MANAGEMENT INFORMATION SYSTEMS - BBA

The Department of Information and Operations Management offers a Bachelor of Business Administration (BBA) degree in Management Information Systems (MISY). The MISY major addresses the impact of computer-based information systems in a variety of organizational settings. The degree program produces graduates who are both business analysts (i.e., professionals who understand accounting, marketing, finance, etc.) and information system specialists (i.e., professionals who can implement information systems strategies).

Graduates of the program possess the business, technical, and leadership skills to meet the challenges presented by rapidly evolving information technology and the need to effectively incorporate this technology into business strategy and day-to-day operations.

For more information visit the BBA Management Information Systems (https://mays.tamu.edu/undergraduate/bba/management-informationsystems/) website.

Upper-Level Entry Requirements

Admission to the upper level major of MISY requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (http://catalog.tamu.edu/undergraduate/business/).
