# CYBER OPERATIONS - CERTIFICATE

The certificate in Cyber Operations was created for students who have a deeply technical education with a particular emphasis on technologies and techniques related to specialized cyber operations (e.g., collection, exploitation, and response), critical to intelligence, military, and law enforcement organizations authorized to perform these specialized operations. This curriculum supports Texas A&M's designation as a Center of Academic Excellence in Cyber Operations by the National Security Agency.

## Program Requirements

| Code | Title | Semester Credit Hours |
|------|-------|----------------------:|
| CSCE 402 | Law and Policy in Cybersecurity | 3 |
