ELECTRICAL ENGINEERING -BS

The Department of Electrical and Computer Engineering at Texas A&M University offers a Bachelor of Science degree option to its undergraduate students desiring to major in Electrical Engineering.

Electrical engineers design, develop, test and supervise the manufacture of sophisticated electrical and electronic systems such as: cell phones, iPods, digital TVs, medical imaging, smart appliances, automobiles and advanced satellite systems. Many electrical engineers also work in areas closely related to computers. Areas of specialization include analog and mixed-signal electronics; biomedical imaging, sensing and genomic signal processing; computer engineering and systems; device science and nanotechnology; energy and power; electromagnetics and microwaves; and information science and systems.

The bachelor's degree program in electrical engineering has been accredited by the Engineering Accreditation Commission of ABET (http:// www.abet.org/). With ABET accreditation, students, parents, employers and the society we serve can be confident that a program meets the quality standards that produce graduates prepared to enter a global workforce.

Program Mission

The mission of the electrical engineering program is threefold:

- To create new knowledge and challenge young minds by participation in the process of discovery and invention;
- To educate electrical engineers with a solid background of fundamentals, stretching their imagination, and preparing them for an exciting future; and
- To serve the society through research, education, and outreach activities.

Program Educational Objectives

The educational objectives of the electrical engineering program are to produce graduates whose expected accomplishments within a few years of graduation are:

- 1. Graduates who choose to pursue a career in industry or government will become productive and valuable electrical engineers.
- Graduates who choose to pursue advanced degrees will be able to gain admission to graduate programs and succeed in top graduate programs.
- Graduates will lead and work effectively on diverse teams to promote a breadth of perspectives in developing, communicating, and executing solutions across a broad range of electrical engineering application areas.
- 4. In keeping with the legacy of an Aggie Engineer, graduates will be successful in attaining positions of leadership in their professional careers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department. The full bachelors program is offered on College Station and Qatar campuses. All electrical engineering undergraduate coursework is offered on both campuses.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours		
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3		
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1		
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	3		
ENGR 102	Engineering Lab I - Computation ¹	2		
MATH 151	Engineering Mathematics I ^{1,2}	4		
University Core Curriculum (http://catalog.tamu.edu/ undergraduate/general-information/university-core- curriculum/) ³				
	Semester Credit Hours	16		
Spring				
ENGR 216/ PHYS 216	Experimental Physics and Engineering Lab II - Mechanics ¹	2		
MATH 152	Engineering Mathematics II ¹	4		
PHYS 206	Newtonian Mechanics for Engineering and Science ¹	3		
University Core Curriculum (http://catalog.tamu.edu/ undergraduate/general-information/university-core- curriculum/) ³				
Select one of the following:		3-4		
CHEM 120	Fundamentals of Chemistry II ^{1,4}			
University Core Curriculum (http://catalog.tamu.edu/ undergraduate/general-information/university-core- curriculum/) ^{3,5}				
	Semester Credit Hours	15-16		
	Total Semester Credit Hours	31-32		

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (http://catalog.tamu.edu/ undergraduate/general-information/degree-information/internationalcultural-diversity-requirements/) courses and cultural discourse (http://catalog.tamu.edu/undergraduate/general-information/degreeinformation/cultural-discourse-requirements/) courses.

- ⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.
- ⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

Second Year

	Semester Credit Hours	16
COMM 243	Argumentation and Debate	
COMM 205	Communication for Technical Professions	
ENGL 210	Technical and Professional Writing	
Select one of the following: ¹		3
ECEN 340	Electric Energy Conversion ¹	3
ECEN 325	Electronics ¹	4
ECEN 322	Electric and Magnetic Fields ¹	3
ECEN 314	Signals and Systems ¹	3
Fall		
Third Year		
	Semester Credit Hours	16
PHYS 222	Modern Physics for Engineers ¹	3
MATH 311	Topics in Applied Mathematics I ¹	3
MATH 308	Differential Equations ¹	3
ECEN 250	Machine Learning for Electrical Engineering	3
ECEN 214	Electrical Circuit Theory ¹	4
Spring		
	Semester Credit Hours	15
PHYS 217/ ENGR 217	Experimental Physics and Engineering Lab III - Electricity and Magnetism ¹	2
PHYS 207	Electricity and Magnetism for Engineering and Science ¹	3
MATH 251	Engineering Mathematics III ¹	3
ECEN 248	Introduction to Digital Systems Design ¹	4
CSCE 120	Program Design and Concepts ¹	3
		Credit Hours
