The complexities of the current environment are such that all resources must be used in the best possible manner. Thus, the College of Engineering, through its curricula, strives to educate and train engineers who have the breadth of vision to formulate and solve the problems of today and the future. It is expected that a student who conscientiously applies himself or herself and successfully completes an engineering program will be technically trained and socially educated, thereby being well prepared to make a significant contribution to the world in which he or she works.
Entrance and Enrollment Requirements

The minimum requirements for entrance to the University are listed in the earlier pages of this catalog. Because of the importance of science and mathematics to engineering, high school students who aspire to pursue a career in engineering are encouraged to take as many of these courses as possible. In particular, high school preparation should include four years of mathematics and four years of science emphasizing algebra, geometry, trigonometry, calculus, chemistry, physics and biology.

A critical step in an engineering education is proper individual placement in the first courses undertaken. The College of Engineering strongly recommends the following guidelines to students participating in the math advanced placement examinations in high school. Incoming engineering students can earn advanced placement (AP) credits for MATH 151 with a score of 4 on the Calculus AB exam or 3 on the BC exam, and for MATH 151 and MATH 152 by a score of 4 on the BC exam. While the student can accept these AP credits and enroll in the next course in the engineering mathematics sequence, the college recommends a more conservative decision about accepting advanced placement credits in math. Students who earn a 4 or 5 on the Calculus AB exam or a 3 or 4 on the BC exam are recommended to begin in MATH 151. Students who score a 5 on the Calculus BC exam are recommended to begin in MATH 151 or MATH 152. These conservative recommendations help ensure students have thoroughly mastered the content that is fundamental to the engineering curriculum. Students should discuss their choice with their assigned undergraduate academic advisor before registering for mathematics classes. At New Student Conferences, associated Credit by Examination tests provide information to advisors so that students begin at a level which may differ from the printed curriculum, but is appropriate to their aptitudes and background.

All students admitted into engineering are required to complete the Math Placement Exam (MPE) and should review algebra, trigonometry and geometry prior to taking the MPE.

Because of the importance of computing in the disciplines housed within the College of Engineering, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program, as well as other required technology. Details about the personal computer needed to meet the requirement can be found on our website. No student will be denied admission to Texas A&M University based on an inability to purchase a computer.

Students in General Engineering, Texas A&M Engineering at Blinn, and Engineering at Galveston, Engineering at McAllen, or the Texas A&M Engineering Academy Programs must be in a major in the first year curriculum requirements over the course of at least two semesters before applying to an engineering major. Two engineering courses, two math courses, and two science courses. The entry-to-a-major (ETAM) process enables students to take ownership of their future by identifying at least three majors that are a good match for their academic and career goals. The ETAM process is designed to place students in the highest rank major possible based upon academic performance, ETAM application content, and program capacities. Students are encouraged to be in a major as early as possible. Students in General Engineering, Texas A&M Engineering at Blinn, Engineering at Galveston, Engineering at McAllen, or the Texas A&M Engineering Academy Programs must be in a major by the end of the fourth semester.

Transfer students are admitted directly to a major degree granting program through the admissions process.

First Year Curriculum

Students in General Engineering, Texas A&M Engineering at Blinn, and Engineering at Galveston, Engineering at McAllen, or the Texas A&M Engineering Academy Programs follow a common first year engineering curriculum. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care and in consultation with an academic advisor to ensure that prerequisites for all courses are met.

Bring Your Own Device (BYOD)

Just as students are required to have specific textbooks and supplies in order to gain the highest quality engineering educational experience, the College of Engineering requires students to purchase a computer to complement the course instruction. The vast majority of the students entering the College already bring some form of desktop or laptop computer with them when they begin school. Unfortunately, the variation in the types of computers makes it next to impossible for instructors to routinely ask students to use their own computers in the classroom. A computer designated by the College and purchased by entering students will provide students the convenience to explore course content anytime, anywhere.

While there are many computers available, the College can only guarantee performance and provide support for the specific computers identified by the College of Engineering. These computers will accommodate most of the needs of an engineering student throughout a four-year degree plan, balancing performance, cost and expected life of the computer. The computers have been negotiated with the various vendors, which are external to Texas A&M University, at a price point that is lower than...
what an individual would likely be able to negotiate. The price for each
computer includes up to a four-year warranty.

For financial aid recipients, purchase of the computer device can
be considered in the cost of attendance. To request this, please
complete the Request to Change Cost of Attendance form (http://
financialaid.tamu.edu/Forms/) for Scholarships & Financial Aid.
Submission of documentation does not guarantee additional aid will be
awarded. In certain situations, students may not be eligible for additional
funding.

Your engineering education requires a computer to complement the course
instruction. Undergraduate students entering the college of engineering
are strongly encouraged to purchase from our list of recommended and
supported devices (https://engineering.tamu.edu/academics/byod/
devices/). Doing so guarantees performance, and hardware and software
support throughout your years here as an engineering student. Should
you choose a device not on this list, know that we cannot guarantee that
the required software will run effectively, or that our IT team will be able
to support your device. No student will be denied admission to Texas A&M
University based on an inability to purchase a computer.

Texas A&M Engineering students co-enrolled in the Texas A&M Engineering
Academies (https://engineering.tamu.edu/academies/) must apply for
financial aid from the partner community college. Any questions about
including the purchase of a computer in the cost of attendance should be
directed to the community college financial aid office.

For more information, including specific requirements, visit the Bring Your
Own Device (BYOD) web page (http://engineering.tamu.edu/easa/areas/
academics/byod/).

**ENGR**[^x]

**ENGR**[^x] is a college-wide, zero-credit-hour required program that is
composed of approved engineering-centric activities that meet the
criteria of high-impact learning experiences. Undergraduate students
can use their participation in one of these activities to satisfy in part
their **ENGR**[^x] requirement. Full satisfaction of the **ENGR**[^x] requirement
includes participating in an engineering-centric activity and submitting
a meaningful, self-reflection that discusses the impact and overall
experience on the student's education.

Each department in the College of Engineering identifies the activities it
will accept in satisfying a student's **ENGR**[^x] requirement. Some activities
may include the following:

- Education Abroad (https://abroad.tamu.edu/)
- Internship or Co-op Experience (http://careercenter.tamu.edu/current-
  students/)
- Grand Challenge Scholars Program (https://engineering.tamu.edu/
  student-life/gcsp/)
- The University, College, or Departmental Honors Program (http://
  honorsprograms.tamu.edu/)
- Aggies Invent (https://engineering.tamu.edu/student-life/aggies-
  invent/)
- AggieE_Challenge (https://engineering.tamu.edu/academics/
  undergraduate/aggie-challenge/)
- Startup Aggieland (https://mays.tamu.edu/mcferrin-center-for-
  entrepreneurship/startup-aggieland/)
- Undergraduate research (https://engineering.tamu.edu/academics/
  undergraduate/undergraduate-bridges.html)
- TAMU Minor or Certificate Programs, like the Zachry Leadership
  Program (https://engineering.tamu.edu/student-life/zachry-
  leadership-program/) or Engineering Honors Program (https://
  engineering.tamu.edu/academics/eh/)
- Department design competitions, like the High Altitude Balloon Club
  (https://astrocenter.tamu.edu/stem-outreach/high-altitude-balloon-
  club/)
- Leadership in student organizations (https://engineering.tamu.edu/
  student-life/student-orgs.html)

**College Prerequisite Policy**

The following prerequisite policy applies to any student in a College
of Engineering undergraduate degree program and to any student
who seeks admission to an undergraduate degree program in the
College of Engineering. This policy is in addition to prerequisite policies
imposed by the University (Texas A&M University Student Rules). For
complete details concerning this policy, students should contact their
Undergraduate Advising Office.

**Students must earn a grade of C or better in all courses identified in each
College of Engineering undergraduate degree program and any prerequisites
for these courses.** If a student earns a grade of D or F in any of these
courses, the student is required to repeat the course before enrolling
in a more advanced course that has the D/F course as a prerequisite.
A student may attempt a course no more than three times, including
courses graded Q or W but excluding those graded NG, unless approval
has been received from their department. A student must complete all
prerequisites for a course with a grade of C or better by the start of the
semester in which the student plans to enroll in the course.

A student is responsible for checking the prerequisites for each course to
ensure the prerequisite requirements have been satisfied. A student who
registers for a course for which he/she lacks the necessary prerequisite
course(s) and/or the prerequisite grade requirement will be required
to drop the course. A student who is told to drop a course and is still
enrolled by the deadline set each semester may be administratively
dropped by their department. If a student is administratively dropped
from a course, the student is responsible for all financial obligations
associated with the drop. An administrative drop may adversely impact
(including, but not limited to): health insurance benefits, financial
aid, athletic eligibility, INS status, veterans’ benefits, and eligibility to
participate in extracurricular activities.

**Other Requirements**

All required coursework must be taken for a grade to satisfy requirements
for a degree in the College of Engineering. Courses cannot be taken on a
satisfactory/unsatisfactory basis to satisfy this requirement.

**Fast Track Program**

This program allows students to begin making progress toward a
master’s degree while completing the undergraduate program. Each
participating department in the College of Engineering has streamlined
its program for Fast Track participants by substituting specific graduate
courses for selected undergraduate offerings. Academically qualified
students take these 600-level courses during their senior year, earning
graduate credit while fulfilling undergraduate requirements through
"credit by exam." The individual department sets its own grade and exam
requirements for earning dual credit. The department also establishes the
maximum number of credit hours allowed for acceleration, usually five to seven.

**Industry-University Cooperative Education**

Cooperative education is a study-work plan of education in which a student alternates periods of attendance in college or university with periods of employment in industry related to his or her major. Students who choose this degree plan must complete at least 12 months of experience in order to receive the cooperative education certificate. The practice of engineering is an art which is learned through practice as well as in the classroom. The cooperative education program provides the education that can be achieved from practice by having the student work with professional engineers on the job. Consequently, the student who graduates with the cooperative education certificate has both the academic background and the practical experience to qualify him or her for more meaningful employment in the profession of engineering. The cooperative education work periods also provide an income for students that allows them to pay for their school expenses.

Those who wish additional information concerning this program should contact the Associate Director of Cooperative Education (rblock@tamu.edu).

**Advanced Study**

Students who rank in the upper half of their undergraduate class should give serious consideration to developing their full intellectual potential in engineering by continuing with advanced studies at the graduate level. Two routes are available for students. The traditional master of science and doctor of philosophy degrees should be considered by students who wish to go into research fields. For those students interested in the practice of professional engineering, the master of engineering and doctor of engineering degrees should be given serious consideration. The professional doctor of engineering degree was established in the fall of 1974 to fill a need for better-educated engineers in the practice of engineering. Students may enter this program at any time after they receive the bachelor's degree in engineering by applying and being accepted to a departmental graduate program within the College of Engineering. Master's level degrees require a minimum of one year of coursework after the bachelor's, and the doctoral degrees require a minimum of an additional two years of coursework. The doctor of philosophy also requires a dissertation based on research by the student, and the doctor of engineering requires at least one year of internship experience in industry or government.

For more information concerning these programs, please refer to the [Texas A&M University Graduate and Professional Catalog](https://catalog.tamu.edu) or contact the Office of the Dean of Engineering.

The engineering programs also provide a foundation for further education in the fields of medicine, law or business. An engineering background will prepare the individual to understand, contribute to and embrace technical advances in these fields. An early assurance program called Engineering to Medicine (E2M) ([https://medicine.tamu.edu/admissions/early-assurance/](https://medicine.tamu.edu/admissions/early-assurance/)) is available for outstanding Texas A&M University College of Engineering students who are interested in obtaining a medical degree with the Texas A&M College of Medicine, ultimately pursuing a career as a physician or physician scientist.

**The Texas A&M Engineering Academies**

The Texas A&M Engineering Academies are co-enrollment programs between the College of Engineering and select two-year institutions. Students in the Texas A&M Engineering Academy program are Texas A&M engineering students who take math, science, and core courses from the two-year institution and engineering courses from the College of Engineering. Except for the co-enrollment program Texas A&M Engineering at Blinn, the admission process for the Texas A&M Engineering Academies is unique to each partner institution, with the offer of admission to the Texas A&M Engineering Academy made by Texas A&M University. Students enrolled in a Texas A&M Engineering Academy who satisfy the program GPA requirements, may be considered for entry to a major as early as the end of the first year.

Eligible students receive financial aid based upon their combined credit hours from both institutions.

For more information, including specific requirements for each of the partner institutions, visit Texas A&M Engineering Academies ([https://engineering.tamu.edu/academies/](https://engineering.tamu.edu/academies/)).

**Majors**

**College of Engineering**

- Bachelor of Science in Biological and Agricultural Engineering ([http://catalog.tamu.edu/undergraduate/engineering/biological-agricultural-engineering-bs/](http://catalog.tamu.edu/undergraduate/engineering/biological-agricultural-engineering-bs/))

Certificates
The College of Engineering has designed the following certificate programs to offer ambitious students the opportunity to go beyond the traditional curriculum and gain specific knowledge in a concentration
area. Students are required to consult with their academic advisor prior to submitting an application for a certificate. Enrolling and being accepted into a certificate program does not guarantee registration into required courses. Each certificate will be recognized on the candidate's transcript. A coordinator reviews each student's coursework via a certificate worksheet and requirements met prior to certification. Certificate coordinators are given the discretion to determine the eligibility of students in other colleges and/or majors to pursue College of Engineering certificates. For specific information on each certificate available, visit the College of Engineering website.

College of Engineering

- Engineering Concept, Creation, and Commercialization Certificate (http://catalog.tamu.edu/undergraduate/engineering/engineering-concept-creation-commercialization-certificate/)

- Master of Engineering in Ocean Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/ocean/engineering-meng/)
- Master of Science in Ocean Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/ocean/engineering-ms/)
Harold Vance Department of Petroleum Engineering
• Master of Engineering in Petroleum Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/petroleum/meng/)
• Master of Science in Petroleum Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/petroleum/ms/)

Doctoral

Department of Aerospace Engineering
• Doctor of Philosophy in Aerospace Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/aerospace/phd/)

Department of Biomedical Engineering
• Doctor of Philosophy in Biomedical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/biomedical/phd/)

Artie McFerrin Department of Chemical Engineering
• Doctor of Philosophy in Chemical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/chemical/phd/)

Zachry Department of Civil and Environmental Engineering
• Doctor of Philosophy in Civil Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/civil-environmental/phd/)

Department of Computer Science and Engineering
• Doctor of Philosophy in Computer Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/engineering-phd/)
• Doctor of Philosophy in Computer Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/phd/)

Department of Electrical and Computer Engineering
• Doctor of Philosophy in Computer Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/electrical-computer/engineering-phd/)
• Doctor of Philosophy in Electrical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/electrical-computer/electrical-phd/)

Wm Michael Barnes ’64 Department of Industrial and Systems Engineering
• Doctor of Philosophy in Industrial Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/industrial-systems/phd/)

Department of Materials Science and Engineering
• Doctor of Philosophy in Materials Science and Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/materials-science/phd/)

J. Mike Walker ’66 Department of Mechanical Engineering
• Doctor of Philosophy in Mechanical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/mechanical/phd/)

Department of Multidisciplinary Engineering
• Doctor of Engineering in Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/multidisciplinary/engdeng/phd/)
• Doctor of Philosophy in Interdisciplinary Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/multidisciplinary/interdisciplinary/phd/)

Department of Nuclear Engineering
• Doctor of Philosophy in Nuclear Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/nuclear/phd/)

Department of Ocean Engineering
• Doctor of Philosophy in Ocean Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/ocean/ocean-phd/)

Harold Vance Department of Petroleum Engineering
• Doctor of Philosophy in Petroleum Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/petroleum/phd/)
