CHEMICAL ENGINEERING - BS

The chemical engineering curriculum provides a balanced education in virtually all aspects of chemical engineering principles and practice and includes education in economics, language, philosophy and culture and communication. Chemical engineering courses emphasize fundamentals and methods that are applicable to the analysis, development, design and operation of a wide variety of chemical engineering systems and processes, thereby providing the necessary background for entry into the wide array of activities described above. At the same time, specific example applications provide the student with insight into the ability of chemical engineers to work in such a variety of areas. The curriculum is structured to offer students an opportunity to extend and apply the fundamentals developed in the basic courses toward more focused areas of specialization. The sequence of courses converges in the senior year into a comprehensive capstone design course that includes elements of economics, safety and environmental issues. The course provides an experience much like that of an industry design project. It is this philosophy of fundamentals, applications and design that has enabled our chemical engineering graduates to adapt readily to a dynamic and rapidly changing world and to solve problems they have not previously experienced.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/ CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

PHYS 207  Electricity and Magnetism for Engineering and Science 3

Semester Credit Hours 15

Spring

CHEM 228 Organic Chemistry II 4
& CHEM 238 and Organic Chemistry Laboratory 1
CHEN 205 Chemical Engineering Thermodynamics I 3
ENGL 210 Technical and Business Writing 3
MATH 308 Differential Equations 1 3
University Core Curriculum (http://catalog.tamu.edu/undergraduate/general-information/university-core-curriculum/) 3

Semester Credit Hours 16

Third Year

Fall

CHEN 304 Chemical Engineering Fluid Operations 3
CHEN 320 Numerical Analysis for Chemical Engineers 3
CHEN 322 Chemical Engineering Materials 3
CHEN 354 Chemical Engineering Thermodynamics II 3
University Core Curriculum (http://catalog.tamu.edu/undergraduate/general-information/university-core-curriculum/) 3
Science Elective 6 3

Semester Credit Hours 18

Spring

CHEM 322 Physical Chemistry for Engineers 1 3
CHEN 323 Chemical Engineering Heat Transfer Operations 3
CHEN 324 Chemical Engineering Mass Transfer Operations 3
CHEN 364 Kinetics and Reactor Design 3
University Core Curriculum (http://catalog.tamu.edu/undergraduate/general-information/university-core-curriculum/) 3
High Impact Experience 7 0

CHEN 399 Mid-Curriculum Professional Development 3

Semester Credit Hours 17

Fourth Year

Fall

CHEN 425 Process Integration, Simulation and Economics 3
CHEN 432 Chemical Engineering Laboratory I 2
CHEN 461 Process Dynamics and Control 3
CHEN 481 Seminar 1
CHEN 482 Bioprocess Engineering 3
CHEN specialty options 6 3

Semester Credit Hours 15

Spring

CHEN 426 Chemical Engineering Plant Design 3
CHEN 433 Chemical Engineering Laboratory II 2
CHEN 455/SENG 455 Process Safety Engineering 3

University Core Curriculum (http://catalog.tamu.edu/undergraduate/general-information/university-core-curriculum/) 6
CHEN specialty options 6 3

Semester Credit Hours 17

Total Semester Credit Hours 96

6 For a list of approved specialty options, please see a chemical engineering advisor.
7 All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the CHEN advising office.

A grade of C or better is required in all CHEN courses.

Total Program Hours 128
