## KINESIOLOGY - 5-YEAR BACHELOR OF SCIENCE AND MASTER OF SCIENCE IN ATHLETIC TRAINING

The combined degree program (3+2) allows undergraduate Kinesiology students to enter the Master of Science in Athletic Training program the beginning of their fourth year at Texas A&M University and earn a Bachelor of Science in Kinesiology and a Master of Science in Athletic Training (MSAT) degree in five years.

Students will follow departmental requirements for admission into the professional phase of the BS in Kinesiology. Kinesiology majors who have at least a 3.25 GPA by the end of fall semester of their junior year and who will have completed all of their prescribed courses by the spring of their junior year will be eligible to apply for the five-year program.

Applicants to the five-year program will submit the same materials as other MSAT applicants by the spring deadline of their junior year, and those who meet all minimum requirements, including having earned a B or better in ATTR 201, ATTR 202, ATTR 301, ATTR 302, will receive placement in the MSAT program. The admissions criteria for the five-year program will be the same as for other MSAT students.

Students continuing into the  $4^{th}$  year of the 3+2 combined program must finish all of the required hours to obtain both the Bachelor's and Master's degrees. Students will be conferred with two degrees once they complete the  $5^{th}$  year of the concurrent program.

Students in the 3+2 combined program will be required to complete the same two-year curriculum as other students admitted to the MSAT program. Students will take undergraduate courses, and graduate course work which will be applied to the undergraduate degree. Students are required to maintain a 3.25 GPA through the first 24 hours of graduate course work at which time the student must maintain a 3.0 GPA. Students continuing in the 3+2 program will change from U4 to G7 status when they complete 96 hours.

Students not accepted or unable to continue with the 3+2 program may complete the remaining requirements for the BS degree in Kinesiology in a concentration that is most suitable to their needs (e.g., Motor Behavior, Applied Exercise Physiology). These students may apply to the traditional (4+2) graduate degree program.

## **Program Requirements**

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the program. The undergraduate portion of the plan is a suggested plan and should be followed closely. There may be some modifications in course order that can occur but students should consult with the departmental academic advisor for the combined degree program before changes are made in order to ensure they are meeting all requirements.

First Year Fall		Semester Credit Hours	
BIOL 111	Introductory Biology I 1	4	
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition <sup>1</sup> or Composition and Rhetoric	3	
KINE 121	Physical and Motor Fitness Assessment <sup>1,2</sup>	2	
PBSI 107	Introduction to Psychology	3	
Select one of the following: 1			
MATH 140	Mathematics for Business and Social Sciences

- <sup>I</sup> Must make a grade of C or better.
- <sup>2</sup> Must be taken at Texas A&M University
- Must make a grade of B or better.
- Activities should be chosen in consultation with your advisor.

  Participation in band or athletics cannot be used for KINE 199 credit.

  KINE 199 activities cannot be repeated for credit and must be taken for a grade.
- <sup>5</sup> Course must meet core curriculum requirements.
- Course selection should meet the International and Cultural Diversity (http://catalog.tamu.edu/undergraduate/general-information/degree-information/international-cultural-diversity-requirements/) and/or Cultural Discourse (http://catalog.tamu.edu/undergraduate/general-information/degree-information/cultural-discourse-requirements/) graduation requirement if needed.
- Meets core curriculum writing requirement.
- <sup>8</sup> Course will count in undergraduate and graduate program.

Students may elect to take PHYS or CHEM courses during the Summer semester between freshman and sophomore year to reduce the Fall load.

The program includes a total of 181 hours which up to 24 hours may be applied toward both the Bachelor of Science in Kinesiology and the Master of Science in Athletic Training.
