The typical land-grant institutional mandate of teaching, research, patient care, and service provides the organizational framework necessary to meet the dynamics in the ever-changing field of veterinary medicine.

An extensive research program to improve the health of animals, humans, and the environment is conducted by the faculty and staff of the School, and a substantial number of the teaching faculty members are engaged in research.

A veterinary extension program carries research information to veterinarians, animal owners, and others in the state and nation with the least possible delay. The faculty makes research information available to the students in the classroom and laboratories in a timely manner.

The typical land-grant institutional mandate of teaching, research, patient care and service provides the organizational framework necessary to meet the dynamics in the ever-changing field of veterinary medicine.

Graduate programs leading to the Master of Science (Non-Thesis and Thesis Options) and Doctor of Philosophy degrees are available through a School of Veterinary Medicine and Biomedical Sciences umbrella Graduate Program focused in four training tracks (Biomedical Genomics and Bioinformatics, Diagnostics and Therapeutics, Infection, Immunity and Epidemiology, and Physiology and Developmental Biology). The Department of Veterinary Integrative Biosciences offers a Science and Technology Journalism MS program and a Veterinary Epidemiology and Public Health MS program. Clinical specialty training programs are also available to provide effective training in the areas of professional specialization. The Interdisciplinary Faculty of Toxicology, a MS and PhD granting program composed of faculty from five colleges, is administratively housed in the School of Veterinary Medicine and Biomedical Sciences.
