GEOS - GEOSCIENCES (GEOS)

GEOS 105 Introduction to Environmental Geoscience
Credits 3. 3 Lecture Hours. Key concepts and generalizations of global environmental issues within an Earth systems science framework including climate change, air pollution, land and coastal degradation, water resources and pollution, and habitat loss; environmental ethics, economics and politics; environmental issues in Texas. Enrollment preference will be given to environmental geoscience and environmental studies majors.

GEOS 205 Environmental Geosciences Cornerstone
Credit 1. 1 Lecture Hour. Professional career options, methods, strategies and skills involved in successful career planning in the environmental sciences; highlights high impact learning opportunities such as study abroad and internships and the development of scientific communication skills. Prerequisites: ENST and ENGS majors; sophomore classification or approval of instructor.

GEOS 405 Environmental Geosciences
Credits 3. 2 Lecture Hours. 2 Lab Hours. Dynamics and human interactions with near-surface environments including land, atmosphere and oceans through problem-based learning; interdisciplinary environmental problem topic, for example, water quality, urbanization, coastal development, or environmental pollution; geoscience techniques used for monitoring human-geosphere interaction. Prerequisites: GEOS 105; junior or senior classification.

GEOS 430 Global Science and Policy Making
Credits 3. 3 Lecture Hours. Policy making derived from global science and technology; how advice is communicated to the federal government and the public; current and future societal concerns that could affect future policy making; knowledge and information used to set priorities, decide budget allocations, and establish public policy. Prerequisite: Junior or senior classification or approval of instructor.

GEOS 431 Environmental Regulatory Compliance in Geoscience
Credits 3. 3 Lecture Hours. Knowledge and practical experience necessary for analyzing and evaluating environmental protection and stewardship principles; application of evolving environmental laws and regulations to the human business enterprise; exploration of the interplay between stakeholders in the development of sound environmental management and regulatory strategies. Prerequisites: BESC 367 or approval of instructor; junior or senior classification.
