

ARTIFICIAL INTELLIGENCE IN THE ARTS - MINOR

This minor offers essential training and qualifications, positioning students for success in the evolving landscape of AI-enhanced art.

Artificial Intelligence (AI) is revolutionizing the way artists create, enhancing both the creative process and productivity across various art forms. The Minor in Artificial Intelligence in the Arts is designed to meet the growing demand for AI integration in artistic practice, equipping students with the skills to incorporate AI into visual arts, dance, theatre, interactive media, and music. The program provides a comprehensive education on the use of AI tools, emphasizing critical decision-making, ethical considerations, and the social implications of AI.
