# CIVIL ENGINEERING - BS, GENERAL CIVIL ENGINEERING TRACK

The General Civil Engineering Track to fulfill the BS in Civil Engineering degree emphasizes breadth across the civil engineering field. Students take courses in all major sub-disciplines of civil engineering with advanced design and focus electives allowing deeper learning in selected areas. The track is appropriate for a career in any area of civil engineering, with particular relevance for those interested in public works, land development, and general civil, and for those planning on further specialization in graduate studies.

## Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is identical for degrees in aerospace engineering, mechanical engineering, and petroleum engineering technology, environmental engineering, industrial, nuclear, ocean, and petroleum engineering. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

---

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (http://catalog.tamu.edu/undergraduate/general-information/degree-information/international-cultural-diversity-requirements/) courses and cultural discourse (http://catalog.tamu.edu/undergraduate/general-information/degree-information/cultural-discourse-requirements/) courses.
4. BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.
5. For BS-PETE, allocate 3 hours to core communications course (ENG 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENG 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.
Civil Engineering - BS, General Civil Engineering Track

Spring
CVEN 302 Computer Applications in Engineering and Construction 3
CVEN 303 Civil Engineering Measurement 3
CVEN 305 Mechanics of Materials 3
CVEN 311/EVEN 311 Fluid Dynamics 3
ENGL 210 or COMM 205 Technical and Professional Writing or Communication for Technical Professions 3
MATH 308 Differential Equations 3

Semester Credit Hours 18

Third Year
Fall
CVEN 306 Materials Engineering for Civil Engineers 3
CVEN 322 Civil Engineering Systems 3
CVEN 345 Theory of Structures 3

University Core Curriculum (http://catalog.tamu.edu/undergraduate/general-information/university-core-curriculum/) 3

Semester Credit Hours 15

Total Semester Credit Hours 97

6 A total of 35 hours of technical coursework is required. Technical coursework is divided into five categories: breadth courses, design courses, focus courses, a science course, and a capstone design course. The total number of hours between breadth, design, and focus courses must add up to 29 hours. The choice of courses to be taken in each of the five categories depends on the track chosen and must be made in consultation with the student's advisor and/or the Civil and Environmental Engineering Undergraduate Student Services Office to ensure pre- and co-requisites are satisfied. Capstone design courses must include more than one civil engineering context.

7 All students must take at least two courses in their major that are designated as writing intensive (W). CVEN 207 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

Total Program Hours 128

General Civil Engineering Track - Technical Coursework

Technical coursework for the BS in Civil Engineering, General Civil Engineering Track are composed of breadth courses (18 semester credit hours), design courses (6-9 semester credit hours), focus courses (2-5 semester credit hours), a science course (3 semester credit hours), and a capstone design course (3 semester credit hours), as delineated below, for a total of 35 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil and Environmental Engineering Undergraduate Student Services Office.

Code Title Semester Credit Hours

BREADTH
CVEN 301/EVEN 301 Environmental Engineering 3
CVEN 307 Transportation Engineering 3
CVEN 339/EVEN 339 Water Resources Engineering 3
CVEN 342 Materials of Construction 3
or CVEN 343 Portland Cement Concrete Materials for Civil Engineers 3
CVEN 349 Civil Engineering Project Management 3
CVEN 365 Introduction to Geotechnical Engineering 3

DESIGN
CVEN 444 Structural Concrete Design 3
Select 3-6 hours from the following: 3-6
CVEN 402/EVEN 402 Engineered Environmental Systems
CVEN 418 Highway Materials and Pavement Design
CVEN 435 Geotechnical Engineering Design
CVEN 455 Urban Stormwater Management
CVEN 457 Urban Traffic Facilities
CVEN 458/Distribution Systems
CVEN 462/Engineering Hydrogeology
CVEN 465 Coastal Resilience
CVEN 473 Engineering Project Estimating and Planning
Select 0-3 hours from the following: 0-3
CVEN 446 Structural Steel Design
**FOCUS**
Select 2 hours from the following:

- CVEN 314 Sensor Technology in Civil Engineering
- CVEN 336 Fluid Dynamics Laboratory
- CVEN 403 Applied Civil Engineering Surveying
- CVEN 449 Visualization and Building Information Modeling in Structural Engineering Design
- CVEN 450 AutoCAD in Civil Engineering
- CVEN 485 Directed Studies
- CVEN 491 Research

Select 0-3 hours from the following:

- CVEN 315 Sensor Technology for the Built Environment
- CVEN 405 Construction Management of Field Operations
- CVEN 406 Environmental Protection and EVEN 406 Public Health
- CVEN 413 Natural Environmental Systems EVEN 413
- CVEN 417 Bituminous Materials
- CVEN 423 Geomatics for Civil Engineering
- CVEN 445 Matrix Methods of Structural Analysis
- CVEN 451 Public Works Engineering
- CVEN 454 Urban Planning for Engineers
- CVEN 463 Engineering Hydrology EVEN 463

**SCIENCE**
Select 3 hours from the following:

- ATMO 201 Weather and Climate
- ATMO 363 Introduction to Atmospheric Chemistry and Air Pollution
- BESC 201 Introduction to Bioenvironmental Sciences
- BIOL 113 Essentials in Biology
- ECCB 205 Fundamentals of Ecology
- GEOG 203 Planet Earth
- GEOL 104 Physical Geology
- GEOL 320 Geology for Civil Engineers
- GEOS 105 Introduction to Environmental Geoscience
- OCNG 310 Physical Oceanography
- RWFM 375 Conservation of Natural Resources

**CAPSTONE DESIGN**

- CVEN 400 Design Problems in Civil Engineering
- or CVEN 481 Analysis and Design of Structures

---

1. The following courses satisfy the laboratory course requirement, CVEN 342 or CVEN 343, CVEN 365.
2. Only one of the following courses, CVEN 314 or CVEN 315, can be used to meet the focus elective.
3. Up to 2 hours of CVEN 485 or CVEN 491 may be used. A proposal must be submitted to the undergraduate office and approved before credit can be awarded towards the degree.
