ENVIRONMENTAL
ENGINEERING - BS

The BS in Environmental Engineering degree coursework is specifically
designed to educate students to solve environmental challenges facing
public and environmental health, such as water treatment, waste
management and climate change. The degree offers a broad range
of coursework in the natural sciences and engineering, providing a
multidisciplinary approach that merges with engineering principles
to solve emerging and existing environmental issues. The program is
appropriate for those who wish to protect human health and welfare while
minimizing the adverse effects of human activity on the environment.

This program is approved to be offered at the Texas A&M University at
Galveston campus.

Program Requirements

The freshman year is identical for degrees in aerospace engineering,
architectural engineering, civil engineering, computer engineering,
computer science, electrical engineering, electronic systems engineering
technology, environmental engineering, industrial distribution, industrial
engineering, interdisciplinary engineering, manufacturing and mechanical
engineering technology, mechanical engineering, multidisciplinary
engineering technology, nuclear engineering, ocean engineering, and
petroleum engineering (Note: not all programs listed are offered in
Qatar). The freshman year is slightly different for chemical engineering,
petroleum engineering (Note: not all programs listed are offered in
Galveston campus).

Semester Credit Hours 18

1 A grade of C or better is required.
2 Entering students will be given a math placement exam. Test results
will be used in selecting the appropriate starting course which may be
at a higher or lower level.
3 Of the 21 hours shown as University Core Curriculum electives, 3 must
be from creative arts (see AREN curriculum for more information), 3
from social and behavioral sciences (see IDIS curriculum for more
information), 3 from language, philosophy and culture (see CVEN,
EVEN and PETE curriculum for more information), 6 from American
history and 6 from government/political science. The required 3
hours of international and cultural diversity and 3 hours of cultural
discourse may be met by courses satisfying the creative arts, social
and behavioral sciences, language, philosophy and culture, and
American history requirements if they are also on the approved list
of international and cultural diversity (http://catalog.tamu.edu/
undergraduate/general-information/degree-information/international-
cultural-diversity-requirements/) courses and cultural discourse
(http://catalog.tamu.edu/undergraduate/general-information/degree-
information/cultural-discourse-requirements/) courses.
4 BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry
which are satisfied with CHEM 119 or CHEM 107/ CHEM 117 and CHEM 120.
Students pursuing degrees in biological and agricultural engineering
should refer to the specific curriculum for this major. It is recognized that
many students will change the sequence and number of courses taken in
any semester. Deviations from the prescribed course sequence, however,
should be made with care to ensure that prerequisites for all courses are met.

Total Semester Credit Hours  97

6 All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the EVEN advising office.
7 All students must take at least two courses in their major that are designated as writing intensive (W) or communications intensive (C). EVEN 201 and EVEN 400 taken at Texas A&M satisfy this requirement.
Other EVEN courses may be approved as W/C courses at a later date. A grade of C or better is required in these courses.

Select from ATMO 363; BAEN 464, BAEN 468; BESC 357, BESC 367, BESC 403; CVEN 306, CVEN 307, CVEN 315, CVEN 454, CVEN 455, CVEN 465; ECCB 420; GEOG 467, GEOS 410; OCEN 362; OCNG 350; SCSC 405; SENG 310.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

**Total Program Hours 128**
