DEPARTMENT OF NUCLEAR ENGINEERING

Overview

Nuclear Engineering

Nuclear engineering deals with the application and utilization of nuclear processes and radiations. The use of nuclear energy for the production of electrical power is a mature industry. Nuclear engineers work on all aspects of the nuclear fuel cycle and for many different types of employers such as government and private labs, regulatory agencies, reactor vendors, utilities and architect engineers. In addition, nuclear energy for space applications is a rapidly expanding field. Radionuclide technology in industry and medicine requires a large number of well-trained radiological health engineers. To supply qualified engineers, the Department of Nuclear Engineering offers curricula leading to the Bachelor of Science degree in Nuclear Engineering and is accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org).

The missions of the Department of Nuclear Engineering are:

- to produce high-quality graduates from the undergraduate through the doctoral levels to help meet the technical manpower needs of our state, region, nation, and the international community;
- to conduct research, including collaboration with research in related fields, to advance the state of knowledge in these disciplines in support of the needs of society; and
- to perform service in these disciplines for many constituencies including our College and University, industry, government and national laboratories, professional organizations, and the public.

In fulfilling these missions, the objective of the undergraduate program is to prepare students for success in their professional endeavors following the baccalaureate degree. These endeavors may include direct employment in the private or public sectors, graduate studies in engineering or science, professional studies in medicine, business, law or public administration, service in the military, or entrepreneurial activities. To achieve this purpose, four principal educational objectives are identified. Graduates of our Bachelor of Science program in Nuclear Engineering:

1. will work on the challenges of maintenance, improvement, innovation, education, and research in nuclear power and industrial utilization of nuclear radiation and radionuclides. In this work, they will fulfill independent assignments, engage in collaborations, and manage the work of others with effective communications characterizing all phases of their responsibilities;
2. will conduct their professional activities with full recognition of the choices and challenges implicit to their work, to its ethical dimensions, and to their implications for matters beyond their immediate tasks;
3. will take the local, global, historical, social, economic, and political settings into account in both their domestic and international endeavors; and
4. will recognize and utilize both the accumulated body of results from prior work and the continuing evolution of science and technology as essential resources for the effective conduct of their work.

The nuclear engineering baccalaureate degree programs stress engineering science fundamentals and mathematics. However, considerable numbers of elective hours are available in the curriculum to permit students to broaden their educations as desired.

Most of the facilities used in the MS and PhD programs are also used in the undergraduate degree programs. These facilities make the Department of Nuclear Engineering one of the best equipped in the United States. Texas A&M is now the only University in the United States with two nuclear reactors on its campus.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Majors

- Bachelor of Science in Nuclear Engineering ([http://catalog.tamu.edu/undergraduate/engineering/nuclear/bs](http://catalog.tamu.edu/undergraduate/engineering/nuclear/bs))

Minors

- Nuclear Engineering Minor ([http://catalog.tamu.edu/undergraduate/engineering/nuclear/bs](http://catalog.tamu.edu/undergraduate/engineering/nuclear/bs))
- Radiological Health Engineering Minor ([http://catalog.tamu.edu/undergraduate/engineering/nuclear/bs](http://catalog.tamu.edu/undergraduate/engineering/nuclear/bs))

Faculty

- Adams, Marvin L, Professor
  Nuclear Engineering
  PHD, University of Michigan - Ann Arbor, 1986

- Ahmed, Karim E, Assistant Professor
  Nuclear Engineering
  PHD, Purdue University, 2015

- Chirayath, Sunil S, Associate Professor
  Nuclear Engineering
  PHD, University of Madras, India, 2005

- Dewji, Shaheen Azim, Assistant Professor
  Nuclear Engineering
  PHD, Georgia Institute of Technology, 2014

- Ford, John R, Associate Professor
  Nuclear Engineering
  PHD, University of Tennessee, 1992

- Hassan, Yassin A, Professor
  Nuclear Engineering
  PHD, University of Illinois, 1980

- Kimber, Mark L, Assistant Professor
  Nuclear Engineering
  PHD, Purdue University, 2008

- Kirkland, Karen K, Professor
  Nuclear Engineering
  PHD, The University of Tokyo, 1999

- Kurwitz, Richard C, Senior Lecturer
  Nuclear Engineering
  PHD, Texas A&M University, 2009
Marianno, Craig M, Assistant Professor
Nuclear Engineering
PHD, Oregon State University, 2000

Marlow, William H, Senior Professor
Nuclear Engineering
PHD, University of Texas, 1974
PHD, University of Texas, 1973

McDeavitt, Sean M, Professor
Nuclear Engineering
PHD, Purdue University, 1992

Morel, Jim E, Professor
Nuclear Engineering
PHD, The University of New Mexico, 1979

Nguyen, Duy T, Research Assistant Professor
Nuclear Engineering
DEN, Ritsumeikan University, 2010

Ostrovskaya, Natela G, Senior Lecturer
Nuclear Engineering
PHD, Texas A&M University, 2005

Peddicord, Kenneth L, Professor
Nuclear Engineering
PHD, University of Illinois, 1972

Poston, John W, Professor
Nuclear Engineering
PHD, Georgia Institute of Technology, 1971

Prasad, Shikha, Assistant Professor
Nuclear Engineering
PHD, University of Michigan, Ann Arbor, 2012

Ragusa, Jean C, Professor
Nuclear Engineering
PHD, Institut National Polytechnique de Grenoble, France, 2002

Shao, Lin, Professor
Nuclear Engineering
PHD, University of Houston, 2001

Tsvetkov, Pavel V, Associate Professor
Nuclear Engineering
PHD, Texas A&M University, 2002

Tsvetkova, Galina V, Lecturer
Nuclear Engineering
PHD, Texas A&M University, 2003

Vaghetto, Rodolfo, Research Assistant Professor
Nuclear Engineering
PHD, Texas A&M University, 2013
