The School of Public Health is the first of its kind in the nation. The Texas Legislature established the school in 1995 as part of a rural health initiative to better address rural health needs in the state. After receiving degree-granting authority for the Master of Public Health degree in April 1998 from the Texas Higher Education Coordinating Board, the School of Rural Public Health welcomed its inaugural class in September 1998.

In 2014, the School of Public Health welcomed its first students into the brand-new Bachelor of Science in Public Health program, the first program of its kind in the state affiliated with a fully accredited School of Public Health. With a mission to serve the public health needs of the entire state, the undergraduate program is based on a philosophy of health promotion and disease prevention to improve the quality of life of individuals, families, and communities in the State of Texas and beyond. Graduates of the BSPH program will be able to assess factors influencing health in populations as well as plan, design, implement and successfully manage effective healthcare programs and interventions as well as be well-positioned for careers in medicine, nursing and other allied health professions.
