratory  
**Credit 1. 3 Lab Hours.**  
(CHEM 1105, 1405*) Molecular Science for Citizens Laboratory. The importance of molecular science to daily life illustrated by using experiments, demonstration and videos; designed to accompany CHEM 106.  
**Prerequisite:** CHEM 106 or registration therein; also taught at Galveston campus.

CHEM 117 General Chemistry for Engineering Students Laboratory  
**Credit 1. 3 Lab Hours.**  
(CHEM 1109, 1409*) General Chemistry for Engineering Students Laboratory. Introduction to important concepts and principles of chemistry in the laboratory; emphasis on areas considered most relevant in an engineering context; practical applications of chemical principles in engineering and technology. Students completing CHEM 117 and changing majors to curricula requiring CHEM 111 and CHEM 112 may substitute CHEM 117 for CHEM 111. Only one of the following will satisfy the requirements for a degree: CHEM 117 and CHEM 111.  
**Prerequisites:** CHEM 107 or registration therein; also taught at Galveston campus.

CHEM 119 Fundamentals of Chemistry I  
**Credits 4. 3 Lecture Hours. 3 Lab Hours.**  
(CHEM 1311 and 1111, 1411) Fundamentals of Chemistry I. Introduction to modern theories of atomic structure and chemical bonding; chemical reactions; stoichiometry; states of matter; solutions; equilibrium; acids and bases; coordination chemistry; methods and techniques of chemical experimentation; qualitative and semiquantitative procedures applied to investigative situations; also taught at Galveston campus.

CHEM 120 Fundamentals of Chemistry II  
**Credits 4. 3 Lecture Hours. 3 Lab Hours.**  
(CHEM 1312 and 1112, 1412) Fundamentals of Chemistry II. Theory and applications of oxidation-reductions systems; thermodynamics and kinetics; complex equilibria and solubility product; nuclear chemistry; descriptive inorganic and organic chemistry; introduction to analytical and synthetic methods and to quantitative techniques to both inorganic and organic compounds with emphasis on an investigative approach.  
**Prerequisites:** CHEM 119, or CHEM 107 and CHEM 117; also taught at Galveston campus.

CHEM 220 Physics and Chemistry of Inorganic Materials  
**Credits 3. 3 Lecture Hours.**  
Structure, properties and function of materials developed from an atomistic and molecular perspective emphasizing quantum chemical descriptions; elements of solid-state chemistry and physics including bonding, crystal structure and symmetry, origin of electronic band structure, synthesis and characterization tools in materials chemistry and role of finite size effects.  
**Prerequisites:** CHEM 102 and CHEM 120; concurrent enrollment in PHYS 208.

CHEM 222 Elements of Organic and Biological Chemistry  
**Credits 3. 3 Lecture Hours.**  
Organic chemistry and its applications to biological and agricultural chemistry, including chemistry of functional groups, acid-base and redox chemistry, stereochemistry and chemistry of important biological compounds. Not to be used as the basis for further study in organic chemistry or biochemistry.  
**Prerequisite:** CHEM 101, CHEM 119, or CHEM 107.

CHEM 227 Organic Chemistry I  
**Credits 3. 3 Lecture Hours.**  
(CHEM 2323, 2423*) Organic Chemistry I. Introduction to chemistry of compounds of carbon; general principles and their application to various industrial and biological processes.  
**Prerequisite:** CHEM 102 or CHEM 120; concurrent enrollment in CHEM 237 is suggested; also taught at Galveston campus.

CHEM 228 Organic Chemistry II  
**Credits 3. 3 Lecture Hours.**  
(CHEM 2325, 2425*) Organic Chemistry II. Continuation of CHEM 227.  
**Prerequisite:** CHEM 227; concurrent registration in CHEM 238 is suggested; also taught at Galveston campus.

CHEM 231 Techniques of Organic Chemistry  
**Credits 2. 1 Lecture Hour. 3 Lab Hours.**  
Techniques of organic chemistry; preparation, properties of typical organic compounds; separation, purification, analysis, and characterization of organic compounds.  
**Prerequisites:** CHEM 112 or CHEM 120; CHEM 227 or concurrent enrollment.

CHEM 234 Organic Synthesis and Analysis  
**Credits 3. 1 Lecture Hour. 6 Lab Hours.**  
The synthesis of significant types of organic compounds and study of their properties; laboratory separations of mixtures of organic substances, identification of compounds by functional group tests and preparation of derivatives; instrumental methods of separation, identification and analysis.  
**Prerequisites:** CHEM 228 or concurrent enrollment; CHEM 231 or CHEM 237.
CHEM 237 Organic Chemistry Laboratory  
Credit 1.3 Lab Hours.  
Prerequisites: CHEM 102 and CHEM 112, or CHEM 120; CHEM 227 or concurrent enrollment; also taught at Galveston campus.

CHEM 238 Organic Chemistry Laboratory  
Credit 1.3 Lab Hours.  
Prerequisites: CHEM 228 or registration therein; CHEM 237 or CHEM 231; also taught at Galveston campus.

CHEM 242 Elementary Organic Chemistry Laboratory  
Credit 1.3 Lab Hours.  
Prerequisites: CHEM 222 or registration therein.

CHEM 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Introduction to research, library and laboratory work designed for the freshman or sophomore students.  
Prerequisite: Approval of department head.

CHEM 289 Special Topics in...  
Credits 0 to 4. 0 to 4 Other Hours.  
Selected topics in an identified area of chemistry. May be repeated for credit.  
Prerequisite: Approval of instructor.

CHEM 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in chemistry. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

CHEM 310 Elements of Physical Chemistry  
Credits 3.3 Lecture Hours.  
Thermodynamics, Quantum theory, spectroscopy, reaction kinetics, electrochemistry and macromolecules; may not be used by chemistry majors.  
Prerequisites: CHEM 102 or CHEM 120; MATH 151 and MATH 152, MATH 140 and MATH 142, MATH 141 and MATH 142, or MATH 147 and MATH 148, or equivalent; PHYS 201 or PHYS 218, or PHYS 206 and PHYS 226; Galveston campus.

CHEM 311 Physical Chemistry Laboratory  
Credit 1.3 Lab Hours.  
Quantitative experiments designed to illustrate some principles of thermodynamics, quantum theory, kinetics and spectroscopy; may not be used by chemistry majors.  
Prerequisites: CHEM 310, CHEM 322, or CHEM 327, or concurrent enrollment; Galveston campus.

CHEM 315 Fundamentals of Quantitative Analysis  
Credits 3.3 Lecture Hours.  
Quantitative and statistical methods of analysis; solution chemistry; chemical equilibrium of analytically useful reactions; advanced analytical methods including electrochemistry, separations and kinetic methods.  
Prerequisite: CHEM 102 or CHEM 120.

CHEM 316 Quantitative Analysis  
Credits 2.2 Lecture Hours.  
Introductory quantitative chemical analysis; error propagation and statistics; chemical equilibrium for titrations of weak acids, polyprotic acids, and EDTA; basic chemical instrumentation including spectrophotometry, electrochemistry, and chromatography.  
Prerequisite: CHEM 102 or CHEM 120; also taught at Galveston campus.

CHEM 318 Quantitative Analysis Laboratory  
Credit 1.3 Lab Hours.  
Quantitative experiments involving physical chemistry principles in areas such as thermodynamics, electrochemistry, molecular structure and equilibria using modern instrumentation.  
Prerequisites: CHEM 112 or CHEM 120; CHEM 315 or CHEM 316, or concurrent enrollment; also taught at Galveston campus.

CHEM 320 Instrumental Analysis Laboratory  
Credits 2.6 Lab Hours.  
Experimental studies using modern spectroscopic, chromatographic and electroanalytical methods.  
Prerequisites: CHEM 317 or registration therein; CHEM 318.

CHEM 322 Physical Chemistry for Engineers  
Credits 3.3 Lecture Hours.  
Quantum theory, spectroscopy, statistical mechanics, kinetic theory, reaction kinetics, electrochemistry and macromolecules.  
Prerequisites: CHEM 102 or CHEM 120; CHEN 205 and CHEM 354; MATH 152 or equivalent; also taught at Galveston campus.

CHEM 325 Physical Chemistry Laboratory I  
Credit 1.3 Lab Hours.  
Quantitative experiments designed to typify operations of general analytical lab, including chemical analyses by volumetric and gravimetric methods; introduction to chemical measurements by spectroscopic and separations techniques and associated instrumentation.  
Prerequisites: CHEM 112 or CHEM 120; CHEM 315 or CHEM 316, or concurrent enrollment; also taught at Galveston campus.

CHEM 326 Physical Chemistry Laboratory II  
Credit 1.3 Lab Hours.  
Quantitative experiments involving physical chemistry principles in areas such as thermodynamics, electrochemistry, molecular structure and equilibria using modern instrumentation.  
Prerequisite: CHEM 327 or registration therein.

CHEM 327 Physical Chemistry I  
Credits 3.3 Lecture Hours.  
Introduction to quantum mechanics, exactly solvable model problems; many electron systems and approximate methods; chemical bonding and the electronic structure of molecules; rotational, vibrational, and electronic spectroscopy; molecular symmetry.  
Prerequisite: MATH 152 or MATH 172; MATH 221, MATH 251 or MATH 253 encouraged; PHYS 208; PHYS 218. Replaces CHEM 324 in previous catalogs.

CHEM 328 Physical Chemistry II  
Credits 3.3 Lecture Hours.  
A rigorous treatment of first, second, and third laws of thermodynamics; applications to gases (both ideal and real), liquids, solutions and phase equilibria; statistical thermodynamics; kinetic theory of gases; introduction to chemical kinetics.  
Prerequisite: CHEM 327. Replaces CHEM 323 in previous catalogs.
### CHEM 362 Descriptive Inorganic Chemistry
**Credits:** 3.3 **Lecture Hours.**
Introduction to inorganic chemistry with a focus on descriptive inorganic chemistry, bonding theories in inorganic molecules and in the solid state, redox chemistry, descriptive main group and transition metal chemistry; ligand field theory; molecular magnetism and electronic spectra in transition metal complexes.
**Prerequisites:** CHEM 102 or CHEM 120.

### CHEM 383 Chemistry of Environmental Pollution
**Credits:** 3.3 **Lecture Hours.**
Chemical pollutants in the air, in water and on land; their generation, chemical reactivity, action on environment and disappearance through chemical mechanisms; chemistry of existing pollution abatement.
**Prerequisites:** CHEM 102 or CHEM 104; junior or senior classification; also taught at Galveston campus.

### CHEM 415 Analytical Chemistry
**Credits:** 3.3 **Lecture Hours.**
Theory and practical aspects of modern instrumental methods of quantitative analysis; instrumental approaches to selectivity and sensitivity; examples of major, minor and trace component analysis.
**Prerequisite:** CHEM 315.

### CHEM 433 Advanced Inorganic Chemistry Laboratory
**Credits:** 2.6 **Lab Hours.**
Preparation, characterization and properties of bioorganic, organometallic and macromolecular inorganic compounds; special techniques (glove box manipulations and double-manifold Schlenk lines) for handling air-sensitive materials.
**Prerequisite:** CHEM 362 or registration therein.

### CHEM 434 Analytical Instrumentation Laboratory
**Credits:** 2.6 **Lab Hours.**
Practical application of modern instrumental methods of quantitative analysis; atomic and molecular techniques to conduct chemical characterizations and analyses.
**Prerequisites:** CHEM 318; CHEM 415 or concurrent enrollment.

### CHEM 446 Organic Chemistry III
**Credits:** 3.3 **Lecture Hours.**
Principles and applications of organic chemistry for students majoring in chemistry, chemical engineering, materials science, biological, and physical science; emphasis on chemical reactivity, mechanistic chemistry, and synthesis.
**Prerequisites:** CHEM 228 or approval of instructor.

### CHEM 456 Chemical Biology
**Credits:** 3.3 **Lecture Hours.**
Application of chemical principles to biological phenomena; capstone course for advanced students, integrating organic or inorganic chemistry with biology.
**Prerequisites:** CHEM 228 or equivalent; junior or senior classification.

### CHEM 462 Inorganic Chemistry
**Credits:** 3.3 **Lecture Hours.**
Periodic relationship of elements, their compounds, principles of their bonding and applications.
**Prerequisites:** CHEM 328 and CHEM 362.

### CHEM 464 Nuclear Chemistry
**Credits:** 3.3 **Lecture Hours.**
Properties of the nucleus; radioactivity; decay kinetics; nuclear masses; theory of radioactive decay; nuclear reactions; radiochemistry; nuclear energy; hands-on demonstrations; applications to non-nuclear problems.
**Prerequisites:** CHEM 322 or CHEM 327; CHEM 315 or CHEM 316 recommended; also taught at Galveston campus.

### CHEM 466 Polymer Chemistry
**Credits:** 3.3 **Lecture Hours.**
Mechanisms of polymerization reactions of monomers and molecular weight distributions of products; principles, limitations and advantages of most important methods of molecular weight determination; relationship of physical properties to structure and composition; correlations of applications with chemical constitution.
**Prerequisites:** CHEM 228 and CHEM 315 or equivalents.

### CHEM 468 Materials Chemistry of Inorganic Materials
**Credits:** 3.3 **Lecture Hours.**
Structure, bonding and reactivity of inorganic solids developed from a perspective emphasizing models of chemical bonding, symmetry and electronic structure; methods for characterizing extended periodic solids; descriptions of band structure and contrasts to molecular orbital theory; synthetic routes, quantum confinement and finite size effects of relevance to nanoscale materials.
**Prerequisites:** Grade of C or better in CHEM 102 or CHEM 120; PHYS 208; junior or senior classification.

### CHEM 470 Industrial Chemistry
**Credits:** 3.3 **Lecture Hours.**
Applications of organic and inorganic chemical reactions in the manufacture of commercial products; chemistry of petroleum refining and petrochemical processing; industrial polymerization processes; commodity and fine chemical production; influence of kinetics and thermodynamics on economics of industrial chemical production; pollution abatement technology.
**Prerequisites:** CHEM 228; junior or senior classification.

### CHEM 481 Seminar
**Credits:** 2.2 **Lecture Hours.**
Preparation of oral and written reports on selected topics from recent technical publications.

### CHEM 483 Green Chemistry
**Credits:** 3.3 **Lecture Hours.**
Environmentally benign chemistry; the design of chemical products and processes that reduce or eliminate the use and generation of hazardous substances; twelve principles of Green Chemistry; atom economy; use of renewable resources; catalysis for Green Chemistry; alternative solvents and reaction media; energy and the environment.
**Prerequisites:** CHEM 228; CHEM 362 recommended; junior or senior classification; also taught at Galveston campus.

### CHEM 485 Directed Studies
**Credits:** 1 to 16.1 to 16 **Other Hours.**
Introduction to research, library and laboratory work.
**Prerequisites:** Senior classification and approval of chemistry advisor; also taught at Galveston campus.

### CHEM 489 Special Topics in...
**Credits:** 1 to 4.1 to 4 **Lecture Hours.**
Selected topics in an identified area of chemistry; also taught at Galveston campus. May be repeated for credit.
CHEM 491 Research
Credits 0 to 10. 0 to 10 Other Hours.
Active research of basic nature under the supervision of Department of Chemistry faculty member. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Chemistry major; junior classification or approval of chemistry advisor.
