DEPARTMENT OF MATERIALS SCIENCE AND ENGINEERING

The Department of Materials Science and Engineering is jointly operated by the College of Engineering and College of Science.

The department offers Bachelor of Science, Master of Engineering, Master of Science and Doctor of Philosophy degrees. This multidisciplinary department includes faculty members from several disciplines, including aerospace engineering, biology, biomedical engineering, chemical engineering, chemistry, electrical engineering, mechanical engineering, nuclear engineering and physics. Many of today’s most pressing scientific problems stem from the limitations of materials currently available, and this department is at the forefront of new knowledge and discovery at Texas A&M University.

What is Materials Science and Engineering?

Materials science and engineering involves the characterization of the physical and chemical properties of solid materials—metals and alloys, ceramics, magnetic materials, polymers, optical materials, semiconductors, superconductors, and composites—for the purpose of using, changing, or enhancing inherent properties to create or improve end products. Materials science and engineering involves examining how the microstructure (crystalline or amorphous) of a material can be changed to influence the strength, electrical conductivity, optical, or magnetic properties of a material. This field is inherently multidisciplinary, encompassing mechanical, chemical, biomedical, civil, electrical, and aerospace engineering; physics; and chemistry.

Materials science comprises the study of materials from the macro to the atomic scale—from highway building materials to carbon nanotubes—but, independent of scale, the study of materials is concerned fundamentally with the effect of structure and chemistry on the properties of materials.

Materials have historically been so important that different eras of civilization were named according to the materials from which tools were fabricated; for example, the Stone Age, the Bronze Age, and the Iron Age. The development of the semiconductor spawned the modern era of information technology often called the Silicon Age. Advances in materials science might make this new millennium the Biomaterials/ Nanomaterials/Optical Materials Age.

What do Materials Scientists and Engineers do?

In industry, materials scientists and engineers work with natural or synthetic materials and, most often, with combinations of materials, to improve existing products or to develop novel products. For instance, at Intel, the developer of the processing chip used in most PCs, materials scientists optimize the materials used in chip packaging, balancing differing coefficients of thermal expansion, head dissipation, brittleness and compliancy, and cost for optimum performance and economic feasibility.

Other materials scientists are on the forefront of the revolution in biotechnology, developing materials for the components of artificial joints, heart valves, and other replacement body parts. Smart materials show a tremendous potential in medical and dental applications, such as compressible stents that reform to their intended shape upon contact with body heat once inserted into an artery, ceramic cement for bone repair, or shape-memory alloys to correct misplaced teeth or spine curvature. (Smart materials have one or more properties that can be dramatically altered, such as multiviscosity oil, with a viscosity that varies with temperature.)

Related research involves developing smaller and more reliable components, such as ferromagnetic activators acting as tiny machines in military and other applications. In aerospace engineering, materials scientists are developing airframe and fuselage materials with high strength-to-weight ratios, as well as developing smart materials into integrated sensors and actuators for reconfigurable wings and other adaptive structures.

For more information, visit the Department of Materials Science and Engineering (http://engineering.tamu.edu/materials) website.

Faculty

Akbulut, Mustafa, Associate Professor
Materials Science & Engr
PHD, University of California, Santa Barbara, 2007

Alge, Daniel L, Assistant Professor
Materials Science & Engr
PHD, Purdue University, 2010

Arroyave, Raymundo, Professor
Materials Science & Engr
PHD, Massachusetts Inst of Technology, 2004

Asadi, Amir, Assistant Professor
Materials Science & Engr
PHD, University of Manitoba, 2013

Atli, Kadri Can, Research Assistant Professor
Materials Science & Engr
PHD, Texas A&M University, 2011

Balbuena, Perla B, Professor
Materials Science & Engr
PHD, University of Texas, 1996

Banerjee, Sarbajit, Professor
Materials Science & Engr
PHD, State University of New York at Stony Brook, 2004

Batteas, James D, Professor
Materials Science & Engr
PHD, University of California, Berkeley, 1995

Bazzi, Hassan, Professor
Materials Science & Engr
PHD, McGill University, 2003

Benzerga, Amine A, Professor
Materials Science & Engr

Cagin, Tahir, Professor
Materials Science & Engr
PHD, Clemson University, 1988

Case, Raymundo P, Professor of the Practice
Materials Science & Engr
PHD, University of Manchester Institute of Science and Technology, 2002
Castaneda-Lopez, Homero, Associate Professor
Materials Science & Engr
PhD, Penn State University, 2001

Cheng, Zheng Dong, Professor
Materials Science & Engr
PhD, Princeton University, 1999

Creasy, Terry S, Associate Professor
Materials Science & Engr
PhD, University of Delaware, 1997

Demkowicz, Michal J, Associate Professor
Materials Science & Engr
PhD, Massachusetts Institute of Technology, 2005

Elabd, Yossef A, Professor
Materials Science & Engr
PhD, Johns Hopkins University, 2001

Elwany, Alaa Mohamed, Assistant Professor
Materials Science & Engr
PhD, Georgia Institute of Technology, 2009

Fang, Lei, Assistant Professor
Materials Science & Engr
PhD, Northwestern University, 2010

Gaharwar, Akhilesh K, Assistant Professor
Materials Science & Engr
PhD, Purdue University, 2011

Grasley, Zachary C, Professor
Materials Science & Engr
PhD, University of Illinois Urbana Champaign, 2006

Green, Micah, Associate Professor
Materials Science & Engr
PhD, Massachusetts Institute of Technology, 2007

Grunlan, Jaime C, Professor
Materials Science & Engr
PhD, University of Minnesota, 2001

Grunlan, Melissa A, Professor
Materials Science & Engr
PhD, University of South Carolina, 2004

Guo, Bing, Assistant Professor
Materials Science & Engr
PhD, Tsinghua University, China, 1998

Harris, Harlan R, Associate Professor
Materials Science & Engr
PhD, Texas Tech University, 2003

Hartwig, Karl T, Emeritus Professor
Materials Science & Engr
PhD, University of Wisconsin - madison, 1977

Hemmer, Philip R, Professor
Materials Science & Engr
PhD, Massachusetts Inst of Technology, 1984

Hipwell, M Cynthia, TEES Eminent Professor
Materials Science & Engr
PhD, University of California-Berkeley, 1996

Hwang, Wonmuk, Associate Professor
Materials Science & Engr
PhD, Boston University, 2001

Jeong, Hae-Kwon, Associate Professor
Materials Science & Engr
PhD, University of Minnesota, 2004

Kameoka, Jun, Professor
Materials Science & Engr
PhD, Cornell University, 2002

Kane, Matthew H, Associate Professor
Materials Science & Engr
PhD, Georgia Institute of Technology, 2007

Karaman, Ibrahim, Professor
Materials Science & Engr
PhD, University of Illinois - Urbana-Champaign, 2000

Kuo, Chun Hsin, TEES Associate Research Scientist
Materials Science & Engr
PhD, University of Birmingham, 2010

Kuo, Yue, Associate Professor
Materials Science & Engr
PhD, Columbia University, 1980

Kuttolamadom, Mathew A, Assistant Professor
Materials Science & Engr
PhD, Clemson University, 2012

Lagoudas, Dimitris C, Professor
Materials Science & Engr
PhD, Lehigh University, 1986

Le Graverend, Jean-Briac B, Associate Professor
Materials Science & Engr
PhD, Ecole Nationale de Mécanique et d’Aérotechnique, France, 2013

Liang, Hong, Professor
Materials Science & Engr
PhD, Stevens Institute of Technology, 1992

Lin, Paotai, Assistant Professor
Materials Science & Engr
PhD, Northwestern University, 2009

Lutkenhaus, Jodie, Associate Professor
Materials Science & Engr
PhD, University of Notre Dame, 2003

Ma, Chao, Assistant Professor
Materials Science & Engr
PhD, University of California, 2015

Madsen, Christi K, Professor
Materials Science & Engr
PhD, Rutgers State University of New Jersey, 1996
