DEPARTMENT OF KINESIOLOGY AND SPORT MANAGEMENT

The department offers Bachelor of Science degrees in Kinesiology and Sport Management. Kinesiology majors can choose from a variety of tracks to best suit their professional preparation. Sport Management majors apply for a Culminating Experience and can choose between an internship, research, international experience or capstone to support their professional goals. All students majoring in the department are assigned an advisor in accordance with their career choice.

The curricula offer opportunities to obtain professional preparation for careers such as sport managers, clinical and applied exercise physiologists, exercise scientists, recreational leaders, sports marketing professionals, coaches and athletic administrators. The department also provides academic preparation for students interested in athletic training and medical-related professional schools, (e.g., physical therapy, occupational therapy, physicians' assistant or medicine). Students in Kinesiology and Sport Management are provided opportunities for practical experiences as well as undergraduate research and directed studies under the guidance of experienced faculty members.

In addition to undergraduate degrees, the department offers a broad array of activity-based electives as well as core curriculum courses in Life and Physical Science; Social and Behavioral Science; Creative Arts; Language, Philosophy and Culture; and International and Cultural Diversity. The Kinesiology and Sport Management graduate program includes Master of Science and Doctor of Philosophy degrees.

Departmental Advising

Because of the wide variety of careers in Kinesiology and Sport Management and the difference in course requirements for each, it is essential for students to take advantage of the opportunity to work with their academic advisor during their time at Texas A&M. Students are assigned to an academic advisor in accordance with their degree choice and are encouraged to consult with their advisor on course sequencing and timing for completion of degree plan requirements. It is recommended that students declare career intentions early so appropriate coursework may be planned. The advisors in the Undergraduate Advising Office (https://education.tamu.edu/undergraduate-advising/) handle all undergraduate advising matters. Information concerning entrance to professional schools in health-related fields is available from the Office of Professional School Advising.

Students are encouraged to become engaged in professional organizations and extracurricular activities that afford opportunities for involvement in their respective professions.
